SPES Actiumus, the present name of Beni-hassa, was situated N. of Antium, in Middle Aegypt, on the eastern bank of the Nile, in lat. 27° 40' N. The name is variously written; Poes in the Itinerary of Antoninus (p. 167, Weselius); Posis in the Notitia Imperii; but Spes is probably the true form, implying an excavation (éwer) in the rocks. Spes Actiumus was inhabited by the French and Tuscan expedition into Egypt early in the present century. It was constructed by some of the Pharoahs of the 18th dynasty in a desert-valley running into the chimney of Arabian hills. The structure as a whole consists of a temple, and of between thirty and forty cactombs. The temple is dedicated to Pachth, Bubastis, the Artemis of the Greeks. (Herod. ii. 58.) The III. of s. 9 and its memory is still preserved as the general necropolis of the Hermopolis nome. For although Hermopolis and its district lay on the western bank of the Nile, yet as the eastern hills at this spot approach very closely to the stream, while the western hills recede from it, it was more convenient to ferry the dead over the river than to transport them to the same. So early as 31 B.C. these cactombs were appropriated to the mummies of animals, cats especially, which were worshipped by the Hermopolitans. In the general cemetery two of these cactombs merit particular attention: (1) the tomb of Neophytos, a military chief in the reign of Seoseis I. and of his wife Bote; (2) that of Amenemes, of nearly the same age, and of very similar costume. The tomb of Neophytos, and, or it is more usually denominated, of Bote, has in front an architrave excavated from the rock, and supported by two columns, each 23 feet high, with sixteen fluted facets. The columns have neither base nor capital; but between the architrave and the head of the column a square abacus is inserted. A dented cornice architrave, on the pediment. [D] The effect of the structure, although it is hardly detached from the rock, is light and graceful. The chamber or crypt is 30 feet square, and its roof is divided into three vaults by two architraves, each of which was originally supported by a single column, now vanished. The walls are painted in compartments of the most brilliant colours, and the
drawing is generally in the best style of Egyptian art. The temple represents various events in the life of Osiris. From the tomb of Toet, indeed, might be compiled a very copious record of the domestic life of the Egyptians. On its walls are depicted, among many others, the following subjects: the return of warriors with their captives; wrestlers; hunting wild beasts and deer; the Nile boats, including the large river-wagons and smaller fishing boats; granaries and flax-dressing; spinning and weaving; games with the lance, the ball, and the discus; and the rites of seaports. The tomb of Amenemhe is covered also with representations of men in various postures of wrestling; and the other grotesques are not less interesting for their portraits of civil and religious life. (Wilkinson, Modern Egypt and Thebes, Rosellini, Mon. Ori. vol. i.; Kemrick, Anc. Egypt, vol. i. p. 47, foll.)

[S.P.B.I.]

SPERCHEIUS (Σπερχειος; Sperchios), a river in the S. of Thessaly, rising in Mount Thermopylaeus (Strab. ix. p. 433), and flowing into the Maelian gulf. The Dryopaeus and Aenianaei dwell in the upper parts of it; the former within the bounds of Molossia, through which it flowed to the sea. In ancient times it joined the sea at Anticyra; and the rivers Dyrrac, Melas, and Aenopos fall separately into the sea to the S. of the Spercheius. (Herod. vii. 198.) But the Spercheius has changed its course, and now falls into the sea much farther south, about a mile from Thermopylaeus. The Dyrrac and Melas now unite, and fall into the Spercheius, as does also the Aenopos. (Thermopylæa.) Spercheius is celebrated in mythology as a river-god (Dict. of Biogr. s. v.), and is mentioned in connection with Achilles. (Hom. Iliad. vii. 142.) Its name also frequently occurs in the other poets. (Asch. Pers. 486; Soph. Phil. 722; Vitr. Georg. ii. 463; Liv. 36.) (Leake, Northern Greece, vol. ii. pp. 8, 11, 15.)

SPERCHEUS, a place in Thessaly, which, according to the description of Lizy (xxxii. 13), would seem to have been situated at no great distance from the sources of the Spercheius. Ptolemy (iii. 13. § 17) mentions a place Spercheia between Echinus and Elaius; and Ptolemy (iv. 7. 1. 4) mentions a place Spercheios in Doris. It is probable that these three names indicate the same place, but that its real position was unknown.

SPHACETIA. [Phylus.]

SPHAERIA. [Calauria.]

SPHAIGLAE. [Phylus.]

SPHENDAIRE. [Attica, p. 330, a.]

SPHENTAZIUM, a place in Dalmatia, SE. of the road from Scodra to Nais. (Ann. Comm. 9. p. 259.) Probably the modern Pecolona. (T. H. D.)

SPHETTUS. [Attica, p. 332, b.]

SPHINGIUM. [Bosozta, p. 412, a.]

SPINA (Σπίνα, Strab.; Σπίνα, Steph. B.; Ecd. Σπίνας and Σπίναν), an ancient city of Italy, situated on the coast near most of the Padus, within the limits of Gallia Cisalpina. It was, according to Dionysius, a Pelagic settlement, and one of the most flourishing cities founded by that people in Italy, enjoying for a considerable time the dominion of the Adriatic, and deriving great wealth from its commercial relations, so that the citizens had a treasury at Delphi, which they adorned with costly offerings. They were subsequently expelled from their city by an overwhelming force of barbarians, and compelled to abandon Italy. (Dionys. i. 18, 28.) Strabo gives a similar account of the naval greatness of Spina, as well as of its treasury at Delphi; but he calls it a Greek (Hellenic) city; and Sclavus, who notices only Greek, or reputed Greek, cities, mentions Spina apparently as such. Its Greek origin is confirmed also by Justin, whose authority, however, is not worth much. (Strab. v. p. 214, ix. p. 431; Sclav. p. 6, § 19; Justin, xx. 1; Plin. iii. 16. a. 200.) But we have also the authorities, as well as the fact itself, that it had a treasury at Delphi, which is undoubtedly historical, seem to exclude the supposition that it was an Etruscan city, like the neighbouring Adria: and whatever be the foundation of the story of the old Pelagic settlement, there seems no reason to doubt that it was really a Greek colony, though we have no account of the period of its establishment. Sclavus alludes to it in his time; he says: it is clear that the barbarians who are said by Demetrius to have driven out the inhabitants, can be no other than the neighbouring Gauls; and that the period of its destruction was not very long before the conquest of Cisalpine Gaul by the Romans. It does not appear to have ever been rebuilt or became a Roman colony. It was situated in the territory of Metamors village; and Pliny repeatedly alludes to it as a place no longer in existence. (Plin. iii. 16. a. 20, 17. a. 21; Strab. v. p. 214.) No subsequent trace of it is found, and its site has never been ascertained. We know, however, that it must have been situated on or near the southernmost arm of the Padus, which divides itself into two principal streams, Spercutum and Citellum, and which probably corresponded with the modern Canale Piccolo and Po di Primauro. (Padus.) But the site of Spina must now be sought far from the sea: Strabo tells us that even in his time it was 90 stadia (11 miles) from the coast; though it was said to have been originally situated on the sea. It is probably now 4 or 5 miles further inland; but the changes which have taken place in the channels of the rivers, as well as the vast accumulations of alluvial soil, render it almost hopeless to look for its site.

Pliny tells us that the Spistic branch of the Padus was the one which was otherwise called Eridanus; but it is probable that this was merely one of the attempts to connect the mythical Eridanus with the Padus. The valley of the Eridanus is one particular branch of the existing river. It is, however, probable that the Spistic channel was, in very early times, one of the principal mouths of the river, and much more considerable than it afterwards became. (P. D.)

[.E.K.B.]

SPINAE, a place in Britannia Romana, E. of Aqua Sulis (Bath). (Ital. Ant. pp. 485, 486.) Now the village of Spine near Newbury in Berkshire, which has its name of new in regard to Spino, the ancient borough. (Campion, p. 166.) [T. H. D.]

SPIRAEUM (Plin. iv. s. 9. a) or SPIRÆAUM (Ptol. iii. 16. § 12), a promontory on the eastern coast of Peloponnese upon the confines of the territories of Corinth and Epidaurus. For details, see Ven. i. 20. 21.

SPOLETUM (Σπολείων; Ecd. Spoletinus; Spoleto), a city of Umbria, situated between Interamnæ (Terni) and Treviae (Trent), about 9 miles S. of the sources of the Clitumnus. Its name is not mentioned in history as an Umbrian town, nor have we any account of its existence previous to the establishment of the Roman colony, which was settled there in a. c. 294, just after the close of the First Punic War (Liv. Epit. xx.; Vell. Pat. i. 14). It was a Colonies Latina, and its name is repeatedly mentioned during the Second Punic War.
SPOLETIUM.

In B.C. 217, just after the battle at the Lake Trasimenus, Hannibal advanced to the gates of Spoleto, and made an assault upon the city, but was repulsed with so much vigour by the colonists, that he drew off his forces and crossed the Apennines into Picenum. (Liv. xxiii. 9.) A few years later (212 B.C.) Spoleto was one of the colonies which distinguished themselves by their fidelity and zeal in the service of Rome, at the most trying moment of the war. (Id. xxvii. 10.) For some time after this we hear but little of Spoleto, though it seems to have been a flourishing municipal town. In B.C. 167 it was selected by the Senate, as the place of destination of the Gallic king of Illyria, and his son; but the citizens declined to take charge of them, and they were transferred to Iguvium (Liv. xiv. 43). But in the civil war between Marius and Sulla it suffered severely. A battle was fought beneath its walls in B.C. 82, between Pompeius and Crassus, the generals of Sulla, and Carrinas, the lieutenant of Caesar, in which the latter was defeated, and compelled to take refuge in the city. (Appian, B. C. i. 89.) After the victory of Sulla, Spoleto was one of the places severely punished, all its territory being confiscated, apparently for the settlement of a military colony. (Flor. iii. 21; Zumpt, de Colom. p. 254.) Florus calls Spoleto at this time one of the "municipia Galiae," but this is probably a rhetorical exaggeration. Cicero, however, terms it, in reference to a somewhat earlier period, "colonia Latina in primis firmis et illustribus." (Cic. pro Balb. 21.) It became a municipium (in common with other Latin colonies) by virtue of the Lex Julia; and does not appear to have subsequently obtained the title of a municipium Gallici, but this is probably a rhetorical exaggeration. It is again mentioned during the Perusinian War (A.D. 41), as affording a retreat to Minucius Plancus when he was defeated by Octavian (Appian, B.C. v. 33); and seems to have continued under the Empire to be a flourishing municipal town, though rarely mentioned in history. (Strabo, v. 14; Plin. iii. 14; i. 19; Publ. i. 1 § 54; Orell. Inscr. 1100, 1103, 3966.) It was at or near Spoleto that the emperor Aemilius Paulus was encamped, when the death of his rival Gallus and Volusianus gave him temporary possession of the empire; and it was there also that he was himself put to death by his soldiers, after a reign of only three months. (Vit. Epip. 31.) Spoleto is again mentioned during the Gothic War, after the fall of the Western Empire, when it was taken by the Gothic king Totila (Procop. B. G. iii. 12), who partially destroyed its fortifications; but these were restored by Narsetes (ib. iv. 33). It was at this time regarded as a strong fortress, and was a place of importance on that account, as a point of transition of a duchy (about A.D. 570), the dukes of which soon rendered themselves altogether independent of the Lombard kings, and established their authority over a considerable part of Central Italy. The duchy of Spoleto did not cease to exist till the 12th century.

Flaminian Way as late as the time of Vespasian (Tac. Hist. iii. 60); but at a later period the road through Interamna and Spoleto came into general use, and is the one given in the Itineraries. (Itin. Ant. p. 125; Itin. Hier. p. 618.) This must have followed very nearly the same line with the modern road from Rome to Frosinone, which crosses the mountain pass, called Monte Somma, between Spoleto and Terracina; and this was probably the reason that this line was avoided in the first instance by the Via Flaminia. But there must always have been a branch road to Spoleto, and from thence, as we learn from Suetonius (Vesp. 1), another branch led to Nursia in the use of a lay-out of the Via Flaminia.

Spoleto is still a tolerably flourishing place, with the rank of a city. It has several Roman remains, among which the most interesting is an arch commonly called the Porta d'Ammidale, as being supposed to be the gate of the city from whence that general was repulsed. There is, however, no foundation for this; and it is doubtful whether the arch was a gateway at all. Some remains of an ancient theatre are still visible, and portions of two or three ancient temples are built into the walls of modern churches. A noble aqueduct, by which the city is still supplied with water, though often ascribed to the Romans, is not really earlier than the time of the Lombard dukes. Some remains of the palace inhabited by the latter, but first built by Theodoric, are also visible in the cistelad which crowns the hill above the town.

E. H. B.

SPORADES (Σπόραδες), or the "Scattered," a group of islands in the Aegean, Crestan, and Carpathian seas, so called because they were scattered throughout these seas, in opposition to the Cyclades, which lay round the coast of the Morea. The distinction between these groups was not accurately observed, and we find several islands sometimes ascribed to the Cyclades, and sometimes to the Sporades. The islands usually included among the Cyclades are given under that article. [Vol. I. p. 723.] Sycylax makes two groups of Cyclades: but Strabo mentions, in his southern group, which is the places off the coast of Laconia and near Crete, are the Sporades of other writers: in this southern group Sycylax specifies. Melos, Cnidos, Olaria, Sicos, Theria, Anaphé, Astylaepae (p. 18, ed. Hudson). Strabo first mentions among the Sporades the islands lying off Crete,— Theria, Anaphé, Therasia, Ios, Sicos, Lagous, Phlegadros (x. pp. 484, 485). Then, after describing the Cyclades, he resumes his enumeration of the Sporades,—Amorgos, Lébinthos, Leria, Patmos, the Corassae, Icaria, Astylaepae, Telos, Chalcia, Niayos, Cades, the Caýlides (z. pp. 487—489). Pliny (iv. 12. a. 23) gives a still longer list. An account of each island is given under its own name.

STABATIA, in Gallia, a name which occurs in the Table on a road from Vienna (Vienne) past Cularo (Grenoble) to the Alpis Cottia (Mont Genèvre). Stabatio is placed between Durocinum and Alpis Cottia. D'anville fixed Stabatio at Monestier or Monestier near Brison.
STABULAE.

(Plin. iii. 6. a. 9.) Nor was it ever restored, so as to resume the rank of a town; Pliny tells us that it was in his time a mere village, and the name is not mentioned by any of the other geographers. It is, however, incidentally noticed both by Ovid and Columella (i.e. it was known, and appears to have been, in common with the whole coast of the Bay of Naples, a favourite locality for villas. Among others Pomponianus, the friend of the elder Pliny, had a villa there, where the great naturalist sought refuge during the celebrated eruption of Vesuvius in A.D. 79, and where he perished, suffocated by the gas and steam from the mountain (Plin. Ep. vii. 16). It is certain that Stabiae was on this occasion buried under the ashes and cinders of the volcano, though less completely than Pompeii and Herculanum; but the site was again inhabited, and the name was retained throughout the period of the Roman Empire, though it appears to have never again risen into a place of any consideration. It was chiefly respected by invalids and others, on account of its neighbourhood to the Mount Lariscus, for the purpose of adopting a milk diet (Galen, de Med. v. 12; Cassiod. Var. xii. 10; Symmach. Ep. vii. 17). Its name is found also in the Tabula, and was preserved in that of Castell' a Mare di Stabia, borne by the modern town. The Stabiae of the Lower Campagna seems to have been situated on the east coast, in the bay of the Bay of Naples; and probably did not occupy the same site with the older town, which seems to have been situated about a mile inland at the foot of the hill of Guarinoso. The exact spot was forgotten till the remains were accidentally brought to light about 1750; and since that time, asstray fragments have been frequently washed down the site, but the results are far less interesting than those of Pompeii and Herculaneum. They confirm the account of Pliny, by showing that there was no town on the spot, but merely a row of straggling villas, and these for the most part of an inferior class. They seem to have suffered severer from the earthquake of a.d. 63, which did so much damage to Pompeii and Herculaneum (Swinhew's Travels, vol. i. p. 63.) — [E. H. B.]

STABULA, in Gallia, is placed by the Antonine Itin. vi. from Cambes (Oro Kewba) and xvii. from Argentorata (Artemisiae). These distances bring us to a place between Oesmaraes and Bonaebeia, where Rhaemana, quoted by D' Anville, says that tradus patera were found. The word Stabula meant a station or resting place for travellers, a kind of inn, as we see from a passage of Ulpian (Digl. 47. tit. 5. a. 1): "qui navem, cauponam, stabulam exercent;" and the men who kept these places were "Stabularis." — [G. L.]

STABULUM, AD, in Gallia, is placed by the Antonine Itin. between Salona (Salodi) and Summus Pyreneus, or the pass of Pyreneus at Bolligard. It is supposed to be Le Bois, which looks like a part of the old name, on the left bank of the Teuch. The distances in the Itin. both from Salona to Ad Stabulum, and from Ad Stabulum to Summus Pyreneus, are a great deal too much. The name, however, and the place Le Bois on the Teuch agree in being on the path of the Teuch at Bolligard. The more usual name is Stabulum. — [G. L.]

STABULUM DIOMEDIS (Itin. Ant. iii. p. 331; It. Hier. p. 608), a place on the coast of Thrace, on the Via Egnatia, 18,000 paces, according to Itin. Ant., 19,000, according to It. Hier., from Patrae, or Maximianopolis; probably the same as Pliny (iv. 11. a. 18) calls Tirida: "Oppidum fuit Tirida, De medis equorum stabulis dirum." This Diodon was king of the Bistonæ in Thrace, and was in the habit of throwing strangers to be devoured by his savage horses, till at length he himself was punished in the same manner by Patroclus, as is related by Strabo (viii. 3. 38), and 2. 8. 3. Many places lie near the modern Issakieí. — [J. B.]

STACHYX (3redyex, Potl. iv. 6. §§ 7 and 8), a town of Euboea, was fifty stades from Mount Rysodium. Not far from its source it formed a lake named Clonia, and after flowing in a westerly direction, discharged itself into the Smes Hesperios, to the SE. of the promontory of Rysodium. It is probably the same river which Pliny (v. 1. a. 1) calls Salus, and may be the modern St. John or St. Antonio river, also called Ille de Gounos. — [T. H. D.]

STAGEIRA, STAGEIRUS (3redyex, Herc. vii. 115; Thuc. iv. 88, v. 18; Strab. vii. p. 331, Fr. 33, 35; 3redyex, al. 3redyex, Potl. iii. 13. §§ 10; Plin. iv. 17, xvi. 57), a town of Chalcidice in Macedonia, and a colony of Arcadia. The army of Xerxes, after passing through the plain of Sydess, went by Mount Stagira, and through the pass between Mount Stagira and Mount Athos. In the eighth year of the Peloponnesian War it was rendered to Brasidas, and two years afterwards was included in the treaty between Sparta and Athens. It was the birthplace of Aristotle. Alexander, from regard to his great teacher, restored this town, which with other Grecian colonies in that quarter was granted by Cleomenes (Mela, ii. 88) to Athens, the part of the Macedonian kingdom. (Ptolem. Alex. 7; Dic. L. v. 4; Theoph. H. P. 102; Arian. V. H. ii. 17.) But the improvement was not permanent, and no memorial of the birthplace of Aristotle remains, unless the coins inscribed Οσφαργεως are of this place, as Eckhel (vol. ii. p. 73) supposed, on the authority of a fragment of the text in a manuscript. Leske (Northern Greece, vol. iii. p. 167) has fixed the site at Stavros, which he considers to be a contraction of the old name: it is almost presumptive to differ with so great an authority in comparative geography; but it may be observed that the name Stavros or "Cross" is common enough in Greece, and Mr. Bowes (Moust Athos, 4th ed. p. 150, London, 1859) has shown, from a comparison with the passage in Herodotus (i. c.), that the traditional belief of the Macedonian peasants in identifying Ithocea or Nisio, as it is called by them, with Stageira, rests upon satisfactory grounds. The position of this village, on the S. face of a wooded mountain which commands a view of Mt. Athos and the Aegean, was in the times of a Hellenic city, and there are vast substructions of Hellenic masonry all around. The Ephimiser of Strabo (vii. p. 331), who lived not long before the eleventh century, has a port and island called Caprae (Kapara) near Stageira, which is probably the island of Leybibokah near C. Murmirei; Leske (i. c.) locates it, in very much agreement with his view of the text, on the coast of stageira, the port and island of Leybibokah. — [E. B. J.]

STAGNA VOLCARUM, on the coast of Gallia Narbonensis. Mela (ii. 5) speaks of the Stagna Volcarum, which he places W. of the Ebene. They are the long line of stagna between Algygos-Merime."
and Apsa, separated from the land by a long, narrow, flat, which widens near Cettia, where the Mons Setius is. These lagoons are the Etruria de Taus, de Prontigiam, de Maculone, and others. Avienus (Or. Marit. 58) mentions the Taurus or Etruria de Taus:

"Taurus paludem namque gentiles vocant."

[LECTUS JUGUM: LEBUS.] [G. L.]

STALLIOCANUS PORTUS [Στάλιοκανος Πόρτος] (II. 8 § 2) places this port near the Gobaeaum Promontorium [Γόβαεα] and the mouth of the Tetus, on the coast of Gallia Lugdunensis. D'Anville (Notices, &c.) found in a manuscript plan of the Anse de Conques the name of Port Sigebum, N. of Cap Mahé, at the bottom of the road of Loc. Christ. Lobineau in his History of Bretagne says that the name means White Tower, and that there were traces of a port there, constructed of brick and cement. Gesellin places the Stalliocanus on the N. coast of Bretagne, at the outlet of the river on which Morlaix stands. It is impossible to determine which of the numerous bays on this irregular coast is Poenimus's Staliocanus. [G. L.]

STANACUM, a town of the Noricum, on the road leading along the Danube from Augstia Vindelicorum to Carnuntum and Vindobona. (It. Ant. p. 249; Tab. Peut.) Its exact site is uncertain. (Comp. Muchar, Noriciam, i. p. 285.) [L. S.]

STATIELLI (Στατιέλλοι), a tribe of Ligurians, who inhabited the northern slopes of the Apennines, on both sides of the valley of the Bormida. Their leader occupied the site of the modern town of Statielle in Aosta, which grew up under the Roman Empire from a mere watering place into a large and populous town, and the chief place of the surrounding district. The Statielli are mentioned by Livy in b. c. 173, as an independent tribe, who were attacked by the Roman consul, M. Popilius; after defeating them in the field, he abstained and took their city, which Livy calls Carystus, and, not content with disarming them, sold the captives as slaves. This proceeding was severely arraigned at Rome by the tribunes, especially on the ground that the Statielli had previously been uniformly faithful to the Roman alliance; but they did not succeed in enforcing reparations (Liv. xiii. 7, 9, 21). Livy writes that the Statielli, like the Acutiaci, lived between the Po and the Brennia, which crossed their territory on his march from Mutina, b. c. 44, and addresses one of his letters to Cicero from thence, daces it "finibus Statiellensium" (Cic. ad Fam. xi. 11). Pliny, who enumerates them among the tribes of Ligurians existing in his time, calls them Statielli, and their chief town Aquis Statiellorum (Plin. iii. 5. a. 7). The site of Carystus, mentioned only by Livy, in the passage above cited, is wholly unknown. [E. H. B.]

STATONIA (Στατονία: Eik. Statonieis), a town of Southern Etruria, which is mentioned by Strabo among the smaller towns (Στατονία) in that part of Italy. (Strab. v. p. 236.) Pliny also mentions the Statotes among the municipalities of Etruria (iii. 5. a. 8), but neither author affords any nearer clue to its situation. We learn, however, that it was celebrated for its wine, which was one of the most noted of those grown in Etruria (Plin. xiv. 6. a. 8), and that there were valuable stone-quarries in its territory. (Vitr. vii. 7. § 3.) From the terms in which Vitruvius speaks of these, it seems probable that the city of Statonia, which he calls "praefectura Statonienis," adjoined that of Tarquinii; and both Pliny and Seneea allude to the existence of a lake "in agro Statonienis," in which there were floating islands. (Plin. ii. 95. a. 36; Senee. N. G. ii. 35.) This can hardly be larger than the small Lago di Mezzano, a few miles W. of the more extensive Lago di Bolsena: we must therefore probably look for Statonia between this and Tarquinii. But within this space several sites have been indicated as possessing traces of ancient habitation; among others, Farnese and Canistro, the last of which is regarded as the site of the ancient Statonia, and has as plausible a claim as any other. But there is nothing really to decide the point. (Oliver, Ital. p. 517; Dennis's Etruria, vol. i. pp. 463–468.) [E. H. B.]

STAVANUS (AD), the name of two places in Fannonia, one of which was situated on the Danube, a little to the west of Brageto (It. Ant. p. 246; Notit. Imp.), and the other further south-east, in the neighbourhood of Alisea and Alta Ripa (It. Ant. p. 244), which Muchar (Noriciam, i. p. 264) identifies with Svisnord. [L. S.]

STAVANUS (AD), a town in the territory of the Contesti in Hispania Tarraconensis. (Itin. Ant. p. 400.) Varr. identifies it with Aulacum and Xasias or S. Felipe. [L. S.]

STAVANUS (Σταβανόος, Ptol. iii. 5. § 25), a people in European Sarmatia, at the N. foot of Mons Bodinus. Uberti (iii. 2. § 435) conjectures that we should read Σταβανοος, that is, Sitalis, and seeks them on the Dunum and the Ilmenus. [T. H. D.]

STEATORIUM (Στεάτοριον; Eik. Στεάτοριον), a town of Phrygia, between Polus and Palaemon (Ptol. v. 2. § 25; Pans. x. 27. § 1). Kiepert (in Franz's Σύμφωνια ἴσχυρεν, p. 36) identifies it with the modern Agiym Karahisar. (Comp. Sestini, Num. Vet. p. 126.) [L. S.]

STEFIRA. [ATTICA, p. 393, a.] STELLAS (Στέλλας, Steph. B. s. v.), a Cretan city which is described by the geographer as being near two towns, which are called. In the published editions of his work, Parasites and Rhithymna. In Mr. Pasley's map the site is fixed at the Mohammedan village of Philippo on the route from Kastellion (Iatous) to Haphtes Dhekis (Gortysia). [E. B. J.]

STELLATIS CAMPUS was the name given to a part of the rich plain of Campania, the lands of which cannot be clearly determined, but which appears to have adjoined the "Falernus ager," and to which there has been situated likewise to the N. of the Vulturnus. Livy mentions it more than once during the wars of the Romans with the Samnites (ix. 44, x. 31), and again during the Second Punis War, when Hannibal found himself there by an error of his guides (Liv. xxii. 18). From his expressions it would appear to have adjoined the "Caleanus ager," and apparently was part of the plain lying between Cales and the Vulturnus. It was a part of the public lands of the Roman people, which the tribune Rutilus proposed by his agrarian law to parcel out among the poor citizens (Cic. de Leg. Agr. i. 7. ii. 31); this was for the benefit of the city of Cicer. But the measure was carried into effect a few years later by the agrarian law of Cassar, passed in his consulship, x. c. 59 (Suet. Cæs. 20). The statement of Sestinius that the district thus named was previously regarded by the Romans as consecrated, is clearly negatived by the language of Cicero in the passages just referred to. The term of Libitinus Ager seems to have been given to a district in quite another part of Italy, forming a part of the
territory of Capena in southern Etruria. It was from this district that the Stabilita tribe derived its name (Fest. s. v. Stabilita).

[E. H. B.]

STENA, a station in Macedonia, on the road from Tauriana (Doirina) to Stobi (Post. Tab.), which is evidently the pass now called Demirköy, or "Iron Gate," where the river Axios is closely bordered by perpendicular rocks, which in one place have been excavated for the road (Leake, Northern Greece, vol. iii. p. 442.).

[Ε. Β. Ζ.]

STENTORIS LACUS (Στεντόρις λίμνη, Herod. vii. 58; Aesop. p. 64), a lake on the south-east coast of Thrace, formed by the Hobaus, and opening into the Aegean near the town of Assos. Pliny (iv. 11. s. 18) incorrectly places it on a Stentorius Fluvius; and Mannert conjectures that perhaps the right reading in Herodotus (l.c.) is Λυμερόν, not λίμνη.

[J. R.]

STENUS, a river of Thrace, mentioned by Mela only (ii. 2. § 6) as near Maronea, on the south coast. The name is probably corrupt, as it occurs in the MSS. in a great variety of forms,—Stenes, Stonus, Stonus, Stonius, Stonus, Scithonos, Scithone, &c. (See Schweitzer, and loc.).

[J. R.]

STENYCLESARUS (Στενύκλεσαρος, Στενυκλεσαρος; Εὐκ. Στενύκλεσαρος), a town in the north of Messenia, and the capital of the Dorian conquerors, built by Creophantes. Andania had been the ancient capital of the country. (Paus. iv. 3. § 7; Strab. viii. p. 361.) The town afterwards ceased to exist, but Athenaeus was given to the northerm of the two Messenian plains. (Paus. iv. 33. § 4, iv. 15. § 8; Herod. ix. 64.) [Messenia, p. 341.]

STEPHANAPHERA, more correctly, perhaps, Stephanis Fanum, a place in Illiria Graeca, on the Via Egnatia (Itin. Hieros. p. 608). It was the castle of St. Stephen (voc. dylovo Stephanov), repaired by Anastasius (Procop. de Aed. iv. 4), of Lapathos. [Pind. frag. 101.] 

[T. H. D.]

STEPHANE (Στέφανος), a small port-town on the coast of Paphlagonia, according to Arrian (Peripl. P. E. p. 15) 180 stadia east of Cimolis, but according to Marcian (p. 72) only 150. The place was mentioned as early as the time of Hecataeus as a town of the Marindyni (Steph. B. s. a. Στέφανος), which has been identified with Stepheus (Comp. Noth. i. p. 34.; Ptol. v. 4. § 2.) The modern village of Stephane or Estiphon probably occupies the site of the ancient Stephane.

[L. S.]

STEREOANTHUM (Στερεοανθύων), a town in North-western Germany, probably in the country of the Bructeri or Marci, the exact site of which cannot be ascertained. (Ptol. ii. 11. § 27.)

STIPHANE (Στιφάνη), a lake in the north-western part of Pontus, in the district called Phasemontis. The lake was extensive and abounded in fish, and its shores afforded excellent pastures (Strab. xii. p. 560.) Its modern name is Boghos Kieni Ghiem. (Hamilton, Researches, i. p. 356. foll.)

[L. S.]

STIRIA. [Attica, p. 339, s.]

STIRIS (Στρίς; Esth. Stirypn), a town of Phocis situated 130 stadia from Chersonesus, the road between the two places running along the mountains. The inhabitants of Stiris claimed descent from an Athenian colony of the Attic demus of Steiria, led by Peterus, when he was driven out of Attica by Aegeus. Pausanias describes the town as situated on a rocky summit, with only a few wells, which did not supply water fit for drinking, which the inhabitants obtained from a four-stadia well below the city, to which which there was a descent excavated among the rocks. The city contained in the time of Pausanias a temple of Artemis Stiria, made of crude brick, containing two statues, one of Pentele marble, the other of ancient workmanship, covered with bandages. (Paus. x. 33. §§ 8—10.) Stiris was one of the Phocian cities destroyed by Philip at the close of the Sacred War (Paus. x. 3. § 30), but it was afterwards rebuilt and was inhabited at the time of the visit of Pausanias. The ruins of Stiris, now called Paled koreo, are situated upon a tabular height defended by precipitous rocks, about a quarter of an hour’s ride from the monastery of St. Lake. The summit is surrounded with a wall of loose construction, and the surface of the rock within the enclosure is excavated in many places for habitations. The fountain of water described by Pausanias is probably the copious source within the walls of the monastery rising from the side of the hill. This fountain is mentioned in an inscription fixed in the outer wall of the church. (Leake, Northern Greece, vol. ii. p. 538, sec.)

[S.]

STIPPO/ TOURBA, TIPPI (Στιππός, Στιππός, Pol. ii. 16. (17). § 9), a place in Locris. The inhabitants are called Stipponi by Pliny (iii. 21. s. 25). Perhaps the present Sliemi.

[T. H. D.]

STOBI (Στόβιος), Strab. vii. p. 329, Fr. 4, viii. p. 359; Ptol. iii. 13. § 4; Liv. xxxix. 19, xxxix. 59, xl. 21, xiv. 29; Plin. iv. 17), a town in the NW. of Paeonia in Macedonia, which appears to have been of some importance to the Romans, the kings, although probably it had been greatly reduced by the incursions of the Dardani, when Philip had an intention of founding a new city near it in memory of a victory over these troublesome neighbours, and which he proposed to call Perissus, in honour of his son. At the Roman conquest, Stobi was made the place of a junct of sale, for the supply of the Dardani, the monopoly of which was given to the Third Macedonia. In the time of Pliny (l.c.) Stobi was a municipal town, but probably as late as the time of Heliogabalus it was made a "colonia." When about A. D. 400 Macedonia was under a "cosular," Stobi became the chief town of Macedonia II or Salutaris (Marquardt, in Becker’s Reiss. Antiquit. t. iv. p. 86); it was the seat of the Bishops of Stobi. Tabular Itinerary it stood 47 M. P. from Hercules of Lycus, which was in the Via Egnatia, and 55 M. P. from Tauriana, and was therefore probably in the direct road from Heraclea to Serdica. The position must have been therefore on the Eripus, 10 or 15 miles above the junction of that river with the Axios, a situation which agrees with that of Livy, who describes it as belonging to Deuripus of Paeonia, which was wstered by the Ergon. Stobi was a point from which four roads issued. (Post. Tab.) One proceeded NW. to Scupi, and from thence to Naissus on the great SE. route from Viminacium on the Danube to Byzantium; the second NE. to Serdica, the third to Pliska, E. SE. of Naissus on the same route; the fourth SE. to Thessalonica; and the fifth NW. to Heraclea, the last forming a communication with that central point on the Via Egnatia leading through Stobi from all the places on the three former routes. In A. D. 479 Stobi was captured by Theodoric the Ostrogoth (Mach. Philadeph. E. of Leg. Rom. pp. 78—86, opp. Müllcr, Fragm. Hist. Gr. eu. iv. p. 387; and the army under Theodoric in 514, i. n. 1014, it was occupied by Basili II and the Byzantine army (Στρις, Cedro. p. 709). The geography of the basin of the Ergon in which Stobi was situated.
STOBORUM PROM.

is so imperfectly known that there is a difficulty in identifying its site; in Kiepert's map (Europäische Turken) the ruins of Stobi are marked to the W. of Demirkapi, or the pass of the "Iron Gate." (Leake, Northern Greece, vol. iii. pp. 306, 440.) [E. B. J.]

STOBORUM PROM. (Στόβωρον) [Leake, iv. 3. § 5], a headland of Numidia, between the promontory of Hippus and the town of Aphroditium, at the E. point of the Sinus Ochseitis. (Str. Cap Ferro or Ros Hadid.) [T. E. D.]

STOECHEADES (Στοικείαδης) or STIE-CHADES, on the S. coast of Gallia. Strabo (iv. p. 184) speaks of the Stoichades islands lying off the coast of Narbonensis, in five number, three larger and two smaller. They were occupied by the Massaliots. Stephan. B. (s. v. Στοικείαδης) says, "islands near Massalia; and they are also named Lagyridae." Ptol. (ii. 10. § 21) also mentions five islands Stoicchades, which he places in the meridian of the Citharistes Promontorium [Citharistera]?

Pliny (iii. 5) mentions only three Stoichades, which he says were so named from being in a line (στοιχείας), and he gives to them the Greek names referent. Ptolemy (iv. 7. § 18) gives them an order of importance. (Ephraim and Benjamin?) These must be the islands now named Isles d'Hières, of which the most westerly is Porquerolles, the central is Port-Cros, and the most easterly is l'Isle du Levant or du Téven, opposite to the town of Hières, in the department of Var. These islands are mere barren rocks. Besides the three larger islands, which have been enumerated, there are two others of less importance, St. Côme and St. Mathurin, which make up the number of five. Coral was got in the sea about the Stoichades (Plin. xxxii. 3), and is still got on this part of the French coast.

Agathemerus (Geoq. Min. ii. p. 13, ed. Hudson) places the Stoichades along the coast which was occupied by the settlements of the Massaliots; but he states that the two small islands were Massalia. These are the two diurnal rocks named Rateneau and Pomégue, which are seen as soon as you get out of the port of Marseille, with some still smaller rocks nearer them [Massilia, p. 292], one of which contains the small fort named Château d'If.

The Stoichades still belonged to the Massaliots in Tacitus' time (Hist. iii. 43). The Romans who were driven from Massalia, had a settlement in the region of Stobi, as L. Scipio Asiacicus did; if he did not go to the Stoichades as the Scholast (sag. pro Sext. c. 3); but the Roman must have found the Stoichades a dull place to live in. When Lucan (iii. 516) says"Stoichades aves," he uses a poetic license; and Ammianus (xv. 11) as usual in his geography blunders when he places the Stoichades about Nicæa and Antipolis (Nissa, Antioch). [G. L.]

STENI. [EUGAMEI]

STOMA, AD, a place in Moesia on the Southernmost arm of the Danube. (Tab. Peut.; Geogr. Rav. iv. 5) Mannert (vii. p. 123) places it by the modern Zof.

STROMELMINA. [FORSA MARIANA.]

STRADALLA, a town of Palestine mentioned only in the Itinerarium Hierosolymitanum as x. M.P. from Maximianopolis, and xii. M.P. from Scipolus (i. e. Scythopolis). It is identified by the writer with the place where Abah abode and Elias prophesied, and —by a strange confusion— where David slew Goliath (p. 586, ed. Wesseling). The name is undoubtedly a corruption of Stradella, the classical form of the Scriptural Zaccheus. [XERAMILLA.]

[G. W.]

STRA'GONA (Στραγωνα), a town in the south-eastern part of Germany, either in the country of the Silingsae or in that of the Diduni, on the northern slope of Mons Aebigvertius. (Ptol. ii. 11. § 28.) If the resemblance of names be a safe guide, we might identify it with Strigas, though this hardly agrees with the degrees in which it is placed by Ptolemy; whence others suppose it to have been situated at Strabuki, between Schœcodidus and Brict.

STRAPPELLUM. [APULEIA, p. 167.]

STRATICA. [ETRISPE.]

STRATONICEA (Στρατονίκεια) [Ptol. iii. 13. § 11], a town of Chalcidice in Macedonia, which Ptolemy places on the Singit gulf. Leake (Northern Greece, vol. iii. p. 160) considers that there is here the same mistake as in the case of Acanthus [Acanthus], and refers it to the Halicarnassus on the coast of the Smyrmonic gulf in the confined valley of Stratoni. [E. B. J.]

STRATONICEA (Στρατονίκεια or Στρατοποιεία, one of the most important towns in the interior of Caria, was situated on the south-east of Mylasa, and on the south of the river Marvas. It appears to have been founded by Antiochus, and its walls were erected by his wife Stratonicia. (Strab. xiv. p. 660; Stephan. B. s. v.) The subsequent Syro-Macedonian kings adorned the town with splendid and costly buildings. At a later time it was ceded to the Rhodians. (Liv. xxxiii. 18. 30.) Mithridates of Pontus resided for some time at Stratonicia, and married the daughter of one of its principal citizens. (Aphrodisias and Ephesus.) Some time after this it was besieged by Labienus, and the brave resistance it offered to him entitled it to the gratitude of Augustus and the Senate (Tac. Ann. iii. 62; Dion Cass. xlvi. 26). The emperor Hadrian is said to have taken this town under his special protection, and to have changed its name into Hadrianoopolis (Steph. Per. 160.) In a name, however, which does not appear to have ever come into use. Pliny (v. 29) enumerates it among free cities in Asia. Near the town was the temple of Zeus Chrysaoreus, at which the confederate towns of Caria held their meetings; at these meetings the several states had votes in proportion to the number of towns they possessed. The Stratonicians, though not of Carian origin, were admitted to full political rights, because they possessed certain small towns or villages, which formed part of it. Menippus, surnamed Catochus, according to Cicero (Brut. 91) one of the most distinguished orators of his time, was a native of Stratonicia. Stephanus B. (s. v. Ιβάς) mentions a town of Idrias in Caria, which had previously been called Chrysaoros, and which, as Herodotus (v. 118) makes the river Marvas, on whose banks stood the white pillars at which the Carians held their national meetings, flow from a district called Idrias; it is very probable that Antiochus Soter built the new city of Stratonicia upon the site of Idrias. (Leake, Asia Minor, p. 235.) Ekklesiaster, which now occupies the place of Stratonicia, is only a small site, the whole neighbourhood of which is strewn with marble fragments, while some shafts of columns are standing single. In the side of a hill is a theatre, with the seats remaining, and ruins of the prosconium, among which are pedestals of statues, some of which contain inscriptions. Outside the village there are broken arches, with slabs of stones, and coffins. (Chandler, Travels in Asia Minor, p. 240; Leake, Asia Minor, p. 229; Fellows, Asia Minor,
STRATONIS INSULA.

STRATONIS INSULA, an island in the Arabian gulf between the harbour Eneas and the harbour Sabas. (Strab. xvi. p. 770; Plin. vi. 29. a. 34.)

STRATONIS TURRIS. (Cassaba, No. 4, p. 470.)

STRATUS (Στράτος; Etr. Στρατός; its territory ἡ Στρατέωνε Σαρωγία; Sarogenic), the chief town of Acarnania, was situated in the interior of the country, in a fertile plain on the right bank of the Achelous. It commanded the principal approaches to the plain from the coast, and was therefore, in place of great military importance. Strabo (x. p. 450) places it 500 stadia from the mouth of the Achelous by the course of the river. At the distance of 80 stadia S. of the town the river Aenus flowed into the Achelous; and 5 Roman miles to its N., the Achelous received another tributary stream, named Petanias. (Thuc. ii. 92; Liv. xxxii. 22.) Stratus joined the Athenian alliance, with most of the other Acarnanian towns, at the commencement of the Peloponnesian War. In m. c. 429 it was attacked by the Ambrocotae, with a number of barbarian auxiliaries, aided by some Peloponnesian troops, under the command of Ceneus; but they were defeated under the walls of Stratus, and obliged to retire. Thucydides describes Stratus as the terminus of the chief town of Acarnania, which it is also called by Xenophon in his account of the expedition of Agesilus into this country. (Thuc. ii. 90, seq., iii. 106; Xen. Hell. iv. 6.) When the Aetolians extended their dominions, Stratus fell into the hands of this people, whence it is called Livy a town of Aetolia. It is frequently mentioned during the next Roman war. Neither Philip V. nor his successor Pergius was able to wrest the town from the Aetolians; and it remained in the power of the latter till their defeat by the Romans, who restored it to Acarnania, together with the other towns, which the Aetolians had taken from the Acarnanians. (Polyb. iv. 63, v. 6, 7, 13, 14, 96; Liv. xxxvi. 11, xli. 31, 22.) Livy (xli. 21) gives an account of the restoration of the town when he says that it is situated above the Ambracian gulf, near the river Inachus.

There are considerable remains of Stratus at the modern village of Sarogenic. The entire circuit of the city was about 20 miles. The eastern wall followed the bank of the river. Leake discovered the remains of a theatre situated in a hollow; its interior diameter below is 105 feet, and there seem to have been about 30 rows of seats. (Leake, Northern Greece, vol. i. p. 137, seq.)

STRAVIANAE or STRAVIANA, a town in Lower Pannonia, on the road from Siscia to Mura, of which the exact site has not been ascertained. (It. Ant. p. 363, where it appears in the list of Roman stations.)

STRENUS (Στρένος; Etr. Στρένος), a town of Crete, which Stephanus of Byzantium (c. v.) mentions on the authority of Herodotus (others read Herodotus), but no further notice is found of it either in Herodotus or any other author. (E. B. J.)

STREVINTA (Στρεβιντα), a place in the south-eastern Germany, near Moos Anzeburgius, of uncertain site. (Ptol. ii. 11. § 29.)

STROBILUS (Στρόβιλος), a peak of mount Caresnus, to which, according to the legend, Prometheus had been fastened by Hephaestus. (Arrian, Perip. P. E. p. 12.)

STRONYGLE. (Aeolian Insula.)

STUCIA.

STROGYLUS. (Setebraxides Moni.)

STROPHADES (Στροφάδες; Etr. Στροφάδα; Strophades and Striah), formerly called Platea (Πλάται), two small islands in the Ionian sea about 35 miles S. of Zacynthus, and 400 stadia distant from the coast of Epirus, to which in modern times they belonged. The sons of Boreas pursued the Harpies to these islands, which were called the "Turning" islands, because the Boreadas here returned from the pursuit. (Strab. viii. p. 359; Ptol. iii. 16. § 23; Steph. B. a. e.; Plut. iv. 13. a. 19; Mela, ii. 7; Apoll. Rhod. ii. 296; Apollod. i. 9. § 21; Virg. Aen. i. 434.)

STRECHATES (Στρεγγεγενες), one of the six tribes into which Herodotus divides the ancient inhabitants of Media. (Herod. i. 101.) [V.]

STRETHUS. (Hermion.)

STRYM (Στρυμη), a town on the S. coast of Thrace, a little to the W. of Mesembria, between which and Strype the small river Lysimachos, which the army of Xerxes is said to have drunk dry. (Herod. viii. 108.) Strype was a colony of Thasos; but disputes seem to have arisen respecting it between the Thasians and the people of the neighbouring city of Maroneia. (Philip, cap. Desp. p. 163, E.)

STRYMON (Στρυμός, Ptol. iii. 13. § 18), the largest river of Macedonia, after the Axios, before the time of Philip, the ancient boundary of that country towards the E. It rises in Mount Scenius near Pantalia (the present Gestas) (Thuc. ii. 96), and, taking first an E. and then a SE. course, flows through the whole of Macedonia. It then enters the lake of Presaias, or Cercinias, and afterwards divides into two, from which it near the town of Amphipolis, falls into the Strymonic gulf. Pliny, with less correctness, places its sources in the Haemus (iv. 10. a. 19). The importance of the Strymon is rather magnified in the ancient accounts of it, from the circumstance of Amphipolis being seated near its mouth; and it is navigable only a few miles from its source. Apollodoros (ii. 5. 10) has a legend that Hercules resolved and founded the town. He is said to have shallowed by casting stones into it, having been previously navigable much farther. Its banks were much frequented by cranes (Juv. xiii. 167; Virg. Aen. x. 369; Mart. ix. 308). The Strymon is frequently alluded to in the classics. (Comp. Herod. i. 539; Aesch. Sall. 256, Agam. 159; Herod. vii. 75; Thuc. i. 200; Strab. vii. p. 323; Mela, ii. 2; Liv. xiv. 44. &c.) Its present name is Strosa, but the Turks call it Karasa. (Comp. Leake, North. Gr. iii. pp. 325, 465, &c.)

STRYMONICUS SINUS (Στρυμονικός σόνος), a bay lying between Macedonia and Thrace, on the E. side of the peninsula of Chalcidice (Ptol. iii. 13. § 24). It derived its name from the river Strymon, which fell into it. Now the gulf of Rodopi. (T. H. D.)

STRYMONII (Στρυμονίων), the name by which, according to tradition, the Bithynians in Asia originally were called, because they had immigrated into Asia from the country about the Strymon in Greece. (Herod. iii. 53; Steph. B. a. e.; Pliny (v. 46).) Further states that Bithynia was called by some Strymonia. (L. S.)

STUBERA. (Stubara.)

STUCCIA (Στουκσια, Ptol. ii. 3. § 3), a small river on the W. coast of Britain, identified by Camden (p. 775) with the Tavety in Cumberland. (T. H. D.)
STURA.

STURA (Strata), a river of Northern Italy, one of the confines of the Padus (Plin. iii. 16. s. 20), which joins that river a few miles below Turis (Augusta Taurinorum), within a few miles of the Duria Minor or Dora Riparia. It still retains its ancient name and is considerable stream, rising in the glaciers of the Alps, between the Roche Melon and Mont Iseran. [E. H. B.]

STURA (Stratia), a small place in Pavia, near the mouth of the Indus, mentioned by Arrian (Ind. c. 4). [V.]

STURHUM INSULA. [PHILA.]

STURNIUM (Στυρνίον: Euh. Sturnium; Sternaecio), a town of Calabria, mentioned both by Pliny and Ptolemy among the municipal towns of this region. (Plin. iii. 11. s. 15; Ptol. iii. 1. § 7.)

Its name is not otherwise known, but it is supposed to be represented by the modern village of Sternaecio, about 10 miles S. of Lecce (Lupiae) and a short distance N.E. of Soletu (Soletum). (Claver. Ital. p. 1331; Romanelli, vol. ii. p. 114.) There exist coins with the inscription ΣΤΤΥ and types resembling the Tarentines, which were assigned to Sturnium.

[Ε. Η. Β.]

STYLLANGNIUM (Στυλλανγνιον), Polyb. iv. 77, 80; Στυλλανγβευον, Steph. B. s. v.; Euh. Στυλλανγνιον, Στυλλανγευον), a town of Triphylia in Elis of uncertain site, which surrendered to Philip in the Social War.

STYMBARA (Στυμβαρα, Strab. vii. p. 327; Στυμβαρα, Polyb. xxviii. 8. § 8; Stobaeus, Liv. xxxi. 39, xliii. 30, 29), a town on the frontier of royal Macedonia, which is by some assigned to Deuripus, and by others to Pelagonia, which in the campaign of b.c. 400 was the third encampment of the consul Sulpicius; it must be looked for in the basin of the Evron. (Leka, Northern Greece, vol. iii. p. 306.)

STYMPHALIS, a district annexed by the Romans, along with Atintania and Elimicia, to Macedonia upon the conquest of this kingdom, A.D. 168. (Liv. xiv. 30.) From the mention of this district along with Atintania and Elimicia, which were portions of Epirus upon the borders of Thessaly, it would appear that it was in the form of the more common name Tymphalis or Timphaeus; though, it is true, as Cramer has observed, that Dioscorus has mentioned Stympalhis (Diod. xii. 28), and Callimachus speaks of the Stympalian oxen in that territory (Hygn. in Dion. 179). Ptolemy (iii. 13. § 43) likewise mentions a town called Stympalhis, but in the passage other MSS. read Tymphaeus. (Cramer, Ancient Greece, vol. i. p. 198.)

STYMPHALIS (Στύμφαλος, Στύμφαλος, Paus. xii. 30; Στύμφαλος, Schol. ad Pind. Od. vi. 129; Stymphalis, Plin. iv. 6. a. 10; Stympalis, Lucrat. v. 31: Euh. Στυμφαλος, Στυμφαλος), the name of a town, district, mountain, and river in the NE. of Arcadia. The territory of Stympalis is a plain, about six miles in length, bounded by Achaea on the N., Sicenia and Philasia on the E., the territory of Mantinea on the S., and that of Orchomenus and Pheneus on the W. This plain is shut in on all sides by mountains. On the N. rises the gigantic mass of Cyllene, from which a projecting spur, called the Parnassus, descends to the plain. (Στυμφαλος δεν, Ptol. iii. 16. § 14; Hesych. s. v.; nivalis Stympalis, Stat. Silv. iv. 6. 100.) The mountain at the southern end of the plain, opposite Cyllene, was called Apelarium (το 'Απελαρεον, Polyb. iv. 69) *, and at its feet is the kata-votha or subterranean outlet of the lake of Stympalis (τ Στυμφαλη λιμνη, Strab. viii. p. 371; Στυμφαλη λιμνη, Herod. vi. 76). This lake is formed partly by the rain-water descending from Cyllene and Apelarium, and partly by three streams which flow into it from different parts of the plain. From the west descends a small stream, which rises in Mount Gerontium in the neighbourhood of Katasia; and from the east comes another stream, which rises near Diusis. But the most important of the three streams is the one which rises on the northern side of the plain, from a copious kefalovrysi. In summer it flows about two miles through the plain into the kata-votha of Apelarium, and then upon a large scale is absorbed into the lake. [Ε. Η. Β.]

STYMPHALIS (Συμφαλη, Metope (Μετώπων, Aslian, v. H. ii. 33), whence it has been concluded that Metope is only another name of the river Stympalus. Metopes is also mentioned by Illyria (Hymn. in Dion. 26), with the epithet poppy (φω-ντευς), which, as Leake observes, seems not very appropriate to a stream issuing in a body from the earth, and flowing through a marsh. (Pelagomeneia, p. 384.) The water, which formed the source of the Stympalus, was conducted to Corinth by the emperor Hadrian, by means of an aqueduct, of which considerable remains may still be traced. The statement of Pausanias, that in summer there is no lake, is not correct, though it is confined at that time to a small circuit round the kata-votha. As there is no outlet for the waters of the lake except the kata-votha, a stoppage of this subterranean channel by stones, sand, or any other substance occasions an inundation. In the time of the Roman Empire, occasional inundations, which was ascribed to the anger of Artemis. The water was said to have covered the plain to the extent of 400 stadia, but this number is evidently corrupt, and we ought probably to read τεσσαρακοντα instead of τεσσαρακοντα. (Paus. viii. 22. § 8.) Strabo relates that Iphicrates, when besieging Stympalus without success, attempted to obstruct the kata-votha, but was diverted from his purpose by a sign from heaven (viii. p. 389). Strabo also states that originally there was no subterranean outlet for the waters of the lake, so that the city of the Stympali, which was in his time 50 stadia from the lake, was originally situated upon its margin. But this is clearly an error, even if his statement refers to other Stympalus, which is the breadth of the whole lake is less than 30 stadia.

The city derived its name from Stympalus, a son of Elistus and grandson of Arcas; but the ancient city, in which Temenus, the son of Pelasgus, dwelt, had entirely disappeared in the time of Pausanias,
and all that he could learn respecting it was, that Hera was formerly worshipped there in three different sanctuaries, as virgin, wife, and widow. The modern city lay upon the southern edge of the lake, about a mile and a half from the katakhira, and was closely connected with the mountains behind. Stymphalus is mentioned by Homer (II. ii. 608), and also by Pindar (Ol. vi. 169, who calls it the mother of Arcadia. Its name does not often occur in history, and it owes its chief importance to its being situated upon one of the most frequented routes leading to the westward from Argolis and Corinth. It was taken by Apollodorus, a general of Cassander at Mod. 633, and subsequently belonged to the Achaeans League (Polyb. ii. 55, iv. 68, &c.). In the time of Pausanias it was included in Argolis (viii. 22. § 1). The only building of the city, mentioned by Pausanias, was a temple of Artemis Stymphalis, under the roof of which were figures of the birds Stymphalides; while behind the temple strolled statues of white marble, representing young women with the legs and thighs of birds. These birds, so celebrated in mythology, the destruction of which was one of the labours of Heracles (Dict. of Biogr. Vol. ii. p. 396), are said by Pausanias to be as large as cranes, but resembling in form the ibis, only that they have stronger beaks, and not crooked like the ibis (viii. 22. § 5). On the coins of Stymphalus, they are represented exactly in accordance with the description of Pausanias.

The territory of Stymphalus is now called the vale of Zaraki, from a village of this name, about a mile from the eastern extremity of the lake. The remains of the city upon the projecting cape already above described (p. 633), and the name, apparently noticed of Pausanias would lead one to expect. They cover the promontory, and extend as far as the fountain, which was included in the city. On the steepest part, which appears from below like a separate hill, are the ruins of the polygonal walls of a small quadrangular citadel. The circuit of the city walls was measured, and may be traced. To the east, beneath the acropolis, are the foundations of a temple in antis; but the most important ruins are those on the southern side of the hill, where are numerous remains of buildings cut out of the rock. About ten minutes N. of Stymphalus, are the ruins of the medieval town of Krémidia (Leake, Morea, vol. iii. p. 108, seq.; Peloponnesia, p. 384; Bohlaya, Rouchkersche, &c., p. 384; Ross, Relics of Pelo-
nosans, p. 54; Curtius, Peloponnesus, vol. i. p. 201, seq.).

STYX (τὸ Στύξις; Ech. Στύξις; Stura), a town of Euobea, on the W. coast, N. of Carysbus, and nearly opposite the promontory of Cynocear in Attica. The town stood near the shore in the inner part of the bay of Phaleron. The island Anglia, now called Strensas, is mentioned by Homer along with Carysbus (II. ii. 599). Its inhabitants were originally Dryopians, though they denied this origin (Herod. viii. 46; Paus. iv. 34. § 11), and claimed to be descended from the deme of Steiris in Attica. (Strab. x. p. 446.) In the First Persian War, B.C. 490, the Saviae, led by the Locrians, which belonged to Styra, the prisoners whom they had taken at Eretria. (Herod. vii. 107.) In the Second Persian War (B.C. 480, 479) the Styrians fought at Artemision, Salamina, and Plateaææ. They sent two ships to the naval engagements, and at Plateaææ they and the Eretrians amounted together to 600 men. (Herod. viii. 1, 46, iv. 23; Paus. v. 22. § 2.) They afterwards became the subjects of Athens, and paid a yearly tribute of 1200 drachææ. (Thuc. vii. 57; Frenz, Elem. Epigr. Gr. n. 49.) The Athenian fleet was stationed here a. c. 336. (Polyb. vi. 368.) Strabo relates (B. G. n. 446) that the town was destroyed by the Macedonians under the Athenian Phaëdrus, and its territory given to the Eretrians; but as the Macedon war is not mentioned elsewhere, we ought probably to substitute Laminæ for it. (Leake, Northern Greece, vol. ii. pp. 422, 432.)

STYX (Στύξις), a waterfall descending from a lofty region in the Arcadian mountains, above Némara, a town in the N.E. of Arcadia, in the district of Pheneus. The water descends perpendicularly in two slender cascades, which, after winding among a labyrinth of rocks, unite to form a torrent that falls into the Crathis. It is by far the highest waterfall in Greece; the scenery is one of wild desolation; and it is still one of the principal objects which the traveler rears of all the "lofty torrents of the Styx." (Στύξις Στύμενοι αετία φύσεως, Ι. viii. 369.) Leake describes it as "a cold stream, which descends from a precipitous lofty rock." (Βουλή η τούς ἐν ουρανῷ πανθέως θείους θεῶν στίγμα. Θεός, 785,) and as "the perennial most ancient water of the Styx," which flows through a very rugged place. (Στύξις Στύμενοι, το Θεός θείων στίγματος θεῶν στίγμα. Θεός, 805.) The account of Herodotus, who does not appear to have visited the Styx, is not so accurate. He says that the Styx is a fountain in the town Némara; that only a little water is apparent; and that it dropped from the rock into a cavity surrounded by rocks which might be traced. In the same passage, Herodotus relates that Cleomenes endeavored to persuade the chief men of Arcadia to swear by the waters of the Styx to support him in his enterprise. Among the later descriptions of this celebrated stream that of Pausanias (vii. 17. § 6) is the most full and exact. "Not far from the ruins of Némara," he says, "is a lofty precipice higher than I ever remember to have seen, over which descends water, which the Greeks call the Styx." He adds that when Homer represents Hera swearing by the Styx, it is just as if the poet had the water of the stream dropping before his eyes. The Styx was transferred by the Greek and Roman poets to the invisible world (see Dict. of Gr. and Rom. Biogr. for a list of passages). It is impossible to say whether the Styx continued to be regarded with superstitions terrors; its water was supposed to be poisonous; and it was believed that it destroyed all kinds of vessels, in which it was put, with the exception of those made of the hoof of a horse or an ass. There was a report that Alexander the Great had been poisoned by a drink administered at the Styx. (Paus. ii. 27; Pliny. n. s. 77; De pr. nat. 20. 954; Paus. viii. 18. § 4; Strab. viii. p. 389; Atal. H. As. x. 40; Antig. Hist. M. l. 158 or 174; Strabo. Geogr. Phys. i. 52. § 48; Plin. ii. 103. s. 106. xxx. 16. s. 53, xxx. 2. a. 19; Vitruv. viii. 3; Senec. Q. N. 35.) The belief in the deleterious nature of the
water continues down to the present day, and the inhabitants of the surrounding villages relate that no vessel will hold the water. It is now called vā Maupārov, or the Black Waters, and sometimes vā Drape-vrup, or the Terrible Waters. (Leake, Morea, vol. iii. p. 160, seq.; Fiedler, Reise durch Griechenland, vol. i. p. 400, who gives a drawing of it in one of his plates.)

SUA'GELA (Σουαγέλα), a town of Caria, in which was shown the tomb of Car, the ancestor of all the Carians; the place was in fact believed to have received its name from this circumstance, for in Carian φωχόρεως signified a tomb, and γραμμ. a king. (Steph. B. s. a.) Sirako, who calls the place Σηγαλέα (Σηγαλέα), states that this town and Myndus were preserved at the time when Mæonius united six other towns to form Halicarnassus. (L.S.)

SUANA (Σουανά), Ptol.: Età: Samnensis: Soea, a town of Southern Etruria, situated in the valley of the Fiore (Arminia), about 24 miles from the sea, and 20 W. of Volturni (Bolesa). No mention of it is found in history as an Etruscan city, but both Pliny and Porphyry quote Bay, the nymphaeum of Etruria, under the Roman Empire. (Plin. iii. 5. a. 8; Ptol. iii. 1. § 49.) Its site is clearly marked by the modern town of Soana or Scano, which was a considerable place in the middle ages, and still retains the title of a city, and the sea of a bishop, though now a very poor and decayed place. It has only some ravines around the town abound with tombs hewn in the rock, and adorned with architectural façades and ornaments, strongly resembling in character those at Castel d'Asso and Biada. Those relics, which are pronounced to be among the most interesting of the kind in Etruria, were first discovered by Mr. Scalfari (1861), and states that "la loco, in the Annali dell' Instituto di Corrispondenza Archeologica for 1845 (pp. 223-225); also by Mr. Dennis (Etruria, vol. ii. p. 480-500)." (E. H. B.)

SUARDONES, a tribe of the Svevi in Northern Germany, on the right bank of the Alba, south of the Saxones, and north of the Langobardi (Tác. Germ. 40.) Lusus (Deutsches, p. 154), derived from the name on which of the brands of the Scythian and Saracen, regards it as identical with that of the Pharanides, mentioned by Ptolemy (ii. 11. § 13) as living in nearly the same part of Germany. (L. S.)

SUARNI, a rude people of Asiatia Sarmatica, in the neighbourhood of the Portus Caesareus and the Esa. They possessed gold mines (Plin. vi. 11. a. 12). They are probably the same people whom Pomponius called Suvani (Zosimo, v. 9. § 20) and places between the Hippic and Cimmrican mountains. (T. H. D.)

SUASA (Σουασα: Età: Susannus: Ru. near Castel Leone), a town of Umbría mentioned both by Ptolemy and Pliny, of whom the latter reckons it among the municipal towns of that country. Ptolemy places it, together with Ostra, in the district of the Suvani, and it was therefore not situated on the modern deliv- ery of the Apennines. Its site is clearly identified at a spot between S. Lorenzo and Castel Leone in the valley of the Cesano, about 18 miles from the sea. Considerable ruins were still extant on the spot in the time of Cluver, including the remains of the walls, gates, a theatre, &c.; and inscriptions found there left no doubt of its ancient desent (Cluver, Ital. p. 520)." (E. H. B.)

SUASTEFÉ (Σουαστεφάνη), Ptol. vii. 1. § 42, a district in the NW. of India, beyond the Fasihab, and above the junction of the Kablo river and the Indus. It derives its name from the small river Susattus (the Samastii or Samastii), which is one of the tributaries of the Kablo river. [Gorya.] (V.)

SUSASTUS. [SUASTEN.]

SUSANCTIT. [SILVANCT]ES.

SUBATIL. [TURAT.]

SUBAINNUEM. [EKOMAN].

SUBERTUM. [E. V. C. & S. IVERT.]

SUBI, a river on the E. coast of Hispania Tarra- conensis, which entered the sea near the town of Subur. (Plin. iii. 3. a. 4.) Probably the modern Frangoldi. [T. H. D.]

SUBLAQUEUM (Subiacum), a place in the valley of the Anio about 24 miles above Tibur (Tivoli). It is derived from its name in the Middle ages, and the habit of them to live on and to form the waters of the Anio in this part of its course, and called the SEDIMENTA STAGNA or SIMBRIVIT LACUS. These lakes have now entirely disappeared; they were evidently in great part artificial, formed as reservoirs for the Aquis Marcia and Aquis C冉ndia, both of which were derived from the Anio in this part of its course. There is no mention of them before the year 93, when a villa of which was called by Frontinus "Villa Ne- roniana Sublacensis," and Tacitus mentions the name as if it was one not familiar to every one. (Tac. xiv. 22; Frontin. de Aquaeat. 93.) It seems certain therefore that there was no town of the name, and it would appear from Tacitus (L. c.) that the place was still included in municipal urs, and fell within the territory of Tibur. Pliny also notices the name of Sublaqueum in the 4th Region of Augustus, but not among the municipal towns: as well as the lake ("lacus tres amsonitate nobiles") from which it was derived. (Ptol. iii. 12. a. 17.) It appears from mediaeval records that these lakes continued to exist down to the middle ages, and the habits of them did not disappear till the year 1305. (Nibby, Di- sorsi, vol. iii. p. 125.) Subiacum obtained a great celebrity in the middle ages as the place of retirement of St. Benedict, and the castle of the celebrated monastic order to which he gave his name. It seems probable that the site was in his time quite deserted, and that the modern town owns its origin from the monastery formerly there by the name of which was soon after established in its neighbourhood. (Nibby, L.c. p. 123.)

SUBLAVIO (It. Ant. p. 280) or SUBLABIO (Tab. Pust.), a place in Rhaetia, on the site of the modern convent of Sessa, near the town of Clauzas. Some suppose the correct name to be Subedvione, which occurs in a middle ages document of the reign of the emperor Conrad II. (L. S.)

SUBUR (Σουαρου, Ptol. ii. 6. § 17), a town of the Læstati in Hispania Tarraconensis lying E. of Tarra. (Mela, ii. 6.) Ptolemy (I. c.) ascribes it to the Coteni, and Pliny (ii. 3. a. 4) to the Her- getes. It is mentioned in an inscription. (Grauer, p. 414.) Variously identified with Sisera and Sisera-

SUBUR (Σουαρου, Ptol. iv. 1. § 13). A town in the interior of Mauretania Tingitana, near the river of the same name.

2. (Ptol. iv. 1. § 2), a river of Mauretania Tingi- tana. Pliny (v. 1. a. 1) calls it a fine navigable river. It fell into the Atlantic near Colonia Batava, 50 miles S. of Lixus. It is still named Subur or Cadrum, and rises among the forests of Mount Solelo in the province of Scavia (Graberg of Hemdi, Das Kaiserreich Marokko, tr. by Beaumont, p. 12). [T. H. D.]

SUBUS (Σουαορο, Ptol. iv. 6. § 8), a river on the
SUBZUPARA. W. coast of Libya Interior, which had its sources in Mount Sagapoia, and discharged itself to the S. of the point of Atlas Major; now the Suez. [T. H. D.]

SUBZUPARA, a place in Thracia, on the road from Tyrins to the Hellespont (Ital. Ant. 137, 291). It is called Costocon or Castra Jason in the Itin. Hieros. (p. 568) and Zetconpap/edita by Procopius (de Aed. iv. 11. p. 305, ed. Bonn), and still retains the name of Castra Jason, or simply Jason. It has, however, also been identified with Berytie and Cimolia. In the Teb. Pest. it is called Geta Estuarum. [T. H. D.]

SUCGAR (Zwrzecsvt, Plat. iv. 2. § 25, 3, § 20, xii. 13. § 11), a town in the interior of Macedonia Cusaeum, lying to the SE. of the mouth of the Chnialaph, and a Roman colony with the name of Colonia Augustus (Plin. v. 2. s. 1). It appears in Ammianus Marcellinus under the name of Oppidum Sagaparitum (xxix. 5), Mannert (loc. cit. xxvi. 2. § 6) and Procopius (de Aed. iv. 7. p. 290, ed. Bonn) under the name of Castra Jason, or simply Jason. It has, however, also been identified with Berytie and Cimolia. In the Teb. Pest. it is called Geta Estuarum. [T. H. D.]

SUCCAR or SUCCURM ANGUSTIAE, the principal pass of Mount Hesione in Thrace, between Philippopolis and Sardica, with a town of the same name (Strab. iii. 30. § 1. xxvi. 2. § 6, xxvi. 10. § 4). It is called Zetcon by Sossianus (ii. 23), and Zetconpap/edita by Nicephorus (ix 13). Now the pass of Soute Dorboum or Deniz Kapi (Comp. V. Hammer, Gesch. des Osman. Reichs, i. p. 175). [T. H. D.]

SUCOUSA (Zwrzecsvt, Plat. ii. 6. § 68), a town of the same name in Hispania Tarraconensis (T. H. D.).

SUCCOTH (LXX. Zetconpap/edita, Vat. Sarac., Alex.), a city of the tribe of Gad in the valley, formerly part of the kingdom of Sihon king of Bashbon (Josh. xiii. 27). It is connected with Zarthan in 1 Kings. vii. 46, where Hiram is said to have cast his brazen vessels, &c. for Solomon's temple "in the plain of Jordan, in the clay ground between Succoth and Zarthan." Identified as known mentioned in the account of the miraculous passage of the Israelites (Josh. iii. 16). The city doubtless derived its name from the incident in the life of Jacob mentioned in Genesis (xxiii. 17) that the name is translated by the LXX. as in the parallel passage in Josephus (Ant. xii. 3. § 1). 1 Kings (booth). It was therefore one of the Jebelites, and (as late as the 1st century) had a more plausible claim, but both identifications are merely conjectural. (Cluver, Ital. p. 517; De Wit's Chersones, vol. i. p. 478.) [E. B. H.]

SUDETI MONTES (Sudetinae montes), a range of mountains in the SE. of Germany, on the N. of the Gabreta Silva, thus forming the western part of the range called the Sudeten in the N. of Bohemia. (Pitu. ii. 11. § 9, 23, § 157.) [L. S.]

SUDERTUM (Sudetum), a town in the southern part of Etruria, apparently situated between Volatini and the sea-coast, but we have no clue to its precise situation. The name itself is uncertain. The MSS. of Pliny, who emerites it among the municipal towns of Etruria, vary between Sudertum and Sibertani; and the modern Sudete in the Kingdom of Bohemia, on the east side of the Oder, near the mouth of the Elbe Mts. [G. W.]

SUCUBO, a town in Hispania Baetica, in the jurisdiction of the city of Ucero (Plin. iii. i. 8. § 3). Sosconius mentions it under the name of Municipium Sosconitum. (Anton. Phil. 1; cf. Flores, Esp. Sogro. xii. p. 303.) [T. H. D.]

SUCHE (Vt Zewch frapcmt, Strab. xvi. p. 770), the Succura of the Hebrews (2 Chron. xii. 3), and the modern Suscicas, was a harbour on the western coast of the Red Sea, just above the bay of Adulis, lat. 13° N. It was occupied by the Egyptians and Greeks successively as a fort and trading station; but the native population of Susche were the Sabaei Aethiopians. [W. B. D.]

SUCIO (Zewchorp, Plat. iii. 6. § 36, § 4), a town in Hispania Tarraconensis, which rose in the country of the Celtiberi in S. offshoot of Mount Idael, and after a considerable bend to the SE. discharged itself in the Sucronensis Sinus, to the S. of Valencia. (Strab. iii. pp. 158, 159, 163, 167; Mela, ii. 6. Plat. iii. 3. ss. 4, 5, 11.) Now the Xevcor. [T. H. D.]

SUCIO (Zewchorp, Strab. iii. 158), a town of the same name, midway between Cartaghe Xeva and the river Iberus. (Teb. Pust. iv. 400; cf. Caes. Balb. 2. Liv. xxviii. 24, xxix. 19; App. B. C. i. 110; Plut. Scip. 19, &c.) It was already destroyed in the time of Pliny (iii. 3. s. 4). Variously placed at Alcir, Sesco, and Cullera. (Cf. Flores, Esp. Sogro. xii. 19.)

SUCRONESIS SINUS, a bay on the E. coast of Hispania Tarraconensis, now the Gulf of Valencia. (Mela, ii. 6 and 7.) [T. H. D.]

SUDENI (Zewchorp), a tribe in the east of Germany, about the Gabreta Silva, and in close proximity to the Marcomanni. (Pitu. ii. 11. § 15; comp. T. H. D. [L. S.]

SUDERTUM (Zewchorp, Ekh. Sederetanum), a town in the southern part of Etruria, apparently situated between Volatini and the sea-coast, but we have no clue to its precise situation. The name itself is uncertain. The MSS. of Pliny, who emerites it among the municipal towns of Etruria, vary between Sudertum and Sibertani; and the modern Sudete in the Kingdom of Bohemia, on the east side of the Oder, near the mouth of the Elbe Mts. [G. W.]

SUDERTUM (Sudetum), a range of mountains in the SE. of Germany, on the N. of the Gabreta Silva, thus forming the western part of the range called the Sudeten in the N. of Bohemia. (Pitu. ii. 11. § 9, 23, § 157.) [L. S.]

SUGBAS, a river on the north coast of Germany, between the Albis and Visius, which flows into the Baltic at a distance of 856 stadii to the west of the mouth of the Visus (Marcian. p. 33), and which, according to Plinius (ii. 11. § 11) divided at its mouth into several branches. [L. S.

SUEL (Zewch, Plat. iv. 4. § 7), a town of Hispania Baetica, on the road from Malaca to Gasco.
SUELT TERI.

(\textit{Itin. Ant.} p. 405.) According to inscriptions it was a Roman municipium in which libertini had been settled. (Reina. pp. 13, 131; Spon, \textit{Miscell.} v. p. 189; Orelli, \textit{Iscr.} no. 3914; Melis, ii. 6, Plin. iii. 1. s. 3.) It is the modern \textit{Fuengirola}. (\textit{Iscr.} in Aldrete, \textit{Orig. Leng.} Cust. i. 2.) [T. H. D.]

SUELT TERI, a town of Cibala, is mentioned by Plisty (iii. 4), between the Camatulici and the Verrucini. The name Seltieri is placed in the Table above Forum Julii (\textit{Frugius}). Nothing can be ascertained about the position of this people [\textit{Camatulici}]. [G. L.]

SUESIA PALUS, a large lake of Germany mentioned only by Pomponius Mela (iii. 8) along with two others, the Estia and Melagium, but it is impossible to say what lake he is alluding to. [L. S.]

SUESIA, sometimes called for distinction's sake SUESIA AURUNCA (\textit{Zosima}; \textit{Euh. Sueonana; Sessa}), a city of Latium in the widest sense of that term, but previously a city of the Aurunci, situated on the SW. slope of the mountain of Rocca Monfina, about 5 miles S. of the Liris, and 8 from the sea. Though it became at one time the chief city of the Aurunci, it was not a very ancient city, but was founded as late as B.C. 337, in consequence of the Aurunci having abandoned their ancient city (called from their own name Auruncus), which was situated a good deal higher up, and about 5 miles by S. of the modern city and had been destroyed by the Sidicini, and Susessa became thenceforth the capital of the Aurunci (Liv. viii. 15). That people had, after their defeat by T. Manlius in B.C. 340, placed themselves under the protection of Rome, and we do not know by what means they afterwards forfeited it; perhaps, like the neighbouring cities of Vesta and Minturnae, they had been shaken by the defeat of the Romans at Lutulace; but it is clear that they had in some manner incurred the displeasure of the Romans, and given the latter the right to treat their territory as conquered land, for in B.C. 313 a Roman colony was established at Susessa. (Liv. ix. 28; Vell. Pat. i. 14.) It was a colony with Latin rights, and it consequently absorbed among those which in the third Punic War professed their inability to furnish their required quota to the Roman armies. It was a few years later by the imposition of double contributions. (Liv. xxvii. 9, xxix. 15.) It is again mentioned in the \textit{Civil Wars} of Marius and Sulla, when it espoused the party of the latter, but was surprised and occupied by Sertorius. (Appian, \textit{B.C.} 1. 85, 108.) In the time of Cicero it had passed into the condition of a municipium by virtue of the Lex Julia, and is spoken of by that orator as a prosperous and flourishing town; it was the scene of a massacre by Antonius of a number of military captives. (\textit{Cic. Phil.} iii. 4, iv. 2, xiii. 6.) It received a fresh colony under Augustus, which was known by the name of "\textit{Colonia Julia Felix Calvisia}," by which we find it designated in an inscription. (\textit{Lib. Col.} p. 337; Plin. iii. 5. s. 9; Gruter, \textit{Iscr.} p. 1093. 8; Orelli, \textit{Iscr.} 4047.) Numerous other inscriptions attest its continuance as a flourishing and important town under the \textit{Rome Empire} (Orelli, \textit{Iscr.} 130, 386, 1015, 2264, 3049; Mommsen, \textit{Iscr.} ii. N. pp. 310—315); and this is confirmed by existing remains: but no mention of it is found in history. Nor is its name found in the Itineraries; but we learn from existing traces that there was an ancient road which branched off from the Via Appia at Minturnae and proceeded by Susessa to Teanum, from which it was continued to Beneventum. (Hoare's \textit{Class. Topogr.} vol. i. p. 145. This is evidently the same line given in the \textit{Itin. Ant.} p. 121, though the name of Susessa is not there mentioned.)

Suesa Aurunca was the birthplace of the celebrated satirical poet Lucilius, whence he is called by Juvenal "\textit{Aurunciæ Alumnus}" (\textit{Anon. Epist.} 15. 9; Juv. i. 20.) The modern city of Sessa undoubtedly occupies the ancient site; and considerable remains are still visible, including, besides numerous inscriptions and other fragments, the remains of a temple incorporated into the church of the \textit{Sessaesidra}, a remarkable crypta, and several extensive subterranean vaults under the church of S. Benedetto, constructed of reticulated masonry. Some remains of an amphitheatre are also visible, and an ancient bridge of 21 arches, constructed for the support of the road which leads into the town at the modern \textit{Porta del Borgo}. It is still called \textit{Pontis de Romanico}, supposed to be a corruption of \textit{Ponte Aurunca} (Hoare, l. c. pp. 145—146; Ginatimiani, \textit{Dict. Topogr.} vol. ix. p. 66.) The fertile plain which extends from the foot of the hills of Sessa to the Liris and the sea, now known as the \textit{Desuntio di Sessa}, is the ancient "\textit{Ager Vesicinius,}" so called from the Ausonian city of Vescia, which seems to have ceased to exist at an early period [\textit{Vescia}]. The district in question was probably afterwards divided between the Roman colonies of Suesa and Sinusessa. [E. H. B.]

COIN OF SUESA AURUNCA.

SUESSA POMETIA (\textit{Sovessa Pometia}, Diania; \textit{Euh. Pometinon}), an ancient city of Latium, which had ceased to exist in historical times, and the position of which is entirely unknown, except that it bordered on the "\textit{Pomptinus ager}" or Pomptinae Paludes, to which it was supposed to have given name. Virgil reckons it among the colonies of Alba, and must therefore have considered it as a Latin city (\textit{Aen. vi. 776}); it is found also in the list of the same colonies given by Diodorus (vii. Fr. 8); but it seems certain that it had at a very early period become a Volscian city. It was taken from that people by Tarquinius Superbus, the first of the Roman kings who is mentioned as having made war on the Volscians (Liv. i. 53; Strab. v. p. 231; Vict. \textit{Livy} iii. 8). Sacco indeed calls it the metropolis of the Volscians, for which we have no other authority; and it is probable that this is a mere inference from the statements as to its great wealth and power. These represent it as a place of such opulence, that it was with the booty derived from thence that Tarquinius was able to commence and carry on the construction of the Capitol temple at Rome. (\textit{Livy} l. c.; Diania, in \textit{Cic. de Rep.} ii. 24; Plin. vii. 16. s. 15.) This was indeed related by some writers of Apollon, another city taken by Tarquin (Val. Antias, \textit{ap. Plin.} iii. 5. s. 9), but the current tradition seems to have been
that connected with Pometia (Tac. Hist. iii. 72). The name of Suessa Pometia is only once mentioned before this time, as the place where the sons of Ancus Marcus retired into exile on the accession of Servius. (Liv. i. 41). It is clear also that it survived its capture by Tarquin, and even appears again in the wars of the Republic with the Veientes, as parties of great power and importance. Livy indeed calls it a "Colonia Latina," but we have no account of its having become such. It, however, revolted (according to his account) in n. c. 503, and was not taken till the following year, by Sp. Cassius, when the city was destroyed and the inhabitants sold as slaves. (Liv. ii. 16, 17). It nevertheless arose again, and recovered its ancient name (Liv. iii. 5. 45) in the hands of the Veientes, but was again taken and pillaged by the consul P. Servilius (ib. 25; Dionys. vi. 29). This time the blow seems to have been decisive; for the name of Suessa Pometia is never again mentioned in history, and all trace of it disappears. Pliny notices it among the cities which were in his time utterly extinguished (Plin. i. 5. 45), and no record seems to have been preserved even of its site. We are, however, distinctly told that the Pontine ager and the Pontine tribe derived their appellation from this city (Vest. s. a. Pontepis, p. 283), and there can therefore be no doubt that it stood in that district or on the verge of it; but beyond this all attempts to determine its site must be purely conjectural. [E. H. B.]

SUESSETAE'NI, a people of Hispania Tarraconensis, mentioned only by Livy (xxv. 34, xxviii. 24, xxxiv. 20, xxxix. 42) and especially in connection with the Sedetani (or Edetani). Marca (Hisp. ii. 9. 4) takes them for a branch of the Coisetani; and Uberti (ii. p. i. p. 918) seeks them more particularly among the Edetani and Herpetes (T. H. D.)

SUESSSIONES, or SUESSONES (Oblatores, Ptol. ii. 9. 8) a people of Gallia Belgica. The Remi told Caesar (B. G. ii. 3) in n. c. 57 that the Sueessiones were their brothers and kinmen, had the same political constitution and the same laws, formed one political body with them, and had the king and chief priest upon the territory bordered on by the territory of the Remi, and was extensive and fertile; within the memory of man the Suecessiones had a king, Dativius, the most powerful prince in Gallia, who even had the dominion of Britannia; at this time (n. c. 57) they had a king named Galba, a very just and wise man, to whom the Belgae who were combating against Caesar unanimously gave the direction of the war. The Suecessiones had twelve towns, and promised a contingent of 50,000 men for the war with Caesar.

Caesar (B. G. ii. 12) took Noviodunum, a town of the Suecessiones, and the people submitted [Noviodunum; Augusta Suecessionum]. The Suecessiones had the rich country between the Oise and the Aisne, between two towns of Suecessiones, a country now preserved their name unchanged. The Suecessiones are mentioned (B. G. vi. 75) among the peoples who sent their contingent to attack Caesar at Alesia, n. c. 52; but their force was only 5000 men. Caesar paid the Suecessiones for their pains by subjecting them to his brothers the Remi (B. G. viii. 6): "qui Remi ex parte hominum Suecessionium, in qua passum est verbum "attribut" denotes a political dependence, and in Gallia that signified payment of money. The Remi took cares of themselves [Remi].

Pliny names the Suecessiones Liberi (iv. 17), which, if it means anything, may mean that they were reissued in his time from their dependence on the Remi. In Pliny's text the name "Suecomi" stands between the name Veromandulai and Sueessiones; but nobody has yet found out what it means.

The orthography of this name is not quite certain; and the present name Suesseiia is as near the true as any other form. In Strabo (v. p. 195) it is Σουσσέοιες, and Lucian (I. 422) has—

"Et Bituris, longique levae Sueissones in armis:"

Suecessones is a correction; but there is no doubt about it (ed. Oudem.)

[S. L.]

SUESSULA (Σουσσώλαιa; Eth. Suesstita: Sessula), a city of Campania, situated in the interior of the country, near Nola, and was chiefly, between Capua and Nola, and about 4 miles N. of Acerra. It is repeatedly mentioned during the wars of the Romans with the Samnites, as well as in their campaigns against Hannibal. Thus in the First Samnite War (n. c. 343) it was the scene of a decisive victory by Valerius Corvus over the Samnites, who had gathered together the remnants of their army which had been previously defeated at Mount Gaurus (Liv. vii. 37). In the great Campanian War shortly after, the Sessulans followed the fortunes of the citizens of Capua, and shared the same fate, so that at the close of the contest they must have obtained the Roman citizenship, but without the right of suffrage (Hann. ii. 5. 2). The Sessulans during the Punic War the city became a considerable part, though apparently more from its position than its own importance. The line of hills which rises from the level plain of Campania immediately above Sessula, and forms a kind of prolongation of the ridge of Mount Tifata, was a station almost as convenient as that mountain itself, and in n. c. 216, it was occupied by Marcellus with the rest of his army, which had gathered together the remains of their army which had been defeated at Nola (Liv. viii. 31, xxiv. 46, 47, xxv. 7, 22, xxvi. 9). But from this period the name of Sessula disappears from history. It continued to be a municipal town of Campania, though apparently one of a secondary class; and Inscriptions attest its municipal rank under the Empire. It had received a body of veterans as colonists under Sulla, but did not obtain the colonial rank (Syrab. v. p. 249; Pinn. iii. 5. 9; Orell. Inscr. 139, 130, 2938; Lib. Col. p. 237).

The Tabula places it on a line of road from Capua to Nola, at the distance of 9 miles from each of these cities (Tab. Peut). It was an episcopal see in the first ages of Christianity, and its destruction is ascribed to the Saracens in the 9th century. Its ruins now lie in a marshy forest about 4 miles S. of Maddololose, and an adjacent castle is still called Torre di Sessa. Inscriptions, as well as capitals of columns and other architectural fragments, have been found there (Pratelli Vita Appio, iii. 3. p. 347; Romannelli, Ant. ibi p. 590). [E. H. B.]

SUEUTRI (Σουεύτριος, Ptol. iii. 1. 19, 17; Liv. Σουεύτριος in some editions), a Ligurian people, placed by Pliny (iii. 4) above the Orybiti, who were on the coast between Frisii and Ambii. The Sueetri are the last people named in the Trophy of the Alps. If the position of their town Salum [Salmum] is
properly fixed, the Suevi were in the northern part of the diocese of Frigia.

SUEVI (Σωβίων or Σοβίων), is the designation for a very large portion of the population of ancient Germany, and comprised a great number of separate tribes with distinctive names of their own, such as the Semnones. German authors generally connect the name Suevi with Suebien, i. e. to sway, move unsteadily, and take it as a designation of the unstable and migratory habits of the people, to distinguishing them from the Ingerservoli, who dwelt in villages or fixed habitation (Zeuss, Die Germanen, p. 55, foll.); others, however, interpret the name with good reason, regard the name as of Celtic or even Slavonian origin; for the Romans no doubt employed the name, not because indigenous in Germany, but because they heard it from the Celts in Gaul. We must, however, from the first distinguish between the Suevi of Caesar (B. G. i. 37, 51, 54, iii. 7, iv. 1, &c.) and those of Tacitus (Germ. 38, &c.): the Suevi in Caesar occupied the eastern banks of the Rhine, in and about the country now called Baden, while Tacitus describes them as occupying the country to the north and east of the Suevi of Caesar, so that the two writers assign to them quite a different area of country. Strabo (viii. p. 398), however, has given this name to a country extended from the Rhine to the Alps, and that some of them, such as the Hermunduri and Longobardi, had advanced even to the north of the Alba. Whether the nations called Suevi by Caesar and Tacitus are the same, and if so, what causes induced them in later times to migrate to the north and east, are questions to which history furnishes no answer. It is possible that the Suevi of Caesar encountered were only a branch of the great body, perhaps Chatti and Longobardi. That these latter were pure Germans cannot be doubted; but the Suevi of Tacitus, extending from the Baltic to the Danube, and occuping the greater part of Germany, no doubt contained many Celtic and still more Slavonic elements. In history and in legend, and with great probability, that the name Suevi was applied to those tribes which were not pure Germans, but more or less mixed with Slavonians; for thus we can understand how it happened that in their habits and mode of life they differed so widely from the other Germans, as we see from Tacitus; and it is easy to see, without reference to the general fact, which we find Slavonians peaceably established in countries previously occupied by Suevi. (Comp. Pline, iv. 28; Ptol. ii. 11. § 15; Oros. i. 9.) It deserves to be noticed that Tacitus (Germ. 2, 45) calls all the country inhabited by Suevian tribes by the name Suevia. The name Suevi appears to have been known to the Romans as early as n. c. 123 (Sisenna, cap. Nov. e. loco alnece), and they were at all times regarded as a powerful and warlike people. Their country was covered by mighty forests, but towns (oppida) also are spoken of. (Caes. B. G. iv. 19.) As Germany became better known to the Romans, the generic name Suevi fell more and more into disuse, and the separate tribes were called by their own names, although some, as the Suebi, retained the name of Suevi to the Semnones, Longobardi, and Angli.

In the second half of the third century we find the name Suevi limited to the country to which it had been applied by Caesar. (Amm. Marc. xvi. 10; Jornand. Get. 55; Tab. Peut.) These Suevi, from whom the modern Suebi and the Suebians derive their names, seem to have been a body of adventuriers from various German tribes, who assumed the ancient and illustrious name, which was as applicable to them as it was to the Suevi of old. These later Suevi appear in alliance with the Alamanni and Burgundians and possess the country of the German side of Gaul, and Switzerland, and even Italy and Spain, where they joined the Visigoths. Bicimer, who acts so prominently a part in the history of the Roman empire, was a Suevian. (Comp. Zeuss, L. c.; Wilhelm, Germanien, p. 101, &c.; Grimm, Deutsche Gram, i. pp. 8, 60, ii. p. 25, Gesch. der Deutschen Spr., i. p. 494; Latham, on Tacit. Germ. Epit. i. xxxi.)

SUEVICUM MARE, is the name given by Tacitus (Germ. 45) to the Baltic Sea, which Ptolemy calls the Σωβιατος θαλασσ. (vii. 5. § 2, viii. 10. § 2.)

SULCI (Συλκει) is a town of Byzacena, 25 miles S. of Sufes. In its origin it seems to have been a later and smaller place than the latter, whose name it seems to be a diminutive—little Sufes. In process of time, however, it became a very considerable town, as it appears to have been the centre whence all the roads leading into the interior radiated. Some vestiges of its ancient magnificence still remain; the remains of three temples, a triangular altar, &c., at the present Sita, which is seated on a lofty plateau on the right bank of the Wed Dichtnna, 80 kilometres SW. of Kairouan, attest its ancient importance. (See Shaw’s Travels, p. 107; Peiser, in Revue Archéol. July 1847.) [T. H. D.]

SUIJA (Συίζα, Steph. Byz. s. v.) E. H. Συίσα, Stobæus, §§ 331, 332; Pliny, in Panegyric, 70, says of Elysus in Crete, 50 stadia to the W. of Pocellassus, situated on a plain. It probably existed at least as the time of Hierocles, though now entirely uninhabited. Mr. Pasley (Travels, vol. ii. p. 100) found remains of the city walls as well as other public buildings, but not more ancient than the time of the Roman Empire. Byzacena tumuli exist resembling those of Haghio Kyrko; an aqueduct is also remaining. [E. B. J.]

SUILLUM [HIVILVLLVM]. [CENOMANI.]

SUIONES, are mentioned only by Tacitus (Germ. 44) as the most northern of the German tribes, dwelling on the coast and in the interior, thinking of Scandia or Scandinavia; and Suiones unquestionably contains the root of the modern name Sweden and Sweden.

SUISSA, a town in Armenia Minor (It. Anit. pp. 207, 216), where, according to the Notitia Imperii (p. 27), the Ala I. Ulpia Caesarum was stationed; but its site is now unknown. [L. S.]

SUISSATIUM (Suevocaustum) in Ptolemy’s Geography, places of the Suevi, 20 M. (6. § 65), a town of the Cariti in Hispania Tarraconensis. The Geogr. Rav. (iv. 45) calls it Suestatum. It is the modern Vittoria. [T. H. D.]

SULCI (Συλκει, Steph. B. Ptol.; Συλκεις, Strab.; Zulcαu, Paus.; E. H. Sulcitatis; S. Antico), one of the most considerable cities of Sardinia, situated in the SW. corner, on a spur. It is called Isola di S. Antico, which is, however, joined to the mainland by a narrow isthmus or neck of sand. S. of this isthmus, between the island and the mainland, is an extensive bay, now called the Golfo di Palmas, which was known in ancient times as the Sulcitanae Fortus (Ptol.). The foundation of Sulci is expressly attributed to the Cartha-
SULGAS.

SULMAS.

SULGAS, river. [GALLIA, p. 954; VINDALDUM.]

SULLA, SULLENA (Zoula, Zoula, Saliniana, Stadisiana, §§ 394, 395), a promontory of Crete, 65 stadia from Phalas, where there was a harbour and good water, identified by Mr. Pashley (Transact, vol. 1, p. 304) with Hopbo Galis, the chief port of Amari, on the S. coast of the island. [E. B. J.]

SULIS, in Gallia, is placed in the Table on a route from Dartoritum, which is Dariorium [DARIOGUM] the capital of the Veneti, to Gessorio the western extremity of Bretagum. The distance from Dariorium to Sulla is xx. By following the river to the junction of a small river named Semel with the river of Blasus. The name and distance, as D'Anville supposes, indicate the position of Sulis. [G. L.]

SULONIACAE, a town in Britannia Romana (Itin. Ant. p. 471), now Bredon Hill in Hertfordshire. (Camden, p. 359.) [T. B. D.]

SULMO (Sermosetia), an ancient city of Lutium, mentioned only by Pliny (iii. 5. a. 9) among those which were extinct in his time, and incidently noticed by Virgil. (Aen. 5. x. 577.) It is in all probability the same place with the modern Sermoseta, when, although, which, appears, looking from the Pontine Marshes. [F. H. B.]

SULMO (Zoula, Saliniana, Saliniana, Saliniana), a city of the Peligni, situated in the valley of the Gissio, in a spacious basin formed by the junction of that river with several minor streams. There is no doubt that it was one of the principal cities of the Peligni, and it was the seat of faith, but it is said the admiral of Pompey, and furnished him with supplies; for which service they were severely punished by Caesar, on his return from Africa, s. c. 46, who imposed on the city a contribution of 100,000 sestertii, besides heavily increasing its annual tribute of corn (Birt. A. f. 98). Notwithstanding this infliction, Sulkia seems to have continued under the Roman empire to be one of the most flourishing towns in the island. Strabo and Mela both mention it as if it were the second city in Sardinia; and its municipal rank is attested by inscriptions, as well as by Pliny. (Strab. v. p. 225; Mel. ii. 7. § 19; Plin. iii. 7. § 13; Protol. iii. 3. § 3; Inscrip. ap De la Marmora, vol. ii. pp. 479, 482.) The Itineraries give a list of the public works done in the island to Ennio, a sufficient proof of the importance of the latter place. (Itin. Ant. pp. 63, 84.) It was also one of the chief episcopal sees into which Sardinia was divided, and seems to have continued to be inhabited through a great part of the middle ages, but ceased to exist before the 13th century. The remains of the ancient city are seen some distance to the N. of the modern village of St. Antoine, on the island or peninsula of the same name: and the works of art which have been found there bear testimony to its flourishing condition under the Romans. (De la Marmora, vol. ii. p. 357; Smyth's Sardinia, p. 317.) The name of Salisc is given at the present day to the whole district of the mainland, immediately opposite to St. Antoine, and is the name of the most fertile and best cultivated tracts in the whole of Sardinia. The Sultani of Polieomy (iii. 3. § 6) are evidently the inhabitants of this district.

The Itineraries mention a town or village of the name of Sulkia on the E. coast of Sardinia, which must not be confounded with the more celebrated city of the same name (Itin. Ant. p. 30). It was probably situated at Gresoel, near Tortoli. (De la Marmora, p. 443.) [E. H. B.]

SULMAS, river. [GALLIA, p. 954; VINDALDUM.]

SULLA, SULLENA (Zoula, Zoula, Saliniana, Stadisiana, §§ 394, 395), a promontory of Crete, 65 stadia from Phalas, where there was a harbour and good water, identified by Mr. Pashley (Transact, vol. 1, p. 304) with Hopbo Galis, the chief port of Amari, on the S. coast of the island. [E. B. J.]

SULLONIACAE, a town in Britannia Romana (Itin. Ant. p. 471), now Bredon Hill in Hertfordshire. (Camden, p. 359.) [T. B. D.]

SULMO (Sermosetia), an ancient city of Lutium, mentioned only by Pliny (iii. 5. a. 9) among those which were extinct in his time, and incidently noticed by Virgil. (Aen. 5. x. 577.) It is in all probability the same place with the modern Sermoseta, when, although, which, appears, looking from the Pontine Marshes. [F. H. B.]

SULMO (Zoula, Saliniana, Saliniana, Saliniana), a city of the Peligni, situated in the valley of the Gissio, in a spacious basin formed by the junction of that river with several minor streams. There is no doubt that it was one of the principal cities of the Peligni, and it was the seat of faith, but it is said the admiral of Pompey, and furnished him with supplies; for which service they were severely punished by Caesar, on his return from Africa, s. c. 46, who imposed on the city a contribution of 100,000 sestertii, besides heavily increasing its annual tribute of corn (Birt. A. f. 98); Sil. Ital. ix. 70—76.) The first mention of Sulmo occurs in the Second Punic War, when its territory was ravaged by Hannibal. (Diod. xii. 211, but without attacking the city itself. (Liv. xvi. 11.) Its name is not noticed during the Social War, in which the Peligni took so prominent a part; but according to Florus, it suffered severely in the subsequent civil war between Sulla and Marius, having been destroyed by the former as a punishment for its adherence to Sulla. (Vett. v. 3. 4.) The expressions of that rhetorical writer are not, however, to be construed literally, and it is more probable that Sulmo was confiscated and its lands assigned by Sulla to a body of his soldiers. (Zumpt, de Cola. p. 261.) At all events it is certain that Sulmo was a well-peopled and considerable town in a. c. 48. The city was assigned to the N. of the ancient city of seven cohorts; but the citizens, who were favorably affected to Caesar, opened their gates to his lieutenant M. Antonius as soon as he appeared before the place. (Cass. B. c. i. 18; Cic. ad Att. viii. 4. 12 a.) Nothing more is known historically of Sulmo, which, however, appears to have always been a considerable provincial town, the Ovidianus was one of the three municipal towns whose districts composed the territory of the Peligni (Peligni pars tertia rustica,) (Amor. i. 16.) and this is confirmed both by Pliny and the Liber Colonarii; yet it does not seem to have ever been a large place, and Ovid himself designates it as a small provincial town. (Amor. i. 15.) From the Liber Colonarii we learn that it was a colony, probably in the time of Augustus (Plin. i. 13. 17; Lib. Colon. pp. 229, 260); though Pliny does not give it the title of a Colonia. Inscriptions, as well as the geographers and Itineraries, attest its continued existence as a municipal town throughout the Roman Empire. (Strab. v. 241; Protol. iii. 1. § 64; Tab. Peut. in didasc. 3856; Monemna, Inscrip. R. K. N. pp. 287—289.) The modern city of Sulmona undoubtedly occupies the ancient site: it is a tolerably flourishing place and an episcopal see, having succeeded to that dignity after the fall of Viterbo, which had arisen on the ruins of Corfinium. (Romanielli, vol. iii. pp. 154—181.)

The chief celebrity of Sulmo is derived from its having been the birthplace of Ovid, who repeatedly alludes to it as such, and celebrates its fertility, and the numerous streams of clear and perennial water in which its neighbourhood abounded. But like the whole district of the Peligni, it was extremely cold in winter, whence Ovid himself said Silius Italicus in imitation of him, calls it "gales"
SUMATIA.

Sumno" (Ovid, Fast. iv. 81, Trist. iv. 10. 3, Amor. ii. 16; Sil. Ital. viii. 511.) Its territory was fertile, both in corn and wine, and one district of it, the Pausa Fabianus, is particularly mentioned by Pliny (xvii. 26. s. 43) for the care bestowed on the irrigation of the vineyards.

The remains of the ancient city are of little interest as ruins, but indicate the existence of a considerable town; among them are the vestiges of an amphitheatre, a theatre, and thermas, all of them without the gates of the modern city. About 2 miles from thence, at the foot of the Monte Morrone, are some ruins of reticulated masonry, probably those of a Roman villa, which has been called, without the slightest reason or authority, that of Ovid. (Bomanelli, vol. iii, pp. 159, 161; Craven's Asia Minor, vol. ii, p. 52.)

Suino was distant seven miles from Corfinium, as we learn both from the Tabula and from Cassar. (Caes. B. C. i. 18; Tab. Peut.) Ovid tells us that it was 90 miles from Rome (Trist. iv. 10. 4), a statement evidently meant to be precise. The actual distance as ruins, but indicating the existence of a considerable town; among them are the vestiges of an amphitheatre, a theatre, and thermas, all of them without the gates of the modern city. About 2 miles from thence, at the foot of the Monte Morrone, are some ruins of reticulated masonry, probably those of a Roman villa, which has been called, without the slightest reason or authority, that of Ovid. (Bomanelli, vol. iii, pp. 159, 161; Craven's Asia Minor, vol. ii, p. 52.)

SUMMONTORIUM, a place in Vindelicia (It. Ann. 177), where, according to the Notitia Imperii, the commander of the 3rd legion was stationed. Its exact site is uncertain. [L. S.]

SUMMUS PYRENAEUS. One of the passes of this name mentioned in the Antonine Itin. and the Table was on the road from Narbo (Narbonese) to Juncaria (Jusqueras) in Spain. The road passed from Narbona to the Molage, and thence to Juncaria, but the distances in the Itin. are not correct; nor is the distance in the Itin. correct from Summus Pyreneus to Juncaria. The pass, however, is well marked; and it is the Col de Pertus, which is commanded by the fort of Bellegerarde. This is the road by which Hannibal entered Gallia, and the Roman armies marched from Gallia into Spain. A second pass named Summus Pyreneus in the Antonine Itin. was on the road from Beneharnum (Beneharnum) in Aquitania to Cassaragusta (Saragosas) in Spain. The road went through Iluro (Oleriom) and Aspa Luca (Aspa Luca) and Forum Lignum (Forum Lignum), which is 5 from Summus Pyreneus. This road follows the Gane d'Aspa from Oleriom; and after leaving the valley there are two roads, one to the right and the other to the left. That to the right called Port de Bernère must be the old road, because it leads into the valley of Aragone and to Beilo in Spain, which is the Ebelinum of the Itin. on the road from Summus Pyreneus to Saragosas.

SUNNIUM. Of this the most western of all also named Summus Pyreneus on the road from Aque Tarbelllices (Dax) in Aquitania to Pompelon (Pamplona) in Spain. The Summus Pyreneus is the Sonnet de Castr-Pinao, from which we descend into the valley of Romesvalles on the road to Pamplona (Imus Pyreneus). (D'Anville, Notice, &c.)

[G. L.]

SUNA [AMBREIGNES].

SUNICLI. Tacitus (Hist. iv. 66) mentions the Sunici in the history of the war with Civilia. Civilia having made an alliance with the Agrippinenses (Cûes) resolved to try to gain over the mountain people to Cûes, and be the first secured the Sunici. Claudius Labeo opposed him with a force hastily raised among the Bæsali, Turgrii and Nervii, and he was confident in his position by having possession of the bridge over the Mosse. (Poms Morak.) No certain conclusion as to the position of the Sunici can be derived from this; but perhaps they were between Cûes and the Mosse, Pliny and the Frisianones. [G. L.]

SUNIUM (Sudaurum; Eth. Suoariae), the name of a promontory and demus on the southern coast of Attica. The promontory, which forms the most southerly point in the country, rises almost perpendicularly from the sea to a height of 30 ft. It is crowned with a temple of Athena, the tutelary goddess of Attica. (Paus. i. 1. § 1; Lyc. i. 23, Hom. Od. iii. 278; Soph. Ajax, 1235; Eurip. Cyc. 292; Vitruv. iv. 7.) Sunium was fortified in the nineteenth year of the Peloponesian War (n. c. 413) for the purpose of protecting the passage of the cornships to Athens (Thuc. viii. 4. c.), and was regarded from that time as one of the principal fortresses of Attica (Comp. Dem. pro Cor. p. 236; Liv. xxi. 25; Sclav. p. 21.) Its proximity to the silver mines of Laurium probably contributed to its prosperity, which passed into a proverb (Anaxand. ap. Athen. vi. p. 263, c.) but even in the time of Cicero it had sunk into decay (ad Att. xiii. 10). The circuit of the walls was 1,300 (or 1,400) yards, and the precipitous nature of the rocks afforded a natural defence. The walls which are fortified with square towers, are of the most regular Hellenic masonry, and enclose a space of a little more than half a mile in circumference. The southern part of Attica, extending northwards from the promontory of Sunium to Cape Kolonna, and as far as Thoron and Cape Argo on the west, is called by Herodotus the Suniac angle (ποιον γαρ ην Τηνακε, iv. 99). Though Sunium was especially sacred to Athena, we learn from Aristophanes (Eq. 557, Aves, 869) that Poseidon was also worshipped there.

The promontory of Sunium is now called Cape Kolonna, from the ruins of the town of Athens which still crowns its summit. Leake observes that "the temple was a Doric hexastyle; but none of the columns of the fronts remain. The original number of those in the flanks is uncertain; but there are still standing nine columns of the southern, and three of the northern side, with their architraves, together with the two columns and one of the antes of the pronaoς, also bearing their architraves. The columns of the peristyle were 3 feet 4 inches in diameter at the base, and 2 feet 7 inches under the capital, with an intercolumniation below of 4 feet 11 inches. The height, including the capital, was 19 feet 3 inches. The exposed situation of the building has caused a great corrosion in the surface of the stones which were brought from the neighbouring mountains; for it is less homogeneous, and of a coarser grain, than the marble of Pentas. The walls of the fortres were faced with the same kind of stone. The entabl-
tare of the peristyle of the temple was adorned with sculpture, some remains of which have been found among the ruins. North of the temple, and nearly in a line with its eastern front, are foundations of the Propylaeum or entrance into the sacred peribolos: it was about 50 feet long and 30 broad, and presented at either end a front of two Doric columns between antes, supporting a pediment. The columns were 17 feet high, including the capital, 2 feet 10 inches in diameter at the base, with an opening between them of 6 feet 6 inches. (The Temples of Athens, by L. V. 30.) The remark that there are no traces of any third building visible, and that we must therefore conclude that here, as in the temple of Athena Polias at Athens, Poseidon was honoured only with an altar. Wordsworth, however, remarks that a little to the NE. of the peninsula on which the temple stands is a conical hill, where are extensive vestiges of an ancient building, which may perhaps be the remains of the temple of Poseidon. (Athena et Aticles, p. 207.)

SUNNENIA, a small island on the S. coast of Spain (Geogr. Rav. v. 277). [T. E. D.]

SUNNONESIUS LACUS, a lake in Bitinia, between the Ascanius Lacus and the river Sangarius. (Strabo, v. 16.) It is probably the same lake which is mentioned by Eratosthenes (Hist. Ecol. ii. 14) under the name of Bederia Aulag in the neighbourhood of Nicomedia, and which is at present known under the name of Skabia. It seems, also, to be the same lake from which the younger Pliny (v. 50) proposed to cut a canal to the sea. [L. S.]

SUPERAEQUUM or SUPEREBUEUM (EA. Sacrae Euphrasii, 53; Ann. Monast. Vizogicae Subregus), a town of the Peligni, one of the three which possessed municipal rights, and among which the territory of that people was divided. [PELIGNI.] Hence it is mentioned both by Pliny and in the Liber Coloniarum, where it is termed “Colonia Supersequana.” It received a colony of veterans, probably under Augustus, in which a fresh batch of colonists was added in the reign of M. Aurelius. (Plinii. Il. xii. 17; Lucian. de Coma. p. 299; Zumpt, de Colon. p. 361.) The name is not mentioned by any other author, but several inscriptions attest its municipal importance. Its site, which was erroneously transferred by Cluverius to Palea, was clearly fixed by Holsteinius at a place still called Castell Facchio Subregus (in older documents Subregus or Subregus), where on inscriptions alluded to are still extant. It is situated on a hill on the right bank of the Aternus, and about 4 miles on the left of the Via Valeria. Its territory probably comprised the hilly district between that road and the Aternus. (Claver, Ital. p. 758; Holsteinus. Not. in Cleveor. p. 145; Romanelli, ed. iii. pp. 134—137; Mommsen, Inscrip. R. N. p. 289.) [H. E. B.]

SUPERATIL [Asterus.]

SUPERUM MARE. [A Dimastium Mare.]

SUPP’ARPA (Soppyrap, Peripl. M. E. c. 52, ed. Mill.), a place on the western coast of Hindostan, at no great distance from Barygaza or Berouah. Ptolemy calls it Zowpys (v. i. § 6). In Lassen’s map the name is placed on the bank of the pass of Manughe, near to the N. of Supp’ara. This place is also mentioned by Edrisi (l. p. 171), and by Cosmas Indicopleustes under the form of Ophodadi (p. 337, ed. Montfasci). It has been suspected, with much reason, by Benfey, that this is the “Ophir” of the Bible,—the name in Sasanite and Hebrew respectively offering some remarkable analogies. (Benfey, art. Indian, in Erck and Gruber, p. 28.) [V.]

SURA (vr. Zeiupa: Euth. Zographou), a city of Syria, situated on the Euphrates, in the district of Prissrene, long. 37° 10', lat. 33° 40' of Ptolemy, as places it between Alia and Alamata (v. 15. § 81), apparently the Sura of the Peutinger Table, according to which it was 105 M. P. distant from Palmyra. It is called in the Notitiis Imperii (34 Flavi Taurinac Sura (ap. Mannert, p. 408). It is probably identical with the Ums of Pinsky, where, according to him, the Euphrates turns to the east from the desert of Palmyra (v. v. x. a. 87). Ed. Voss, Antwerp. Sura (36. L. 14.) Leake remarks that the town was Philiscum, a town of the Parthians on the Euphrates. It was 136 stadia distant from Helicopis, which it is situated in what was called "Barbaricus campus." It was a Roman garrison of some importance in the Persian campaigns of Belisarius; and a full account is given of the circumstances under which it was taken and burned by Chosroes I. (A. D. 539) was, having marched three long days' journey from Ctesiphon to Zenobia, along the course of the Euphrates, thence proceeded an equal distance up the river to Sura. Incidental mention of the bishop proves that it was then an episcopal see. (Procop. Belis. Pers. i. 18, ii. 5.) Its walls were so weak that it did not resist the attack of the Persians, but it is afterwards more substantially fortified, by order of the emperor Justinian. (Ibid. de Edificio Justiniani. i. 9.) "About 36 miles below Bals (the Abis of the Dolyom), following the course of the river, are the ruins of Sura; and about 6 miles below is the ford of El-Hammama," which Col. Chowne identifies with the Zemuna of Thapsacus, where, according to tradition, the Euphrates took its name of the Euphrates (Expedition for Survey, ed. vol. i. p. 416). In the Chart (iii.) it is called Souroch, and marked as "brick ruins," and it is probable that the extensive brick ruins a little below this site, between Bals and Thapsacus (Thapsacum), may be the remains of Alamata, mentioned in connection with Sura by Leake and Jordan. It is certainly wrong to place the modern Siriogok with the ancient Thapsacum (p. 72). [C. W.]

SURA, a branch of the Mosella in Gallia. Austria (Moselle, v. 354):—

"Namque et Prasennac Nemenseque adita sunt; Sura tenui properat non degemer iri socienda."

The Sura (Sour or Sura), comes from Lissamery and after receiving the Prasennac (Prasit) and Nemes (Nema) joins the Our, which falls into the Moselle at the left bank above Augusta Treviromenus. [G. L.]

SURAE. [Sorae.]

SURASEAE (Sorpolis, Arrian, ed. c. 8), an Indian nation, noticed by Arrian, who speaks to have dwelt along the banks of the Jumna. They were famous for the worship of the Indian Hercules, and had two principal cities, Methora (Mudra) and Cleisobola. The name is, pure Sasanite Sera- sennakhs. [Y.]

SURADONES, a people of Hispasia Tarracoensis, seated near Ilerda, and probably belonging to the Celtiberians. (Plin. iii. c. 3. 4.)

SURIAM (Sorpolia), Prot. v. 10. § 6), a place in Colchis, at the mouth of the Suria. (Plin. iv. c. 4.) There is still at this spot a plain called Sorain. (Ritter, Erdkunde, ii. p. 809.) [T. E. D.]

SURIUS, a small tributary river of the Phasis in Colchis. (Plin. vi. c. 4. 4.) According to the same authority, its water had a purifying power (v. 105. a. 106.) [T. E. D.]
SURRENTINUM PROM. [Mnereveae Prom.] SURRENTUM (Zugërvero, Strab.; Zopharvros, Ptol.; Eth. Surrentinum: Sorrento), a city on the coast of Campania, on the southern side of the beautiful gulf called the Crater or Bay of Naples, abut 7 miles from the headland called Minervae promontoria. It is the most interesting feature of that bay. We have little information as to its early history; its name is never mentioned till after the Roman conquest of Campania. Tradition indeed ascribed the foundation of Surrentum to the Greeks, but whether it was a colony from Cumae, or an earlier Greek settlement, we have no account; and there does not appear any evidence that it had, like many places in this part of Italy, a distinctly Greek character in historical times. Strabo calls it a Campanian city (Strab. v. 247), which may very probably refer to its not being one of those occupied by the Picentini. According to the Liber Coloniarum a great part of its territory, and perhaps the town itself, was considered in a certain sense as consecrated to Minerva, on account of its proximity to her celebrated temple on the adjoining promontory, and was for that reason occupied by Greek settlers (Lith. Col. p. 236). It nevertheless received a partial colony under Augustus (16), but without attaining the rank or character of a Colonia. Numerous inscriptions record its existence as a municipal town under the empire, and reference is made in the Panegyric of Aurelian noticed by all the geographers; but its name is rarely mentioned in history (Strab. I. c.; Plin. iii. 5. s. 9; Mel. i.-ii. § 9; Ptol. iii. 7 § 7; Orell. Inscr. 3742; Mommsen, Inscr. R. N. 2111–2125). It was, however, restored to by wealthy Romans on account of its beautiful scenery and delightful climate, and was so highly regarded that it had, Stattius, a villa there, which the poet has celebrated at considerable length in one of his minor poems (Silv. i. 2). We are told also that Agrippa Postumus, when he first incurred the displeasure of Augustus, was ordered to retire to Surrentum, before he was consigned to complete banishment in the island of Panasia (Suet. Aug. 65). It derived its name from its wine, which enjoyed a high reputation at Rome, and is repeatedly alluded to by the poets of the Empire. It was considered very wholesome, and was in consequence recommended by physicians to convalescents and invalids. Tiberius indeed is said to have declared that it owed its reputation entirely to the physicians, and was in reality no better than vinegar. It did not attain its maturity till it had been kept 25 years (Plin. xiv. 6. s. 8; Athenaeus I. 266; Ovid. Met. xv. 710; Martial, xiii. 110; Stat. Silv. iii. 5. 102; Strab. v. 245; Colum. R. iii. 2 § 10). We learn from Martial also (xiii. 110, xiv. 102) that Surrentum was noted for its pottery. The hills which produced the celebrated wine were those which sloped down from the city, the hill on which the city was situated ("Surrentin colles," Ovid. Met. l. c.), and separate it from the gulf of Posidonia on the other side. These hills form a part of the ridge which descends from the lofty mountain group of the Monte S. Angelo between Castellamare and Amalfi, and is continued as far as the headland opposite Caprea. This ridge circled the plain in which the city was situated ("Surrentin collae," Ovid. Met. l. c.), and is separate from the gulf of Posidonia on the other side. The celebrated sanctuaries of the Sirens, from which Surrentum itself was supposed to have derived its name, seems to have been situated (though the expressions of Strabo are not very clear) between this headland and the town (Strab. v. 247). But the islands of the Sirens (Sirenum Insulae) were certainly the rocks now called Li Galli, on the opposite side of the promontory. The town of Pollinum, which is described by Statius as looking down upon the deep Gulf of Futaoli, stood upon the headland now called Capo di Sorrento, on the W. of the town, separating the Bay of Sorrento from that of Tanaea: extensive ruins of it are still visible, and attest the accuracy of the poet's description. (Stat. Silv. ii. 2; Swinburne's Travels, vol. i. pp. 88–90.) The other ruins still visible at Sorrento and in its neighbourhood are of no great interest; they present numerous fragments of buildings of imperial times, to some of which the names of a temple of Hercules, temple of Neptune, &c. have been applied by local antiquarians, with no other foundation than the fact that we learn from Statius the existence of temples to those divinities at Surrentum. The most considerable relic of antiquity is a Piscina of large dimensions, which is in such good preservation that it still serves to supply the inhabitants with water. The modern town of Sorrento is a flourishing and populous place with a population of above 6000 souls; it is much resorted to by strangers, who are always delighted with the mild and delicious climate, for which it is already celebrated by Silinius Italicus ("Zephyro Surrentum molle salubri," Sil. Ital. v. 466.) SUSA (tâ Zeôra, Aeschyli Pers. 535, 730; Herod. i. 188; Xen. Cyr. viii. 6. § 8, &c.; in O. T. Sussamian, Esther. i. 2; Nekhemiah, i. 1; Daniel, viii. 2), the chief city of the province of Susiana, on the eastern bank of the Chosape (Kerkhah). There was considerable doubt among the ancient writers as to the exact position of this celebrated city. Thus Arrian (vii. 7), Pliny (vi. 27. s. 81), and Daniel (viii. 2) place it on the Enlarnes (Ulai in Daniel); while from other authors (Strab. xv. p. 728) it may be gathered that it was situated on the coast near the present town of Chioggia. For the origin of this name see CHOSAPE. We may add, however, that, according to Curtius, Alexander on his way from Babylon had to cross the Chosape before he could reach Susa (v. 2), and that the same inference may be drawn from the account of Aristagoras of the relative position of the places in Persia in his address to Cleomenes. (Herod. v. 58.) It appears to have been an early tradition of the country that Susa was founded by Dareius the son of Hystaspes (Plin. l. c.); and it is described by Aeschylius as μεν ΄αραβων ξουλιδος (Pers. 119). By others it is termed Mevargewon ξουλιδος (Herod. v. 54), and its origin is attributed to Memnon, the son of Tithonus. (Strab. i. c.; Steph. B. s. v.) The name is said to have been derived from ξουλιδος, a name of a plant (meaning λυδη), from the great abundance of those plants in that neighbourhood. (Steph. B. s. v.; Athen. xii. p. 513, ed. Cassaub.) Atheneaus also confirms the account of the excellence of the climate of Susa (l. c.). It may be remarked that the word ξουλιδος was well known as applied to an unprepared native Persian wine (see Susa iii. c. de liris; Athen. xv. p. 609; Etymol. M. s. v. ξουλιδος). The city was said to have been 120 stadia in circumference (Strab. i. c.), and to have been surrounded by a wall, built like that of Babylon of burnt brick. (Strab. i. c.; Paus. iv. 31.)
§ 5.) Diodorus (xiv. 16. xvii. 68) and Cassiodorus (vii. 15) speak of the strength and splendour of its citadel; and the latter writer observes that there was a temple there, built by Memnon, the king of Persia. Besides this structure, Pliny speaks of a celebrated temple of Diana (L. c.; see also Mart. Capella, vi. de Indis, p. 225, ed. Grotius), in all probability that of the Syrian goddess Anaitis, while St. Jerome adds, that Daniel erected a town there (Hieronymum, as Dami.), a story which Josephus narrates, with less prejudice, (Ant. xi. 8; Euseb., Hist. Eccl. l. 11.) Susa was one of the capitals at which the kings of Persia were wont to spend a portion of the year. Thus Cyrus, according to Xenophon, lived there during the three months of the spring. (Cyrop. viii. 6. § 23.) Strabo offers the most probable reason for this custom, where he states that Susiana was peculiarly well suited for the royal residence from its central position with respect to the rest of the empire, and from the quiet and orderly character of its government (L. c.). From these and other reasons, Susa appears to have been the chief treasury of the Persian empire (Herod. v. 49); and how vast were the treasures laid up there by successive kings, may be gathered from the narrative in Arrian, of the sums paid by Alexander to his soldiery, and having been spent in presents made by him to his leading generals, on the occasion of his marriage with Barsine and Parysatis (Curt. vii. 4. 5); even long after Alexander's death, Antigonus found a great amount of plunder still at Susa. (Diod. xiv. 48.)

With regard to the modern site to be identified as that of the ruins of Susa, there has been considerable difference of opinion in modern times. This has, however, chiefly arisen from the scarcity of travellers who have examined the localities with any sufficient accuracy. The first who did so, Mr. Kinneir, at once decided that the modern Sia, situated at the junction of Kerkhah and river of Dax, was the Howzah of Herodotus and the Howzah of the name of Susa, called Pidno Xerfis. (Polyaenus, iv. 3. 27.)

Susa was intersected by numerous rivers which flowed either to the Tigris or Persian gulf, from the high mountain watershed where it was surrounded. Of these the principal were the Eulasus (Keras), the Chosapes (Kerkashah), the Coprates (river of Dax), the Hadphath near Susa, and the Orosias (Tab). The inhabitants of the district appear to have borne indiscriminately the names of Susii or Susianii, and, as inhabitants of the plain country, to have been devoted to agricultural employments; in the mountains, however, were tribes of robbers, who, from time to time, were strong enough to raid by black mail the processions on their kings when traversing the plains. (Strab. xv. 2. 18.) Another name, whereby the people were known, at least in early times, was Cisii (Aesop. Pers. 16), and the land itself Cisia (Strab. xiv. p. 728; Herod. v. 49). This name is clearly connected with that of one of the chief tribes of the people, the Coisai, who are repeatedly mentioned in ancient authors. (Strab. xi. p. 222; Arr. loc. 40.) Polyb. v. s. 40.) There were many different tribes settled in different parts of Susiana; but it is hardly possible now to determine to what different races they may have belonged. Among these, the most prominent were the Dasi, a robber tribe on the mountain borders of Media; the Messabatae, who occupied a valley district, probably the old Hamadan, and extending in the direction along the Median mountains; and the Elymaei, inhabitants of Elymais, the remnant, in all probability, of the earliest dwellers in this province—Elam being the name whereby this whole district is known in the sacred records. (Jesuhe, xii. 2. Jerem. xiii. 25.) Besides these, several smaller races are conjectured on the confines of the greater Susiana, which describes the completion of a palace, commenced by Dareius the son of Hytsaspes and dedicated to the goddesses Tanaitis and Minia. A Greek inscription was also met with, carved on the base of a column, and stating that Ammisuchos, the satrap of Susiana, set it up in honour of the Zoroastrian god of Justice. The monument is in the neighbourhood, which they call and believe to be the tomb of Daniel. There is as question, however, that it is a modern structure of the Mohammedan times.

[SUSIANA (§ Σούσα, Procl. vi. 3, § 1; Polyb. v. 46; Strab. xiv. 729 sq. § Σούσα, Strab. xiv. 730 sq.).] The Susiana was the name of a province in the southern part of Asia, consisting of great measure of plain country, but traversed by some ranges of mountains. Its boundaries are variously given by different writers according as it was imagined to include more or less of the adjacent district of Persia. Generally, its limits may be said to have been, to the N. Media with the mountains the Charbarsus and Cambelius, part of the basin of the Paracosthoma; to the E. the outlying spars of the Paracosthoma and the river Orosias; to the S. the Persian gulf from the mouth of the Orosias to that of the Tigris; and to the W. the plains of Mesopotamia and Babylonia. (Cf. Poly. l. c. with Strab. l. c., who, however, treats Susiana as part of Persia). Susiana is derived from the name of the river, Susa, especially in grain, but exposed along the coast is intense heat. (Strab. xiv. p. 731.) The vine, the Macedonians are said to have introduced. (Strab. l. c.) Its principal mountains are those on the N. called by Pliny Charbursus and Cambelius (H. c. 27. s. 31), while a portion of the Montes Uzzi probably belonged to this region. On the S. appears a range called Pihon Xeris. (Polyaenus. iv. 3. 27.)

Susa was intersected by numerous rivers which flowed either to the Tigris or Persian gulf, from the high mountain watershed where it was surrounded. Of these the principal were the Eulasus or Keras, the Choaspes or Kerkashah, the Coprates or Dax, the Hadphath near Susa, and the Orosias or Tab. The inhabitants of the district appear to have borne indiscriminately the names of Susi or Susianii, and as inhabitants of the plain country, to have been devoted to agricultural employments; in the mountains, however, were tribes of robbers, who, from time to time, were strong enough to raid by black mail the processions on their kings when traversing the plains. (Strab. xiv. p. 728.) Another name, whereby the people were known, at least in early times, was Cisai or Cissia (Aesop. Pers. 16), and the land itself Cisia (Strab. xiv. p. 728; Herod. v. 49). This name is clearly connected with that of one of the chief tribes of the people, the Coisai, who are repeatedly mentioned in ancient authors. (Strab. xi. p. 222; Arr. loc. 40.) Polyb. v. 54, 63.) There were many different tribes settled in different parts of Susiana; but it is hardly possible now to determine to what different races they may have belonged. Among these, the most prominent were the Dasi, a robber tribe on the mountain borders of Media; the Messabatae, who occupied a valley district, probably the old Hamadan, and extending in the direction along the Median mountains; and the Elymaei, inhabitants of Elymais, the remnant, in all probability, of the earliest dwellers in this province—Elam being the name whereby this whole district is known in the sacred records. (Jesuhe, xii. 2. Jerem. xiii. 25.) Besides these, several smaller races are conjectured on the confines of the greater Susiana, which describes the completion of a palace, commenced by Dareius the son of Hytsaspes and
SUSUDATA.

towns, there seems to have been no city of importance in Susiana, excepting Susa itself. [V.]

SUSUDATA (Σουσουδάτα), a place in the southeast of Germany, probably in the country inhabited by the Silingae, at the foot of the Vandaliæ Montes. (Ptol. ii. 11. § 38.) Its exact site cannot be ascertained.

SUTHUL, a town and fortress in the district of Numidia, where Jugurtha had a treasury. (Sall. Jug. 37.) [T. H. D.]

SUTRIUM (Σουτρίους; Eth. Sutriense; Sutri), a city of Etruria, situated in the southern part of that country, 33 miles from Rome, on the line of the Via Cassia. There is no doubt that it was an ancient Etruscan city, but it is now a small town, and in all probabilities of more dependence of one of its more powerful neighbours. It was not till after the fall of Veii that the Romans carried their arms as far as Sutrium, which they first attacked in B.C. 391, with what success is uncertain (Diod. xiv. 98); but it must have fallen into their hands either in that or the following year, as we find it first mentioned in connection with Veii at that date after the Gaulish invasion. (Liv. vi. 3.) The very year after that event (B.C. 389) the neighbouring Etruscans laid siege to Sutrium with a large force; the city fell into their hands, but was recovered (as the tradition related) by the dictator Camillus on the same day. (Liv. vi. 3; Diod. xiv. 117.) Very near by, a small and early town (B.C. 310) that was able to renew the siege at the opening of the campaign, but were once more defeated by the consuls Q. Fabius Maximus, and took refuge in the Ciminian forest, which lay only a few miles distant. (Ib. 33, 35.) But this barrier was now for the first time passed by the Roman arms, and henceforth the wars with the Etruscan were transferred to a more northerly region. From this time, therefore, we hear but little of Sutrium, which was, however, still for a time the outpost of the Roman power on the side of Etruria. (Liv. x. 1.) Its name is next mentioned after a long interval during the Second Punic War, as one of the Coloniae Latae, which, in B.C. 209, declined the tributary Gauls any longer as the burdens of the war. It was in consequence punished at a later period by the imposition of still heavier contributions. (Liv. xxvii. 9, xxix. 15.) Its territory was one of those in which permission was given to the exiled citizens of Capua to settle. (Id. xxvii. 34.)

Sutrium continued under the Roman government to be a small and unimportant country town; it is only once again mentioned in history, at the outbreak of the Perusian War (B.C. 41), when it was occupied by Agrrippa, in order to cut off the communications of Lucius Antonius with Rome. (Appian, R. C. v. 31.) But its position on the Casanall Way preserved it from falling into decay, like so many of the Etruscan cities, under the Roman Empire: it is noticed by all the geographers, and its continued existence down to the close of the Western Empire is proved by inscriptions as well as the Itineraries. We learn that it received a fresh colony under Augustus, in consequence of which it became the seat of two episcopal sees; and the title "Colonia Julia Sutrina." (Strab. v. p. 226; Plin. iii. s. a. 8; Ptol. iii. 1 § 50; Iren. Antiq. p. 286; Tab. Peut.; Lib. Col. p. 217; Gruter, Inscr. p. 302. 1; Zumpt, de Col. p. 351.)

The modern town of Sutri is but a poor place with only about 3000 inhabitants, but retains its episcopal see, which it has preserved throughout the middle ages. It occupies the site of the ancient city, as is shown by many fragments of columns and other architectural ornaments built into the modern houses, as well as by some portions of the ancient walls, which resemble in their style of construction those of Nepi and Falern. The situation is, like that of most of the towns in this part of Etruria, that of a nearly isolated hill belonging to the slopes or banks of tufo rock, of no great elevation, and surrounded by small gians or ravines on all sides. In the cliffs which bound these are excavated numerous tombs, of no great interest. But the most remarkable relic of antiquity at Sutri is its amphitheatre, which is excavated in the tufo rock, and is in this respect unique of its kind. It is, however, of small size, and, though irregular in construction, its architectural details are all of a late character: hence it is probable that it is really of Roman and Imperial times, though great importance has been sometimes attached to it as a specimen of an original Etruscan amphitheatre. Its analepsis and irregularities of structure are probably only owing to the fact that it was worked out of a previously existing stone-quarry. (Dennius's Etruria, vol. i. pp. 94–97; Nibby, alte, vol. iii. pp. 142, 143.)

SUZAEI (Σουζαί), a tribe of ancient Persia, noticed by Pliney (vi. § 5). Lasen considers from this name that they were connected with the people of Susa, and that they were the ancient race of the Susans, which in the Persian period was known as the race of the Susi, one of the mountain races of Susiana. (Erasm. u. Gruber's Encyc. iii. sect. vol. xvii. p. 483.)

SYAGROS PROMONTORIUM (Συγγρός Πομπόνιος), a promontory of the E. coast of Arabia, at the eastern extremity of the Adramyttes, the westernmost of the gulf of the Sachalitis, placed by Pliney in long. 90°, lat. 14° (vi. § 11). He comments on an error of his predecessor, Marinus, who, he says, places the gulf Sachalities on the W. of Cape Syagros, while all who had navigated those seas distinctly asserted that the country Sachalitis and its synonymous bay were to the E. of Syagros (i. 17. §§ 2, 3), Marcianus (p. 23, quaestionem Graecam, quae manet), agrees with Pliney. The author of the Peripili ascribed to Arrian seems, however, to confirm the testimony of Marinus, by placing the Sinus Sachalitis next to Cape Empeorium, between that and Syagros Promontorium, and naming the bay to the E. of Syagros, Omnana, which he reckons as 600 stadia in width; but as he means still further to the SE. of Omnana Portus, as a magazine for the spicery of Sachalitis, which he there more fully describes, it is possible that he may have included all the country as far E. as Moscha under this name. It is at least clear that the Omnana Sinus could be no part of the present
SYBARIS.

SYBARIS.

district of Oenoe. The maps give no bay to the W. of Syagros, where the Trebus Portus was situated. The Peripolys says that the cape extended eastward, places a castle with a harbour and magazine at Syagros, and describes, in connection with it, the Dianis (Stena), by which Pliny places at a distance of 2424 stadia. There is no difficulty in identifying this promontory Syagros with the modern Ras Fortassakh, which derives its designation from the same of the animal commemorated in its Greek name, which was probably a loose translation of its native appellation. Thus it is that the Dianis was the ancient promontory in the world,—an hyperbolical expression, no doubt, but better suited to this cape than to any other on the coast, since the isolated mountain that forms Ras Fortassakh reaches an elevation of 2500 feet, and is visible at a distance of 60 miles; while those of Ras Samara (al. Sehadra), further to the E., sometimes identified with Syagros on account of the similarity of name, do not exceed 600 feet. The subject, it must be admitted, is not free from difficulty, mainly owing to the fact that Ptolemy places Moscha Portus,—which is usually supposed to be the same as the Moscha Portus of the Peripolys, and is identified with Dentur or Sapahur,—W. of Syagros; in which case, the Trebus of the Troas, Syagros, a change in the name of the town seems allowable. All other solutions of the difficulty is found in the hypothesis adopted above, of two ports called Moscha on the same coast. [Moscha.] (See Müller's Notes to Delos's ed. of the Geogr. Graec. Min. vol. i. pp. 273, 280.) The question has been examined by Dean Vincent, who was the first to fix correctly this important point in the Syagros geography, and his main conclusions are acquiesced in by Mr. Forster, who has corroborated them by fresh evidence from the researches of modern travellers; and it is an interesting fact, that while the Greek geographers appear to have translated the native name of the cape, which it retains to this day, the natives would appear to have adopted a modification of that Greek translation as the name of the town situated, then as now, under the cape, which still bears the name of Syggeste. (Vincent, Peripolys, vol. ii. pp. 331—351; Forster, Arabia, vol. ii. pp. 166—177.) [G. W.]

SYBARIS (Συβάρις: Eub. Σεβάρις, Sybaritis), a celebrated city of Magna Graecia, situated on the W. shore of the Tarentine gulf, a short distance from the promontory of Cratis and Sybaris. (Strab. vi. p. 263; Diod. xii. 9.) The isthmus of these, from which it derived its name, was the stream now called the Coisile, which at the present day falls into the Crati about 3 miles from its mouth, but in ancient times undoubtedly pursued an independent course to the sea. Sybaris was approximately 12 miles from the Greek colonies in this part of Italy, being founded, according to the statement of Scymnus Chius, as early as B.C. 720. (Scymn. Ch. 860; Clinton, P. H. vol. i. p. 174.) It was an Achaean colony, and its Oekist was a citizen of Helice in Achaia; but with the Achaean emigrants were mingled a number of Trojan citizens. The Achaeans, however, eventually ob-tained the preponderance, and drove out the Trojanians. (Strab. l c. ; Arist. Pol. v. 3.) The Sybarites indeed appear to have sought for an origin in heroic times; and Solinus has a story that the first-founder of the city was a son of Ajax. (Suid. s. v. Συβίαρις) But this is evidently mistaken, and the city was, historically speaking, undoubtedly an Achaean colony. It rose rapidly to great prosperity, owing in the first instance to the fertility of the plain in which it was situated. Its citizens are not, contrary to the policy of many of the Greek states, freely admitted settlers of other nations to the rights of citizenship. The independence and freedom of the Sybaris are expressly ascribed in great measure to this case. (Diod. xii. 9.) The statements transmitted to us of the power and opulence of the city, as well as of the luxurious habits of its inhabitants, have indeed a very fabulous aspect, and are without doubt greatly exaggerated, but there is no reason to reject the main fact that Sybaris existed in the sixth century B.C., attained a degree of wealth and power unprecedented among Greek cities, and which excited the admiration of the rest of the Hellenic world. We are told that the Sybarites ruled over 25 subject cities, and could bring into the field 300,000 of their own citizens (Strab. l c.), a statement obviously incredible. The subject cities (although they were much less in number than the territory in the interior, but we know that Sybaris had extended its dominion across the peninsula to the Tyrrhenian sea, where it had founded the colonies of Poseidonia, Pafra, and Scidrus. The city itself was said to be not less than 50 stadia in circumference, and the horsemen or knights who figured at the religious processions are said to have amounted to 100,000. (Diod. vii. 19.) All this would prove that these wealthy citizens were more than four times as numerous as at Athens. Smin- dyrides, a citizen of Sybaris, who was one of the suitors for the daughters of Cleisthenes of Sicyon, is said by Herodotus to have surpassed all other men in refined luxury. (Herod. vi. 127.) It was asserted, that this passion for luxury was carried with him a train of 1000 slaves, including cooks, fishermen, &c. (Athen. vi. p. 273; Diod. viii. Fr. 19.) It is unnecessary to repeat here the tales that are told by various writers, especially by Athenaeus, concerning the absurd refinements of luxury ascribed to the Sybarites, and which have rendered their very name proverbial. (Athenae. xii. pp. 518—521; Diod. viii. Fr. 19—20; Suid. s. v. Συβίαρις.) They were particularly noted for the splendour of their attire, which was of the finest Mileisan wool, and this gave rise to extensive commercial relations with Miletus, which produced a close friendship between the two cities. (Timaeus, op. Athen. xii. p. 519; Herod. vi. 21.) As an instance of their magnificence, it is said that Alcibiades of Sybaris had dedicated as a votive offering in the temple of the Lacinian Juno a splendid figured robe, which long afterwards fell into the power of Dory- sius of Syracuse, and was sold by him for 150 talents, or more than 24,000 sterlings. (Paus. Arist. h. 96; Athen. xii. p. 541.) Opposite the cities of Sybaris, in considering the wealth and luxury of Sybaris, we are almost wholly without information as to the history of the city until shortly before its fall. Herodotus incidentally refers to the time of Sminyrides (about 580—560. B.C.) as the period when Sybaris was at the height of its power. At a later period it seems to have been agitated by political discontents, with the
circumstances of which we are very imperfectly acquainted. It appears that the government had previously been in the hands of an oligarchy, to which such persons as Smindyrides and Alcimenes naturally belonged; but the democratic party, headed by a demagogue named Telys, succeeded in overthrowing their power, and drove a considerable number of the leading citizens into exile. Telys hereupon seems to have raised himself to the position of despot or tyrant of the city. The exiled citizens took refuge at Crotone; but not content with their victory, Telys and his partisans called upon the Crotoniats to surrender the fugitives. This they refused to do, and the Sybarites hereupon declared war on them, and marched upon Crotone, with an army said to have amounted to 300,000 men. They were met at the river Trasie by the Crotoniats, whose army did not amount to more than a third of their numbers; notwithstanding which they obtained a complete victory, and put the greater part of the Sybarites to the sword, continuing the pursuit to the very gates of the city, and which they easily made themselves masters, and which they determined to destroy so entirely that it should never again be inhabited. For this purpose they turned the course of the river Crathis, so that it inundated the site of the city and buried the ruins under the deposit that it brought down. (Diok. xli. 9, 10; Strab. vi. p. 268; Herod. iv. 44; Athen. iv. 353—360.) This catastrophe occurred in B.C. 510, and seems to have been viewed by many of the Greeks as a divine vengeance upon the Sybarites for their pride and arrogance, caused by their excessive prosperity, more especially for the contempt they had shown for the great festival of the Olympic Games, which they are said to have attempted to supplant by an annual procession of athletes, &c., to their own public games. (Athen. iv. 350—360.)

It is certain that Sybaris was never restored. The surviving inhabitants took refuge at Latii and Scirrhus, on the shores of the Tyrrhenian sea. An attempt was indeed made, 58 years after the destruction of the city, to establish an ancient city, but they were quickly driven out by the Crotoniats, and the fugitives afterwards combined with the Athenian colonists in the foundation of Thurii. [Thurii.] At the present day the site is utterly desolate, and even the exact position of the ancient city cannot be determined. The whole plain watered by the rivers Cocile and Crathis (the ancient Sybaris and Crathis), so renowned in ancient times for its fertility, is now a desolate swampy tract, pestilential from malaria, and frequented only by vast herds of buffaloes, the usual accompaniment in Southern Italy of all such pestiferous regions. The circumstance mentioned by Strabo that the river Crathis had been turned from its course through the city, is confirmed by the accidental mention in Herodotus of the dry channel of the Crathis "(φαρά τον ἔρημον Κραθήν, Herod. v. 44): and this would sufficiently account for the disappearance of all traces of the city. (Swinburne indeed tells us that some "degraded fragments of aqueducts and tombs" were still visible on the course turned by the two rivers, and were pointed out as the ruins of Sybaris, but these, as he justly observes, being built of brick, are probably of Roman times, and have no connection with the ancient city. Keppel Craven, on the other hand, speaks of "a wall sometimes visible in the bed of the Crathis when the waters are very low" as being the only remaining relic of the ancient Sybaris. (Swinburne's Travels, vol. i. pp. 290—292; Craven's Southern Tour, pp. 217, 218.) The ruins marked on Zannoni's large map as Anticus Siluris are probably those of Thurii [Thurii.]) But it is certain that the locality has never yet been thoroughly examined, and it is probable that some little may even yet be thrown upon the site of this celebrated city; especially if the marshy plain in which it is situated should ever be reclaimed and cultivated. There is no doubt that if this were done, it would again be a tract of surpassing fertility: it is cited as such by Varro, who tells us that "in Sybaritano "what was said to produce a hundred-fold. (Varr. R. R. i. 44.) Even at the present day the drier spots produce very rich crops of corn. (Swinburne, L. c.)"

The river Sybaris was said to be so named by the Greek colonists from a fountain of that name at Bura in Achaia (Strab. viii. p. 386); it had the property, according to some authors, of making horses sage and pure, and shining with a bright light that drank of its water. (Plut. Thers. 169; Strab. vi. p. 263.) It is a considerable stream, and has its sources in the Apennines near Murano, flows beneath Castrovillari, and receives several minor tributary streams before it joins the Crathis.

[Ε. Η. Β.]

COIN OF SYBARIS.

SY'BOTA. [Coro. p. 670.]

SYBRITA (Συβρίτα, Scl. p. 18; Συβρίτα, Ptol. iii. 17. § 10; Συβρίτα, Hierocles: Συβρίτα, Polyb. viii. 38; Eub. Συβρίτος, Bickh. Corp. Inscrip. vol. ii. p. 637), a town of Crete, 8 M. P. from Eleutherna (Pent. Tab.), and famous for its numerous and beautiful silver coins, which, though some of them belong to a very early period, are the finest specimens of the Cretan mint; the types are always connected with the worship of Dionysus or Hermes. (Zos. Hist. vol. ii. p. 390.)

SYCAMINA (Συκαμίνα), a city of Palestine, placed by Strabo between Acre (Ἀκρα) and Caesarea Palatæinæ (Σπάρτανος τὸν ὁμόν), the name of which alone remained in his time. There were, he says, many such; of which he specifies this and Bochus (Βοχοῦς) and Crocodileum (Κροκοδιλεία). (Strab. xvi. p. 758.) It was here that Ptolemy La-thyrus, son of Cleopatra, landed his army of 30,000 men whom he had brought from Cyprus to besiege Ptolemais, which would imply that it was not far distant from Acre (Jos. xiii. 3 § 3). The Itinerary of Antoninus makes it xxiv. M. P. from Ptolemais, xx. M. P. from Caesarea; the Jerusalem Itinerary aiv. M. P. from Ptolemais, xvi. M. P. from Caesarea. (Wesseling, p. 494, 584.) The last-named authority places it at Mount Carmel, thereby justifying its identification with the modern Kaïpha or Hāfiya, followed by Reichard, Mannert, and Kiepert, rather than with Atit, suggested by Lapi. Indeed the testimony of Eusebius would seem to be conclusive on this point,
as he speaks of a village of this name (Zeuxopolis χευσοπόλις) on the coast between Ptolemais and Caesarea, near Mount Carmel, called also Heptah ('Hepta' in his day. (Onomast. a. v. 'Heptah') Dr. Wilson, however, tells us that the name Heptah on the coast of Syene probably refers to the site of the ‘Metostai Calazon,’ given in the Jerusalem Itinerary as 13 Roman miles from Ptolemais, while the ‘Nemeia Sicamena’ of the same work was 3 miles farther on. Ruins have been discovered along the shore, about 2 Roman miles to the N. of Heptah; . . . these ruins may have been the remains of the town mentioned in the Bible, vol. ii. p. 241.) Heptah is a small walled town to the S. of the Bay of Acre, at the northern base of the promontory of Mount Carmel, distant about 10 miles from Ptolemais (Acre); a distance far too small to satisfy the statement of the Itinerary of Antoninus, or even that of the Jerusalem Itinerary. But, notwithstanding this, its identity with Sycomis seems to be sufficiently established by the testimony of Eusebius, joined to the historical fact recorded by Josephus, which better suits this than any other place on the coast, being in fact the very place where Ibram Pasha, when engaged in a similar enterprise against Acre, landed some of his troops and concentrated his army, in 1831, preparatory to forming the attack on the town. (Alderson, Notes on the East, p. 38, 33.)

[GEW.]

SYCE (Συκή), a town of Cilicia, which according to the Rennaven Geographer, who calls it Syce (Συκή), was situated between Arinioi and Celenderis. (Athen. iii. 6; Steph. B. v. x. xecass.) Leake (Asia Minor, p. 206) looks for its site near the modern town of S.)

SYCEON, a town of Galatia, situated on the place where the river Systhros flowed into the Sangarius. (Procop. de Aed. v. 4; Vit. Theol. Systhros, 7; Wessell. ad Hieroc. p. 697.)

SYCURUM, a town of Thessaly in the district of Pelasgicia, at the foot of Mt. Ossa, which Leake identifies with Marmarinou. (Liv. xii. 54; Leake, Nor. Gr. p. 460.) This town is thought to have been built on the site of a great town which he found in a wood on the side of rocky hill near Bolseeuscerdo belonging to the ancient Syllium; but from his description they do not appear to exist on a lofty height.

SYBBI MONTES (συββι ποιημαντ, Ptol. vi. 14, § 8), a mountain chain in Scythia, running from the Tapuri mountains in a N.E. direction towards Imana.

[TH. D.]

SYDRA (Συδρός: Ειθ. Συδρός), a coast-town in the west of Cilicia, between Corasosium and Seleuma; Steph. B. a. v. Seleuma, where the common but erroneous reading is Arinioi; Steph. B. a. v.; Ptol. v. 8, § 1; Hieroc. p. 683; Lucan, viii. 350; Flor. iv. 2.) It should, however, be observed that Stephanus B. calls it a town of Isauria, and that Hesiodos assigns it to Pamphylia. Beanfort (Arcasosia, p. 178) observed some ruins on a spot in his that distinguish, which he thinks may mark the site of Sydra; and Mr. Hamilton, in his map of Asia Minor, also marks the ruins of Sydra on the same spot, a little to the south-east of Aigeai, the ancient Corasosium.

[LS.]

SYDERA (Συδρα: Hrsc. b. 30; Strab. ii. p. 133, xvii. p. 797, seq.; Steph. B. v. Seleuma, 10 v. 15, vili. 15, 15; Plin. ii. 75, 76, v. 10, 11, 11, 11, 10; Tert. Aduers. c. Marc, p. 543, where the common but erroneous reading is Arinioi; Steph. B. a. v.; Ptol. v. 8, § 1; Hieroc. p. 683; Lucan, viii. 350; Flor. iv. 2.) It should, however, be observed that Stephanus B. calls it a town of Isauria, and that Hesiodos assigns it to Pamphylia. Beanfort (Arcasosia, p. 178) observed some ruins on a spot in his that distinguishes, which he thinks may mark the site of Sydra; and Mr. Hamilton, in his map of Asia Minor, also marks the ruins of Sydra on the same spot, a little to the south-east of Aigeai, the ancient Corasosium.

[LS.]

SYFNE (Συφέη, Herod. ii. 30; Strab. ii. p. 133, xvii. p. 797, seq.; Steph. B. v. Seleuma, 10 v. 15, vili. 15, 15; Plin. ii. 75, 76, v. 10, 11, 11, 11, 10; Tert. Aduers. c. Marc, p. 543, where the common but erroneous reading is Arinioi; Steph. B. a. v.; Ptol. v. 8, § 1; Hieroc. p. 683; Lucan, viii. 350; Flor. iv. 2.) It should, however, be observed that Stephanus B. calls it a town of Isauria, and that Hesiodos assigns it to Pamphylia. Beanfort (Arcasosia, p. 178) observed some ruins on a spot in his that distinguishes, which he thinks may mark the site of Sydra; and Mr. Hamilton, in his map of Asia Minor, also marks the ruins of Sydra on the same spot, a little to the south-east of Aigeai, the ancient Corasosium.

[LS.]

SYMACTHUS (Συμαχύος, Sinope), one of the most considerable rivers of Sicily, which rises in the chare of Monte Nebrodi, in a great forest now called the Bosco di Caravosa, and flows from there in a southerly direction, skirting the base of Aetna, till it turns to the E. and flows into the sea about 8 miles S. of Catania. In the lower part of its course it formed the boundary between the territory of Lentini and that of Catania. (Thuc. vi. 42.)

SYME (Συμη), called also Lampsas, was the frontier town of Aegyptus to the S. of Syene stood upon a peninsula on the right bank of the Nile, immediately below the Great Falls, which extend to it from Philae. It is supposed to have derived its name from Suan, an Egyptian goddess, the Hilithys of the Greeks, and of which the import is "the opener," and as Syene Upper Aegyptus was in all ages, conceived to open or begin. The quarries of Syene were celebrated for their size, and especially for the marble called Syennite. They furnished the colossal statues, obelisks, and monuments which1280 the ancients probably observed, and the traces of the quarrymen who wrought on these 3000 years ago are still visible in the native rock. They lie on either bank of the Nile, a road, 4 miles in length, was cut beside them from Syene to Philae. Syene was equally important as a military station and as a place of traffic. Under the Ptolemies, the garrisons which were levied from and stationed on all banks passing southward and northward. The latitude of Syene—24° 5' 33"—was an object of great interest to the ancient geographers. They believed that it was seated immediately under the tropic, and that at the day of the summer solstice a vertical staff cast no shadow, and the sun's disc was reflected in a still pool before noon. (Ptol. v. § 1; Hieroc. p. 673; Polyb. xxii. 17; Steph. B. mentions it under the name comb, while in other passages it is called Tla2, 2. Analyzing these observations, it appears that the declination of the sun was 1° 5' at noon. This statement is indeed more correct than the ancients were not acquainted with the true tropic: yet at the winter solstice the length of the shadow, or the path of the sun, might be rendered nearly vertical. The Nile is nearly 3000 feet wide above Syene. From this frontier town to the proximity of Aegyptus, it flows for about 750 miles without bar or cataract. The voyage from Syene to Alexandria usually occupied between 21 and 28 days in favourable weather. (W.B.D.)

SYGAMBRIL [Σιγαμβριλ] SYLINA INSULA. [Σιλεβρα] SYLLIUM (Σιλία), a fortified town of Paphlagonia, situated on a lofty height between Aspendos and Side, and between the rivers Euphrates and Cestrus, at a distance of 40 stadia from the sea. (Strab. xiv. p. 667; Arrian, Anas l. 25; Strab. xiv. 50; Ptol. v. § 1; Hieroc. p. 673; Polyb. xxii. 17; Steph. B. mentions it under the name comb, while in other passages it is called Tla2, 2. Analyzing these observations, it appears that the declination of the sun was 1° 5' at noon. This statement is indeed more correct than the ancients were not acquainted with the true tropic: yet at the winter solstice the length of the shadow, or the path of the sun, might be rendered nearly vertical. The Nile is nearly 3000 feet wide above Syene. From this frontier town to the proximity of Aegyptus, it flows for about 750 miles without bar or cataract. The voyage from Syene to Alexandria usually occupied between 21 and 28 days in favourable weather. (W.B.D.)
SYMBOLON PORTUS.

thus is much the most considerable river on the E.
coast of Sicily, and is in consequence noticed by all
the geographers (Soyl. p. 4. § 13; Strab. vi. p. 272; Phi-
n. iii. 8. a. 14; Ptol. iii. 4. § 9). It is also
repeatedly alluded to by the Roman poets (Virg.
Aen. ix. 584; Ovid, Fast. iv. 472; Sil. Ital. xiv.
238; Paus. iv. 14. § 9. [E. B. J.]

SYMBOLON PORTUS (Συμβολόν
Πόρτος), is a small town near the mouth of the
river, on the S. coast of the Chersonesus Tarictica, be-
tween the town of Chersonesus and the port of Cius.
In ancient times it was the chief station of the pirates
of the Taritine peninsula. (Strab. vi. p. 309; Pln.
iv. 12. a. 26; Anon. Per. Pont. Esc. p. 6.) Now
they are said to be the children of Layaana, who, together
with Chitonana, a son of Poseidon, is said to have
first peopled the island. In the story of the Trojan
war, Syme enjoys a kind of celebrity, for the hero
Nireus is said to have been with three ships to assist Agamemnon.
(Hom. Il. ii. 671; Dietsch. Cret.
iv. 17; Dares Phryg. 31.) The first historical
population of the island is said to have been by
Cretans, but subsequently it fell into the hands of the Carines,
and when, in consequence of frequent droughts,
abandoned it, it was for a long time uninhabited,
until it was finally and permanently occupied by
Argives and Laconians, mixed with Cretans and Rhodians.
(Diod. Sic. v. 33; Pausanias, History of Greece, iii. p. 337; E. S. 72.)

There are still a few but unimportant remains of
the acropolis of Syme, which, however, are constantly
diminished, the stones being used to erect modern
buildings. (Comp. Ross, Reisen auf den Griech. 
Inselen, vol. iii. p. 121, fol.)

SYMPLEGEDES. [Bosporus, p. 434.]

SYNAGA (Συναγα), a small village of Byzantium,
not far from the island of Symina noticed by Zonnes (iii. c. 3).

SYNNADA (Σύνναδα : Εθ. Σύνναδη), a town of
Phyrigia Salutaris, at the extremity of a plain about
60 stadia in length, and covered with olive planta-
tions. It is first noticed during the march of
the consular Manlius against the Gallograeci (Liv. xxxviii.
15. xiv. 34); and Cicero (ad Att. v. 20; comp. ad Fam. xii. 16), mentioned
in the time of Strabo (xiv. 577), but when Pliny wrote (v. 29) it was an im-
portant place, being the conventus juridicus for the
whole of the surrounding country. It was very
celebrated among the Romans for a beautiful kind of marble
furnished by the neighbouring quarries, and which was commonly called Synnadian marble,
though it came properly from a place in the neigh-
bouring Decimia, whence it was more correctly
called Decimilian lapsa. This marble was of a light
colour, intermixed with purple spots and veins.
(Comp. Strab. i. c.; Ptol. ii. x. 26; Stat. Silv. v. 5. 36; 
Comp. Steph. B. s. a. ; Ptol. v. 2. § 84; Martial,
ix. 76; Symmäch. ii. 246.) There still are ap-
pearances of extensive quarries between Kourru-Chan
and Baluidus, which Col. Leake (Asia Minor, p.
36) is inclined to identify with those of Synnada or
decimilis. Remains of the town of Synnada still
exist under the name of Symina, which is advanced through
the north-west of these quarries, where they were
discovered by Texier. Earlier travellers imagined
they had found them at Surminna or Synunenich, or
in the plain of Sondekah. (Comp. Hamilton, Re-
searches, l. p. 465; ii. 177; Journal of the R. 
Geogr. Society, vii. p. 35, viii. p. 144; Eckel,
Doctr. Num. iii. p. 172; Sestini, Notizien, p.
127.)

SYNNAUS (Σύνναος), a town in Phrygia
Pactianus, not far from the sources of the Maeastus,
probably on the site of the modern Simeuvul.
(Par. v. 2. § 22; Socrat. Hist. Eccl. vii. 3; Niepce.
Hist. Eccl. xiv. 11; Concil. Chald. p. 674; Hamilton,
[1. S.]
SYNOIDION (Συνόιδιον, Appian, Illry. 27; Συ-
νόιδιον, Strab. vii. p. 315), a town of Dalmatia,
situated in a deep gorge between two hills, where
Gabinus was defeated, and to which the Dal-
matians retreated in the campaign of n. c. 34.
Octavius, suspecting their intentions, sent skirmish-
ers over the high ground while he advanced through
the valley and burnt Synoidion. [E. B. J.]

SYRACUSAE (Συρακοσαι: Eth. Συρακοσεις),
Steph. B.; but Tzetecides, Diodorus, &c. use the form 
Συρακοσεις, which, as we learn from coins and
inscriptions, was the native form; Syracusanus:
Syracusae, Syracusae), the most powerful and im-
portant of all the Greek cities of Sicily, occupies
the E. coast of the island, about midway between
Catana and Cape Pachybus. Its situation ex-
ercised so important an influence upon its history
and progress, that it will be desirable to describe
this somewhat more fully before proceeding to the
history of the city, reserving, at the same time,
the topographic details for subsequent discussion.

I. SITUATION.

Syracuse was situated on a table-land or tabular hill,
forming the prolongation of a ridge which
branches off from the more elevated table-land of the
interior, and projects quite down to the sea, between
the bay known as the Great Harbour of Syracuse,
and the more extensive bay which stretches on the
N. as far as the peninsula of Thapsius or Magneus.
The broad end of the kind of promontory thus
formed, which abuts upon the sea for a distance of
about 3½ miles, may be considered as the base of
a triangular plateau which extends for above 4 miles
into the interior, having its apex not less than
2 miles from the point now called Achradina, which was
occupied by the ancient fort of Euryalus. This
communicates, as already stated, by a narrow ridge with
the table-land of the interior, but is still a marked
point of separation, and was the highest point of

Digitized by Google
the ancient city, from whence the table-land slopes very gradually to the sea. Though of small elevation, this plateau is bounded on all sides by precipitous banks or cliffs, varying in height, but only seconded in impressiveness by the precipices of Calabria. It may be naturally divided into two portions by a slight valley or depression running across it from N. to S., about a mile from the sea: of these the upper or triangular portion was known as Epispolis, the eastern portion adjoining the sea bore the name of Achradina, which thus forms in some degree a division of the plateau, though it being, in fact, to the same mass with Epispolis.

The S.E. angle of the plateau is separated from the Great Harbour by a small tract of low and level ground, opposite to which lies the island of Otygna, a low islet about a mile in length, extending across the mouth of the Great Harbour, and originally divided only by a narrow strait from the mainland, whilst its southern extremity was separated from the nearest point of the headland of Plemyrium by an interval of about 1200 yards, forming the entrance into the Great Harbour. This last was a spacious bay, of above 5 miles in circumference; thus greatly exceeding the dimensions of what the ancients usually understood by a port, but more in conformity with the requirements of a somewhat oval form, which afforded a secure shelter to shipping in all weather; and is even at the present day one of the finest harbours in Sicily. But between the island of Otygna and the mainland to the N. of it, was a deep bight or inlet, forming what was called the Lesser Port or Portus Lucus, though very inferior to the other; but, still, was equal to the ordinary requirements of ancient commerce.

S. of the Great Harbour again rose the peninsula or promontory of Plemyrium, forming a table-land bounded, like that on the N. of the bay, by precipitous escarpments and cliffs, though of no great elevation. This table-land was divided by another plateau at a somewhat lower level, bounding the southern side of the Great Harbour, and extending from thence towards the interior. On its N.E. angle and opposite to the heights of Epispolis, stood the temple of Jupiter Olympus, or the Olymposium, overlooking the low marshy tract which intervenes between the two table-lands, and through which the river Anapus descends to the sea. The beautiful stream of the Cyane rises in a source about 14 mile to the N. of the Olympieum, and joins its waters with those of the Anapus almost immediately below the temple. From the foot of the hill crowned by the latter extends a broad tract of very low marshy ground, extending along the inner side of the Great Harbour quite to the walls of the city itself. A portion of this marsh, which seems to have formed in ancient times a shallow pool or lagoon, was known by the name of Lysemelis (Ἀμπυρία, Thuc. vii. 53; Thucr. Id. xvi. 84), though its more ancient appellation would seem to have been Syracos (Σωρακος), from whence the city itself was supposed to derive its name (Strabo n. 33; Schurmann, C. 283). It is, however, uncertain whether the names of Syracos and Lysimeleia may not originally have belonged to different portions of these marashes. This marshy tract, which is about a mile in breadth, extends towards the interior for a considerable distance, till it is met by the precipitous escarpments of the great table-land of the interior. The proximity of
to assign any definite place in chronology to the occurrence there alluded to. At a later period we find the government in the hands of an exclusive oligarchy called the Geomori or Gamori, who, from their name, would appear to have been the descendants of the original colonists, around whom there naturally grew up a democracy or plebs, composed of the citizens derived from other sources. At length, about the c. 486, a revolution took place; and the democracy succeeded in expelling the Geomori, who thereupon withdrew to Caesarea. (Herod. vii. 155; Dionys. vi. 63.) But this revolution quickly led to another; Gela, the powerful despots of Gela, having espoused the cause of the exiles. Gela was at this time at least equal, if not superior, to Syracuse in power. Hippocrates, its late despot, had extended his power to the rest of the island, and the eastern part of Sicily, and defeated the Syracusans themselves in a great battle at the river Helorus. He would probably indeed have made himself master of Syracuse upon this occasion had it not been for the intervention of the Corinthians and Corcyreans, who brought about a peace upon equitable terms. (Herod. vii. 155; Plut. Gela, vii. 1.) Thus was afforded Gela a fresh opportunity to Gela, who, putting himself at the head of the exiles, easily effected their restoration, while the people of Syracuse readily admitted Gela himself as their ruler with despotic authority. (Plut. 155.)

This revolution (which occurred in the c. 486) seems to have been a very important event in the history of Syracuse, on account of the large territorial extent of the city, and the political importance of the island. The Syracusans, who had been established there for a long time, used this opportunity to extend their power over the surrounding territory, and the island of Lipari, which they occupied. (Thuc. i. 56.)

It is probable that this revolution was due to the fact that the Syracusans were trying to establish a direct democracy in the city, which would give them more power and control over the island.

The Syracusans continued to flourish throughout the reign of Gelo (c. 485—478 B.C., as well as that of his successor Hieron (c. 478—467 B.C.), who was distinguished by the more despotic character of his government, was in many respects a liberal and enlightened ruler. His patronage of letters and the arts especially rendered Syracuse one of the chief resorts of men of letters, and his court afforded shelter and protection to Archelaus, Findor, and Bucephales. Nor was Syracuse itself deficient in literary distinquition. charms, though not a native of the city, spent all the latter years of his life there, and Sophron, the celebrated writer of satire, was a native of Syracuse, and exhibited all his principal works there. The care bestowed upon the arts is sufficiently attested by the still extant coins of the city, as well as by the accounts transmitted to us of the size to which the city had grown, and there is every probability that the distinction of Syracuse in this respect commenced from the reign of Hieron. The tranquility of that monarch was followed by a brief period of revolution and disturbance; his brother Thrasylus having, after a short but tyrannical and violent reign, been expelled by the Syracusans, who established a popular government, c. 486. This was for a time agitated by fresh tumults, arising out of disputes between the new citizens who had been introduced by Gelo and the older citizens, who claimed the exclusive possession of political power; but after some time these disputes were terminated by a compromise, and the new citizens withdrew to Messana. (Diod. xi. 67, 68, 72, 73, 76.)

The civil dissensions connected with the expulsion of Thrasylus, which on more than one occasion broke out into actual hostilities, show how great was the extent to which the city had already attained. Thrasylus himself, and afterwards the discontented citizens, are mentioned as occupying the island and the land of Acrabia, both of which had been formerly held by the Syracusans, and had their own separate walls (Diod. xi. 68, 73); while the popular party held the rest of the city. It is evident therefore that there were already considerable spaces occupied by buildings outside the walls of these two quarters, which are distinctly mentioned on one occasion as "the suburbs" (v. op. cit. 68, 69). Of these, the most notable ones were Tychae, which lay to the W. of Acrabia, adjoining the N. slope of the table-land, is now first mentioned by name (Tuch.); but there can be no doubt that the plain between the heights of Acrabia and the marines was already occupied with buildings, and formed part of the city, though it apparently was not as yet comprised within the fortifications.

The final establishment of the democracy at Syracuse was followed by a period of about sixty years of free government, during which we are expressly told that the city, in common with the other Greek colonies in Sicily, developed its resources with great rapidity, and probably attained to its maximum of wealth and power. (Diod. xi. 68, 72.) Before the close of this period it had to encounter another serious danger: it had yet experienced, and gave abundant proof of its great resources by coming off victoriously in a contest with Athens, then at the very height of
its power. The circumstances of the great siege of Syracuse by the Athenians must here be related in some detail, on account of their important bearing on all questions connected with the topography of the city, and the interest they confer on its localities. At the same time it will obviously be impossible to do more than give a very brief sketch of that protracted contest which occupied the whole of the subsequent history of the city. Every reader must refer to the narrative of Thucydides, with the copious illustrations of Arnold, Grote, and Col. Leake.

It was not till the spring of B.C. 414 that the siege of Syracuse was regularly commenced. But in the autumn of 413, the Athenians had already made a demonstration against the city, and sailing into the Great Harbour, effected a landing without opposition near the Olympia, where they established their camp on the shore, and erected a temporary fort at a place called Dascon (Thuc. vi. 66; Diod. xii. 6), apparently on the inner height of the harbour, between the mouth of the Anapus and the bay now called the Bay of Maddalas. But though successful in the land attack, Nicias did not attempt to follow up his advantage, and withdrew to winter at Catana. The next spring the Athenians landed to the N. of Syracuse, at a place called Leon, about 6 or 7 stadia from the heights of Epipolae, while they established their naval station at the adjoining peninsula of Thaspus (Magasia). The land troops advanced as far as to occupy, and succeeding themselves there, before the Syracusans could dislodge them. They then proceeded to build a fort at a place called Ladaelam, which is described by Thucydides as situated "on the top of the cliffs of Epipolae, looking towards Magasia" (Thuc. vi. 97), and having occupied this with a garrison, so as to secure their communications with their fleet, they advanced to a place called Syoe (§ 3ως), where they established themselves, and began to construct with great rapidity a line of circumvallation across the plateau of Epipolae.* The construction of such a line was the customary mode of proceeding in Greek sieges, and it was with the especial object of guarding against it that the Syracusans had in the preceding winter extended their fortifications by running a new line of wall so as to enclose the temple of Apollo Temenites (Thuc. vi. 75), which probably extended from thence down to the Great Harbour. Nevertheless the Athenian line of circumvallation was carried on so rapidly as to excite in them the greatest alarm. Its northern extremity was made to rest on the sea at a point called Troglus (probably near the Scala Greca), and it was from thence carried across the table-land of the Epipolae, to the point nearest to the Great Harbour. Alarmed at the rapid progress of this wall, the Syracusans endeavoured to intercept it by constructing a counter or cross wall (θερωπον or ψευδον νείμος), directed apparently from the wall recently erected around the temple of Apollo Temenites towards the southern cliff of Epipolae (§ 58). The whole force of which was, however, opposed by the Athenians by a sudden attack and destroy, whereupon the Syracusans attempted a second counterwork, carried through the marathes and level ground, so as to prevent the Athenians from connecting their works on Epipolae with the Great Harbour. But this work was, like the pressing of the fortifications just mentioned, carried on in such haste and consternation that their fleet had meanwhile entered the Great Harbour, and established itself there, were able to construct a strong double line of wall, extending from the west of Epipolae quite down to the harbour. (Bk. 100—103.) On the table-land above, on the contrary, their works were still incomplete, and especially the part of the line of circumvallation near Syoe was still in a state of construction, when Gylippus landed at Sicily, so that that commander was able to force his passage through the lines at this point, and effect an entry into Syracuse. (Id. vii. 2.) It is remarkable that the hill of Euryalus, though in fact the key of the position on the Epipolae, seems to have been neglected by Nicias, and was still undefended by any fortifications. Gylippus immediately directed his efforts to prevent the completion of the Athenian lines across the table-land, and obtained in the first instance an important advantage by surprising the Athenian fort at Labdalum. He next began to erect another wall, running out from the walls of the city across the plain, so as to cross and intercross the Athenian lines; and notwithstanding repeated efforts on the part of the Athenians, succeeded in carrying this on so far as completely to cut off their line of circumvallation, and render it impossible for them to complete it. (Id. vii. 4—6.) Both parties seem to have looked on the completion of this line as the key of the position of the siege; Nicias found himself unable to capture the outside of the Syracusans, almost despairing of success, and wrote to Athens for strong reinforcements. Meanwhile he sought to strengthen his position on the Great Harbour by encircling and fortifying the headland of Pisenium, which completely commanded its entrance. (Bk. 4.) The Syracusans, however, still occupied the Olympium (or Polichne, as it was sometimes called) with a strong body of troops, and having, under the guidance of Gylippus, attacked the Athenians both by sea and land, though foiled in the former attempt, they took the forts which had been recently erected on the Pisenium. (Bk. 4, 29—24.) This was a most important advantage, as it enabled them to reinforce their forces, to supply their fleet and camp with provisions; and it is evident that it was so regarded by both parties (Bk. 25, 31): the Syracusans also subsequently gained a decisive success in a sea-fight within the Great Harbour, and were preparing to push their advantage further, when the arrival of Despinus from Athens restored a general foot and hauled the lines of circumvallation of the Athenians. momseworthy immediately directed all his efforts to the capture of the Syracusan counterwork on Epipolae; but meanwhile Gylippus had not neglected to strengthen his position there, by constructing there

---

* The account here given of the Athenian operations assumes that "the circle" repeatedly spoken of by the authors, is that of the lines of circumvallation. This is the construction adopted by Gyller, and all earlier editors of Thucydides, as well as by Col. Leake; and appears to be the writer of this article by far the most natural and intelligible interpretation. Mr. Grote, on the contrary, as well as Dr. Arnold in his later edition adopted the suggestion of M. Firmin that "the circle" (§ 8 χωρης) was a particular incursion or fortified camp of a circular form. It is difficult to understand the military object of such a work, as well as to reconcile it with the subsequent details of the siege operations.
redoubts or forts, each of them occupied with a strong garrison, at intervals along the sloping plateau of Epipolae, while a fort had been also erected at the important crossing of the Parnesian, which opened the height of the heights. (Thuc. vii. 43.) So strong indeed was their position that Demosthenes despaired of carrying it by day, and resolved upon a night attack, in which he succeeded in carrying the fort at Euryalus, but was foiled in his attempt upon the other outworks, and repulsed with heavy loss. (Ib. 44.)

The failure of this attack was considered by Demosthenes himself as decisive, and he advised the immediate abandonment of the siege. But the contrary advice of Nicias prevailed; and even when increasing sickness in the Athenian camp had induced him also to consent to a retreat, his superstitious fears, excited by an eclipse of the moon, again caused them to postpone their departure. The consequences were fatal. The Syracusans now became rather the besiegers than the besieged, attacked the Athenian fleet in the Great Harbour, and cut off and destroyed the whole of their right wing under Eury- neodon, in the bay of Deson. Blighted with this success, they sought nothing less than the capture of the city, and the following day attacked and began their assault at the mouth of the Great Harbour, from Ortygia across to Plemmyrium, by mooring vessels across it. The Athenians were now compelled to abandon all their outposts and lines on the heights, and draw together their troops as close to the naval camp as possible; while they made a final effort to break through the enemy's land army. But this attempt proved unsuccessful, and led to a complete defeat of the Athenian fleet. There was now no course but to retreat. The army under Nicias and Demosthenes broke up from its camp, and at first directed their course along the valley of the Anapus, till they came to a narrow pass, commanded by a precipitous ridge called the Acronea Rock ('Acroneon Eirma, Thuc. vii. 78), which had been occupied in force by the Syracusans. Failing in forcing this defile, the Athenians changed their line of retreat, and took the road to Helorus, but after forcing in succession, though not without heavy loss, the passage of the two rivers Casyparis and Eironios, and reaching the banks of the Asinarus, the last sanctuary of the Anapus, they stopped, and laid down their arms. The whole number of prisoners was said to amount to 7000. A trophy was erected by the Syracusans on the bank of the Asinarus, and a festival called the Asinaria instituted to commemorate their victory. (Thuc. vii. 85-87; Diod. xiii. 18, 19.)

The Athenian expedition against Syracuse seemed likely to secure to that city the unquestionable superiority among the Greek colonies in Sicily. But a new and formidable power now appeared—the Carthaginians, who were invited by the Segestans to support them against the Selinuntines, but who, not content with the destruction of Selinus and Himera (s. c. 410), and with that of Akragas (406), pressed on their conquests with a view of making themselves masters of the whole island. Dionysius, then a young man, took advantage of the alarm and excitement caused by this danger to raise himself to despotic power at Syracuse (s. c. 405), and he soon after concluded a peace with the Carthaginians, whose career of victory had been checked by a pestilence. The history of the reign of Dionysius at Syracuse, which continued for a period of 35 years (s. c. 405—377), cannot be here related: it is briefly given in the Biogr. Dict., art. Dionysius, and very fully in Green's History of Greece, vol. ii. and ed. 1824. But its influence and effects upon the city itself must be here noticed. From a very early period he turned his attention to the strengthening and fortification of the city, and constructed great works, partly with a view to the defence of the city against external invasion, partly for the security of his own power. One of his first acts was to convert Ortygia into a strong fortress, by surrounding it with a lofty wall, fortified with numerous towers, especially on the side where it joined the land, where he raised a strongly fortified front, called the Pentapyla; while, for still further security, he constructed an interior fort or citadel within the island, which became the acropolis of Syracuse, and at the same time the residence of Dionysius and his successors in the despotism. Adjoining this he constructed within the lesser port, or Portus Laccoeus, docks for his ships of war on a large scale, so as to be capable of receiving 60 triremes: while they were enclosed with a wall, and accessible only by a narrow entrance. But not content with this, he a few years afterwards erected docks for 3000 ships, at the Great Port, in the recess or bight of it which approaches most nearly to the Portus Laccoeus, and opened a channel of communication between the two. At the same time he adorned the part of the city immediately outside the island with porticoes and public buildings for the convenience of the citizens. (Diod. xiv. 17.) But what was most remarkable in this work was the line of walls with which he fortified the heights of Epipolae. The events of the Athenian siege had sufficiently proved the vital importance of these to the safety of the city; and hence before Dionysius engaged in his great war with Carthage he determined to secure their possession by a line of permanent fortifications. The walls erected for this purpose along the northern edge of the cliffs of Epipolae (extending from near Sta Pomagia to the hill of Euryalus, or Mongibellis) were 50 stadia in length, and are said to have been erected by the labour of the whole body of the citizens in the short space of 30 days. (Diod. xiv. 18.) It is remarkable that we hear nothing of the construction of a similar work along the line of the coast of the western extremity of Sicily; though the table-land is at least as accessible on this side as on the other; and a considerable suburb called Neapolis had already grown up on this side (Diod. xiv. 9), outside of the wall of Achradina, and extending over a considerable part of the slope, which descends from the Temenitza towards the marshy plain of the Anagora. But whatever may have been the cause, it seems certain that Syracuse continued till a later period to be but imperfectly fortified on this side.

The importance of the additional defences erected by Dionysius was sufficiently shown in the course of the war with Carthage which began in s. c. 397. In that year Dionysius, at first succeeded in his arms successfully to the western extremity of Sicily, but fortune soon turned against him, and he was compelled in his turn to shut himself up within the walls of Syracuse, and trust to the strength of his fortifications. The Carthaginian general Himilco entered the Great Port with his fleet, and established his head-quarters at the Olympius, while he not only ranged the country outside the walls, but made himself master of one of the suburbs,
SYRACUSAE.

In which were situated the temples of Ceres and Proserpine, both of which he gave up to plunder. But the anger of the goddesses, brought on by this act of sacrilege, was believed to be the source of all the calamities that soon befell him. A pestilence broke out in the Carthaginian camp, from which they sustained very heavy losses, and Dionysius took advantage of this auspicious state of affairs to make an attack on their camp both by sea and land. The position occupied by the Carthaginians was very much the same as that which had been held by the Athenians: they occupied the headland of Plemnymium, on which they had erected a fort, while they had also fortified the Olympuion, or Polichne, and constructed a third fort close to the edge of the Great Harbour for the protection of their fleet, which lay within the inner bay or harbour of Daeac. But Dionysius, by a sudden attack from the land side, carried both the last forts, and at the same time succeeded in burning a great part of the Carthaginian fleet, so that Himilco was compelled to abandon the enterprise, and by a secret capitulation secured a safe retreat for himself and the native Carthaginians in his army, abandoning his allies and mercenaries to their fate. (Diod. xiv. 63, 63, 70—75.)

The defeat of the Carthaginian armament left Dionysius undisputed master of Syracuse, while that city held as unquestioned a pre-eminence over the other cities of Sicily; and it is probable that the city increased in population from the cessation of war. The impregnable citadel in the island of Ortigia constructed by the elder Dionysius continued to be the bulwark of his power, as well as that of his son and successor. Even when the citizens, in B.c. 357, opened their gates to Dion, who made a triumphal entry into Acræa, and made himself master with little difficulty of the fort on the summit of Epipolae, the island still held out, and Dion was compelled to resort to a blockade, having erected a line or wall of contravallation across from the lesser port to the greater, as so effectually to cut off the garrison from all communication with the interior. (Plut. Dion. 29; Diod. xvi. 12.) It was not till after the blockade had been continued for about a year that Apollodorus, commander of the mercenaries, was compelled by scarcity of provisions to surrender this stronghold, and Dion thus became master of Syracuse, B.c. 356. But that event did not, as had been expected, restore liberty to Syracuse, and the island citadel still remained the stronghold of the despots who successively ruled over the city. When at length Timoleon landed in Sicily (B.c. 344), Ortigia was once more in the possession of Dionysius, while the rest of the city was in the hands of Hierocles, who was supported by a Carthaginian fleet and army, with which he closely blockaded the island fortress. But the arrival of Timoleon quickly changed the face of affairs: Ortigia was voluntarily surrendered to him by Dionysius; and Apollodorus, the leader of the garrison, by a sudden sally made himself master of Acræa also. Soon after Timoleon raised the heights of Epipolae by assault, and thus found himself master of the whole of Syracuse. One of the first measures he took after his success was to demolish the fortress erected by Dionysius within the city, and make the site of it the place of his own residence, and the splendid monument that had been erected to him by his son and successor. On the site were erected the new courts of justice. (Plut. Timol. 23.)

Syracuse had suffered severely from the long period of civil dissensions and almost constant hostilities which had preceded its liberation by Timoleon; and one of the first cares of its deliverer was to recruit its exhausted population, not only by recalling from all quarters the fugitive or exiled citizens, but by summoning from Corinth and other parts of Greece a large body of new colonists. Such was the expansion of the city that in the course of less than ten years after the capture of Syracuse the total number of immigrants (including of course the restored exiles) amounted to not less than 60,000. (Plut. Timol. 23, 23.) The democratic form of government was restored, and the code of laws which had been introduced by Diocles after the Athenian expedition, but had speedily fallen into neglect and obsolescence, was renewed and subjected to a new and severe revision. Syracuse was now revived and restored to its full vigor. (Diod. xiii. 35, xvi. 70.) At the same time a new annual magistracy was established, with the title of Amphipolus of the Olympian Jove, who was thereupon destined, like the Archon at Athens, to give name to the year. The office was apparently a nominal one; but the year continued to be designated by the names of the Amphipolus in the time of Augustus. (Diod. xvi. 70; Cic. Fr. ii. 51, iv. 61.)

There can be no doubt that the period following the restoration of liberty by Timoleon was one of great prosperity for Syracuse, as well as for Sicily in general. Unfortunately it did not last long. Less than ten years after the capture of Syracuse and Timoleon, the city fell under the despotism of Agathocles (B.c. 317), which continued without interruption till B.c. 289. We hear very little of the fortunes of the city itself under his government, but it appears that, like his predecessor Dionysius, Agathocles devoted his attention to the construction of great works and public buildings, so that the city continued to increase in magnificence. We are told, among other things, that he fortified the entrance of the lesser port, or Portus Laccinus, with towers, the remains of one of which are still visible. During the absence of Agathocles in Africa, Syracuse was indeed exposed to the assaults of the Carthaginian general Hannibal, who, as Himilco had formerly done, at Polichne, and from that place delivered salutary attacks upon the city, but without any important result; and having at length made a night attack upon the fort of Euryalus, he was defeated, and himself taken prisoner. (Diod. xx. 29.) After the death of Agathocles, Syracuse for a short time recovered its liberty, but soon fell again under the virtual despotism of Hierocles, who subsequently passed into the hands of successive military adventurers, till in B.c. 275, the government became vested in Hieron, the son of Hierocles, who, at first with the title of general autocrator, and afterwards with that of king, continued to reign over the city till B.c. 216. His wisdom and moderation proved to the disadvantage of the despots who were commanders-in-chief, and to the advantage of the former rulers of Syracuse, and while his subjects flourished under his liberal and enlightened rule, external tranquillity was secured by the readiness with which he adhered to the alliance of Rome, after having once measured his strength against that formidable power. By the treaty concluded between him and Rome, he was restored as king of Syracuse, with the dependent towns of Agrae, Helorus, Netum, Megara, and Locuntii, to which was annexed Taormenium also, as an allaying dependency. (Diod. xxiii. Exc. H. p. 502.) Notwithstanding the small extent of his territory,
Hieron was undoubtedly a powerful prince, and Syracuse seems to have risen, during this long period of peace and tranquillity, to a high state of wealth and prosperity. Its commercial relations with foreign countries, especially with Egypt, were amicably cultivated and extended, while the natural resources of its fertile territory were developed to the utmost by the wise and judicious regulations of Hieron, which, under the name of the Lēx Hieronikē, were subsequently introduced into all parts of Sicily, and continued to be observed by the Romans, in their administration of that province. At the same time the monarch adorned the city with many public works and buildings, including temples, gymnasia, &c., while he displayed his wealth and magnificence by splendid offerings, both at Rome and the most noted sanctuaries of Greece. On the whole it may probably be assumed that the reign of Hieron II. was the period when Syracuse attained its highest degree of splendour and magnificence, as well as of wealth and population.

But this state of things was abruptly changed after the death of Hieron. His grandson, Hieronynus, who succeeded him, deserted the alliance of Rome for that of Carthage, and though the young king was shortly after assassinated, the Carthaginian party continued to maintain its ascendency at Syracuse, and the new king was so secretly hospitable to Epirodes, who were appointed generals with supreme power. They shut the gates against Marcellus, who was in command of the Roman armies in Sicily, and having refused all terms of accommodation, compelled that general to form the siege of Syracuse, B.C. 214. (Liv. xxiv. 21-33.) The enterprise proved far more arduous than the Roman generals anticipated. He established his camp, as the Carthaginians had repeatedly done, on the height of the Olympium; but his principal attacks were directed against the northern walls, in the neighbourhood of Hexapylum (the outlet of the city towards Loontini and Megoara), as well as against the defences of Achradina from the sea. His powerful fleet, manned by Macedonians, the complete command of the sea, and he availed himself of this to bring up his ships with powerful battering-engines under the very walls which bordered the rocks of Achradina; but all his efforts were baffled by the superior skill and science of Archimedes; his engines and ships were destroyed or sunk, and after repeated assaults made by himself and his captains, he was compelled to abandon all active assaults and convert the siege into a blockade. (Liv. xxv. 33, 34.)

During the winter he left the camp and army at the Olympium, under the command of T. Quinctius Crispinus, while he himself took up his winter-quarters and established a fortified camp at Leon, on the N. side of the city. But he was unable to maintain a strict blockade of the harbours, the Carthaginians in frequently throwing in supplies, so that the blockade was prolonged for more than two years; and Marcellus began to entertain little prospect of success, when in the spring of B.C. 212 an accident threw in his way the opportunity of scaling the walls by night, at a place called by Livy the Portus Trogloditum (the Channel of the Greeks); and having thus surprised the walls he made himself master of the gate at Hexapylum, as well as of a great part of the slope of Epipolae. But the strong fort of Euryalus, at the angle of Epipolae, defied his efforts, and the walls of Achradina, which still retained its separate fortifications, enabled the Syracusans to hold possession of that important part of the city, as well as of the island and fortress of Ortigia. The two quarters of Tycha and Neapolis were, however, surrendered to him, and given up to plunder, the citizens having stipulated only for their lives; and shortly after Philomedus, who commanded the garrison of Euryalus, having no hopes of relief, surrendered that important post also into the hands of Marcellus. (Liv. xxv. 23-25.) The Roman general was now in possession of the whole heights of Epipolae, and being secured from attacks in the rear by the possession of Euryalus, he divided his forces into three camps, and endeavoured wholly to blockade Archmadina. At the same time Crispinus still held the old camp on the hill of the Olympium. (Ib. 26.) In this state of things a vigorous effort was made by the Carthaginians to raise the siege: they advanced with a large army under Himilco and Hippocrates, and attacked the camp of Crispinus; while Bomilcar, with a fleet of 150 ships, occupied the Harbours and possessed the shore between the city and the mouth of the Aenapus, at the same time that Epicydes made a vigorous sally from Achradina against the lines of Marcellus. But they were repulsed at all points, and though they continued for some time to maintain their army in the immediate neighbourhood of the city, they were at length compelled to quit it, arising from the marly nature of the low grounds in which they were encamped, to which both Hippocrates and Himilco fell victims, with a great part of their troops. Bomilcar, also, who had quitted the port with the view of obtaining reinforcements from Carthage, never returned, and Epicydes, who had gone out to meet him, abandoned the city to its fate, and withdrew to Ayrgirnousa. The same time Syracuse was now entrusted to the leaders of the mercenary troops, and one of these, a Spaniard named Mercenus, betrayed his post to Marcellus. A body of Roman troops was landed in the night at the extremity of the island, near the fountain of Arethusa, and quickly made themselves masters of the whole coast. While Marcellus, having at the same time made a general assault on Achradina, succeeded in carrying a portion of that quarter also. The remaining parts of the city was now voluntarily surrendered by the inhabitants; and Marcellus, after taking precautions to secure the royal treasures, and the houses of those citizens who had been favourable to Rome, gave up to the Greeks those cities, but kept the town by his soldiers. Archimedes, who had contributed so much to the defence of the city, was accidentally slain in the confusion. The plunder was said to be enormous; and the magnificent statues, pictures, and other works of art which were carried by Marcellus to Rome, to adorn his own triumphs, are said to have given the first impulse to that love for ancient Greek art which afterwards became so prevalent among the Romans. (Liv. xxv. 26—31, 40; Plut. Marc. 14—19; Diod. xxxi. Fr. 18—20.)

From this time Syracuse sank into the ordinary condition of a Roman provincial town; but it continued to be the unquestionable capital of Sicily, and was the customary residence of the Roman praetors who were sent to govern the island, and was one of the two quarters who were charged with its financial administration. Even in the days of Cicero it is spoken of by that orator as "the greatest of Greek cities, and the most beautiful of all cities." (Cic. Verr. iv. 53.) Its public buildings had apparently suffered little, if at all, from its capture by
Marcellus, and were evidently still extant in the days of the emperor, who enumerates most of them by name. All the four quarters of the city, the Island, Amphipolis, Tyros, and Neapolis, were still well inhabited; though the existence of no persons of native Syracusan extraction were permitted to dwell in the island. (ib. v. 32.) But the prosperity of Syracuse seems to have sustained a severe shock in the time of Sextus Pompeius, who, according to Strabo, inflicted upon it injuries, from which it appears never to have recovered. So much for its decayed condition that Angustura endeavored to secure to its corporate body the civilization of the island is a fountain of fresh water, which bears the name of Arethusa, of incredible magnitude, and full of fish: this would be wholly overflowed and covered by the waves were it not separated from the sea by a strongly-built barrier of stone. The second city at Syracuse is that which is called Agrigundis, which contains a forum of very large size, beautiful palaestae, a most highly ornamented Pyraeus, a spacious Curia, and a magnificent temple of Jupiter Olympius; not to speak of the other parts of the city, which are occupied by private buildings, being divided by one broad street through its whole length, and many cross streets. The third city is that called Tarentum, which is a town where the ancient temple of Fortune was built; this is a very spacious gymnasion, as well as many sacred edifices, and it is the quarter of the town which is the most thickly inhabited. The fourth city is that which, because it was the last built, is named Neapolis: at the top of which is a theatre of vast size; besides this there are several temples, one of Ceres, the other of Libera, and a statue of Apollo, which is known by the name of Tentemite, of great beauty and very large size, which Versus would not have hesitated to carry off if he had been able to remove it. (Cic. Verr. iv. 52, 53.)

Cicero here distinctly describes the four quarters of Syracuse, which were commonly compared to four seasons; and assigns to each the same account. (Diod. xxi. 19, ed. Diol.) In later times, also, we find it alluded to as "the quadruplum city" ("quadruplices Syracusae," Aemus. Cl. Utr. 11.) Others, however, enumerated five quarters, as Strabo tells us that it was formerly composed of five cities (εὔπροσωπα τα τέσσαρα, Str. xvi. 14), but the whole town is the site of the expanse on the opposite side of the strait, as well as the broad table-land of Agrigundis, Epipolae, are now wholly bare and desolate, being in great part uncultivated as well as uninhabited.

III. TOPOGRAPHY.

The topographical description of Syracuse as it existed in the days of its greatness cannot better be introduced than in the words of Cicero, who has described it in unusual detail. "You have often heard (says he) that Syracuse was the largest, the most beautiful of all Greek cities, and the most beautiful of all cities. And it is so indeed. For it is both strong by its natural situation and striking to behold, from whatever side it is approached, whether by land or sea. It has two ports, as it were, enclosed within the buildings of the city itself, so as to combine with it from every point of view, which have different and separate entrances, but are united and combined together at the opposite extremity. The junction of the expanse from the mainland to the part of the town which is called the Island, but this is re- united to the continent by a bridge across the nar-
for the purpose of facilitating the communication with "the outer city," as that on the mainland was then called. At a later period it was again severed from the land, probably by the elder Dionysius, when he constructed his great docks in the two ports. It was, however, not always connected with the mainland by a bridge, or series of bridges, as it is at the present day. The citadel or castle, constructed by Dionysius, stood within the island, but immediately fronting the mainland, and closely adjoining the docks or navalica in the Lesser Port. Its front towards the mainland, which appears to have been strongly fortified, was known as the Pentaptych (Πένταπτυχον, Plut. Dion. 363); and this seems to have looked directly upon the Agora or Forum, which we know to have been situated on the mainland. It is therefore clear that the citadel must have occupied nearly the same position with the modern fortifications which form the defence of Syracuse on the land side. These were constructed in the reign of V. V., when the city was in the hands of the allies, by which Ortygia had been reunited to the mainland. This approach, as well as a Roman aqueduct designed to supply this quarter of the city with water, constructed, as it appeared from an inscription, by the emperor Claudius. (Fasell. Sic. iv. p. 169.)

Ortygia was considered from an early time as connected with the island by a bridge. (Pompeius Langobardus, Dion. xvi. 86,) built, or at least finished, by Agathocles, but the purpose and nature of which are uncertain; the public granaries, a building of so massive and lofty a construction as to serve the purposes of a fortress (Liv. xxiv. 21); and the palace of king Hiero. The latter was afterwards called the palace of the Roman praetors (Cic. Verro. v. 52.).

The site of this is uncertain: the palace of Dionysius, which had been situated in the citadel constructed by him, was destroyed together with that fortress by Timoleon, and a building for the courts of justice erected on the site. Hence it is probable that Hieron, who was always desirous to secure popularity, would avoid establishing himself again upon the same site. No traces now remain of the ancient walls or works on this side of the island, which have been wholly covered and concealed by the modern fortifications. The remains of a tower are, however, visible on a shoal or rock near the N. angle of the modern city, which are probably those of one of the towers built by Agathocles, as he is termed by Thucydides, was the most important and extensive of the quarters of Syracuse. It consisted of two portions, comprising the eastern part of the great triangular plateau already described, which extended from the angle of Epipolae to the sea, as well as the lower and more level space which extends from the foot of this table-land to the Great Harbour, and borders on the marshes of Lyasmine. This level plain, which is immediately opposite to the island of Ortygia, is not, like the tract beyond it extending to the Anapus, low and marshy ground, but has a rocky soil, of the same limestone with the table-land above, of which it is as it were a lower step. Hence the city, as soon as it extended itself beyond the limits of the island, spread out over this area; but not content with this, the inhabitants occupied the part of the table-land above it nearest the sea, which, as already mentioned in the general description, is partly separated by a cross valley or depression from the upper part of the plateau, or the heights of Epipolae. Hence this part of the city

3 y 4
was of considerable natural strength, and seems to have been early fortified by a wall. It is not improbable that, in the first instance, the name of Acradina was derived from the heights, and that these, as well as the island, had originally their own separate defences; but as the city spread itself out in the plain below, this must also have been protected by an outer wall on the side towards the marbles. It has indeed been supposed (Grote's Greece, vol. vii. p. 556) that no defence existed on this side till the citizens of Athens, expelling the Achaeans, settled there when the Syracusans, for the first time, surrounded the suburb of Temenitis with a wall; but no mention is found in Thucydides of so important a fact as the construction of this new line of defence down to the Great Harbour, and it seems impossible to believe that this part of the city should so long have been unprotected. It is probable indeed (though not certain) that the Agora was already in this part of the city, as we know it to have been in later times; and it is highly improbable that so important a part of the city would have been placed in an unfortified suburb. But still more necessary would be some such defence for the protection of the narrow headlands and the harbours in the inner bight of the Great Harbour, which had certainly existed before the Athenian invasion. It seems, therefore, far more natural to suppose that, though the separate defences of Ortygia and the heights of Acradina (Diod. xii. 67, 73) were not destroyed, the two were from an early period, probably from the reign of Gelon, united by a common line of defence, which ran down from the heights to some point near that where the island of Ortygia most closely adjoined the mainland. The existence of such a boundary wall from the time of the Athenian War is certain; and there seems little doubt that the name of Acradina, supposing it to have originally belonged to the heights or table-land, soon came to be extended to the lower area also. Thus Diodorus describes Dionysius on his return from Gela as arriving at the gate of Acradina, where the outer gate of the city is certainly meant. (Diod. xii. 113.) It is probable that this gate, which was that leading to Gela, is the same as the one called by Cicero the Portae Agriganeae, immediately outside of which he had discovered the tomb of Sycellus (Tusc. Ins. 29.) But its situation cannot be determined; no distinct traces of the ancient walls remain on this side of Syracuse, and we know not how they may have been modified when the suburb of Neapolis was included in the city. It is probable, however, that the wall (as suggested by Col. Leake) ran from the brow of the hill near the amphitheatre in a direct line to the Great Harbour.

* These still abound in the wild pear-trees (αψηδές), from which the name, as suggested by Leake, was probably derived.

† The argument against this, urged by Cavallari, and derived from the existence of numerous tombs, especially the great necropolis of the catacombs, in this part of the city, which, as he contends, must have been without the walls, would prove too much, as it is certain that these tombs were ultimately included in the city; and if the ordinary custom of the Greeks was deviated from at all, it may have been so at an earlier period. In fact we know that in the days of Agrippa and Tarentum, when the custom was violated, and persons habitually buried within the walls.

Of the buildings noticed by Cicero as still adorning Acradina in his day there are scarcely any vestiges, but the greater part of them were certainly situated in or near the city. The two principal were two ports. The Forum or Agora was apparently directly opposite to the Pentapyla or fortified entrance of the island; it was surrounded with porticoes by the elder Dionysius (Diod. xiv. 7), which are obviously those alluded to by Cicero ("pulcherrimae portice." Ferc. iv. 52). The temple of Jupiter Olympus, which in Cicero's day stood below the Acropolis, was built by Hieron II. (Diod. xvi. 53), and must net be confounded with the more celebrated temple of the same divinity on a hill at some distance from the city. The pynateum, which was most richly adorned, and among whose chief ornaments possessed a celebrated statue of Sappho, which fell a prey to the caprice of the Persians, is situated a little to the west of the Pentapyla, opposite the entrance of the citadel. (Diod. xvi. 74.) But the column is still standing on this site, and the bases of a few others have been discovered, but it is uncertain to what edifice they belonged. The other ruins now visible in this quarter of the city are some remains of Roman baths of little importance. But beneath the surface of the soil there exist extensive catacombs, constituting a complete necropolis, and the tombs, as in most similar cases, are probably the work of successive ages, and can hardly be referred to any particular period. There exist, also, at two points on the slope of the hill of Acradina, extensive quarries hewn in the rock, similar to those found in Neapolis near the theatre, of which we shall presently speak.

Traces of the ancient walls of Acradina, crossing the low cliffs which bound it towards the sea, may be found from distance to distance along the whole line extending from the quarries of the Cappesicas round to the little bay or cove of Ste Panagia at the NW. angle of the plateau. Recent researches have discovered a fine wall or series of walls of Acradina, which appears to have run nearly in a straight line from the cove of Ste Panagia, to the steep and narrow pass or hollow way that leads up from the lower quarter to the heights above, thus taking advantage of the partial depression or valley already noticed. The cove of Ste Panagia may perhaps lie the parts of the temple of LIVY (xxv. 23), though the similar cove of the Scala Gera, about half a mile further W., would seem to have the better claim to that designation. The name is evidently the same with that of Trogilus, mentioned by Thucydides as the point on the N. side of the heights towards which the Athenians directed their lines of circumvallation, but without succeeding in reaching it. (Thuc. i. 39, vi. 2.)

3. Tyche (Týchē), so called, as we are told by Cicero, from its containing an ancient and celebrated temple of Fortune, was situated on the plateau or table-land W. of Acradina, and adjoining the northern face of the cliffs looking towards Magna. Though it became one of the most populous quarters of the city, its existence is found in the period of the Athenian siege; and it may fairly be assumed that there was as yet no considerable
suburb on the site, which must otherwise have materially interfered with the Athenian lines of circumvaluation, while the Syracusans would naturally have attempted to protect it, as they did that of Temenitis. A special outwork, in all probability that Diodorus notices the name, and even speaks of it as a distinct quarter of the city, as early as B.C. 466, during the troubles which led to the expulsion of Thrasybulus (Diod. xi. 68). It is difficult to reconcile this with the entire silence of Thucydides. Tyche probably grew up after the great earthquake of 624. In the southern edge of the plateau had completely secured it from attack. Its position is clearly shown by the statement of Livy, that Marcellus, after he had forced the Hexapyleum and scaled the heights, established his camp between Tyche and Neapolis, with the view of carrying on his assaults upon Achradina. (Livy. xxxv. 25.) It is evident therefore that the two quarters were not distinct consuls, but that a considerable extent of the table-land W. of Achradina was still unoccupied.

4. NEAPOLIS (Νῆσιος), or the New City, was, as its name implied, the last quarter of Syracuse which was inhabited, though, as is often the case, the New Town seems to have eventually grown up in the place of the old, and its principal streets and thoroughfares are parallel to those of the ancient city. It may, however, well be doubted whether it was in fact more recent than Tyche; at least it appears that some portion of Neapolis was already inhabited at the time of the Athenian invasion, when, as already mentioned, we have no trace of the existence of a suburb at Tyche. But there was then already a sanctuary of Apollo, which had grown up around the sanctuary of Apollo Temenites. The statue of Apollo, who was worshipped under this name, stood as we learn from Cicero, within the precincts of the quarter subsequently called Neapolis; it was placed, as we may infer from Thucydides, on the height above the theatre (which he calls Ἱερά Τεμενίτις), forming a part of the table-land, and present was not from the southern escarpment of the plateau. A suburb had apparently grown up around it, which was surrounded by the Syracusans with a wall just before the commencement of the siege, and this outwork bears a conspicuous part in the operations that followed. (Thuc. vi. 75.) But this extension of the fortifications does not appear to have been permanent, for we find in B.C. 115, when the temples of Ceres and the Cosa, which also stood on the heights not far from the statue of Apollo, described as situated in a suburb of Achradina, which was taken and the temples plundered by the Carthaginian general Himilco. (Diod. xiv. 63.) The name of Neapolis (Νῆσιος) is indeed already mentioned some years before (id. xiv.), and it appears probable therefore that the city had already begun to extend itself over this quarter, though it as yet formed only an unfortified suburb. In the time of Cicero, as is evident from his description, as well as from existing remains, Neapolis had spread itself over the whole of the southern slope of the table-land, which here forms a kind of second step or underfall, rising abruptly, among difficult ravines, which still separated from the heights of Temenitis by a second line of cliff or abrupt declivity. The name of Temenitis for the district on the height seems to have been lost, or merged in that of Neapolis, which was gradually applied to the whole of this quarter of the city. But the name was retained by the adjoining gate, which was called the Temenitid Gate

(Plut. Dion. 29, where there seems no doubt that we should read Τεμενερίδας for Μενερίδας), and seems to have been one of the principal entrances to the city.

Of the buildings described by Cicero as existing in Neapolis, the only one still extant is the theatre, which he justly extols for its large size ('theatrurn maximum', Ver. iv. 53). Diodorus also alludes to it as the largest in Sicily (xvi. 83), a remark which is fully borne out by the existing remains. It is not less than 440 feet in diameter, and appears to have been able to contain 15,000 persons. The lower rows of seats were covered with slabs of white marble, and the several cunei are marked by inscriptions in large letters, bearing the name of king Hieron, of two queens, Philistis and Nerelia, both of them historically unknown, and of two deities, the Olympian Zeus and Hercules, with the epithet of B.-A. (Diod. 38, Timol. 34, 38, &c.), as was frequently the case in other cities of Greece. The theatre, as originally constructed, must have been outside the walls of the city, but this was not an unusual arrangement.

Near the theatre have been discovered the remains of another monument, expressly mentioned by Diodorus as constructed by king Hieron in that situation, an altar raised on steps and a platform not less than 640 feet in length by 60 in breadth (Diod. xiv. 83). A little lower down are the remains of an amphitheatre, a structure which undoubtedly belongs to the Roman colony, and was probably constructed soon after its establishment by Augustus, as we find in inscriptions evidently belong to the time of Hieron II., who probably decorated and adorned this theatre, but the edifice itself is certainly referable to a much earlier period, probably as early as the reign of the elder Hieron. It was not used merely for theatrical exhibitions, but for the assemblies of the people, which are repeatedly alluded to as being held in it (Diod. xiv. 39, 44). The dramatic festivals in the city. (Asp. 87. Aelian, V. i. 4.)

Immediately adjoining the theatre are extensive quarries, similar in character to those already mentioned in the cliffs of Achradina. The quarries of Syracuse (Laotimiae or Lantumiae) are indeed frequently mentioned by ancient authors, and especially noticed by Cicero among the most remarkable objects in the city. (Cic. Ver. iii. 77. Aelian, V. i. 44.) There can be no doubt that they were originally designed merely as quarries for the extraction of the soft limestone of which the whole table-land consists, and which makes an excellent building stone; but from the manner in which they were worked, being sunk to a considerable depth, without any outlet on a level, they were found places of such security, that from an early period they were em-
ployed as prisons. Thus, after the Athenian expedition, the whole number of the captives, more than 7000 in number, were confined in these quarters (Thuc. vii. 86, 87; Diod. xiii. 33); and they continued to be used for the same purpose under successive despots and tyrants. In the days of Cicero, they were used as the normal prisons for criminals from all parts of Sicily. (Cic. Verr. v. 87.) The orator in one passage speaks of them as constructed expressly for a prison by the tyrant Dionysius (16. 55), which is a palpable mistake if it refers to the Launtami, in general, though it is not unlikely that the despot may have made some special additions to them with that view. But there is certainly no authority for the popular tradition which has given the name of the Bar of Dionysius to a peculiar excavation of a singular form in the part of the quarters nearest to the theatre. This notion, like many similar ones now become traditional, is derived only from the suggestion of a man of letters of the 16th century.

5. Epipolae (Zeipolos), was the name originally given to the upper part of the table-land which, as already described, slopes gradually from its highest point towards the sea. Its form is that of a tolerably regular triangle, having its vertex at Euryalus, and its base formed by the western wall of Achradina. The name is always used by Thucydides in this sense, as including the whole upper part of the plateau, and was doubtless so employed as long as the space was uninhabited; but as the suburbs of Tyche and Temenitis gradually spread themselves over a considerable part of the height, the name of Epipolae came to be applied in a more restricted sense to that portion only which was nearest to the vertex of the triangle. It is generally assumed that there subsequently arose a considerable town near this musée of the walls, and that this is the fifth quarter of the city alluded to by Strabo and those who spoke of Syracuse as a Pentapolis or aggregate of five cities. But there is no allusion to it as such in the passage of Cicero already quoted, or in the description of the capture of Syracuse by Marcellus; and it seems very doubtful whether there was ever any considerable population at the remote point. No vestiges of any ancient buildings remain within the walls; but the line of these may be distinctly traced along the top of the cliffs which bound the table-land both towards the N. and the S.; in many places two or three courses of the masonry remain; but the most important ruins are those at the angle or vertex of the triangle, where a spot named Mongibellus is still crowned by the ruins of the ancient castle or fort of Euryalus (Eurephylos, Thuc., but the Doric form was Euryphaeos, which was adopted by the Romans). The ruins in question afford one of the best examples extant of an ancient fortress or castle, designed at once to serve as a species of citadel and at once to give access to Epipolae from this quarter. The annexed plan will give a good idea of its general

form and arrangement. The main entrance to the city was by a double gate (A.), flanked on both sides by walls and towers, with a smaller postern or sally-port a little to the right of it. The fortress itself was an irregular quadrangle, projecting about 200 yards beyond the approach to the gate, and fortified by strong towers of solid masonry with a deep ditch cut in the rock in front of it, to which a number of subterranean passages gave access from within. These passages communicating with the fort above by narrow openings and stairs, were evidently made during the days they besieged without exposing the fortress itself to peril. As the whole arrangement is an unique specimen of ancient fortification a view is added of the external, or N. front of the fort, with the subterranean openings.

There can be no doubt that the fortress at Mongibellus is the one anciently known as Euryalus. This clearly appears from the mention of that fort as the time of the siege of Syracuse by Marcellus, as one capable of being held by a separate garrison after the capture of the outer walls of Epipolae, and threatening the army of Marcellus in the rear, if he proceeded to attack Achradina. (Liv. xxv. 25, 26.) Euryalus is also mentioned by Thucydides at the time of the Athenian expedition, when it was still unfortified, as the point which afforded a ready ascent to the heights of Epipolae (Thuc. vi. 93, v. 14). It indeed has always been, in a military point of view, the key of the whole position. Hence, the great care with which it was fortified after the occupation of Epipolae by the Athenians had shown the paramount importance of that position in case of a siege. The existing fortifications may, indeed, be in part the work of Hieron II. (as
SYRACUSAE.

supposed by Col. Leake); but it is certain that a
strong fort was erected there by Dionysius L.* , and
the importance of this was sufficiently shown in the
reign of Agathocles, when the attack of Hamilcar
SYRACUSAE. 1067

was repulsed by means of a strong garrison posted
at Euryalus, who attacked his army in flank, while
advancing to the attack of Epipolae. (Diod. xix. 29.)

Some writers on the topography of Syracuse have
supposed the fortress of *Mongibelli* to be the
ancient Hexapylum, and that Euryalus occupied the
site of Belederae, a knoll or hill on the ridge which
is continued from *Mongibelli* inland, and forms a
communication with the table-land of the interior.
But the hill of Belederae, which is a mile distant
from *Mongibelli*, though somewhat more elevated
than the latter point, is connected with it only by a
narrow ridge, and is altogether too far from the
table-land of Epipolae to have been of any import-
ance in connection with it; while the heights of
*Mongibelli*, as already observed, form the true key
of that position. Moreover, all the passages that
relate to Hexapylum, when attentively considered,
point to its position on the N. front of the heights,
looking towards Megara and Thapsus; and Colonel
Leake has satisfactorily shown that it was a fort
constructed for the defence of the main approach
to Syracuse on this side; a road which then, as
now, ascended the heights at a point a short distance
W. of the Scala Greco, where a depression or break
in the line of cliffs affords a natural approach.

(Leake, Notes on Syracuse, pp. 258, 342, &c.)

The gate at Hexapylum thus led, in the first in-
stance, into the suburb or quarter of Tycha, a
circumstance completely in accordance with, if not
necessarily required by, a passage in Livy (xix. 21),
where the two are mentioned in close con-
nection.

It is more difficult to determine the exact position of
*Labadale*, where the Athenians erected a fort
during the siege of Syracuse. The name is not
subsequently mentioned in history, so that we have
no knowledge of its relation to the fortifications as
they existed in later times; and our only clue to its
position is the description of Thucydidès, that it
stood "on the summit of the cliffs of Epipolae, look-
ing towards Megara." It was probably situated (as
placed by Götter and Mr. Grose) on the point of
those heights which forms a slightly projecting
angle near the farmhouse now called Tarpeia. Its
purpose was, doubtless, to secure the communications
of the Athenians with their fleet which lay at
Thapsus, as well as with the landing-place at
Leon.

It was not till the reign of the elder Dionysius
(as we have already seen) that the heights of
Epipolae were included within the walls or fortifi-
cations of Syracuse. Nor are we to suppose that
even after that time they became people like the
rest of the city. The object of the walls then
erected was merely to secure the heights against
military occupation by an enemy. For that purpose
he in B.C. 402 constructed a line of wall 30 stadia
in length, fortified with numerous towers, and ex-
tending along the whole N. front of the plateau,
from the NW. angle of Achradina to the hill of
Euryalus. (Diod. xiv. 18.) The latter point must
at the same time have been occupied with a strong
fort. The north side of Epipolae was thus securely
guarded; but it is singular that we hear of no
similar defence for the S. side. There is no doubt
that this was ultimately protected by a wall of the
same character, as the remains may be traced all
around the edge of the plateau; but the period of its
construction is uncertain. The portion of the cliffs
extending from Euryalus to Neapolis may have been
thought sufficiently strong by nature; but this was
not the case with the slope towards Neapolis, which
was easily accessible. Yet this appears to have
continued the weakest side of the city, as in B.C.
396 Himilco was able to plunder the temples in the
suburb of Temenius with apparently little difficulty.

At a later period, however, it is certain from exist-
ing remains, that not only was there a line of fortifi-
cations carried along the upper escarpment as far
as Neapolis, but an outer line of walls was carried
round that suburb, which was now included for all
purposes as part of the city. Strabo reckons the
whole circuit of the walls of Syracuse, including the
fortifications of Epipolae, at 180 stadia (Strab. vi.
p. 270); but this statement exceeds the truth, the
actual circuit being about 14 English miles, or 122
stadia. (Leake, p. 379.)

It only remains to notice briefly the different
localities in the immediate neighbourhood of Syra-
cuse, which are noticed by ancient writers in con-
nection with that city. Of these the most important

* This must have been the fort on Epipolae
taken by Dion, which was then evidently held by a
separate garrison. (Plut. Dion. 29.)
SYRACUSE.

is the OLYMPIUM, or Temple of Jupiter Olympus, which stood, as already mentioned, on a height, facing the southern front of Epipolae and Neapolis, from which it was about a mile and a half distant. (Liv. xxiv. 39.) The interval being occupied by the marshy plain on the banks of the Anapus. The sanctuary seems to have early attained great celebrity; even at the time of the Athenian expedition there had already grown up around it a small town, which was known as POLICHE (Πολιχή, Dio. L.), or the Little City. The military importance of the Anapus, and the fact that it was the bridge over the Anapus and the road to Helorus, as well as overlooking the marshes, the Great Harbour, and the lower part of the city, caused the Syracusans to fortify and secure it with a garrison before the arrival of the Athenians. (Thuc. vi. 73.) For the same reason it was occupied by all subsequent invaders who threatened Syracuse; by Himilco in c. 396, by Hamilcar in c. 309, and by Marcellus in c. 214. The remains of the temple are still visible: in the days of Cluvierius, indeed, seven columns were still standing, with a considerable part of the substructure (Cluv. Sicil. p. 179), but now only two remain, and those have lost their capitals. They are of an ancient style, and belong probably to the fifth century B.C., when the temple was the most celebrated of those at Syracuse. This temple was built by the Geonomi as early as the 6th century B.C.

The adjoining promontory of Plemmyrium does not appear to have been ever inhabited, though it presents a table-land of considerable height, nor was it ever permanently fortified. It is evident also from the operations of the Syracusans upon the Carthaginians, as well as that of the Athenians, that the Syracusans had not attempted to occupy, or even to guard with forts, the more distant parts of the Great Harbour, though the docks or arsenal, which were situated in the inner bay or recess of the bay, between Ortygia and the lower part of Andarono, were strongly fortified. With the exception of Tyrrenides, who calls it 6 and 7 stadia from there, Livy, on the contrary, says it was 5 miles from Helorus, but this must certainly be a mistake. About 3 miles further N. is the promontory of THAPAUS (Θάπας, now called MAGNIA), a low and rocky peninsula, united to the mainland by a sandy isthmus, so that it formed a tolerably secure port on its E. side. On this account it was selected, in the first instance, by the Athenians for their naval camp and the station of their fleet, previous to their taking possession of the Great Harbour. (Thuc. vi. 97.)

It had been one of the first points on the Sicilian coast occupied by Greek colonists, but these speedily removed to Megara (Thuc. vi. 4); and the site seems to have subsequently always remained unoccupied, at least there was never a town upon it. It was a low promontory, whence Virgil appropriately calls it 'Thapa acera.' (Verg. Aen. iii. 689; Ovid, Fast. iv. 477.) About a mile inland, and directly opposite to the entrance of the isthmus, are the remains of an ancient monument of great importance, which would agree with the statement of Strabo, and of quadrangular form. The portion now remaining is about 24 feet high, but it was formerly surmounted by a column, whence the name by which it is still known of L'AGNOSIA, or "the Needle." This monument is popularly believed to have been erected by Marcellus to commemorate the capture of Syracuse; but this is a mere conjecture, for which there is no foundation. It is probably in reality a sepulchral
SYRACUSAE.

The topography of Syracuse attracted attention from an early period after the revival of letters; and the leading features are so clearly marked by nature that they could not fail to be recognised. But the earlier descriptions by Pausanias, Bonanni, and Mirabella, are of little value. Cluverus, as usual, investigated the subject with learning and diligence; and the ground has been carefully examined by several modern travellers. An excellent survey of it was also made by British engineers in 1808; and the researches and excavations carried on by the duke of Sera di Falco, and by a commission appointed by the Neapolitan government in 1839 have thrown considerable light upon the extent remains of antiquity, as well as upon some points of the topography. These have been discussed in a separate memoir by the architect employed, Saverio Cavallari, and the whole subject has been fully investigated, with constant reference to the ancient authors, in an elaborate and excellent memoir by Col. Leake. The above article is based mainly upon the researches of the last author, and the local details given in the great work of the duke of Sera di Falco, the fourth volume of which is devoted wholly to the antiquities of Syracuse. (Fazelli, Le Antiche Syracusae, 3 vol. fol. Palermo, 1717; Mirabella, Dizionario della Pianta dell'antiche Syracusae, reprinted with the preceding work; Cluver, Sicid. i. 12; D'Orrville, Sicida, pp. 175-202; Smyth's Sicily, pp. 162-176; Swinburne, Travels in the Two Sicilies, vol. ii. pp. 318-346; Hauke, Classical Tour, vol. i. pp. 100-130; Notes on Syracuse, in the Transactions of the Royal Society of Literature, 2nd series, vol. iii. pp. 329-354; Sera di Falco, Antichità della Sicilia, 2nd ed. iv.; Cavallari, Zur Topographia von Syrakus, 2nd ed. Göttingen, 1845.)

SYRACIUSIAE.

SYRIA.

1069

The name Aram (דר), more comprehensive than the limits of Syria Proper, extends, with several qualifying adjuncts, over Mesopotamia and Chaldea. Thus we read (1.) of Aram of the two rivers, or Aram Naharaim (דר תלבש, ל), X. 6, 11; the Mesopotamiae, Gen. xxiv. 10, equivalent to Padan-Aram, or the Plain of Aram (דר כתר, ל, Xxviii. 15; Mesopotamiae, Gen. xxv. 20, xxxii. 2, 5, 6, 7, xxxii. 18), but comprehended also a mountain district called "the mountains of the east" (Năm. xxi. 5, xxiii. 7; Deut. xxiii. 4). (2.) Aram Sobah (דר עוד, LXXX. Nov, 1 Sam. xiv. 47; 2 Sam. viii. 3, x. 6, 8). (3.) Aram of Damascus (דר דמשק, LXXX. דמשק, 2 Sam. v. 5). (4.) Aram Beth-Rehob (דר בחרב, LXXX. דדר בחרב, 2 Sam. x. 6, 9). (5.) Aram Maacah (דר מחא, LXXX. דדר מחא, 1 Chron. xix. 6). Of these five districts thus distinguished, the first has no connection with this article. With regard to the second, fourth, and fifth, it is doubtful whether Sobah and Rehob were in Mesopotamia or in Syria Proper. Gesenius supposes the empire of Sobah to have been situated north-east of Damascus; but places the town, which he identifies with Nisibis, Nisibis, and Antiochia Mydonis, in Mesopotamia (Lxx. xxv. 3; 2 Macc. 1069); but a comparison of 2 Sam. v. 6 with 1 Chron. xix. 6 seems rather to imply that Rehob was in Mesopotamia, Sons and Maachah in Syria Proper; for, in
SYRIA. SYRIA.

the former passage, we have the Aramites of Beth-
Beheb, and the Aramites of Soba, and the king of
Maacah,—in the latter, Aram Naharaim = Mesopotamia, and Aram Maacah and Zobah; from which
we may infer the identity of Beth-Beheb and Mesopotamia, and the distinction between this latter and
Maacah or Zobah: and again, the alliance between
Habakkar, king of Zobah, and the Aramites of Damascus (2 Sam. vii. 6; 1 Chron. xix. 9—10) would imply the contiguity of the two states; while the expedition of the former "to recover his border," or "establish his dominion at the river Ephrates" (ver. 3), during which David attacked him, would
suppose a march from west to east through Syria, rather than in the opposite direction through Mesopotamia.

With regard to the origin of the name Aram,
there are two Patriarchs in the early genealogies from whom it has been derived; one the son of Shem, the progenitor of the Hebrew race, whose other children were, Assur, Arphaxad, and Lud, represents ancient kingdoms or races contiguous to Syria, and the second son of Aram, the Syrian, probably gave his name to the native land of Job, at a very early period of the world's history. (Gen. x. 22, 23.) The other Aram was the grandson of Nahor, the brother of Abraham, by Kemuel, whose brother Buz is by some supposed to have given his name to the country of Job, as it can scarcely admit of a doubt that the third brother, Buz, was the patri
triarch under whom the neighboring tribes took its name, and which is mentioned as the name of its owner (Gen. xxii. 20, 21; Job i. 1, xxii. 2.)

But as we find the name Aram already applied to describe the country of Bethuel and Lebanon, the uncle and cousin of the later Aram, it is obvious that the country must have derived its name from the earlier, not from the later patriarch. (Gen. xxv. 20, xxviii. 6, 7.)

The classical name Syria is commonly supposed to be an abbreviation or modification of Assyria, and to date from the period of the Assyrian subjugation of the ancient Aram; and this account of its origin is confirmed by the fact that the name Syria does not occur in Homer or Hesiod, who speak of the inhabitants of the country under the name of Arimia, (εἰς Ἀρμοσὶ, Hes. II. B. 783. Her. Theog. v. 304), in connection with the myth of Typhon, recorded by Strabo in describing the Orientes (Οριέντες); and this writer informs us that the Syrians were called Aramaei or Arimia (I. p. 42, xiii. p. 637, xvi. pp. 784, 785), which name was, however, extended too far to the west or north by other writers, so as to comprehend Cilicia, and the Saxae of Scythia. (See Bochart, Geog. Sac. Lib. ii. cap. 6.) Herodotus, the earliest writer who distinctly names the Syrians, declares the people to be identical with the Assyrians, where he is obviously speaking of the latter, making the
former to be the Greek, the latter the barbarian name (vii. 63); and this name he extends as far south as the confines of Egypt—placing Sidon, Asy
nus, Cedytis, and, in short, the Phoenicians in gen
eral, in Syria (ii. p. 12, 158, 159), calling the Jews the Syrians in Palestine (ii. 104); and as far west as Asia Minor, for the Cappadians, he says, are called Syrians by the Greeks (I. 72), and speaks of the Syrians about the Thermodon and Parthenius, rivers of Bithynia (ii. 104). Consistently with this early notice, Strabo, at a much later period, states that the name of Syria formerly extended from Babylon to far south as the Gulf of Issus, and thence as far as the Euxine (viii. p. 737); and in this wider sense

the name is used by other classical writers, and this includes a tract of country on the west which we are not comprehended within the widest range of its ancient Aram.

II. Natural boundaries and divisions. The limits of Syria proper, which is now to be considered, are clearly defined by the Mediterranean on the west, the Euphrates on the north, the Euphrates and Taurus on the north, and the great Deser of Arabia on the south. On the west, the long and narrow strip of coast, commencing at la

Digitized by Google
appears near Ayas, and again in larger masses at some little distance from the NE side of the chain. Southward of Belias the chain becomes remarkable for its serrated sides and numerous summits, of which the Akhna Tash shows about fifteen between that place and the valley of the Orontes." The sharp ridge of Jebel Rho'ma terminates in the rugged and serrated peaks of Cape Khanair, which overhangs the sea, and separates the Gulf of Iskenderun from the Bay of Euphrates. This mountain is one of the favorite haunts of Fieria of classic writers, a limestone olistostrome from Mount Rho'ma, and itself imperfectly connected with the other classical mount, Casius, by the lower range of Jebel Simân. A little to the south of the embouchure of the Oronites, Mount Casius reaches an elevation of 5699 feet, composed of supra-cretaceous limestone, on the skirts of which, among the birch and larch woods, are still to be seen the ruins of the temple, said to have been consecrated by Cronus or Ham (Ammianus Marcell., xxii. 14), while the upper part of its cone is entirely a naked rock, justifying its native modern name Jebel-el-Abru (the bald mountain). From this point it descends in a serrated form to the sea, a much lower elevation, and receding further from the coast, throws out its roots both east and west, towards the Oronites on the one side and the Mediterranean on the other. This range has the general name of Jebel Anizarieh from the tribe that inhabits it, but is distinguished in its various parts and branches by local names, chiefly derived from the towns and villages in which distinct sides or bases. The southern termination of this range must be the intervening plains which Pliny places between Libanus and Barquias ("interiacentes campi"), on the north of the former. (Plin. v. 20.) These plains Shaw finds in the Jannus (fruitful), as the Arabs call a comparatively level tract, which "commences a little south of Doplupara, and ends at Sumrah, extending itself all the way from the sea to the eastward, sometimes five, sometimes six or seven leagues, till it is terminated by a long chain of mountains. These seem to be the Mons Barquias of Pliny." Sumrah he identifies with Sinyra,—which Pliny places in Coeleisya at the northern extremity of Mount Libanus,—but remarks that, as Sumrah lies in the valley of the Jannus river, and has been a grain market since ancient times, this circumstance will better fall in with Ares, where Mount Libanus is remarkably broken off and discontinued. (Shaw, Travels in Syria, pp. 268, 269, 410 ed.) We here reach the confines of Phœnicia, to which a separate article has been devoted, as also to Mount Lebanon, which continues the coastline to the southern extremity of Syria.

2. Coeleisya, and the valley of the Oronites.—Although the name of Coeleisya (Hollow Syria) is sometimes extended so as to include even the coast of the Mediterranean—as in the passage above cited from Pliny—from Seleucia to Egypt and Arabia (Strabo, vii. 15), and especially the prolongation of the mountain chain along the front of the mountain to the Dead Sea (see Rollin, Palaestina, p. 103, 458, 607, 774), yet, according to Strabo, the name properly describes the valley between Libanus and Antilibanus (vi. 2, § 21), now known among the natives as El-Bâda'a (the deep plain). "Under this name is embraced the valley between Lebanon and Anti-Lebanon, from Zahleh southward; including the villages on the declivities of both mountains, or rather at their foot: for the eastern declivity of Lebanon is so steep as to have very few villages much above its base; and the western side of Anti-Lebanon is not more inhabited. Between Zahleh and its suburb, Mâllâhâk, a stream called Ab Sidrâm descends from Lebanon and runs into the plain to join the Littâm. The latter river divides the Bâda'a from north to south; and at its southern end passes out through a narrow gorge, between precipices in some places of great height, and finally enters the sea north of Bâhur, where it is called Yârûzût. To the south of this branch of the Bâda'a is the Meri Agín (meadow of the springs), between Bâdîl Beirût and Wâdy-et-Teïm, on the left of the Littâm. Here Lebanon and Anti-Lebanon come together, but in such a manner that this district may be said to separate rather than to unite them. It consists of a beautiful fertile plain, surrounded by hills, in some parts high, but almost everywhere arable, until you begin to descend towards the Littâm. The mountains farther south are much more properly a continuation of Lebanon than of Anti-Lebanon." (Dr. Eli Smith, in Biblical Researches, vol. iii. Appendix B. pp. 136, 140.)

This then is the proper termination to the south of Coeleisya. The Yârûzût and Yârûzût Bâda'a, and the Ab Sidrâm, and Wâdy-et-Teïm, which is traversed by the several tributaries of the Jordan, and extends as far south as the Bahr-el-Huleh. [Samachonitze Lacuci; Fakir Beket, pp. 521, 522.]

To return now to the watershed. Baalbek gives its name to the remainder of the Bâda'a, from the village of Zahleh northward (Smith, at sup. p. 144), and together with the villages in which direction it then bends to the east. The most easterly sources of the Orontes are found, not far from Baalbek, which lies in the plain nearer to the river of Anti-Præsia than to Lebanon. [Orontes; Heliopolis.] The copious fountain of Labwah is about 10 miles north-east of Baalbek; and this village gives its name to the stream which runs for 19 miles through a rocky desert, until it reaches the basin of a much larger stream at the village of Er-Ras or Ain Zerka, where is the proper source of the Orontes, now Er-Asi. The body of water now "becomes at least three thousand feet greater than before, and continues in its rugged chasm generally in a north-easterly course for a considerable distance, until it passes near Zehleh," then runs more to the west, the valley of the Jannus river, and has been fed on its way by numerous streams from the slopes of Lebanon and Anti-Lebanon, draining the slopes of Jebel Anerieh, and forming as it approaches Homs the Bahr-el-Kades, which is 6 miles long by about 2 wide. (Cheyne, at sup. p. 394; Robinson, Journal of the R. G. S. vol. xxiv. p. 32.) Emerging from the lake, it waters the gardens of Homs about a mile and a half to the west of the town, then running north to Er-Rastan, where is a bridge of ten arches, it is turned from its direct course by Jebel Arâdâm on its left bank, round the roots of which it sweeps almost in a semicircle, and enters Hamah, where it is crossed by a bridge of thirteen arches. It now continues its course in a more direct line, as has been stated, towards Kalliat-es-Sujar (Larissa), then due west for 8 miles, when it turns due north, and so continues to the Jîr Hâdîd mentioned below. About 20 miles below Larissa it passes Kalliat-em-Medaïfa (Apsamia) on its right bank, distant about 2 miles; a little to the north of which it receives an affluent from the same lake. Er-Têraz is a remarkable abundance of black-fish and carp (Burckhardt, Syria, p. 143; Cheyne, p. 395), then, running through Wâdy-el-Ghab, enters the Birkel-et-Hovesh, 8 miles
north of Apameia, where its impetuousity is curbed and its waters dissipated in the morasses, so that it flows off in a diminished stream to Jier Shkher, to be again replenished in its course through the plain of 'Unak by other affluents, until it reaches its northermmost point at Jier Hadik (the Iron Bridges), a little below which it winds round to the west, and about half a mile above the town receives from Bisk-al-Abiad (the White Sea) the Naher-al-Kowshah, a navigable river, containing a greater volume of water than El-Agy itself. It now flows to the north of Antioch and the infamous groves of Daphne, through an exceedingly picturesque valley, in a south-west course to the sea, which it enters a little to the south of Seleucia, after a circuitous course of about 200 miles, between 35° and 36° 15' of northern latitude, 36° and 37° of east longitude.

3. Antilibanus and the eastern range.—The mountain chain which confines Cœle-syria on the east is properly designated Antilibanus, but it is further extended towards the north and south by offsets, which confine the valley of the Orontes and the valley of the Litani respectively. Antilibanus itself, now called Jebel-esh-Shuribah (Eastern Mountains), which is vastly inferior to Libanni both in majesty and fertility, has been already described, as has also its southern prolongation in Mount Hermon, now Jebel-es-Sheikh, sometimes Jebel-es-Talq (the Snow Mountains). [Antilibanus.] The northern chain of the Orontes valley, has not been sufficiently surveyed to admit of an accurate description, but there is nothing striking in the height or general aspect of the range, which throws out branches into the great desert, of which it forms the western boundary.

4. The eastern desert.—Although for the purpose of the geographic distribution, the whole eastern part of the mountain chains above described may be regarded as one region, and the insufficient materials for a minute and accurate survey make it convenient so to regard it, yet it is far from being an uniform flat, presenting throughout the same features of desolation. On the contrary, so far as it has yet been explored, particularly to the south of the parallel of Damascus, the desolation is diversified by successions of hills and valleys, which often present large fertile tracts of arable land, cultivated in many parts by a hardy and industrious race of inhabitants. By far the richest of these is the plain of Damascus (El-Ghastah), at the foot of the eastern declivity of Antilibanus, the most excellent of the four earthly paradises of the Arabian geographers. (Dr. Eil Smith, in Bib. Res. vol. iii. Appendix B, p. 147.) It owes its beauty, not less than its fertility, to the abundance of water conveyed to it in the united streams of the Barada and the Phisak, which, issuing together from the eastern roots of Antilibanus, and distributed into numerous rivulets, permeate the city and its thousands of gardens, and finally themselves in the Sea of Galilee, Bashi-al-Merj, which the exploration of a recent traveller has found to consist of two lakes instead of one, as has hitherto represented in all modern maps. (Porter, Five Years in Damascus, 1855, vol. i. pp. 377—383, and map.) Indeed, so much fresh light has been thrown on the south-west of Syria by Mr. Porter's careful surveys, that the whole country will have to be greatly modified in all future maps, as we are now, for the first time, in a position to define with some degree of accuracy the limits of several districts mentioned both by sacred and classical writers, whose relative position even has hitherto been any matter of doubtful conjecture. The statements of Burchardt, who has hitherto been the sole authority, require considerable correction.

The Barada, the ancient Abana, from its rise in Antilibanus, near the plain of Zobdam to its termination in the South and East Lakes, is computed to be about 150 miles in length, and its course is from north-east to south-west, equal to 311 square miles, inhabited by a population of 150,000 souls, or an average of 483 to every square mile, including Damascus and its suburbs. "The prevailing rock of the mountains through which it flows is limestone. In the higher regions it is hard and compact, but near Damascus soft and yielding, with large holes left by the intermitten floods; all shells and corals in great variety are found along the central chain of Antilibanus, through which the river first cuts. In the white hills near Damascus are large quantities of amoniments. At Sitk Way Barada (near its source) is a vast bed of argil remains, not less than a mile in length, and in some places exceeding 100 feet in thickness. Tracts of trees, bushes, herbs, that is to say, every kind of vegetable life, are delicate traces of the leaves may be seen scattered about in vast masses. There are in several places among the mountains traces of volcanic scoriae. On a lofty summit, two hours' north-east of Sitk, a what appears to be an extinct crater. The mountain has been rent, the limestone strata thrown out, and new layers of earth thrown up, the face of the plain of Damascus has a loamy soil interspersed with fine sand. The substratum is completely covered with about 2 feet of sand. The south-easterly portion of the plain is entirely volcanic." (Porter, Journal of Sacred Literature, vol. iv. p. 262.) The plain of Damascus is bounded towards the south by the range of the Jebel-al-es-Aesse (the Black Mountains), the southern base of which is washed by a stream, which has lately been supposed by some travellers to represent the ancient Pharsar. It is now called Naher-al-Aesse, which, rising in the roots of Hermon, runs a course about north-east to a small lake named Bsharet-es-Safqay, only about 4 miles south of which lies the town of Damascus. It runs partly through a limestone and partly through a volcanic formation, which continues here far to the south. (Porter, in Journal of Soc. Lit. vol. v. pp. 45—57, Travels, vol. i. pp. 297—322.) On the south side of the river, opposite to Jebel-al-Aesse, is another low mountain range called Jebel Massa, and a higher elevation connected with this range commands a view of those ancient divisions of Southern Syria, which have hitherto been only conjecturally placed in modern maps. Their boundaries have notwithstanding been indelibly traced by the hand of nature, and the limits so clearly defined that they actually exist, mostly under their ancient names, as an evidence of the originality of classical and sacred geography. But these will be more conveniently considered in connection with Trachonitis, round which they are grouped (Tschermits), particularly as this part of the country may be regarded as debatable ground between Syria, Arabia, and Palestine.

Turning now to the north of Damascus and the east of the country, the country between this city and Aleppo offers nothing worthy of particular notice; indeed its geography is still a blank in the map of Syria, except its western side, which is traversed by the Hey road, the most northern part
SYRIA.

preserve the tradition of the fortifications mentioned in the narrative. The is mentioned, however, and the Merkes-su, appears to have been diverted from its ancient channel, and runs to the sea in two small streams, one to the north of the northern wall, the other to the south of the southern. The site of Myriandrus has not yet been positively determined, but it must have been situated about half-way between Antioch and Antiochus (Alexandria Rhoeus), as Strabo also intimates (see below). From this point the army must have crossed the Ammanus by the Belkis pass, and have marched through the plain of 'Umak, north of the lake of Antioch, where three fordable rivers, the Lobatae (Kara-su), the Oenoparas (Aenoda), and the Arceuthus (Afriu), must have been crossed on their march, which, however, are unnoticed by the historian. The river Chalus, with its sacred fish, is identified with the Chalitis or Kosek, the river of Aleppo, the principal tributary to which in the mountains is still called Balkiti, or Fish-river. The veneration of fish by the Syrians is mentioned also by Diodorus, Lucian, and other ancient writers (Ainsworth, Travels in the Track of the Tigris, p. 57). It is a head source of the river Euphrates, with the palaces and parks of Belus, 30 parasangs, or 90 geographical miles, from Chalus, is marked by an ancient site called to the present day Belis, peculiarly positioned with regard to the Euphrates, and at a point where that river would first appear on coming across Northern Syria in a direct line trending a southward, and corresponding at the same time with the distances given by Xenophon." (Ainsworth, L. c. p. 66.) The ruins of a Roman castle, built upon a mound of ruins of greater antiquity, doubtless preserve the site of the satrap's palace; while the rich and productive alluvial soil of the plain around, covered with grasses, flowering plants, jungle, and shrubs, and abounding in game, such as wild boar, francolin, quails, landralls, &c., represents "the very large and beautiful paradise:" the river Daradax, however, is reduced to a canal cut from the Euphrates, about a mile distant, which separated the large park from the mainland; and Mr. Ainsworth thinks that the fact of the foundation of that city with its 30 parasangs, "tends to show that the origin of a canal is meant, rather than the source of a river" (p. 67, n. 1). Thapsacus is described in a separate article. [THAPSACUS.]

Far more full, but still unsatisfactory, is the description of Syria given by Strabo, a comparison of which with the later notices of Ptolomy and Ptolemy, illustrated by earlier histories and subsequent itineraries, will furnish as complete a view of the classical geography of the country as the existing materials allow. The notices of Phoenicia, necessarily intermingled with those of Syria, are here omitted as having been considered in a separate article [PHRIXONITICA]. On the north Syria was separated from Cilicia by the Amaseus, to the south the gulf of Iasus to the bridge of the Euphrates in Commagene was a distance of 1400 stadia. On the east of the Euphrates it was bounded by the Scenicite Arabs, on the south by Arabia Felix and Egypt, on the west by the Egyptian sea as far as Iasus (xvii. p. 249). He divides it into the following districts, commenced with the name of the region, the Seleucia of Syria; Coele Syria; Phoenice on the coast; Julia inland. Commagene was a small territory, having Samosata for its capital, surrounded by a rich country. Seleucia, the fortress of Mesopo-

"of which has been described by Burckhardt, and its southern by the less enterprising and more accurate Porter, in more recent times. (Burckhardt, Syria, p. 121, &c.; Porter, Damascas, vol. ii. p. 350, &c.) The northern part of Syria is now comprehended in the pasture of Aleppo. It is bounded on the east by the Euphrates, and on the north and west by the mountains. In 1831, Mr. Porter's book, the "Palaestina," of which throws off other diverging branches to the south, until they ultimately flank the valley of the Oronetes on the east, so continuing the connection between Antilibanus and its parent stock. Aleppo itself is situated in a rich and extensive plain, separated on the east by undulating hills from the almost unoccupied country, which contains the skey-track, extending from thence to the Euphrates. The sandy level of this Syrian desert is, however, diversified by occasional ranges of hills, and the plateaux are of various elevation, rising a little west of the meridian of Aleppo to a height of 1500 feet above the Mediterranean, and then receding suddenly to the east and much more gradually to the west. It is on one side, from Damascus to the Euphrates, east of Damascus, that Palmyra is situated, the only noticeable point in all the dreary waste, which has been described in an article of its own [PALMYRA]. The tract between Damascus and Palmyra has been frequently explored by modern travellers, as well as the ruins themselves; but there is no better account of the town than that given by Mr. Porter, already so frequently referred to (vol. i. pp. 149—254; compare Irby and Mangles, pp. 257—276).

III. Ancient geographical divisions.—The earliest classical notice of Syria, which could be expected to enter into any detail, is that of Xenophon in his Anabasis. Unhappily, however, this writer's account of the march of Cyrus through the north of Syria is very brief. The following notes are all that he offers for the illustration of its ancient geography. Issus he mentions as the last city of Cilicia, towards Syria. One day's march of 5 parasangs brought them to Mopsuestia (Mopsuestes), a mercantile city of the Phoenicians, on the sea. Four days' march, or 20 parasangs, to the river Chalus (Xeades), abounding in a fish held sacred by the Syrians. Six days, or 50 parasangs, to the fountains of the Daradax (al. Darades, Adapirs), where were palaces and parks of Belus, governor of Syria. Three days, or 30 parasangs, to Thapsacus, the situation of the Euphrates (Ainab. l. 4. §§ 4—18). It is to be remarked that the 9 days' march of 50 parasangs beyond this is said by Xenophon to have led through Syria, where he uses that term of the Aram Naharin, of the Scriptures, equivalent to Mesopotamia. Of the places named by the historian in Syria Pro-Phos, I have not been able to ascertain the position of the Cilician and Syrian gates is marked by the narrow passage left between the base of the Ammanus and the sea, where the ruins of two walls, separated by an interval of about 600 yards, still
SYRIA.

tamia, was situated at the bridge of the Euphrates in this district, and was assigned to Commagene by Pompey. Seleucia, otherwise called Tetrapolis, the best of the before-named districts, was subdivided according to the number of its four principal cities, Seleucia of Pieria, Antioch, Apamea, and Laodicea. The Orontes flowed from Cœlesyria through this district, having to the east the cities of Bambyce, Berea, and Hecalea, and the river Euphrates. Hecalea was 20 stadia distant from the temple of Athena at Cynarates. This gave its name to Cynarates which extended as far as Antiochis to the south, touched the Amanus on the north, and was contiguous with Commagene on the east. In Cynarates were situated Giadaras, its capital, and near it Hecaleum. Contiguous to Giadaras lay Pagras of Antiochis, on the Amanus, above the plain of Antioch, which was watered by the Arceuthus, the Orontes, the Labota, and the Oenoparos, in which was also the camp of Melander; above these lay the table mount, Trapezis. On the coast were Seleucia and Mount Piera, attached to the Amanus, and Rhadadis, just across the border of the Cynarates. South of Antiochis was Apamea, lying inland; south of Seleucia Mount Casius and Antiochis: but the former was divided from Seleucia by the embouchure of the Orontes and the rock-bewn temple of Nymphium; then Posidion a small town, Hecalea, Laodicea, &c. The mountains east of Laodicea, the Helicis, which lie a few lower, had a steeper incline on the east towards Apamea (named by the Macedonians Pella) and the Chersonese, the rich valley of the Orontes above that city was called. Contiguous with the district of Apamene, on the east, was the country of the phylarch of the Arabs, named Parapotamia, and Chalcidice, extending from the Massyas; while the Scimit Arabes also occupied the south, being less wild and less distinctly Arab in proportion as they were brought nearer by position to the influences of Syrian civilization. (Ibid. pp. 749—753.) Then follows the description of the coast, which belongs to Phoenicia (sup. p. 606), and his extraordinary mis-statement about Libanus and Antilibanus (p. 752) alluded to under those articles. According to this, the southern termination of Libanus was on the coast, a little to the south of Tripolis, at a place called Θεοκράτιον, while Anti-libanus commenced at Sicia. The two ranges then ran parallel towards the east, until they terminated in the mountains of the Arabians, above Damascus, and in the two Trachones [TRACHONITIS]. Between these two ranges lay the great plain of Cœlesyria, divided into several districts, the width at the sea 200 stadia, the length inland about double the width; fertilised by rivers, the largest of which was the Jordan, and having a lake called Gennesaretis [TIHRIAS MARAE]. The Chrysoormias, which rose near Damascus, was almost wholly absorbed in irrigating the plains, and Jordan was navigated by the Arabians. The westernmost of the plains, along the sea-border, was called Macra (Μακρὰ ωβεβος), next to which was Massyas, with a hilly district in which Chalæa was situated as a kind of acropolis of the district, which commenced at Laodicea ad Libanum. This hilly district was held by the Arabians above the others. Above the Massyas was the Royal Plain (Ἀβάδη Βασιλέας) and the country of Damascus, followed by the Trachones, &c. (pp. 755, 756.) This very confused and inaccurate description has been sufficiently corrected in the account above given of the Physical Geo-

graphy of Syria, and need not be further noticed that to observe that it is very strange that, after Syria had been occupied by the Macedonians and the Romans for so many years, and notwithstanding the frequent campaigns of the Roman legions in that country, even its main features were so little known.

Pliny confines Syria to the limits usually assigned it, that is to be distinguished between Syria of the East and Syria of the West, the latter as described by Strabo. He describes Galilæa as that part of Judæa which adjoins Syria (v. 14. a. 15), but coincides with Strabo is giving a description of the coast under the name of Phœnicis (19. a. 17). His notion of the directions of the ranges of Libanus and Antilibanus is more correct than that of Strabo; but his description of the coast-land from thence as a superfluous dissent, far more correct than that of the interior of the country; while his grouping of the various districts is altogether arbitrary and incorrect. Thus, while he correctly describes Mount Libanus as commencing behind Sicia, he makes it extend for 1500 stadia (a monstrous exaggeration, if the reading is correct) to the north of the Jordan. South of Libanus was Apamea, lying inland; south of Seleucia Mount Casius and Antiochis: but the former was divided from Seleucia by the embouchure of the Orontes and the rock-bewn temple of Nymphium; then Posidion a small town, Hecalea, Laodicea, &c. The mountains east of Laodicea, the Helicis, which lie a few lower, had a steeper incline on the east towards Apamea (named by the Macedonians Pella) and the Chersonese, the rich valley of the Orontes above that city was called. Contiguous with the district of Apamene, on the east, was the country of the phylarch of the Arabs, named Parapotamia, and Chalcidice, extending from the Massyas; while the Scimit Arabes also occupied the south, being less wild and less distinctly Arab in proportion as they were brought nearer by position to the influences of Syrian civilization. (Ibid. pp. 749—753.) Then follows the description of the coast, which belongs to Phoenicia (sup. p. 606), and his extraordinary mis-statement about Libanus and Anti-libanus (p. 752) alluded to under those articles. According to this, the southern termination of Libanus was on the coast, a little to the south of Tripolis, at a place called Θεοκράτιον, while Anti-libanus commenced at Sicia. The two ranges then ran parallel towards the east, until they terminated in the mountains of the Arabians, above Damascus, and in the two Trachones [TRACHONITIS]. Between these two ranges lay the great plain of Cœlesyria, divided into several districts, the width at the sea 200 stadia, the length inland about double the width; fertilised by rivers, the largest of which was the Jordan, and having a lake called Gennesaretis [TIHRIAS MARAE]. The Chrysoormias, which rose near Damascus, was almost wholly absorbed in irrigating the plains, and Jordan was navigated by the Arabians. The westernmost of the plains, along the sea-border, was called Macra (Μακρὰ ωβεβος), next to which was Massyas, with a hilly district in which Chalæa was situated as a kind of acropolis of the district, which commenced at Laodicea ad Libanum. This hilly district was held by the Arabians above the others. Above the Massyas was the Royal Plain (Ἀβάδη Βασιλέας) and the country of Damascus, followed by the Trachones, &c. (pp. 755, 756.) SYRIA. 1075

of the monstruous Atargatis, the Docesto of the Greeks); Chalcis ad Bulum, which gave its name to the region of Chalcidene, the most fertile in Syria; then Cyrrhestica, named from Cyrrhus; the Gazatai, Gindareni, Gabeni; two tetrarchies named Graucomata; the Emezeni; Hylatiae; the Ituranees and their kindred Baetarvani; the Mariammati, the tetrarchy of Mamieles, Paradiesi, Pagrera, Finitaris; two other Seleucias, the one at the Euphrates, the other at the Indus. The remains of some of these places in Corelyria: the towns and peoples enumerated in the rest of Syria, omitting those on the Euphrates, which are separately described, are the Aretbussi, Beroeanees, Epiphaneoess; on the east, the Laodiceees by Libanus, the Lencadii, Larissai, besides seventeen tetrarchies with barbarous names not further specified. The towns named in connection with the Euphrates are, Samosota, the head of Cammagne, x. M. P. below the cataracts, where it receives the Maraya; Cingilla the end, and Imreus the commencement, of Cammagne; Ephiphanis, Antiochia ad Euphrates; then Zeguena, ixii. M. P. from Samosota, celebrated for the bridge of the Euphrates which it bears—where, which connected it with Apameia on the left bank of the Euphrates; Thapsacus, then called Amphipolis. On reaching Ura, the river turned to the east, leaving the vast desert of Palmyra on the right. Palmyra was eccexxvii. M. P. from the Parthian city of Seleucia ad Tigrum, ccii. M. P. from the nearest part of the Syrian coast, and xxv. M. P. from Damascus. Beyond the neck of the peninsula of Strelidetana, and the above-named Hierapolis, Beroea, and Chalcis; and beyond ("ultra") Palmyra, Emesa and Eulaius, half as near again ("dimidio proprii") to Petra as was Damascus (ib. cc. 23—26).

It is difficult to discover many of these names in their Latin disguise still further obscured by corrupt readings; but many of them will recur in the more accurate and methodical notices of Ptolemy, in connection with which a comparative Geography of Ancient and Modern Syria may be attempted. The boundaries of Syria are fixed by Ptolemy consistently with earlier writers. On the N., Cilicia, part of Cappadocia, and Mons Ammanus; on the W. the Syrian sea; on the S., Juliaea; on the E., the Arab. But Ptolemy still represents the Euphrates near Thapsacus; then the river itself as far as Cappadocia (Ptol. v. 15. §§ 1—8).

The districts and towns are enumerated under the following subdivisions:—

1. The Coast (§§ 2, 3) after Isauris and the Cilician Gates. 1. Alexandria by the Issus. 2. Myrian- drus. 3. Rhoda. 4. The Rhodian Rock (roderaso). 5. Seleucia of Piers. 6. The mouth of the Orontes. 7. Poseidion. 8. Heraclea. 9. Laodicea. 10. Gabala. 11. Paltos. 12. Balanese. [Then follows Phoe- nicia, from the Klethrus to the Chorosea, S. of Dom. See Phoenicia.] Of the above-mentioned marine towns of Syria, No. 2 alone has occurred in Xenophon, 5 parasang of S. of the Cilician Gates. Below this, there is the river of the Tres Thrand, and Pliny, and the distances are furnished by the author of the Stadiasmus Maria Magni, and the Itinerarium Hierosolymitanum. Alexandria (jakanderis), not mentioned by Strabo or Pliny, was 45 stadia from the Cilician Pyae. Myriandrus was 80 stadia from Alexandria. Its site has not been identified (Ainslie- wort, loc. cit., p. 59), but is conjecturally, though probably, placed by Pococke on the river Dulghahan. (Observations on Syria, p. 179.) Rhosus (now Arda) is 90 stadia from Myriandrus; while the Rhusiacus Scopulis, 80 stadia from Rhosus, is to be identified in the Ras Khamweer, the southern promontory of the Gulf of Iskanderis, a well-known nautical feature on this coast. (ib. p. 180; Chesney, Expedition, i. p. 410.) Between Seleucia and the Rhodian rock the Stadiaasmus inserts Georgiana, 40 stadia from the former, 80 from the latter. Seleucia is clearly marked by remains and important ruins. [Seleucia.] From Seleucia to the Orontes 300 stadia. Between the Orontes and Possidion the Stadiaasmus enumerates Nymphaeum, 15 stadia; Long Island (Masph Pover), one of the Pigeon Rocks, 50 stadia; Chaladrus, or Chaladropolis (obviously the Chalaram of Ptolemy), 10 stadia; Sidonia, 60 stadia, above which was a lofty mountain called the Thurme (egydon), 80 stadia distant from Possidion. Heraclia (Ras-el-labat), situated on a cape called Polis, was 100 stadia from Possidion, and Laodicea 120 stadia direct distance from Heraclia; between which the Stadiaasmus inserts Paseria and Albus Portus, the former 120 stadia from Polis, the latter 30 stadia from Laodicea, with a like interval between the two. Between the two is Laodicia the Stadiaasmus reckons 200 stadia to Balanese (Banias), in direct distance, subdivided as follows: from Laodicea to a navigable river, probably Nahhr- el-Kebir, 70 stadia; from that to Gabala (Jebeli), 80; to Paltos (Bolde), 30; to Cape Balanese, 70 stadia.

iii. Pteria. (§ 12.) 1. Pteria. 2. Pagraea. 3. The Syrian Gates. This was the N.-western part of the country, where Bagras still marks about the centre of the district. [Pagaras.]

iv. Cynorrhescite (§ 13). 1. Arisateria. 2. Rhegias. 3. Bura. 4. Heracleia. 5. Nisara. 6. Hierapo- lis. 7. Cyrrhus. 8. Hermia. 9. Gabala. 10. Papho- phara. This district lay to the east of Pteria, and corresponded with the fertile plain watered by the three streams that flow into the lake of Antioch, the Labotias, the Arcusentis, and the Oemoparas of Strabo; on the last and easternmost of which, now called the Afris, the modern village of Cophara still represents the ancient Euphrates, which flows to the district to which it gave its name. This part of Syria is so little known that it is impossible to identify its other ancient towns, the names of which, however, might doubtless be recovered in existing villages or sites. The village of Cophara, which has ruins in its vicinity, is situated on the slopes of the Taurs, about 60 miles N.W. of Aleppo and 15 miles N.W. of Kilise, the seat of the Turco- man government, whose limits nearly correspond with those of the ancient Cynorrhescitus. (Chesney, Euphrates Expedition, vol. i. p. 422, and map i.)

v. By the Euphrates (§ 14). 1. Urma. 2. Arastia. 3. Sequeena. 4. Euroopus. 5. Cossidia. 6. Bebistamiana. 7. Gareba. 8. Arinama. 9. Ergasia or Ergosiris. These are, according to the former, 15 stadia, situated lower down the stream than those mentioned above (iii.), apparently between Samosota and the river Sojir, a tributary of the Euphrates, which, rising near As tab, enters that river a little below some ancient ruins, supposed to represent the Cossidia of Ptolemy (No. 5). The names of several of these towns are still preserved in the native villages situated between the Sojir and the Euphrates; and it is clear that the geographer did
SYRIA.

not intend to say that all these towns were on the river. The castle of Orosus, not far above Bireh-Jebel and Port William, is Urma (No. 1 in the list), to the west of which, not far from 'Ais Tab, is the small village of Arsal, Aralou (No. 2). (Cheesney, p. 419.)

vi. Seleucia (§ 15). 1. Gephyra. 2. Gandara. 3. Isma. The Seleucia of Pontiocy comprehended a small part only of that district described under the same name by Strabo, probably that tract of coast to the north of the Orontes, in which Seleucia Pieria was situated. [Seleucia; Seleucia Pieria.]

vii. Cassiopetra (§ 16). 1. Antioch on the Orontes. 2. Daphne. 3. Bacthiala. 4. Areobis (al. Lydia). 5. Seleucia ad Belum. 6. Larissa. 7. Epiphaneia. 8. Rhaphaness. 9. Antara. 10. Marathus. 11. Marma. 12. Mamgou. This district comprehended the coast from the mouth of the Orontes to Ardash, as including part of Phoenicia, while to the east it extended as far as the coast of Tripoli in the modern division of the country. This also was part of Strabo's Seleucia, in which he places Antioch. Of the towns recited, 7, 6, 5, 1, 2 were situated or near the Orontes; 8, 9, and 10 on the coast (see under the names); 3, 4, 11, and 12 have not been identified.

viii. Malebontius (§ 17). 1. Thama. 2. Acocrase (al. Acorase). 3. Derhiama. 4. Chalybon. 5. Spilunca; and, by the Ephratic, 6, Barbareana. 7. Athias. Chalybonita received its name from No. 4 in the list of cities, afterwards called Berea, situated beside Nicator, and so designated by Strabo, situated about half-way between Antioch and Hierapolis. [Beroea, No. 5.] This fixes the district to the east of Cassiopetra, in the phasisch of Aleppo, whose renowned capital called in Arabic Chalob, is the modern representative of Chalybon, which had assumed its ancient name as early as the time of Ptolemy, unless it had rather retained it throughout among the natives. The district extended from the Orontes to the Ephratic. The sites have not been identified.

ix. Chalcedon (§ 18). 1. Chalceia. 2. Ambphasidama. 3. Tolmedissa. 4. Maronis. 5. Coara. This district lay south of Aleppo, and therefore of Chalybonitia, according to Pococke (Observations on Syria, p. 149), which is confirmed by the existence of Aemedia, which he takes to be identical in situation with Chalceia, and which, among Arab writers, gives its name to this part of Syria, and to the gate of Aleppo, which leads in this direction. [Chalceia, No. 1.]

xi. Laodicea (§ 20). 1. Scabiana Laodicea. 2. Paradisus. 3. Jabruda. To the south of the former, higher up the Orontes, also comprehended in the Seleucia of Strabo. No. 1 is identical with Strabo and Pliny's Laodicea ad Libanum, placed by Mr. Ponting's Dr. Broun in Tell Nebi Mudin, on the left bank of the Orontes, near Lake Home, Paradisus (2), still marked by a pyramid, on which are represented hunting scenes. (See above, p. 497, &c. Orontes.) Dr. Robinson so nearly agrees with this identification as to place Paradisus at Jesihel-el-Khades, which is only a few miles distant from the pyramid of Harran to the east. (Robinson, Bib. Res. 1859, p. 556; Porter, Five Years in Damascus, vol. ii. p. 339.) Jabruda (3) is distinctly marked by Faihred on the east of Antilam, a town mentioned by writers of sacred geography as an episcopal city in the fourth century, a distinction which it still retains above list, with the addition of Raphana, apparently the Raphanitan of Ptolemy in Cassiopetra, properly constituted the cities of the Decapolis, according to most authorities. These and the remaining cities require a very large district to be assigned to this division of the country, comprehending the whole length of the Baha, i.e. the Decapolis (1). (Raphana, Philadelphica (17) (Ammon), and in width from Damascus almost to the Mediterranean. Abu'a of Lyanias (2), has only lately been identified, and attracted the notice which it deserves, as the capital of the tetarchy of Abila, mentioned by St. Lab., in connection perhaps with this same Lyanias, which is thus attached to it by the Ephratic (St. Lab., ii. 1.) It is situated in the heart of Antilamia, on the north side of the river Barada, where the numerous remains of antiquity and some inscriptions leave no doubt of the identity of the site. (De Sanclay, Voyage autour de la Mer Mort, vol. ii. pp. 593—604; Porter, Damascus, vol. i. p. 175; Robinson, Bib. Res. 1859, pp. 479—484.)

SYRIA. powerful in the time of Saul and David was Zobah, as appears from the number of men which that people brought into the field against David (2 Sam. viii. 4), and from the rich booty of which they were spoiled by the Israelites (1 Sam. xvii. 7). Even after the return of the Jews from the Babylonian captivity, Tiglath-Pileser, king of Assyria, about the year 747 B.C., and was annexed to that kingdom. Hence it successively formed part of the Babylonian and Persian empires; but its history presents nothing remarkable down to the time of its conquest by Alexander the Great. After the death of that conqueror in B.C. 323, Syria, however, was divided among the successor of Seleucus I, and its tenacity of its independence, was disputed by Antigonus, and was not established till after the battle of Ipsus, in 301 B.C., when he founded Antioch on the Orontes, as the new capital of his kingdom. [ANTIOCHEA, Vol. i. p. 142.] From this period the descendants of Seleucus, known by the agnomen of Antiochians, occupied Syria down to the year 65 B.C., when Antiochus XIII. Asiaeas was dethroned by Pompey, and Syria became a Roman province. (Plut. Pomp. 39; Appian, Syr. 46; Estr. vi. 14.) Into the history of Syria under the Seleucidae it is unnecessary to enter, since a table of that dynasty is given in the D. E. P. (Vol. iii. p. 769), and all the public events will be found described in the lives of the respective monarchs.

The tract of which Pompey took possession under the name of Syria comprised the whole country from the gulf of Issus and the Euphrates to Egypt and the deserts of Arabia. (Appian, Syr. 50, Mith. 106.) The province, however, did not at first consist of that extensive tract, but was composed merely of a strip of land along the sea-coast, which, from the gulf of Issus to Damascus, was of slender breadth, but which to the S. of that city spread itself out as far as the town of Canatha. The rest was parcelled out in such a manner that part consisted of the territories of a great number of free cities, and part was assigned to various petty states, whose absolute dependence upon Rome led to their dominions being gradually incorporated into the province. (Appian, Syr. 50.) The extent of the province was thus continually increased during the first century of the Empire; and in the time of Hadrian it had become so large, that a partition of it was deemed advisable by Pompey; the names of which are known partly from their being mentioned by Josephus (Ant. xiv. 4, § 4), and partly from the era which they used, namely that of B.C. 63, the year in which they received their freedom. In this way we are enabled to enumerate the following cities in the original province of Syria: Antiochaea, Selecneia in Pieria, Epiphaneis, between Arethusa and Emeas, Apameia; nearly all the towns of the Decapolis, as Abila (near Gadara), Antiochus in Hippos or Hippos, Canatha, Dim, Gadara, Pella, and Philadelphia; in Phoenicia, Tripolis, Sidon, Tyreus, Doris; in the Taurus, Carrhaea, Marcella, Samaria; on the coast, Tarsis Stratoni (Caesarea), Joppa, Jemimah, Azotus, Gaza; and in the south, Marissa. The gift of freedom to so many cities is not to be attributed to the generosity of the Romans, but must be regarded as a necessary measure of policy. All these towns had their own jurisdiction, and administered their own laws; they were altogether tributary to the Romans, and their taxes were levied according to the Roman system established on the organisation of the province. ("Syria tum primum facta est stipendiarum," Vell. Pat. ii. 37.) The first governors of Syria, and especially Gabinius, who was proconsul in the year 57 B.C., took much pains in restoring the cities which had been destroyed. (Joseph. Ant. x. 5, § 3.) The influence of Gabinius was blighted in Judaea by Gabinius have been noticed in another article. [PALAEOSTINE, Vol. ii. p. 532.] Caesar, during his expedition against Pharnaces, B.C. 47, confirmed these cities in their rights, and likewise extended them to others, as Gabala, Lebdea ad Mare, and Ptolemais. (Ephel. vol. iii. p. 314; M. G. M. P. xii. 5, § 111.) Of the regulations adopted in Syria during the reign of Augustus we have little information.

The same political reasons which dictated the establishment of these free cities, where it was possible to do so, rendered the continuance of dynastic governments necessary in the eastern and southern districts of the province. Whether the character of the population, or its obstinate adherence to ancient institutions was adverse to the introduction of new and regular forms of government. These dynasties, however, like the free cities, were used as the responsible organs of the Roman administration, and were tributaries of Rome. Thus, in the histories of Commagenes and Judaea, we find several instances in which these petty sovereigns were cited as appearing at Rome, were tried, condemned, and punished. The Roman idea of a province is essentially a financial one. A province was considered as a "praedium populi Romani." (Cic. Verr. ii. 3; and hence the dynasties of Syria may be considered as belonging to the provinces just as much as the free towns, since, like them, they were merely instruments for the collection of revenue. (O. C. Huesche, Uber den Zeir der Geburt Jesu Christi gehaltenen Census, pp. 100-112.) Thus we find these petty sovereigns in other parts of the world regarding themselves merely as the agents, or procurators, of the Roman people (Sal. Juv. 14; Mabed, M. V. P. p. 294): nor were they allowed to remain longer independent, it being necessary to prepare their subjects for incorporation with the province of which they were merely adjuncts.

The Syrian dynasties were as follows: 1. Chalcis or Belum. 2. The dynasty of Arrethusa and Emeas. 3. Abila. 4. Damascus. 5. Judaea. 6. Palmyra. (See these states have been traced in the tables of successive names, and we shall here only add a few particulars that may serve further to illustrate the history of some of them during the time that they were under the Roman sway. All that is essential to be known respecting the first three dynasties has already been recorded. With regard to Damascus, it may be added that M. Asamius Scaurus, the first
SYRIA.

governor of Syria appointed by Pompey, after having punished its ruler, the Arabian prince Aretas, for the attacks which he had made upon the province before, had been reduced to a treaty with him in B.C. 63. It is to this event that the coins of Scarrus refer, bearing the inscription REX ARETAS. {Eckhel, vol. v. p. 131; cf. Dion Cass. xxi. xvii. 15; Appian. Syr. 51; Joseph. Ant. xiv. 4 § 5, 5. § 1.) Damascus was dependent on the Romans, and sometimes had a Roman garrison {Joseph. Ant. xiv. 4 § 11.} though it cannot be doubted that the Arabian kings were in possession of it, on the condition of paying a tribute. It has already been remarked that the city was in the possession of an ethnarch of Aretas in A.D. 39; and it was not till the year 105, when Arabia Petraea became a province, that Damascus was united with Syria, in the proconsulship of Cornelius Palma. {Eckhel, vol. iii. p. 330.) On the other hand, Judea appears to have been annexed to the province of Syria immediately after its conquest by Pompey in B.C. 63 (Dion Cass. xxix. 15. 16; Eutrop. vi. 14; Liv. Ep. 103; Strab. xvi. p. 763, sqq.: Joseph. B. J. i. 7 § 7. Amm. Marc. xiv. 8 § 12.) though it retained its own administration, with regard especially to the taxes which it paid to the Romans. (Joseph. Ant. xiv. 4 § 4, B. J. i. 7 § 6.) The race of the Jewish kings ended with Aristobulus, whom Pompey, after the capture of Jerusalem, carried to Rome to adorn his triumph {Appian. Syr. 50; Dion Cass. xxxix. 16.; Plut. Pomp. 43; Joseph. Ant. xiv. 4, sqq.} Hyrcanus the brother of Aristobulus, was left in Judea as chief priest and ethnarch, in which office he was confirmed by Caesar; but his dignity was only that of a priest and judge. {Dion Cass. L. c.; and Joseph. l. c. and xiv. 7 § 2, 10. § 3.) The land, like the province of Syria, was divided for the convenience of administration into districts or circles of an aristocratic constitution. (Joseph. B. J. i. 8 § 5;) and during the constant state of war in which it was kept either by internal disorders, or by the incursions of the Arabs and Parthians, the presence of Roman troops, and of the governor of the province himself, was almost always necessary. It has been already related {Jerusalem, Vol. I. p. 26} that Antigonus, the son of Aristobulus, obtained the throne by the assistance of the Parthians in B.C. 40. In the following year the Parthians were expelled from Syria by Vercingetorix {Dion Cass. xlvi. 39—41; Liv. Epit. 127;} and in B.C. 38 Judea was conquered by Sosius, Antiochus's legate, Antigonus was captured and executed, and Herod, summoned the Great, was placed upon the throne, which had been promised to him two years previously. {Dion Cass. xlix. 19—22; Plut. Ant. 34, sqq.;Tac. Hist. v. 9; Appian, B. C. v. 75; Strab. xvi. p. 765.) From this time, Judea again became a kingdom. With regard to the relation of Herod to the Romans we may remark, that a Roman legion was stationed at Jerusalem, and that the oath of fealty was taken to the emperor, as lord paramount, as well as to the king, and that the absolute dependence of the latter was recognised by the payment of a tribute and the providing of subsidiary troops. (Joseph. Ant. xvi. 3 § 7, xvii. 2 § 4; Appian, B. C. v. 75.) Herod, therefore, is to be regarded only as a procurator of the emperor, with the title of king. Antioch assigned part of the revenues of Judea to Cleopatra. (Joseph. Ant. xvi. 4 §§ 2, 4.) According to an ordinance of Caesar, the places in the jurisdiction of Jerusalem, with the exception of Joppa, had to pay a yearly tribute of a fourth of all agricultural produce, which was to be delivered the following year in Sidon, besides a tax to be paid to Tyre. {Ibid. xiv. 10. § 6.) In the seventh, or Sabbath year, however, the tribute was intermitted. Besides this tribute, there was a capitation and tax; and it was for the organising of this tax that the census mentioned in the Gospel of St. Luke (vi, 5) took place. {Joseph. Ant. xiv. 11. he dates the birth, which appears to have been conducted by Herod's officers according to a Roman form of ceremony. The division of Judea among the sons of Herod, and its subsequent history till it was incorporated in the province of Syria by the emperor Claudius, A.D. 44 {Tac. Ann. xii. 23, Hist. v. 38.} had been already narrated [Vol. II. p. 533], as well as the fate of Jerusalem under the emperors Titus and Hadrian. {Vol. II. p. 26. sqq.) With regard to Palmyra, the sixth of the dynasties before enumerated, we need here only add to what has been already said {Vol. II. p. 536} that it was united to the province of Syria by Hadrian, and we formerly mentioned it in Tacitus {Ann. 6. 17.} and in the B. p. 496, ed. Mommsen; cf. Gruter. 86. 8.) But whether it became a colony with the Jews Italian on that occasion or at a later period, cannot be determined.

Respecting the administration of the province of Syria, it may be mentioned that the series of Roman governors commences with M. Scarrus, who was last there by Domitian, and had the title of quaestor pro praetore. Scarrus was succeeded by two pro-praetores, L. Marcilius Philippus, 61—60, and Lentulus Marcellinus, 59—58; when, on account of the war with the Arabs, Gabinius was sent there as proconsul, with an army {Appian. Syr. 31;} and Joseph. xiv. 4, sqq., B. J. i. 6—8; Euseb. B. P. 131, then find the following names: Crassus, 55—53; Cassius, his quaestor, 53—51; M. Calpurnius Bibulus, proconsul. {Droysen, Gesch. Rom. ii. vol. pp. 101, 118—120.) After the battle of Pharsalus, Caesar gave Syria to Sex. Julius Caesar, n. c. 47, who was put to death in the following year by Cassius Bassus, an adherent of Pompey. {Ib. p. 125, iii. p. 768.) Bassus reigned but a short time till he was put to death by Cassius, to avoid which when Cassius seized it, and assumed the title of proconsul. {Gic. ad Fam. xii. 11.) After the battle of Philippi, Antony appointed to it his lieutenant, L. Decidius Scaurus, n. c. 41, whose overthrow by the Parthians in the following year occasioned the loss of the whole province. {Dion Cass. xliii. 24; Liv. Epit. 127.) The Parthians, however, were driven out by Vittinidus, another of Antony's lieutenants, in the autumn of 39. {Dion Cass. xii. 39—43; Liv. ib.; Plut. Ant. 33.) Syria continued to be governed by Antony's officers till his defeat at Actium in 31, namely, C. Bassus, n. c. 38 (by whom, as we have said, the throne of Judea was given to Herod the Great), Ptolemaeus, n. c. 35, and L. Bibulus, n. c. 31. In n. c. 30, Octavian admitted Syria to his legate, Q. Didius. After the divisions of the province between the emperor and senate in n. c. 27, Syria continued to have as governors legati Augusti pro praetore, who were always consulares. {Suet. Tib. 41; Appian, Syr. 51.) The most accurate account of the governors of Syria, from n. c. 47 to A.D. 50, will be found in Norius, Cosmographia Pisanus. {Opp. vol. iii. pp. 434—531.) Their
residence was Antioch, which, as the metropolis of the province, reached its highest pitch of prosperity. It was principally this circumstance that induced the emperor Hadrian to divide Syria into three parts (Spart. Hadr.).

1. Antioch, which by way of distinction from the other two provinces was called Syria Coele, Magna Syria, Syria Major, and sometimes simply Syria. (Gruter, Inscr. 346. 1, 103, 2; I. C. 65, 105, 106; Antioch. 2.) Antioch remained the capital till the 6th century, though the province was transferred to the suburb of Antiochus Niger, and at length a new capital, Antioch, was added.

2. Caraccola, which, besides the title of Septimius Severus, who deprived it of that privilege on account of its having sided with Pescennius Niger, and the title of Septimius Severus, which he made a colony in its stead (Capitol. M. Anton. 25; Arvid. Cais. 9; Ulp. Dig. 50. tit. 15. s. 1; § 3); and although Caraccola procured that its rights should be restored, it was never again made a colony. Caraccola (Syria Coele) retained its title of metropolis, together with a small territory comprising four dependent cities, whilst Antioch, which had also been made a colony by Caraccola, was likewise called Metrocopia (Corpus Inscriptionum. Gr. no. 4472; Paul. Dig. 50. tit. 15. a. 8. § 5; Eckhel. iii. p. 302, sqq., 319, sqq.)

II. Syria Phrynica, or Syrophrynica, under a later name Phrynia (I. C. 69, 2; Sallust, Marini, Acti, gcc. p. 744), consisted of three parts, with three metropolises, namely: 1. Tyre, which first obtained the title of metropolis, with relation to the Roman province, under Hadrian (Suidas, ii. p. 147, Bemh.), though it had that appellation previously with relation to its own colonies (Strabo. xiv. p. 706; I. C. 69, vol. iii. p. 302, sqq., Damascus, which from the time of Hadrian became a metropolis, with a small territory comprising five towns. (Just. Mart. Dial. c. Tryphon. c. 78; Ter- tull. adv. Marcionis, iii. 13; Eckhel, vol. iii. pp. 331—333.) 3. Palmyra, which appears to have been the residence of a procurator Caesaran; whence we may infer that it was the centre of a fiscal circle (Tod, Desp. ii. p. 85; Ulpian. Digest. 50. tit. 15. s. 1; § 5; Procop. de Aed. ii. 11; Corpus Inscriptionum. Gr. no. 4485. 4496—4499.) A fourth metropolis, Emessa, was added under Heliogabalus (Eckhel, iii. p. 311; Ulpian. Dig. 50. tit. 15. a. 1. § 4). Trachonitis also formed a separate circle at this time, with the village of Phaesa as its metropolis. (Corpus Inscriptionum. Gr. no. 4496. 4497. 4498; vol. iii. p. 257, no. 5040.) SYRIA PALÆSTINA, from the time of Hadrian administered by a legatus Augusti pro praetore. The name of Syria Palæstina does not appear on coins till the time of the Antonines (Eckhel, iii. p. 435; cf. Arist. id. ii. p. 470, Dind.; Galen. de Simpl. Med. iv. 19; Just. Mart. Apol. i. 1: Corpus Inscriptionum. Gr. no. 4099, 4151, &c.). Its metropolis was Caesarea, the anciently Turraea Stratonis (Eckhel, iii. p. 439).

This division of the province of Syria was connected with an alteration in the quarters of the three legions usually stationed in Syria. In the time of Dion Cassius (iv. 23) the Legio VI. Scythica was cantoned in Syria, the Legio VII. Gallica in Phoenicia, and the Legio VIII. Augusta in Syria Palæstina. The system of colonisation which was begun by Augustus, and continued into the third century of our era, was also adapted to insure the security of the province. The first of these colonies was Be- rythus, where Augustus settled the veterans of the Legio V. Macedonica and VIII. Augusta. It was a Colony juris Italici. (Eckhel, iii. p. 430; Ulpian. Digest. 50. tit. 15. a. 1. § 1; En- seb. Chron. p. 155, Scal.) Augustus also founded Heliopolis (Baalbek), which received the title Italicum under Septimius Severus (Ulpian, l. c.; Eckhel, iii. p. 384). Under Claudius was founded Ptolemais (Acco), which did not possess the jus Italicum (Ulpian, l. c. § 3; Plin. v. 1; Eckhel, iii. p. 424).

Vespasian planted two colonies, Cassarea (Turria Stratonis) and Nicopolis (Emmaus) (Paul. Digest. 50. tit. 15. a. 8. § 7; Eckhel, iii. p. 430); which latter, however, though originally a military colony, appears to have possessed neither the right nor the name of a colony. (Belg. Jud. vii. 6.; Somm. Hist. Eccles. v. 21.) The chief colony founded by Hadrian was Aelia Capitoline (Jerusalem), whose colonists, however, were Greeks, and therefore it did not possess the jus Italicum. (Dion Cass. ixix. 12; Euseb. Hist. Eccles. iv. 6; Malalas, xi. p. 279, ed. Bonn; Ulpian, l. c. § 6.) Hadrian also probably founded Palmyra. Under Septimius Severus we have Laodicea, Tyrus, and Sebastopolis (Samaria), of which the first two possessed the jus Italicum. (Ulpian, l. c. § 3 and 7; Eckhel, iii. p. 319, 387, seqq., 440, seqq.) Caraccola assumed the title of Antioch and the Emessa (Ulpian, l. c. § 6; Paul. l. c. § 5; Eckhel, iii. 302, 311, Elagabalus Sidon (Eckhel, iii. p. 371), and Philippus, apparently, Damascus (§ 381), whose foundation is unknown, Capitolus, of whose former name we are ignorant (Paul. Digest. 50. tit. 15. a. 8. § 7; Eckhel, iii. p. 328, seqq.), and Cassarea ad Libanum (Arcas). (Eckhel, l. c. p. 361.)

At the end of the fourth century of our era, Syria was divided into small, smaller, or sometimes, only one colony: Seleucia, Laodicea, Gabala, Paltos, Beroea, Chalcis. 2. Syria Secunda, under a praeses, with Apameia for its chief city, and the dependent towns of Epiphaneia, Anthus, Larisa, Marianne, Balaneia, Raphanae, and Seleucia ad Belum. Malalas (xiv. p. 265, ed. Bonn.) describes its separation from Syria Prima to the reign of Theodosius II., which, however, may be doubted. Böcking attributes the division to Theodosius the Great (ad Not. Dignit. p. 129.)

3. Phoenicia Prima, under a consularia, with the capital of Tyros and the cities Ptolemais, Sidon, Berytus, Byblos, Botryo, Tripolis, Arca, Orthosias, Aradus, Antioch, and others, now part of Syria Secunda, or Phoenicia ad Libanum, under a praeses, having Damascus for its capital, and embracing the cities of Emessa, Laodicea ad Libanum, Heliopolis, Abla, Palmyra. It was first separated by Theodo- sius the Great. 5. Palæstina Prima, administered by a consularia, and in the years 385—385 by a praeses. Its chief city was Cassarea, and it comprehended the towns of Dora, Antipatris, Diospolis, Azotos ad Mare, Azotos Mediterranea, Eleutheropolis, Aelia Capitolina (Jerusalem), Neapolis, Livias, Sebastopolis, Antidotion, Diodictelianopolis, Joppa, Gaza, Ephesia, Aseclon, &c. 6. Palæstina Secunda, under a praeses, with the capital of Scythopolis, and the towns of Gadara, Abla, Capitolias, Hippes, Tibe- rias, Dio Cassius. The opposite boundary of the Provin- cia. This was formed out of the former province of Arabia. (Procop. de Aed. v. 6.) It was governed by a praeses, and its chief city was Petra. (Cf. Palæstina, Vol. ii. p. 533.)

With respect to these later subdivisions of Syria, the reader may consult Hierocles, p. 297, ed. Bonn, with the notes of the Wesseler, i. p. 3 (Synopsis), and the commentary of Böcking, pp. 128—140, 511; Bingham, Orig. Ecc. vol. iii. p. 434, seqq.; Norisius, de Epoch. Syrocosmop. in Opp. vol. ii. p. 374, seqq., p. 419, seqq.

3 z 4
SYRIA ET PORTEAE.

In the year 632, Syria was invaded by the Saracens, nominally under the command of Abu Obeidah, but really numbering more than a million, led by Chalid, "the sword of God." The easy conquest of Bostra inspired the Moslems to attack Damascus; but here the resistance was more determined, and, though invested in 633, the city was not captured till the following year. Heraclius had been able to collect a large force, which, however, under command of his general Werdisz, was completely defeated at the battle of Ainamadin; and Damascus, after that decisive engagement, though it still held out for seventy days, was compelled to yield. Heliopolis and Emesa speedily shared the fate of Bostra and Damascus. The last efforts of Heraclius in defence of Syria, though of extraordinary magnitude, were frustrated by the battle of the Yamnuk. Jerusalem, Aleppo, and Damascus successively yielded to the Saracen arms, and Heraclius abandoned a province which he could no longer hope to retain. Thus in six campaigns (633—639) Syria was entirely wrested from the Roman empire. (Gibbon, Decline and Fall, ch. 5. § 5; Schmitt, Icon. Asiat. s. v. [T. H. D.])

SYRIA AND PERSIA (Zopar, also Zopae). A mention of a pass between Mount Amnassus and the coast of the bay of Isus, which formed a passage from Glicicia into Syria. It was 3 stadia in length, and only broad enough to allow an army to pass in columns. (Xenoph. Anab. l. 4. § 6; Arrian, Anab. ii. 8; Ptolemy v. 15. § 12; Strabo xiv. p. 676.) The site of the pass had formerly been closed up at both ends by walls leading from the rocks into the sea; but in the time of Alexander they seem to have existed no longer, as they are not mentioned by any of his historians. Through the midst of this pass, which is now called the pass of Besida, there flowed a small stream, which is still known under the name of Muristan, its ancient name being Cervus. [L. S.]

SYRIA (Zopar), a headland in the Euxine, on the coast of Phagriandia, which, to distinguish it from the larger promontory of Caramb in its vicinity, was also called zepa Asyrv. (Marcian, p. 72; Arrian, Periplus, P. E. p. 15; Anonym. Periplus, P. E. P., etc., modern name is Cape Tigris.) [L. S.]

SYRIEN. [SYRIEN.]

SYRION (Jesu. Hist. p. 568), a town in the north-western part of Thrace, between Philippopolis and Parnobole. [J. R.]

SYRO-PHoeniCE. [SYRIA, p. 1079.]

SYROS or SYRUS (ZEpae, also Zopae, Hom. Od. xv. 403. and Zopae, Diod. Laert. i. 118; Hesych.; Sen. Exul. Zenplis: Zepae, Zopae), and the present inhabitants call themselves Zepaeus or Zepenof, not Zopaeus), an island in the Aegean sea, one of the Cyclades, lying between Rheneia and Cythrus, and 20 miles in circumference, according to some ancient authorities. (Ptol. iv. 12. a. 22.) Syros produces good wine, but is upon the whole not fertile, and does not deserve the praises bestowed upon it by Homer (i. c.), who describes it as rich in pastures, cattle, wine, and wheat. It is usually stated upon the authority of Pline (xxiii. 12. a. 56) that Syros produced Sil or yellow ochre; but in Sillery's edition of Pline, Scyros is substituted for Syros. Syros had two cities even in the time of Homer (Od. ii. 430; iii. 42), one on the eastern, and the other on the western side of the island. The one on the eastern side, which was called Syros (Ptol. iii. 15. § 30), stood on the same site as the modern capital of the island, which is now one of the most flourishing cities in Greece, containing 11,000 inhabitants, and an annual revenue of 500,000 florins. In consequence of the numerous new buildings almost all traces of the ancient city have disappeared; but there were considerable remains of it when Tournemfort visited the island. At that time the ancient city was abandoned, and the inhabitants had built a town upon a lofty and steep hill about a mile from the sea. Tournemfort refers to it as the ancient Syros from the modern town, which has arisen upon the site of the ancient city. The inhabitants of this Syros, who are about 6000 in number, are chiefly Catholics, and, being under the protection of France and the Pope, they took part in the Greek revolution during its earlier years. Their neutrality was the chief cause of the modern prosperity of the island, since numerous merchants settled there in consequence of the disturbed condition of the other parts of Greece.

There are ruins of the second ancient city at the western coast, at the harbour of Maria della Grecia. Rees conjectures that its name may have been Synkoche or Grychaeus, since we find the Gygrai, who are supposed to have been the inhabitants of the city, in the inscriptions containing lists of the trierarchy allies of Athens. There was another ancient town in the island, named Eschatia. (Bickh. Isaur. no. 2347, c.) Pherecydes, one of the early Greek philosophers, was a native of Syros. (Comp. Strab. ii. pp. 435, 437; Strabo, p. 239; Steph. L. S.; Tournemfort, vol. i. p. 36.) A口碑, Prokops鳯, Erisa, vol. i. p. 55, seq.; Reise, Reisen auf den Griech. Inseln, vol. i. p. 5, seq.; Tournemfort, vol. ii. p. 24, seq.; Fiedler, Reise, vol. ii. p. 164, seq.) SYRTICA REGIO. (Zeopriac, Ptol. iv. 4), a tract on the coast of N. Africa, between the Syrya Major and Minor, about 100 miles in length. (Strab. xvii. p. 534, seq.; Melas, l. 7; Ptol. v. 4. 4.) After the third century it is obtained the name of the Region Tripolitana, from the three principal cities, which were allied together, whence the modern name of Tripoli (Not. Imp. Occid. c. 45; Procop. de Aed. vi. 3; cf. Solinus, c. 27). Mannert conjectures (ib. ii. p. 133) that the emperor Septimius Severus, after the destruction of Leptis, was the founder of the Province Tripolitana, which, according to the Nat. Imp. (l. c.), was governed by its own duke (Dux) (Comp. Amm. Marc. xxvi. 6). The district was attributed by Procopius, Melis, and Plys to Africa Provincia; but in reality it formed a separate district, which at first belonged to the Cyprians, but was subsequently wrested from them and assigned to Carthage, and, when the latter was subjected to the Romans, formed a part of the Roman province of Africa. For the most part the soil was sandy and little capable of cultivation, as it still remains to the present day (Dei Ceila, Viegge, p. 50); yet on the borders of the river Cinyes and in the neighbourhood of the town of Tonnos, there were some fertile and productive land (Herod. iv. 198; Syclayx, p. 47; Strab. xvii. p. 63; Ovid, ex Pont. ii. 7. 25.) Prolemy mentions several mountains in the district, as Mount Gigius or Giginos (v/à Πύργος, iv. 3. § 20), Mount Thibis (v/à Ζησαμη, ib.) Mount Zambabari or Cazzurari (v/à Ζαμπαρίου, Ζυσαμαρίου, ib.) and Mount Taminus (v/à Ζαμίνου, ib.). In the district we find also (v/à ζησαμοσύνης, ιβ.) Mount Megale (v/à βελανών, ib.) The more important promontories were Cephalus (Kepalos, v/à Πύργος, iv. 3 § 18), near which also, on the W., the same author
SYRTIS. mentions another promontory, Trieron (Τριγωνος or Τρίγωνος ἡμίπορος, ιβ.), and Zeitha (Βαὶ Ζειθα, ιβ. § 19). The principal rivers were the Cinyra or Cyniphus (Ptol. ιβ. § 20), in the eastern part of the district, and the Triton, which formed its western boundary, and by which the description of the town called Trionitae Pallas, and Libya were supplied (ιβ. § 19). Besides these waters there were extensive salt lakes and marshes along the coast (Strab. ι. c.; Tab. Peut. tab. vii.). The lotus is mentioned among the scanty products of this unfertile land (Plin. xxiv. 1. s. 1), and a peculiar kind of precious stones, called after the country, called gypsum, was found on the coast (Id. xxvii. 10. § 67). The tribes that inhabited the country besides the Nasamones, Petytis, and Macae, who in the earlier times at least spread themselves over this district, were the Lotophagi [Vol. II. p. 205], who dwelt about Syrria Minor, and the Girdanes [Vol. I. p. 1002], who were situated to the W. of the former. Ptolemy, however, in place of these more ancient tribes, mentions others that are heard of nowhere else, as the Nigiti, Samanycy, Nycypi, Nygbeni, Elacones, Danemessi, &c. (iv. 3. §§ 23—27). But Egyptian and Phoenician colonists had been mixed at a very early period with these aboriginal Libyan tribes, whom the Greeks found there when they settled upon the coast, and with whom, probably, they inter-married. This intercourse had not only political, but commercial, connections. The most important towns of the Regio Syrtae were the three from which subsequently derived its name of Tripolitania, that is, Leptis Magna, Oea, and Sabrata; besides which we find Tacepa and other places mentioned by Ptolemy. Opposite to the coast lay the islands of Mercu and Cerco. (T. H. D.)

SYRTIS MAJOR AND MINOR (Συρτις μεγαλη καὶ μικρη, Ptol. iv. 3), two broad and deep gulfs in the Libyan sea on the N. coast of Africa, and in the district called after them Regio Syrtae. The name is derived from the Arabic, Seri, a desert from the desolate and sandy shores by which the neighbourhood of the Syrte is still characterised. The navigation of these gulfs is difficult, owing to the shallow and sunken rocks, so that the smaller Syrta was considered in ancient times as altogether un navigable, and even into the larger one only small ships ventured. (Strab. xvii. p. 835; Scylax, p. 48; Polyb. i. 39; Mela, i. 7; Plin. v. 4. c. 4; Procop. de Aed. vi. 3.) The reports of modern travellers, however, do not tend to establish these dangers. (Lavater, Relazioni in Della Cellai’s Viaaggi, p. 214, seq.) The Greater Syrta, which was the eastern one, now the Gulf of Sidra, extended from the promontory of Boreum on the E. side to that of Cephalae on the W. (Seyl. 46. seq.; Polyb. iii. 29; Strab. ι. c. and ii. p. 123; Mela and Plin. ii. cc.) According to Strabo it was from 4000 to 5000 stadia in circumference by that of Cyrene, and he puts down the measure more accurately at 3930 stadia. Its depth, or landward recess, was from 1500 to 1600 stadia, and its diameter 1500 stadia. (Comp. Agatham. Ι. 3, and ii. 14.) The smaller, or more western Syrta (now Gulf of Cabes), was formed on the E. by the promontory of Zeitha and on the W. by that of Cyrene, and it was enclosed by the Syrtic lake: it was 8000 stadia in circumference of 1600 stadia and a diameter of 600 (comp. Agatham. Ι. c.). Particulars respecting the size of both will likewise be found in Mela i. 7; and Itin. Ant. p. 64, seq. The shores of both were inhospitable, and sandy to such a degree that men and even ships were often overwhelmed by the huge cloud-like masses lifted by the wind (Diod. xx. 41; Sall. Jug. 79; Herod. ii. 25, 26, iv. 173; Lucan, i. 254, &c.); and it is affirmed by modern travellers that the description of the ancients was not exaggerated. (See Brown’s Travels, p. 282; Bruce, Travels, iv. p. 458; Beechey, Expedition, &c. ch. 10; Ritter, Erdkunde, i. p. 1030.)

SYRIPRITUS (Σωριπριτος, Strab. xi. p. 503), a district in Armenia Major. (T. H. D.)

SYTHAS. (Achaila, p. 13, b.)

T.

TAANACH (Σαναξ and Σαναδχα), a town in Palestine, not far from Megiddo, with which it is generally mentioned, was originally one of the royal cities of the Canaanites. (Jos. xii. 21; Judges, v. 19; 1 Kings, iv. 19.) It was assigned to Manasseh (Josh. xvii. 11), but was afterwards one of the cities given to the Levites. (Jos. xxi. 25.) “Taanach by the waters of Megiddo” was the scene of the great battle of Deborah and Barak. (Judges, v. 19.) In the time of the Judges the Canaanitish inhabitants still remained in Taanach (Judges, ii. 19), but in the time of the monarchy it emerged as an Israelitish town. (1 Kings, iv. 12.) Eusebius describes it as 3 Roman miles, and Jerome as 4 Roman miles from Legio, which is undoubtedly the Megiddo of Scripture. (Legio.) Taanach is still called Taanamak, a village standing on the slope of the hills which skirt the plain of Edremon towards the south. (Robinson, Bibl. Res. vol. ii. p. 516, vol. iii. p. 117, 2nd ed.; Stanley, Sinai and Palestine, p. 331.)

TABAE (Ταβαι, Euth. Thudraceus), a town which, according to Strabo (xii. p. 570), was situated on the confines between Phrygia and Caria, and which, in another passage (p. 576), he evidently includes in Phrygia. The country was situated in a plain which derived its name from the town that bore the name of Taoba. (Strab. xii. p. 576.) Stephanaeus Byz. (a. e.) on the other hand calls Tabae a Lydian town, though he at the same time mentions another in Caria; but it is highly probable that not only both are one and the same town, but also the same as the one assigned by Strabo to Phrygia, and that in point of fact the town was in Caria near the confines of Phrygia. Mythi- cally the name of the place was derived from a hero Tabus, while others connected it with an Asiatic term ῥαδας, which signified a rock. (Steph. B. L. c.)

The latter etymology is not inconsistent with Strabo’s account, for though the town is described as being in a plain, it, or at least a part of it, may have been built on a rock. The plain contained several other small and quite isolated towns besides Tabae. Livy (xxviii. 18), in his account of the expedition of Manlius, states that he marched in three days from Gorduiaticus to Tabae. It must then have been a considerable place, for, having provoked the hostility of the Romans, it was ordered to pay 20 talents of silver and furnish 10,000 medimni of wheat. Livy remarks that it stood on the borders of Pisidia towards the shore of the Pamphylian sea. There can be no doubt that D’Anville is correct in identifying the modern Thaune or Davaus, a place of some note north-east of Moglab, with the ancient Tabae. Col. Leake (Asia Minor, p. 153), relying too implicitly on Strabo, looks too far east for its site; for Hierocias
TABALA. (p. 689) distinctly enumerates it among the Carian towns. Dassos is a large and well-built town, and the capital of a considerable district; the governor’s residence stands on a height overlooking the town, and commanding a most magnificent view. (Richter, Wulfarstes, p. 543; Franz. Furf. Jutarches, p. 30.)

It should be observed that Pliny (v, 27) mentions another town in Cilicia of the name of Tabae, of which, however, nothing is known. [L. S.]

Cook of Tabae.

TABALA (Tâlaa), a town of Lydia near the river Hermas, is known only from coins found in the country; but it is not the same as the one mentioned by Hierocles (p. 670) under the name of Gabala, which is perhaps only miswritten for Tabala. It is even possible that it may be the town of Tabae which Stephanus Byz. assigns to Lydia. Some trace of the ancient place seems to be preserved in the name of the village Tussali on the left bank of the Hermas between Ada and Keka. [L. S.]

TABANA (Tâban), Proli. iii. 6. 6), a place in the interior of the Chersonese Taurica. [T.H.D.]

TABASSI (Tâbas), Potl. vii. 1. 6), a tribe of Indians who occupied the interior of the southern part of Bactra. (Vit. Euth., in the present province of Myara. Their exact position cannot be determined, but they were not far distant from M. Betti, the most S. of the W. Ghut. They derived their name from the Sanscrit Tapasa, "woods." (Lassen, Ind. Alterk. vol. i. p. 243.) [V.]

TABERNAE, in Gallia, is placed by the Itineraries between Noviomagum (Spinier) and Salatio (Selza). The position of Tabernae is supposed to correspond to that of Biloketlerm. Tabernae is mentioned by Ammianus Marcellinus (xvi. 12), unless in this case the expression means another place (No. 2) which has the same name.

2. Between Acteratrum (Strassburg) and Divodorum (Mets) is Elsaiz-Tzomor, or Sarrona as the French call it, which is about 21 miles from Strassburg. This seems to be the place where Ammianus (xvi. 11) calls Tes Tabernae. When Julian was marching against the Alamanni, who were encamped near Acteratrum, he repaired Tes Tabernae, for the purpose of preventing the Germans from entering Gallia by this pass in the Voges. Ammianus (xvi. 12) also gives the distance from Tes Tabernae to the German camp at Acteratrum at 14 "pouces," which is 21 Roman miles, and agrees very well with the distance between Sarrona and Strassburg (D’Anville, Notice, &c.).

3. Tabernae is mentioned by Ausonius (Mosella, v. 8) on the road between Bingium (Bingen) and Noviomagum (Neumagen); but the geographers are not agreed about the position, whether it is Bergzabern, a place which is out of the way, Baidenau, or Beisen on the Mosel. Ausonius says there is a spring there:—

"Prastereo arteum sitibudius undique terris

Dumnisseas rigorosus perenni fonte Tabernae." [G. L.]

TACAPE.

TABIENI (Tâbi) (Tâbi, Potl. vi. 14. 11), a people in the N. part of Scythia, on this side of the Imana. [T. H. B.]

TABIENI (Tâbi), an Aestian tribe situated NW. of the Regio Troglodytes, near the headland of Buzim (Rosel-Neuchâtel), mentioned by Ptolemy alone (iv. 27. 28). [W. B. D.]

TABLAE, in Gallia, is marked in the Table between Lugudunum Batavorum (Leides) and Noviomagum (Neumagen). D’Anville and others suppose it to be Albita, a little above the junction of the Leck and the Mosae, and opposite to Dorst. [G. L.]

TABOR, a celebrated mountain in Galilee, cited by the Greek writers Atabyrium, under which name it is described. [Atabyrium.]

TABRACA. [Thabraca.]

TABUDA, or TABULLAS in some editions of Ptolemy (ii. 9. § 8), a river of North Gallia. Its name given in ancient times to one of the most important cities of the Apaneis of Scythia. It is situated nearly due W. of the city, and descends between the valley of the Calor (Calore) and that of the smaller stream of the Isero. Like the still more elevated mass of the Monte Matese, which rests on it, forms no part of the main chain of the Apaneis (if that be reckoned, as usual, by its line of water-shed), but is considerably advanced towards the W., and its W. and NW. slopes frequently descend as once to the broad valley or plain of the Vulturinas, where that river receives its tributary the Calor. It is evidently these slopes and underrails to which Virgil alludes as affording a favorable field for the cultivation of olives (Virg. Georg. ii. 38; Vir. Sequest. p. 33), with which they are covered all the day. But in another passage alludes to the "lofty Taburnus," as covered with forests, which afforded pasture to extensive herds of cattle. (Id. Aen. xii. 715.) Gratianus Faliscus also speaks of it as a rugged and rocky group of mountains (Cynepol. 509). We learn from that writer that it was included in the territory of the Casinum, and indeed the celebrated pass of the Canina Forks was at a very short distance from the foot of Mount Taburnus. The name of Mont Taburino or Taburo is still commonly applied to the whole group, though the different summits, like those of the Matese, have each their peculiar name.

The ground was ground for reading (as has been suggested) Taburion or Alps of Alps, in Porbius, iii. 100); the mountain of which that author is speaking must have been situated in quite a different part of Italy. [E. B. B.]

TACAPE (Tâkâ or Tâkâ, Potl. iv. 3. 11), a town in the Roman province of Africa, in the Regio Syrtes and in the innermost part of the Syrte Minor. The surrounding country is represented by Pliny (xvi. 27. 56, xvi. 28. 81) as consisting
The document contains a mix of Greek and Latin text, discussing various geographical locations. It appears to be a historical or geographical description, perhaps from an ancient text or a scholarly work. The content includes references to places such as Tarraconensis, Tarsus, and Tarsus, suggesting a focus on regions of Asia Minor and the Mediterranean. The text is fragmented and requires careful reading to understand the full context.
TAENARUM.

Teanaros ægymâmàtis, Lucan, ix. 36.) There is a slight difference between Strabo and Pausanias in the position of the cave; the former placing it near the temple, which appears in present appearances (see below); the latter describing the cave itself as the temple, before which stood a statue of Poseidon. Among the many dedicary offerings to Poseidon the most celebrated was the brazen statue of Arion seated on a dolphin, which was still extant in the time of Pausanias. (Herod. i. 25, 24.) The temple was visited by N. Tafelvær the first time by the Antonian. (Polyb. ix. 34.)

Taenarum is said to have taken its name from Taenaros, a son either of Zeus or Icarius or Elatus. (Paus. iii. 14. § 2; Steph. B. s. v.; Schol. ad Apoll. Rhod. i. 102.) Bochart derives the word from the Phœnician term “rapos” "Geograp. Sacra, p. 459;" and it is not improbable that the Phœnician may have been the settlement on the promontory at an early period.

Pausanias (iii. 25. § 4) mentions two harbours in connection with the Taenarion promontory, called respectively Pamatthus (Παματθύς), and the Harbour of Achilles (ὁ Ἀκριβώς Ἀκριβώς). Strabo (p. 17) also mentions these two harbours, and describes the temple situated back from the latter to Αίνης. (Ἀίνης.) Strabo (viii. p. 372) speaks of the former of these two harbours under the name of Amathus (Ἀμαθύς), but omits to mention the Harbour of Achilles. It would appear that these two harbours are the Porto Quaglio and the port of Vathy mentioned above, as these are the two most important in the peninsula; the two harbours with Quaglio, and the Harbour of Achilles with Vathy, but the French Commission reverse these positions. We have, however, no doubt that Leake is correct; for the ancient remains above the Porto Quaglio, the monastery on the heights, and the cultivated slopes and valleys, show that the Taenarion population has in all ages been chiefly collected here. Moreover, no ancient writers speak of a town in connection with the Harbour of Achilles, while Strabo and others describe Amathus or Pamatthus as a νόεσ. (Steph. B. s. v. Παματθύς; cf. Aeschin. Ep. 1; Plin. iv. 5. a. 8.) If we were to take the description of Scylax literally, Pamatthus would be Porto Quaglio, and the Harbour of Achilles Porto Marcà; and altogether we should be disposed of by Curtius; but it is impossible to believe that the dangerous creek of Marcà is one of the two harbours so particularly mentioned both by Scylax and Pausanias.

The remains of the celebrated temple of Poseidon still exist at Askomato, or Kistèriús, close to C. Modupûs on the eastern side. They now form part of a ruined church; and the ancient Hellenic wall may be traced on one side of the church. Leake observes that the church, instead of facing to the east, as Greek churches usually do, faces south-eastward, towards the head of the port, which is likely to have been the aspect of the temple. No remains of columns have been found. A few paces north-east of the church is a large grotto in the rock, which appears to be the cave through which Hercules was supposed to have dragged Cepheus; but there is no appearance of any subterranean descent, as had been already remarked by Pausanias. In the neighbourhood there are several ancient cisterns and other remains of antiquity.

The remains of celebrated marble quarries in the Taenarion peninsula. (Strab. viii. p. 367.) Pliny describes the Taenarian marble as black (xxvi. 18. a. 29, 22. a. 483); but Sextus Empiricus (Pyrâ. Hypol. i. 130) speaks of a species that was white when broken to pieces, though it appeared yellow in the masses. Leaks inquired in vain for these quarries.

At the distance of 40 stadia, or 5 English miles, north of the isthmus of the Taenarion peninsula, was the town Taenarum or Tænaurus, subsequently called Caesepolis. (Kaurthia, Paus. iii. 16. § 9; Rha. Pt. ili. 16. § 9; Plin. iv. 11. § 27.) The town (or it is probably mentioned by Strab. viii. p. 360, under the corrupt form Kaurthia.) Contained a temple of Demeter and another of Aphrodite, the latter near the sea. The modern village of Kyparissia stands on the site of this town. Some ancient remains and inscriptions of the time of the Antonines and their successors have been found here. On the site of a small ruined church are two inscribed quadrangular ste¬laws, decorated with mouldings above and below. One of the inscriptions is a decree of the Taenari, and the other is by the community of the Elëtherio-Laconès (το δημοστ. τῶν Εληθεριακάλοχων). We have the testimony of Pausanias (iii. 21. § 7) that Caesepolis was one of the principal cities of the Laconians, and it appears from the above-mentioned inscription that the maritime Laco¬nians, when they were delivered from the Spartan yoke, formed a confederation and founded as their capital a city in the neighbourhood of the revered sanctuary of Poseidon. The place was called the New Town (Caesepolis); but, as we learn from the Laconian inscriptions with Quaglio, the town is called by its ancient name. For the inscriptions relating to Taenarum, see Böckh, Insocr. no. 1315—1317, 1321, 1329, 1389, 1393, 1483. (On the topography of the Taenarion peninsula, see Leake, Morea, vol. i. p. 290, seq.; Peloponnesiacs, p. 173, seq.; Boblaye, Rockersch, &c., p. 89, seq.; Curtius, Peloponnesiacs, vol. i. p. 277, seq.)

TAGAR (Ταγὰρα, or Ταγαρα, Ptol. ii. 3. § 15), a people on the eastern coast of Britannia Barba. In their territory was the promontory called Tagarapor (ib. § 5), now Kinnaird's Head. [T. H. D.]

TAGAE (Ταγάη, Polyb. x. 29. § 3), a town in the northern part of Parthia, situated in the defiles of a chain of mountains between the Araxes and the war against Araces. It has been conjectured by Porborg that it is the same place as Tæpe, mentioned by Strabo (xi. p. 506) as a royal palace in the adjacent province of Hyrcania; but this conjecture seems unnecessary. Perhaps it may be represented by the present Daregakhs. [V.]

TAGAE (Σταγαί, Peripl. M. Erpin. 511, ed. Müller; Ptol. vii. i. § 82), one of the two principal emporia of the interior of the Dacian, according to the author of the Periplus. It is not certain what modern town now represents this ancient site, but there is a fair presumption in favour of Deoghir, which was the seat of government down to A.D. 1293, and which is now a place of considerable importance. (Σταγαί, Herod. ii. p. 413; Mainert, v. p. 83; Ritter, Erdk. v. p. 513; Berghaus's Map.) Polesen, who places the town in Aria, probably copied from the author of the Peripatus. It may be remarked that the distance given between Barysasa (Berrado), Pazauca (Pyham), and Tagara (Deoghir), is not reconcilable with the actual position of these places. [V.]
TAGASTE. or TAGESTENSE OPP. (Plin. v. 4. a. 4.), a town of Numidia, whose spot is now marked by the ruins at Tafjil on the Oxeda Hamisa or Superast, a tributary of the river Mejarda. (Itin. Ant. p. 44.) Tagaste is particularly distinguished by having been the birthplace of St. Augustine. (Aug. Conf. ii. 3.)

TAGONIUS (Turdonus, Plut. Serv. 17), a tributary of the Varus, in Spain and in Hispania Tarraconensis, either the Tagon or Hanares. (Cf. Flores, Rep. Sagra. v. p. 40; Uberti, ii. pl. i. 389.) [T. H. D.]

TAGORI. [T. H. D.]

TAGRI (Térrico, Plut. iii. 5. § 25), a people of European Sarmatia, on the borders of Dacia, and probably identical with the Tagori of Pliny (vi. 7. a. 7.) and Jornandes (Get. 4).

TAGUS (Térrico, Plut. iii. 5. § 4), one of the principal rivers of Spain, being considerably larger than the Anas and having its sources between the Montes Orpesa and Idbuba, in the country of the Celtiberi. (Strab. iii. pp. 189, 192, 162.) After a tolerably straight course of upwards of 300 miles, it makes a sudden direction, falls into the Atlantic ocean below Olisipo, where it is 20 stadia broad, and capable of bearing the largest ships. It was navigable as far up as Moron for smaller vessels. According to Strabo, at flood tides it overflowed the country at its mouth for a circumference of 150 stadia. It was celebrated for its fish and oysters (Strab. ii.; Mart. x. 78), and likewise for its gold sand (Plineu. iv. 134, a. 28). The Tagus is navigable as far as Calatul. xx. 30; Or. Met. ii. 251, &c.; of which last, however, so little is now to be found that it hardly repays the amphibious sailors who earn a precarious living by seeking for it. (Ford's Hand-book of Spain, p. 487; Dillon, i. p. 237.)

The Tagonius alone, is named as a tributary. The Tagus is still called Taguba in Spain; Tegio in Portugal. (Cf. Liv. xxi. 5, xxvii. 19; Plin. iii. 3. a. 4, vili. 42. a. 67; Sen. Topast. 352, &c.) [T. H. D.]

TAHPIANIS or TEPHEPHENES (Jerem. xiii. 7, xiv. 1; Ezek. xxx. 18; 4. Teplexis, LXX.), is supposed to be the same place with the Daphne of Pelusium of the Greeks. It was the seat of a gar- rison under the native Egyptian army, offened by the king's favour to his Carian and Greek mercenaries, abandoned their country, and established themselves in the Regio Dodecaconos S. of Syene (Diodor. i. 67). From the Itineraries it appears that Daphne or Tahpanis was 16 Roman miles from Pelusium. Tah-daphné, lying nearly in a direct line towards the coast, is the latter. The town is supposed to be on the site of Tahpanis. (W. B. D.)

TALABRIGA (râ Tâlebriga, App. Hi. x. 73), a town of Lusitania, between Eminogeo and L авгорига. (Itin. Ant. p. 421; Plin. ii. 5. a. 7, iv. 21. a. 35.) Variously identified with Cacico, Aecreo, Talabriga de la Reyna, and Villarinho. [T. H. D.]

TALACHACA (Tâlachaca, Plut. x. 31, p. 508), one of the four principal towns of Huancavelica, discovered by Strabo. It is perhaps the same place that is called Tambrax by Polybius (x. 81). Its site cannot now be identified. [V.]

TALACOTY (Tâlachota, Plut. vii. 4. § 7), a port on the north-western side of the island of Taprobane or Ceylon. It is described as an emporium, and has, probably, derived its name from the promontory of Cery, which was opposite to it, on the mainland. It appears to have been also called Aesote (Assory). [V.]

TALADUSI (Tâladusus, Plut. iv. 3. § 27), a people in the north part of Mauretania Cæsariensis. [T. H. D.]

TALALUS MONS. [T. A.] TALAMINA (Téllamina, Plut. ii. 6. § 27), a town of the Sarrini in Gallacia. [T. H. D.]

TALARES (Tâlapers), a Molosian people of Epeirus, extinct in the time of Strabo (iv. 5. 454). [V.]

TALUAIRA (Tâlubara), a mountain fortress in Pontus to which Mithridates withdrew with his most precious treasures, which were afterwards found there by Lucullus. (Dion Cass. xxxiv. 14; Appian, Mithr. ii. 4.) As the place is not mentioned by other writers, some suppose it to have been the same as Bassura, the modern Trnoukal, which is perched on a steep isolated rock. (Hamil. Researches, vol. i. p. 360.) [L. S.]

TALBENDA (Tâlbydâ or Tâlbendâ), a town in the interior of Pisidia, noticed only by Ptolemy (v. 5. § 8.) [L. S.]

TALCETUM. [L. c., p. 108, b.]

TALIA (Itin. Ant. p. 219), or TALIATA (Not. Imp.), erroneously called Taulus by Ptolomy (iii. 3. § 4), Tabelis by the Geogr. Brev. (Q. XI. 5), and Talata in the Tab. Pent. A place in Upper Mesia, between Novas and Etgata. Variously identified with Tatalata, Gógerisâlah, and a place near Alt Fores. [T. H. D.]

TALICUS, a river of Scythia intra Ismaum. (Ann. Maro. xxiii. 6. § 63.) [T. H. D.]

TALAEUS or TALAEUS Minus (Beach, Corp. Inscr. Græc. vol. ii. p. 428; Hesychius s. v.), the station of Talus, the mythical man of bronze, and the guardian of the island of Crete. The well-known inscription which deplores the loss of Artemis, the chaste wife of Salvinas Menos, is now buried by the mass of earth and stones heaped up at the entrance of the stelechistic cave of Menes. The rock, grotto, memorial, and inscription commemorate the massacre of the Cretan Christians by the Mohammedans, is identified from the inscription with the spot where in ancient times human victims were presented before the statue of Talus. (Pashley, Travels, vol. i. pp. 124-138.) [E. B. S.]

TALLEN (Tâlên, Arrian, Jada. c. 29), a port of Gedrosia at which the fleet of Nearchus found a secure harbour. It is not clear what place now may be identified with it, and different geographers have held different opinions. Vincent (Voyage of Nearchus, i. p. 271) thinks it is the bay formed by the mouth of a small river called by Polymy Candiares or Hydracis (v. 8. § 8). It was probably one of the modern towns of Tis and Paros. (Cf. Gesellin, iii. p. 148.) [V.]

TALMIS. (It. Anton. p. 161; Olympiodor. op. Photium, p. 63, ed. Bekker), a town in the Regio Dodecaconos, S. of Philes, from which it was five days' journey distant, situated in lat. 28° 30' N., and consequently immediately under the tropic of Cancer. Talmis stood on a small hill to the west of the Nile, and is represented by the modern Kalahabche. The Libyan hills which rise immediately behind the town afforded an inexhaustible supply of materials for building, and the ancient quarries are still visible.
in their sides. The ruins of Talmis are of surpassing interest, and comparatively in good preservation, probably because, being excavated in the sandstone, they escaped mutilation or destruction by the Persians. The principal structure was a rock-temple at the foot of the hills, dedicated, as appears from a hieroglyphical and a Greek inscription, to a deity named Mandulis or Malala, a son of Isia. His mythical history is exhibited on bas-reliefs. But the sculptures at Talmis are of the highest interest, both as works of art and as historical monuments. Their execution is the work of various ages: some, as appears from the style, are of the rudest; some, ascending to a remote antiquity, others, as those in the temple of Mandulis, being of the best days of Egyptian art. The temple was founded by Amenophis II., was rebuilt by one of the Ptolemies, and repaired in the reign of the Cœsars, Augustus, Ceæsars, Augustus, Caligula, and Trajan. The subjects of these sculptures represent partly the triumphs of the Pharaohs, and partly the tributes exacted by them from the conquered. On one wall is the warrior in his chariot putting to flight bearded men in short garments, armed with bows and arrows, and a sickle-shaped knife or sword. In another compartment the conqueror is in the act of putting his captives to death. Another represents the body of a river bull, and, besides the captives, exhibits the spoils taken, e.g., lion-headed and lion-clawed chairs, knives, leaves, sandals, skins of various animals, &c. These sculptures illustrate also the natural history of S. Aethiopia. They contain figures of lions, antelopes, and bulls, greyhounds, giraffes, ostriches and monkeys. The giraffes and ostriches point clearly to a country south of the utmost limits of the animal kingdom, and seem to indicate warm, with the Garamantes and the kingdom of Bassoos. Herodotus (iii. 97) mentions ebony wood among the articles of tribute which every three years Aethiopia offered to the Persian king. Ebony as well as ivory, a product of the interior of Libya, appears on the walls of the temple of Mandulis. A coloured facsimile of these sculptures is displayed in one of the rooms of the British Museum. At a short distance from Talmis stood another temple of scarcely inferior interest, and the space between is covered with heaps of earth and fragments of pottery, mixed with human bones and bandages that have been steeped in bittermen—the evident traces of a large necropolis. At Talmis has been also discovered an inscription in the Greek language, supposed to be of the age of Diocletian, in which Sico, king of Aethiopia and Nubia, commemorates his victories over the Blemmyes. The wealth of Talmis, apparent in its sculptures, was doubtless in great measure owing to its position as a commercial station between Aegypt and Aethiopia, but partly also to the emerald mines of its neighborhood. In the 1st century A.D., the town and its neighborhood were occupied by the Blemmyes, who had a regular government, since they had chiefs of tribes (φαραγγοι) and were celebrated for their skill in divination. (Olympiodor. op. Phocis, p. 62.) [W. B. D.]

TALUBATH. (Talubath, Ptol. iv. 6. § 25), a town of Aegyptia in the NW. of Libya, next to the sea. It perhaps the modern Tafilalet. [T. H. D.]

TALUCTAE, a tribe of India extra Gangae, mentioned by Pliney (vi. 19. 23). They were probably seated beyond the Brahmaputra, in the mountains of Birmack. Sillig, in his recent edition of Pliney, has given the name as Thalutae. [V.]

TAMARA (Tamara, Ptol. ii. 3. § 30), a town of the Dumnufi, at the SW. extremity of British Romania, at the mouth of the Tamars. New Tamars near Plymouth. (Candem, p. 25.) [T. H. D.]

TAMARICO, a Gallican tribe on the river Tamara in Hispania Tarraconensis. (Plin. iv. 20. with Mela iii. 19.) According to Pliney (vi. 2. a. 18) there were certain noted springs in their territory, which are undoubtedly the same described by Florus (Constrabia, p. 4) near the hermitage of S. Juan de fuentes divinas. 12 Spanish miles E. of Leon, and 5 N. of Salamanca. (Cf. Uberti, ii. p. 302, note 80.) [T. H. D.]

Tamars (called by Ptol. iv. 6. § 2), a small river of Gallicia in Hispania Tarraconensis, which falls into the Atlantic ocean by the port of Eobra, between the Minius and the promontory of Nerium. (Mala, iii. 1.) Now the Tambre. [T. H. D.]

TAMARUS (Tamara), a river of Samaria, which falls into the Calor (Galore), about 5 miles above Bersabeum. Its name is known only from the Itinerary of Antoninus, which places a station, named &quot;super Tamaram flavium&quot; on the road from Beisanum to Equus Tucitius. (Itin. Asiat. p. 103.)

The line of this road is not very clear, but the modern name of the Tamarus leaves no doubt of the river meant. It rises in the mountains near Seprinum, only a few miles from Beisanum, and flows, following the general direction from N. to S. 39, and then flows to the Calor as above indicated. [K. H. B.]

TAMARUS (Tâmaros, Ptol. ii. 3. § 34), a small river on the S. coast of Britainia Romania, now the Tamur. [T. H. D.]

TAMASSUS (Tamaessos, Ptol. v. 14. § 6), called also Aemus or Aemus, by Pliney, v. 31. a. 35. Tamaes or Tamaes in Caesar's Poems, is indicated on a map of the island of Cyprus, by Echell, i. 3. p. 88, a town in the interior of the island of Cyprus, 29 miles SW. of Solos, and on the road from that place to Tremithus. It lay in a fruitful neighbourhood (Ovid, Met. x. 644), and in the vicinity of some extensive copper mines, which state of facts is confirmed by that used medicine (Strabo, xiv. p. 684). It is very probably the Tamaes (Cod. Od. i. 184; Nitax, ad loc; C. D. P., 1 p. 459), in which case it would appear to have been the principal market for the copper trade of that island in those early times. Hence some derive its name from the Phoenician word thatm或, signifying copper.

TAMBRA. [Talabocca.]

TAMESA or TAMESIS (Tamesa, Dion Cass. xz. 3), a river on the E. coast of Britainia Romania, on which Londinium lay; the Thames. (Ces. B. G. v. 11; Tac. Ann. xiv. 32.)

TAMESIS. [Tamesa.]

TAMIA (Tamaia, Ptol. ii. 3. § 13), a town of the Vaconas; on the E. coast of Britania Romania, probably on the coast situated at the mouth of the Phatnitic arm of the Nile. It is less celebrated in history than its representative, the modern Danvitia or Damietta, which, since the era of the Pharaohs, the Nile, has always been, until the rise of Alexandria in the present century, one of the most populous and commercial places in the Delta. Many antique columns and blocks from the ancient town are built into the walls of the mosques in the modern town. The present Damietta, indeed, does not occupy the site of Tamiathis, since, according to Abulphara, the original town of that name was destroyed, as
account of its exposed situation, and rebuilt higher up the Nile, about 5 miles further from the sea. The date of this change of position is fixed by Abulfeda in the year of the Hegira 648 (A.D. 1251).

W. B. D.

TANMA. (Tāmāna, Strab. xvi. p. 765; Steph. B. s. v. Tanma, Plin. vi. 28. a. 92, Géb. and E. Tāmāna, vii. § 37. Th. i. 14, Tāmāna, viii. 32. Ecd. Tawirān), a city of Arabia, and the chief town of the Cattapanies (Catabanies), according to Strabo, or of the Gebanias, according to Pliny. It is described by Pliny as a large commercial town with 65 temples, to which caravans from Gaza in Palestine resorted. It is probably Song, the present capital of the province.

TAMNUM, in Gallia, is placed by the Itineraries on a road from Burdigala (Bordeaux) to Medicina (Santum, a small town); but in the Table the name is written Lamum. The distance from Blavia or Blaviun (Blaye) to Tamnum is in xvi. in the Itiner., but the distance xxii. in the Table is nearer the truth, if Talmone is the site of Tamnum. Talmone is below Blaye on the right bank of the Girondes. [G. L.]

TAMUGADIS, a town in Numidia, on the E. side of Mount Auransis, and 14 miles N. of Lambezze. (It. Ant. pp. 34, 40; Thamugas, Tab. Ptole. It still remains the name of Temugadi. (Bruce, Lap. B. b. v. 317. B. Ecd. p. 151 [T. H. D.]).

TAMYNAE (Tāmūn, Strab. s. a. tolis Tāmūn, Steph. B. s. c. 1 Ecr. Tawuras, Tawrus; e. Tawrus, e. Tāmūn), a town of Euobiaca in the territory of Eretria, at the foot of Mt. Cotylaium, with a temple of Apollo, said to have been built by Amadas. (Strab. x. p. 447; Steph. B. s. c. Tawurus, Korinthus.) It was taken by the Persians, when they attacked Eretria in a. c. 480 (Herod. vii. 701.), but it is chiefly memorable for the victory which the Athenians, under Phocion, gained here over Callias of Chalcis, n. c. 350. (Aesch. C. Ctes. §§ 85—88, de Fals. Leg. 180; Dem. de Pac. 5; Plut. Phoc. 12.) Leake places Tamyneas at the village of Glymnoi, at the foot of a high mountain, which is supposed to be the ancient Cotylaium (Ancient Greece, vol. ii. p. 439); but Ulrich regards Aradus as Tamyneas; there are several ancient remains, as the site of Tamyneas. (Rheinisches Museum, for 1847. p. 512.)

TAMYRACA (Tāmūrakā, Plut. iii. 5. § 8, viii. 10. § 3), a town and promontory of Eumenia Sarmatia in the neighbourhood of a lake (Arrian, Per. F. Euas. p. 20), and in the innermost part of the gulf of Carcius, now engulfed up of Achmeaish or Pore. kop. Hence, according to Strabo, the Sinus Carcinites was also called the gulf of Tamyraice (vii. p. 308). But the attempts to determine the site of the town are unavailing. Some, indeed, have doubted its existence, as it is mentioned only by Pausanias. (Coh. Neut., De Rebus Fertilitatis, Mesokaloe, p. 375; Uezz., ii. 2. p. 457; Gall. Geogr. M. iii. p. 192.)

TAMYRACES SINUS. [CARCINIA; TAM- RACA.] TAMYRAS or DAMURAS (Tāmūrās, Strab. xvi. p. 756; Δαμυράς, Polyb. vi. 68.), a river of Phoca- nia between Sidon and Beyrus, the modern Nābed-Dībāl (Robinson, Bibl. Res. vol. ii. p. 488, 2nd ed.). [Comp. Leontes]

TANAGER or TANAGRUS (Tanagros), a river of Lucania, a tributary of the Silarus. It rises in the mountains near Lago Negro, flows for about 30 miles in a NNE. direction, through a broad and level upland valley called the Valla di Diano, till near La Polis it sinks into the earth, and emerges again through a cavern at a place thence called La Pertusa. This peculiarity is mentioned by Pliny, who calls it "favus in Athine campo," without mentioning its name. (Plin. ii. 103. a. 106, with Harduin's note); but it is known as ancient river called Virgil, who notices it in connection with Mount Albarnus, which rises immediately to the W. of it, and the epithet "siccus" which it applies to it ("scil. ripa Tanagri") doubtless refers to this same peculiarity. (Virg. Georg. iii. 151; Serv. ad loc.; Vih. Secq. p. 19.) There is no doubt, also, that in the upper part of its course Calor or Calore, while in the lower part it assumes the name of Tanagro or Negro. This part of the route, however, was very confused.

E. H. B.

TANAGRA (Tānagras; Eth. Tànapápios): the territory Tànapála, Paus. ix. 22. § 1, and Tànapalosch or Tànapurpos, Strab. ix. p. 404: Adj. Tànapápios: Grándulas or Grándila, a town of the Boiotians, situated at the bank of the Aeuspes, in a fertile plain, at the distance of 130 stades from Oropus and 300 from Platæas. (Dioseach. Stat. Gr. pp. 12. 14. ed. Hudson.) Several ancient writers identified Tanagra with the Homenian Graes (Paus. Hom. II. ii. 498; Lycoophr. 644); but others supposed them to be distinct places, and Aristotles regarded Oropus as the ancient Graes. (Steph. B. s. v. Tànapos; Strab. ix. p. 404.) It is possible, as Leake has remarked, that Tanagra, sometimes written Tanagrea, may be connected with the ancient name Gra, Tana, being an Aeolic suffix, and that the modern name Gràmida or Gràmila may retain traces of the Homenian name. Tanagra was also called Poemandra, and its territory Poemandria, from the fertile meadow which surrounded the city. (Steph. B. s. c.; Strab. ix. p. 404.) The inhabitants of Tanagra are said to have been the Gephyraeis, who came from Phocis with Cadmus, and from thence emigrated to Athens. (Herod. v. 57; Strab. ix. p. 404.) From its vicinity to Attica the territory of Tanagra was the scene of more than one battle. In b. c. 457 the Lacedaemonians, on their return from an expedition to Doris, took up a position at Tanagra, near the borders of Attica, with the view of assisting the oligarchical party at Athens to overthrow the democracy. The Athenians, with a thousand Argives and some Thebassian horse, crossed Mount Parnes and advanced against the Lacedaemonians. Both sides fought with great bravery; but the Lacedaemonians were chiefly defeated through the treacherous desertion of the Thebassians in the very heat of the engagement. (Thuc. i. 107, 108; Dion. xi. 80.) At the beginning of the following year (b. c. 456), and only sixty-two years after their defeat at Tanagra, the Athenians under Alybantes again invaded Boeotia, and gained at Oenophyta, in the territory of Tanagra, a brilliant and decisive victory over the Boeotians, which made them masters of the whole country. The walls of Tanagra were now raised to the ground. (Thuc. i. 108; Dion. xi. 81, 82.) In b. c. 426 the Athenians made an incursion into the territory of Tanagra, and...
on their return defeated the Tanagraeans and Bosto-
tians. (Thuc. iii. 91.) Disdaining, who visited
Tanagra in the time of Alexander, says that the
city stands on a rugged and lofty height, and has a white
chalky appearance. The houses are adorned with
handsome portraits and encaustic paintings. The
surrounding country does not grow much corn, but
produces the best wine in Boeotia. Diodorus adds
that the inhabitants are wealthy but frugal, being for
the most part landholders, not manufacturers; and
he praises them for their justice, good faith, and hos-
pitality. (De Stato Graec. p. 12.) In the time of
Augustus, Tanagra and Thebes were the two most
prosperous cities in Boeotia. (Strab. ix. p. 403.)
Tanagra is called by Pliny (iv. 7. a. 12) a free
state; it is mentioned by Polybius (iii. 15. § 20); and
it continued to flourish in the sixth century.
(Hieroc. p. 645.) Its public buildings are described
at some length by Pausanias (ix. 20. § 3, seq.).
The principal temple was that of Dionysus, which
contained a celebrated statue of Parian marble, by
Calaris, and a remarkable Triton. Near it were
temples of Theseus, Aphrodite and Apollo, and two of
Hermes and Bacchus, worthies first SF. Criophorns,
and in the other as Promachus. Near the
latter was the theatre, and probably at no great
distance the gymnasium, which contained a picture
of Corinna, who was a native of Tanagra. There
was also a monument of this poetess in a conspicuous
part of the city. Pausanias remarks as a peculiarity
in Tanagra, that all their sacred buildings were
placed by themselves, as at Thebes. (Strab. ix.
22. § 2.) He likewise notices (ix. 22. § 4) that Tanagra was famous for its breed of
fighting-cocks, a circumstance which is mentioned by
other writers. (Varr. de Rer. Rer. iii. 9. § 6; Hesych.
a. u. Kahleirou; Suidas, a. v. Tanagraos eleutero-
plous.) Tanagra possessed a considerable territory;
and Sosonias, a town in Boeotia, owes its name to
four villages belonging to it, Elion or Helenon, Harmo, Mycanae, and Pharae. (Pherec. Flin. iv. 7. a. 12.)

The ruins of Tanagra are situated at an unin-
habited spot, called Grizandela or Grizmelia, situated
3 miles south of the village of Simintari. The
site is a large hill nearly circular, rising from the
north bank of the Asopus. The upper part of the
site is rocky and abrupt, looking down upon the town
beneath; and it was probably upon this upper height
that the sacred edifice stood apart from the other
buildings of the town. The walls of the city which
embraced a circuit of about two miles, may still be
traced, but they are a mere heap of ruins. About
100 yards below the height already described are the
remains of the theatre, hollowed out of the slope. On
the terrace below the theatre is the N.E. are the
foundations of a public building, formed of marble of
a very dark color with a green cast. The ground
is thickly strewed in every direction with remains of
earthware, bespeaking the existence of a numerous
population in former times. (Leake, Northern
Greece, vol. ii. p. 454, seq.; Wordsworth, Athens and
Attica, p. 14, seq.; comp. K. O. Müller, Orchomenos,
p. 20.)

TANAIAS (Ταναίας, Prov. iii. 5. § 14, v. 9. §§ 1, &c.), a famous river, which in the course of time
was universally assumed as the boundary between
Europe and Asia. (Strab. vii. 310, xi. 490; Meis.
1. 3; Scll. p. 80, &c.) The older writers of an-
other time, however, state that it rose from the
bread. iv. 57; Ephor. ap. Anon. Per. P. E. E. p. 4,
which is really the case, its source being in the
island Ofiso, in the government of Touda; whilst later
writers held that it had its sources either in the
Caucasus (Strab. xi. 493; Ammian. xxxii. 8), or
the Rhipean mountains. (Meis, l. 19; Logc.
272; Procop. E. G. iv. 6, &c.) The last of
the statements is generally accepted; but there was likewise a fourth which made it a branch of the
later (Strab. l. c.). Whilst Strabo, however,
adduces these different opinions, he himself holds
that its source was entirely unknown (ii. 107). It
is represented as flowing so rapid a stream that
it never froths. (Meis, l. c.; cf. Nearchus, Diospi.
ii. 46, ii. 51; and Herod. iii. 155) Thence it flowed
SW. direction; and after receiving the Byrgea (or
Syrris) as a tributary, emptied itself into the Pala
Macedon (Sea of Asia) by two mouths. (Hauv.
iv. 100.) These mouths, which are at the most
northern point of the Palaus, Strabo places at the
distance of 60 stadia from one another (v. 310).
between the island of Thasos and Seriphos. (Orb.
Graec. p. 337; comp. Strab. xii. 14.) It takes them only 7 stadia distant; but however, the Dan has 13 mouths. (Clarke, Trac.
p. 423.) The etymology of the name is discussed
by Pintarch (de Flam. 14) and Eustathius (l. c.);
but its true derivation is from the Scythian word
Dom or Dm, signifying water, which occurs in the
names of other rivers, as Dambius, Erdianes, &c.
(Forsiger, Handb. der Alt. G. p. 163.) The Tanais is frequently alluded to by the Latin
poets. (Hor. Od. iii. 10. 1; Virg. G. iv. 517; Ov.
Eum. Pos. iv. 10, 55, &c.) Clarke (Travels i.
pp. 339, 448, note) would identify it with the
Danais, from the similarity of the name, an hypo-
thesis also accepted by Linncr (Scythians, p. 64);
but he confesses it would be a doubt that he could be
identified with the Dom. (T. E. B.)
TANAIAS (Todar, Prov. iii. 5. § 26, viii. 18. § 3),
a town of Asiatic Sarmatia, lying on the more southern
mouth and between both mouths of the river of the
same name. It may also be described as situated
at the northernmost point of the Palaus, Macedon, and
not far from the sea. It was a flourishing colony of
the Milesians, enjoying an extensive commerce, and
being the principal market of the surrounding tribes,
both of Europe and Asia, who here bartered slaves
and skins for the wine, apparel, and other articles of
more civilised nations. (Strab. xii. p. 453.) The in-
habitants soon reduced a considerable part of the
neighbouring coast to subjection, but were in turn
themselves crushed by the kings of the Sarmatian
(Todar, xvii. 510, xi. p. 495). An attempt to rega
their independence only ended in the destruction of
their city by Polemon I. (Id. p. 493), a little before the
time when Strabo wrote. Pliny (vii. 1. 7) speaks
of Tanais as no longer existing in his time; but it
appears to have been subsequently restored (Proc.
v. 638), though it cannot pretend to possess its
former prosperity. (Clarke i. 415) could dis-
cover no trace of it, nor even a probable site; but its
ruins are said to exist near the modern Nestuspolis
TANAITAE.

TANAITAE (Tanaïr, Ptol. iii. 5. § 24), a people of European Sarmatia, dwelling N.E. of the Roxolanis, and between them and the Tannais. [T. H. D.]

TANARUS (Tamaro), a river of Liguria, the most important of all the southern tributaries of the Tiber. It rises in the Macra, near Cero (Ceba), flows at first due N., receives near Chervaco the waters of the Sturo, a stream as considerable as itself, then turns to the N.E., passes within a few miles of Pollentia (Pollentia), flows under the walls of Alba Pompeia and Asta (Aosta), and discharges its waters into the Po about 15 miles below Valenza (Forum Fulvius). Its bed contains many considerable tributaries besides the Sturo already mentioned, of which the most important is the Bormida, the ancient name of which has not been preserved to us; but the Ora, a minor stream which falls into it a few miles above its junction with the Tamaro, is evidently the river Urbe, mentioned by Valerius Maximus (A.D. 185), the name of which had given rise to an ambiguous topography, that had misled the Gothic king Alaric. The Bellis, which falls into the Tamaro a few miles above the Bormida, has been identified with the Ferris of the Tabula; but the names of rivers given in that document in this part of Italy are so corrupt, and their positions so strangely misplaced, that it is idle to attempt their determination. Though the Tanarus is one of the most important rivers of Northern Italy, its name is not mentioned by any of the geographers except Pliny; nor does it occur in history until long after the fall of the Western Empire. (Pliin. iii. 16. a. 20; P. Dia. Hist. Lang. vi. 58; E. H. B.)

TANATIS, according to Solinus (Tales 62) an island in the neighbourhood of Britain. It is undoubtedly the same which Beda (Hist. Eccl. i. 25) calls Tanatos, and which still bears the name of Thanet. [T. H. D.]

TANIS. [Tales.]

TANUS. [Arno, Vol. I. p. 201, a.]

TANNETUM or TANNETUM (Tannat, Ptol. Eth. Tabanatans, Pliin. : S. Iovio), a small town of Gallia Cispadana, on the Via Ascula, between Regium Lepidum and Parma, and distant 10 miles from the former and 8 from the latter city. (Hist. Ant. p. 287; Hist. Hier. p. 616; Tab. Peut.) It is mentioned in history before the Roman conquest of this part of Italy, as a Gallic ville. In which the prætor L. Manlius retired after his defeat by the Boii in a. 218, and where he was surrounded and besieged by that people. (Pliin. iii. 40; Liv. xxi. 25.) Its name is not again noticed in history, but it is mentioned both by Pliny and Ptolemy as a municipal town of Gallia Cispadana, though it appears that it never rose to be a place of importance. (Pliin. iii. 15. a. 20; Ptol. iii. l. § 46; Phileon, Macrob. 1.) Livy calls the Gallia town "vicus propinquus," an expression which would lead to the erroneous idea of its position; for we learn from the Itineraries that it certainly stood on the Via Ascula, at a distance of more than 10 miles from the Padus. The site is still occupied by a large village, which is now called, from the name of its principal church, Saint Iurio; but a hamlet or village about half a mile to the N. still retains the name of Taneto. It is distant about 3 miles from the river Enas, the Nicla of Pliy (ii. 16. a. 20), which flows into the Po, about 12 miles from the point where it crosses the Asculian Way. [E. H. B.]

TANIS (Târos, Herod. ii. 166; Strab. xvii. p. 802; Ptol. iv. 5. § 52; the Zonan of the Hebrews, Num. xiii. 23; the Coptic Tan or Athenemes, and the modern Samsa), was a city of Lower Aegypt, situated, in lat. 30° 59', on the Tanitic arm of the Nile. [Nicola, Ostium Tanitissimum.] It was the capital of the Tanitit Nome. Although the name of Tanis does not appear in Egyptian annals earlier than the xxi-st dynasty, which consisted of 21 Tanite kings, it had long previously been among the most important cities of the Delta. The branch of the Nile on which it stood was, with the exception of the Pelusiac, the most easterly, and the nearest to Palestine and Arabia. It is described in the Book of Numbers (X. c.) as founded only seven years later than Hbron; and Hbron, being extant in the time of Abraham, was one of the oldest towns in Palestine. Tanis owed its importance partly to its vicinity to the sea, and partly to its situation among the Deltaic marshes. It probably was never occupied by the Greeks, but, during the Ptolemies, was given up to the exiled kings and nobles of Memphis. It was a place of strength during the wars of the early kings of the New Monarchy—the xvith dynasty— with the shepherds; and when the Aegyptians, in their turn, invaded Western Asia, the position of Tanis became of the more value to them. After Aegypt became a marine power, however, with Cyprus and Phoenicia, a city at no great distance from the coast would be indispensable for its naval armaments. To these purposes Tanis was better adapted than the more exposed and easterly Pelusian. The eastern arms of the Nile were the first that silted up, and the Pelusian mouth of the river was at a very early period too shallow for ships of war. The greatness of Tanis is attested in many passages of the Hebrew writers. In the 78th Psalm the wonders that attended the departure of the Israelites from Egypt are said to have been "wrought in the plain of Zaan." This Psalm, indeed, is somewhat later than David (a. c. 1055—1015); but the provision made by Tanis in the capital of that Pharaoh who oppressed the Hebrew people. In the age of Isaiah (ix. 11, foll.), about 268 years later, Tanis was still reckoned the capital of the Delta, since the prophet speaks of the princes of Zoon and the princes of Noph (Memphis) as equivalent to the nobles of Aegypt. Again, Isaiah (xxv. 4) describes the ambassadors who were sent to Aegypt to form an alliance with its king as repairing to Zon and Hanoe, or Harsaleopolis; and the desolation of Zoon is threatened by Ezekiel; as the consequence of Nebuchadnezzar's invasion. Tanis probably declined as Sais and Memphis rose into importance; yet twenty years before the Christian era it was still a large town (Strab. xvii. p. 802); nor did it shrink into insignificance until nearly 80 A.D. (Joseph. B. Jud. iv. 11, § 4.) Its linen manufacture probably long sustained it. The marshy grounds in its environs were well suited to the cultivation of flax; and Pliny (xx. 1) speaks of the Tanitic linen as among the finest in Aegypt. No city in the Delta presents so many monuments of interest as Tanis. The extensive plain of Sams is indeed thinly inhabited, and no village exists in the immediate vicinity of the buried city. A canal passes through, without being able to fertilize, the field of Zoan, and wild beasts...
and marsh fevers prevent all but a few fisherfolk from inhabiting it. The mounds which cover the site are very high and of great extent, being upwards of a mile from north to south, and nearly three quarters of a mile from east to west. The arm in which the sacred enclosure of the temple of Ptah stood is about 1500 feet in length by 1250 broad. The enclosure, which is of crude brick, is 1000 feet long and about 700 wide. A gateway of granite or fine grained limestone, with a bearing of 39° 30', bears the name of Ramses the Great, stands on the northern side of this enclosure. The numerous obelisks and the greater part of the sculptures of the temple were contributed by Ramses. His name is also inscribed on two granite columns outside the enclosure, and apparently unconnected with the temple. Though in a very ruinous condition, the fragments of walls, columns, and obelisks sufficiently attest the former splendour of this building. The architecture is generally in the best style of Assyrian art, and the beauty of the lotus-bud and palm capitals of the columns is much celebrated by travellers. Among the deities worshipped at Tanis were Ptah, Isheru, Re, Horus, etc. The Pharaohs who raised these monuments were of various dynasties, ranging from the kings of the xviiith dynasty to the Aethiopian Tirhakah. The numerous remains of glass and pottery found here, and the huge mounds of brick, prove that the civil portions of Tanis were commemorated in extant and post-Christian times. The modern village of Sen contains of mere huts. Early in the present century an attempt was made to establishイト
works there; but they have been long abandoned; and the only occupation of the few inhabitants of this once flourishing city is fishing. North of the town, and between it and the coast of the Mediterranean, was the lake Tanis, the present Menouha. (Wilkinson, _Mod. Egypt. and Thebes_, vol. i. pp. 407, 449, foll.; Kenrick, _Ancient Egypt_, vol. ii. p. 341.)

TA'OCE (Tâne, Arrian, I. c. 39; Strab. xv. p. 798), a town or fortress of the district of Taxocon, in Persis. It was, according to Strabo, the seat of one of the three treasuries of the kings of Persia. It is not certain from Arrian's statement whether he means the town or the district, but probably the former. The town appears to have been placed near the river Granis. Polony speaks of a synodary and a town of this name (vi. 4. §§ 2 and 7). It is probable that it is the same place as that called by Al-Edrisi, Towe or Towi (ii. p. 391, &c.). Where Dionysius (1069), enumerating the three palaces, speaks of the Towi, we ought most likely to read Tusc or Tuxor, which corresponds to the name of this district. The Granis is the river of Abuech. (GRANIS. [VJ.)
TA'OCHI (Tâxax), a tribe in the interior of Pontus (Steph. B. s. v.), which is frequently noticed by Xenophon in the Anatolia (iv. 4. § 18). They lived in mountain fastnesses in which they kept all their possessions (iv. 7. § 1, comp. 6. § 5, 15. § 17). They occupied the country near the frontiers of Armenia. (L. S.) TAPANITAR (Tavanaacrtes, Ptol. iv. 5. § 21), a people in the interior of Marmarica. [T. B. D.]
TAPE. [TAGAR.]
TAPPUAH.

A town-hall, and public baths. (Procop. de Aedif. vi. 1.) Neuter Alexandria was a smaller town of this name. (Tawwurris wa-nawwir At-taswurri, Steph. Byz. in loc. ad vitam Alex., 84, in the textual edition.)

TAPPUAH or BETH-TAPPUAH, a city in Palestine, upon the mountains of Judah, not far from Hebron, which Robinson identifies with the ancient village of Teflah, lying in the midst of olive-groves and vineyards. (Josh. xv. 53; Robinson, Bibl. Res. vol. ii. p. 71, 2nd ed.) There was some last, but near, a certain town called Emron; the exact position of which is somewhat uncertain, and in which according to the text of the ancient manuscripts (Num. vii. 83), and also according to the LXX., and consequently also according to the Vulgate, the Israelites were not pitched, but which of these was the place conquered by Joshua, cannot be determined. (Josh. xii. 17.)

TAPPROBANE (Tapprobane, Strab. i. 63, xv. 690, Sax.; Steph. B. s. V.; Ptol. vi. 7, 4; Plin. vi. 22, s. 24; Mela, iii. 77; Or. ex Pont. i. 5, 80), a very large island, now Ceylon. It is situated to the SE. of the peninsula of Hindostan, and is all but joined by strait to the continent by a reef now called Adam's Bridge, and by an island called Rammee or Ramiscerum Cor, the Kāppu of Poloten (vii. i. § 11) and the Insula Solis of Pliny (vi. 22, s. 24). (Comp. Duncan, As. Res. v. p. 39; Ritter, Erdk. vi. p. 63.)

Taprobane was not known to the writers of classical antiquity before the time of Alexander the Great, the first allusion to the island is in the time of Ptolemy, when it lay in the West subsequent to his invasion of the Punjab, though often correct as to its natural productions, are singularly erroneous as to its position, its size, and its shape. Thus Oenocricetus estimates it at 5000 stadia, though whether this number implies length, breadth, or circumference, is not stated by Strabo (xv. p. 690). In the time of Ptolemy, however, Strabo reckons its circumference as being about 660 miles. (See Map, and Memoir of Ceylon.) It adds that it was twenty days' sail from the continent—the ships being badly constructed and unfit for sailing; a view remarkably confirmed by Pliny, who notices the change in the length of the voyage owing to the improved kind of vessel, and the shallower character of the intervening strait (vi. 22, s. 24). Eratothenes reduces the distance to a navigation of seven days—the same time as Pliny states (l. c.); but this is far too great (Strab. xv. p. 691), as it is really little more than 50 miles from its nearest shore to the mainland of Hindostan. (Vincent, Voy. of Nearchus, l. p. 495; Boyd, in Ind. Ann. Regist. 1799.) Eratothenes in the time of Justin, not only regards it as an island, for he extends it 8000 stadia in the direction of Africa (Strab. L. c.), while the author of the Peripitus M. Erythr. makes it reach almost to the coast of Azania (c. 61, ed. Muller)—an error which probably has led to that of Edrisi, who has confounded C. Comoris with Madagascar, and in his map has even placed this island to the E. of Madagascar. Strabo supposes that Ceylon is not less than Britain (ii. p. 130), and Ptolemy gives it a length of more than 1000 miles, and a breadth of more than 700 (i. 14. § 9, viii. 28. § 3). (Compare this with the statement of Marco Polo, which is, as to circumference, identical with Ptolemy, L. c.; and Caesar Frederick, ii. p. 280.)

The history of ancient Ceylon falls naturally into three heads: i. What may be gathered from the writers who followed the march of Alexander. 2. What we may learn from the Roman writers. 3. What may be obtained from the Byzantines.

Of the times preceding the invasion of India by Alexander, we have here no local history, yet it may be inferred from Pliny that some report of its existence had reached the West, where he states that it had long been the opinion that Taprobane was another world, and bore the name of Antichthons, but that it was determined to be an island at the time of Cleomenes, and Alexander (Strab. xv. 24): while it is not impossible that Herodotus may have heard some tradition on the subject, since he states that cinnamon is produced in those countries in which Dionysus was brought up (iii. 111); from which passage, however, it cannot be determined whether the true cinnamon, that is the bark of the shrub, is intended, or some kind of the long-drug (Acorus calamus). To the first class of writers belong Onecrictus, the companion of Alexander, Megasthenes and Daimachus, who were sent as ambassadors by Seleucus to Sandrocottus (Chandragupta) and his son Amritochates (Amritogathas), from whose memorials almost all that is preserved in Strabo and in the earlier portion of the notice in Pliny has been taken. There is no reason to suppose that either Onecrictus or Megasthenes themselves visited this island; they probably collected, while in India, the narratives they subsequently compiled.

The second class of writers are of the period when the vast commerce of Alexandria had extended to India subsequent to the death of Strabo, and the Peripitus is probably the first of them. (ii. d. 24.) (Gibb, Persia, Trans. of the Royal Geographical Society, vol. iii. p. 348.) Previous to this period, some few ships may have reached India from Egypt; but, from Strabo's own statement, they appear to have been those only of private individuals (l. c.). Pliny, the writer of the Peripitus of the Erythrean Sea, Marcin of Herculane, Mela, and Ptolemy, belong to this class, and, in the fuller of the narratives which show a clear notion of much additional knowledge had been acquired during the extension of the power of the early emperors of Rome.

Lastly, under the head of Byzantine writers, we have the remarkable account of the island in Cosmas Indicopleustes, the latest which belongs to the period of ancient or classical history.

The most important notice is that of Pliny (l. c.), who states that ambassadors from the island were received at Rome by the emperor Claudius, through the instrumentality of the freedman of a certain Annius Plaemus, who, after having been driven out of his course upon the island, remained there six months, and became intimate with the people and their rulers. He states that Plaemus landed at a port he calls Hippurus, which may be identified with the modern Kudremu, which means the same in Sanscrit; and that the name of the king was Rachi, evidently the Indian Rājāḥ; he adds that the island contained 500 towns, the chief of which was called Paleasimundus, and a vast lake Megiaba, from which flowed two rivers, one called Cydara (Kundara or Kadambo in the Anebu, now Aripo). It is not possible accurately to determine what modern place is to be identified with Megiaba, but the Mahasena speaks of enormous works of this nature attributed to Vasabha and other early kings. (Mak. pp. 65, 210, 221, 213.) Pliny adds some general facts, which are equally coincident with the truth; and remarks on the richness of the island in precious stones and metals, and on the fineness of the climate, which extended the life of man beyond its usual limits. We may mention also, that Diodorus tells a remarkable story, which has been generally held to refer to Ceylon, though this island cannot be traced. According to him Iambolus, the son of a merchant, on his way to the spice countries, was taken prisoner.
by the Asthlopia, and, after a time, with one other companion, placed in a boat and left to his fate. After this a large island, rich in all kinds of natural productions and 5000 stadia round (στρογγυλὴ μὲν ἐπαρχουσαν τὸν εἰχθμον.).

Itambula stayed there seven years, and thence went to Palibochara, where he was well received by the king, who is said to have been ἀλάλας (Diod. ii. 55, &c.). That the details of this voyage are fabulous no one will dispute, but the narrative is probably founded on fact, and points to an early intercourse between the shores of Eastern Africa and India.

The fullest and by far the most interesting account of Ceylon, is that preserved by Cosmas Indicopleustes, which was published by Montfaucon (Coll. Nov. Piar. ii. p. 358). Cosmas, who flourished in the reign of Akbar, and was also called 335; states that he obtained his information from a Greek named So-patras, whom he met at Adulis. According to this writer, the Taprobana of the Greeks is the Seldidba of the Hindus, an island lying beyond the Pepper Coast, or Malabar, and having near it a great number of small islands (i.e. the Maldives). He reckons it about 2000 stadia in breadth and 400 in length; he deduces from a native measure called Gescura (still said to be known in the island, and the same as the Tamil maliq, Vincent, ii. p. 506). There were, at the time he received his information, two kings in the island, one the possessor of the Hysynt (= the island of the mountain districts which abound in precious stones), and the other of the part of the coast, where in later times the Arubians, Portuguese, Dutch, and English, have in succession established factories. A Christian church, he adds, was established there Χριστιανὸς Πατριάρχη Χριστιανὸς, with a priest and deacon ordained in Persia. There is no doubt that those were Nestorians, whose Catholics resided at Onsiphon, and who, on the Malabar coast, and in later times the Archbishop of St. Thomas. He determines the position of Seldidba, by stating that it is as far from it to China, as from the Persian Gulf to the island (p. 138). Again, he says, which is less correct, that Seldidba is five days' sail from the continent; and that on the continent is a place named Marallo (Μαραλλό) (= Malabar), which produced precious stones, and where it was said that the king of Ceylon sells elephants for their height; and that in India elephants are trained for war, while in Africa they are captured for their ivory. Horses imported from Persia pay no tax. It is remarkable that this notice of the elephants is in strict accordance with that of Aelian, who asserts that they were bred in Seldidba and transported to large native vessels to the opposite continent, and sold to the king of Calingas (Hist. Anim. xxvi. 18). Pliny (i. c.), on the authority of Onesicritus, affirms that larger and more warlike elephants are reared in this island than anywhere else in India, and that the hunting of them was a constant sport: and Plutarch places under the Muses M. Aemilius' Felix (his i.e. Philip the Arab) in the exact position in which they were, till lately, most abundant (vii. 4. § 8). The testimony of all modern travellers on the subject of the Ceylon elephant is, that those bearing great trunks, and therefore valuable for their ivory, are extremely rare in the island. (Compare also Dionys. Peripl. who tells Ceylon as being ναυαγεσθενεῖς ἐκθέαμεν: Alex. Lyc. in Steph. B. E. who speaks of ἐκθέαμεν ἐκθέαμεν as the product of the island; Solin. c. 56; and Teiresias Chel. viii. Hist. 315.)

Cosmas concludes his remarkable story with a notice of a conference between the king of Ceylon and Sopatras, in which the latter convinced the king that in the same year (571) Lydia had been made a subject by exhibiting some gold coins of Byzantium. It confirms the veracity of the narrator that we know from other sources that the Sassanian princes of the sixth century had only silver money, while at the capital of the Eastern Empire gold coin was not rare. There were many temples in the island, one of them, a man of the east coast, and poems of the empresses. Few islands have borne, at different times, so large a number of names: as many of these have considerable interest, we shall notice them in succession.

The first, as we have stated, by which it was known to the Greeks was Taprobane. Several explanations have been given of this name; the best is that of the island, for the narrative is probably founded on fact, and points to an early intercourse between the shores of Eastern Africa and India. The fullest and by far the most interesting account of Ceylon, is that preserved by Cosmas Indicopleustes, which was published by Montfaucon (Coll. Nov. Piar. ii. p. 358). Cosmas, who flourished in the reign of Akbar, and was also called 335; states that he obtained his information from a Greek named Sopatras, whom he met at Adulis. According to this writer, the Taprobane of the Greeks is the Seldidba of the Hindus, an island lying beyond the Pepper Coast, or Malabar, and having near it a great number of small islands (i.e. the Maldives). He reckons it about 2000 stadia in breadth and 400 in length; he deduces from a native measure called Gescura (still said to be known in the island, and the same as the Tamil maliq, Vincent, ii. p. 506). There were, at the time he received his information, two kings in the island, one the possessor of the Hysynt (i.e. the island of the mountain districts which abound in precious stones), and the other of the part of the coast, where in later times the Arubians, Portuguese, Dutch, and English, have in succession established factories. A Christian church, he adds, was established there Χριστιανὸς Πατριάρχη Χριστιανὸς, with a priest and deacon ordained in Persia. There is no doubt that those were Nestorians, whose Catholics resided at Onsiphon, and who, on the Malabar coast, and in later times the Archbishop of St. Thomas. He determines the position of Seldidba, by stating that it is as far from it to China, as from the Persian Gulf to the island (p. 138). Again, he says, which is less correct, that Seldidba is five days' sail from the continent; and that on the continent is a place named Marallo (Μαραλλό) (= Malabar), which produced precious stones, and where it was said that the king of Ceylon sells elephants for their height; and that in India elephants are trained for war, while in Africa they are captured for their ivory. Horses imported from Persia pay no tax. It is remarkable that this notice of the elephants is in strict accordance with that of Aelian, who asserts that they were bred in Seldidba and transported to large native vessels to the opposite continent, and sold to the king of Calingas (Hist. TAPPS FLUVIUS. [Tappis.]

TAPPS FLUVIUS. [Tappis.]

TAPURIA (Ταπούρια), a town of uncertain site in Armenia Minor, is mentioned only by Ptolemy (v. 7. § 3). [L. S.]

TAPURAEI (Ταπούραι, Ptol. vi. 14. §§ 12, 13), a tribe in Scythia Intra Imaum. [T. H. D.]

TAPURU (Ταπούριος or Ταπούριος, Strab. xi. p. 592; Plin. vi. 16. a. 18), a tribe whose name and probable habitations appear, at different periods of history, to have been extended along a wide space of country from Armenia to the eastern side of the Oxus. Strabo places them alongside the Caspian Gates and Rhages, in Parthia, (xi. p. 514), or between the Derbices and Hyrcani (conjectured to be in parallelism with the Amardi and other people along the southern shores of the Caspian (xi. p. 529); in which last view Curtius (vi. 4. § 24, viii. 1. § 13), Dionysius (de Situ Orbis, 733), and Pliny (vi. 16. a. 18) may be considered to coincide. Ptolemy in one place reckons them among the tribes of Media (vi. 2. § 6), and in another ascribes them to the bituriges (vi. 2. § 3), their territory being written with some differences in different authors; thus Ταπούριος and Ταπούριος occur in Strabo; Tauri in Pliny and Curtius; Τάπουρις in Steph. B. There can be no doubt that the present district of Tabori is derived from its name. Aslian (V. H. iii. 13) gives a peculiar description of the Tauri, who dwelt in Media. (Wilson, Arionis, p. 157.)

TAPURI MONTES, a chain of mountains, in Scythia, to the N. of the Jaxartes, apparently a portion of the Altai range, towards its western extremity (Ptol. vi. 14. § 7). It may, however, be doubted whether this view of Ptolemy is really correct. It would seem more likely that they are connected with the Tapuri, a tribe whose name is connected with the Hyrcani [Taperi]; and this a notice in Polybius would appear clearly to imply (v. 44). [V.]

TARACHI (Ταράχη, Ptol. vii. 4. § 8), a tribe of Taprobane or Ceylon, who occupied the SE. corner of the island below the Maues mountains (Adam's Peak). They appear to have had a port called 'Balau Sora' (founded by the Ster overall) and the peninsula known as the Vindasp. Near them was a river called the Baraco (Ptol. vii. 4. § 5). It is not unlikely that the river and the people had once the same name, which has since been modified by the change of the initial letters. [V.]

TARANNUS (Ταρανός; Eth. Ταραννιος), a place in Phrygia of unknown site, is mentioned only by Stephanus Byz. (a. e.). [L. S.]

TARANEI, a people in Arabia Deserta of unknown site. (Plin. vi. 28. a. 52.)

TARAS. [Tarentum.]

TARASCON (Ταρασκόν; Tarascon), a town in the Provence Narbonensis, on the east side of the Rhone. The modern way Arles and Arignon from Arignon to Marseillepasses through Tarascon, and there is a branch from Tarascon to Nimes. Ptolemy (in whose text the name is written Tapou-skon) enumerates Tarascon among the towns of the Salyes [Salazes]. Strabo (iv. p. 178) says that the road from Nemausus (Nimes) to Aquas Sextiae passes through Tarascon (Democrite) and Tarascon, and that the distance from Nemausus to Aquas Sextiae is 53 Roman miles; which, as D'Anville observes, is not correct. In another passage (iv. p. 187) Strabo makes the distance from Nimes to the bank of the Rhone opposite to Tarascon about 100 stadia, which is exact enough. [Tarasconensis.] [G. L.]

TARENTUM. [Tarant.] TARABELLI (Ταραβέλλια, Ταραβέλλας) are mentioned by Caesar among the Aquitanian peoples (B. G. iii. 27). They lived on the shores of the Ocean, on the Gallic bay (Strab. iv. p. 190), of which they were masters. Gold was found abundantly in their country, and at little depth. Some pieces were a handful, and required little manipulation. The Tarbelli extended southwards to the Aturia (Addurn) and the Pyrenees, where they became known as the Tiberini (l. 7, 9) and Lucani (Pharsal. l. 421) show, so far as they are evidence:—

"Qui tenet et ripas Aturi, quo littore curvo
Molliter admuram claudit Tarbellias sequor."

Aunusius (Parem. iv. 11) gives the name "Tarbellius" to the Ocean in these parts. Ptolemy (ii. 7. § 9) places the Tarbelli south of the Bituriges Viaces, and makes their limits extend to the Pyrenees. He names their city "Tevera Apudobasii, or Aque Tarbellicam." [Aqua Tarbellicam.]

Puionis (i. 13) places it on the coast of Quaestorians, a term which indicates the establishment of some Roman soldiers in this country, as in the case of the Cossocastes, whom Pliny names Sigonians. [Cossocastæs.]

The country of the Tarbelli contained hot and cold springs, which were near one another.

TARENUSSUS (Ταρανούς), a town in Phrygia of unknown site, mentioned only by Strabo (xii. p. 370). [L. S.]

TARENTINUS SINUS (ὁ Tarantinos kókos; Golfo di Taranto) was the name given in ancient as well as in modern times to the extensive gulf comprised between the two great promontories or peninsulas of Southern Italy. It was bounded by the Iapygian promontory (Capo della Lusca) on the N., and by the Lacinian promontory (Capo della Calomone) on the S.; and these natural limits being clearly marked, appear to have been generally recognised by ancient geographers. (Strab. vi. pp. 261, 262; Mel. iii. 4. § 6; Plin. iii. 11. a. 16; Ptol. iii. l. 12.) Strabo tells us it was 240 miles in extent, following the circuit of the shores, and 700 miles in a straight line; and Pliny reckons it 250 miles in circuit, and 100 miles across the opening. The latter measurement considerably exceeds the truth, while Strabo's estimate is a very fair approximation. This extensive gulf derived its name from the celebrated city of Tarentum, situated at its N.E. extremity, and which enjoyed the advantage of a good port, almost the only one throughout the whole extent of the gulf. (Strab. vi. p. 278.) But notwithstanding this disadvantage, its western shores were lined by a succession of Greek colonies, which rose into flourishing cities. Crotona, Sybaris, Metapontum, and, at a later period, Hercules and Thurii, all adorned this line of coast; the great fertility of the territory compensating for the want of natural harbours. On the other hand, the Iapygian shore, on the contrary, the only city was Callipolis, which never rose above a subordinate condition. [E. E. B.]

TARENTUM (Ταραντ. -αντός; Eth. Tarantinos; Tarentinus; Taranto), one of the most powerful and celebrated cities of Southern Italy, situated as the N. shore of the extensive bay, a term which from it, both in ancient and modern times, the name of the gulf of Tarentum. (Tarentinus Sinus; ὁ Tarantinos kókos; Golfo di Taranto.) It was included within the limits of the province of Calabria, as that term was used by the Romans; but the Greeks
TARENTUM.

would generally have reckoned it a city of Magna Graecia, and not have regarded it as included in Iapygia. Its situation is peculiar, occupying a promontory or peninsula at the entrance of an extensive but shallow bay, now called the Mare Piccolo, but in ancient times known as the Port of Tarentum, an inlet of above 6 miles in length, and from 2 to $\text{3}$ in breadth, but which was so nearly closed at its mouth by the peninsula occupied by the city, that the latter is now connected by a bridge with the opposite side of the harbour. There can be no doubt that the ancient city originally occupied only the same area, to which the modern city is now confined, that of the low but rocky islet which lies directly across the mouth of the harbour, and is now separated from the mainland at its E. extremity by an artificial fosse or ditch, but was previously joined to it by a narrow neck of sand. This may probably have been itself a later accumulation; and it is not unlikely that the city was originally founded on an island, somewhat resembling that of Ortygia at Syracuse, which afterwards became joined to the mainland, and has again been artificially separated from it. As in the case of Syracuse, this island or peninsula afterwards became the Acropolis of the enlarged city, which extended itself widely over the adjacent plain.

Tarentum was a Greek city, a colony of Sparta, founded within a few years after the two Achaean colonies of Sybaris and Crotome. The circumstances that led to its foundation are related with some variation by Antiochus and Ephorus (both cited by Strabo), but both authors agree in the main fact that the colonists were a body of young men, born during the last war of Messenia, in which they threw over their birth a taint of illegitimacy, on which account they were treated with contempt by the other citizens; and after an abortive attempt at creating a revolution in Sparta, they determined to emigrate in a body under a leader named Phalanthus. They were distinguished by the epithet of Periboeans, in allusion to the disbanding of the disarmed class, and had been the chief of the conspirators at Sparta, after consulting the oracle at Delphi, became the leader and founder of the new colony. (Antiochus, op. Strab. vi. p. 278; Ephorus, 7b. p. 379; Serv. ad Aen. iii. 551; Diod. xv. 66; Justin, iii. 4; Schol. Corin. 1352.) As a matter of history, it should be remarked that the representatives of Tarentum, on the opposite side of the Messapian peninsula, had as yet attained to any eminence, or fallen into the hands of a seafaring people, the port of Tarentum became the chief emporium for the commerce of all this part of Italy. (Vox. x. 1; Flor. i. 18. § 3.)

The story of Arion, as related by Herodotus (i. 24) indicates the existence of intertribal commerce with Corinth and other cities of Greece as early as the reign of Periander, b. c. 625—585.

As the Tarentines gradually extended their power over the adjoining territories, they naturally came into frequent collision with the native tribes of the interior,—the Messapians and Picentes; and the first events of their history recorded to us relate to their wars with these nations. Their offerings at Delphi noticed by Pausanias (x. 10. § 6, 13. § 10), recorded victories over these nations, in one of which it appears that Opis, a king of the Iapygians, who had come to the assistance of the Picentes, was slain; but we have no knowledge of the dates or circumstances of these battles. It is certain, however, that the Tarentines were continually gaining ground, and making themselves masters of the Messapian towns one after the other, until their progress was checked by a great disaster, their own forces, together with those of the Rhigians, who had been sent to their assistance, being totally defeated by the barbarians with great slaughter. (Herod. vii. 170; Diod. ix. 52.)
loss that Herodotus, without stating the numbers, says it was the greatest slaughter of Greeks that had ever happened, and that loss seems to have fallen especially upon the nobles and wealthier citizens, so that it became the occasion of a political revolution, and the government, which had previously been an aristocracy, became therefor a pure democracy. (Arist. Pol. v. 3.) Of the internal condition and constitution of Tarentum previous to this event, we know nearly all from Thucydides, and while it seems probable that its institutions were at first copied from those of the parent city of Sparta, Aristotle speaks of its government as a melissais, in the sense of a mixed government or commonwealth; while Herodotus incidentally notices a king of Tar- rentum (ii. 158), not long before the Persian War, who was doubtless a king after the Spartan model. The institutions of a democratic tendency noticed with commendation by Aristotle (Pol. vi. 5) probably belonged to the later and democratic period of the constitution. We hear but little also of Tarentum in connection with the revolutions arising out of the influence exercised by the Pythagoreans: that sect had apparently not established itself so strongly there with its domination over the city as in other Tarentines are enumerated among the disciples of Pytha- goras, and it is clear that the city had not altogether escaped their influence. (Iambi. Vit. Pyth. 262, 266; Porphyry. Vit. Pyth. 56.)

The defeat of the Tarentines by the Messapians, which is referred by Diodorus to n. c. 478 (Diod. xi. 20), is the first event in the history of Tarentum to which we can assign a definite date. Great as that blow may have been, it did not produce any permanent effect in checking the progress of the city, which still appears as one of the most flourishing in Magna Graecia. We next hear of the Tar- rentines as interfering to prevent the Thurians, who had been recently established in Italy, from making themselves masters of the district of the Siritis. On what grounds the Tarentines could lay claim to this district, which was separated from them by the intervening territory of Metapontum, we are not informed; but they carried on war for some time against the Thurians, who were supported by the Spartans, until the height of the dispute was terminated by a compromise, and a new colony named Heraclia was founded in the contested territory (n. c. 452), in which the citizens of both states participated, but it was agreed that it should be considered as a colony of Tarentum. (Antioch. op. Sclav. vi. p. 264; Diod. xii. 23, 36.) At the time of the Athenian expedition to Sicily, the Tarentines kept aloof from this enterprise, and contented themselves with refusing all supplies and assistance to the Athenian fleet (Thuc. vi. 44), while they afforded shelter to the Corinthian and Laconian ships under Glycippus (18. 104), but they did not even prevent the second fleet under Demosthenes and Eurydemus from touch- ing at the islands of the Choeraides, immediately opposite to the entrance of their harbour, and taking on board some auxiliaries furnished by the Messa- pians. (Id. vii. 33.)

Another long interval now elapses, during which the history of Tarentum is to us almost a blank; yet the events were of the city represent it as in a state of great prosperity. We are told that at one time (apparently about 380—480 B.C.) Archytas, the Pythagorean philosopher, exercised a paramount influence over the government, and filled the office of Strategus or general no less than seven times, though it was prohibited by law to hold it for more than two, and that his influence was considered as sufficient to be the cause of the war against the Messapians. (Diog. Laert. viii. 4. §§ 79—80.) It is evident, therefore, that the Tarentines were far from enjoying unbroken peace. The hostilities alluded to were probably but a renewal of their old wars with the Messapians; but the security of the Greek cities in Italy was now menaced by two more formidable foemen, the Samnites and the Lucanians on the north and west. The Tarentines, indeed, seem to have at first looked upon both dangers with comparative indifference; their remote position secured them from the immediate brunt of the attack, and it is even doubtful whether they at first joined in the general league of the Greek cities, the cities of the Neapolitan coast, and the Lucanians on the north and west. Meanwhile, the calamities which beset the less southern cities, the destruction of some by Deyr- sius, and the humiliation of others, tended only to raise Tarentum in comparison, while that city itself enjoyed an immunity from all hostile attacks; and it seems certain that it was at this period that Tar- rentum first rose to the preponderating position which many Tar- entines are enumerated among the disciples of Pytha- goras, and it is clear that the city had not altogether escaped their influence. (Iambi. Vit. Pyth. 262, 266; Porphyry. Vit. Pyth. 56.)

TARENTUM.

Tarentum territory. Meanwhile, however, he had quarreled with his allies the Tarentines, so that he turned against them, took their colony of Heraclia, and endeavoured to transfer the congress of the Greek cities from Thess to a place on the river Acandalus, in the territory of Thurii. (Strab. vi. p. 280; Liv. vii. 24; Justin. xii. 2.) Hence his death, in b.c. 226, only liberated the Tarentines from their religio-military obligations to Rome. They appear from this time to have either remained tranquil or carried on the contest single-handed, till b.c. 303, when we find them again invoking foreign assistance, and, as on a former occasion, sending to Sparta for aid. This was again furnished them, and a large army of mercenaries landed at Tarentum under the command of Dionysius. But though he compelled the Messapians and Lucanians to sue for peace, Cleonymus soon alienated the minds of his Greek allies by his arrogance and luxurious habits, and became the object of general hatred before he quitied Italy. (Diod. xx. 104.) According to Strabo, the Tarentines subsequently carried on another and a more gigantic war (p. 280); but we find no mention of this elsewhere, and Diodorus tells us that he concluded an alliance with the Illyrians and Peloponnesians, which could hardly have been done with favourable intentions towards Tarentum. (Diod. xx. p. 490.)

Not long after this the Tarentines first came into collision with a more formidable foe than their neighbours, the Messapians and Lucanians. The wars of the Romans with the Samnites, in which the descendants of the latter people, the Apulians and Lucanians, were from time to time involved, had rendered the name and power of Rome familiar to the Greek cities on the Tarentine gulf and coast of the Adriatic, though their arms were not carried into the interior of Italy until b.c. 263, when they rendered assistance to the Thuriens against the Lucanians (TURTHI). But long before this, as early as the commencement of the Second Samnite War (c. 326), the Tarentines are mentioned in Roman history as supporting the Neapolitans with promises of succour, which, however, they never sent; and afterwards, according to the Romans, as having sent a fleet against the Romans. (Liv. vii. 27.) Again, in b.c. 321 we are told that they sent a hasty embassy to command the Samnites and Romans to desist from hostilities, and threatened to declare war on whichever party refused to obey. (Id. ix. 14.) But on this occasion also they did not put their threats in execution, and the subsequent Spartid war against the Romans. (Liv. vii. 27.) Again, in the same year, the Tarentines concluded a treaty with Rome, by which it was stipulated that no Roman ships of war should pass the Lacinian cape. (Appian, Samn. vii. 7.) It was therefore a direct breach of this treaty when, in b.c. 302, a Roman squadron of ten ships under L. Cornelius, which had been sent to the Adriatic, passed through the Tarentine gulf, and even approached within sight of the city. The Tarentines, whose hostile disposition was already only half concealed, and who are said to have been the prime movers in organising the confederacy against Rome which led to the Fourth Samnite War (Zonar. viii. 2.), immediately attacked the Romans, who had been taken by surprise, in the harbor of Tarentum. After this they proceeded to attack the Thuriens on account of their having called in the Romans, expelled the Roman garrison, and made themselves masters of the city. (Appian, Samn. vii. § 1; Zonar. viii.

2.) The Romans sent an embassy to Tarentum to complain of these outrages; but their demands being refused, and their ambassador treated with contemptuously, they had now no choice but to declare war upon the Tarentines, b.c. 281. (Appian, l. c. § 2; Zonar. l. c.; Dion Cass. Fr. 145.) Nevertheless, the war was at first carried on with little energy; but meanwhile the Tarentines, following their usual policy, had invincible before Tarentum to their aid. That monarch readily accepted the overture, and sent over his general Milo to occupy the citadel of Tarentum with 3000 men, while he himself followed in the winter. (Zonar. viii. 2; Plut. Pyrrh. 15. 16.)

It is usual to represent the Tarentines as at this period sunk in luxury, and совершенно unable to defend themselves, and hence compelled to have recourse to the assistance of Pyrrhus. But there is certainly much exaggeration in this view. They were no doubt accustomed to rely much upon the arms of mercenaries, but so were all the more wealthy cities of Greece; and it is certainly possible that the Tarentines, being helped from their allies and mercenaries), furnished not only a considerable body of cavalry, but a large force or phalanx of heavy-armed infantry, called the Lechaipid, from their white shields, who are especially mentioned as serving under Pyrrhus at the battle of Asculum. (Dionys. xx. Fr. Didot. 1, 5.) It is unnecessary here to repeat the history of the campaigns of that monarch. His first successes for a time saved Tarentum itself from the brunt of the war; but when he at length, after his final defeat by Corinna, withdrew from Italy (b.c. 274), it was evident that the full weight of the Roman arms would fall upon Tarentum. Pyrrhus, indeed, left Mico with a garrison to defend the city, but the Tarentines themselves were divided into two parties, the one of which was disposed to submit to Rome, while the other applied for assistance to Carthage. A Carthaginian fleet was actually sent to Tarentum, but it arrived too late, for Milo had already capitulated and surrendered the citadel into the hands of the Roman consul Papirius, b.c. 272. (Zonar. viii. 6; Oros. iv. 3.)

From this time Tarentum continued subject to Rome. The inhabitants were indeed left in possession of their own laws and nominal independence, but the city was jealously watched; and a Roman legion seems to have been commonly stationed there. (Pol. ii. 24.) During the First Punic War the Tarentines are mentioned as furnishing ships to the Romans (Pol. i. 20); but with this exception we hear no more of it till the Second Punic War, when it became a military post of great importance. Hannibal was from an early period desirous to make himself master of the city, which, with its excellent port, would at once have secured his communications with Africa. It is evident also that there was a strong Carthaginian population in the city, which, after the battle of Cannae, opened negotiations with Hannibal, and renewed them upon a subsequent occasion (Liv. xxii. 61, xxiv. 13); but they were kept down by the presence of the Roman garrison, and it was not till b.c. 212 that Nico and Philomenes, two of the leaders of this party, found an opportunity to betray the city to their Roman masters. (Liv. xxx. 29—30; Polyb. vii. 26—33.) Even then the Roman garrison still held the citadel; and Hannibal having failed in his attempts to carry this fortress by assault, was compelled to resort to a blockade. He cut it off on
TARENTUM.

Tarentum enjoyed considerable prosperity in his day. But it was greatly fallen from its former splendor, and was only a small part of the adjoining isthmus. (Strab. vi. p. 278.) It was, however, one of the few cities which still retained the Greek language and manners, in common with Neapolis and Rhegium. (ib. p. 253.)

The salubrity of its climate, as well as the fertility of its territory, and, above all, the importance of its commercial relations, still maintained its population. So many of the cities of Magna Graecia fell under the Roman government. It is repeatedly mentioned during the civil wars between Octavian, Antony, and Sext. Pompeius as a naval station of importance; and it was there that in n. c. 36 a fresh arrangement was come to between Octavian and Antony, which we find alluded to by Sallust as the "Tarantine pacta." (Appian, B. C. ii. 40, v. 80, 84, 85 — 99; Tac. Ann. i. 10.)

Even under the Empire Tarentum continued to be one of the chief seaports of Italy, though in some measure eclipsed by the growing importance of Brundisium. (Tac. Ann. xiv. 12, Hist. ii. 53.)

An additional colony of veterans was sent there under Sulla. (Procop. B. G. iii. 23, 27, 37, iv. 26, 34.) It was taken by Belisarius, but reoccupied by Totili in A. D. 549, and continued in the hands of the Goths till it was finally wrested from them by Narses. From that time it continued subject to the Byzantine Empire till A. D. 661, when it was taken by the Lombard Boniface, duke of Beneventum (P. Disc. vi. 1), and afterwards fell successively into the hands of the Saracens and the Greek emperors. The latter did not finally lose their hold of it till it was taken by Robert Guiscard in 1063. It has ever since formed part of the kingdom of Naples. The modern city of Tarentum has a population of about 20,000 souls; it is the see of an archbishop, and still ranks as the most important city in this part of Italy. But it is a scrappy, insignificant town, formed by the ancient citadel, the extremity of the peninsula or promontory between the two ports; this is now an island, the low isthmus which connected it with the mainland having been cut through by king Ferdinand I, for the purpose of strengthening its fortifications.

Scarcely any remains are now extant of the celebrated and opulent city of Tarentum. "Never (says Swinburne) was a place more completely swept off the face of the earth." Some slight remains of an amphiteatre (of course of Roman date) are visible outside the walls of the modern city; while within it the convent of the Celestines is built on the foundations of an ancient temple. The site of the modern and the extent of the ancient city can be very imperfectly determined. A few slight vestiges of the ancient walls are, however, visible near an old church which bears the name of Sua Maria di Muratella, about 2 miles from the gates of the modern city; and there is no doubt that the walls extended from thence, on the one side to the Mare Piccolo, on the other side to the outer sea. Thus the original form of the city was thus triangular, having the citadel at the apex, which is now joined to the opposite shore by a
TARENTUM.

Tarentum was celebrated in ancient times for the salubrity of its climate and the fertility of its territory. Its advantages in both respects are extolled by Horace in a well-known ode (Carm. ii. 6), who says that its honey was equal to that of Hymettus, and its olives to those of Venafrum. Varro also praised its honey as the best in Italy (ap. Macrobr. Sat. ii. 12). Its oil was held in equal reputation; the choicest quality of the latter seems to have been that produced at Aulon (Hor. l. c.; Martial, xiii. 125; Plin. xiv. 6. 8), a valley in the neighbourhood, on the slope of a hill still called Monte Melone [aulon]. But the choicest production of the neighbourhood of Tarentum was its wool, which appears to have enjoyed an acknowledged supremacy over that of all parts of Italy. (Plin. xix. 2. 9; Martial, l. c.; Varr. R. R. ii. 2. § 18; Strab. vi. p. 284; Colum. vii. 2. § 3.)

Nor was this owing solely to natural advantages, as we learn that the Tarentines bestowed the greatest care upon the preservation and improvement of the breed of sheep. (Colum. vii. 4.) Tarentum was noted likewise for the excellence of its cattle, which supplied the famous Tarentine cavalry, which was long noted among the Greeks. Their territory abounded also in various kinds of fruits of the choicest quality, especially pears, figs, and chestnuts, and though not as fertile in corn as the western shores of the Tarentine gulf, was nevertheless well adapted to its cultivation. At the same time its shores produced abundance of shell-fish of all descriptions, which formed in ancient times a favourite article of diet. Even at the present day the inhabitants of Taranto subsist to a great extent upon the shell-fish produced in the Mare Piccolo in a profusion almost incredible. Its Festena or scalspie enjoyed a special reputation with the Roman episcures. (Hor. Sat. ii. 4. 34.) But by far the most valuable production of this class was the Murex, which furnished the celebrated purple dye. The Tarentine purple was considered second only to the Tyrian, and for a long time was the most valued known to the Romans. (Corn. Nep. op. Fis. ix. 39. a. 65.) Even in the time of Augustus it continued to enjoy a high reputation. (Hor. Ep. ii. 3. 207.) So extensive were the manufactures of this dye at Tarentum that considerable mounds are still visible on the shore of the Mare Piccolo, composed wholly of broken shells of this species. (Swinburne's Travels, vol. i. p. 239.)
The climate of Tarantum, though justly praised by Heracle for its mildness, was generally reckoned soft and overbearing, and was considered as in some degree the cause of the luxurious and effeminate habits ascribed to the inhabitants ("molle Tarantum," Her. Sat. ii. 4. 34; "imbelbe Tarantum," id. Ep. i. 7. 43.) It is probable that this charge, as in many other cases, was greatly exaggerated; but it is clear, on the other hand, that the Tarantine race, like almost all the other Greeks who became a manufacturing and commercial people, indulged in a degree of luxury far exceeding that of the rude nations of Central Italy. The wealth and opulence to which they attained in the 4th century B.C. naturally tended to aggravate these evils, and the Tarantine are represented as at the time of the arrival of Pyrrhus exalted and degraded by luxurious indulgences, and devoted almost exclusively to the pursuit of pleasure. To such an excess was this carried that we are told the number of their annual festivals exceeded that of the days of the year. (Theopomp. op. Aten. iv. p. 166; Clearch. op. Athen. xii. p. 322; Strab. vi. p. 300; Athen. V. B. 11. p. 28.) It is natural to think that their love of fleshly gratifications and passion when he calls it "courageat asceticae medicinace Tarantina" (vi. 297.) But it is certain, as already observed, that they were not incapable of war: they furnished a considerable body of troops to the army of Pyrrhus; and in the sea-fight with the Roman fleet off the entrance of the Bay of the Second Punic War they displayed both courage and skill in naval combat. (Liv. xxvi. 39.) In the time of their greatest power, according to Strabo, they could send into the field an army of 30,000 foot and 3000 horse, besides a body of 1000 select cavalry called Hipparchi. (Strab. vi. p. 290.) The Tarantine Lusitani cavalry was indeed celebrated throughout Greece, as their name gave to a particular description of cavalry, which are mentioned under the name of Tarantine (Tarentiones), in the armies of Alexander the Great and his successors; and the appellation continued in use down to the period of the Roman Empire. (Arrian. Anecd. i. 16. 1; Tacit. Tacit. ii. 9. 6; Plut. vii. 12; Liv. xxvii. 28; Staur. Tactic. 2. p. 14.) Suidas, a 9th century writer, mentions a body of horsemen who had been always recruited in great part among the neighbouring Messapians and Galliitani, who also excelled as light horsemen.

With their habits of luxury the Tarantine undoubtedly combined the refinements of the arts usually associated with it, and were diligent cultivators of the fine arts. The great variety and beauty of their coins is, even at the present day, a sufficient proof of this, while the extraordinary numbers of them which are still found in the S. of Italy attest the wealth of the city. Ancient writers also speak of the members of pictures, statues, and other works of art which the city was adorned, and of which a considerable number were transported to Rome. (Paus. 18; Strab. vi. p. 378; Liv. xxvii. 3.) Among the most remarkable were the colossal statues of Jupiter, mentioned by Strabo (l.c.), and which was apparently still standing in the Agora in his time; the bronze statues of Hercules by Lyreipus already noticed; and a statue of Victory, which was also carried to Rome, where it became one of the chief ornaments of the Curia Julia. (Dion Cass. l. xii.) Nor were the Tarantine deficient in the cultivation of literature. In addition to Archytas, the Pythagorean philosopher, celebrated for his mathematical attainments and designs, we are also held at Tarantum a place scarcely surpassed in Greece, a native of Tarantum in woodcarving, and known for his dramatic work, who became the scene of many species of burlesque drama which were carried even to Rome itself, as e a Pepbro.) It was from Tarantum in 91 B.C. Romulus received the first minstrels in true Greek dramas, Livius Andronicus, their first translator, having been a Greek of Tarantine birth, was taken prisoner when the city fell into Roman hands. (Cic. Brut. 15.)

Polybius tells us that Tarantine music was the origin of its Lacedaemonian origin is also connected with the Romans, as it was the tomb of Hyacinthus already mentioned—viii. 30: the river Galateo was also called the Eurus (Th. 35), though the name ultimately prevailed. Another custom which was as peculiar as that of burying the sons of Priam in the cavern, which was left without the walls was occupied by a cave and a temple. (30.) This custom he attributes to an event that may have arisen (as was the case in Carthage and Syracuse) from the increase of the city and led to the origin of necropoles being inside the walls.

The name of Tarantine (Tarsa) was said to be derived from a river of the name Tarsus (Tasor), which is noticed by several writers (Steph. B. s. v. Tarsus; Paus. xii. 18. 2.) and is commonly identified with a deep waters stream, which flows into the sea about 5 W. of the entrance of the harbour of Tarantine, is still called Tarsus, though corrupted by the proximity to Pisania di Tarsos. (Rom. p. 582; Swift. vol. i. p. 371.) The navigated stream of the GALATHEA now known as the Piccola or harbour of Tarantine east in Xar, is uniformly identified with the small stream Le Cimarrone, an old church near which is the name of Sta. Maria di Galatea. (Galeas, the city in the vicinity of Tarantine, the name of which is annexed to that of the city by Heracle, is Adria, a town celebrated for the excellence of its wine. Its identification by local topographers, there being slight grounds, with a sloping ridge at a little above 8 miles S. E. of Tarantine, which bears the name of Mussa Molani to be a corruption of Mussa Molani, an obscure name, which is repeatedly met with in connection with Tarantine, is of that of Satyrus (Syrus). From the introduction of the use of oracle devices to have been given to Pausanias (Strab. vi. p. 379.), it seems probable that this was the old native name, but it is not clear that it is necessarily probable that it was that of a tract or section of the neighbourho of Tarantine. Stephanus of Byzantium distinctly calls it κόρα κάτω των Καρκαλαρίων (s. v. ταρταροί) and the authority of Strabo calls it a city (civitas) near Tarsos, in as much in comparison. There was certainly of the same in historical times. Virgil's epithet "Satyrus" is the name itself (Georg. ii. 197; Serv. ad loc. em; Serv. ad loc.) and mentators, however, consider "s nat." and"
TARETICA

was reading), and Horace speaks of "Sa-

carabellae" as equivalent to Tarantine. 59.

The memory of the locality is pres-

served in the town of Ananion of 

Tarentum, which is still called Torre 

(Romanelli, vol. i. p. 394; Zannoni 

Carta de Napoli).

Along the history and ancient institutions 

are, see Heyne, Osservazioni, vol. i. pp. 

and Lorenz, de Civitate Veterum A 

. 

Lipsi. 1833. The points of state-

ries are described by Swinburne, vol. i. pp. 

Keppel, Craven, Southern Tour, pp. 

and Romanelli, vol. i. pp. 283—289; but 

beneath of existing remains, the antiquities 

have scarcely received as much atten-

(E. B. B.)

44), and after him by Strabo (ix. p. 413), as a town 

in Asia Minor; but Pliny (v. 30) knows Taras too as 

a fountain of Mount Tmolus in Lydia. 64. S.

TARNIS (Tarph), a river in Gallia of the 

Garonne. It rises near Mount Laoure, in the 

Cévennes, and flows in the upper part of its course 

in a deep valley. After running near 200 miles it 

joins the Garonne below Moissac. Sidonius Apollin-

aris (24, 44) calls it "citas Tarnia." [LEBORA, 

Aurenzio (500, vi, 463) speaks of the gold found 

in the bed of the Taru:—

"Et auriferum postemum Gallia Tarvem."

TARBODUNUM (Tarbodonum), a town in the 

south-west of Germany, between Moses Ahaboa and 

the Rhenum. (Ptol. ii. 11. § 30.) It is universally 

identified with Trachin in the region of Freiburg 

in the Breisgau which, down to the middle ages 

was called the name of Zandir, a name which is formed 

from Tarodunum in the same way in which Zabara 

is formed from Tabernae. 65. S.

TABONA (Tabbara, Ptol. iii. 6. § 5), a place in 

the interior of the Chersonesus Taurica. [T. H. D.]

TARPHE (Tarphi, Ed. Tarpheus), a town of the 

Lepici Epemnemid, mentioned by Strabo (ix. 550).

It was situated upon a height in a fertile and woody 

country, and was said to have derived its name from 

the thickets in which it stood. In the time of Strabo it 

had changed its name into that of Pharygge 

(Phręgyn), but is said to have received a colony 

from Argos. It contained a temple of Hera Phary-

gea. It is probably the modern Pharamon (Strabo 

ix. p. 436; Grekurd and Kramer, ad loc.; Steph. 

b. s. v.; Leake, Northern Greeks, vol. iv. p. 179.)

569; in Geog. R. iv. 6, Tarpodizos), a town in the 

E. of Thrace, on the road from Byzantium to 

Anchialus. According to Kiepert, its site answers 

to that of the modern Bojak- Deborah; according to 

Reichard, to that of Kedrje-Tarza; according to 

Lapie, to that of Deoteo-Agaciz. But in some 

maps it is placed nearly due south of Sadame, and 

on or near the river Artemis: if this is correct, 

Tarpodizus must be in the neighbourhood of 

(E. B.)

TARQUINII (Tarquinia, Strab. Dionys.; Tar-

quenian; Ptol: Ed. Tarquiniensis; Correns) of 

the most ancient and important cities of Etruria, 

situatad about 4 miles from the Tysrian sea, 

and 14 miles from Centunonas (Civita Vecchia), 

near the left bank of the river Marta. All ancient 

writers represent it as one of the most ancient of 

the cities of Etruria; indeed according to a tradi-

tion generally prevalent it was the parent or metropolis 

of the twelve cities which composed the Etruscan 

League, in the same manner as Alba was represented 

as the metropolis of the Latin League. Its own 

reputed founder was Tarchon, who according to some 

accounts was the son, according to others the brother, 

of the Lydian Tyrrenus; while both versions repre-

sented him as subsequent to the other cities of the 

league. (Strab. p. 219; Serv. ad Aen. 

179, 198.) The same superiority of Tarquinii 

may be considered as implied in the legend that 

represented the divine being Tages, from whom all 

the sacred traditions and religious rites of the 

Etruscans were considered to emanate, as springing 

out of the soil at Tarquinii (Cic. de Div. ii. 29; 

Censorin. de Die Nat. 4; Jean. Lyd. de Oct. 3.) 

Indeed it seems certain that there was a close conne-

NE (Tarpon), is mentioned by Homer (Il. v.
TARENTUM.

The climate of Tarentum, though justly praised by Horace for its mildness, was generally reckoned soft and enervating, and was considered, as in some degree the cause of the luxuriant and effeminate habits described to us by its inhabitants ("melle Tarentum," Hor. Sat. ii. 4. 34; "imbelle Tarentum," Id. Ep. i. 7. 45.) It is probable that this charge, as in many other cases, was greatly exaggerated; but there is no reason to doubt that the Tarentines, like almost all the other Greeks who became manufacturing and commercial people, indulged to a degree of luxury far exceeding that of the nations of Central Italy. The wealth and opulence to which they attained in the 4th century naturally tended to aggravate these evils, and the Tarentines are represented as at the time of Pyrrhus enfeebled and degraded by indulgences, and devoted almost exclusively to the pursuit of pleasure. To such an extent did this state of things carry that, as we are told the number of festival days exceeded that of the Romans (Theopomp. cph. Aethen. iv. p. 10; Aethen. xii. p. 528; Strab. vii. xii. 50.) Juvenal alludes to their love of pleasure when he calls them madidumque Tarentum. Certain, as already observed, were the Tarentines capable of war: they furnished troops to the army then in the harbour, due to the Great King for his service at two different combats. (Liv. xii. 24; Plin. iii. 1. 34.) The light cavalry, called Hipparchia, was a famous body of horse, besides which the name of Lucius Regulus was associated with the emigration of the Tarquinius Priscus to Rome. (Liv. x. v. p. 219.) The consul Tolumnius, and the light cavalry called Hipparchia, as we are told by Niebuhr, as a prelude to the name of Alcaeus, which was given to the name of Tarquinii, as that of Athens to the name of Aegina, as well as that of the city of Troy, as well as that of the city, is as ancient as the world. (Dion. B.C. ii. 2.) The Etruscan race, and the strong infusion of Etruscan blood into the Roman state before the close of the Republic, is a fact which cannot reasonably be questioned. It is remarkable also that the Roman traditions represented the Tarquinius as having been the first attempt to restore the exiled Tarquinius, b.c. 509, though from this time forth we do not again hear of their name for more than a century. (Liv. ii. 6; 7; Dionys. B.C. v. 14.) The story of the emigration of the elder Tarquin to Rome, as well as that of his father Demaratus from Corinthis, may fairly be deemed unworthy of belief in its present form; but it is probable that in both cases there was a historical foundation for the fiction.

After the war already mentioned, in the first year of the Republic, no subsequent mention of Tarquinii occurs in Roman history till b.c. 396, when the Tarquinius Servianus took up arms, and ravaged the Roman territories, while his army was engaged in the siege of Veii. They were, however, intercepted on their march home, and all their booty taken from them. (Liv. v. 16.) Livy distinctly calls them on this occasion "novi hostes," but from this time they took an active part in the wars of the Etruscans with Rome. The conquest of Veii in mathematical art was held at Tarentum, but the name of Pericles, s.v. 'Athenis' is the only allusion to any such occurrence. 

The Forum at Rome, 358 of the Roman era, was the scene of a battle between the Tarquinius, chief of the Roman army, and the consul of the Romans, who now for a short time held the field. They continued the war till a truce was agreed upon for six years. (In 20. 19—22.)

This truce appears to be observed, for we hear nothing more of Tarquinii till b.c. 311, when they appear to have united with the cities of Etruria in attacking the Sutrium. They were, however, driven away; and in the Roman consul Aemilinus Berbula year by Q. Fabius, who followed passing the Cimtainian forest, and for the first time into Sutrium, no doubt that the Tarquinians had no chance of the consul Decius by some corn. (Liv. ix. 73, 33—33, 46.)

Tarentum appears to have been a fresh troop for five years from this time we bear no record of the nation. Whether this last, was faithfully observed, or whether more joined in the final struggle for independence, we know not.

Whether Tarentum last, was faithfully observed, or whether more joined in the final struggle for independence, we know not, or that they passed, in common with the other Etruscans, to the Social War (b.c. 90), when the other Etruscans obtained the following year, b.c. 309, as we find that their submission to Rome, and of the consul Decius by some corn. (Liv. ix. 73, 33—33, 46.)

The only record that occurs in this interval is the Punic War, when the citizens of Veii took part in the destruction of Scipio's fleet. (Liv. xxi. 45.)

Colonia, or Colonia of colonise in the Latin text.
TARRACINA.

Covered, will be found in Dennis's Etruria (vol. i.
[1841—384.)

TARRACINA (Tăphrían, Strab.; Tăphrían, Tαφράινα, Tarracina; Tarracinaeas: Tarracina is the more extended sense of the name, as is usually a Volscian city, situated 5 or 6 miles from Ciresi, near the Marasha. It was and is known to s. 9; Ennius.
The name of Tarracina is said to have been advertised in verse; but Cicero and the later writers, where they are Romans, universally call it Ceres, because they had a temple dedicated to her. The Greek derivation of the latter name is Ceras (v. p. 233), which says it was from its rugged situation, and not from etymology. The name was first used in history in the treaty between Carthage and Rome, concluded in B.C. 509, in which the Carthaginian cities, which are mentioned in common with those of Ciresi, Antium, &c., among the subjects or dependencies of Rome. (Pol. iii. 22.) It seems certain therefore that Tarracina, as well as Ciresi, was included in the Roman dominions before the fall of the monarchy. But it is not clear that it must have again fallen under the dominion of the Volscians, probably not long after this period. It was certainly in the possession of that people, when its name next appears in history, in B.C. 406. On that occasion it was attacked by N. Fabius Ambustus, and taken by a sudden assault, while the attention of the Volscian army was drawn off in another direction. (Liv. iv. 87; Diod. xiv. 16.) Livy speaks of it as having at this time enjoyed a long period of power and prosperity, and still possessing great wealth, which was plundered by the Roman armies. A few years afterwards (B.C. 402) it again fell into the hands of the Volscians, through the negligence of the Roman general. (Liv. iv. 8.) In B.C. 397 it was again besieged by the Roman army under Valerius Poitus, and though his first assaults were repulsed, and he was compelled to have recourse to a blockade, it soon fell after his last assault. (B.C. 12, 13.) An attempt of the Volscians to recover it in 397 proved unsuccessful (B.C. 16), and from this time the town continued subject to Rome. Nearly 70 years later, after the conquest of Paeonium, it was thought advisable to secure Tarracina with a Roman colony, which was established there in B.C. 299. (Liv. viii. 21; Vell. Pat. i. 14.)

The condition of Tarracina as a Roman colony is not quite clear, for Velleius notices it as if it had been one of the "Coloniae Latiniae," while Livy certainly does not consider it as such, for he omits its name among the thirty Latin colonies in the time of the Second Punic War, while he on two occasions mentions it in connection with the other maritime colonies, Antium, Minturnæ, &c. In common with these, the citizens of Tarracina in vain petitioned for exemption from military service during the Second Punic War, and obtained a later and claimed exemption from naval service also. (Liv. xxvii. 38, xxxvi. 3.) There can, therefore, be no doubt that Tarracina was a "colonia maritimae civium," and it seems to have early become one of
tion considered as subsisting between this Tages and Tarquinius himself, the eponymous hero of Tarquinius. (Müller, Etrusker, vol. i. p. 78.) It is impossible here to follow the multiplicity of these traditions, which seem to point to Tarquinii as the point from whence the power and civilisation of the Etruscans emanated as from a centre, while on the other hand there is another body of traditions which seems to represent that people as gradually extending themselves from the north, and Cortona as the first centre and capital of their power. (Etruria, Vol. I. p. 859.)

A somewhat different version is given by Justin, who states that Tarquinii was founded by the Tresians, probably meaning the Pelagians from Thrace, to whom Hellanicus ascribed the colonisation of Etruria in general. (Justin, xx. 1; Hel- lanic. ap Diony. i. 28.)

But whatever value may be attached to these traditions, they may at least be admitted as proving the reputed high antiquity and early power of Tarquinii as compared with the other cities of Southern Etruria; and this is confirmed by the important position it appears to have held, when its name first appears in connection with the Roman history. Cicero calls it "urbem Etruras florissantam" at the time of the Roman kings. The father of Tarquinii, Priscus, was said to have established himself there. (Cic. de Rep. ii. 19.) It is remarkable indeed that the story which derived the origin of the Roman king Tarquinius from Corinth represented his father Demaratus as bringing with him Greek artists, and thus appears to ascribe the first origin of the arts of the Gracae to Etruria, as well as to its religious institutions, to Tarquinii. (Plin. xxxv. 12. a. 43; Strab. v. 220.) It is unnecessary to repeat here the well-known story of the emigration of an Etruscan Lucumo from Tarquinii to Rome, where he became king under the name of Lucius Tarquinius. (Liv. i. 34; Dionys. iii. 46—48; Cic. de Rep. ii. 12; Strab. v. p. 219.) The connexion between Tarquinii and Rome is rejected by Niebuhr, as a mere etymological fable, but it is not easy to say on what grounds. The name of Tarquinii, as that of a gens or family, as well as that of the city, is undoubtedly Etruscan; the native form being "Taran " and the strong infusion of Etruscan influence into the Roman state before the close of the Republic, which cannot reasonably be questioned. It is remarkable also that the Roman traditions represented the Tarquiniians as joining with the Veientes in the first attempt to restore the exiled Tarquinii, b.c. 509, though from this time forth we do not again hear of their name for more than a century. (Liv. ii. 6, 7; Dionys. v. 1.) The story of the emigration of the elder Tarquinii to Rome, as well as that of his father Demaratus from Corinth, may fairly be deemed unworthy of belief in its present form; but it is probable that in both cases there was a historical foundation for the fiction.

After the war already mentioned, in the first year of the peace, the subsequent mention of Tarquinii occurs in Roman history till b.c. 396, when the Tarquiniians took up arms, and ravaged the Roman territories, while their army was engaged in the siege of Veii. They were, however, intercepted on their march home, and all their booty taken from them. (Liv. v. 16.) Livy distinctly calls them on this occasion "novi hostes," but from this time they took an active part in the wars of the Etruscans with Rome. The conquest of Veii in b.c. 396, had indeed the effect of bringing the Romans into immediate collision with the cities which lay next beyond it, and among these Tarquinii was one. (Val. Max. xii. 6.) Already in b.c. 389, we find the Tarquiniians joining with the other cities of Southern Etruria in an attempt to recover Sutrium: the next year their territory was in its turn invaded by the Romans, who took the towns of Cortona and Costoebra, but places otherwise unknown, but which appear to have been before this period the seat of Tarquinii. (Liv. vi. 3. 4.) From this time we hear no more of them till b.c. 358, when the Tarquiniians, having ravaged the Roman territories, the consul C. Fabius marched against them, but was defeated in a pitched battle, and 307 of the prisoners taken on the occasion were put to death in the Forum of Tarquinii, as a sacrifice to the Etruscan deities. (Liv. vi. 12.) After this, we find the Tarquiniians again in arms, and in the first battle which occurred between them and the Romans they are said to have obtained the victory by putting forward their priests with flaming torches and serpents in their hands, to strike terror into their assailants. (Liv. vi. 16, 17.) But the Etruscans were defeated in this battle, and with the support of the Tarquiniians, C. Fabius was sent to oppose them: and two years later (b.c. 354) the Romans took a sanguinary revenge for the massacre of their prisoners, by putting to death in the Forum at Rome, 358 of the captives taken from the Tarquiniians, chiefly of noble birth. (10. 19.) But the spirit of the Tarquiniians was not yet subdued, and within the year they again appear, who now for a short time took part against Rome, they continued the war till b.c. 351, when they sued for peace, and obtained a truce for forty years. (Liv. 19—22.)

This truce appears to have been faithfully observed, for we hear nothing more of hostilities with Tarquinii till b.c. 311, when the Tarquiniians were again united with the other consular cities of Etruria in attacking the Roman colony of Sutrium. They were, however, defeated by the Roman consul Aemilius Barbaulus, and again next year by Q. Fabius, who followed up his victory by passing the Climingian forest, and carrying his arms for the first time into Northern Etruria. There is no doubt that the next century, which cannot reasonably be questioned, is by name, bore a part in this contest as well as in the great battle at the Vadimian lake in the following year (b.c. 309), as we find them soon after making their submission to Rome, and purchasing the favour of the consul Decius by sending him supplies of corn. (Liv. ix. 32, 35—39, 41.) They were now obtained the full Roman franchise. (Appian, B. C. i. 49.) The only mention of Tarquinii that occurs in this interval is during the Second Punic War, when the citizens came forward to furnish provisions for Scipio Africanus's fleet. (Liv. xxviii. 45.) According to the Liber Coloniarum a body of colonists was sent thither by
TARRACINA.

1103

Gracchus; but though it is there termed "Colonia Tarracina," it is certain that it did not retain the title of a colony; Cicero distinctly speaks of it as a "municipium," and the Tarrachinians are ranked by Pliny among the ordinary municipal towns of Etruria. Its municipal rank is further confirmed by inscriptions recently discovered on the site. (Jahrb. Gesch. Altert. IV. 5 s.; Podl. iii. 1. § 50; Inscr. in Bullett. d. Inst. Arch. i83o, pp. 198, 199.) From these last records we learn that it was apparently still a flourishing town in the time of the Antonines, and its name is still found in the Tabula near three centuries later (Tab. Pest.). It is probable, therefore, that it survived the fall of the Western Empire, and owed its final desolation to the Saracens.

At the present day the site of the ancient city is wholly desolate and uninhabited; but on a hill about a mile and a half distant stands the modern city of Corneto, the origin of which does not date further back than the eighth or ninth century. It was probably coupled with the name of the illustrious Tarracini. The site of the latter is clearly marked: it occupied, like most Etruscan cities, the level summit of a hill, bounded on all sides by steep, though not precipitous escarpments, and occupying a space of about a mile and a half in length, by half a mile in its greatest breadth. It is still known as Tarquinia, though called also Tivoli Tarquinius; the ruins are now visible, but the outline of the walls may be traced around the brow of the hill, partly by foundations still in situ, partly by fallen blocks. The highest point of the hill (furthest to the W. and nearest to the Marta) seems to have served as the Arx or citadel, and here the foundations of some buildings, supposed to be temples, may be traced. Numerous inscriptions, both Greek and Latin, are still visible, and though insignificant in themselves, prove, in conjunction with the inscriptions already mentioned, that the site was well inhabited in Roman times. (Dennis's Etruria, vol. i. pp. 371—385.)

But by far the most interesting remains now visible at Tarquinii are those of the Necropolis, which occupies a part of the slope on the south side of the city, at the W. extremity of which stands the modern town of Corneto. The whole surface of the hill (says Dennis) "is rugged with tumuli, or what have once been such," whence the appellation by which it is now known of Montorosco. Vast numbers of these tombs have been opened, and have yielded a rich harvest of vases, ornaments, and other objects of antiquity. But the most important are those of which the walls are adorned with paintings, which possess a double interest, both as works of art and from the light they throw upon Etruscan manners. It may indeed be asserted in general of the paintings in these tombs that while the influence of Greek art is unquestionably to be traced in their designs and execution, the manner in which the artists and the manners they exhibit are purely Etruscan. The number of these painted tombs found at Tarquinii greatly exceeds those which have been discovered on the site of any other city of Etruria; but they still bear only a very small proportion to the whole number of tombs opened, so that it is evident this mode of sepulture was almost universal. But the paintings in many of those first opened, which are figured in the works of Milicand and Inghirami, have since been allowed to fall into decay, and have in great measure disappeared. Detailed descriptions of all the most interesting of them, as well as those more recently discovered, will be found in Dennis's Etruria (vol. i. pp. 281—364.)

[TERRACINA (Ταρράκινα, Strab.; Ταρράκινα, Steph. B.; Ταρνακίνα, Tarracinnia, Tarracina), a city of Latium in the more extended sense of that name, but originally a Volscean city, situated on the Tyrrhenian sea, about 10 miles from Circeii, and at the extremity of the Pontine Marshes. It was also known by the name of Anxur, and we learn from Pliny and Livy that this was its Volscean name, while Tarracina was that by which it was known to the Latins and Romans. (Plin. iii. 5. a. 9; Eumenius ap. Fest. s. v. Anxur; Liv. iv. 59.) The name of Anxur is frequently used as a much later period by the Roman poets. (Hor. De R. 2. 28; Liv. 84; Martial, 1. 6. 6, &c.), obviously because Tarra- cinna could not be introduced in verse; but Cicero, Livy, and all other prose writers, where they are speaking of the Roman town, universally call it Tarracina. The Greek derivation of the latter name suggested by Siraco (v. p. 235), who says it was originally called Tarcurae, from the huge singing of a tarcan is probably a mere etymological fancy. The first mention of it in history occurs in the treaty between Rome and Carthage concluded in B.C. 509, in which the people of Tarracina are mentioned in common with those of Circeii, Antium, &c., among the subjects or dependencies of Rome. (Pol. iii. 12.) It seems certain therefore that Tarracina, as well as Circeii and Antium was included in the Roman dominions before the fall of the monarchy. But it is clear that it must have again fallen under the dominion of the Volsceans, probably not long after this period. It was certainly in the possession of that people, when its name next appears in history, in B.C. 406. On that occasion it was attacked by N. Fabius Ambuscus, and taken by a sudden assault (Hor. De R. 2. 28; Liv. 84; Martial, 1. 6. 6, &c.), when the Vols- cian armies was drawn off in another direction. (Liv. iv. 57; Diod. xiv. 16.) Livy speaks of it as having at this time enjoyed a long period of power and prosperity, and still possessing great wealth, which was plundered by the Roman armies. A few years afterwards (B.C. 402) it again fell into the hands of the Roman arms, through the defection of the Roman garrison (Liv. v. 8). In B.C. 400, it was again besieged by the Roman arms under Valerius Politus, and though his first assaults were repulsed, and he was compelled to have recourse to a blockade, it soon after fell into his hands. (Ib. 12, 13.) An attempt of the Volscians to recover it in 397 proved unavailing (Ib. 6); and from this time the city continued subject to Rome. Nearly 70 years later, after the conquest of Privernum, it was thought advisable to secure Tarracina with a Roman colony, which was established there in B.C. 329. (Liv. xiv. 21; Vell. Pat. i. 14.)

The condition of Tarracina as a Roman colony is not quite clear, for Velleius notices it as if it had been one of the "colonie Latiniae," but Tarracina's first claim to Roman dominion does not consider its name among the thirty Latin colonies in the time of the Second Punic War, while he on two occasions mentions it in connection with the other maritime colonies, Antium, Minturnae, &c. In common with these, the citizens of Tarracina in vain contended for exemption from military service during the Second Punic War, and at a later period claimed exemption from naval service also. (Liv. xxvii. 38, xxxvi. 3.) There can, therefore, be no doubt that Tarracina was a "colonia maritima civium," and it seems to have early become one of
TARRACINA.

the most important of the maritime towns subject to Rome. Its position on the Appian Way, where first touched on the sea (Strab. v. p. 253; Hor. Sat. i. 5. 26), doubtless contributed to its prosperity; and an artificial port seems to have in some degree supplied the want of a natural harbour. (Liv. xxvii. 4.) In a military point of view also its position is favourable to the passage of the Appian Way, and the narrow defile of Lantulace, which was situated a short distance from the city on the side of Fundi. (Liv. xxii. 15.) [Laut.] 

Under the Roman Republic Tarracina seems to have continued to be a considerable and flourishing town. Cicero repeatedly notes it one of the customary halting-places on the Appian Way, and for the same reason it is mentioned by Horace on his journey to Brundisium. (Cic. de Orat. ii. 59; ad Fam. vii. 23; ad Att. vii. 5; Hor. Sat. i. 5. 26; Appian. B. C. iii. 12; Val. Max. viii. 1. § 13.) At the outbreak of the civil war between Caesar and Pompey, Tarracina was occupied by the latter, with the co-operation of Quintus Lutatius Lucus, but they abandoned their post, when Pompey withdrew to Brundisium. (Cass. B. C. i. 24; Cic. ad Att. viii. 11, 2.) Again, during the civil war between Vespasian and Vitellius, Tarracina was evidently regarded as a place of importance in a military point of view, and was occupied by the partisans of Vespasian, but was wrested from them by L. Vitellius just before the death of his brother. (Tac. Hist. iii. 57, 76, 77.) It was at Tarracina also that the funeral convoy of Germanicus was met by his cousin Drusus and the chief personages of Rome. (Id. Ann. iii. 2.) The neighbourhood seems to have been a favourite site for villas under the Roman Empire. Emperor Domitian had a villa there (Martial. v. 1. 6); and it was another at villa near the town, on the road to Fundi, that the emperor Galba was born. (Suet. Gall. 4.) In addition to the other natural advantages of the situation, there existed mineral springs in the neighbourhood, which seem to have been much frequented. (Martial. v. 1. 6; cf. H. H. The important position of Tarracina doubtless prevented its falling into decay as long as the Western Empire subsisted. Its name is found in the Itineraries as a "civitas." (Jus. Ant. p. 187; Itin. Hier. p. 611.) and even after the fall of the Roman dominion it appears as a fortress of importance during the Gothic Wars. (Isid. Corp. G. ii. 4, 6, 16.)

The position of Tarracina on the extreme of the Pontine Marshes, just where a projecting ridge of the Volcanic mountains runs down to the sea, and separates the marshy tract on the W. from a similar but much smaller tract on the E., which extends from thence towards Fundi, must in all ages have rendered it a place of importance. The ancient city stood on the hill above the marshes, while the town, described by Horace distinctly as standing on lofty rocks, which were conspicuous afar, from their white colour:—

"Impositum saxo late cadentibus Arcuro." (Hor. Sat. i. 5. 26); and the same circumstance is alluded to by other Latin poets. (Lucan, iii. 346; Sil. Ital. viii. 392.) Livy also describes the site of another subsequent Volcanic town as "loco alto situm" (v. 12), though it extended also down the slope of the hill towards the marshes ("urbe prona in paludem," iv. 59). At a later period it not only spread itself down the hill, but occupied a considerable level at the foot of it (as the modern city still does), is its neighbour, the port of Tarracina is noticed by Livy as n. c. 210. (Liv. xxvii. 4.) It was magnificently enlarged and reconstructed under the Eastern Empire, probably by Trajan. and was then a magnificent city, now a ruin. The remains are still distinctly visible, and the site of the ancient basin, surrounded by a wall, may be clearly traced, though the great part of it is now filled with sand. Considerable portions of the ancient walls also still remain, especially the ancient walls still remain, especially partly in the polygonal style, partly in the recent style known to the Romans as 'opus quadratum.' Several ancient tombs and many ruins of buildings of Roman date are still extant in the modern town, and along the line of the Via Latina. The modern cathedral stands on the site of an ancient temple, of which only the substructions of two columns remain. This is probably the temple of Jupiter Virilis (Aem. vii. 799). He was represented (as are told by Servius) as a beautiful youth with the figures of the deities corresponding to him. This temple is supposed to have been replaced by the temple of the Roman emperors, and by the church on the Via Latina, and by the modern cathedral. The ancient temple is supposed to have been situated in the highest part of the city, very probably in the ancient citadel, which was founded on a hill, and which was built sacred grove attached to it. (Favonius.) [E.S.]

TARRACAO (Tarraconensis, Prot. d. 6. 11.) ancient city of Spain, probably founded by the Romans, who called it Tarracon, which, according to Bochart, means "a citadel." This name was probably derived from its situation on a lofty hill, and from the fact that it was frequently used by travellers, who passed through it, to refresh their horses and to rest in the sacred grove attached to it. (Ancon. Clark. Urb. 9; cf. Mart. x. 104.) It is seated on the river Sulis, on a bay of the Marine Internum, between the Pyrenes and the Tajo de Ilera. (Mela, d. 6; Plin. iii. 3. 4; L. xii. 22) mentions a "portus Tarraconae." In the 15th century was a "naval station" or "navicularium" (Artemidorus, v. 3. 1.) with more probability that it had once, and even an anchoring place and an embankment; and it is still used for shipping. This answers better to the present condition; for though a mole was constructed in the 16th century with the materials of the Roman city, it was not continued, and the protection for shipping. (Ford's Handb. of Spain, p. 222.) Tarracon lies on the coast along the S. coast of Spain. (Itin. Ant. p. 31. &c. 599, 443, 453.) It was fortified and seat of
TARRACONENSIS PROVINCA.

...y the brothers Publius and Cneius Scipio, retired it into a fortress and arsenal against the Thasianains. Subsequently it became the of the province named after it, a Roman and a conquered province. (Plin. i. c.; v. 106.)

Augustus wintered at his Cantabrian campaign, and bestowed arks of honour on the city, among which honorary titles of "Colonia Victrix Togata" (Grunt. iii. 355; Orelli, no. 3517; coins in Eckhel; Floren, Med. ii. p. 379; Monnet, i. pl. i. p. 104; Sentini, p. 202.) According to Pliny it was richest on that coast, and its commerce (p. 74) represents its population as equal of Carthago Nova. Its fertile plain and borders are celebrated by Martial and other and its neighbourhood is described as progeny wine and figs. (Mart. i. 104, xiii. ii. Lat. iii. 369, xv. 177; Plin. ex. xvi. 6, a. 8, a. 2.) There are still many important remains at Tarraco, the present name of the city. Part of the bases of large Cyclopean the ancient Greeks in thought to be from the Romans. The building just mentioned at page 320 and is a typical example of Roman architecture. But Tarraco, like most other ancient which have continued to be inhabited, has sold to pieces by shelter to its own citizens for the of obtaining building materials. The city not far from the sea-shore has been used as a and but few vestiges of it now remain. A 13th of the 18th century was the last The west of it is still to be traced. Throughout in Latin, and even apparently Phoenician, inscriptions on the stones of the houses proclaim the tradition that it has been populated. Two ancient above, at some little distance from the town, however, fared rather better. The first of these was a cistern, which spans a valley about from the gates. It is 700 feet in length, and 80 feet across, of which there are two tiers, is high. The monument on the NW. of the 13th also about a mile distant, is a Roman altar, vaguely called the "Tower of the Seabut there is no authority for assuming that it was the Roman altar of Tarraco, p. seq.; Floren, Esp. Sagr. xix. p. 68, seq.; op. Diccion. vil. p. 386.)

TARSUS. [T. H. D.]

RACONESIS PROVINCA (called by the Greeks Taphaكنس Dion Cass. iii. iv. 58) is the province of Epirus. It adjoins the chief city Tarraco, where the Romans had themselves, and erected the tribunal of a king. The Tarraco was larger than the two provinces put together. Its boundaries are on the E. the sea; on the N. the coast, which separated it from Gallia, and far to the W., the sea (Durium, the Atlantic ocean, then that part of the province of Lusitania; and E. the province of Lusitania and the province of the boundaries of which have been already clear. (Mela, ii. 6; comp. Strab. iii. p. 196; Plin. i. x. 35; M. Friederich's "Historia"

TARRACONENSIS PROVINCA. 1105
ciae, the N. part of Portugal as far down as the Douro, the N. part of León, nearly all the Castile, and part of Andalusia. The nature of its climate and productions may be gathered from what has been already said (Hisp. 106.) A summary of the different tribes, according to the various authorities that have treated upon the subject, has also been given in the same article (p. 1063), as well as the particulars respecting its government and administration (p. 1061.)

TARRAGA (Tárraco, Plut. ii. 6. § 47), called by the Geogr. Rav. (iv. 40) Tarragossa, a town of the province in Hispanic Tarraco (Plin. III. 3. a. 4). Now Larvaga. (Cf. Cellarius, Orb. Ant. i. p. 91.)

TARRHA (Tárka, Panas, i. 16. § 13; Theophr. H. P. ii. 2; Steph. B. s. w.; Orm. ap. Euseb. P. E. p. 133, ed. Stephan.; Táče, Stasikras. §§ 329, 330), a town on the SW. coast of Crete between Phoenic and Pococlaus, one of the earliest sites of the Apollo-worship, and the native country of the writer Lucilius. For Tarba (Tárka, Ptol. iii. 17. § 8) Meusius proposes to read Tarha. There can be little or no doubt that its position should be fixed on the SW. coast of the island, at the very entrance of the gulf of Hégia River, where the body hanging mountains meet the sea on the north side of the river. (Pashley, Travels, vol. ii. p. 270.) The Florentine traveller Buondelmonti, who visited Crete A.D. 1415, describes considerable remains of a temple and other buildings as existing on the site of the ancient city (ap. Cornelianus, Creta Sacra, vol. i. p. 85).

TARSIATICA (Társico, Plut. i. 17. § 2), called in the Ión. Ant. p. 273, Tarsaticus, a place in Illyricum, on the road from Aquileia to Sicela through Liburnia, now Tarsac, to the E. of Fiume. (Cf. Pliny, iii. 21. a. 25; Tab. Peut.)

TARSHISH. [Tarsiussa.]

TARÈS (Társos, Ptol. i. 16. § 8), a town in Pamonia Inferior, now Tarsos. (T. H. D.)

TARSUS (Társos), a river of Asia Minor in the neighbourhood of the town of Zea, which has its source in Mount Taurus, and flows in a north-eastern direction through the lake of Miletus, and, issuing from a lake, continued its north-eastern course till it joined the Maeotis (Strab. iii. p. 357.) Strabo indeed states that the river flowed in numerous windings not far from Zea; but he can scarcely mean any other river than the one now bearing the name Balkezeri, and which the Turks still call Tarsos. (Cf. Pliny, vi. 4. a. 4.) It is probably the same river called Tarsaros in the Tab. Peut. (T. H. D.)

TARSIUS (Ταρσιός), sometimes called Tarsius (Ταρσιος), a town in the middle camp near the Thasian coast, to distinguish it from other places of the same name.
was the chief city of Cilicia, and one of the most important places in all Asia Minor. It was situated in a most fertile and productive plain, on both sides of which are chains of 70 stadia from the city, flowed into a lagoon called Rhagma or Haghmi. This lagoon formed the port of Tarsus, and was connected with the sea. The situation of the city was most favourable, for the river was navigable up to Tarsus, and several of the most important roads of Cilicia met there. Its foundation is said to date from the time of the Trojan king, but the very name of the city seems to indicate its Semitic origin. But the Greeks claimed the honour of having colonized the place at a very early period; and, among the many stories related by them about the colonization of Tarsus, the one adopted by Strabo (xiv. p. 673; comp. Steph. B. s. v.) ascribes the foundation to Argives who with Triptolemus arrived there in search of Io. The first really historical mention of Tarsus occurs in the Anabasis of Xenophon, who describes it as a great and wealthy city, situated in an extensive and fertile plain at the foot of the passes of Mount Taurus leading into Cappadocia and Ly西亚nia. (Anab. i. 2. § 33; Æc.)

The city then contained the palace of Sennacherib, king of Assyria, but virtually a part of Persia, and an equitable ally of Cyrus when he marched against his brother Artaxerxes. When Cyrus arrived at Tarsus, the city was for a time given up to plunder, the troops of Cyrus being exasperated at the loss sustained by a detachment of Cilicians in crossing the mountains. Cyrus then concluded a treaty with Sennacherib, exacting as a guarantee at Tarsus for 20 days. In the time of Alexander we no longer hear of him; but a Persian satrap resided at Tarsus, who fled before the young conqueror and left the city, which surrendered to the Macedonians without resistance. Alexander himself was detained there in consequence of a dangerous fever brought on by bathing in the Cydnus. (Arrian, Anab. ii. 4; Curt. iii. 5.) After the time of Alexander, Tarsus with the rest of Cilicia belonged to the empire of the Seleucidae, except during the short period when it was connected with Egypt under the second and third Ptolemies. Pompey delivered Tarsus and Cilicia from the dominion of the eastern despotism, by making the country a Roman province. Notwithstanding this, Tarsus was in the war between Caesar and Pompey sided with the former, who on this account honoured it with a personal visit, in consequence of which the Tarshians changed the name of their city into Julipolis. (Cas. B. Alex. 66; Dion Cass. xlvii. 24; Flor. iv. 2.)

Cassius afterwards punished the city for this attachment to Caesar by ordering it to be plundered, but M. Antonius rewarded it with municipal freedom and exemption from taxes. It is well known how Antony received Cleopatra at Tarsus when that queen sailed up the Cydnus in a magnificent vessel in the disguise of Aphrodite. Augustus subsequently increased the favours previously bestowed upon Tarsus, which on coins is called a "libera civitas." During the first century AD Tarsus was a place of great importance to the Romans in their campaigns against the Parthians and Persians. The emperor Titus, his brother Florian, and Maximinus and Julian died at Tarsus, and Julian was buried in one of its suburbs. It continued to be an opulent town until it fell into the hands of the Saracens. It was, however, recaptured 10th century by the emperor Nicephorus, but was soon after again restored to them, and has remained in their hands ever since. The town still exists under the name of Tarsonos, and though greatly reduced, it is still the chief town of that part of Karamanian. Few important remains of either antiquity are now to be seen there, but the country around it is as delightful and as productive as ever.

Tarsus was not only a great commercial city, but at the same time a great seat of learning and philosophy, and Strabo (xiv. p. 673, &c.) gives a long list of eminent men in philosophy and literature who flourished there. It is more illustrious than the Apostle Paul, who belonged to one of the many Jewish families settled at Tarsus. (Acix. x. 30. xi. 30. xv. 22. 41. xxii. 39; comp. Ptol. v. 8. § 7: Diod. xiv. 20; Hieroc. p. 704: Stad. Mar. M. § 156; Lese, Asia Minor, p. 214; Rassenger, Reisen in Asien, l. i. p. 395, &c.; 2. p. 639, &c.)

Another town of the name of Tarsus is said to have existed in Bithynia (Steph. B. s. v.), but nothing is known about it.

---

**COIN OF TARSUS.**

**TARTARUS (Tartaros), a river of Vesontio, near the borders of Gallia Transpadana.** It is intermediate between the Athosia (Adige) and the Pado (Po); and its waters are now led aside by artificial canals partly into the one river and partly into the other, so that it may be called indifferently a tributary of either. In ancient times it seems to have had a recognised mouth of its own, though this was even then wholly artificial, so that Pliny calls it the "fossiones Philistiniae, quod alii Tartarum vocant." (Plin. iii. 16. a. 20.) In the upper part of its course it formed, as it still does, extensive marshes, of which Caevius, the general of Vitellius, skilfully availed himself to cover his position near Isstia. (Tac. Hist. iii. 9.) The river is here still called the Tartaro; lower down it assumes the name of Canum Bianco, and after passing the town of Adria, and sending off part of its waters right and left into the Po and Adige, discharges the rest by the channel now known as the Fo di Lavinia. The river Attanas (Thaspianus waraodos), mentioned by Ptolemy (ii. 16. § 30), could be no other than the mouth of the Tartarus, so called from its flowing by the city of Adria; but the channels of these waters have in all ages been changing. [E. H. B.]

**TARTESSUS (Tárraco, Tarraco), Herod. i. 163; Tarra-"cos and Tárraco, Diodor. Sicul. Frug. 18. xxv.) a district in the south of Spain, lying to the west of the Guadalquivir and the Guadiana.** It has the prevailing opinion among Biblical critics that the Tarshiah of Scripture indicates certain localities in the south of Spain, and that its name is equivalent to the Tartessus of the Greek and Roman writers. The connection in which the name of Tarshiah occurs in the Old Testament with those of other localities is not of ancient times, but of the 10th century of the Christian era, when the whole of the world, as known to the Hebrews (Gen. x. 4; 1 Chron. i. 7; Psalms, li. xiii. 10; Isaias, livi. 19);
TARUZZIUM. (Oscar.)

TABRÈNNÀ or TARUANNA (Ṭarpa/, Pat. ii. 9. § 8), a town in North Gallia, and according to Ptolemy an island town of the Morini. [Morn.] It is written Taranna in the Table, where it is marked a capital town, and the modern name is Técréouenne. It is a mere name in several Roman routes. The distance between Genucia (Boulogne) in the Antonine Itin. and Taruanna does not agree with the true distance: nor does the distance in the same Itin. between Taruanna and Castellum (Cassell) agree with the actual measurement. In both instances we must assume that there is an error in the numerals of the Itin. D'Anville says that the Roman road appears to exist between Técréouenne and the commencement of the Boulonnais, or district of Boulogne, near Dreu, where it passes by a place called La Chausseée. There are also said to be traces of a Roman road from Itins Portus (Wiseman) to Técréouenne.

TARVESÈDO (Fr. p. 279) of TARVESÈSEDO, according to the Peutinger. Table, was called in the Antonine Itin. in Rheta on the road from Mediolanum leading by Comum to Augusta Vindelicum. Its exact site is now unknown, though it seems to have been situated near Torre di Vercella.

TARVIXIUM (Tapacarea. Ekk. Tarvialiaus: Tresie). a town of Northern Italy, in the province of Venedens, situated on the Sile (Sdle), about 15 miles from its mouth. The name is not mentioned by any of the geographers, though Pliny speaks of the Sile as flowing "ex montibus Tarvisianis," in a manner that would lead us to suppose it to have been a municipal town (Plln. iii. 18. s. 22), and this is confirmed by an inscription given by Musaior (Iasor. p. 398). After the fall of the Western Empire it appears as a considerable city, and is repeatedly noticed by Procopius during the Gothic Wars, as well as by Cassiodorus and Paulina Diaconus. (Cassiod. Var. x. 27; Procop. B. G. ii. 29. iii. 1. 2; F. Disc. Hist. Lapp. ii. 12. iv. 3, v. 26. &c.) It retained this consideration throughout the middle ages, and was a flourishing city under the name of Trieste. [E. H. B.]

TABUS (Tobo), a river of Gallia Cispadana, one of the southern tributaries of the Padus, which crosses the Asilian Way between 5 and 6 miles west of Parma. (Plln. iii. 16. s. 20; Geogr. Rav. iv. 36.) [E. H. B.]

TARUSATES are mentioned by Caesar (G. G. iii. 37) among the Aquitanian peoples who submitted to P. Crassus: "Vocates, Tarussates, Elunates." After Crassus had defeated the Sotiates [Sotiates] he entered the territory of the Vocates, and Tarusates, a statement which gives some indication of their position. Pliny (iv. 19) places the Tarusates between the Saccaces and Basubes; but the MSS. reading in Pliny seems to be Latu- sates, which probably should be Tarusates. There appears to be no variation in the name in the MSS. of Caesar. D'Anville conjectures that the name Tarusates is preserved in Taruss, or Tereus, a part of the diocese of Aire. The town of Aire is on the Auarius (Aixois) (G. E. Franc. iv. 261). [E. H. B.]

TARUSCIENNES, as the name stands in Haradin's edition of Pliny (iv. 4), but the reading is doubtful. Haradin found Taruscionnes in five MSS. and there are other variations. Besides Tarascos on the Rhone, there is Tarascon on the

TASCIACA.

Arrivae, a branch of the Corceses. This Tarascon is in the Pays de Foix, and in a valley at the foot of the Pyrenees, which circumstance seems to indicate more probably the position of a small tribe or people than that of Tarascon on the Rhone. This Tarascon on the Arrivae is mentioned in middle ages, archbishops of Narbonne in the name of Tarascon. Pliny's Tarasconensis, or whatever may be the true name, are enumerated among the Oppida Latinis of Narbonensis. [G. L.]

TASCIACA, a town in Gallia, placed by the Table between Avaricum (Bourges) and Caesarsodunum (Tours). The first station from Avaricum is Galoria, supposed to be Chabris, and the next is Tasciaca, supposed to be T真正的, also on the Cher. But the number xiii. placed in the Table at the name of Tasciaca, which number should represent the distance from Chabris to T真正的, is nearly the distance between T真正的 and Tours, and accordingly there is some error here. The Table gives no distance between Tasciaca and Caesarsodunum. (D'Anville, Notice; Ubiet, Tableaux.) [G. L.]

TASCONI is the name of a Gallic people in the Narbones, mentioned by Pliny (iii. 4), as the name is read in five MSS. There is a small river Tescus or Tescos, which flows into the Tours, near Moulins. D'Anville quotes a life of S. Thibaud, Bishop of Tarascon, who speaks of this river as called Tescos by the people of that part. and as the limit between the territories of the Tolosani, or people of Toulous, and the Caturomenis, or people of Cahors. This is a valuable passage, for it shows how far north the Narbonenes, to which the territory of Toulous was belonged, extended in this part of its frontier; and it also confirms the conjecture about the northern limits of the Ruteni Provinciales [Ruteni], who were also included in the Narbones. [G. L.]

TASTA. [DATEL.]

TATTA LACUS (S Tetta), a large salt lake on the frontier between Lycaonia and Galatia; it had originally belonged to Phrygia, but was afterwards annexed to Lycaonia. It was watered by springs, united by a channel with brine, that any substance dipped into it, was immediately incrusted with a thick coat of salt; even birds flying near the surface had their wings moistened with the saline particles, so as to become incapable of rising into the air, and to be easily caught. (Strab. viii. p. 568; Fl, iii. 41, 45; Dioscor. v. 126.) Stephanus Byz. (a. e. Berli and) speaks of a salt lake in Phrygia, which he calls Attaeas ("Arvea"), near which there was a town called Botaum, and which is probably the same as Lake Tatta. The Turks now call the lake Teka, and it still provides all the surrounding country with salt. (Leake, Asia Minor, p. 70.) [L. S.]

TAUVA. [Tasa.]

TAUVA (Teice, Steph. B. s. v.; Tasa, Ptol. iv. 5 § 50; Taba, His. Ant. p. 163), a town in Lower Egypt, situated on the left bank of the Canopic arm of the Nile, S. of the city of Nacratia. It was the capital of the small Ph emphithecian Nome (Fl, v. 9. a. 9), and is supposed to be represented by the present Tinsouki. (D'Anville, Memoires sur l'Egypte, vol. i. p. 82.) [W. B. D.]

TAUCHIRA or TEUCHIRA (Tuscis, Hierod. iv. 171, et alii; Tuscis, Hierod. p. 752; Plin. v. 5. a. 5, &c.), a town on the coast of Carystia, founded by Cyrene. It lay 200 stadia W. of Pho- lemaea. Under the Ptolemies it obtained the name of Amins (Strab. viii. p. 836; Mela, i. 8; Fl, L. c.) At a later period it became a Roman colony (Tab. Peut.), and was fortified by Justinian. (Proc. de Acad. vi. 5.) Tanchira was particularly noted for the worship of Cybele, in honour of whom an annual festival was celebrated. (Synes. Ep. 3.) It is said (Gilles) to have been a city of considerable commercial importance, being the point at which five or six of the great roads met. (Plin. v. 42; Strab. xii. p. 567; Ptol. v. 8 § 9; Steph. B. s. v. "Aymap; Hieroc. p. 696; It. Vau. pp. 201, 203.) It contained a temple with a colossal bronze statue of Zeus. Leake (Asia Minor, p. 311) is strongly inclined to believe that Taurus was the name of an ancient Tarusium. There are also the ruins of an immense building, which are believed to be remains of the temple of Zeus. (Comp. Hamilton in the Journal of the Roy. Geog. Soc. vol. vii. p. 74, fia. Cramer, Asia Minor, ii. p. 98.) [L. S.]

TAULANTHEI (Tavant, Ptol. iii. 13 § 5), a people of Roman Illyria, in the neighbourhood of Epidamnus and Dyrrhachium. In the time of the Romans they were a powerful tribe, possessing several cities, and governed by their own kings, but subsequently they were reduced to subjection by the kings of Illyria, and at the time when the Romans waged war with Tenta they had sunk into insignificance. (C. Thucyd. i. 24; Arrian, Anab. i. 5; Mela, ii. 3; Liv. xiv. 36; Plin. iii. 33. 26.) Ariostes relates of them a story of how they used to make honey. (M. Aurel. d. lii. p. 716.) [T. H. D.]

TAUM, TAUS, or TAVA (Taeus Epterus, Ptol. iii. 3 § 5), a bay on the E. coast of Britannia Barba (Tac. Agr. 22.) Now Firth of Tay. [T. H. D.]

TAUM (AD), a place in the SE. of Britannia Romana, in the territory of the Ioci (Tab. Peut.); probably Ternn.
TAURANITIUM.

Byzantium; but it appears that the true reading is Taurania. (Steph. B. s. v. ed. Meis.) [E.H.B.]

TAURANITIUM, a district of Armenia Major lying NE of Taurus, is in the direction of Artaia. (Tact. Ann. xiv. 24; Cf. Moses Chor. i. 5; Eetker, Erdkunde, x. p. 650, sq.) [T. H. D.]

TAURASIA (Tauranes), an ancient city of Samnia, in the country of the Hirpini situated on the right bank of the river Calor, about 16 miles above its junction with the Tamarus. The name of the city, is derived from the name of L. Scipio Barbatas, who records it among the cities of Samnium taken by him during the Third Samnite War. (Orell. Inscr. 550.) It was probably taken by assault, and suffered severely, for no subsequent mention of the town occurs in history; but its territory ("ager, qui Taurasinorum fuerat"), which was doubtless confiscated at the same time, is mentioned long afterwards, as a part of the "ager publicus populi Romani," on which the Appian Liguarians who had been removed from their own abodes were established by order of the senate. (Liv. xi. 38.) These Ligurians appear to have been settled in the plain on the banks of the Taurnus near its junction with the Calor; but there can be little doubt that the modern village Tauras, though 16 miles further S, retains the name, and marks (approximately at least) the site of the ancient Taurasia.

Several modern writers identify these Taurasini Campi with the Arvali Campi near Beneventum, which were the scene of the defeat of Pyrrhus by M. Curiaus Dentatus (73 B.C.); but the suggestion is probably enough, though unsupported by any authority. [Beneventum.] [E. H. B.]

TAURANITIUM. [BAUGRAUDANENSE.

TAURISIUM (TauriEpous, Procop. de Aed. iv. 1. p. 268), a place in Moeция Superior, near Scupi or Justiniana Prima. It was situated in the Eusena, not far from the borders, and was the birthplace of the emperor Justinian. (Cf. Gibbon, vol. v. 79, ed. Smith.) [T. H. D.]

TAURI (Taurus, Strab. vii. p. 308), the inhabitants of the Chersonesos Taurica, or modern Crimée. They were probably the remains of the Cimmerians, who were driven out of the Chersonesos by the Scythians. (Herrad. Hist. i. 21; cf. Herod., Ioseph., 2. p. 271; Melaus, iv. 278.) They were never divided into several tribes: but the two main divisions of them were the nomad Tauri and the agricultural. (Strab. vii. p. 311.) The former possessed the northern part of the country, and lived on meat, mare's milk, and cheese prepared from it. The agricultural Tauri were somewhat more civilized; yet altogether they were a rude and savage people, delighting in war and plunder, and particularly addicted to piracy. (Herod. iv. 103; Strab. vii. p. 308; Mela, ii. 1; Tact. Ann. xii. 17.) Nevertheless, in early times at least, they appear to have been united under a monarchical government (Herod. iv. 119). Their religion was particularly given to the worship of Diana, or Artemis, and many of their gods were identified with a virgin goddess, who, according to Ammianus Marcellinus (xxii. 8. 34), was named Orelloche, though the Greeks regarded her as identical with their Artemis, and called her Tanatopolis. (Soph. Af. 172; Eur. Iph. Taur. 1457; Diod. iv. 44; Arch. Tat. viii. 2; Strab. xiii. 333; Böckh, Inscr. ii. p. 369.) They had iron, worked persons, or Greeks that fell into their hands. After killing them, they struck their heads upon poles, or, according to Ammianus (l. c.), affixed them to the wall of the temple, whilst they cast down the bodies from the rock on which the temple stood. (Herod. iv. 103; Ov. nat. deus. 4. 60; Porph. fr. 63.) According to a tradition among the Tauri themselves, this goddess was Iphigenia, the daughter of Agamemnon (Herod. l. c.) They had also a custom of cutting off the heads of prisoners of war, and setting them on poles above the chimneys of their houses, which usage they regarded as a protection against the daimones of their dwellings. (Ibid.) If from the latter, all his dearest friends were buried with him. On the decease of a friend of the king's, he either cut off the whole or part of the deceased person's ear, according to his dignity. (Nic. Damac. p. 160, Orell.) [T. H. D.]

TAURANUM (Taurisina), a town on the W. coast of Bruttium, near the mouth of the river Metaurus (Marvo). Its name is mentioned by Mela, who places it between Scylla and Metaurus. It was probably, therefore, situated to the S. of the river, while the town of Metaurus was on its N. bank. Subsequently all trace of the latter disappears; but the name of Taurians is still found in the Tabula, which places it 23 miles S. of Vibo Valentia. (Mela, iv. 8; Tab. Peut.) It became the see of a bishop in the later ages of the Roman empire, and retained that dignity down to the time of Gregory VII, when the town had fallen into complete decay. Its ruins, however, still exist, and the site is said to retain the name of Taurisina. (Holsten. Not. et Clearest. p. 299; Romaniell, vol. i. p. 70.)

There can be no doubt that the "Taurisium oppidum" of Pliny (iii. 5. 10), which he mentions immediately after the "Metaurus annis," is the same place that is called by Mela Taurianum. [E. H. B.]

TAURICA CHERSONESUS (TAUROUSCHERSONEUS, Ptol. iii. Arg. 2. &c.), a peninsula stretching into the Pontus Euxinus from Sarmatia, or the country of the nomad Scythes, with which it is connected by a narrow isthmus, anciently called Taphres, or Taphrae, now the isthmus of Perekop. The peninsula also bore the name of Chersonesos Scythisca, and was sometimes styled simply Taurea. (Plin. iv. 12. s. 26; Scylax, i. p. 29, Huds.) It is now called the peninsula of the modern town of Eski-Krem; but since its incorporation with the Russian empire, the name of Taurica has also been again applied to it.

The isthmus which connects the peninsula with Sarmatia is so slender, being in some parts scarcely 40 stadia or 5 miles across (Strab. vii. p. 308; Clarke, Trusc. ii. p. 314, 4th ed. 1816), as to make it probable that in a very remote period Taurea was an island. (Plin. l. c.; cf. Pallas, Voyages, &c., ii. p. 2, Fr. Transal. 4to.) The ancients compared it with the Peloponnesus, both as to size and shape (Strab. vii. p. 310; cf. Herod. iv. 99); and this comparison is sufficiently happy, except that Taurea throws out another smaller peninsula on its E. side, the modern Peninsula of Kertsch, which helps to form the S. boundary, or coast, of the Palus Mesopot. The Chersonese is about 200 miles across in a direct line from Cape Tarschas, its extreme W. point, to the Straits of Kertsch, and 125 miles from N. to S., from Perekop to Cape Kizineca. It contains an area of about 10,050 square miles. Nearly all of Taurea consist of flat plains little elevated above the sea; the remainder towards the S. is mountainous...
TAURICA CHERSONESUS.

Tauric Chersonesus. The NW. portion of the low country, or that which would lie to the W. of a line drawn from the isthmus to the mouth of the river Asma, consists of a sandy soil interspersed with salt lakes, an evidence that it was at one time covered by the sea (Pallas, Jb. p. 605, &c.); but the E. and S. part has a fertile mould. The mountain chain (Tauric Montes) begins to rise towards the centre of the peninsula, gently at first on the N., but increasing in height as the chain approaches the sea, into which it sinks steeply and abruptly. Hence the coast at this part presents huge cliffs and precipices, and the sea is so deep that the lead often finds no bottom at the distance of a mile or two from the shore. From these mountains, which extend from Symbolon, or Balaclea, on the W., to Theodosia, or Caffa, on the E., many bold promontories are projected into the sea, enclosing between them deep and warm valleys open to the S., and sheltered from the N. wind, where the olive and vine flourish, the apricot and almond ripen, and the lands are yearly more and more growing off.

The most remarkable mountains of this chain are that anciently called the Cimmerian at the N. extremity, and the Trapesus at the S. (Strab. vii. p. 309.) The former, which is said to have derived its name from the Cimmerians, once dominants in the Bosporus, is now called Agrikonsch-Taurisch (Belleriad, &c. v. p. 253, seq.) But Trapesus is far by the highest mountain of Tauria. Kohl estimates its height at 5000 German feet (Reises in Südrussland, i. p. 204; other authorities make it rather less, or 4740 feet. (Neumann, Die Hellenen im Scythienlande, p. 448.) According to Mr. Seymour, it is 6125 English feet high. (Russia on the Black Sea, p. 196.) It is the highest mountain of Tauria. Kohl estimates its ancient name, and is said to resemble that of the Table Mountain at the Cape of Good Hope (Kohl, Jb.) A good idea of it may be obtained from the vignette in Pallas (ii. p. 196). As it stands somewhat isolated from the rest of the chain, it presents a very striking and remarkable object, especially from the sea. At present it is called Tschitsch-Dagh, or the Tschitsch Mountains. The other mountains seldom exceed 1200 feet. Their geological structure presents many striking deviations from the usual arrangement, especially in the absence of granite. These anomalies are fully described by Pallas in his second volume of travels. That part of Tauria which lay to the E. of the Black Sea, or to the I. of the Cimmerian Chersonesus (γυνειακ., Herod. l. c.) It is in these mountains that the rivers which water the peninsula have their sources, none of which, however, are considerable. They flow principally from the northern side, from which they descend in picturesque cascades. Only two are mentioned by the ancients, the Thachius, or Cape, and the Ognitsch. At the latter, the most fertile districts of Tauria are the calcareous valleys among the mountains, which, though often covered with only a thin layer of mould, produce excellent wheat. The nature of the country, however, does not now correspond with the descriptions of the ancients. Strabo (l. c.) praises its fertility in produc-

ing corn, especially in that part which lies between the Pacticas and Cape Caffa, which at present is a desolate and montonous steppe. But this may probably be accounted for by the physical and political revolutions which the country has undergone. Tauria yielded a large tribute of victual to Mithridates Eupator, King of Bosporus, but sovereign took much interest in promoting the cultivation of the country, especially by the planting of trees; but all his care to rear the Laurel and the Myrtle in the neighbourhood of Pacticas is said to have been vain, though other trees grew there which required a mild temperature. (Plin. xvi. s. 59.) Wine was produced in abundance, as at the present day, and the custom mentioned by Strabo (p. 307), of covering the vines with earth during the winter, is still observed, though Pallas considers it unnecessary (Voyages, &c. ii. p. 444.)

The interest connected with the ancient history of the Tauric Chersonesus is chiefly derived from the maritime settlements of the Greeks; and our attention is now directed to the eastern coast of the peninsula. All the barbarous nations of the NE. part of the Balkan Peninsula called the peninsula when these settlements were made is given in a separate article [TAURI]. Its coast, like those of the Euxine in general, were early visited by the Milesians, who planted some flourishing colonies upon it. Besides these we find a Doric colony at the mouth of the river Asma, and, if we may believe Aeschines (contra Ctes. p. 141, sq.), the Athenians once possessed the town of Nymphius on the Cimmerian Bosporus, which, according to him, was betrayed to the Bosporan kings by Glykon, the maternal grandfather of Demosthenes (Cf. Crateros in Harporoton, s. v. Νημφύς). The interior of the peninsula was but little known to the ancients, and we shall therefore best explain their connection with it by taking a survey of the coast. We shall begin on the NW. side, after the bay Carcina or Tamraca, which has been already described [CARCINA; TAMRACA]. From this bay the peninsula stretches to its most westerly part, Cape Tschitsch, which presents some high land; but to the S. of Tschitsch the coast sinks to a dead level as far as the river Asma, to the S. of which it again begins to rise in high cliffs. All the W. coast, however, presents no place of note in ancient history till we come to its extreme southern point, where a bold plateau of hills runs in a westerly direction into the sea. On the E. this track is divided from the mainland by a deep and broad valley, into which it falls by steep declivities. The harbour of Sebastopol (or Roads of Akkerman) on the N., which bites into the land for about 4 miles in a SE. direction, and that of Balaclea on the S. coast of the peninsula, which runs up towards the N., form an isthmus having a breadth of about 3000, or 5 miles. This measurement is confirmed by Clarke (Trav. ii. p. 219), who, however, seems only to have been guided by his eye; for in reality it is rather more, or about 6 miles. The S. coast of the little peninsula formed by this isthmus presents several promontories and small bays, with cliffs of from 1000 to 2000 feet in altitude, representing the most fertile districts of Tauria. These are the most important places in Tauria, as their coast is the most fertile. Of the rest, the most interesting is the town of Chersonesus (Strab. l. c.) We learn from Pliny (iv. 12. s. 40) that is
TAURICA CHERSONESUS.

was at first called Megarice, apparently from the circumstance that Megara was the mother city of the Pontic Heraclaeum. In the last century the peninsula we have just described obtained the name of the CHERSONESE HERRACLEOTICA, or Heralcleetic Chersones, sometimes also called "the small Chersonesus" (Μηρός, Strab. I. c.), by way of distinction from the great, or Tauric, peninsula.

The original city of Chersonesus seems to have been on the western point of the peninsula, close to the present Cape Fereopy. The date and occasion of its foundation are not ascertained; but Neumann conjectures that it may have been built about the middle of the fifth century b.c. (Die Hellenen, g. p. 383). Considerable remains of the ancient city were visible so late as the end of the last century (Clarks, Nom. ii. p. 292, seq.; Pallis, ii. pp. 70, seq.); but every trace of them had vanished when Murawieh Apostol visited the spot (Reisen durch Thaurien, p. 62). They were destroyed by a certain Lietz. Kruse, who used the stones for building and converted the ground into a vineyard (Dubois de Montpreux, Voyage, g. vi. p. 135). The ancient Chersonesus, however, had fallen into decay before that period, and was about to be abandoned when any similar attempts were made to maintain it again. The ruins have been partially cleared away and appear to have been frequently frequented as a place of amusement and solicitation; and from the account of Herodotus (iv. 102) it would appear that a temple of Artemis was here established on the spot, and that the temple was there dedicated to the great Artemis. The Heracleot Chersonesis erected a temple on a headland which took the name of Parthenium from it. Strabo however merely calls it the "temple of the virgin, a certain daemone" (p. 308), and does not mention Artemis. Opinions vary as to which is the real promontory of Parthenium. Many see it at Cape Fereopy or CHERSONESE, which seems too near the town of Chersonesus, as Strabo places the temple at the distance of 100 stadia from the town, though Fereopy answers to his description in other respects. It will be seen that there is a very close connexion between these places, and that there is a body of tradition which connects them with the temple of Artemis. The temple may have stood on the spot now occupied by the monastery of St. George; whilst Neumann, again places it on the headland a little to the NW. of C. Fereopy. It has also a ruin to recommend it; though the latter claim to notice is shared by C. Fereopy. Dubois de Montpreux (vi. p. 194, seq.) thinks that the temple may have stood on the spot now occupied by the monastery of St. George; whilst Neumann, again places it on the headland a little to the NW. of C. Fereopy. It has also a ruin to recommend it; though the latter

TAURICA CHERSONESUS. 1111

found in them, whilst those at Panticapaeum have yielded valuable antiquities. According to Clarke (ii. 201, 210), the greater part of the city and walls of Chersonesus belong to the Chersonesus, though others have identified it with Hersones. About the latter place, the ancient Citatus, the rock is pierced all over with the subterranean dwellings of the ancient Tauri. On the top are the ruins of the castle built by Diophantes, general of Mithridates, to defend the Chersonese against the Tauri and Sarmatae. These caves and crypts are now rapidly falling in. (Seymour, p. 140.) Similar caves are found in other parts of the peninsula.

The Heracleot Chersonesus was noted as the seat of the savage worship of Diana Tauropolis. The nates, or Tauri, themselves had a worship of a similar kind (pp. 79, 207); but as the capes Fereopy or CHERSONESE, which seems too near the town of CHERSONESE, as Strabo places the temple at the distance of 100 stadia from the town, though Fereopy answers to his description in other respects. Clarke and Pallis identify it with the Ate Boreas or "Sacred Promontory" (Clarke, ii. p. 236, and note), between the heresies of the Chersonese and the Cape Fereopy or CHERSONESE, which seems too near the town of Chersonesus, as Strabo places the temple at the distance of 100 stadia from the town, though Fereopy answers to his description in other respects. Clarke and Pallis identify it with the As Boreas or "Sacred Promontory" (Clarke, ii. p. 236, and note), between the sea and the sea; and as such it is called CHERSONESE, which seems too near the town of Chersonesus, as Strabo places the temple at the distance of 100 stadia from the town, though Fereopy answers to his description in other respects. Clarke and Pallis identify it with the Ate Boreas or "Sacred Promontory" (Clarke, ii. p. 236, and note), between the sea and the sea; and as such it is called CHERSONESE, which seems too near the town of Chersonesus, as Strabo places the temple at the distance of 100 stadia from the town, though
TAURICA CHERSONESUS.

The Tauric Chersones was a part in political affairs as an independent city, at least as late as about the middle of the 2nd century B.C., when, like its mother city, Herculea, it was a party to the alliance against Pharnaces I., king of Pontus, and Mithridates, master of Armenia. (Polyb. Fig. lib. xxvii. c. 6, vol. iv. p. 352, ed. Swete.) Soon afterwards, however, we find it straggling with the Taurians and their allies the Sarmatians for existence (Polyb. Strat. viii. c. 56), and it was ultimately compelled to place itself under the protection of Mithridates the Great. Subsequently, however, it regained its independence, through the Romans, and under the same name (Strabo 7. 24-15 ed. Swete.) Soon till a late period of the middle ages, and even turned the Bosporan kingdom. (Cost. Periplus. de Aed. Imp. c. 53.)

Leaving the Herculea Chersonesus, we will now proceed to describe the remainder of the coast of the Tauric peninsula, which may be soon despatched, as it is more accessible to its inland cities than is the case of the Meotia, where we have to give separate accounts. (From the haven of Symbolon (Bolchacov) to Thesodia (Caffa) the coast is correctly described by Strabo as Craigy, mountainous, and stormy, and marked with many headlands (p. 309). The distance, however, which he assigns to this tract of 1000 stadia, or 125 miles, is rather too small. In both cases of the Euxine the distances given are 1320 stadia, but this must include all the indentures of the coast. The most remarkable promontory in this part was the Criu-metopen, or Ram's Head, which has been variously identified. Some writers have taken it for the promontory of Laosp, which is in reality the most southern point of the peninsula. Some again have identified it with Ai Pedi, and a still greater number with the Aphaidas. But the account given by Arrian and theAnonymous agrees better with Caps Aithodor. These writers say that the Criu-metopen lay 320 stadia to the W. of Lampsas. (Arrian, Peripl. p. 20; Anon. Peripl. p. 6.) Now Lampsas is undoubtedly the present Buyuk Lampsas, the distance between which and Caps Aithodor was accurately given by the proconsul in his measurement. Scymnus indeed (ii. 320, Gell) states the distance at only 120 stadia; but this is evidently an error, as it is too short by half even for Apa-dogu. Caps Aithodor is not much N. of Laosp, and from its position might easily have been taken by the Greeks for the southernmost point of the peninsula. (Neumann, Die Halbinseln im Skithienland; Georgii, Alta Geographie, ii. 5; Clarke's Travels, vol. ii.; Danby Seymour, Russia on the Black Sea; Powledge, Capes, Geogr. vol. iii.) [T. H. D.]

TAURICI MONTES [TAURICA CHERSONESUS.]

TAURINI (Tayuropoli), a Ligurian tribe, who occupied the country on the E. slope of the Alps, down to the left bank of the Padus, in the upper part of its course. They were the most northerly of the Ligurian tribes, and from their geographical position would more naturally have been regarded as belonging to Cisalpine Gaul than to Liguria; but both Strabo and Pliny distinctly say they were a Ligurian tribe, and the same thing may be inferred from the omission of their name by Polybius where he is relating the successive settlements of the Gaulish tribes in the N. of Italy (Pol. ii. 17; Strab. iv. p. 304; Plin. iii. 17. a. 21). Their territory adjoined that of the Vagiensi on the S., and that of the Insulares on the NE.; though the Lavei and Lebecii, tribes of which we know very little, must also have bordered on their NE. frontier (Pol. L. c.). The first mention of the Taurini in history is at the time of Hannibal's passage of the Alps (s. c. 218), when that general,
TAURUS.

on descending into the plains of Italy, found the Taurini on hostile terms with the Insubres, and, in consequence, turned his arms against them, took their principal city, and put the inhabitants to the sword. (Pol. iii. 60; Liv. xxi. 38, 39.) Neither Polybius nor Livy mention the name of this city, but Appian calls it Taurasia (Asmud. 5): it was probably situated on the same site which was afterwards occupied by the town of Cassia. The name of the Taurini is not once mentioned during the long wars of the Romans with the Cassiopae Gauls and Ligurians, and we are ignorant of the time when they finally passed under the Roman yoke. Nor have we any precise account of the foundation of the Roman colony in their territory which assumed the name of Augustus Taurinorum, and whose name was used in a more comprehensive sense, so as to comprise the adjoining passes of the Alps; for Livy speaks of the Insubrian Gauls who crossed into Italy, "per Taureinos saltusque invios Alpes transcendentur" (Liv. v. 34), and Strabo, in enumerating, after Polybius, the passes across the Alps, designates one of them as ρηθ ἄνα Tauri, which part of the Susculum was here meant. (Hence the place here meant was the Mont Gébiers or the Mont Cenis.) A much disputed point, it would not be included within the territory of the Taurini in the more restricted sense.

E. H. B.

TAURUS, an island of the Ionian sea, between Phærus and Corcyra, opposite to the NW. point of the mainland, and this north of the Pelorus. (Anc. B. a. 47.) Now Corfu. (T. H. D.)

TAUREOIS, TAUROEOIUM (Tauréois, Tauro-

étrous: Eth. Tauroétrous). Step. B. (s. n. Ta-

rëois), who calls it a Celtic town and a colony of the Massaliotes, quotes the first book of Artes-

midorus' geography for a fantastic explanation of the origin of their name. (Fr. C. ii. 4), who says "Tauronta est castellum Massiliensium pervenient;" by Strabo (iv. pp. 180, 184), by Scevynus Chius, and by Polyænus (ii. 10. § 8), who places it between Massilia and Castrites Promontorium. D'Anville erroneously supposes that Caesar uses Taurontis for the plural number; but it is evident that it must be of the singular number. (iv. p. 184) enumerates the Massaliot settlements between Massilia and the Varus in this order: Tauro-

entia, Olbia, Antipolis, Nicaea. Mela (ii. 5) enumerates the places on this coast in a different order from east to west: Atheneopolis, Olbia, Tauris, Citharae, and "Lacydon Massaliensium portus." Ptolemy, as we have seen, places Tauris on opposite Massilia and Citharae. In the Maritime Itin. the positions between Teo Martius (Toulon) and Im-

madras seem to be out of order [Immadras]; and they are to be placed thus—Æmines (Embrics), Tauris (Taurisii), Citharae [Citharista], Car-

nici (Cassia), Immadras, Massilia. Geographers have been much divided in opinion on the site of Tauris, but the modern name seems to determine the place to be at the right of the entry of the bay of Ciotat.

G. L.

TAUROEONIUM (Tauróeoniun: Eth. Tauro-

éonious, Tauroneniàmii: Tauroéoniou, a Greek city of Sicily, which is their middle in the bay between Messana and Catana. It was only about 3 miles from the site of the ancient Naxos, and there is no doubt that Tauronium did not exist as a city till after the destruction of Naxos by Dionysius of Syracuse, n. c. 403; but the circumstances connected with its foundation are somewhat confused and uncertain. N. C. 588, 589. Although, however, from Diodorus that after the destruction of Naxos, the remaining inhabitants of that city were driven into exile, and its territory was assigned by Dionysius to the neighbouring Siculi. These, however, did not re-occupy the site of the ancient city, but established themselves on a hill to the N. of it, which was called the hill of Tauris (Aegaeus Rilipé). Here they at first constructed only a temporary camp (in n. c. 396), but afterwards erected walls and converted it into a regular fortress or town, to which they gave the name of Tauronium. (Diod. xiv. 58, 59.) The place was still in the hands of the Siculi in n. c. 394, and they held it against the efforts of Dionysius, who besieged the city in vain for great part of the winter, and though he on one occasion forced his way within the walls by a nocturnal surprise, was again driven out and repulsed with heavy loss. (Ib. 87, 88.) But by the peace concluded in n. c. 392, it was expressly stipulated that Tauronium should be subject to Dionysius, who expelled the greater part of the Siculi and took their place with his own mercenaries. (Ib. 96.) From this time we hear no more of Tauronium till n. c. 358, when we are told that Andromachus, the father of the historian Timæus, brought together all the remains of the exiled Naxians, who were still scattered about in different parts of Sicily, and established them all at Tauronium. (Diod. xiv. 7.) This is related by Diodorus as if it were a new foundation, and even as if the name had then first been applied to the city, which is in direct contradiction with his former statements. What had become of the former inhabitants we know not, but there is little doubt that the account of this re-settlement of the city is substantially correct, and that Tauronium was now for the first time occupied by a Greek city, which was considered as taking the place of Naxos, though it did not occupy the same site. (Wesseling, ed. Diod. xiv. 59.) Hence Pliny's expression, that Tauronium had formerly been called Naxos (Filn. iii. 6. a. 14) is nearly, though not strictly, correct.

The new settlement seems to have risen rapidly to prosperity, and was apparently already a considerable town at the time of the expedition of Timoleon in n. c. 345. It was the first place in Sicily where that leader landed, having eluded the vigilance of
the Carthaginians, who were guarding the straits of Messana, and crossed direct from Rhegium to Tauro-
menium, where he was met by a second consul and taken prisoner. (Diod. l.c.; Liv. xii. 56.) It is not certain that
Armachus was not deprived of the chief power, when all the other tyrants were expelled by Timoleon, but
was permitted to retain it undisturbed till his death. (Marcellin. Vit. Timaei. § 27.) We hear, however,
very little of Tauromenium for some time after this. It is probable that it passed under the authority of
Agrabochos, who drove the historian Timaeus into exile; and some time after this it was subject to a
domestic despot of the name of Tyndarion, who was contemporary with Hicetas of Syracuse and Phintias
of Agrigentum. (Diod. xxii. Exc. H. p. 495.) Tyndarion was one of those who concurred in inviting
Pyrrhus into Sicily (n. c. 278), and when that monarch was checked in his advance by Timoleon, joined
him with all his forces, and supported him in his march upon Syracuse. (Diod. l. c. pp. 495, 496.)
A few years later we find that Tauromenium had
fallen into the power of Hieron of Syracuse, and was
employed by him as a stronghold in the war against
the Messinians. (Ib. p. 497.) It was also one of the
islands left under his dominion by the terms of the
treaty concluded with him by the Romans in n. c.
263. (Diod. xxiii. p. 502.) This is doubtless the
reason that its name is not again mentioned during
the First Punic War.

There is no doubt that Tauromenium continued
to form a part of the kingdom of Syracuse till the
death of Hieron, and that it was passed under the
government of Rome when the whole island of
Sicily was reduced to a Roman province; but we have
scarcely any account of the part it took during the
Second Punic War, though it would appear, from a
hint in Appian (Sic. 5), that it submitted to Marcellus
on favourable terms; and it is probable that it was
on that occasion it obtained the peculiarly favourable
status of a colony under the Roman dominion.
For we learn from Cicero that Tauromenium
was one of the three cities in Sicily which enjoyed
the privileges of a "civitas foederata" or allied city,
thus retaining a nominal independence, and was not
even subject, like Messana, to the obligation of fur-
nishing ships of war when called upon. (Cic. Verr.
ii. 66, iii. 5, v. 19.) But the city suffered severe
calamities during the Servile War in Sicily, n. c.
154—153, having fallen into the hands of the in-
surgent slaves, who, on account of the great strength
of its position, made it one of their chief posts, and
were able for a long time to defy the arms of the
consul Rutilus. They held out until they were
reduced to the most fearful extremities by famine,
when they delivered the town with the consent of the
consul by one of their leaders named Sarapion, and
the whole of the survivors put to the sword.
(Diod. xxxiv. Exc. Phot. p. 528; Oros. v. 9.)
Tauromenium again bore a conspicuous part during
the war of Sextus Pompeius in Sicily, and, from its
strength as a fortress, was one of the principal points
of resistance which he took up in n. c. 38, for de-
fence against Octavian. It became the scene also of
a sea-fight between a part of the fleet of Octavian,
commanded by the triumvir in person, and that of
Pompeius, which terminated in the defeat and almost
destruction of the latter. (Appian. B.C. v. 105, 105—111, 116; Dion Cass. xxii. 4.) In the settlement of Sicily after the defeat of Pompey,
Tauromenium was one of the places selected by
Augustus to receive a Roman colony, probably as a
measure of proscription, on account of the strength
of its situation, as we are told that he expelled the Tyndarions who had held it. (Diod. xvi. 7.) Strabo speaks of it as one of the
cities on the E. coast of Sicily that was still sub-
sisting in his time, though inferior in population
both to Messana and Catana. (Strab. vi. pp. 257,
285.) Both Pliny and Ptolemy assign it the rank of a "colonia" (Plini. iii. 8. a. 14; Ptol. iii. 4. § 8),
and it seems to have been one of the few cities of
Sicily that continued under the Roman Empire to be a place of some consideration. Its territory was
noted for the excellence of its wine (Plini. iv. 6.
8.), and produced also a kind of marble which seems to have been highly valued. (Athens. v. p.
207.) Juvenal also speaks of the sea off its rocky coast as producing the choicest mussels. (Juv. v. 83.)
The site of this town is about 900 feet above the
sea, while a very steep and almost isolated rock,
crowned by a Saracen castle, rises about 500 feet
higher: this is undoubtedly the site of the ancient
Arx or citadel, the inaccessible position of which is
repeatedly alluded to by ancient writers. Forts
of the ancient walls may be traced as intervals all
over the site of the whole town, and a temple of
which was evidently occupied by the ancient
city. Numerous fragments of ancient buildings are
scattered over its whole surface, including exten-
sive reservoirs of water, sepulchres, tessellated
pavements, &c., and the remains of a spacious edifice,
commonly called a Naumachia, but the real destin-
ation of which is difficult to determine. But so far the most remarkable monument remaining at
Tauromenium is the ancient theatre, which is one of
the most celebrated ruins in Sicily, on account both
of its remarkable preservation and of the surpassing
beauty of its situation. It is built for the most
part of brick, and is therefore probably of Roman
date, though the plan and arrangement are se-
verely Greek. It was probably one of the most
imposing of ancient theatres; whence it is supposed that the present structure was rebuilt upon the foundations of an
older theatre of the Greek period. The greater part
of the seats have disappeared, but the wall which sur-
rounded the whole circus is preserved, and the pro-
scriptions with the back wall of the scene and its
appendages, of which it remains in most ancient
theatres, are here preserved in singular is-
tegrity, and contribute much to the picturesque
TAUROCYTHAЕ.

The ruins of Tauromenium are described in detail by the Duke of Serra di Falco (Antichità della Sicilia, vol. v, part iv.), as well as by most travellers in Sicily. (Swinburne's Travel, vol. ii. p. 380; Smyth's Sicily, p. 129, &c.)

[The text continues with descriptions of the ruins and history of Tauromenium, mentioning its location, the remains of its city walls, and its importance in the past.

COIN OF TAUROMENIUM.

TAUROCYTHAЕ (Ταυροκύθαι, Ptol. iii. 5. § 29), called by Pliny Tauri Sicylia (v. 12. a. 26), a people of European Sarmatia, composed of a mixture of Taurians and Scythians. They were seated to the W. of the Iassos, and the district which they inhabited appears to have been called Taurocythia. (Cf. Stраб. ap. Pld., p. 250, Knipt. M. 77; Procop. de Aed. iii. fin.)

TAURUS MONS (Ταυρις), one of the great mountain ranges of Asia, the name of which is believed to be derived from the Aramaic Tur or Tura, l. e., a high mountain or Alp, and accordingly is in reality the Sangi of oriental literature, and all the high mountains of Asia. The name has even been transferred to Europe, for the Taurian Chersonesus in Sarmatia and the Taurisci in the Norican Alps appear to owe their name to the same origin. We cannot wonder therefore when we find that Erato- sthenes (app. Strab. xv. 659) and Strabo (i. ii. 68, 126, x. p. 490) apply the name to the whole range of mountains extending from the Mediterranean to the eastern ocean, although their connection is often broken. This extent of mountains is, according to Strabo's calculation (xi. p. 490), 45,000 stadia in length, and 3000 in breadth. But in the narrower and common acceptance Mount Taurus is the range of mountains in Asia Minor which begins at Cape Sorus or Chelidon on the coast of Lycia, which for this reason is called by Mela (i. 15) and Pliny (v. 28) Promontorium Tauri. It was, however, well known to the ancients that this promontory was not the real commencement, but that in fact the range extended to the south-western extremity of Asia Minor. (Strab. ii. p. 129, xi. p. 520, xiv. p. 651, 666; Procop. Aed. i. 5, in his role and precipitous mountain, and runs without any interruptions, first in a northern direction between Lycia and Pamphylia, then in an eastern direction through Pisidia and Isauria as far as the frontiers of Cilicia and Lycaonia. There it separates into two main branches. The one proceeds north-eastward under the name of Antitaurus (Ἀντιτάουρος), and surpasses the other in height. It runs through Cappadocia, where it forms Mount Argaus (Αργαύρος), and Armenia, where it is called Mons Capitolis, and through the Montes Moschici it is connected with the Caucusan, while a more southerly branch, under the names of Abies and Macina or Maessa, runs through Armenia towards the Caspian sea. The second branch, which separates itself on the frontiers of Cilicia and Lycaonia, retains the name of Taurus, and proceeds from Cilicia, where it forms the Portae Ciliciae, and sends forth Mons Amarus in a southern direction, while the main branch proceeds through Cappadocia. After being broken through by the Euphrates, it again sends forth a southern branch under the name of Mons Massus. The name Taurus ceases in the neighbourhood of Lake Ariae, the mountain further east having other names, such as Niphatas, Zagrus, &c. Most parts of Mount Taurus, which still bears its ancient name, were well wooded, and furnished abodes of timber to the maritime cities on the southern coast of Asia Minor."

TAURUS PALUS, a stony island in the coast of Narbonensis, west of the delta of the Rhone. It is named in the verses of Aevius, quoted in the article Fucor Juliae, and to the verses there cited may be added the following verse:—

"Taurus paludem namque gentii (geniil) va- cant."

But I. Vossius in his edition of Mela (ii. 5, note) writes the verses of Aevius thus:—

"In usque Taphrum pertinet, Taphron paludem namque gentii vocant; an alteration or corruption which D'Anville justly condemns, for the dæm is still named Tavro, or vulgarly Tus."

TAXGAETIUM (Ταξγατιών), a place assigned by Ptolemy (ii. 12. § 5) to Rhæsia, but which more properly belonged to Vindicia, was situated on the northern shore of the Lacus Brigintius, and probably on the site of the modern Lunda. [L. S.]

TAXILLA (Takoilis), Ptol. vii. 1. § 45, a place of great importance in the Upper Eniadis, between the Indus and Hydaspe, which was visited by Alexander the Great. It is said to have been ruled at that time by a chief named Taxiles, who behaved in a friendly manner to the Greco-Roman king. The country around was said to be very fertile, and more abundant than even Egypt (Strab. xv. pp. 698—714). There can be little doubt that it is represented by the vast ruins of Manîeûla, which has in modern times been the scene of some very remarkable researches (Elphinstone, Cubb., p. 79; Burnes, Tirza, i. 65, ii. 470). The famous Tepes of Manîeûla, which were examined by General Venuti and others (Asiatic Res. xvii. p. 665), lie to the eastward of Kavat-pindi. Wilson considers Taxila to be the same as the Takkasa of the Hindus (Arama, p. 196).

TAYGETUS. [Laconia, pp. 108, 109.]

TAZUS (Σταζύος, Ptol. iii. 6. § 6). 1. A town in the SE. part of the Chersonesus Taurica.

TEA'NUM (Ταοβινας; Etra. Teanensis: Civitatis), sometimes also called TANUM APULUM (Gic. pro Cluent. 9; Ταοβινας Απολος, Strab. Εθ. Teanenses Apuli), to distinguish it from the Campanian city of the
same name, was a city of Apulia, situated on the rightank of the river Fronto (Fortore), about 12 miles
from from [unintelligible]. It is said to have been one of the
most considerable cities of Apulia before its conquest
by the Romans; but its name is first mentioned in
the C. 318, when, in conjunction with Cassinum, it
was submitted to the Roman consul M. Furius Flacci-
nator and L. Plantas Vena. (Liv. ix. 20.) It is
again noticed during the Second Punic War, when it
was selected by the dictator M. Munius Perus as the
place for his winter-quarters. (Id. mem. 24.)
Cicero incidentally notices it as a municipal
town, at the distance of 16 miles from Larinum
(Cic. pro Cest. 9), and its name is found in all
the geographers among the municipal cities of Apul-
ia. (Strab. vi. p. 285; Med. i. 4. § 6; Plin. iii.
11. s. 16; Ptol. ii. i. § 72.) Its municipal rank in
Syrac. speaks by an inscription, as well as by the
Liber Coloniarum, and it is clear that it never at-
tained the rank of a colony. (Orell. Inscr. 140;
Lob. Col. p. 210.) Its ruins still exist at a place
called Civitate, near the remains of a Roman bridge
(now called the Ponte di Civiate, over the Fortore,
by which the ancient road from Larinum to Loceria
crossed the river. The distance from the site of Larinum
agrees with that stated by Cicero of 16 miles
(the Tabula erroneously gives only 12), and
the discovery of inscriptions on the spot leaves no
doubt of the identification. Considerable remains of
the walls are still extant, as well as fragments of
other buildings. From these, as well as from an in-
scription in which we first meet reference of the "Ordo
splendidissimae Civitatis Teanenum," it is
probable that it continued to be a flourishing town
under the Roman Empire. The period of its final
decay is uncertain, but it retained its episcopal see
down to modern times. (Holsten. Not. ad Clever.
p. 279; Romanelli, vol. ii. p. 291; Mommsen, Inschr.
R. K. p. 271.)

The district of Teano as situated at some
distance inland from the lake, of the name which he
does not mention, but which is clearly the Lacus
Pantanus of Pline, now called the Lago di LESSA.
From an inscription found on its banks it appears
that this was comprised within the territory of Te-
num, which thus extended down to the sea (Roma-
neri, l. c.), though about 12 miles distant from the
coast.

Several Italian topographers have assumed the
existence of a city in Apulia of the name of Teate,
distant from Teanum (Giovannetti. Sito di Avea,
p. 13; Romanelli, vol. ii. p. 286); but there seems
no doubt that the two names are only different forms
of the same, and that the Teate pull of Livy
(Liv. ix. 20) are in reality the people of Teanum.
It is true that that writer mentions them as if they were
distinct from the Teanenses whom he had mentioned
just before; but it is probable that this arises merely
from his having followed different annalists, and that
both statements refer in fact to the same people,
and are a repetition of the same occurrence. (Mommsen,
Univ. des. Diss. p. 301.) In like manner the
Taste mentioned in the Liber Coloniarum (p. 261)
is evidently the same place called in an earlier part
of the same document (p. 210) Teanum. [E. H. B.]

TEANUM (Teanum; Edh. Teanensis; Teano),
sometimes called for distinction's sake TEANUM
SIDICINUM (Liv. xiii. 57; Cic. cd. Att. viii. 11;
Piny. de Re. p. 257; Mommsen, Teaneum, Strab. v.
p. 237), an important city of Campania, situated in
the interior of that province, on the Via Latina,
TEARI JULIENSES.

Calcis (Caesae). The most important are those of an amphitheatre and a theatre, situated near the Via Latina; but numerous remains of other buildings are found scattered over a considerable space, though for the most part in imperfect preservation. They are all constructed of brick, and in the reticulated style, and may therefore probably be all referred to the period of the Roman Empire. Numerous inscriptions have also been found, as well as coins, vases, intaglios, &c., all tending to confirm the account given by Strabo of its ancient prosperity. (Romanelli, vol. iii. p. 456; Hoare's Class. Tour, vol. i. pp. 249—264; Mommsen, Inscr. R. N. pp. 208, 209).

At a short distance from Teano are some mineral springs, now called Le Caldorelle, which are evidently the same with the 'aqua scillacea,' mentioned both by Pliny and Vitruvius as existing near Teanum. (Plin. xxxi. 2. s. 5; Vitruv. viii. 3. § 17.) The remains of some ancient buildings, called Il Bagno Nuovo, are still visible on the spot. [E. H. B.]

COIN OF TRANUM SIDICINUM.

TEARI JULIENSES, the inhabitants of a town of the Hieracenses in Hispania Tarraconensis (Plin. iii. 3. § 4). It is called by Ptolemy Tavaronia, and is probably the modern Tavarnia. [T. H. D.]

TEARUS (Plin. iv. 11. s. 18; Tavara, Herod. iv. 90), now Teare, Deura, or Dure, a river in the SE. of Thrace, flowing in a SW. direction, until it joins the Contadesos, their united waters falling into the Agrianes, one of the principal eastern tributaries of the Hellespont. The Via Egnatia, supposed to have been a reservoir for water, and two temples, now converted into churches. One of these, the church of St. Paolo, and considered, but without any authority, as a temple of Hercules, was erected by the Vetii Marcellus above noticed; the other, from the name of St. Maria del Tri- caglio which it bears, has been considered as having been dedicated to Diana Trivia. All these edifices, from the style of their construction, belong to the early period of the Roman Empire. Besides these, numerous mosaics and other works of art have been discovered on the site, which attest the flourishing condition of Teate during the first two centuries of the Christian era. (Romanelli, vol. iii. pp. 104—109; Craven, Abruzzi, vol. ii. pp. 8, 9.) [E. H. B.]

COIN OF TEATE.

TEBENDA (Tebenida), a town in the interior of Pontus Galaticus (Ptol. v. 6. § 9), is no doubt the same as the Tebenna mentioned by Anna Comnena (p. 364, v.) as situated in the vicinity of Trapezus. [L. S.]

TECELLA. 1117

limits of its municipal district seem to have coincided with those of that people. We learn from the Liber Coloniarum that it received a body of colonists under Augustus, but it did not bear the title of a colony, and is uniformly styled in inscriptions a municipium. (L. Col. p. 258; Orell. Inscr. 2175, 3833; Mommsen, Inscr. R. N. pp. 276, 279.) It derived additional splendour in the early days of the Empire from being the native place of Asinius Pollio, the celebrated statesman and orator; indeed the whole family of the Asinii seem to have derived their origin from Teate. Herius Asinius was the leader of the Marrucini in the Social War, and a brother of the orator is called Catullus "Marrucinum Asinius" (L. Petr. Catull. i. 12.) The family of the Vetti also, to which belonged the Vetiius Marcellus mentioned by Pliny (ii. 53. s. 85), appears to have belonged to Teate. (Mommsen, L. c. 5311.)

The Itineraries place Teate on the Via Valeria, though from the position of the town, on a hill to the right of the valley of the Aternum, the road must have made a considerable détour in order to reach it. (Itin. Ant. p. 310; Tab. Peut.) Its name is also noticed by P. Diaconus (ii. 20), and there seems no doubt that it continued throughout the middle ages to be a place of importance, and the capital of the surrounding district. Chieti is still one of the most considerable cities in the Marches of Italy, with above 14,000 inhabitants, and is the see of an archbishop. Still existing remains prove that the ancient city occupied the same site as the modern Chieti, on a long ridge of hill stretching from N. to S., though it must have been considerably more extensive. Of these the most important are the ruins of a theatre, which must have been of large size; those of a large edifice, supposed to have been a reservoir for water, and two temples, now converted into churches. One of these, now the church of St. Paolo, and considered, but without any authority, as a temple of Hercules, was erected by the Vetii Marcellus above noticed; the other, from the name of St. Maria del Tricaglio which it bears, has been considered as having been dedicated to Diana Trivia. All these edifices, from the style of their construction, belong to the early period of the Roman Empire. Besides these, numerous mosaics and other works of art have been discovered on the site, which attest the flourishing condition of Teate during the first two centuries of the Christian era. (Romanelli, vol. iii. pp. 104—109; Craven, Abruzzi, vol. ii. pp. 8, 9.) [E. H. B.]

TECE'LLA (Tevelia), a town placed by Ptolemy
TECMON.

(ii. 11. § 27) in the north of Germany, perhaps in the region of the Chauci on the left bank of the Visurgis (Weser). Its site may probably be looked for near or at the village of Zobet, about 3 miles from the western bank of the Weser. (Reichard, Germancia, p. 245.)

TECMON (Τεκμόν; Ekk. Tekmon), a city of Molossia in Epiusus, incorrectly called by Stephanus B. a city of Thessaly, taken by L. Ancius, the Roman commander, in B.C. 167. Leake supposes that Geráminta, near Kúreango, about 20 miles to the W. of Jodassina, may have been the site of Tecmon or Horreum, which Livy mentions in connection with Tecmon. (Liv. xiv. 26; Steph. B. s. a. l.; Leake, Northern Greece, vol. iv. p. 83.)

TECTOSAGES (Τεκτόσαγης, Ptol. vi. 14. § 9), a people of Scythia within Imusa. [T. H. D.]

TECTOSAGES. [Volca.

TECTOSAGES, TECTOSAGAE, or TECTOSAGI (Τεκτόσαγες, Τεκτόσαγος), one of the three great tribes of the Celts or Gallo-Romans in Asia Minor, of which they occupied the central parts. For particulars about their history, see GALATIA.

They were probably the same tribe as the one mentioned by Polybius under the names of Agsasages or Egsagae. (Polyb. v. 33, 77, 78, 111.)

TECTUM. [Threx.]

TEDANIUS (Τύδανιος), a small river of Illyricum (Ptol. ii. 16. § 3), on the frontier of the district, which was not in all probability the modern Zovagno. [L. S.]

TEGEA (Τέγεα, Steph. B. s. a. l.), a town of Cretes, which, according to legend, was founded by Agamemnon. (Vell. Pat. i. 1.) The coins which Sestini and Pellerin attributed to the Cretan Tegae have been restored by Eckhel (vol. ii. p. 391) to the Arcadian city of that name. [E. B. J.]

TEGEA (Τέγεα, Iom. Τέγεα; Etk. Tegêreia, Tegakes), one of the most ancient and powerful towns of Arcadia, situated in the SE. of the country. Its territory, called TEGESTAS (Τεγέστα), was bounded by Cynaria and Argolis on the E., from which it was separated by Mt. Parthenium, by Leconia on the S., by the Arcadian district of Messalia on the W., and by the S. range of the N. The Tegestae are said to have derived their name from Tegestas, a son of Lycon, and to have dwelt originally in eight, afterwards nine, demes or townships, the inhabitants of which were incorporated by Alexos in the city of Tegae, of which this hero was the reputed founder. The names of these nine townships of which were founded by Panasina, are: Gareasitas (Γαρασίτα), Phylaacoci (Φυλακείς), Cystinares (Κυστιναρείς), Potesches (Ποτέσχης), Euxineca (Εὐξινηκείς), Myronia (Μυρονία), Euchechemia (Εὐχεκέμης), to which Abtopodastes (Ἀβτοποδαστής) was added as the ninth in the reign of king Aphilandrus. (Pass. viii. 3, § 4, viii. 43. § 1.) The Tegestae were early divided into 4 tribes (φακεῖς), called respectively Cystinares, Phylaacoci, Euxineca, Myronia, Abtopodastes (Ἀβτοποδαστής), and Euchechemia (Εὐχεκέμης), to each of which became a certain number of metoeci (μετοεῖς) or resident aliens. (Pass. viii. 53. § 6; E. B. J., Corp. Inscr. no. 113.)

Tegae is mentioned in the Iliad (ii. 607), and was probably the most celebrated of all the Arcadian towns in the earliest times. This appears from its heroic renown, since its king Echeclus is said to have slain Hyllus, the son of Heracles, in single combat. (Herd. ix. 26; Pass. viii. 43.) The Tegestae offered long-contested resistance to the Spartans, who attempted to extend their dominion as far as N. In one of the wars between the two kings, Cercius or Charrilos, king of Sparta, came with an oracle which appeared to promise victory to the Spartans, invaded Tegæa, and was as expected, but was taken possession of by the Thracians who had survived the battle. (Herd. i. 6; Plut. viii. 43. § 3, 4; L. S. § 4.) More than two centuries afterward, in the reign of Leon and Agesilaus, the Spartans again fought unsuccessfully against the lacedaemonians, in the following generation, in the time of King Agesilaus, while the Spartan king was engaged in the possession of the bones of Achilles with an oracle, defeated the Tegestae and compelled them to acknowledge the supremacy of Sparta. (Herd. c. 560.) (Herd. i. 65, 67, Pass. vii. 4.)

Tegae, however, still retained its independence, though its military force was a trifle more than that of W. Arcadia. It was considered as the second military power in the Peloponnesus having the place of honour on the left wing of the allied army. Five hundred of the Tegeans sat at Thermopylae, and 3000 at the battle of Plataea, half of their force consisting of hopes and light-armed troops. (Herd. vii. 502. c. 6n. v. 57. c. 6.)

Soon after the battle of Plataea, the Tegeans were again at war with the Spartans, in the name of which, however, we have no information. We only know that the Tegestae fought two years with the Spartans between B.C. 479 and 474, in which each time defeated; first in conjunction with Argives, and a second time together with the Arcadians, except the Messenians, and the Messenian Jews. (Herd. v. 71; Pass. in. 11. § 7.) About this time, and also at a subsequent period, Tegae, and especially the name of Athena Alea in the city, was a frequent place of refuge for persons who had received temporal or ecclesiastical nomination to the Spartan government. Elsewhere the Tegeans (Herd. in. 37. 57.) and Panasina (Herd. vi. 72; Xenom. hall. iii. 5. § 3; Pass. viii. 6. § 6.)

In the Peloponnesian War the Tegeans were among the allies of the Spartans, to whom they accepted faithfully both on account of their possession of an ancient constitution, and from their jealousy of Messalina (Messalia), a district of Arcadia, which was the frequent seat of a Tegesia, which they frequently attacked. [For Arcesilaus see MANTELE.] Thus the Tegestae were forced to join the Argives in the alliance against Sparta in B.C. 481, but they were the Lacedaemonians in their expedition against Argos in 418. (Thuc. v. 33. 5.) They were certainly on the side of the Spartans in the Corinthian War, 394. (Xenom. hall. iv. 2. § 12.) After the battle of Leuctra, however (371), the Spartans put in Tegae was expelled, and the city joined the Arcadian towns in the foundation of Megapoleis.
in the formation of the Arcadian confederacy. (Xen. Hell. vi. 5. § 6, seq.) When Mantinea for a few years afterwards quarrelled with the supreme Arcadian government, and formed an alliance with its old enemies, it separated from the confederacy, and fought under Epaminondas against the Spartans at the great battle of Mantinea, 362. (Xen. Hell. vii. 4. § 56, seq., vii. 5. § 5, seq.)

Tegae at a later period joined the Aetolian League, but soon after the accession of Cleomenes III. to the Spartan throne it formed an alliance with Sparta, together with Mantinea and Orchomenus. It thus became involved in hostilities with the Achaeans, and in the war which followed, called the Cleomenian War, it was taken by Antigonus Doson, the ally of the Achaeans, and annexed to the Achaean League, B.C. 222. (Poli. ii. 46, 54, seq.) In 218 Tegae was attacked by Lycurgus, the tyrant of Sparta, who was usually in the service of the Achaeans. (Poli. v. 17, xi. 18.) In the time of Strabo Tegae was the only one of the Arcadian towns which maintained its independence (Strab. xiv. 4. § 5), and it was still a place of importance in the time of Pausanias, who has given us a minute account of its public buildings. (Paus. viii. 45—48, 53.)

Tegae was entirely destroyed by Alaric towards the end of the 4th century after Christ. (Cland. B. Gec. 576; comp. Zosim. v. 6.)

The territory of Tegae formed the southern part of the plain of Tripoliotis, of which a description and a map are given under MANTINEIA. Tegae was about 10 miles S. of the latter city, in a direct line, and about 3 miles SE. of the modern town of Tripoliotis. Being situated in the lowest part of the plain, it was exposed to inundations caused by the waters flowing down from the surrounding mountains; and in the course of ages the soil has been considerably raised by the siltations brought down by the waters. Hence there are scarcely any remains of the city visible, and its size can only be conjectured from the broken pieces of stone and other fragments scattered on the plain, and from the foundations of walls and buildings discovered on the slopes of Mount Tegae.

It appears, however, that the ancient city extended from the hill of Aio Scottis (St. Saviour) on the N., over the hamlets Ibrahim-Efendi and Paleok-Episkopi, at least as far as Askhria and Pisch. This would make the city at least 4 miles in circumference. The principal remains are at Pisch. Near the principal church of this village Leake found the foundations of an ancient building, of which a description and a map are given under MANOULAS, and some of the stones used in its construction were brought here. The church was divided by a large stone, and, according to tradition, this was the site of the ancient temple of Athena Ales. This temple was said to have been originally built by Alesus, the founder of Tegae; it was burnt down in B.C. 594, and the new building, which was erected by Scopas, is said by Pausanias to have been the largest and most magnificent temple in the Peloponnese (Paus. viii. 45. § 4, seq.; for details see Dict. of Biogr. art. SCOPAS). Pausanias entered the city through the gate leading to Pallantium, consequently the south-western gate, which must have been near Pisch, and began his description with the temple of Athena Ales, and then goes across the great agora to the theatre, the remains of which traces in the ancient foundations of the ruined church of Paleok-Episkopi. Perhaps this theatre was the splendid marble one built by Antiochus IV. Epiphanes in B.C. 175. (Liv. xii. 20.) Pausanias ends his description of this building, the dedication of which is mentioned in II. (v. 53. § 9), probably the hill Aio Scottis in the N. of the town, and apparently the same as that which Pausanias elsewhere calls the Watch-Hill (Laphros Philapeis, viii. 48. § 4, and Polybius the acropolis (Epheis, v. 17). None of the other public buildings of Tegae mentioned by Pausanias can be identified with certainty, but there can be no doubt if excavations were made on its site many interesting remains would be discovered, since the deep alluvial soil is favourable to their preservation.

The territory of Tegae N. of the city, towards Mantinea, is a plain of considerable size, and is usually called the "plain of Tegae" in its course to Pausanias. There was a smaller plain, separated from the former by a low range of mountains S. of Tripoliotis, and lying between Tegae and Pallantium: it was called the Manthyrion plain (Manthyrion πεδίον), from Manthyrion, one of the ancient demes of Tegae, the ruins of which are situated SW. of Tegae, on a slope of Mount Tegae, and it is said to have been a place of refuge for those who were driven out of Tegae by the city of Corinth, which was situated in this plain. (Paus. viii. 45. § 1, 54. § 4.)

The plain of Tegae having no natural outlet for its waters is drained by natural channels through the limestone mountains, called katavdrias. Of these the two most important are at the modern village of Persson and at the mouth of the Dikte. The former was situated in the Corythian plain above mentioned, at the foot of Mt. Parthenium, and the latter is the marsh in the Manthyrion plain, SW. of Tegae. The chief river in the district is now called the Saranta-palamos, which is undoubtedly the Alpheus of Pausanias (viii. 54. § 1, seq.). The Alpheus rose on the frontiers of Tegae and Sparta, at the foot of Mount Phyllace (Pholien, near Krsa Vrgaia), one of the ancient demes of Tegae, and, as we may infer from its name, a fortified watch-tower for the protection of the pass. A little beyond Phyllace the Alpheus receives a stream composed of several mountain torrents at a place named Symolal (Symlalala); then flows through the Corythian plain, and enters the katavdrias at Persson. Pausanias, on the other hand, says (viii. 54. § 2) that the Alpheus descends into the earth in the Tegaeatic plain, reappears near Assa (SW. of Tegae), where, after joining the Eurotas, it sinks a second time into the earth, and again appears at Assa. Hence it would seem that the Alpheus anciently flowed in a north-easterly direction through the katavdrias, and entered the katavdrias at the marsh of Takti, in the Manthyrion plain. There is a tradition that the course of the katavdrias changed by a Turk, who acquired property in the neighbourhood, because the
who enumerates the Turgișia among the "spir" in the interior of Lucania (Pis. iii. 11. 16); as the Liber Columbarum mentions the "Portugumi Tegianorum" among the Presbyteria Isma, as the Tegienses' name is preserved by inscriptions. For it was some source we learned that it was a town of uncommon, while the discovery of them in the nisipolitans. Diorno leave no doubt that those place remains ancient Tegium. (Rosenzel, vol. i. c. 3. Memminger, Iscr., N. R. pp. 18, 19.) It lies on a hill about 4 miles west of La Sali, and gives the name of Valle di Diano to the whole of the extensive upland valley which is traversed by the evens' sagrove in the upper part of its course. Remains of the ancient city are still visible to the west of the foot of the hill (Rosenzel, l. c.)

TEGNA, in Gallia Narbonensis, was an old Roman road on the east bank of the Rhone and a succession of small forts and stations. The name occurs in the Table, in which the place is at xii. from Valeria. Tegua is Tegna, one of which in the writings of a later date is Lecon. A mile from Tegua the road ascends to the small place of Tegna, and the mountains there appear to the Rhone. (D'Anville, Notice, etc.; Cert. des. lecs.)

TEGNA, [Tegula], TEGULATA, in Gallia Narbonensis, is the Itima, east of Aquae Sextiae, (Ad in) in the road to Ad Turrim (Forsse). The distance across Aquae Sextiae to Tegula is xvi. or xvi. and the distance to Ad Turrim xvi. The distance across the road between Aquae Sextiae and Tegula is xvi. to exceed the direct distance between Tegula and Ad Turrim. Tegula is supposed to be the Le Grande Popera near the bourg of Poviers or Pouiers, some place somewhere about the place where C. Maris drains the Tettisanus n. c. 102, and where a prince was erected to commemorate the great victory. A monument is said to have existed to the fifth n. c. 3. and the tradition of this great battle is yet effaced. Poviers is said to be a curiosity of Patrivi Campi. (D'Anville, Notice, etc.)

TEGULICUM [Tegului].

TEGURA, [Tegusa], TEGURIA, [Tegusa], a river of Bocotia, near Orchomenum, and distant 60 stades of the marshes of the river Molus. It was assigned for its source and Temple of Apollo, who was said to have been born there. In its neighborhood was a mountain named Debra. Leaks place it at Xerophyton, situated 3 miles ENE of Xerophyton (Orchomenum), on the heights which overlook the mountains. (Plut. Dei. 16, de Def. Or. s. 6; Lycochr. 646; Steph. B. n. s.; Leake, Itin., vol. i. c. 465, 152; Carp. Bc. Roies, vol. i. p. 196.)

The Roman poets use the adjectival Teugus or Tegius as equivalent to Arcadian; thus it is given as an epithet to Pan (Virg. Georg. i. 18), O Bacchus, daughter of Lycaon (Ov. Fast. i. 167). Absent (Ov. Met. viii. 37n, 589), Carmenta (Ov. Fast. i. 627), and Mercury (Stat. Sil. i. 54).

COIN OF TEGRA.

TEGIANUM (Etli. Tegianum; Diano), a municipal town of Lucania, situated in the interior of the country, to the left bank of the river Tegius. Its name is found only in a corrupt form in Pliny,
TEHAPHNES.

TEHAPHNES. [TAMPAHIA.] TELCHIUM (Τέλχιοι), a town of Aetolia Epictetus, on the borders of Locria, and one day's march from Cromyleum. (Thuc. iii. 96.)

TEKOAI (Τεκώα, 1 Maccab. ix. 33; Θεκωλ, Joseph. Vit. 75), a town of Palestine in Judah, to the south of Bethlehem. It was the residence of the wise woman who pleaded in behalf of a friend of hers. Rehoboam, the birthplace of the prophet Amos, and gave its name to the adjacent desert on the east. (2 Sam. xiv. 2; 2 Chron. xi. 6; Amos, i. 1; 2 Chron. xx. 20; 1 Macc. ix. 33.) Jerome describes Tekoah as situated upon a hill, 6 miles south of Bethlehem, from which city it was visible. (Hier. Procem. et Amos. Comment. vii. 1.) The name of Tekoa, and is described by Robinson as an elevated hill, not steep, but broad on the top, and covered with ruins to the extent of four or five acres. These consist chiefly of the foundations of houses built of squared stones; and near the middle of the site are the remains of a Greek church. (Robinson, Res. Rel. vol. i. p. 496, 2nd ed.)

TELAMON (Τελαμόν), a city on the coast of Etruria, situated on a promontory between the Mens Argentario and the mouth of the Umbro (Ombrore), with a tolerable port adjoining it. The story told by Polybios of its having derived its name from the hero Telamon, who accompanied the Argonauts on their voyage, may be safely dismissed as an etymological fable (Diod. iv. 56). There seems no reason to doubt that it was originally an Etruscan town, but no mention of its name occurs in history during the period of Etruscan independence. It is first noticed by Ptolemy in n. c. 225, when a great battle was fought by the Romans in its immediate neighbourhood with an army of Casalpine Gauls, who had made an irruption into Etruria, but were intercepted by the consuls C. Attilius and L. Aemilius in the neighbourhood of Telamon, and totally defeated. They are said to have lost 40,000 men, and 10,000 horses, of whom were some of their chiefs or kings (Pol. 1. 27—31). The battle, which is described by Polybios in considerable detail, is expressly stated by him to have occurred "near Telamon in Etruria." Frontinus, in speaking of the same battle, places the scene of it near Populonia (Strat. i. 2. § 7), but the authority of Polybios is certainly preferable. The other mention of Telamon that occurs in history is in n. c. 87, when Marius landed there on his return from exile, and commenced gathering an army around him. (Plut. Mar. 41.) But there is no doubt that it continued to exist as a town, deriving some importance from its port, throughout the period of the Roman domination. Its name is found both in Mel. and Ptolemy, as "Telamon," while Ptolemy notes only the promontory of the name (Tepamou vaplor, Ptol. iii. i. § 4; Ptol. iii. 5. a. 8; Mel. ii. 4. § 9). The Itineraries prove that it was still in existence as late as the 4th century (Tab. Peut.; Isid. Maur. p. 500, where it is called "Portus Talamone"); but from this time all trace of its existence disappears, and the place where it was erected on the site. This, with the miserable village which adjoins it, still bears the name of Telamone; and the shores of the bay are lined with remains of Roman buildings, but of no great interest.

VOL. II.

and there are no relics of Etruscan antiquity. (Dennis' Etymology, vol. ii. p. 245. [E. H. B.])

TELCAPHINES. [RECSUOS, p. 713.]

TELEGAEAE. [TAPEIAE.]

TELEBOAS (ὁ Τελεβόας πρωτέας, Xen. Anab. iv. 4, § 3), a river of Armenia, a tributary of the Euphrates. Probably identical with the Anzarian. (T. H. D.)

TELEPHRUS MONS. [EUBORSA.]

TELEPE. [THALI.]

TELEOS (Τελεώς: Æth. Telensis: Teleos), a considerable city of Samnia, situated in the valley of the Calor, a short distance from its right bank, and about 3 miles above its confluence with the Vulturnus. It is remarkable that its name is never mentioned during the long war of the Romans with the Samnitians, though the valley in which it was situated was often the theatre of hostilities. Its first name occurs in the Second Punic War, when it was taken by Hannibal on his first Irruption into Samnia, n. c. 217 (Liv. xxii. 18); but was recovered by Fabius in n. c. 214. (Id. xxiv. 20.) From this time we hear no more of it till it became an ordinary Roman municipal town. Strabo speaks of it as having in his time fallen into almost complete decay, in common with most of the cities of Samnia. (Strab. v. p. 250.) But we learn that it received a colony in the time of the Trumvirates (Livy. Colon. p. 238); and, though not mentioned by Pliny as a colony (the name is altogether omitted by him), it is certain, from inscriptions that it retained its colonial rank, and appears to have continued under the Roman Empire to have been a flourishing and considerable town. (Orell. Inscr. 2626; Romanelli, vol. ii. p. 423; Mommsen, Inscr. R. N. 4840—4915.) It was situated on the line of the Via Latina, or rather of a branch of that road which was carried from Teanum in Campania through Alliaia and Telesia to Beneventum (Itin. Ant. pp. 122, 304; Tab. Peut.), and this probably contributed to preserve it from decay.

The ruins of the ancient city are still visible about a mile to the NW. of the village still called Telse: the circuit of the walls is complete, enclosing a space of octagon form, which was in circumference, with several gates, flanked by massive towers. The masonry is of reticulated work, and therefore probably not earlier than the time of the Roman Empire. The only ruins within the circuit of the walls are mere shapeless mounds of brick; but outside the walls may be traced the vestiges of a circus, and some remains of an amphitheatre. All these remains undoubtedly belong to the Roman colony, and there are no vestiges of the ancient Samnite city. The present village of Telse is a very small and poor place, rendered desolate by malaria; but in the middle ages it was an episcopal see, and its principal church is still dignified by the name of a cathedral. Its walls contain many Latin inscriptions, brought from the ancient city, by its inhabitants of which migrated to the later site in the ninth century. (Craven, Abraam, vol. ii. pp. 173—175; Giustinian, Diss. Topogr. vol. iv. pp. 149, 150.)

Telsea was remarkable as being the birthplace of the celebrated Samnite leader, during the Social War. Pontius Telaenus; and it is probable (though of this we have no direct notice) that it was also that of the still more celebrated C. Pontius, who defeated the Romans at the Candine Forks.

TELIS. [RUSCING.]

40
TELLENAE. (Τέλληνας; Dio. Hal.; Tellenae, Strab.: ΞΕΧ. Tellenaeis, Tellenenseis), an ancient city of Latium, which figures in the early Roman history. According to Dionysius it was one of the cities founded by the Aborigines soon after their settlement in Latium (Dionys. l. 16), a proof at least that it was regarded as a place of great antiquity. Livy also reckons it as one of the cities of the Frisci Latinis (ii. 33), which may perhaps point to the same result, while Diodorus includes it in his list of the colonies of Alba. (Diod. vii. ep. Euseb. Arm. p. 155.) It was attacked by the Roman king Ancus Marcius, who took the city, and transported the inhabitants to Rome, where he settled them on the Aventine, together with those of Politiorium and Ficana. (Liv. i. 33; Dionys. iii. 38, 43.) Tellenae, however, does not seem, like the other two places just mentioned, to have been hereby reduced to insignificance; for its name appears again in n. c. 493 among the confederate cities of the Latin League (Dionys. v. 61); and though this is the last mention of it in history, it is noticed by both Strabo and Dionysius as a place still in existence in their time. (Dionys. i. 16; Strab. v. p. 231.) It is probable, however, that it had at that time fallen into complete decay, like Antennae and Collatia; as it is only mentioned by Pliny among the once celebrated cities of Latium, which had left no traces of their buildings on his day (Plin. iii. S. 8, 9), and from this time its name wholly disappears. The notices of Tellenae afford scarcely any clue to its position; though the circumstance that it continued to be inhabited, however slightly, down to the days of Augustus, would afford us more hope of being able to identify its site than is the case with Politiorium, Apoleae, and other places, which ceased to exist very early in its history. It is this reason that has led Nibby to identify the ruins of an ancient city at La Giostra, as those of Tellenae, rather than Politiorium, as supposed by Gell. [POLITIORIUM.]

The site in question is a narrow ridge, bounded by two ravines of no great depth, but with abrupt and precipitous banks, in places artificially scarped, and still showing extensive remains of the ancient walls, constructed in an irregular style of massive quadrangular blocks of tufo. No doubt can exist that these indicate the site of an ancient city, but whether of Politiorium or Tellenae, it is impossible to determine; though the remains of a Roman villa, which indicate that the spot must have been inhabited in the latter part of the Empire, give some additional probability to the latter attribution. La Giostra is situated on the right of the Via Appia, about 2 miles from a farm-house called Fiorano, immediately adjoining the line of the ancient high-road. It is distant 10 miles from Rome, and 3 from Le Fraschette, on the Via Appia, adjoining the one called Tellenae (Gell, 'Top. of Rome,' pp. 260—263; Nibby, Dironvii, vol. iii. pp. 146—153.)

Whether the proverbial expression of "triche Tellenae" has any reference to the ancient city of Latium or not, can hardly be determined, the origin and meaning of the phrase being involved in complete obscurity. (Varro, ap. Nos. l. 28; Arnob. Contes v. p. 52, with Calver's note.) (R. B. B.)

TELMESSUS, or TELEMESSUS (Τελεμέσσος, Telmæsos, or Telmesos: ΞΕΧ. Telmessos). 1. A flourishing and prosperous city in the west of Lycia, was situated near Cape Telmessus (Strab. xiv. p. 663), or Telmessis (Steph. B. s. e. V. Telemes- sii), on a bay which derived from it the name of

Sium Telmesium. (Liv. xxxiv. 45. L. 653 vi. 248.) On the south-west of it was Cape Telmesus at a distance of 200 stadia. Its oracle was celebrated in ancient times for their divinities and were often consulted by the Lycian (Herod. i. 73; comp. Arrian, Asis. i. 21) till the time of Strabo, however, who says as a town (νομοχώριον) it seems to have been abandoned though at a later period it appears to have been ecclesiastical see. (Herod., p. 684; comp. Festus l. 15: Plin. v. 28; Ptol. v. 3. § 2: Ptol. v. 27: Suidas. Mar. M. §§ 235, 236, spec. 39, where it is miswritten Τελμεσε.) Considerable remains of Tellmessus still exist at the town (modern), and though of recent date, parishes, as well as the living rock, are set up in the living rock, are set up. It is remarkable in Asia Minor. (Lamb. Liv., p. 198; Fellows, Asia Minor, p. 243; views of representations of the remains of Telmessus are found in the Lycia, p. 106, foll.)

3. A small town of Caria, at a distance of 20 miles from the coast, is likewise called Telmesus, and sometimes Telenae. (Strab. v. s. e.; Eusth. Mag. s. e.; Arrian, Asis. i. 21: Cic. de Div. i. 41; Plin. v. 29, xix. § 17.) The Carian Tellmessus has often been confounded with the Lycian, and it is even somewhat common to suppose that the famous Tellmessian Bucephalus was of Cretan origin. But it must be granted that at all events the name of Tellmessus has been known for a very long period in that it cannot have been the same as the Tellmessus of Tellmessus. (L. B.)

TELMESSUS, according to Paus. (ii. 20. § 1) was the outlet of the river Glaurus in Caria, and was in probability near the town of Tellmesus, in which case the name is preserved from it.

TELMESSUS SINUS, a bay between Caria and Caria, which derived its name from the town of Tellmesus (Liv. xxxvi. 16: Liv. xiv. 254); but it is more commonly known as Glaurus Sinus, and is at present called the Sius.

TELMESSUS PROMONTORIUS (Tellmessus Promontorium)

TELOBIS (Τελόβις, Ptol. vi. 6. § 11. 25): a promontory of the Jactezi in Hispania Tarraconensis Martorell. (C. L. Laborde, 'Top. i. 73: Str. iii. 72: Lett. 8.)

TELO MARTIUS (Telmæsos), in Caria. (Steph. B. s. e. V. Telemæsos, who gives the name as Telmesus, as above.) This name is not mentioned by the Ptolemaic geographer, and is rarely found elsewhere. (In. i. 593) Telus is the name of a priest in Apulia, and Oudemor uses the form Tolo, but the latter name is more properly Tolo. As soon as (xvii. 445) is supposed to allude to the same name when he says—

"Et Neptunioclases transverset in Tell."
TELOS. 

may be Toloum-nor-Armany; and thus the modern name may enable us to correct the reading of the text. (T. G. L.)

TELOS (Τέλος; Eub. Τήλες; Dilos Τελεος; Nisoprasia, a small rocky island in the Carpathian sea, between Rhodes and Nisyros, from the latter of which its distance is only 60 stadia. Strabo (x. p. 488) describes it as long and high, and abounding in stones fit for millstones. Its circumference was 80 stadia, and it contained a town of the same name, a harbour, hot springs, and a temple of Poseidon. The attribute long given to it by Strabo is scarcely correct, since the island is rather of a circular form. The family of the Sicilian tyrant Geron originally came from Telos. (Herod. vii. 153.) According to Pliny (iv. 69) the island was celebrated for a species of ointment, and was in ancient times called Astauma. (Aen. vi. 281; Paus. ix. 35; v. 272.) The town of Telos was situated on the north coast, and remains of it are still seen above the modern village of Episcopi. The houses, it appears, were all built in terraces rising above one another, and supported by strong walls of unhewn stone. The acropolis, of which the site is still marked by a cliff, is on the top of a hill which is now occupied by a mediæval castle. Inscriptions have been found in Telos in great numbers, but, owing to the nature of the stone, many of them are now illegible. (Comp. Ross, Hellenica, i. p. 59, syl., Reisen auf den griech. Inseln, iv. p. 42, fol.)

TEMPEHUSA. [THELPHA]

TEMA, a tribe and district in Arabia, which took its name from Tenna, one of the twelve sons of Ithmael. (Ges. xxv. 15; Is. xxxii. 14; Jer. xxxv. 23; Job, vi. 19.) Ptolemy mentions in Arabia Deserta a town Themna (Θήμνη, v. 19. § 6). Tenna is distinguished in the Old Testament from Teman, a tribe and district in the land of the Edomites (Idumea), which derived their name from Teman, a grandson of Esau. (Ges. xxxvi. 11, 15, 42; Jer. xlix. 7, 20; Ezek. xxv. 13, Amos, i. 12; Hab. iii. 3; Obad. 9.) The Temanites, like the other Edomites, are celebrated in the Old Testament for their wisdom (Jerem. xlix. 7; Obad. 8; Baruch, iii. 22, sect.); and hence we find that Elias had, in the book of Kings, a well-known prophecy of Edom (Onomast. s. v.) represents Tenna as distant 5 miles (Eusebius says 15 miles) from Petra, and possessing a Roman garrison.

TEMALA (Τημαλα, Ptol. vii. 2. § 3), a river in the Auras Region, in the district of India extra Gangem, probably now represented by the great river, the Indus. Near it was a town which bore the same name. (V.)

TEMATHIA. [MERENNA, p. 341, b.]

TEMENIUM (Τημενίων), a town in the Aegina, at the upper end of the Argolic gulf, built by Temenus, the son of Aristomachus. It was distant 50 stadia from Nauplia (Paus. ii. 35, § 2), and 26 from Argos. (Strab. viii. p. 563.) The river Phrisus, flowing into the sea between Temenia and Lerna. (Paus. ii. 36, § 6, ii. 38, § 1.) Pausanias saw at Temenium two temples of Poseidon and Aphrodite and the tomb of Temenus (ii. 38, § 1). Owing to the marshy nature of the plain, Leake was unable to explore the site of Temenium; but Ross identifies it with a mound of earth, on the foot of a mountain in the sea, near the town, forming a harbour, and upon the shore foundations of buildings, fragments of pottery, &c. (Leake, Morias, vol. ii. p. 476; Ross, Reisen im Peloponnes, p. 149; Curtius, Peloponnesien, vol. ii. p. 383.)

TEMENOTHYRA (Τημενοθύρα, Paus. i. 35, § 7; Eub. Τημενοθυρά, Coine), a small city of Lydia, according to Pausanias (i. c.), or of Pergamum, according to Hierocles (p. 668, ed. Wess.). It would seem to have been situated upon the borders of Mycia, since the Trimenothirides (Τριμενοθερίδες) —which name is probably only another form of the Temenothyrades—are placed by Ptolemy (v. 2. § 15) in Mycia. (Eckhel, vol. iii. p. 112.)

COIN OF TEMENOTHYRA.

TEMESA or TEMPSA (Τημέςαν; Paus. ii. 35, § 2; Eub. Τήμηςα, Strab. Τήμηςα, Steph. B.; Ptol. Τήμηςα, Paus. Τήμηςα, a town in the Province of Bruttium, a little to the N. of the Gulf of Hippium, or Golfo di Sis. Eufemica. Strabo tells us that it was originally an Aesarian city, but subsequently occupied by a colony of Astolians who had accompanied Theseus to the Trojan War. (Strab. vi. p. 235.) Many writers appear to have supposed this to be the Temesa men. He called the Odyssey on account of its mines of copper (Odys. i. 184); and this view is adopted by Strabo; though it is much more probable that the place alluded to by the poet was Temesa in Cyprus, otherwise called Tamassus. (Strab. l.c.; Steph. B. s. a. c.; Schol. ad Hom. Odys. i. c.) We have no account of Temesa having received a Greek colony in historical times though it seems to have become to a great extent Hellenisized, like so many other cities in this part of Italy. At one period, indeed, we learn that it was conquered by the Locrians (about 480—460 a. c.); but we know not how long it continued subject to their rule. (Strab. l.c.) Neither Scylax nor-Scymnus Clitus mention it among the Greek cities in this part of Italy; but Strabo supposed that it was a Greek city before it fell into the hands of the Bruttians (Liv. xxxiv. 45). That people apparently made themselves masters of it at an early period of their career, and it remained in their hands till the whole country became subject to the dominion of Rome. (Strab. l.c.) During the Second Punic War it suffered severely at the hands, first of Hannibal, and then of the Romans; but some years after the close of the war it was one of the places selected by the Romans for the establishment of a colony, which was sent thither at the same time with that to Crotona, n. c. 194. (Liv. xxxiv. 45.) But this colony, the members of which had the privileges of Roman citizens, does not appear to have been numerous, and the town never rose to be a place of importance. Its copper mines, which are alluded to by several writers (Orig. Met. 1706; Stat. Silv. i. 1. 43), had ceased to be productive in the days of Strabo (Strab. vi. p. 256). The only mention of Temesa which occurs in Roman history is in connection with the great invasion under Africanus, when a remnant of the servile force seem to have established themselves at Tempsa, and for a time maintained possession of the town. (Cic. Verr. 2.)
TEMSIDIA.

v. 15, 16.) Its name is afterwards found in all the geographers, as well as in the Tabula, so that it must have subsisted as a town throughout the Roman Empire. (Strab. l.c.; Plin. iii. 9. s. 10; Ptol. iii. 1. § 5; Tab. Peut.) Pausanias expressly tells us of it this day; and Pliny also notices it for the excellence of its wine. (Paus. vi. 6. § 10; Plin. xiv. 6. s. 8.) The period of its destruction is unknown; but after the fall of the Roman Empire the name wholly disappears, and its exact site has never been determined. The best clue is that afforded by the Tabula (which accords well with the accounts of Pliny and Strabo), that it was situated 10 miles S. of Clampteta. If this last town be correctly placed at Assesius [CLAMPETIA], the site of Tempsae must be looked for on the coast near the Torre del Pino de Casale, about 2 miles S. of the river Serene, and 3 from Nucera. Unfortunately none of the towns along this line of coast can be fixed with anything like certainty. (Clover. Ital. p. 1286; Romantelli, vol. i. p. 33.)

Near Tempsae was a sacred grove, with a shrine or sanctuary of the hero Polites, one of the companions of Cyaneus, who was said to have been slain on the spot, and his spectre continued to trouble the inhabitants, until at length Bathymus, the celebrated Lycian, in a fit of frenzied madness, went to wrestle with the spirit, and having vanquished it, freed the city from all further molestation. (Strab. vi. p. 255; Paus. vi. 6. §§ 7—11; Suid. v. Eichos.) [E. E. B.]

TEMSIDIA (§ Teposia, Ptol. vi. 4. § 3), one of the districts into which ancient Perusia was divided. It cannot now be determined exactly what its position was in the 2nd century B.C., when the Macedonians, most probably was part of a long narrow plain which extends through that province in a direction north-west and south-east. (Lassen, in Erzr. und Grabens. Encycl. vol. xvii. p. 438.) [V.]

TEMMICE. [BOROTTA, p. 414.]

TEMNAS (Τημνας ἀποδ.), a mountain range of Mytilene, extending from the E. coast eastward into Phrygia, and dividing Mysia into two halves, a northern and a southern one. It contained the sources of the Maeandrus, Mykhas, Caelus, and Euphrates. (Grav. xili. p. 616; Ptol. vi. 2. § 13.) Har restrained (Περιγραφή, ii. p. 135) is inclined to believe that Mnas Temnas is the same as the Ak Dagh, or, as it is commonly called in mappemond, Dagh. [L. S.]

TEMNAS (Τημνας: Ech. Teposia), a town of Aeolis in Asia Minor, not far from the river Hermus, attested on a height, from which a commanding view was obtained over the territories of Cyane, Phocaea, and Smyrna. (Strab. xiii. p. 621.) From a passage in Pausanias (v. 13. § 4), it might be inferred that the town was situated on the northern bank of the Hermus. But this is irreconcilable with the statement that Temnas was 20 miles south of Cyane, and with the remarks of all other writers alluding to the place. Pliny (v. 29) also seems to be mistaken in placing Temnas at the mouth of the Hermus, for although the deposits of the river have formed an extensive deposit, the river itself is so small that the sea never extended as far as the site of Temnas. The town had already sunk decayed in the time of Strabo, though it never appears to have been very large. (Xenop. Hell. iv. 8. § 5; Herod. i. 149; Polyb. v. 77, xx. 25; Cic. pro Flacc. 18.) In the reign of Tiberius it was much injured by an earthquake (Tit. Ann. ii. 47), and in the time of Pliny it had ceased to be inhabited altogether. Its site is surely identified with the modern Menes, being stated in his Description of the Asia Minor, where it is the site of the village of Gauas-Hera. [L.]

COIN OF TEMES.

TEMPE (νὰ Τέμπης, ουστ. τείμες), a celebrated valley in the NE. of Thessaly, is 17 m. between Mounts Olimpus and Ossa, though not in the waters of the Peneus fence their upper streams. The beauty of Tempe was a subject of ancient poets, and has been described at great length in a well-known passage of Aeschylus and more briefly by Pliny: but none of the poets appear to have drawn their picture from actual observation; and the scenery is distinguished by savage grandeur than by the beauty which Aelian and others attribute to it. (Cic. livest. 232; Gr. Φ. i. 568; Virg. Georg. ii. 403; Aesch. Ag. 155; Thuc. ii. 8. s. 16.) Tempe was celebrated for its olive and vines, and its plains and fields; it is a lovely spot, possessing the mind and eyes of those who look upon it for the first time. Their terror is also increased by the height and roar of the Peneus rushing through the sides of the valley. (Liv. xiv. 6.) Be able to pass this pass, so inaccessible by nature, was deemed very important to his fortresses, one at the western entrance in a second line at Olympia, and a third in the road itself, in the middle and southern part of the valley, which could be easily defended by men. The pass is now called Lophiadon, or Wolf's Month. Col. Leahs gives about the 2 m. as a half as the distance of the road through the pass. In this space the width of the river is about 100 yards; so that the foot of the bank is about 700 yards from the mouth of the road in addition to the river. The modern road follows the road of the ancient military road made by the Romans, and runs along the right bank of the river. Leahs remarks that even Livy in his description of Tempe seems to have added embellishments to the river which he borrowed; for, instead of the river flowing rapidly and swiflly, the roads is now more tranquil and steady in its course. The remains of the fourth castle mentioned by Leahs are noticed by Leahs as standing on one side of the immense fissure in the precipices of Ossa. was it not an extremely rocky, though not inaccessible, descent from the heights into the valley; while below the ravine, the river that goes the left of the road. About half a mile beyond this fact there remains an inscription engraved upon the rock. On the right-hand side of the road, when one ascends the hill: "I. Caes. Legio Pref. Caes. Vic.," &c. It is probable that the remains of the inscription that it relates to the making of the road, though some refer it to the district; most
by Longinus in Tempe. This Longinus appears to have been the L. Cassius Longinus who was sent by Caesar from Illyria into Thessaly. (Cass. B. C. iii. 34.) When Xerxes invaded Greece, a. c. 480, the Greeks sent a force of 10,000 men to Tempe, with the intention of defending the pass against the Persians; but having learnt from Alexander, the king of Macedon, that there was another pass across Mt. Olympus which was called Thermopylae near Gomus, where the gorge of Tempe commenced, the Greeks withdrew to Thermopylae. (Herod. vii. 173.)

It was believed by the ancient historians and geographers that the gorge of Tempe had been produced by an earthquake, which rent asunder the mountains, and afforded the waters of the Peneus an easy outlet to the sea. (Herod. vii. 129; Strab. iv. p. 450.) But the Theessalians maintained that it was the god Poseidon who had split the mountains (Herod. L. c.) ; while others supposed that this had been the work of Hercules. (Diod. iv. 58; Lucan; vi. 345.)

The pass of Tempe was connected with the worship of Apollo. This god was believed to have gone thither to receive expiation after the slaughter of the serpent Python, and afterwards to have returned to Delphi, bearing in his hand a branch of laurel plucked in the valley. Every ninth year the Delphians sent a procession to Tempe consisting of well-born youths, of which the chief youth plucked a branch of laurel and brought it back to Delphi. On this occasion a solemn festival, in which the inhabitants of the neighbouring regions took part, was celebrated at Tempe in honour of Apollo Tempeites. The procession was accompanied by a flute-player. (Aelian, V. h. iii. 1; Plat. Quast. Greec. c. 11. p. 292, de Musica, c. 14. p. 1136; Böckh, Inschr. No. 1757, quoted by Grote, Hist. of Greece, vol. ii. p. 202.)

The name of Tempe was applied to other beautiful valleys. Thus the valley, through which the Helorus flows in Sicily, is called "Heloria Tempe" (Ov. Fast. iv. 477); and Cicero gives the name of Tempe to the valley of the Velinus, near Nola (ad Att. iv. 16). In the same way Ovid speaks of the "Thesmophoria Tempe," the festival celebrated in honour of Apollo at Rome.

TEMPESA. [TEMEREA.]

TEMPYRA (Ov. Tr. i. 10. 21; in Geogr. Rav. iv. 62). It is mentioned by Pausanias (i. 22, Tempeum), and in iL. Virg. p. 602, Ad Uniparum), a town in the S. of Thrace, on the Egnatia Way, between Trajano-polis and Maximinopolis. It was situated in a defile, which rendered it a convenient spot for the operations of the predatory tribes in its neighbourhood. Here the Thracians attacked the Roman army under Gna. Manlius, on their return, loaded with booty, through Thrace from Asia Minor (a. c. 188); but the want of shelter exposed their movements to the Romans, who were thus enabled to defeat them. (Liv. xxxviii. 41.) The defile in question is probably the same as the Kaparion sterto mentioned by Appian (B. C. iv. 102), and through which, he states, Gnaeus Manlius made his way to Philippi (Tafel, de Via Egnatia Porte orienti, p. 34). Paul Lucas (Trov. Voy. pp. 25, 27) regards it as corresponding to the modern Gërshine. [J. R.]

TENCTERI or TENCHTERI (Tęŋctęroś, Tęŋctęroś, and Tęŋčęra or Tęŋčęra), an important German tribe, which is first mentioned by Caesar (B. G. iv. 1, 4). They appear, together with the Usipetes, originally to have occupied a district in the interior of Germany; but on being driven from their original homes by the Suevi, and having wandered about for a period of three years, they arrived on the banks of the Lower Rhine, and compelled the Menapii who inhabited both sides of the river to retreat to the western bank. Some time after this, the Germans crossed the Rhine, established themselves on the western bank, in the country of the Menapii, and spread in all directions as far as the districts of the Eburoces and Condurali, who seem to have invited their assistance against the Romans. This happened about the year 56. The Menapii were allowed to be settled in Gaul; but Caesar, declaring that there was no room for them, promised to procure habitations for them in the country of the Ubii, who happened to have sent ambassadors to him at that time. The Germans asked for three days to consider the matter, requesting Caesar not to advance farther into their country. Expecting some treacherous design, he proceeded on his march, and an engagement ensued, in which the Romans were defeated and sustained serious losses. On the following day the chief of the Germans appeared before Caesar, declaring that their people had attacked the Romans without their orders, and again begged the German to desist from his march. Caesar, however, not only kept the chiefs as his prisoners, but immediately ordered an attack to be made on their camp. The people, who during the absence of their chiefs had abandoned themselves to the feeling of security, were thrown into the greatest confusion by the unexpected attack. The men, however, fought on and among their wagons, while the women and children took to flight. The Roman cavalry pursued the fugitives; and when the Germans heard the screams of their wives and children, and saw them cut to pieces, they threw away their arms and fled towards the Rhine; but as the river stopped their flight, a great number of them perished by the sword of the Romans, and others were drowned in the river. Those who escaped across the river were hospitably received by the Sigambri, who assigned to the Tencteri the district between the Ruhr and the Sieg. (Cass. B. G. iv. 16; Livy, Epit. lib. cxxxvii.; Tac. Germ. 33, 33; Ass. xii. 56, Hist. civ. 21, 77; Plut. Cæs. 21; Dion Cass. xxxix. 47, liv. 20, 91; Flor. iii. 10, iv. 12; Oros. iv. 50; Appian, de Rob. Gall. 4, 18; Ptol. ii. 11 § 6.) The Tencteri were particularly celebrated for their excellent cavalry; and in their new country, on the eastern bank of the Rhine, they possessed the town of Budaris (either Monheim or Düsseldorf), and the fort of Divitias. (Dio.) In the reign of Augustus, the Tencteri joined the confederacy of the Cherusci (Liv. L. c.), and afterwards repeatedly appear joining other tribes in their wars against Rome, until in the end they appear as a part of the great confederacy of the Franks. (Greg. Tur. ii. 9; comp. Wilhelm, German. p. 141; Reichard, German., p. 51; Latham, Tacit. Germ. p. 110.)

TENKA (T revs.: Th. Tendern), the most important place in the Corinthis after the city of Corinthis and her port towns, was situated south of the capital, and at the distance of 60 stadia from the latter, according to Pausanias. The southern gate of Corinth was called the Temestic, from its leading to

4 0 3
TENEBRIUM.

Tenes. Stephanus describes Tenes as lying between Corinth and Myconian, (a. n. Tævæ.) The Tenassae claimed descent from the inhabitants of Tenes, who were brought over from Troy as prisoners, and settled by Agamemnon in this part of the Corinthia; and they said that it was in consequence of their Trojan origin that they worshipped Apollo above all the other gods. (Paus. ii. 5. § 4.) Strabo also mentions it among the Teucri of the polis Tenessae, and says that Tenes and Tenes had a common origin in Tenes, the son of Cyanaus. (Strab. viii. p. 380.) According to Dinysius, however, Tenes was of late foundation. (Cic. ad Att. vi. 2. § 3.) It was at Tenes that Odysseus was said to have passed his childhood. It was also from this place that Archias took the greater number of the colonists with whom he founded Syracuses. After the destruction of Corinth by Messene, Tenes had the good fortune to continue undisturbed, because it is said to have assisted the Romans against Corinth. (Strab. l. c.) We cannot, however, suppose that an insignificant place like Tenes could have acted in opposition to Corinth and the Achæans Leagued; and it is more probable that the fear entertained by Mnesicles in consequence of their pretended Trojan descent and consequent affinity with the Romans themselves. However this may be, their good fortune gave rise to the line:

... οἰκείως ἐν Ἐλεασίᾳ, γενὸς ἐν τῷ στίγμα Τενέας....

Tenes lay in the mountain valley through which flows the river that fed into the Corinthian gulf to the east of Corinth. In this valley are three places at which vases and other antiquities have been discovered, namely, at the two villages of Chialissi and Kima, both on the road to Nauplia, and the latter at the very foot of the ancient road Cenopera, "see p. 301. i. 1. and at the village of Alchola, on the road to Sparta. In the Sinae of Alchola there was found an ancient temple of Apollo, a striking confirmation of the presence of the worship of this god in the district. The Tenassae would therefore appear to have dwelt in scattered villages at these three spots and in the intervening country, but the village of Tenes, properly so called, was probably at Chialissi, since the distance given to Carnea corresponds to the 80 stades of Pausanias. This fact is the means from the Arvini into the Cynus by Kima and Chialissi, there can be no doubt that it was in this road that Arvini themselves took the Arvini in Cynus in B.C. 393 (I. n. Paus. vi. 3. § 6.) In the spot of Xanthus, near the modern Vouraio de Kourou, the ancient temple was undoubtedly sacred to Apollon, for it was impossible to believe that Arvini could have entered from the Arvini into the Tenean territory. Moreover, we learn from I. n. Paus. vi. 3. § 6. that the well-known temple of Apollo was the oldest temple in the district. The same temple was called Carnea, as the ancient text shows. (I. n. Paus. vii. 3. § 1. p. 330.) Romans, p. 44) Carnea, Pol.-Nomon...

TENEDOS. (Tenedos: E. Tenedos, Turk. Bogosbâa—Achacma), an island of 100 acres, from which its distance is only thirteen, from Cape Sigeum it is 12 miles distant. (Cass. x. 604; Plin. ii. 106. v. 28.) It was an island of Leucophry, from its white cliffs. Calvini, Prior Lycmuneus (Strab. xe. A. n. i. 43. § 43. E. Tenedos; Eustath. ad Hom. ii. 33. Ps.-I. n. Tenedos from Athenaeus, a son of Cyenous (Strab. x. 61. Diod. v. 83; Conon, Narrat. 23; see f. 19.) The island is described as being 200 stades in circumference, and containing a town of its own name, which was an Aeolian settlement, and which the Romans called "Tenedos" (Arria, Arria ii. 12.) Scylax, p. 35, who, however, mentions only a temple of the Sineanath Apollo. (Strab. vii. ii. 38. 452.) In the Trojan legend it plays a prominent part, and at one time seems to have been a place of considerable importance, as may be inferred from certain inscriptions and dedications of the 2nd cent. B.c. as Tenedos sedceus (Steph. B. c. i. 33; Diod. v. 88; comp. C. S. bis. xxv. 11., Tenedos dikean proepeus (Zamb. vi. 31. L. C. l. c. Diocles 536). Tenedos admirabilis (Steph. B. c. 22; Piat. Quzet. Gr. 28). Tenedos maris (Arria ii. 80.), and Tenedos epirripus (Steph. B. c. 22) are the names by which the island was known to the ancient world and to have been celebrated for their fame. It may credit Finds, whose elevation Leukos is inscribed to Artemis, a position and magistrate of the island. We further learn that Stephanus B. that Architecture wrote on the port of Tenes. During the Persian wars the city was chosen by the Persians (Herod. ii. 43) during the Pheidonatian War it was given to Athens and paid tribute to her (Thuc. i. 1.1. which seems to have amounted to 3260 drachmae every year. (Paus. iv. 34. 33.) A new name, in B.C. 339, Tenes was expelled of the Locatocnemions for its fidelity to Athens (I. c. 2. § 1.) but, though the port of Tenes was given up the island to Perses, it was maintained its connection with Athens. (Demost. Pulch. p. 1223, c. Theoc. c. 133.) In the age of Alexander the Great, the Tenesians of the Persians, and, though restored to Persia, they soon again revolted from Persia, in B.C. 2, 33. 2.) During the time of Achaia, Tenes was an island, the population living in and near the entrance of the Habreus, as an ancient naval station. (Polyb. xvi. 34. 33. 1: 16. xiv. 20.) In the war against Macedon, the island was called a great naval battle, the Tenes (Plan. x. 33; C. C. Arch. ii. 3. 163.) In the time of Virgil, Tenes was said to have exerted its influence, being built by its inhabitants as a fortress under the protection of Alexander the great. (Paus. iv. 14. § 4.) The favorable situation of the island, however, prevented its ever again being built by the Persians and their successors upon the mountains, its inhabitants had been driven out, and the island was deserted. (I. c. 2. § 1.) The war of the Tenesians was said to have been of importance. (Athen. xii. 353.) Thus it was an ancient island in the western coast of Greece (Chamis. Tenes in Ast. Nav. ii. 42. Polye-
COIN OF TENEDOS.

TENEDOS (Τένες; Ept. Τενέδος), a fortified coast-town in the west of Pamphylia, 20 stadia to the west of Attalia. (Steph. B. a. v.; Stadiasmus. Marc. M. Σετζατορός: Τενές.) It has been said that this town is the same as Obia, the remains of which are exactly 20 stadia from Attalia, and that one of the two names was Lyician and the other Greek. (Müller, ad Stadiasmus. p. 490.) [L. S.]

TENEBRICO CAMPUS. [Borotta, p. 413, b.]

TENESIS REGIO (Τενέση; Strab. xvi. p. 770), was, according to Strabo, who alone mentions it, an inland province of Aethiopia, lying due E. of the Sabae, and not far distant from the kingdom or city of Meroe. Tenesis was governed, at least when Strabo wrote, by a queen, who was also the sovereign of Meroe. This was one of the many districts of Aethiopia assigned by rumour to the Antaei, Cembritae, or Aegyptian war-caste, who abandoned their native country in the reign of Ptolemy I. (Sembrutae). The lake Coloe and the sources of the Astapus are by some geographers placed in Tenesis. It was an alluvial plain bounded on the E. by the Abyssinian Highlands, and frequented by elephants, rhinoceroses, &c. [W. B. D.]

TENOS (Τένος; Tenos), an island in the Aegaean sea, and one of the Cyclades, lying between Andros and Delos, distant from the former 1 mile and from the latter 15 miles. (Plin. iv. 12. a. 22.) It stretches from NW. to SE., and is 15 miles long according to Pliny (I. c.), or 150 stadia according to Scylax (p. 55). It was also called Euporoumena, from the number of its springs, and Opheina because it abounded in snakes. (Plin. I. c.; Mela, ii. 7. § 11; Steph. B. a. v.) The sons of Boreas are said to have been slain in this island by Hercules. (Apoll. Rhod. i. 1304, with Schol.) In the invasion of Greece by Xerxes, the Tenians were compelled to serve in the Persian fleet, but a Tenian trireme was sent to the Greeks immediately before the battle of Salamis (s. c. 480), and accordingly the name of the Tenians was inscribed upon the tripod at Delphi in the list of Grecian states which had overthrown the Persians. (Herod. viii. 82.) Pausanias relates that the name of the Tenians was also inscribed on the statue of Zeus at Olympia among the Greeks who had fought at the battle of Plataea (v. 23. § 2). The Tenians afterwards formed part of the Athenian maritime empire, and are mentioned among the subject allies of Athens at the time of the Sicilian expedition (Thuc. vii. 57). They paid a yearly tribute of 3600 drachmae, from which it may be inferred that they enjoyed a considerable share of prosperity. (Franz. Econ. Epigr. Gr. No. 49.) Alexander of Pherae took possession of Tenos for a time (Dem. c. Polyc. p. 1907); and the island was afterwards granted by M. Antonius to the Rhodians (Appian, B. C. v. 7.) After the conquest of Constantinople by the Latins, Tenos fell to the share of the Venetians, and remained in their hands long after their other possessions in the Aegean had been taken by the Turks. It was ceded by Venice to the Sultan by the peace of Passarowitz, 1718. It is the most prosperous island in the Aegean, and the inhabitants are remarkable for their industry and good conduct. The present population is about 15,000 souls, of whom more than half are Catholics,—a circumstance which, by bringing them into closer connection with western Europe, has contributed to their prosperity.

The ancient city of Tenos, of the same name as the island, stood at the south-western end upon the same site as St. Nicholas, the present capital. Scylax says that it possessed a harbour, and Strabo describes it as a small town. (Scyl. p. 22; Strab. x. p. 487; Ptol. iii. 14. § 30.) In the neighbourhood of the city there was a celebrated temple of Poseidon situated in a cave, where festivities were held and sacrifices celebrated, which were much frequented by all the neighbouring people. (Strab. i. c.; Tac. Ann. iii. 63; Clem. Protre. p. 18; Böckh, Inscri. No. 2329, 2331.) The attributes of Poseidon appear on the coins of Tenos. There was another town in the island named Eriston (Εριστόν; Böckh, Inscri. 2336, 2337), which was situated in the interior of the island at the village of Komi. Among the curiosities of Tenos was mentioned a fountain, the water of which would not mix with wine. (Athen. ii. p. 43, c.) The island was celebrated in antiquity for its fine garum. (Aristoph. Plut. 18.) The chief modern production of the island is wine, of which the best kind is the celebrated Malvasia, which now grows only at Tenos and no longer at Monembasia in Peloponnesus, from which place it derives its name. (Tournefort, Voyage, gr. vol. i. p. 271, transl.; Exped. Scient. vol. iii. p. 2; Frieder, Reise, vol. ii. p. 241, seq.; Finlay, Hist. of Greece under Othoman and Venetian Domination, pp. 255, 267; and especially Ross, Reise durch Griech. Inseln, vol. i. p. 11, seq., who cites a monograph, Markaky Zallon, Voyage à Tinos, l'île des iles de l'Archipel de la Grèce, Paris, 1809.)

COIN OF TENOS.
TENTYRA.

the name of the town, and is generally attached to the head-dress of Athor, accompanied by the sign Kali or "the land." The Tentyrite Athor has a human face with the ears of a cow (Rossellini, Journ. Asi. Soc. Calcutta, p. 29.) and, in her attitude, is closely ressembl these of Isis, that it was long

TENTYRA.
doubtful to which of the two goddesses the great temple at Tentyra was dedicated. Like Isis, Athor is delineated nursing a young child named Ebedus, said, in hieroglyphics, to be her son. He is the third member of the Tentyrite triad of deities.

The principal fabric and produce of Tentyra were flax and linen. (Plin. xix. 1.) Its inhabitants held the crocodile in abhorrence, and engaged in sanguinary conflicts with its worshippers, especially with those of the Ombite Nome [Ombos].

Juvenal appears to have witnessed one of these combats, in which the Ombites had the worst of it, and one of them, falling in his flight, was torn to pieces and devoured by the Tentyrists. Juvenal, indeed, describes this fight as between the inhabitants of contiguous nomes ("inter finitimis"); but this is incorrect, since Ombos and Tentyra are more than 50 miles apart. As, however, Coptos and Tentyra were nearly opposite to each other, and the crocodile was worshipped by the Coptites also, we should probably regard the conflict of the two nomes as reported by Juvenal, and recorded by Strabo (xiv. p. 531) as the crocodile was worshipped by the Coptites also, we should probably regard the conflict of the two nomes as reported by Juvenal, and recorded by Strabo (xiv. p. 531), and, lastly, comes the snake or sacred reptile, the Tuten (Proc. Nat. xvi.) The latter were so expert in the chase of this animal in its native element, that they were wont to follow it into the Nile, and drag it to shore. (Aelian, Hist. Anim. x. 24; Plin. viii. 35. s. 38.)

Seneus (Nat. Quaesit. ii. 3) says that it was their presence of mind that gave the Tentyrists the advantage over the crocodile, and they very often harried the crocodiles of the Ombos, and the one after the other, and sometimes even captured them.

The crocodile was the emblems of agriculture or manufacturing. Occasionally, also, occur historical portraits of great interest, such as those of Cosptra and her son Caesarion. The effect of this wildness of highly-coloured base-reliefs was greatly enhanced by the mode by which the temple itself was lighted. The sanctuary itself is quite dark; the light is admitted into the chambers through small perforations in their walls. Yet the entire structure displays wealth and labour rather than skill or good taste, and, although so elaborately ornamented, was never completed. The emperor Tiberius finished the temple, erected the portico, and added much to the decoration of the walls; but some of the carvings designed for royal or imperial names have never been filled up.

On the ceiling of the portico is the famous mosaic of Tentyra, long imagined to be a work of the Pharonic times, but now ascertained to have been executed within the Christian era. Though demasculated a zodiac, however: in the French savants, it is doubtful whether this drawing be not merely mythological, or at most astrological, in its object. In the first place the number of the supposed signs is incomplete. The crab is wanting, and the order of the other zodiacal signs is not strictly observed. Indeed if any astral signification at all be intended in the picture, it refers to astrology, the zodiac, as well as the horoscope, being known to the country, had mostly fallen into decay. The principal structures at Tentyra are the great temple dedicated to Athor; a temple of Isis; a Typhonium; and an isolated building without a roof, of which the object has not been discovered. With the exception of the latter, these structures are large, in a square, a side, each side of which occupies 1000 feet, and which is

in some parts 55 feet high and 15 feet thick. Full descriptions of the remains of Tentyra may be found in the following works: Belzoni's Traevals in Egypt; Hamilton's Egyptian; and Richardson's Egypt's ancient and modern. Paris adjacent, is 1816-1817. Here it must suffice to notice briefly the three principal edifices:

1. The Temple of Athor. — The approach to this temple is through a dromos, commencing at a stately stone pylon, inscribed with the names of Dmiathan and Trajan, and extending to the portico, a distance of about 110 paces. The portico is open at its top, and supported by twenty-four columns, ranged in four rows with quadrangular capitals, having at each side a colossal head of Athor, surmounted by a quadrangular block, on each side of which is carved a temple doorway with two winged globes above it. These heads of the goddess, looking down upon the dromos, were doubtless the most imposing decorations of the temple. To the portico a hall supported by six columns, and flanked by three chambers on either side of it. Next comes a central chamber, opening on one side upon a staircase, on the other into two small chambers. This is followed by a similar chamber, also with lateral rooms; and, lastly, comes the sacred or sancturay room, the more walled up. The seats flanked on either side by three chambers. The hieroglyphics and picturesque decorations are so numerous, that nowhere on the walls, columns, architraves, or ceiling of the temple, is there a space of two feet unoccupied by them. They represent men and women engaged in various religious or secular employments; the emblems of agriculture, wall symbols, and the emblems of agriculture or manufactures. Occasionally, also, occur historical portraits of great interest, such as those of Cosptra and her son Caesarion. The effect of this wildness of highly-coloured base-reliefs was greatly enhanced by the mode by which the temple itself was lighted. The sanctuary itself is quite dark; the light is admitted into the chambers through small perforations in their walls. Yet the entire structure displays wealth and labour rather than skill or good taste, and, although so elaborately ornamented, was never completed. The emperor Tiberius finished the temple, erected the portico, and added much to the decoration of the walls; but some of the carvings designed for royal or imperial names have never been filled up.

On the ceiling of the portico is the famous mosaic of Tentyra, long imagined to be a work of the Pharonic times, but now ascertained to have been executed within the Christian era. Though demasculated a zodiac, however: in the French savants, it is doubtful whether this drawing be not merely mythological, or at most astrological, in its object. In the first place the number of the supposed signs is incomplete. The crab is wanting, and the order of the other zodiacal signs is not strictly observed. Indeed if any astral signification at all be intended in the picture, it refers to astrology, the zodiac, as well as the horoscope, being known to the
ceiling of one of the lateral chambers, behind the portico, and on the right side of the temple, was a smaller group of mythological figures, which has also been styled a planisphere or zodiac. This being sculptured on a kind of sandstone, was removable, and was removed about the year 1891. The marble was cut out of the ceiling by M. Leloir and brought to Paris. It was purchased by the French government, and is now in the Imperial Museum. It is probably a few years older than the larger zodiac.

2. *The Ilium.*—"The chapel of Ilium is behind the temple of Athor." (Strab. viii. p. 310.) It stands, indeed, immediately behind its SW. angle. It consists of one central and two lateral chambers, with a corridor in front. Among its hieroglyphics appear the names of Augustus, Claudius, and Nero. About 170 pieces E. of this chapel stands a pylon, with a Greek inscription, importing that in the thirty-first year of Caesar (Augustus) it was dedicated by Minias of Alexandria. (Lefebre, Ith.)

3. *The Typhonium,* as it is denominated from the emblems of Typhon on its walls, stands about 90 paces N. of the great temple. It comprises two outer passage-chambers and a central and lateral adytum. A peristyle of twenty-two columns surrounds the sides and the rear of the building. On its walls are inscribed the names of Trajan, Hadrian, and Antoninus Pius. But although the symbols of the principle of destruction are found on its walls, Typhon can hardly have been the presiding deity of this temple. From the circumstance that all the other sculptures refer to the birth of Euboön, Champion (Lettres sur l'Egypte, vol. ii. p. 67) suggests that the Typhonium was a chapel of the great god, or "lying-in-places," and that it commemorated the accouchement of Athor, mother of Euboön. Typhon is here accordingly in a subordinate character, and symbolises not destruction, but darkness, chaos, or the "night primeval," which precedes creation and birth.

For the monuments of Tentyra, besides the works already enumerated, Wilkinson's *Ancient Egyptian and Modern Egypt and Thesos,* and the volumes in the *Library of Entertaining Knowledge,* entitled *British Museum, Egyptian Antiquities,* may be consulted; and for the zodiacs, Visconti, *Oeuvres tom. iv.;* Letronne, *Observations sur l'Inscription des Principales Tombeaux des Égyptiens, Svo. Paris, 1814*; and *H. E. Renou, Enzyklopädie der Ägyptischen Chronologie,* 1822. [W. B. D.]

**TERUCIO.** *[Tunirgium.]*

*TEOS* (Titus: Ech. Thes.), an Ionic city on the coast of Asia Minor, on the south side of the isthmus connecting the Ionian peninsula of Mount Mimas with the mainland. It was originally a colony of the Ionian or Euboean cities. It was joined by numerous colonists from Athens under Naucius, a son of Codrus, Apocles, and Damasus; and afterwards their number was further increased by Boeotians under Geres. (Strab. xiv. p. 653; Paus. vii. 3. § 3; Herod. i. 142; Sclav. p. 37; Soc. B. a. c.) The city had two good harbours, one of which is mentioned even by Sclav. and the second, 30 stadia distant from the former, is called by Strabo *Tepheia* (xiv. p. 644), and by Livy (xxvii. 27) *Gerasictus.* Teoe became a flourishing commercial town, and enjoyed its prosperity till the time of the Persian dominion, when its inhabitants, unable to bear the insolence of the barbarians, abandoned their city and removed to Abdera in Thrace. (Herod. i. 168; Strab. l. c.) But though deserted by the greater part of its inhabitants, Teos still continued to be one of the Ionian cities, and in alliance with Athens. (Thucyd. iii. 23.) After the Sicilian expedition, Teos revolted, but was speedily reduced (Thucyd. viii. 16, 19, 20). In the war against Antiochus, the fleet of the Romans and Rhodians gained a victory over that of the Syrian king in the neighbourhood of this city. (Liv. l. c.; comp. Polyb. v. 77.) The vicinity of Teos produced excellent wine, whence Bacchus was one of the chief divinities of the place. Pind. (v. 98) erroneously calls Teos an island, for at most it could only be termed a peninsula. (Comp. Pomp. Mela, i. 17; Ptol. v. 2. § 6.) There still exist considerable remains of Teos at a place called *Sighyakis,* which seems to have been one of the ports of the ancient city, and the walls of which are constructed of the ruins of Teos, so that they are covered with a number of Greek inscriptions of considerable interest, referring to treaties made between the Teians and other states, such as the Romans, Aetolians, and several cities of Crete, by all of whom the inviolability of the Teian territory, the worship of Bacchus, and the right of asylum are confirmed. The most interesting among the ruins of Teos are those of the theatre and disaster of *Pilos,* which stood between the Teian pirates and the units of the cities, and the massive walls of the city also may still be traced along their whole extent. The theatre commands a magnificent view, overlooking the site of the ancient city and the bay as far as the bold promontory of Myonnus and the distant island of Samos. For a detailed description of these remains, see Hamilton, *Researches,* ii. p. 11, fol.; comp. Leake, *Ancient Monuments,* p. 350. [L. S.]

**COIN OF TEOS.**

*TERACATRIAE* (Teparxapria), a German tribe in Noricum, on the banks of the Danube, probably on the south of the territory occupied by the Basemi (Ptol. ii. 11. § 26.)

**TEREDON.** *[Emporia.]*

*TEREN* (Theros, Diet. v. 79), a river in Crete, perhaps a tributary of the Aminius, or the modern *Apooleia.*

**TERENTIUS** (Tepedovi, Not. Imp.), the modern Teroiohe, a town in Lower Aegypt, was situated on the left bank of the Canopic arm of the Nile. At this point a pass through the hills conducted to the Naxor Lakes, about 30 miles to the W. of the town. The people of Terentius farmed the government a monopoly for collecting and exporting patron. [Nithia.] Ruins at the modern hamlet of *Theriohe* represent the ancient Terentius. (Sommini, *Voyages,* vol. i. p. 228.) [W. B. D.]

**TERES FELIX** [Tadmea.]

**TERESAE FORTUNALES,** a place in the W. of Hispania Baetica (Plin. iii. 1. § 3). [T. H. D.]

**TEREGESTE** (Terýgésth, Strab. *Terýgésth,* Ptol.: Ech. Teresthien: *Triadoi, a city of Venetia or Istria,* situated on a bay to which it gave the name of *Teresthí Municipium Sinus,* which forms the inner hight or extremity of the Adriatic sea towards the N. It
TERESTE.

was very near the confines of Istra and Venetia, so that there is considerable discrepancy between ancient authors as to which of these provinces it belonged, both Scrbab and Ptolemy reckoning it a city of Istra, while Pliny includes it in the region of the Carni, which was completed in Venetia. (Strab. v. p. 215, vii. p. 314; Plin. iii. 18. a. 22; Ptol. iii. 1. § 27.) Mela on the contrary calls it the boundary of Illyricum (ii. 4. § 3). From the time the Formio, a river which falls into the sea 6 miles S. of Triste, became fixed as the boundary of the province [Forom D], there can be no doubt that Pliny's attribution is correct. It is probable that Tereste was originally a native town either of the Carni or Istrians, but no mention is found of its name till after the Roman conquest, nor does it appear to have risen into a place of importance until a later period. The first historical mention of it is in s. c. 51, when we learn that it was taken and plundered by a sudden invasion of barbarians (Cas. B. G. viii. 24; Appian, Iliry. 18); but from the terms in which it is there noticed it is evident that it was already a Roman town, and apparently had already received a Roman colony. It was afterwards restored, and, to protect it for the future against similar disasters, was fortified by a wall from the sea by Caesar in n. c. 39. (Gruter, Insocr. p. 366. 6.) It is certain that it enjoyed the rank of a Colonia from the time of Augustus, and is styled such both by Pliny and Ptolemy. (Plin. iii. 18. a. 22; Ptol. iii. i. § 27.) That emperor also placed under the protection and authority of the city the neighbouring barbarian tribes of the Carni and Catallis, and, by reducing to subjection that part of the coast occupied by the Iapodes, laid the foundations of the prosperity of Tereste. The growth of this was mainly promoted by the advantages of its port, which is the only good harbour in this part of the Adriatic; but it was apparently overshadowed by the greatness of the neighbouring Aquileia, and Tereste, though a considerable municipal town, was an unknown name to history under the Roman Empire; but it is certain that it continued to exist; and retained its position as a considerable town throughout the middle ages. But it is only within the last century that it has risen to the position that it now occupies of one of the most populous and flourishing cities on the Adriatic. The only remains of antiquity extant at Triste are some portions of the temple, built into the modern cathedral, together with several inscriptions (including the celebrated one already noticed) and some fragments of friezes, bas-reliefs, &c.

Tereste is placed by the Itineraries at a distance of 24 miles from Aquileia, on the line of road which followed the coast from that city into Istria. (Pisin, Ant. p. 270; Tab. Pisc. 33.) Pliny, less correctly, calls it 33 miles from that city (Plin. l. c.). The spacious gulfs on which it was situated, called by Pliny the TERESTIENSIS SINUS, is still known as the Gulf of Trieste.

TERINIA.

The city was a town in Noricum, on the road from Irlinab to Iuvavum; it was situated in an habitability near Lombach. (Tab. Pesc.; Mochar, Norimur. vol. l. p. 286.)

TERIA (Tepina), is mentioned in Homer (II. i. 829) in connection with a lofty mountain, or as a mountain itself (Tepiws tos atro), and, according to Strab. (xii. p. 535, comp. xiii. p. 589), ought to be regarded as a height in the neighbourhood of the city; although others pointed out, at a distance of 40 stadia from Lampsacus, a hill with a temple of the Mother of the Gods, named Terias. (L. S.)

TERIAE (Tepiae; Fiume di S. Leonardo), a river of Sicily, on the E. coast of the island, flowing into the sea between Catana and Syracuse. It is formed by the Fiume di S. Leonardo, which flows from Lake of Lons (L. S.) (which is not mentioned by any ancient author) into the sea. It has its outlet in a small bay or cove, which affords a tolerable shelter for shipping. Hence we find the mouth of the Terias twice selected by the Athenians as a halting-place, while proceeding with their fleet along the E. coast of Sicily. (Thuc. vi. 50, 56.) The connection of the Terias with Syracuse is disputed. Diodorus encamped on the banks of that river near the city of Leontini. (Diod. xiv. 14.)

TERICIAR. (TUCICIAE.)

TERINA (Tepina, but Tepina Lycochr.: Tepiws, Terimena), a city on the W. coast of the Bruttian peninsula, near the Gulf of St. Esprit, included by Pliny (iii. s. 14) immediately after the Symsthenus; and Sclavus tells us that it was navigable for the distance of 20 stadia up to Leontini. (Syl. p. 4. § 13.) Though this last statement is not quite accurate, inasmuch as Leontini is at least 60 stadia from the sea, it leaves little doubt that the river meant is that now called the Fiume di S. Leonardo. The name of Lampsacus Sinus is not mentioned by any ancient author, and Dioscorus encamped on the banks of that river near the city of Leontini. (Diod. xiv. 14. E. B. B.)

TERINIAE. (TUCICIAE.)

The name of Terina is scarcely mentioned in history during the flourishing period of Magna Graecia; but we learn from an accidental notice that it was engaged in war with the Trojans by Plutarch (Abd. vid. 10. § 1)—a proof that it was at this time no insignificant city; and the number, beauty, and variety of its coins sufficiently attest the fact that it must have been a place of wealth and importance. (Hell.ingen, Numism. de Itali, p. 53.) Almost the first notice of Terina is that of its conquest by the Brutians, an event which appears to have taken place toward the end of the 3rd century B.C. After this it is not again referred to according to Diodorus, it was the first Greek city which fell into their hands. (Diod. xvi. 15.) It was recovered from them by Alexander, king of Epirus, about 327 n. c. (Liv. viii. 84), but probably fell again under their yoke after the death of that monarch. It was one of the cities which declined in favour of Hamilcar during the Second Punic...
TERINAEUS SINUS.

War; but before the close of the war that general found himself compelled to abandon this part of Brutium, and destroyed Terina, when he could no longer hold it. (Strab. vi. p. 256.) The city never recovered this blow; and though there seems to have been still a town of the name in the existence of Strabo and Pliny, it never again rose to be a place of any importance. (Strab. ii. C. 2.; Plin. iii. 5. a. 10.) An inscription in which its name appears in the reign of Trajan (Orell. Inscr. 150) is in all probability spurious.

The site of Terina cannot be determined with any certainty; but the circumstance that the extensive bay now known as the Gulf of Sta Eufemia was frequently called the Sinus Terinaeaus (Plin. iii. 5. a. 10.; Ælius Attalus, Thuc. vi. 154.) sufficiently proves that Terina must have been situated in its immediate proximity. The most probable conjecture is, that it occupied nearly, if not exactly, the same site as the old town of Sta Eufemia (which was destroyed by a great earthquake in 1638), about a mile below the modern village of the name, and near the N. extremity of the gulf to which it gives its name. Cluverius and other antiquaries have placed it considerably further to the N., near the modern Nocera, where there are said to be the ruins of an ancient city (Cluver. Ital. p. 1287; Barrius, de Sitt. Calab. ii. 10. p. 124); but this site is above 7 miles distant from the gulf, to which it could hardly therefore, be given name. There is also reason to suppose that the ruins in question are those of a town which bore in ancient times the name of Nuceria, which it still retains with little alteration. [Nuceria, No. 4.]

Lycophon seems to place Terina on the banks of a river, which he names Ocinarius (Diod. iv. 25.; Lyco phr. Alex. 729, 1009); and this name, which is uniformly given throughout the ancient writers, has been generally identified with the river now called the Savuto (the Sabatius of the Itineraries), which flows by Nocera. But this identification rests on the position assumed for Terina; and the name of the Ocinarius may be equally well applied to any of the streams falling into the Gulf of Sta Eufemia. The variety of the old name of the silver coins of Terina (which belong for the most part to the best period of Greek art), has been already alluded to. The winged female figure on the reverse, though commonly called a Victory, is more probably intended for the Siren Ligera.

E. H. B.

COIN OF TERINA.

TERINAEUS SINUS. [Hippionates Sinus.]

TER'OL'GA CASTRA or TERY'OL'IS, a fortress in Rhedia, mentioned only in the Notitia Imperii, but generally identified with the castle near Herace, near which many Roman remains are found. (Comp. Palaeogr. Bezae, ed. Hieronymi, p. 449; Verona nesc Augsburg, p. 86.)

TERMANTIA. [Te migrants.]

TERMERA or Të'merana or Të'merara: Etk. Tëmgepeba), a maritime town of Caria, on the south coast of the peninsula of Halicarnassus, near Cape Termus. (Herod. v. 37; Strab. xiv. p. 657; Plin. v. 29; Steph. B. s. w., who erroneously assigns the town to Lycia.) Under the Romans this Dorian town was a free city. According to Suidas (β. v.) the place gave rise to the proverbial expression Tëmgera axed, it being used as a prison by the rulers of Caria, but his remark that it is situated between Melos and Halicarnassus is unintelligible. Cramer supposes its site to be marked by the modern Carboglar or Gumalhia. [L. S.]

TERMERE (Τë'merê), a place of uncertain site, mentioned only by Ptolomy (v. 2. § 16) as situated in the extreme north of Lydia, in the district Cata- cedemene, near the two sources of the river Hermes. [L. S.]

TERMERUM. [Termera.]

TERMES (Τë'meres, Pol. ii. 6. § 86), a town of the Areovaci in Hispania Tarraconensis. It is probably the same town called Τëμερᾶς and Τëμερος, by Apian (vi. 76 and 99). The inhabitants are called Termestini in Livy (Epid. iv.) and Tacitus (Ann. iv. 45); of which none is known. Termes was seated on a steep hill, and was often besieged without success by the Romans, till at last the inhabitants, on account of their hostile disposition towards Rome, were compelled in a. c. 97 to build a new city on the plain and without walls (App. vi. 99). It lay undesignedly on the site of the present Ermita de Nuestra Señora de Termes, 6 miles from W. of Numancia. [T. H. D.]

TERMESUS (Τëμερᾶς, Termes, Tëμερος, Τëμερός, Tëμερος, Etk. Τëμερος), a town of Pisidia, celebrated for its natural strength no less than for its artificial fortifications, was situated on a height of Mount Taurus, at the entrance of the defiles which are traversed by the river Carabaeus, and formed the means of communication between Pisidia, Pamphylia, and Lycia. (Strab. xiii. p. 630, xiv. v. 666; Pol. v. 5. § 6, viii. 17. § 34; Polyb. xxii. 18; Steph. B. s. w.; Dion. Per. 859.) A peak of the mountain rising above the acropolis bore the name of Solymon; and the inhabitants of the town itself were, as Strabo says, called Solyzen. They were certainly called by this name (P. 27) distinctly called them Pisidians and barbarians. Their town stood on a lofty height, precipitous on all sides; and the road running close by the place was very difficult, passing through a narrow gorge, which could be defended by a small force. Alexander the Great succeeded indeed in forcing his way through it, but despairing of the possibility of taking Termessus, he continued his march. Strabo (xiv. p. 666) therefore seems to be mistaken in stating that Alexander conquered the place. The consul Manlius, after relieving Ilium, passed along the same road. (Liv. xxxviii. 15.)

The town of Termessus continued to exist down to a late period, when it was the see of a Christian bishop, who also had the administration of two neighbouring places, Jovis and Eudocia. (Hieroc. p. 680.) The site of ancient Termessus has not been difficult to discover by modern travellers, and considerable remains still exist at Karabunar Koi, at the foot of the height on which the ancient fortress was situated. (Leake, Asia Minor, p. 320. —133.) As to the coins of Termessus, which come down as far as the reign of the emperor Severus, see Sestini, p. 96. On some of these coins we read μετέρησιον in addition to the name of the Termessians, a circumstance which confirms the
TERGESTE.

was very near the confines of Istria and Venetia, so that there is considerable discrepancy between ancient authors as to which of these provinces it belonged, both Strabo and Ptolemy reckoning it a city of Istria, while Pliny includes it in the region of the Carni, which was comprised in Venetia. (Strab. v. p. 215, vii. p. 314; Plin. iii. 18. a. 22; Ptol. iii. 1. § 27.) Meta on the contrary calls it the boundary of Illyricum (ii. 4. § 3). From the time that the Formio, a river which falls into the sea 6 miles S. of Tereste, became fixed as the boundary of the province (FORMIO), there can be no doubt that Pliny's attribution is correct. It is probable that Tereste was originally a native town called the Carni or Istrians, but no mention is found of its name till after the Roman conquest, nor is it known to have risen into a place of importance at a later period. The first historical mention of it is to be found in the works of Strabo (v. 13, § 1), when we learn that it was plundered by a sudden incursion of barbarians (Caes. B. C. viii. 26. § 18); but from the terms in which it is mentioned, it is evident that it was a town, and apparently had already attained a considerable growth of population, under the Roman dominion, as is shown by the inscriptions found in the vicinity, which prove that the ancient settlement was of considerable importance.

Aqüileia, by its position on the Via Latina, to Terracina, as the Regio Troglyctica in the map of Ptolemy (iii. 2. M.), is placed north of the mouth of the river Tiber, and the site of the modern Terni, resembles the ancient settlement. Aqüileia was, however, the capital of the province of Umbria, and as such it was the centre of the region, with its markets and commercial relations with the rest of Italy. The site of Terni is still one of the wealthiest districts in Italy, and the name of Umbria is perpetuated in the valley of the Tiber.

ETRUSCANS. [ETRURIA.]

TERRANOLOUS. [NAULOCHUS. No. 3.]

FETRAPHYLIA, a town of Athens, was the capital of Epirus, where the royal treasures were kept. (Liv. xxxviii. 1.)

TETRABOLIS. 1. Of Attica. [MARATHON.]

2. Of Doris. [DORIS.]

TETRAPYRIA (Tetrapyrria). 1. A town in the Cyrenaica, of uncertain site, situated above the harbour Purna. (Strab. xvii. p. 838; Ptolemy, xxi. 26.)

2. A town of Cappadocia in the district Gar- sania. (Ptol. v. 6. § 14.)

TETRICA MONS, a mountain in the central range of the Apennines, adjoining the territory of the Sabines. Virgil enumerates the "Tetrica horribiles rupes" among the localities of that people, and Silius Italicus in like manner closely associates the "Tetrica rupes" with Nuria. Varro also speaks of the Montes Pasceolus and Tetricus as abounding in wild goats. (Verg. Aen. vii. 713; Sil. Ital. viii. 417; Var. R. E. ii. 1. § 5.) From these passages it is evident that it was one of the}

Notes.
TEUTONIAE.

TEUTROCHAAEAE (Tepropxyaaw), a German tribe, occupying the country south of the Cherusci, on the north of Moen Sudaet, in the modern Erzgebirge and Vogtland. (Cass. i. 11. S. 16.) [L. S.]

TEURISCI (Tepropxyis, Polt. iii. 8. § 5), a Dacian tribe near the sources of the Tymas. [T. H. D.]

TETRANIA (Tepropxya), a Celtic town in Noricum, on the left bank of the upper part of the river Dravus (Plit. iii. 27; Polt. ii. 4. § 3). Its site is still marked by considerable ruins not far from the little town of Splital. (Comp. Orelli, Inscr. Rom. iii. 566; and Digby, Vit. S. Severi, 17, 21, where it is called Tiberia.) [L. S.]

TEUTHEA. [Dyke.]

TEUTHEAS. [Achaia, p. 14. s.]

TEUTHEUS (Teutheus; Eih. Teuthba). a town in the centre of Arcadia, which together with Theben and Methydrion belonged to the confederation (euryxias) of Ochonoecus. Its inhabitants were removed to Megalopolis upon the foundation of the latter. The Paleokastro of Galata probably represents Teuthia. (Paus. viii. 27. §§ 4, 7, 28. § 4; Steph. B. s. e.; Ross, Reisen im Peloponnes, vol. i. p. 114.)

TEUTHANIA (Teuthanias), the name of the western part of Mycia about the river Casius, which was believed to be derived from an ancient Mycian king Teuthas. This king is said to have adopted, as his son and successor, Telephus, a son of Heracles; and Eurypylus, the son of Telephus, appears in the Odyssey as the ruler of the Ce tile. (Strab. iii. p. 615; Hom. Od. x. 590; comp. Myca.)

In the district a Teuthes is the name of a man, perhaps a derivation from the name of the tribe, like Eneas, Piteas, and Attarons (Strab. L. c.; Steph. B. s. e.; Xenoph. Hist. Gr. iii. 1. § 6), but no other particulars are known about it. [L. S.]

TEUTHRAS (Teuthras), the south-western part of Mt. Temnos in Teuthania (Ctesias, ap. Stob. Serm. p. 213, ed. Bähr), is perhaps the mountain now called Domokil, which the caravans proceeding from Samos to Asia Minor have to traverse. (Lucan, Treas. Voss., p. 139.) [L. S.]

TEUThOEONE (TeuThoeone), a town of Laconia, situated upon the western side of the Laconian gulf, 150 stadia from Cape Taenarum. It was said to have been founded by the Athenian Teuthras. The chief deity worshipped here was Artemis Inoia. It had a fountain called Naia. Its ruins exist at the village of Kotreis, and its citadel occupied a small peninsula, called Skopos, Skopia or Skopopolis. The distance assigned by Pausanias of 150 stadia from Teuthone to Cape Taenarum is, according to the French Commission, only from 8 to 10 stadia in excess. Augustus made Teuthone one of the cities of his empire. (Paus. iii. 31. § 7; iii. 25. § 4; Polt. iii. 16. § 9; Bobbyle, Recherches, gr. p. 89; Curtius, Polonuminca, vol. ii. p. 276.) [L. S.]

TEUTIBURGIIUM or TEUTOBURGIIUM (TewThoeoen), a town in Lower Pannonia, near the confluence of the Dravus and Danubeus, on the road from Muria to Carnicum, was the station of the praefect of the sixth legion and a corps of Dalmatian horsemen. (Lib. Ant. p. 243; Polt. ii. 16. § 5; Notit. Imp.; Tab. Post, where it is miswritten Titoburgium.) The name seems to indicate that it was originally a settlement of the Teutones, which may have been founded at the time when they roamed over those countries, about B. C. 113. No remains are now extant, and its exact site is only matter of conjecture. (Muchar, Noricum, vol. i. p. 265.) [L. S.]

TEUTOBERGENSIUS SALTUS, a mountain forest in Western Germany, where in A.D. 9 the Roman legions under Varus met with a disastrous defeat, and where, six years later, their unburied remains were found by Drusus. (Tac. Ann. i. 60.)

A general description of the locality without the mention of the name is found in Dion Cassius (iv. 20, 21; comp. Vell. Pat. ii. 105, 118, foll.). This locality has in modern times been the subject of much discussion among geographers, but the words of Tacitus seem to imply clearly that he was thinking of the range of hills between the sources of the Lupia and Amsis; that is, the range between Lippesringe and Haustenbock. (Giesers, De Aliae Castello deqne Variatiae Cladis Loci Commentatio, p. 47, foll.)

[TEUTONES. TEUTONI. TEUTONIS.]-TEUTONI (Teutone), the name of a powerful German tribe, which about B.C. 113 appeared on the frontiers of Gaul at the same time when the Cimbri, probably a Celtic people, after defeating the Romans in several battles, traversed Gaul and invaded Spain. The Teutones, however, remained behind ravaging Gaul, and were joined by the Osbrones. At length, in n. c. 109, they were defeated by Julius Agricola near Aquae Sextiae, where, according to the most moderate accounts, 100,000 of them were slain, while 80,000 or 90,000 are said to have been taken prisoners. A body of 6000 men, who survived that terrible day, are said to have established themselves in Gaul between the Mosas and Scheida, where they became the ancestors of the Alamanni. (Livy, 1st. lib. ixvii.; Vell. Pat. ii. 12; Flor. iii. 3; Plut. Mar. 36, foll.; Orat. v. 16; Cass. B. G. ii. 4. 29.) After this great defeat, the Teutones are for a long time not heard of in history, while during the preceding ten years they are described as wandering about the Upper Rhine, and eastward even as far as Pannonia. In later times a tribe bearing the name of Teutones is met with in Spain (iii. 3), Pliny (xxxvii. 11), and Ptolemey (ii. 11. § 17) as inhabiting a district in the north-west of Germany, on the north of the river Albis, where according to Pliny, they dwelt even as early as the time of Pytheas of Massilia. The question here naturally presents itself whether these Teutones in the north of Germany were the same as those who in the time of Marius invaded Gaul in conjunction with the Cimbri, who in fact came from the same quarters. This question must be answered in the affirmative; or in other words, the Teutones who appeared in the south were a branch of those in the north-west of Germany, having been induced to migrate on account of the devastations or other calamities. The numerous body of emigrants so much reduced the number of those remaining behind, that thereafter they were a tribe of no great importance. That the name of Teutones was never employed, either by the Germans themselves or by the Romans, as a general name for the whole German nation, has already been explained in the article Germania. Some writers even regard the Teutones as not Germans at all, but either as Slavonians or Celts. (Latham, Epitog. ad Tac. Germ. p. cx.) The fact that the country between the lower Elbe and the Baltic was once inhabited by the
Teutonogari.

Teutonogari seems to be attested by the names of Teutonosemild, a village near Roestock, and Teutonodorf between Trassenheide and Schnackenburg. [L.S.]

Teutonogari (Ueckermünde) was a town in Mecklenburg-Vorpommern, probably near the modern village of Eichendorf, at the head of a narrow valley. It was here that the Eiklians took refuge with their property and flocks, when their country was invaded by Philip in 1125. (Holl. viii. 4. § 6; Polyb. iv. 75; Leake, Morea, vol. ii. 304, Psellos, p. 229; Curtius, p. 157.)

2. (Also Θαλαμα). Paus. iii. 16. § 29: Θαλαμάδρος), a town of Laconia, distant 80 stadia north of Oxytus, and 20 stadia from Pephusa. (Paus. iii. 26. §§ 1, 2.)

#### THANA.

Thana was a town in the island of Locris in Laconia. Theopompus called Thalaemas a Messenian town (Steph. l.s. a. Θάλαμαι), and we know that the Messenians named the inland town of Thalaris as the Thalamai. Thalaemas seems to have been founded by Pelops, and was called in the time of Strabo the Boeotian Thalaris, as it had received a Boeotian colony. (Strab. vii. p. 560.) Thalaemas is mentioned by Polybius (iv. 16). It was subsequently one of the Euboean trading colonies. (Paus. vi. 3. § 4, 5: Thalaris as the Boeotian colony. (Ptol., Plin., ii. cc.) The surrounding country was covered with thick woods. (Juv. S. x. 194.) Thalaemas was the scene of the death of Glauce. (Claud. Lanc. Ót. i. 359.) It still retains the name of Thalaris. (Cf. Óm. Ant. pp. 21, 495, 514: Ανακ. Adv. Dim. vi. 32.)

#### THABRAS.

Thabras, a place in the Libyan Nomos (Vind. Ant. p. 73), identified by Lapius with Μαυρον Αθάμαντος. [Th. H. D.]

#### THABURIS.

Thaburis, a fortress on the river Indus in Caria, not far from Cibyra. (Liv. xxxviii. 14.)

#### THAGURA.

Thagura (called Thacora in Tab. Pest.), a place in Numidia, variously identified with El-Qattara and El-Mateenicius. (Vind. Ant. p. 41.) [Th. H. D.]

#### THALASA.

Thalassa (Θάλασσα, Plut. vi. p. 16, § 5), a small town on the Arabian coast, situated near Datrable from the south. (Cf. Óm. Ant. p. 354.)

#### THALASSE.

Thalasse is probably identical with Thalasses (Ταλασσα) in the interior of Libya, near which dwelt a tribe of the same name (Θαλασσα, Plut. iv. 6. § 21.)

#### THALAMEMA.

Thalamea (Θαλάμεα). 1. A town of Elysia, situated above Pylos on the frontiers of Achaea, and in the rocky recesses of Mount Lycabettus, probably near the modern village of Eukampos, at the head of a narrow valley. It was here that the Eiklians took refuge with their property and flocks, when their country was invaded by Philip in 1125. (Xen. Hell. viii. 4. § 26; Polyb. iv. 75; Leake, Morea, vol. ii. 304, Psellos, p. 229; Curtius, p. 157.)

2. (Also Θάλαμη). Paus. iii. 16. § 29: Θάλαμη.

3. (Also Θαλάμη, Plut. iii. 16. § 29: Θαλάμη).

THAPSA. [Rusciade.]

THA'PSACUS (Θα'πσακος), a town of considerable importance on the right bank of the Euphrates, in lat. 35° 15' N. It is mentioned very early in ancient history, and is almost certainly the same as the Thapsakos, of the Mss. (V. S. M. 407, n. 1.; in the LXX. written Θαπσάκος), which is mentioned as the eastern boundary of the kingdom of Solomon.

There is some difference among ancient writers as to the province in which it should be included. Thus, Pliny (v. 24. s. 21) and Stephanus B. a. e. place it in Syria; Ptolemy (v. 19. § 3) in Arabia Deserta. The Antonine Itinerary corresponds to the Mss. (V. S. M. 407, n. 1.; in the LXX. written Θαπσάκος) and Stephanus B. a. e. place it in Syria; Ptolemy (v. 19. § 3) in Arabia Deserta. It is stated by Pliny (v. 24. s. 21) and Stephanus B. a. e. that it is another passage-plain, and might therefore be claimed as belonging to one or more provinces. At Thapsacus was the most important passage of the Euphrates in the northern portion of that river's course. As such, we read it was used by Cyrus the younger, whose army forced it, the water reaching up to their breasts, there being probably at that time no bridge. (Xen. Alex. hist. 5. 11. 2; Paus. viii. 5. 4.)

THA'PSIS (Θα'πσις), a deep river of the Chersonesus Taurica, on which lay a royal castle. Ukert (ii. 2. p. 193) identifies it with the 'Surgir'. But Kühler seeks the castle on Mount Gymus, 45 west of south of Kerch. (Atlas. de F. Ac. de St. Petersb. ix. p. 649, seq.)

THASOS (Θασος, Plut. iv. 3. § 10), a maritime city of Byzantium, in Africa Propria. It lay on a salt lake, which, according to Shaw (Taw. p. 99), still exists, and on a point of land 80 stadia distant from the opposite island of Lopadussa. Thapsus was long a city and a colonia of the Roman empire, and is the site of the victory over the Pompeians, a. e. 46. (Hist. B. Af. 28, sec.)

SHAW (L. c.) identifies it with the present Demosed, where its ruins are still visible. (Cf. Strabo, xvii. pp. 831, 834; Liv. xxiii. 48; Plin. v. 4. s. 3, &c.)

THASOS, a river of Numidia, falling into the sea near the town of Busicada, probably the present Ouad Bousa (Vern. Soumert.) (T. H. D.)

SYLUSTRAEUM. (T. H. D.)

THARRANA, a place on the great line of road which led across the desert from the Euphrates to Hacrane (Al-Hadar). It is marked on the Tabula Puteana. It has been conjectured by Mannert (v. 2. p. 238) that the name is a mistake for Harrana, another form of Charrae; but this hypothesis seems hardly tenable. Reichard believes it is represented by the present Arabah. [V.]

THARRAS (Θαρρας, Ptol.: Rus. at Capo del Sero), a city of Sidonius, mentioned only by Ptolemy (where the name is written Θαρρας) as lying in the island by its own, Tarsus or Tarras) and in the Itineraries, but which seems to have been one of the most considerable places in the coast. It was situated on the W. coast, on a projecting point of land at the N. extremity of the Gulf of Oristanio, where its ruins are still visible, though half buried in sand, and numerous antiquities have been discovered. From its position there can be little doubt that it was a Phoenician or Carthaginian settlement; but continued to be a considerable town under the Romans, and an inscription records the repair of the road from Tharras to Corinna as late as the reign of the emperor Philip. (De la Marmora, Vey. en Sorciéglome, vol. ii. pp. 359, 477.)

The Antonine Itinerary corresponds to the Mss. (V. S. M. 407, n. 1.; in the LXX. written Θαρρας) and 12 from Othoca (Oristanio). (Ibn. Asir. p. 84; Ptol. iii. 3. § 2.)

THARSANDALA (Θαρσανδάλα), a town in Thrace, between Byzantium and the wall of Anastasias, which was one of the numerous places fortified by Justinian. (Procop. de Aed. iv. 11. p. 305, Bonn.) According to Reischard, Eustath. ad Dionys. Pers. 517), which was the chief source of the prosperity of the island. The earliest known inhabitants of Thasos were the Phoenicians, who were doubtless attracted to it by its valuable woods, but which have been wholly consumed, as the island in search of Europe, five generations before the birth of the Greek Hercules. They were led by Thasos, the son of Agenor, whom the island derived its name. (Herod. ii. 44, vii. 47; Paus. v. 25. § 12; Scymn. 660; Conon. c. 37; Steph. B. s. v.) Thasos was afterwards colonised in Ol. 15 or 16 (a. c. 720 or 708) by settlers from Paros, led by Teleseides, the father of the poet Archilochus. (Thuc. iv. 104; Strab. ix. p. 487; Clem. Alex. Strom. i. p. 144; Euseb. Progn. Ec. vi. 7.) There also existed at that time in the island a Thracian tribe called Saianes, with whom the Parian settlers carried on war, but not always successfully; and on one occasion Archilochus himself was obliged to save his ship. (Archil. Frages. 5, ed. Schmedewin; Aristoph. Foc. 1398, with the Schol.) The Greek colony rapidly rose in power, and obtained valuable possessions on the adjoining mainland, which contained even richer mines than those in the island. Shortly before the Persian invasion, the clear surplus revenue of the Thasians was 300 talents, or three times even 300 talents yearly (46,000L, 66,000L), of which Sopat Hyllis produced 80 talents, and the mines in the island rather less. (Herod. vi. 46.) Besides Sopat Hyllis the Thasians also possessed upon the mainland Galipens and Oeysina (Thuc. iv.
THAOS.

107; Diod. xii. 68), Smyrne (Herod. vii. 118; Suid. s. v. Θάος), Datum, and at a later period Crenides. (Böckh, Pahl. Econ. of Athens, p. 312, Engl. tr.) Herodotus, who visited Thaos, says that the most remarkable mines were those worked by the Phoenicians on the eastern side of the island between Amyrtaeus and Phæo opposite Samothrace, where a large mountain had been overturned in search of the gold. (Herod. vi. 47.) The Thasians appear to have been the only Greeks who worked the valuable mines in Thrace, till Histiaeus, the Miletian, settled upon the Strymon and built the town of Myrcineus, about n. c. 511. (Herod. vi. 11, 39.) After the capture of Samos (s. c. 494), Histiaeus made an unsuccessful attempt to subdue Thaos (Herod. vi. 28), but the growing power of the Thasians excited the suspicions of Darius, who commanded them in n. c. 499 to pull down their fortifications and remove their ships of war to Abdas,—an order which they did not venture to disobey. (Herod. vi. 46.) When Xerxes marched on his way to Greece, the Thasians, on account of their possessions on the mainland, had to provide for the Persian army as it marched through their territories, the cost of which amounted to 400 talents (92,800l). (Herod. vii. 118.) After the defeat of the Persians, Thaos became a member of the confedecy of Delos; but disputes having arisen between the Thasians and Athenians respecting the mines upon the mainland, a war ensued, and the Athenians sent a powerful force against the island under the command of Cimon, n. c. 485. After defeating the Thasians at sea, the Athenians disembarked, and laid siege to the city both by land and sea. The Thasians held out more than two years; but they were stormed in the third year. They were compelled to raise their fortifications; to surrender their ships of war; to give up their continental possessions; and to pay an immediate contribution in money, in addition to their annual tribute. (Thuc. i. 100, 101; Diod. xi. 70; Plut. Cim. 14.) In n. c. 411 the democracy in Thaos was overthrown, and an oligarchical government established by Peisander and the Four Hundred at Athens; but as soon as the oligarchy had got possession of the power they revolted from Athens, and received a Lacedaemonian garrison and harmost. (Thuc. viii. 64.) Much internal dissension followed, till at length in n. c. 408 a party of the citizens, headed by Ephorasta, expelled the Lacedaemonian garrison Eutocius with his garrison and admitted Thraexalus, the Athenian commandor. ( Xen. Hell. i. i. §§ 12, 32, i. 4; § 9; Dem. c. Lept. p. 474.) After the battle of Aegospotamoi, Thaos passed into the hands of the Lacedaemonians; but it was subsequently again dependent upon Athens, as we see from the disputes between the states. (Dem. de Hal. p. 50; Philipp. Epist. p. 159.) In the Roman wars in Greece Thaos submitted to Philip V. (Polyb. xv. 34), but it received its freedom from the Romans after the battle of Cynocephalae, n. c. 197 (Polyb. xvii. 37, 31; Liv. xxxii. 50, 35), and continued to be a free (θεσμώ) town in the time of Pliny (iv. 19, 23). The city of Thaos was situated in the northern part of the island, and possessed two ports, of which one was closed. (Sclav. p. 27; Ptol. iii. 11. § 14.) It stood on three eminences; and several remains of the ancient walls exist, intermixed with towers built by the Venetians, who obtained possession of the island after the capture of Constantinople by the Turks. In the neighbourhood is a large statue of Pan cut in the rocks. No remains have been discovered of Aenya or Cosyra; and the mines have long ceased to be worked.

Archilochus describes Thaos as an "island backless overgrown with wild wood." (Σύνθεσις Xμων, Παιδιά της θραύματος, διά Παλαιανθραύματος, Φραγμ. XVII, 18, ed. Schneidewin), a description which is still strikingly applicable to the island after the lapse of 2500 years, as it is composed entirely of naked or woody mountains, with only scanty patches of cultivable soil, nearly all of which are close to the sea-shore. (Grote, Hist. of Greece, vol. iv. p. 34.) The highest mountain, called Mount Iasios, is 3425 feet above the sea, and is thickly covered with fir-trees. There is not enough corn grown in the island for its present population, which consists of 6000 Greek inhabitants, dispersed in twelve small villages. Hence we are surprised to find it called by Dionysius (Perieg. 532) Ἰσιός ὑπὸ τῶν ἱερῶν, but the praises of its fertility cannot have been written from personal observation, and must have arisen simply from the abundance possessed by its inhabitants in consequence of their wealth. Thaos produced marble and wine, both of which enjoyed considerable reputation in antiquity. (Athens. i. pp. 28, 32, i. p. 129; Xen. Symm. 4. § 41; Virg. Georg. ii. 91.) The chief product of the island at present is oil, maize, honey, and timber; the latter, which is mostly fir, is the principal article of export.

The coins of Thaos are numerous. The one figured below represents on the obverse the head of Dionysus, and on the reverse a figure of Hercules killing the lion.

COIN OF THAOS.

THAUSBUS (Thaous, Att. Μ. p. 171; Thaustas, Not. Imp.), was a frontier town of Lower Asyrt, situated on the Canopic arm of the Nile, about 8 miles N. of Serapeium and the Latom Lakes. In Roman times Thauraebus was the head-quarters of a company of light auxiliary troops "II Ala Upia Afrorum." (Orelli, Juvenc. v. 600.) It is supposed to be the modern Chech-El Neb. (Champlian, P.Egypt. v. ii. p. 71.)

THAUMACI (Θαυμάκης; Εδ. Θαυμάκη), a town of Phthiotis in Thessaly, was situated on the pass called Coeas, on the road from Thermopylae and the Malian gulf passing through Lamia. At this place, says Livy, the traveller, after traversing rugged mountains and intricate valleys, comes suddenly in sight of an immense plain like a vast sea, the extremity of which is scarcely visible. From the astonishment which it excited in the traveller, the city was supposed to have derived its name. It stood upon a lofty and precipitous rock. It was
THAUMACIA.
besieged by Philip in n. c. 199; but a reinforcement of Axiochus having made their way into the town, the king was obliged to abandon the siege. (Liv. xxxii. 4.) Thaumacia was taken by the consul Acilius in the war with Antiochus, n. c. 191. (Liv. xxxvi. 14; comp. Strab. x. p. 454; Steph. B. s. v. Θαυμαξία.) Dhmoktā occupies the site of Thaumacia; no inscriptions are found containing the ancient name. Its situation and aspect are in exact accordance with the description of Livy, who copied from Polibius, an eye-witness. Dodwell says that "the view from this place is the most wonderful and extensive he ever beheld," and Leake observes that "at the southern end of the town a rocky point, overtopping the other heights, commands a magnificent prospect of the immense plain containing the Peneius and its branches." (Dodwell, vol. ii. p. 122; Leake, _Northern Greece_, vol. i. p. 458.)

THAUMACIA (Θαυμακία; Eth. Θαυμακιά), a town of Magnesia in Thessaly, one of the four cities whose ships in the Trojan War were commanded by Philoctetes. It was said to have been founded by Thaurus, the son of Poseidon. Only it is to be represented by the paleokastro of Askepti, one of the villages on the Magnesian coast. This Thaumacia must not be confounded with Thaumacia in Phthiotis mentioned above. (Hom. H. ii. 716; Strab. x. p. 436; Steph. B. s. v.; Eustath. ad Hom. p. 323, s.; Plin. iv. 9. s. 16; Leake, _Northern Greece_, vol. i. p. 458.)

THEANGELA (Θεαγγέλη; Eth. Θεαγγγέλη), a town of Caria, which Alexander placed under the jurisdiction of Halicarnassus, is known as the birthplace of Philocles, the historian of Caria. (Plin. v. 29; Athen. vi. p. 371; Steph. B. s. v.)

THEBES (Θηβα), Herod. i. 182, ii. 42; Strab. xvii. p. 308, 815, fol.; Theb. Plin. v. 2. s. 11), the No (Θεβίς, xxi. 14) or No-ammon (Ναοί-αμών, v. 3, 8) of the Hebrew Scriptures; at a later period Diocletian the Great of the Greeks and Romans (Διοκλητιανός μεγάλος, Ptol. iv. 5. § 73; Steph. B. s. v.), was one of the most ancient cities of Egypt, and even, according to Diodorus (i. 50, comp. xv. 45), of the world. Its foundation, like that of Memphis, was attributed to the Egyptian god, who, according to Ptolemy (i. c.), went back to the mythical period of Egyptian history. By some writers, however, Memphis was reported to have been a colony of Thebes. It was the capital of the nome formed by the city itself and its environs, though Ptolemy (i. c.) describes it as pertaining to the Nome of Coptos. In all Upper Egypt no spot is so adapted to the site of an ancient capital as the plain occupied by ancient Thebes. The mountain chains, the Libyan on the western, and the Arabian on the eastern side of the Nile, sweep boldly from the river, and leave on both banks a sparsely area, whose breadth, including the river, amounts to nearly 4 leagues, and the length from N. to S. 16. Thus towards the N. the plain is again closed in by the return of the hills to the Nile; but on the S., where the western chain continues distant, it remains open. The ground, therefore, on which Thebes stood was large enough to contain a city at least equal extent with ancient Rome or modern Paris; and, according to Strabo, ancient physicians said that the N. the plain of the Nile contained cities, and, however, was available for population. An immense area was covered with the temples and their avenues of sphinxes; and on the western side, as far as the Libyan hills, lay the monuments of the dead. On the eastern bank, therefore, the population

was generally collected; and there it was probably densely crowded, since ancient writers assign to Thebes an almost incredible number of inhabitants, and Diodorus (i. 45) describes the houses as consisting of many stories. The extent of the city is very differently stated by ancient authors. Rumours of its greatness had reached the Greeks of Homer's age, who (H. i. 381) speaks of its "hundred gates" and its 20,000 war-chariots, just as the Arabian story-tellers speak of the greatness of Bagdad or Damascus under the Caliphs. Before the Persian invasion (n. c. 525) no Greek writer had visited Thebes; and after that catastrophe its dimensions had considerably shrunk, since Cambyses is said to have burnt all such portions of Thebes as fire would destroy; i.e., in many respects the area of the Peneius and the Persian viceroys no Egyptian city was likely to regain its original proportions. It does not appear that Herodotus ever visited Upper Egypt, and his account of Thebes is extremely vague and meagre. Diodorus, on the contrary, who saw it after its capture by Ptolemy Lagus, about n. c. 87, beheld Thebes in the full bloom of its glory, and after Alexander had diverted much of its commerce to Berenice and the Aracinae bay. He estimates its extent at 140 stadia or about 17 miles. Strabo, again, who went thither with the expedition of Aelius Gallus in n. c. 24, beheld Thebes at a still lower stage of decadence, and assigns it a compass of about 10 miles, but as that is the area of its parts was broken up, and it was divided into certain large hamlets (κατεμφύσεις) detached from one another. Neither of these writers, accordingly, was in a position to state accurately the real dimensions of the city in its flourishing estate, i. e. between 1600 and 800 n. c. Modern travellers, again, have still further reduced its extent; for example, Sir Gardner Wilkinson, the English archaeologist, says that the area of Thebes does not have exceeded 5½ English miles. As, however, during the space of 2600 years (800 n. c.—1800 A. D.) there have been very material changes in the soil from the contraction of the habitable ground, partly by the depredations of the Nile, and partly by the drifting of the sands, it is scarcely possible for modern travellers, without determining the exact extent of the Egyptian labour and art may once have extended their capital. An author quoted by Stephanus of Byzantium, probably Hecataeus, runs into the opposite extreme, and ascribes to Thebes a population (7,000,000) hardly possible for the entire Nile valley, and an extent (400 stadia, or 50 miles) larger than the territory of the Upper Kingdom. (Steph. B. s. n. Διοκλητιανός.) The name of Thebes is formed from the Tāpē of the ancient Egyptian language, pronounced Thaba in the Memphitic dialect of Coptic, and thence easily converted into Θήβα, Thēbē, or Thebes. In hieroglyphics it is written ΑΒ or Αrons, with the feminine article, ΑΒ, the meaning of which is said to be "the head." Thebes being the "head" or capital of the Upper Kingdom. Its later application of Diocletian the Great (Διοκλητιανός ζυγωμένος) answers also to the Egyptian title Amunai or "abode of Amun,"—Ammon or Zenas, the ram-headed god, being the principal object of worship at Thebes. The name Tāpē or Thebes applied to the entire city on either bank of the Nile. The western quarter had the distinctive name of Pathyris, or, according to Ptolemy (iv. 5. § 69), Tathyris, as being under the special protection of Atheta, who is sometimes called the President of the West. The necropolis, indeed, on the Libyan side was appropriately placed under

VOL. II.
THEBES AEGYPT

The guardianship of this deity, since she was believed to receive the soul in her arms at the brink behind the western sea. The question, again, in the age of the Ptolemies, was termed "the Libyan suburb," which was subdivided also into particular districts, such as the Mennomia (the Meicarouoi, Young Hieroglyph. Literature, pp. 69, 75) and Thynabumun, where the priests of Osiris were interned. (Wilkinson, Anc. Egyptians, vol. v. p. 387.)

The grain, wine and oil of Thebes was probably transported from three sources—trade, manufactures, and religion. Its position on the Nile, near the great avenues through the Arabian hills to the Red Sea, and to the interior of Libya through the western desert, rendering it a common entrepôt for the Indian trade on the one side, and the caravan trade with the gold, ivory, and asafoetida on the other, and its comparative vicinity to the mines which intersect the limestone borders of the Red Sea, combined to make Thebes the greatest emporium in Eastern Africa, until Alexandria turned the stream of commerce into another channel. It was also celebrated for its linen manufacture—an important fabric in a country where the climate is always so intertimated from the use of woollen garments (Plin. ix. 1. a. 4.) The glass, pottery, and Intaglios of Thebes were also in high repute, and generally the number and magnitude of its edifices, sacred and secular, must have attracted to the city a multitude of artisans, who were employed in constructing, decorating, or repairing these. The priests and their attendants doubtless constituted an enormous population; for, as regarded Egypt, and for centuries Aethiopia also, Thebes stood in the relation occupied by Rome in medieval Christendom,—it was the sacerdotal capital of all who worshipped Ammon from Pelusium to Axumes, and from the Oases of Libya to the Red Sea.

The history of Thebes is not entirely the same with that of Aegypt itself, since the predominance of the Upper Kingdom implies a very different era in Aegyptian annals from that of the lower, or the Delta. It may perhaps be divided into three epochs: 1. The period which preceded the occupation of Lower Aegypt by the Assyrian nomades, when it is doubtless the case that the Thebaid and Delta were the capital of the entire country, or whether indeed both the Thebaid and Delta were not divided into several smaller states, such as that of Heliopolis in the N., and Abydus in the S., the rivals respectively of Memphis and Thebes. 2. The interval between the expulsion of the Assyrians by Thoutmosis, and the 18th dynasty of Tantie king. During all this period, Thebes was unproportionably the capital of all the Nile-valley, from the Mediterranean to the inland of Argo in lat. 19° 31' N. 3. The period of decadence, when the government of Aegypt was centered in the Delta, and Thebes was probably little more than the head-quarters of the sacerdotal caste and the principal refuge of old Aegyptian life and manners. And this threefold division is rendered the more probable by the consideration that, until the Assyrian empire became formidable, and Phoenicia important from its maritime power, Aesthioi, rather than Arabia or Syria, was the formidable neighbour of Aegypt.

The Nubian kingdom there is no trace of Aegyptian dominion extending beyond the peninsula of Sinai, the northern shores of the Red Sea, or the Libyan tribes adjoining the Delta. During this period invasion was apprehended almost exclusively from the S. The Aethiopians were no less warlike, and perhaps as civilized, as the Aegyptians: the Nile affords them direct intercourse with the regions north of the Cataracta, and they were then, as the Syrians and north-eastern states became afterwards, the immediate objects of war, treaties, or intermarriages with the Pharaohs of Thebes. When the Thebaid state was powerful enough to expel the Assyrian nomades, it must have already secured its alliance or the subject dynasty. The Seleucids were under the direction of its rulers was then alsoforward directed to the eastern frontier of the Lower Kingdom. Accordingly we find that while only one nome in the Thebaid and one in Middle Aegypt were assigned to the native militia, the bulk of the Stelae and Hera- byrians was permanently quartered in the Delta.

During this period the 18th dynasty of Memnon, and the immediate cause of its appearance to have been the collective efforts of the Upper Country to expel the Assyrian shepherds from the Delta. The Thebaid and its capital were, probably, at no period occupied by these invaders; since, according to Manetho's synchronized chronology, the 18th dynasty of Aethiopians was the immediate cause of the frequent mischievous actions of the contemporaneous kingdoms in Aegypt; the Delphi governed by the Bykose, and the Thebaid by native monarchs. Thoutmosis, king of Thebes, was the principal agent in the expulsion of the intruders, and his exploits against them are commemorated on the temples at Karnak. Memphis and the Delta, the principal state, under the new capital, as so also, delivered from the invaders, thenceforward was under the dominion of the kings of Thebes. Its flourishing era lasted nearly eight centuries, i. e. from about 1600 to 800 a. c.

During this period the most conspicuous monarchs were Amensop L., who appears, from the monuments, to have received divine honours after his death, and whose name appears among the founders of the monarchy. He probably carried his arms beyond the north-eastern frontier of the Delta into Syria, and his presence in Aesthioi is recorded in a grotto at Ibsis near Aboosimbel. The victor or conqueror of Amenophis in the N. and S. are inferred from the circumstance that in the sculpture of the latter king, rather than Aesthioi, is the scene of captives of Asiatic and Aesthioi tribes. Next in succession is Thoutmosis, with whose reign appears to have begun the series of Thebian edifices which excited the wonder of the Greeks, who beheld them almost in their original magnificence, and of all subsequent travellers. The foundations, at least, of the palace of this king were commenced during this period. Thoutmos also, like his predecessors, appears, from the monuments, to have made war with Assyria, and to have extended his dominion as high up the Nile as the island of Argo in upper Nubia. Thoutmos II. maintained or even enlarged the realm which he inherited, since his name has been found at Gebel-el- Azdad, the Napeata of the Dendera, lat. 16° 30' N. At this period Aethiopis was apparently the ruling state of the Theban kingdom, and its rulers or viceroys seem to have been of the blood royal of Aegypt, since now for the first time, and until the reign of Seesi Menepthah (Rosellini, Mon. Reg. tab. xxxiv. — iv.), we meet with the title of the royal son or prince of Aegypt. The records of this reign have nearly perished; the great obelisks of Aegypt, which attest the flourishing condition of contemporary art, were erected by Nenut Amen, the sister of Thoutmos II., who appears, like the Nitocris of the
THEBAE AEYPTL

Old Monarchy, to have exercised the functions of royalty. The reign of Thothmes III. is one of the most splendid in the history of Egypt. The frontiers of Egypt extended S. a little beyond the second cataract, and E. nearly to Mount Sinai. Thothmes III. completed in Thebes itself many of the structures begun by his predecessors, e. g. the palace of the kings, and generally enriched the cities of the Thebaid with sumptuous buildings. On the temple of Montu, which was completed by Amunephe II. and Thothmes IV.; and his name was inscribed on the monuments of Ombi, Apollinopolis Magna, and Elsiithy. Thebes, however, was the centre of his architectural labours, and even the ruins of his great works there have served to adorn other capital cities. In the Hippodrome of Constantinople is a mutilated obelisk of the reign of Thothmes III., which was brought from Egypt by one of the Byzantine emperors, and which originally adorned the central court of Carma. Again the obelisk which Pope Sixtus V. set up in front of the church of St. John Lateran at Rome, the loftiest and most perfect structure of its kind, was first raised in this reign, and bears the fourth of its hieroglyphs. The records of this reign are inscribed on two interesting monuments,—a painting in a tomb at Gournah (Hawkins, Travels in Aethiopia, p. 437, foll.; Wilkinson, Mod. Egypt and Thebes, vol. ii. p. 234), and the great Toddle of Aethiopia, which is strictly an historical and statistical document, and which, there can be little doubt in the very Toddle, in which the priests of Thebes exhibited and expanded to Caesar Germanicis in a. d. 16 (Tac. Ann. ii. 60). From the paintings and the hieroglyphics, so far as the latter have been read, on these monuments, it appears that in this reign tribute was paid into the Theban treasury by nations dwelling on the borders of the Caspian sea, on the banks of the Tigris, in the kingdom of Meroe or Aethiopia, and by the more savage tribes who wandered over the eastern flank of the great Sakkara. Thirteen expeditions, indeed, of Thothmes III., are distinctly registered, and the 35th year of his reign, according to Lepsius, is recorded. At this period the kingdom of Aethiopia must have been the most powerful and opulent of the regions of Egypt. Of the son of Thothmes III., Ammonophe II., little is known; but he also added to the ajections of Thebes, and reared other monuments in Nubia. Inscriptions found at Surabi-el-Kulali, in the peninsula of Sinai, record his name, and at Prinsis (Ibvis) he appears in a space, or excavated chapel, seated with two principal officers, and receiving the account of a great chase of wild beasts.

Next in importance, though not in succession, of the Theban kings of the 18th dynasty, is Amunephe, or Amonophe III. His name is found at Toumbo, near the third Cataract, and he permanently extended the frontiers of the Theban kingdom to Soleb, a degree further to S. than it had hitherto reached. The city, although probably not biographically, but commercially, important, inasmuch as the farther southward the boundaries extended, the nearer did the Aegyptians approach to the regions which produced gold, ivory, gems, and aromatics, and the more considerable, therefore, was the trade of Thebes itself. Only on the supposition that it was the source of supply of the foreign exports in the world can we understand the lavish expenditure of its monarchs, and its fame among the northern nations as the greatest and richest of cities.

And this consideration is the more important towards a correct estimate of the resources of the Theban kingdom, since its proper territory barely sufficed for the support of its population, and there is no evidence of its having any remarkable traffic by sea. It is probable, indeed, that the dominions of Amonophis III. stretched within five days' journey of Azume on the Red Sea; for a scarabaeus inscribed with his name and that of his chief Tafa menes is found on the island of Karo or Koloei, supposed to be Cokes (Bisellini, Mem. Soc. sc., iii. 161; Birch, Gall. Brit. Mus. p. 83), as their southern limit. Thebes was enriched by this monarch with two vast palaces, one on the eastern, the other on the western bank of the Nile. He also commenced and erected the greater portion of the buildings at Luxor. On the walls of their chambers Amonophis was designated the Menmahun, an unknown people, and the "Pacificator of Egypt." From the fragment of a monolithic granite statue now in the Louvre, it may be inferred that his victories were obtained over negro races, and consequently were the results of campaigns in the interior of Libya and the S. of Aethiopia. Amonophis has a further claim to notice on account of the Epistle of the Memnon, son of Aurora, whom Achilles slew at the siege of Troy. Of all the Aethiopians the Memnonian status, from their real magnitude and from the fabulous stories related of them, have attracted the largest share of attention. By the word Memnon the Greeks understood an Aethiopian or Ethiopian prince of dark complexion who, in B. C., A.D. 668, repelled the incursions of the Huns under their king Gota (Gr. Geog. Mit., or, rather, perhaps, a dark-complexioned warrior (comp. Eusath. ad II. v. 630); and the term may very properly have been applied to the conqueror of the southern land, who was also hereditary prince of Aethiopia. The statues of Memnon, which now stand alone on the plain of Thebes, originally may have been the figures at the entrance of the long cromlech of cairns, which led up to the Amonophenion or palace of Amonophis. Of the eastern and northern limits of the Theban kingdom under the third Amonophis, we have no evidence similar to that afforded by the tablet of Karmak and yet from the monuments of his reign we may infer that he levied tribute from the Egyptians on the Red Sea, and on the coast of Sinai, and at one time pushed his conquests as far as Mesopotamia. According to Manetho he reigned 31 years: his tomb is the most ancient of the sepulchres in the Bob-al-Melook; and even so late as the Ptolemaic age he had divine honours paid him by a special priest-college called "The pastophori of Amonophis in the Memneion." (Kenrick, Ancient Aegypt, vol. ii. p. 246.)

Setel Meneprthah is the next monarch of the 18th dynasty who, in connection with Thebes, deserves mention. Besides the temples which he constructed at Amada in Nubia and at Sielilla (Silkelah), he began the great palace called Menepthoeion in that city, although the chief work of this monarch is to be completed by his successors Rameses II. and III. From the paintings and inscriptions on the ruins Karma and Luxor it appears that this monarch triumphed over five Asiatic nations as well as over races whose position cannot be ascertained, but whose features and dress point to the interior of Libya. The tomb and sarcophagi of Setel Meneprthah were found near the village of Belconti in the Bob-al-Melook. (Travels, vol. 1. p. 167.) If he be the same with the Estos of the lists, he reigned 50 or 51 years. We now come to

4 D 2
THERAE AEGYPT.

the guardianship of this deity, since she was believed to receive the sun in her arms as he sank behind the western hills. This quarter, again, in the age of the Ptolemies, was termed "the Libyan suburb," which was subdivided also into particular districts, such as the Memnonia (vs Meunans, Young, Hieroglyph. Literature, pp. 69, 73) and Typhon- branca, where the priests of Chairs were interred. (Wilkinson, Anc. Egyptians, vol. v. p. 387.)

The power and prosperity of Thebes arose from three sources — trade, manufactures, and religion. Its position on the Nile, near the great avenues through the Arabian hills to the Red Sea, and to the interior of Libya through the western desert, rendering it a common entrepôt for the Indian trade on the one side, and the caravan trade with the gold, ivory, and aromatic districts on the other, and its parative vicinity to the mines which intersect the limestone borders of the Red Sea, combined to make Thebes the greatest emporium in the world, until Alexandria turned the stream of commerce to another channel. It was also celebrated for its manufactures — an important fabric where a numerous priesthood was in the use of woollen garments (Plin. H. N. 5. 72); glass, pottery, and intaglios of T. was in high repute, and generally of its edifices, were a great attraction to the city and to the sea, who were employed in constant repair of them. The priests doubtless constituted the wealthiest and most influential of the population.

The history of Thebes is well known; we are here concerned with that of Aegypt, and more especially with the Aegyptian and the Scotch, as the sources of the Delta. It may be easily inferred from the strength, clemency, Lower Aegypt, and the conquests of Ramses III, that the Aegyptian was the most attractive history. To him the capital of the Delta, the lands of the Thespians, the power of the Pharaoh, the territory of the Red Sea; the dykes and canals which made the Delta habitable; the great area, 1500 stadia in length, between Phait and Aethiopis, raised as a barrier against the Aegyptian and Asian; a re-partition of the territories of Aegypt; the law of hereditary occupation (see vol. vi. 10); and foreign conquests, or at least expeditions into Western Asia, which rendered it to him even the Colchians and the Ecbatans. (Taric. Aegypt. b. 50.)

With the 21st dynasty appear the traces of a revolution affecting the Upper Kingdom. Tanite and Thebaid Pharaohs are now lords of the Nile-valley; and these are succeeded by an Aegyptian dynasty, marking invasion and occupation of the Thebaid by a foreigner. Perhaps, as Aegypt became more inhabited, the affairs of Aegypt — a result of the conquests of the house of Ramses — it may have proved expedient to remove the seat of government nearer to the Syrian frontier. The dynasty of Setiis, the Aegyptian, however, indicates a revolt of the provinces S. of the cataracts; and even after the Aegyptians withdrew, the Lower Kingdom re-

of the "lady of
Astronomical
or symbols of the
astronomy (Lepsius, Rev. Arch. Jan. 1845). The entire area of the Memnonium was enclosed by a brick wall, in the double arches of which are occasionally imbedded fragments of still more ancient structures, the remains probably of the Thebes which the 18th dynasty of the Pharaohs enlarged and adorned. A dromos NW. of the Memnonium, formed of not less than 200 sphinxes, and at least 1600 feet in length, led to a very ancient temple in a recess of the Libyan hills. This was probably a place of worship before the lowlands on each side of the Nile were artificially converted by drainage and masonry into the solid area upon which Thebes was built.

The next object which meets the traveller's eye is a mound of rubbish, the fragments of a building once occupying the ground. It is called by the Arabic Koun-el-Hattam, or mountain of sandstone, and is composed of the ruins of the Amemepheon, the palace or temple of Amunoph III.—the Memnon of the Greeks. About a quarter of a mile distant from the Amemepheon, and nearer to the Nile, are the two colossal statues called Tessa and Chama by the natives, standing isolated on the plain and eminent above it. The most northerly of these statues is the celebrated vocal Memnon. Their present isolation, however, is probably accidental, and arises from the subsidence or destruction of an intermediate dromos, of which they formed the portals, and which led to the Amemepheon. These statues have already been described in the Dictionary of Biography, s. v. Mem-
xisa [Vol. II. p. 1028.]. It may be added here that the present height of these colossal figures, inclusive of the pedestal, is 60 feet. The alluvial soil, however, rises to nearly one half of the pedestal, and as there is an inscription of the age of Antinous, Pius, A. D. 159, foll., i. e. about 1720 years old, we obtain some measure of the amount of deposition in so many centuries. The blocks from which
the name of Ramses II. and III., the latter of whom is the Sovereign of Herodotus, and who may therefore be regarded as a clearly historical personage. There can be no doubt of the greatness of Thebes under his sceptre. In this, as in many other instances where Egypt is concerned, the monuments of the country enable us to approach the truth, while the critical of the Greek traveller, or the sceptic in accepting the narrations of the Egyptian priests—naturally eager, after their subjection by the Persians, to extait their earlier condition—only tends to bewildering and mislead. Thus, for example, Diodorus (i. 54) was informed that Sesostris led into the field 600,000 infantry, 34,000 cavalry, and 27,000 chariots; and he appeals to passage already cited from Homer to show that Thebes sent so many chariots out of its hundred gates. There is no evidence that the Egyptians then possessed a fleet in the Mediterranean; yet Diodorus numbers among his conquests the Cyclades, and Dicaearchus (Schoel. in Apoll. Rhod. iv. 272) assigns to him "the greater part of Europe." The monuments, on the contrary, in no case show anything like a pretension that the monarch, although if we may infer the extent of his conquests and the number of his victories from the space occupied on the monuments by their pictorial records, he carried the arms of Egypt beyond any previous boundaries, and counted among his subjects races as various as those which, nearly 17 centuries later, wereC. H. W. B.
of the kings,"—whose sculptures so copiously illustrate the history, the arts, and the social life of Ancient Egypt. These sculptures are housed in the great temples of Karnak, Memphis, and others. They depict the kings, their deeds, and the life of their times. The temples are magnificent structures, with their vast enclosures of walls and their long avenues of sphinxes. But the western quarter of Thebes was reserved principally for the dead, and for the service of religion and the state, while the mass of the population was contained in the eastern and central parts of the city. The inhabitants of the western side of the city must have been considerable, since each temple had its own establishment of priests, and each palace or public edifice its proper officers and servants. Still we shall probably be correct in describing the eastern quarter as the civil, and the western as the royal and ecclesiastical, portion of Thebes. At present no obelisks have been discovered in the eastern quarter, but with this exception the monuments of Memnon and Medinet-Abou yield little in grandeur, beauty, or interest to those of Luxor and Karnak, and in one respect indeed are the more important of the two, since they afford the best existing specimens of Egyptian colossal or portrait statues.

Thebes, then, with the western quarter,—the Memnonium of the Ptolemaic times,—we find at the northern limit of the plain, about three quarters of a mile from the river, the remains of a building to which Champollion has given the name of Mencéphë-thése, because the name of Setel-Mencéphëthë is inscribed upon its walls. It appears to have been both a temple and a residence, and was succeeded by a grove of 198 feet in length. Its pillars belong to the oldest style of Egyptian architecture, and its bas-reliefs are singularly fine.

The next remarkable ruin is the Memnonium of Strabo (avil. p. 728), the tomb of Osymandyas of Diodorus, now commonly called the Ramsesœon on the authority of its sculptures. The situation, the eccentricity, and the beauty of this ruin of Thebes are all equally striking. It occupies the first base of the hills, as they rise from the plain; and before the alluvial soil had encroached on the lower ground, it must have been even more conspicuous an object from the city than it now appears. The inequalities of the ground on which it was erected were overcome by steps from one corner of the temple to the other, and the Ramsesœon actually stood on a succession of natural terraces improved by art. The main entrance from the city is flanked by two pyramidal towers; the first court is open to the sky, surrounded by a double colonnade, and 140 feet in length and 18 in breadth. On the left of the staircase that ascends to the second court stands the pedestal of the statue of Ramses, the largest, according to Diodorus (i. 49), of the colossal of Egypt. From the dimensions of its foot, parts of which still remain, it is calculated that this statue was 54 feet in height and 22 feet 4 inches in breadth across the shoulders. The court is strewed with its fragments. How it came to perish, how it was carried away or buried, the land not liable to earthquakes, are alike subjects of wonder; since, without mechanical aids wholly beyond the reach of barbarians, it must have been almost as difficult to cast it down from its pedestal as to transport it originally from the quarries. The walls of the second court are covered with sculptures representing the war of Ramses II, a confirmation and complement of the history of the group of colossal statues upon the interior walls of the pylons. Diodorus (i. 47) speaks of "monolithic figures, 16 cubits high, supplying the place of columns," and these are probably the pillars of this second court. He also mentions the attack of a city surrounded by a river; and in the group of sculptures, still unidentified, the Memnonium with the monument of Osymandyas. A third flight of stairs conducts from the court to a hall, which, according to Champollion was used for public assemblies. A sitting statue of Ramses flanked each side of the steps, and the head of one of them, now called the young Memnon adorns the British Museum. The columns and walls of the court are covered with sculptures partly of a religious, partly of a civil character, representing the homage of the 33 sons of Ramses to their parent and his offerings to the gods. Nine smaller apartments succeed to the hall. One of these was doubtless the library or "Dispensary of the Mind" (Ὑπαγορεύμα ἤθελης) of which Herodotus speaks in the Greek Hecataeus, a that we only from hearsay. Of the nine original chambers, two only remain, the one just described, and a second, in which Ramses is depicted sacrificing to various divinities of the Theban Pantheon. Beneath the upper portion of the Memnonium rock-selphides and brick graves have been discovered, which are the entrance to the Nile, are the two Egyptian dynasties (Lepsius, Ren. Arch. Jan. 1848). The entire area of the Memnonium was enclosed by a brick wall, in the double arches of which are occasionally imbedded fragments of still more ancient structures, the remains probably of the Thebes which the 18th dynasty of the Pharaohs enlarged and adorned. A dromos NW. of the Memnonium, formed of not less than 6000 sphinxes, and at least 1600 feet in length, led to a very ancient temple in a recess of the Libyan hills. This was probably a place of strength before the lowlands on each side of the Nile were artificially converted by drainage and masonry into the solid area upon which Thebes was built.

The next object which meets the traveller's eye is a mound of rubbish, the fragments of a building once occupying the ground. It is called the Arab Kous-El-Hattam, or mountain of sandstone, and is composed of the ruins of the Ammonophium, the palace or temple of Ammon III.—the Memnon of the Greeks. About a quarter of a mile distant from the Ammonophium, and also to the N.W. of the two colossal statues called Toms and Chausa by the natives, standing isolated on the plain and eminent above it. The most northerly of these statues is the celebrated vocal Memnon. Their present isolation, however, is probably accidental, and arises from the subsidence or destruction of an intermediate dromos, of which they formed the ends, and which led to the Ammonophium. These statues have already been described in the Dictionary of Biography, s. v. Memnon [Vol. ii. p. 1083.] It may be added here that the present height of these colossal figures, inclusive of the pedestal, is 60 feet. The alluvial soil, however, rises to nearly one half of the pedestal, and of there is a description of the age of thecolossal figures. Plus, A. D. 159, foll. i. e. about 1720 years old, we observe some measures of the amount of deposition in so many centuries. The blocks from which
the stances are formed and composed of a cause,

the apse; and such numbers of this animal have been

the village of Medinet-Abu stands about one third

of a mile SW. of Kom-el-Balbat, upon a lofty

a measure hardly inferior to that which marks

the work of successive monarchs of the name of Thoth-

masonry of the rock, and is set in a measure hardly

towards the river, are inscribed the

names of Thoth-\textit{messe}, the Asbiopion, of Nectaneboes,

the last independent king of Egypt, of Ptolemy

II, and of Antiochus Pius. The original

Thothmesian comprises merely a sanctuary

surrounded by galleries and eight chambers; the

additions to it represent the different periods of its pa-

tions, which are by far the best of the southern

Ramessian of Champollion—far exceeds in

dimensions and the splendour of its decorations the

Thothmesian. It stands a little S. of the temple,

near the foot of the hills. The dromes which

connects them is 265 feet in length. The sculptures

on the pylon relate to the coronation of Ramesses IV.

portico, a temple and a palace, connected with each

other by a pylon and a dromos. The temple was

the entrance to these tombs are rectangular, and open

passages which either pierce the rock in straight

lines, or wind through it by ascending and descen-

ding shafts. Where the limestone is of a crumbling

nature, it was supported by brick arches, and drains

were provided for carrying off standing or usual

water. The walls of these passages and chambers

were carefully prepared for the artist. Rough or

ious portions were cut out, and their place filled up

with bricks and plaster. Their entire aspect was

then covered with stucco, on which the paintings

were designed and highly coloured. The doorways

were finished with stone slabs or flat sur-

face, or cut into the stucco. They are mostly

squares in aches of chequer and arabesque work. The

subjects portrayed within these frames or niches are

very various,—ranging through religious ceremonies

and the incidents of public or private life. The e-

ments of these tombs may indeed be termed the

miniature ratio of the ancient world. A portion of

the space of 40 and 50 feet no less than

1300 hieroglyphics are often traced, and finished

with a minute delicacy unsurpassed even in mat-

ings above ground, which were meant for the eye of

the living.

The Royal Sarcoph., however, forms the most

striking feature of the Theban necropolis. They

stand in a lovely and barren valley, seemingly a na-

tural chasm in the limestone, and resembling in its

perpendicular sides and oblong shape a sarcophagus.

At the lower end of this basin an entrance has been

cut—there seems to be no natural mode of ingress-

in the rock. Forty-seven tombs were, at one time,

known to the ancients. (Diodor. i. 46.) Several

twenty or twenty-one have been examined by so-

vern explorers. Here reposèd the Theban Pharaohs

from the 18th to the 21st dynasty. The only

tombs, hitherto discovered, consist of those of

Amenophis III, Ramesses M\textit{é}m\textit{â}m, and Ramess

III. To prepare a grave seems to have been an

act of the pleasures of Egyptians equally

and since the longest survivor of these tombs in the

most sumptuous tomb, it may be in-

ferred that the majority of them died before they

had completed their last habitation.

The queens of Amenophis were buried apart from

the kings, in a spot about three-fourths of a mile SW.

of the temple of Medinet-Abu. Each of them has

the title of 'Wetkiret,' the name of tomb of all kinds, either that

their consorts combined with their proper names that

also of the great Theban deity, or that, after death,

they were dignified by apotheosis. Twenty-four

tombs have at present been discovered in this cen-

tury, twelve of which are ascertainment to be those of

the queens. The least injured of them by time or

harder strata of the hills are of finer and more dur-

able texture, and here the priest-caste and nobles

were interred. The tombs of the lower orders are

generally without sculpture, but filled with mum-

mies of animals accorded sacred by the Aegyptians.

A favourite companion in death appears to have been

the Nile, the monuments are

even more magnificent. The villages of Luxor and

Karnak occupy a small portion only of the true De-

polarity. The ruins at Luxor stand close by the river.

The ancient landing place was a jetty of stone, which
THEBAE AEGYPTL
also served to break the current of the stream. The monumental monuments are two obelisks of Ramses III, respectively 70 and 72 feet high, one of which still remains there, while the other has been removed to the Place de la Concorde at Paris. Their unequal height was partially concealed from the spectator by the lower obelisk being placed upon the higher pedestal. Behind them were two monolithic statues of that monarch, in red Syenite granite. These are now covered from the breach downwards with rubbish and fluvial deposit, but were, originally, including their chairs or bases, 39 feet high. Next succeeds a court, surrounded by a corridor of double columns, 190 feet long and 170 broad. It is entered through a portal 51 feet in height, whose pyramidal wings are inscribed with the battles of Ramses. On the north, a corridor of 201 feet, the north-east corner of which is closed by Amenophis III, opens upon a colonnade which leads to a smaller court, and this again terminates with a portico composed of four rows of columns, eight in each row. Beyond the third portico follows a considerable number of apartments, flanking a sanctuary on the walls of which are represented the belli militari of that prince, who was a conqueror.

A dromos of ondoro-sphinxes, and various buildings now covered with sand and dried mud, formerly connected the quarter of eastern Thebes, represented by Lenuor, with that represented by Karnak. Near to the latter place a portion of the dromos still exists, and a little to the right of it is a second dromos, which must have been one of the most remarkable structures in the city. It led up to the palace of the kings, and consisted of a double row of statues, sixty or seventy in number, each 11 feet distant from the next, and each having a lion's body and a ram's head. The SW. entrance of the palace is a lofty portal, followed by four spacious courts with intervening gateways. In the courtyard of the palace, which is, in some degree, lessened by later additions to its plan, for on the right side of the great court was a cluster of small chambers, while on its left were only two apartments. Their object is unknown, but they probably served as lodgings or offices for the royal attendants. In the first of the two main courts are obelisks, one of which is 95 feet high, and the other still erect and uninjured. In a second court to the right of the first, there were two obelisks also: the one which remains is 92 feet high. The eldest portion of the palace of Karnak appears to be a few chambers, and some polygonal columns bearing the shield of Setiis. To these—the nucleus of the later structure—thePharaohs added, made considerablar additions; among them a chamber whose sculptures compose the great Karnak Tablet, so important a document for Aegyptian chronology.

But the Great Court is surpassed in magnificence by the Great Hall. This is 80 feet in height, and 339 feet long by 179 broad. The roof is supported by 134 columns, 13 in the front and 122 in the sides. The central columns are each 66 feet high, clear of their pedestals, and each 11 feet in diameter. The pedestals were 10 feet high, and the abacus over their capitals, on which rested the architrave of the ceiling, was 4 feet in depth. The columns were each about 27 feet apart from one another. The six columns in the front were each 41 feet high, and the 9 feet 9 inches girder. Light from the entrance were admitted into the building through apertures in the side walls. The founder of the palace was Setiel-Menepthah, of the 18th dynasty; but one reign cannot have sufficed for building so gigantic a court, and we know indeed not only that many of the historical buildings of the city were contributed by his son Ramses II, but also that the latter added to the Great Hall, on its NW. side, a vast hypethral court, 275 feet in breadth, by 329 in length. This, like the hall, had a double row of columns down its centre, and a covered corridor round its sides. Four gateways opening to the four quarters gave admission into this court; and to the principal one which fronted the Nile an avenue of crio-sphinxes led up, headed by two granite statues of Ramses II.

The purpose for which these spacious courts and their annexed halls and esplanades were erected was perhaps partly religious, and partly secular. Though the kings of Egypt were not deified, the edifices which were built to honor them were of divine character. It was claimed for the king that he was the son of Ammon, and in the temple of Karnak he was enthroned as the god Amun. The amanuensis of the 3rd dynasty, that is, the beginning of the 26th, thus addressed the king: 'O Pharaoh of the gods, as in the presence of Amun.' The title of 'god' was conferred on the king by the priests. The emperor Theodosius is said to have inspected the city of Thebes. He was received by Theodotus, the archbishop, in the presence of a large multitude of the people. Theodotus had an army as well as a navy, and he was received with great enthusiasm. He was entertained with a splendid banquet, and was presented with a large sum of money. Theodosius was pleased with the city, and he wrote a letter to the emperor Constantine, in which he praised the city and the people. He said that the city was well-peopled, and that the people were well-fed and clothed. He also said that the city was well-governed, and that the government was efficient.

In the Great Hall a great number of the columns are still erect. The many which have fallen have been undermined by water loosening the soil below; and they fall the more easily, because the architraves of the roof no longer hold them upright. The most costly materials were employed in some parts of the palace. Cornices of the finest marble were inlaid with ivory mouldings or sheathed with beaten gold. These were the principal structures of the eastern moiety of Thebes: but other dromoi and gateways stand within the circuit of its walls, and by their sculptures show to us the Pharaohs that occupied it. The eastern branch of the dromos which connects Lenuor with Karnak appears from its remains to have been originally 500 feet in length, and composed of a double row of ram-headed lions 58 in number. The eastern and western portals stand at its SW. extremity. It is 64 feet high, but without the usual pyramidal propyla. It is indeed a work of the Greek era, and was raised by Ptolemy Euergetes L. Ramses IV. and Ramses VIII. added temples and a dromos to the city. Nor was Thebes without its benefactors even so late as the era of the Roman Caesars. The name of Tiberius was inscribed on one of its gateways, which was dedicated by his general survey of the Empire, directed some repairs or additions to be made to the temple of Zeus-Amon. That Thebes, as Herodotus and Diodorus saw it, stood upon the site and incorporated the remains of a yet more ancient city, is rendered probable by its sudden expansion under the 18th dynasty of the Thebans, as well as by the traces of its architecture, more in affinity with the monuments S. of the cataracts than with the proper Aegyptian style. It seems hardly questionable that
Thebes was indebted for its greatness originally to its being the principal centre of Ammon-worship,—a worship which, on the one hand, connected it with Meroe, and, on the other, with the islands of the Libyan desert. The strength which the Thebaid and its capital thus acquired not only enabled it to rise superior to Abydus in the earlier period, but also to expel the Assyrians from the Delta. Now becomes then an interesting question which quarter of Thebes was its cradle? Did it spread itself from the eastern or the western shore of the Nile? Both Dioecesis and Strobos are agreed in placing the "old town," with its Ammonian temple, on the eastern bank of the river; and this site too was the more accessible of the two as neither its eastern nor western name came from the left or, as it is more likely they did, from the right shore. Between Desor and Karwak lies the claim to be considered as the site of the earliest Diospolis. Now in the former place there is no conspicuous trace of Ammon-worship, whereas the latter, in its ram-headed cromlech, abounds with symbols of the worship of Ammon. The presence of Ammon. Osis indeed appears as his son or companion on the sculptures, and in some of the temple-legends they were represented as joint founders of the shrine. But Ammon was without doubt the elder of the two. We may accordingly infer that the first Thebes stood nearly on the site of the eastern Karwak, as a period anterior to all records: that it expanded towards the river, and was separated by the whole breadth of the stream and of the plain to the foot of the Libyan hills from the necropolis. Finally, that as its population became too large for the precincts of the eastern plain, a suburb, which grew into a second city, arose on the opposite bank of the Nile; and thus the original division of the land remains unchanged.

The territory of Thebes was named Thebais (Thebaïs, Θέβαις), an obvious name to S., lat. 24° 5' N., and Hermopolis Magna to N., lat. 25° 45' N. On the E. it was bounded by the Arabian, on the W. by the Libyan hills and desert. As rain seldom falls in the Thebais (Hered. iii. 10), and as its general surface is rocky or sandy, the breadth of cultivable land depends on the alluvial deposits of the Nile, and this again is regulated by the configuration of the country. For this reason the population of the Thebaid was mostly gathered into towns and large villages, both of which are often dignified by ancient writers with the appellation of cities. But numerous cities were incompatible with the physical character of this region, and its population must have been considerably below the estimate of it by the Greeks and Romans.

The Thebais was divided into ten nomes (Strab. vii. p. 787), and consequently ten halls in the Libyakin were appropriated to its nomarchs. But the timber apparently varied with the boundaries of Upper Egypt, since Pliny (v. 9) enumerates eleven, and others tiers mention fourteen Nomees. The physical aspect of the Thebais requires especial notice, nay it differed, both geologically and in its fauna and Flora, from that of Lower Egypt.

For the most part it is a narrow valley, intersected by the river and bounded by a double line of hills, lofty and abrupt on the eastern or African Thebes, and interrupted by sandy plains and valleys on the Libyan or western. The desert on either side produces a stunted vegetation of shrubs and herbs, which emit a slight aromatic odor. The cultivable soil is a narrow strip on each side of the Nile, forming, with its bright verdure, a strong contrast to the brown and arid hue of the surrounding desert. The meanders of the river do not exceed 11 miles, and sometimes is contracted by the rocky banks of the Nile even to two.

Upper Egypt belongs to Nubia rather than to the Heptanomia or the Delta. Herodotus (ii. 10) was mistaken in his statement that rain never falls in the Thebais. However, of which the flooding of Upper Egypt is most fearful and annoying. Showers fall annually during four or five days each year, and about once in eight or ten years heavy rains fill the torrent-beds of the mountains, and convert the valleys on either side of the Nile into temporary pools. That this was so even in the age of Hecataeus and Herodotus is proved by the circumstance that the inhabitants of Thebais have their mastabas in the water off.

But the fertility of the Thebais depends on the overflow of the Nile. From Syene nearly to Latomia, lat. 25° 17' N., the cultivable soil is a narrow rim of alluvial deposit, bounded by steep walls of sandstone. On the Arabian shore were the quays for the conveyance of the Nile waters, which were constructed at Apollinopolis Magna (Kefr) the sandstone disappears from the W. bank of the river, and on the E. it extends but a little below that city. Four miles below Eilithya, the limestone region begins, and stretches down nearly to the apex of the Delta, descending on the Libyan side to the s. It is followed southward by a broad plain. This region is 5° 15' wide, and 6 miles in breadth. At this point a greater breadth of land is cultivable, and the Arabian hills deep gorges open before the Red Sea, the most considerable of which are the gorges that run from Eilithya in a SE. direction to Betnica, and from Coptos, past the perturbarbary quay, to Coeseir on the Red Sea. The banks and estuaries of the river are cut by sandy mouths which are flat and marshy. The Prolematis constructed in these valleys are still occasionally found buried in the sand. At Latomia the Nile-valley is nearly 5 miles wide, but it is again crossed by the rocks at Gebelus, where, owing to the precipitous character of the banks, the river is not altered. The river and crosses the desert to Hermopolis. The next material expansion of the valley is at Thebes. At this point both chains of hills curve boldly away from the river, and leave an area of more than 5 miles in length and 3 in breadth. At the northern extremity of this plain the banks again contract, and at Gourna are almost close to the Nile. Re-opening again, the
THEBAN AEGYPT.

borders of the stream as far as Hermopolis Magna, the northern boundary of the Thebaid, generally ex-
tend inland on the E. side about one mile and a half, on the W. about two miles. They do not indeed ob-
serve an unbroken line, but the alluvial soil, where the
mouths of the collateral valleys permit, occasion-
ally stretches much farther into the country. Canals
and dykes in the Pharaonic period admitted and
retained the Nile's deposit to an extent unknown
either in Grecian, Roman, or modern eras.

Seen from the river the Thebaid, in the florishing
periods of Egypt, presented a wide and animated
spectacle of cultivation and industry, wherever the
banks admitted of room for cities or villages. Of the
scenery of the Nile, its teeming population and mul-
titudinous river-craft, mention has already been made in
the article NILE. Among many others, the fol-
lowing objects were beheld by those who travelled
from Syene to Hermopolis. At first the general
aspect to the shores is barren and dreary. Kom-Ombu, the ancient Ombi, would first arrest
attention by the brilliant colours of its temples, and,
at certain seasons of the year, by the festivals held
in honour of the crocodile-headed deity Serak. At
times also, if we may credit the Roman satirist
(Juvénal, Sat. xvi.), the shore at Ombi was the
scene of a real excitement, when the Emithi, the
navigator from Teinty. Sixteen miles below Ombi
was the seat of the special worship of the Nile, which
at this point, owing to the escaped form of its sand-
stone banks, admits of a narrow road only on either
side, and seems to occupy the whole breadth of
Aegypt. Here, too, and on the eastern bank especially are said to be found the tombs which surround
the Theban architects with their durable and beauti-
ful materials. Various landing-places from the river
gave access to those quarries: the names of suc-
cessive sovereigns and princes of the xviiiith dynasty,
their wars and triumphs, are recorded on the rocks;
and blocks of stone and monolithic shrines are still
visible in their galleries. The temples of Apollino-
polis Magna on the shores is barren and dreary.
Edfu, the temple of Edfu, was once the
Thebes occupying either bank, Crocop, long the seat
of Aegyptian commerce with India, the temples of
Athor and Iasi at Teinty, the mouth of the ancient
branch of the Nile, the canal of Jusef at Diospolis
Parva, the necropolis of Abydos, near which runs the
highroad to the greater Oasis, the linen-works and
shops of the town of Edfu, and lastly, the
sepulchral chambers at Lycomolis, and, and,
finally, the superb portion of Hermopolis Magna,
all alike, within a compass of about 380 miles,
the wealth, enterprise, and teeming population of
Upper Aegypt.

The vegetation of this region announces the app-
pearance of tropics. The productions of the desert,
stunted shrubs and trees, resemble those of the Ara-
bian and Libyan wastes. But wherever the Nile fer-
tilizes, the trees and plants belong rather to Aethiopia
than to the lower country. The sycamore nearly dis-
appears: the Theban palm and the date-palm take its
place. The lotus (Nymphaea lotus and Nymphaea
columbiana) is as abundant in the Thebais as the
papyrus in the Delta. It is the symbol of the
Upper Land: its blue and white cups enliven the pools
and canals, and representations of them furnished a
familiar and graceful ornament to architecture.
Its bulb afforded a plentiful and nutritious diet to
the poorer classes. The deserts of the Thebais,
which in Christian times swarmed with monasteries
and hermitages, contained the wolf, hyena, and
jackal: but the larger carnivorous animals of Libya
were rarely seen in Aegypt. (Hered. ii. 65.) In the
Pharaonic times the hippopotamus was found in the
Nile below the Cataracts: more recently it has sel-
dom been found N. of them. The crocodile, being an
object of worship in several of the Theban temples,
was doubtless more abundant than it is now. From
both papyri and sculptures we know that the The-
ban landowners possessed horned cattle and sheep
in abundance, although they kept the latter for their
wool and milk principally; and the chariots of
Thebes attest the breeding and training of horses.

From extent drawings on the monuments we know
also that horticulture was a favourite occupation in
Upper Aegypt.

The population of the Thebais was probably of a
purer Egyptian stamp than that of the Delta; at
least its admixtures were derived from Arabia or
Meroe rather than from Phoenicia or Greece. Its
revolutions, too, proceeded from the south, and it
was comparatively unaffected by those of the Lower
Country. Even as late as the age of Tiberius, a.d.
14—37, the land was prosperous, as is proved by
the extension and restoration of so many of its pub-
lic monuments; and it was not until the reign of
Diocletian that its ruin was consummated by the in-
vasion of the Gothic Vandals and the barbarian
hordes from Nubia and the Arabian desert. [W. B. D.]

THEBAE (Θηβαί, orig. Θηβαί, Dor. Θῆβαι; EA. 
Θῆβαι, fem. Θῆβας, Thebanus, fem. Thebae),
the chief city in Boeotia, was situated in the southern
plain of the country, which is divided from the
northern by the ridge of Orchestus. Both these
plains are surrounded by mountains, and contain
for a long time two separate confederates, of which
Orchomenus in the north and Thebes in the south
were the two leading cities.

I. HISTORY.

No city in Greece possessed such long continued
celebrity as Those, Athens and Sparta, which were
the centres of Grecian political life in the
historical period, were poor in mythical renown;
while Argos and Mycenae, whose mythical annals
are full of glorious recollections, sank into com-
rparative insignificance in historical times, and My-
cenae indeed was blotted out of the map of Greece
so soon after the fall of Troy. But the early pre-

cental ages Those shone pre-eminent, while in later
times she always maintained her place as the third
city of Greece; and after the battle of Lunctra was
for a short period the ruling city. The most cele-
brated Grecian legends cluster round Those as their
centre; and her two sieges, and the fortunes of her
royal houses, were the favourite subjects of the tragici
music. It was the native city of the great seer
Tiresias and of the great musician Amphiom. It
was the reputed birthplace of the two deities Diony-
sus and Hercules, whence Those is said by Sophocles to
be "the only city where mortal women are the
mothers of gods (οὶ δέ μόρφων τινῶν οἱ θεοί

According to the generally received tradition,
Those was founded by Cadmus, the leader of a
Phoenician colony, who called the city Kadmeia
(Kadmeia), a name which was afterwards confined
to the citadel. In the Odyssey, Amphinom and Zel-
this, the two sons of Antiloce by Zetes, are rep-
resented as the first founders of Those and the first

Digitized by Google
THEBAN BOEOTIA.

builders of its walls. (Oid. xi. 282.) But the geographers placed Amphic and Zephas lower down in the series, as we shall presently see. The legends connected with the foundation of the city by Cadmus and his descendants are so interwoven that it is not possible to separate the two series of traditions. It is impossible to determine which of the original inhabitants of Thebes were called Cadmusians (Kadmeis, II. iv. 285, 291, v. 807, x. 288, Od. xi. 276) or Cadmiochians (Kadmeisies, IL iv. 285, 286, xxiii. 680), and that the southern plain of Boeotia was originally called the Kadmeian land (Kadmeis, Thuc. i. 18). The origin of these Cadmiochians has given rise to much dispute among modern scholars. K. O. Miller considers Cadmus a god of the Tyrrenian Paelagians, and maintains that the Cadmiochians are the same as the Tyrrenian Paelagians. Waller endeavours to prove that the Cadmiochians were a Tyrrhenian colony; while others assert that the old traditions are too inconsistencies to be admitted as evidence for the:...
THEBES BOEOTIAE.

There is another important event in the mythical times of Thebes, which was not interwoven with the series of the legends already related. This is the birth of Hercules at Thebes, and the important service which he rendered to the city by his war against Orchomenus. It was stated that the Thebans were compelled to pay tribute to Erginus, king of Orchomenus; but that they were delivered from the tribute by Hercules, who marched against Orchomenus, and greatly reduced its power (Paus. ix. 97. § 2; Strab. ix. p. 414; Diod. iv. 19). This legend has preserved only some historical fact, that Orchomenus was at one time the most powerful city in Boeotia, and held even Thebes in subjection.

Thebes is frequently mentioned in Homer, who speaks of its celebrated seven gates (II. iv. 406, Od. xi. 265); but its name does not occur in the catalogue of the Greek cities which fought against Troy, as it was probably supposed not to have recovered from its recent devastation by the Epigoni. Later writers, however, related that Thersander, the son of Polyneices, accompanied Agamemnon to Troy, and was slain in Mycia by Telephus, before the commencement of the siege; and that upon his death the people of Thebes, by consequence of the tender age of Tissamenus, the son of Thersander. (Paus. ix. 5. §§ 14, 15.) In the Iliad (ii. 494) Penelope is mentioned as one of the leaders of the Boeotians, but is not otherwise connected with Thebes.

According to the chronology of Thucydides, the foundation of the Thebans in Boeotia was 60 years after the Trojan War, when they were driven out of their city and country by the Boeotians, an Aeolic tribe, who migrated from Thessaly. (Thuc. i. 12; Strab. ix. p. 401.) This seems to have been the genuine tradition; but as Homer gives the name of Boeotians to the inhabitants of the country called Boeotia in later times, Thucydides endeavoured to elucidate the authority of the poet by the other tradition, by the supposition that a portion of the Aeolic Boeotians had settled in Boeotia previously, and that these were the Boeotians who sided against Troy. According to other accounts, Thebes was taken by the Thracians and Pelaegians during the Trojan War, and its inhabitants driven into exile in Phocis, from where they returned in a later period. (Strab. ix. p. 401; Diod. xix. 63.)

Pausanias gives us a list of the kings of Thebes, the successors of Tissamenus, till the kingly dignity was abolished and a republic established in its place (ix. 5. § 16). But, with the exception of one event, we know absolutely nothing of Theban history, till the disputes between Gephyrates and Plataea in the latter end of the sixth century a. c.

The event to which we allude is the legislation of Philelauus, the Corinthian, who was enanourmed of Diocles, also a Corinthian, and the victor in the Olympic games, b. c. 728. Both Philelauus and Diocles left their native city and settled at Thebes, where the former drew up a code of laws for the Thebans of which we know nothing but the name, mentioned by Aristotle. (Pol. ii. 9. §§ 6, 7.) At the time when Thebes first appears in history, we find it under an oligarchical form of government, and the head of a political confederation of some twelve or fourteen Boeotian cities. The greater cities of Boeotia were members of this confederation, and the smaller towns were attached to one or other of these cities in a state of dependence. [Boeotia, p. 415.]
the other Boeotian towns. A democratical form of government was established in the different cities, and the oligarchical leaders were driven into exile. (Thuc. i. 108; Diod. xii. 81.) This state of things lasted barely ten years; the democracy established at Thebes was ill-conducted (Arist. Pol. v. 2. § 6); and in a. 447 the various Boeotian exiles, combining their forces, made themselves masters of Thebes, and threw back the Athenian army to its own walls. 

The Athenians sent an army into Boeotia under the command of Tolmides; but this general was slain in battle, together with many of his men, while a still larger number were taken prisoners. To recover these prisoners, the Athenians agreed to relinquish their power over Thebes and the other Boeotian cities. They demolished the chief gates of the city, and removed some other places. The exiles were restored; and Thebes again became the bitter enemy of Athens. (Thuc. i. 115, ii. 63; Diod. xii. 6.) The Thebans were indeed more anti-Athenian than were the Spartans themselves, and were the first to commence the Peloponnesian War by their attempt to surprise Plataea in the night, a. 431. The results of this attempt, and of not one subsequent siege and capture of the city, belongs to the history of Plataea. [DETAILED] Throughout the Peloponnesian War the Thebans continued the active and bitter enemies of the Athenians; and upon its close after the battle of Argospolum they joined the Corinthians in urging the Lacedaemonians to dangerous Athens, and sail its population into slavery. (Xen. Hell. ii. 2. § 19.) By soon after this event drawn up in the plain of Corinna to oppose him. The right wing and centre of his army were victorious, but the Thebans completely defeated the Orchemons who formed the left wing. The victorious Thebans now faced about, in order to regain the rest of their army, which had retreated to Mount Ithome, and the conflict which ensued was one of the most terrible which had yet taken place in Greek warfare. To Thebes at length succeeded in forcing their way through, but without not great loss. This was the first time that the Thebans had fought a pitched battle with the Spartans; and the value of the victory was a great tribute to the victories which were soon to overthrow the Spartan supremacy in Greece. (Xen. Hell. iv. 3. §§ 15—21.)

We have dwelt upon these events somewhat at length in order to explain the rise of the Theban power; but the subsequent history must be read more briefly. After the battle of Corinna, a series of events appeared at first to deprive Thebes of the ascendency she had lately acquired. The pact of Antalcidas (a. 387), which was concluded under the influence of Sparta, guaranteed the independence of all the Greek cities; and though the Thebans first claimed to take the oath, not in their own behalf alone, but for the Boeotian confederacy as a whole, the Thebans were left to swear to the treaty for their own city alone, and otherwise they would have had to content themselves with the whole power of Sparta and her allies. (Xen. Hell. v. 1. §§ 32, 33.) By this act the Thebans virtually renounced their supremacy over the Boeotian cities; and Argos at length raised a body of troops to invade the Boeotian territory. For the purpose of strengthening Thebes. Not only was the independence of the Boeotian cities proclaimed, and a legal dignity organized in each city hostile to Thebes and favorable to Sparta, but Lacedaemonian garrisons were
stationed in Orchomenus and Thespiae for the purpose of overawing Boeotia, and the city of Plataea was rebuilt to serve as an outpost of the Spartan power. (Paus. i. 1. § 4.) A more direct blow was aimed at the independence of Thebes in n. c. 383 by the seizure of the Cadmeia, the citadel of the city, by the Spartan commander, Phoebidas, assisted by Leucidas and a party in Thebes favourable to Sparta. Though Phoebidas appears to have acted under secret orders from the Ephors (Diod. xiv. 20; Plut. Agesil. 24), such was the indignation excited throughout Greece by this treacherous act in time of peace, that the Ephors found it necessary to disavow Phoebidas and to remove him from his command; but they took care to reap the fruits of his crime. (Xen. Hell. v. 2. § 25.) Many of the leading citizens at Thebes took refuge at Athens, and were received with the same kindness which the Athenian exiles experienced at Thebes after the close of the Peloponnesian War. Thebes remained in the hands of the Spartan party for three years; but in n. c. 379 the Athenian fleet took the city, and the Cadmeia, and the party of Leucidas overthrown by Pelopidas and the other exiles. The history of these events is too well known to be repeated here.

In the following year (n. c. 378) Thebes formed an alliance with Athens, and with the assistance of this state resisted with success the attempts of the Laconian state to wrest them from the control of Athens, and to increase the power of the Thebans, and their destruction of the city of Plataea (Platae) provoked the jealousy of the Athenians, and finally induced them to conclude a treaty of peace with Sparta, n. c. 371. This treaty, usually called the peace of Callias from the name of the leading Athenian negotiator, included all the parties in the league war, with the exception of the Thebans, who were thus left to contend single-handed with the might of Sparta. It was universally believed that Thebes was doomed to destruction; but only twenty days after the signing of the treaty all Greece was astounded at the news that a Lacedaemonian army had been utterly defeated, and their king Cleombrotus slain, by a body of Epaminondas, upon the fatal field of Leuctra (n. c. 371). This battle not only destroyed the prestige of Sparta and gave Thebes the ascendency of Greece, but it stripped Sparta of her Peloponnesian allies, over whom she had exercised dominion for centuries, and led to the establishment of two new political powers in the Peloponnesus, which threatened her own independence. These were the Arcadian confederation and the restoration of the state of Messenia, both the work of Epaminondas, who conducted four expeditions into Peloponnesus, and directed the councils of Thebes for the next 10 years. It was to the abilities and genius of this extraordinary man that Thebes owed her position at the head of the Greek states; and upon his death, at the battle of Mantinea (n. c. 362), she lost the pre-eminence she had enjoyed since the battle of Leuctra. During their supremacy in Greece, the Thebans were of course undisputed masters of Boeotia, and they availed themselves of their power to wreak their vengeance upon Orchomenus and Thespiae, the two towns which had been very severe to them in their authority, the one in the north and the other in the south of Boeotia. The Orchomenians had in n. c. 395 openly joined the Spartans and fought on their side; and the Thespians had withdrawn from the Theban army just before the battle of Leuctra, when Epaminondas gave permission to any Boeotians to retire who were averse to the Theban cause. (Paus. ix. 13. § 8.) The Thebans were expelled from their city and Boeotia soon after the battle of Leuctra [Thespiae]; and Orchomenus in n. c. 365 was burnt to the ground by the Thebans; the male inhabitants were put to the sword, and all the women and children sold into slavery. (Oros. i. 30. 7.)

The jealousy which Athens had felt towards Thebes before the peace of Callias had been greatly increased by her subsequent victories; and the two states appear henceforward in their old condition of hostility till they were persuaded by Demosthenes to unite their efforts against Philip, the conqueror of Macedon. After the battle of Mantinea their first open war was for the possession of Euboea. After the battle of Leuctra this island had passed under the supremacy of Thebes; but, in n. c. 358, discontent having arisen against Thebes in several of the cities of Euboea, the Thebans sent a powerful force into the island. The Euboeans, however, appealed to Philip for aid to Athens, which was readily granted, and the Thebans were expelled from Euboea. (Diod. xvi. 7; Dem. de Cherson. p. 108, de Cor. p. 259, c. teerp. p. 397.) Shortly afterwards the Thebans commenced the war against the Phocians, usually known as the Sacred War, and in which almost all the leading states of Greece, except Athens, were involved. Both Athens and Sparta supported the Phocians, as a counterpoise to Thebes, though they did not render them much effectual assistance. This war terminated, as is well known, by the intervention of Philip, who destroyed the Phocian towns, and restored to Boeotia Orchomenus and the other towns which the Phocians had taken away from them, n. c. 346. The Thebans were still the masters of Phoci when Philip then demanded their adherence to Macedon. Both Athens and Sparta supported the Phocians, as a counterpoise to Thebes, though they did not render them much effectual assistance. This war terminated, as is well known, by the intervention of Philip, who destroyed the Phocian towns, and restored to Boeotia Orchomenus and the other towns which the Phocians had taken away from them, n. c. 346. The Thebans were still the masters of Phoci when Philip then demanded their adherence to Macedon. Both Athens and Sparta supported the Phocians, as a counterpoise to Thebes, though they did not render them much effectual assistance. This war terminated, as is well known, by the intervention of Philip, who destroyed the Phocian towns, and restored to Boeotia Orchomenus and the other towns which the Phocians had taken away from them, n. c. 346. The Thebans were still the masters of Phoci when Philip then demanded their adherence to Macedon.

The old feeling of ill-will between Thebes and Athens still continued: Philip calculated upon the good wishes, if not the active co-operation, of the Thebans against their old enemies, and probably thought they would never dare to resist his demands. The Thebans were divided into two states as within the range of probability. This union, however, was brought about by the eloquence of Demosthenes, who was sent as ambassador to Thebes, and who persuaded the Thebans to form an alliance with the Athenians for the purpose of resisting the ambitious schemes of Philip. In the following year (n. c. 335) Philip defeated the combined forces of Thebes and Athens at the battle of Chaeronea, which crushed the liberties of Greece, and made it in reality a province of the Macedonian monarchy. On this fatal field the Thebans maintained the reputation they had won in their battles with the Spartans; and their Sacred Band was cut to pieces in their ranks. The battle was followed by the surrender of Thebes, which Philip treated with great severity. Many of the leading citizens were either banished or put to death; a Macedonian garrison was stationed in the Cadmeia; and the government of the city was placed in the hands of 500 citizens, the partisans of Philip. The Thebans were also deprived of their sovereignty over the Boeotian towns, and Orchomenus, Plataea, and Boeotia were reduced to the authority of Athens, and again filled with a population hostile to Thebes. (Diod. xvi. 87; Justin. ix. 4; Paus. iv. 27. § 10, ix. 1. § 8.) In the year after Philip's death (n. c. 335) the Theban exiles got possession of the city,
besieged the Macedonian garrison in the Cedrene, and invited the other Greek states to declare their independence. But the rapidity of Alexander's movements disconcerted all their plans. He appeared at Orchomenus in Boeotia, before any intelligence had arrived of his quitting the north. He was willing to give the Greeks an opportunity for negotiation; but as his proposals of peace were rejected, he directed a general assault upon the city.

The Thessalian troops outside the gates were driven back, and the Macedonians entered the town along with them. A dreadful carnage ensued; 8000 Thessalians are said to have been slain, and 20,000 to have been taken prisoners. The town of the conquered city was referred to the Macedonian allies in his army, Orchomenus, Plataea, Phocis, and other inveterate enemies of Thebes. Their decision must have been known beforehand. They declared that Thebes should be razed to the ground, with the exception of the Cedrene, which was to be held by a Macedonian garrison; that the territory of Thebes should be divided among the allies; and that all the inhabitants, men, women, and children, should be sold as slaves. This sentence was carried into execution by Alexander, who levelled the city to the ground, with the exception of the house of Pindar (Arr. Am. I., 8, 9; Diod. xvi. 14—15; Justin. xii. 4.) Thebes was then burned out of the territory of Thebes, without inhabitants, for the next 20 years. In a.c. 315, Cassander undertook the restoration of the city. He united the Thessalian allies and their descendants from all parts of Greece, and was successfully assisted by the Athenians and other Greek states in the work of restoration. The new city occupied the same area as the old; it was garrisoned by a garrison of Cassander. (Diod. xix. 52—54, 76; Paus. ix. 7, § 4.) Thebes was twice taken by Demetrius, first in a.c. 302, and a second time in 296, but on each occasion he added his victory with moderation. (Plut. Demetr. 39, 40: Diod. xvi. 461, ed. West.)

Dicaearchus, who visited it not long after its restoration, has given a very interesting account of the city. "Thebes," he says (§ 12, seq. ed. Wihr), "is situated in the centre of Boeotia, and is about 70 stadia in circumference; its site is level, its shape circular, and its appearance gloomy. The city is ancient, but it has been lately rebuilt, having been three times destroyed, as history relates; on account of the numberless and haughtiness of its inhabitants. It is well adapted for ruling hostiles since it is plentifully provided with water, and abounds in green pastures and hills; it contains also better gardens than any other city in Greece. Two rivers flow through the town, and irrigate all the adjacent plain. There is also a subterraneous stream issuing from the Cedrene, through pipes, and to be the very life of the town. Thebes is a most favorable residence in the summer, in consequence of the abundance and coolness of the water, its large gardens, its agreeable breezes, its verdant appearance, and the quantity of summer and autumnal fruits. In the winter, however, it is a most disagreeable residence, from being destitute of fuel, and constantly exposed to floods and winds. It is then often covered with snow and very unhealthy." Although Dicaearchus probably means the capture of the city by the Egyptians, secondly by the Pelopids, during the Trojan war, and lastly by Alexander.

In this passage given to Thebes a succession of 70 stadia, or assigning in his verses (θεῖος θέσας) a much smaller extent to it, namely 3 mil. The latter number in the more probable a metre was less likely to be altered; but it is not, in prose is correct, it probably means 0 exterior. This gives a garrison city, which also gives an account of the character of the Thessalians, which is too long to be extant. It presents them as mobile-minded and anxious to be present and proud, and always ready to seize any dispute by fighting rather than through any course of justice. Thebes led its full share in the losses of Greece. After the fall of Corinth, a.c. 167, Greece is said to have destroyed Thebes (Liv. Epit. 8, 49), which we are probably to understand in terms of the city. In consequence of its losing at the Battle of Methone in the war against the Romans, it deprived of half its territory, which is in the eyes of the gods, in order to make compensation, among the Illyrians, Thracians, and Dacians. Although the Romans always recovered the land to the Thessalians, they never recovered from this blow (Paus. vii. 6, § 11, 6). But it was still reduced in the times of Augustus and Tiberius to a very small state (I. 1. 300). In the time of Augustus, the Thessalians united the Macedonian and the Thessalian, and the lower part of the country, with the exception of the temple of Zeus (ix. 7, § 6). In the times of the Roman Empire, Thebes became the seat of a considerable population, probably in comparison with its inebriated situation, which suffered in missions from greater security than the Macedonian town from which it continued to be established even at a later period, as were worn by the emperors of Constantiug. Thebes, p. 97, ed. Paris., p. 60, ed. Lasc. It was however, gradually suppressed by the emperors of Sicily and Italy; and the loss of the silk trade was followed by the rapid decline of Thebes. Dicaearchus says that the city was again reduced, as it was of Pannonia, to the site of the Cedrene.

II. Topography.

Thebes stood on one of the hills of Boeotia in Messene, which divides southern Messene into distinct parts, the northern being the plain of Messene and the southern the valley of the Aega. The two sides of the Messenian Gulf were inhabited by the Greeks, in founding a city, took care to select a site where there was an abundant supply of water, and a hill naturally defensible, which might be easily converted into an acropolis. They generally placed the acropolis on a position which would command the adjacent plain, and which was neither immediately upon the sea or...
have disappeared; but nowhere has this taken place more completely than at Thebes. Not a single trace of an ancient building remains; and with the exception of a few scattered remains of architecture and sculpture, and some fragments of the ancient walls, there is nothing but the site to indicate where the ancient city stood. In the absence of all ancient monuments, there must necessarily be great uncertainty; and the three writers who have investigated the subject upon the spot, differ so widely, that Leake places the ancient city to the south of the Cadmeia, and Ulrichs to the north of it, while Forchhammer supposes both the western heights between the Strophius and the Dirce to have been in a certain sense the Cadmeia, and the lower city to have stood eastward, between the Strophius and the Imsenus. In the great difficulty of arriving at an independent judgment upon the subject without a personal inspection of the site, we have adopted the hypothesis of Forchhammer, which seems consistent with the statements of the ancient writers.

The most interesting point in Theban topography is the position of the seven celebrated Theban gates. They are alluded to by Theocritus in Lib. xiii. 407, by Horace in Epist. ii. 1. 104; λοχ. Od. xiii. 263 and Hesiod (πεπλάκης τοίδας, Op. 161); and their names are given by seven different authors, whose statements will be more easily compared by consulting the following table. The numeral represents the order in which the gates are mentioned by each writer. The first line gives the names of the gates, the second the names of the demi-gods or other divinities associated with them, and the third the emblems upon their shields, and the fourth the names of the Theban chiefs.

Nomus designates five of the gates by the names of the gods and the planets, and to the other two, to which he gives the names of Electras and Onocoes, he also adds their position. Hyginus calls the gates by the names of the daughters of Amphion; and that of Ogygia alone agrees with that of the other writers. But, dismissing the statements of Nomus and Hyginus, whose authority is of no value upon such a question, we find that the remaining five writers agree as to the names of all the seven gates, with two or three exceptions, which will be pointed out presently. The position of the gates of the city is quite clear from the directions given by these writers. These are the Electra, Proctides, and Naus.

Pausanias says that Electra is the gate by which a traveller from Platea enters Thebes (ix. 8. § 6); that there is a hill, on the right hand of the gate, sacred to Apollo, called the Iamian, since the river Imsenus runs in this direction (ix. 10. § 2); and that on the left hand of the gate any fugitives, who was said that Amphitryon lived, which is followed by an account of other ancient monuments on the Cadmeia (ix. 11. § 1). Hence it is evident that the gate Electra was in the south of the city, between the hills Iamian and Cadmeia. The gate Proctides was on the north-eastern side of the city, since it led to Clais (ix. 18. § 1). The gate Naus was on the north-western side of the city, since it led to Onchestus and Delphi; and the river which Pausanias crossed, could have been no other than the Dirce (ix. 25. §§ 1, 3, ix. 26. § 5). The names of these three gates are the same in all the five writers: the manuscripts of Apollodorus have the corrupt word 'Ocyxther, which was altered by the editors into 'Oxyxther, instead of Naus, which was the reading suggested by Porson (ad Enip. Phoen. 1150), and adopted by Valckenaer. (See Unger, Thebana Paradoxos, vol. i. p. 313.)
Of the other four gates, the Homokloides is also the same in all the five writers. Of the remaining three Aeschylus does not mention their proper names, but specifies two by their locality, one as near the temple of Athena Onca, and the other as the Northern gate ("Σταύρια νότια"), and describes the last simply as the Seventh gate. The names of these three gates are nearly the same in the other four writers, the one near the temple of Athena Onca being called Cronææ, and in Statius Culmina Dircaea, the Northern gate Ogygia, and the Seventh gate Hypsias.—Euripides, however, also giving the name of Seventh to the last-mentioned gate.

Having described the position of the Electrae, Prostides, and Neitae, it remains to speak of the position of the other four, which we shall take in the order of Aeschylus. The fourth gate was probably situated on the western side of the city, and was called Cronææ, because it was near one of the fountains of Diros, now called Paphragy, situated upon the right bank of the river. Near that fountain was a hill, called by the Greeks "Σταύριον," whence Athena derived the name of Onca. Accordingly Statius, in calling the fourth gate Culmina Dircaea, connects both the fountain and the hill. Nonnus, who calls this gate Ozaææ, describes it as being the same time as situated towards the west. It is usually stated, on the authority of Hesychius, that the Oncaean gate is the same as the Ogygian; but this identification throws everything into confusion, while the change of three letters, proposed by Forchhammer, brings the statement of Hesychius into accordance with the other writers. ("Ουγγιανος καθώς Σταύρια [instead of "Ογγιανος"] καθώς λεγε, i.e. Aesch. Sept. c. Thes. 426.)

The fifth gate was called Ogygian from Ogygia, the most ancient king of Thebes, in whose time the deluge is said to have taken place. Now there is so part of Thebes more exposed to inundation than the north of the city between the gates Neitae and Prostides, where the torrent Strophius descends into the plain. Here we may probably place the Ogygian gate, which Aeschylus calls the Northern, from its position.

The exact position of the sixth gate, called Homokloides, and of the seventh, designated by its number in Aeschylus and Euripides, but by the name of Hypsias in the other writers, is doubtful. Forchhammer maintains that these gates were in the southern part of the city, one on either side of the gate Electrae; but none of his arguments are conclusive; and the position of these gates must be left uncertain. Pausanias relates that, after the victory of the Epigoni at Glissa, some of the Thebans tied to Homole in Thessaly; and that the gate, through which the exiles re-entered the city, when they were treated by Thersander, was named the Homokloides, from Homole in Thessaly (ix. 8. §§ 6. 7). Forchhammer thinks that it would have been supposed that the exiles entered the city by the same gate by which they quitted it; and as the gate leading to Glissa must have been either in the southern or
eastern side of the city, the gate Homoloides must have been on the southern side, as the Prostrides lay towards the east. But this is mere conjecture; and Leake supposes, with quite as much probability, that the Homoloides was on the north-western side of the city, since the Thebans would re-enter the city in that direction on their return from Homola.

The divisions of the city, and its monuments, of which Pausanias has given a full description, must be treated more briefly. The city, as already remarked, was divided into two parts by the torrent Strophia, of which the western half between the Strophia and the Dirce was the Cadmeia, while the eastern half between the Strophia and the Ismenus

---

**PLAN OF THEBES FROM FORCHHAMMER.**

1. Temple of the Isemian Apollo.
2. Mella, the fountain of the Isemus.
3. Athena Onca.
5. Theatre and Temple of Dionysus.
7. Fountain of St. Theodore.
8. Syrna Antigonea.

AA. Road to Platea.
BB. Road to Leuctra.
CC. Road to Tanagra.
DD. Road to Chalcis.
EE. Road to Acrocorinnum.
FF. Road to Thebes.

**VOL. II.**
was the lower city (ἡ ἄνω τοῖς), said to have been added by Amphion and Zethus. (Paus. ix. 5. §§ 2, 6.) The Cadmeia is again divided by a slight depression near the fountain of Diros and the Kre- meia (κρημεία).† Two hills, of which the largest (στύλος) was the higher one to the south was the acropolis proper, and was called the Cadmeia στύλος ἀκρόπολις, while the northern hill formed the agora of the acropolis (τὸ ἐρείττερα ἁγοράς, Paus. ix. 12. § 3). The eastern half of the city was also divided between the Strphion and the Ilema in two parts, of which the latter consisted of the hill Ilemaion, and the northern of several minor eminences, known under the general name of Amphiion. (Ἀμφιείων, Αριάν, Ἀσσαλάκ i. 8.) Aeschylus describes the tomb of Amphiion as standing near the northern gate. (Ἀποδικίας, ἀσσαλάκος τίμαιος κατ' ἄγνοιαν Ἀμφιείων, Sept. c. Theb. 558.) Hence Thebes consisted of four parts, two belonging to the acropolis, and two of the agora, the acropolis proper and the agora of the acropolis, and the latter being the hill Ilemaion and the Amphiion.

Pausanias, leaving Potniai, entered Thebes on the south by the gate Ele Feara, before which he noticed the Poityardium, or tomb of the Thebans who fell fighting against Alexander. (Paus. ix. § 5, 4, 7. ix. 12. § 3.) The gate of Ele Feara or of the porch Amphiion that Alexander laid siege to the city on the south, and that he did not return from the gate Ele Feara to the Prostides, as Leake supposes, seems the most probable. Accordingly the double lines of circum- vallation, which the Thebans erected against the Macedonian garrison in the Cadmeia, must have been against the south of the city around the chief gates of the Cadmeia. (See Arrian, i. 7, 8.) Upon enter- ing the city through the gate Ele Feara, Pausanias notices the hill Ilemaion sacred to Apollo, named from the river Ilema flowing by it (ix. 10. § 2). Upon the hill was a temple of Apollo, containing several monuments enumerated by Pausanias. This temple is likewise mentioned by Pindar and Herodotus, both of whom speak of the tripod situate in its treasury. (Pind. Pyth. xi. 7, seq.; Herod. v. 59.) Above the Ilemaion, Pausanias noticed the fountain of the Ilemaion, sacred to Ares, and guarded by a dragon, the name of which fountain was Melia, as we have already seen (ix. 10. § 5).

Next Pausanias, beginning again from the gate Ele Feara, turns to the left and enters the Cadmeia (ix. 11. § 1, seq.). He does not mention the acropolis by name, but it is evident from the list of the monuments which he gives that he was in the Cad- meia. He enumerates the house of Amphitheus, containing the bedchamber of Alcmena, said to have been the work of Tropiaius and Aegamedes; a mo- nument of the children of Hercules by Megara; the stone called Sophronist; the temple of Hercules (Ἡρακλειόν, Arrian, Ἀσσαλάκ i. 8); and, near it, a gymnasion and stadium, both bearing the name of this God; and above the Sophronist an altar of Apollo Spodiums.

Pausanias next came to the depression between the acropolis and the agora of the Cadmeia, where he noted an altar and statue of Athena, bearing the Phocianic surname of Oiga (Ὀύγα), or Oiga (Ὀύγα) according to other authorities, and said to have been dedicated by Cadmus (ix. 12. § 2). We know from Aeschylus that there was originally a temple of Athena Oiga in this locality, which stood outside the city near one of the gates, whence the goddess was called Ἀθηνῆς ἐκαστική. Some derived the name from a village named Onc or Ocaea. (Aesch. Sept. c. Theb. 163, 487, 501, with Schol.; Schol. in Eust. Pheic. 1069; Steph. B. s. v. Οὐγαίας; Hesych. s. v. Ὀγαίας; Schol. ad Pind. Ol. ii. 38, 40, 42; Theogn. 102; Stephan. B. s. v. Οὐγαίας.) Sophocles also speaks of two temples at Athena at Thebes (ὑπὸ Παλαθίδος Ὀγαίας πέντε, Od. Tvr. 20), in one of which, according to the Scholastes, she was surnamed Ocaea, and in the other Ilmeina. In the valley between the two hills, there are still the ruins of an aqueduct, partly on the old, partly on the present course, which Dinsmore refers (φόντος τόπου μέταλληκτον Καυτής ἔρειν δυνάμεις ὁμολογοῦμεν, L. c.)

In the agora of the Cadmeia the house of Cadmus is said to have stood; and in this place were shown ruins of the bedchamber of Harmonia and Semele; statues of Dionysus, of Pronomus, the celebrant musician, and of Epaminondas; a temple of Ammon; a temple of Athena, in the place where Teiresias observed the flight of birds; a temple of Fortune; three wooden statues of Aphrodite, with the surnames of Urania, Pas- mum, and Apsinthia; and a temple of Demeter Thesmophoria. (Paus. xii. §§ 3—5, ix. 16. §§ 1—5.)

Crosing the torrent Strphion, Pausanias saw the upland called Prostides the theatre with the temple of Dionysia (ix. 16. § 6). In this part of the city, to which Forchhammer gives the name of Amphiass, the following monuments are mentioned by Paus- nias (ix. 16. § 7, ix. 17. §§ 1—4): ruins of the house of Lycur and a monument of Semele; monu- ments of the children of Amphion; a temple of Ar- témis; a temple of Ascleps; the Apollonidae and of Hermes Aëraus; the tetrastyle pædustera of the children of Amphion, distant half a stadium from their tombs; two statues of Athena Zoeiter; and the monument of Zethus and Echion, being a mound of earth. As the lower city was deserted in the time of Pausanias, he does not mention the agora; but there is no doubt that it contained sea, if the place where Sophocles speaks of several agoras (Oed. Tvr. 20).

Outside the gate Prostides, on the road to Chalicus, Pausanias names the monuments of Melanippe, Tydeus, and the sons of Oedipus, and 15 stadia beyond the latter the monument of Teiresias. Paus- nias also mentions a tomb of Hector and one of Ascle- pies, at the fountain of Oedipus, which perhaps is the modern fountain of St. Theodore. On the same road was the village Teumessus. (Paus. ix. 18, ix. 19. § 1.) After describing the road to Chalcis, Pausanias returns to the gate Prostides, outside which, towards the N., was the gymnasium of Iolaca, a stadium, the hisourion of Iolaca, and, beyond the stadium, the hippodrome, containing the temple of Pindar (ix. 23. §§ 1, 2). Pausanias then comes to the road leading from the Ogryas or Northern gate, to Acraequinthium, after following which he re- turns to the city, and enumerates the objects outside the gate Neaera. Here, between the gate and the river Dirce, were the temple of Menoneus, the son of Oedipus, and a monument marking the spot where the two sons of Oedipus slew each other. The whole of this locality was called the Sýrina (Σύρινα) of Antigone, because, being unable to carry the dead body of her brother Polynices, she dragged it to the funeral pile of Eteocles. On the opposite side of the Dirce were the ruins of the house of Pindar, and a temple of Dindymus (ix. 23. §§ 1—3). Pausanias then appears to have returned to the gate Neaera and
right of which was the Teneric plain, and to the
left a road which at the end of 50 stadia conducted
to Thebes (ib. 25. § 5, ii. 26. §§ 1, 6). Thebes,
under the name of atomic of Thessaly in

THEBAE CORISCIAE. [Cornelia, No. 2.]

THEBAS PHITHOIDES = PHITIAE (σήμα
αι Θηδρίδες, Polyb. v. 99; Strab. i. p. 423;
Thebais, Liv. xxxii. 39), an important town
of Phthiotis in Thessaly, was situated in the
northeastern corner of this district, near the sea,
and at the distance of 300 stadia from Larissa.
(Polyb. l. c.) It is not mentioned in the Illyric,
but it was at a later time the most important
maritime city in Thessaly, till the foundation of
Demetrias, by Demetrias Poliorcetes, about a. c. 290. ("Thebes Phthias
unum maritimum emporium fuisset quandoe Thebas
quasi portus est fugitum," Liv. xxxix. 25.) It
is first mentioned in a. c. 289, as the only Thessalian
city, except Pelinnaeum, that did not take part
in the Lamic war. (Diod. xviii. 11.) In the
war between Athens and Corinth, 435-432 B.C.,
c. 302, Thebes was one of the strongholds of
Cassander. (Diod. xx. 110.) It became at a later time
the chief possession of the Aetolians in northern Greece;
but it was wrested from them, after an obstinate
siege, by Philip, the son of Demetrias, who changed
its name into Philippopolis. (Polyb. v. 99, 100;
Diod. xxvi. p. 513, ed. Wesseling.) It was attacked
by the consuls Flaminius, previous to the battle of
Cynoscephalae, a. c. 197, but without success. (Liv.
xxxiii. 5; Polyb. xvii. 2.) After the defeat of Phi-
lip, the name of Philippopolis was gradually dropped,
though both names are used by Livy in narrating
the transactions of the year a. c. 185. (Liv. xxxix.
26.) It continued to exist under the name of
Thebes in the time of the Roman Empire, and
is mentioned by Hierocles in the sixth century.
("Thebes Thessalae," Plin. v. 8. a. 15; Ἡθορές
τῆς Θηθρίδος, Ptol. iii. 13. § 17; Steph. b. s. v.; Hieroc.
p. 642, ad. Wes.) The ruins of Thebes are situated
upon a height half a mile to the north-east of
Akarnoi. The entire circuit of the walls and towers,
both of the town and citadel, still exist; and the
circumference is between 2 and 3 miles. The
theatre, of which only a small part of the exterior
circular wall of the cavea remains, stood about the
centre of the city, looking towards the sea. (Leake,
Northern Greece, iv. p. 356.)

THEBAI. [Thebai Aizyrtou.]

THEBE (Θῆβαι), a famous ancient town in Mycia,
at the southern foot of Mount Phleius, which is often
mentioned by Homer as governed by Eteocles,
the father of Andromache (Ili. i. 366, vi. 397, xxii. 479);-
The town is said to have been destroyed during the
Trojan War by Achilles (l. ii. 691; Strab. xiii. pp. 854, 865, 612, fol.)
but it has been re-occupied after its first destruction, but it was decayed in the
time of Strabo, and when Pliny (v. 32) wrote it
had entirely disappeared. The belief of some of the
ancient grammarians (Eutym. M. a. e.; Didym. ad
Hom. II. § 388; Dic. ad Hesiod. Syst. 49; and
Eustath. ad Hom. II. ii. 691) that Thebes was only
another name for Acrisium, is, however, the most
express testimony of the best writers. Xenophon (Anab. vii. 8 § 7) places it between
Antandrus and Atramytium, and Strabo, perhaps
more correctly, between Atramytium and Caria,
about 80 stadia to the north-east of the former.
(Comp. Pomp. Mela, i. 18; Steph. b. a. v.)
Although this town was greatly celebrated at an early period, its name
remained celebrated throughout antiquity, being at-
tached to the neighbouring plain (Θῆβαι πελλον, Campus Thebanus), which was famed for its
fertility, and was often ravaged and plundered by
the different armies, whom the events of war brought
into this part of Asia. (Herod. vii. 42; Xenoph.
A. c. i.; Strab., i. 852, fol.)

THEBANUM (Θῆβανον), a town in Arcadia,
adjacent to the territory of Miletus in Asia
Minor. (L. S.)

THECHES (Θηχες), one of the highest points of
Mount Paraydre in Pontus, south-east of Tappara,
the borders of the country inhabited by the
Macrees. From it the Ten Thousand Greeks under
Xenophon for the first time described the
Euxina. (Xenoph. Anab. iv. 7. § 31.) Diodorus
Siculus (xiv. 29) calls the mountain Χέθων ἄρος;
but it still bears its ancient name Tekhich. (Bitter,
Erdbunde, ii. p. 768.)

THECOD. [Τεκοδαίος.]

THEGANA. [Themistia, p. 349, b.]

THEGAUNA (Θηγαύνα, Θηθγαύνα). A town of
Arcadia, in the district Cynuria or Parnassus,
the northern slope of Mt. Lycaeus, called after the
nymph Theia, one of the nurses of Zeus. Its
inhabitants were removed to Megalopolis upon
the foundation of the latter city. Leake places it at
the castle of St. Ieves above Locathia. Ross discovered
some ancient remains N. of Andrii, which he
contacts may be those of Theogn. (Paus. viii. 38. §§ 3, 9, vii. 27. § 4; Steph. B. a. e.; Leake,
Morae, vol. ii. p. 315, Peloposmecean, p. 154; Ross,
Reisen im Peloponnes, vol. i. p. 101; Bollay,
Recherche, p. 151.)

2. A town of Arcadia, in the territory of Orchos-
menos, the inhabitants of which also removed to
Megalopolis. It is mentioned along with My-
drium and Teuthis as belonging to the confederation
(συντολία) of Orchemonos. It is probably rep-
resented by the ruins near Dimikon. (Paus. viii.
27. §§ 4, 7, vii. 28. § 3; Ross, p. 115.)

THEIUM, a town of Athamania in Epeirus, of
uncertain site. (Liv. xxviii. ii.)

THEL. [Thelare.] THELPHUSA (Θηλφούσα, Paus. and Coins; Thell-
foous, Polyb., Diod., and Steph. B. a. e. Eith. Θελ-
νούσα, Θελφούσα), a town in the west of Arcadia,
was the lower city (§§ 3, 6), said to have been added by Amphion and Zethus. (Paus. ix. 5.
§§ 3, 6.) The Cadmeia is again divided by a slight depression near the fountain of Dirce and the Cre- 
ansean gate into two hills, of which the larger and the higher one to the south was the acropolis proper, and was called the Cadmeia or Kadmeion, while the northern hill formed the agora of the acropolis (τοὺς ἀρχοντέας ἀνατέας, Paus. ix. 12.
§ 3). The eastern half of the city was also divided
between the Strophius and the Lamosus into two parts of 
which the southern consisted of the hill Lamosus 
and the northern of several minor eminences, by
under the general name of Amphipolis. (Agg.
§ 8.) Amphipolis describes it 
of Amphion as standing near the north
(Bοορικός ρωμίων τῶν εἰκών αὐτοῦ. 
 Ampho. Sect. 1. Theo. 538.) Haro-
sisted of four parts, two belonging to
and two to the lower city, the former
acropolis proper and the agora of it,
the latter being the hill Lamosus. 
Panaxias, leaving Potidaea, came
south by the gate Electria, before the 
Polidromion, or tomb of the 
fighting against Alexander. (Paus.
ix. 10. § 1.) The explanation
Alexander laid siege to the
that he did not return the
the Precidio, as Leake
is probable. Accordingly

IOHNEAE (Γεγονός, Πεύκα Χορος
of Asiatic Sarmatia.

THEMA. [Στεμάχη].

THEMISIGRA (Ὑπολοπονήματα) a
north of Pontus, about the mouth
Thermodon, was a rich soil ever verdant, and supplying food for
oxen and horses. It also produced
ance of grain, especially wheat and
the southern parts near the mountain
variety of fruits, such as grapes, apples
nuts in such quantities that they
waste on the trees. (Strab. ii. p. 264. 
ffe; Aschyl. Prom. 722; 
Apolon. Rhod. ii. 370; Pline.
Mythology describes this plain as the
of the Amazons.

A Greek town of the name of Themis was
little distance from the coast and near the
Thermodon, is mentioned by Strabo
Thermodon, from which Scylax, p. 30, 
§ 1). Ptolemy (v. 6. § 3) is uncertain
in placing it further west, midway between 
and Cape Herculeum. Scylax calls, Scelis 
but Diodorus (ii. 44) states that it was
the founder of the kingdom of the Amazons. 
the retreat of Mithridates from Gaza, 
was besieged by Lycias. The inhabitants of the
occasion defended themselves with great
ease, when their walls were undermined, they were
and other wild beasts, and even 
against the workmen of the 
Lydia (Liv. 10. 78).
But notwithstanding their stout defence
town seems to have perished, as Sallust
Melanippia, of it is no longer existing (11. 14.
Strabo does not mention it at all.
without suppose that the town of Thermodon, at
the Thermodon, marks the site of ancient Theimisigra
but Hamilton (Researches, i. p. 333) does
that it must have been situated a little
land. Ruins of the place do not appear to exist;
those which Tezier regards as forming the
Themisigra, at a distance of two
Halya, on the borders of Geta,

remains of Tavium.

The Thera city (Trav. ii. p. 154, sq.; cf. p. 150 and 151) is the more general, and perhaps better name, that it stood, near its namesake, the Thera city on the coast of the E. of the source of the Himara (xxvii. 4. § 12) men-

tioned as one of the two chief

14 (Geoskepastos). Procop.

y in Armenia Major, founded by

Theodosiopolis, in Mysia. [Perzerga.]

Theodosiopolis in Mysia. [Perzerga.]

Theon Ochema. [Lida, p. 179, b.]

Theophanesius (Geoskepastos, Ptolemy v. 9. § 3), a

river of Asaitic Sarmatia, which fell into the

Hellespont, between the greater and lesser Rhombites.

(Cf. Amm. Marc. xxii. 8. § 29.)

Theophrastus. This place in Gallia, with a

pure Greek name, was near Sisteron, in the
department of Basse-Alpes, on the left bank of the Drun-
tia (Durance). An inscription cut on the side of a

rock in honour of Duraian, which was

protected by the Prefect of Gallia in the time of Honorius, and

in honour of his mother, informs us that they made a

road for this town by cutting both sides of the

mountains, and they gave it walls and gates. The

place is still called Thobrez, and there are said to be

remains there. (D'Anville, Notice, &c.) [G. L.]

Thera. (Geoskepastos, a Greek Geographer: Senetorion), an island in the Aegean sea, and

the chief of the Spondes, is described by Strabo as 200

stadia in circumference, opposite the Cretan island of Dia, and 700 stadia from Crete itself. (Strab. x. p. 484.) Pliny places Thera 25 Roman miles S. of Ios (iv. 12. a. 23). Thera is said to have been formed by a cleft of earth thrown from the ship

Argo, to have received the name of Callisto, when it first emerged from the sea, and to have been first inhabited by the Phoenicians, who were left there by Cadmus. Eight generations afterwards it was colonised by Lacedaemonians and Minyans under the guidance of the Spartan Therses, the son of Autesion, who gave his name to the island. (Herod. iv. 147, seq.; Pind. Pyth. iv. 101; Callim. Theb. iv. 347, x. p. 484; Apoll. Rhod. iv. 1762; Pana. i. 1. § 7, i. 15. § 6, vii. 2. § 2.) Its only

important in history is owing to its being the mother-

city of Cyrene in Africa, which was founded by

Battus of Thera in B.C. 631. (Herod. iv. 155, seq.) At this time Thera contained seven districts

4 K 9
situated upon the left or eastern bank of the river Laden. Its territory was bounded on the north by that of Peoplia, on the south by that of Hexas, on the west by the Eleisa and Tissias, and on the east by that of Cletor, Tripolis, and Theba. The town is said to have derived its name from a nymph, daughter of the river Laden, which nymph was probably the stream flowing through the lower part of the town of Laden. It is first mentioned in history in n. c. 353, when the Lacedaemonians were defeated in its neighbourhood by the Spartans. (Diod. xvi. 39.) In n. c. 223 it was taken by Antigonus Doson, in the war against Cleomenes, and it is also mentioned in the campaigns of Philip. (Polyb. II. 73; 40; Plin. iv. 5. 30.) Its coins show that it belonged to the Achaean League. (Leake, Peloponnesiacs, p. 306.) When Panasianis visited Thelpusa, the city was nearly deserted, so that the agora, which was formerly in the centre of the city, then stood at its extremity. He saw a temple of Asclepius, and ascolophus, the twelve gods, of which the latter was nearly levelled with the ground. (Paus. viii. 25 § 3.) Panasianis also mentions two temples of some celebrity in the neighbourhood of Thelpusa, one above and the other below the city. The one above was the temple of Demeter Eleusina, containing statues of Demeter, Persephone and Dionysus; made of stone, and probably stood in opposite to Spidaria (viii. 25 § 3 § 3). The temple below the city was also sacred to Demeter, whom the Thelpusanis called Erinna. This temple is alluded to by Lyrophanes (1038) and Callimachus (fr. 107). It was situated at a place called Onceium, where Oenopus, the son of Apollo, is said on occasion to have reigned (viii. 25 § 4 seq.; Steph. B. s. v. "Cyrene."). Below this temple stood the temple of Apollo Oenopion, on the left bank of the Laden, and on the right bank that of the boy Asclepius, with the sepulchre of Tyrgon, said to have been the nurse of Asclepius (viii. 25 § 11). The ruins of Thelpusa stand upon the slope of a considerable hill near the village of Vámena (Bávaria). There are only few traces of the walls of the town that are left, the church of St. John, near the rivulet, are some Hellenic foundations and fragments of columns. The saint is probably the successor of Asclepius, whose temple, as we learn from Panasianis, stood longest in the city. There are likewise the remains of a Roman building, about 12 yards long and 6 wide, with the ruins of an arched roof. There are also near the Laden some Hellenic foundations, and the lower parts of six columns. Below Vámena there stands upon the right bank of the Laden the ruined church of St. Athanasius the Miraculous, where Leake found the remains of several columns. Half a mile below this church is the village of Tumbló, where a promontory projects into the river, upon which there is a mound apparently the tomb of Tyrgon. This mound is probably that of the temple of Asclepius.

Panaisianis, in describing the route from Peoplia to Thelpusa, after mentioning the boundaries between the territories of the two states (Peoplia), first crosses the river Aenos, and then, at the distance of 25 stadia, arrives at the ruins of a village Causa and a temple of Asclepius Causa, erected upon the roadside. From this place the distance to Thelpusa was 49 stadia. (Leake, Morea, vol. ii. p. 57; seq. 201 seq.; Boblaye, Researches, p. 152; Ross, Reisen in Peloponnes, p. 111; Curtius, Peloponnesos, vol. i. p. 370, seq.)

HELEUTHA, a fortress situated on an island in the Euphrates. It is mentioned by Ammianus (xxiv. 2), who states that it was used as a treasury by the emperor Constantius. It is described by Ptolemy, and sometimes by later writers, as the Thliban of Isidorus (Stoichia, Paris). It gives a similar description of it, and places it as a distant place from another island in the same river, Amatho. Zosimus, speaking of the same region, mentions a fortified island, which he calls ἐξωποιημένη αὐδή, which probably is the same place. It was known to later writers as the island of Amathus. Colonel Cheesman calls Tellaha, Tellaha, or Amathus (i. p. 53 and Map.).

THEMEOTAÆ (Θεμεοταῖ, Ptol. v. 7 § 11), a people of Asiatia Sarmatia. [H. E. B.]

THEMMA. [TEMMA.]

THEMISCTRIS (Σπουδαρία, a plain in the north of Peoplia, about the mouth of the river Ilas and Themissas). It is a rich and beautiful district, ever verdant, and supplying food for numbers of birds of prey, owls, and horses. It also produced great abundance of grain, especially rye, and it also provided the southern parts near the mountains furnished a variety of fruits, such as grapes, apples, pears, and nuts in such quantities that they were sufficient to support the caravans. (Steph. Athen. 156; xii. p. 157, fol.; Aeschyl. Prom. 722; comp. Apoll. i. 5; Apoll. Rhod. ii. 370; Plin. vi. 3, xxvi. 102.) Mythology describes this plain as the native country of the Amazons.

A Greek town of the name of Themiscyra, at a little distance from the coast and near the mouth of the river Themissas, is mentioned by Herodotus (iv. 86; comp. Scylax, p. 53; Paus. i. § 1.) Ptolemy (v. 6 § 8) is undoubtedly mistaken in placing it further west, midway between the Iris and Cape Heracleum. Scylax calls it a Greek town; but Diodorus (ii. 44) states that it was founded by the builder of the kingdom of the Amazons. After the retreat of the Thracians from Cyniceas, Themissas was besieged by Lucullus. The inhabitants on that occasion defended themselves with great valor; and when their walls were undermined, they sent down bread and other wild beasts, and even swarms of bees, against the workmen of Lucullus (Appian, Mithrid. 78). But notwithstanding their gallant defense, the town seems to have perished on that occasion; for 30 years after, it did not appear upon the maps, which might indicate the existence of Tyrgon (19), and Strabo does not mention it at all. (Comp. Amm. Peripl. E. P. i. 11; Steph. B. s. v. Xystis.) Some suppose that the town of Therme, at the mouth of the Themissas, marks the site of ancient Themissas; but Hamilton (Researches, i. p. 263) justly observes that it must have been situated a little further inland, as the place does not appear to be, for those which Texier regards as indicating the site of Themissyra, at a distance of two days' journey from the Halys, on the borders of Galatia, cannot possibly have belonged to it, but are in all probability the remains of Tavium.
THEMISONIUM.

A town of Phrygia, near the borders of Pisidia, whence in later times it was regarded as a town of Pisidia. (Strab. xii. p. 576; Paus. x. 32; Ptol. v. 2. § 26; Steph. B. s. v.; Plin. v. 29; Hieroc. p. 567.) It lay on a line with Miletus, and according to the Thessalians showed a curva, about 30 statadae from their town, in which, on the advice of Hesicles, Apollo, and Hermes, they had concealed their wives and children during an invasion of the Celts, and in which afterwards they set up statues of these deities. According to the Peutinger Table, Themisiosium was 34 miles from Laodicea. Arundell (Discoveries, ii. p. 136), guided by a coin of the place, fixes its site on the river Azanes, and believes the ruins at Kas Hissar to be those of Themisiosium; but Kiepert (in Franza's Fünf Inscriften, p. 29) thinks the ruins of Kasel Hissar, which Arundell takes to mark the site of Cibyra, are those of Themisiosium. [L. S.]

THEANAE (Θεαναί), Callim. in Iob. 42. 4. B. a. v. 'Όψηλος), a town of Creta close on the Omphalian plain, and near Cnosus. If not on the very site it must have been close to the Castello Temenos of the Venetians, which was built A. D. 961, when the Cretans, under their Saracen leaders, were vanquished by Nicephorus Phocas and the forces of the Venetians. (Pachymer. pp. 151, 155; Parkes, in a note to a coin of the place, i. p. 324; comp. Finlay, Byzantine Empire, vol. i. p. 377; Gibbon, ii. lii.)

THEANAE (Θεαναί), a maritime city of Byzantium in Africa Proper, at the mouth of a small river which fell into the Syrtis Minor, and 118 miles SE. of Carthage. (Plin. v. 4. a. 3.) By Strabo it is called αυτης προτέρυγα, by Ptolemy Θεαναί (ι. 15. § 5, iv. 3. § 11.). At a later period it became a Roman colony with the name of Asilia Augusta Marcelliniana. (Gruter, Inscr. p. 363; cf. Strab. vii. 509, also pp. 46, 47, 48, 57.) Now Beni-Idris, or Beni-Ithry. [E. B. J.]

THEODORIAS. [VACCA.]

THEODOROS POLIS (Θεοδορόπολις, Procop. de Aed. iii. 5), a city in Armenia Major, founded by Theodosius II. to keep the Armenians in subjection. It was enlarged by the emperor Anastasius, and its fortifications were much strengthened by Justinian. (Procop. B. ii. 22. § 10.) It lay 42 stadia S. of the mountain in which the Euhydrus rises, of the present Bingöl. (Id. l. 17; cf. Ritter, Erdk. x. p. 79, seq.) Theodosiopolis enjoyed an extensive commerce. (Const. Porphyry de Aed. Imp. 48.) Some writers identify it with Arzavonos (Ritter, l. p. 30, 271, seq.; Zeume, p. 431?); but according to Theophylact (B. ii. 16. § 34) it lay 35 miles E. of that place. (Cf. Chardin, ii. p. 173, seq.; Hamilton, Asia Minor, &c. i. p. 176; Gibbon, Decline and Fall, iv. p. 168, ed. Smith.)

THEODOSIOPOLIS, in Musilia. [PERPEREAMA.]

THEON OCHEMA. [LISTEA, p. 179, b.]

THEOPHILUS (Θεοφιλός), a town of Crete, on the island of Anaxandria, which fell into the hands of the Franks under the name of Haghia Sophia. (Cary, Anon. Per. P. v. p. 5.)

THEODORAS. [VACCA.]

THEODOROS POLIS (Θεοδορόπολις, Procop. de Aed. iii. 5), a city in Armenia Minor, founded by the emperor Justinian. [T. H. D.]

THEODOSIA (Θεοδοσία, Ptol. iii. 6. § 3), a flourishing colony of the Milesians, on the coast of the Chersonesus Taurica, in European Sarmatia, with a harbour capable of containing 100 ships. (Strab. vii. 509; Arrian, Per. P. Eum. p. 20.) In the description of the region by Ptolemy, the place is called Ασιλία (Asilia, Anon. Per. P. Eum. p. 5), which is said to have signified, in the dialect of the Taurians, "seven gods" (Pallas, i. p. 416), and at a later period Κάσπα (Kaspia, Const. Porphyry de Aed. Imp. c. 53); whilst by the Geogr. Ev. (iv. 3. 11) we find it named Theodosiopolis. It enjoyed an extensive commerce, particularly in corn (Dunn, schol. in Lact. p. 116). Its name appears to have been fixed before the age of Arrian, in the beginning of the second century. (Arrian, l. c.) Yet it continues to be mentioned by later writers (Polyena. v. 23; Amm. Mar. xxii. 8. § 36; Oros. i. 2; Steph. B. a. v. &c.) Yet we should not, perhaps, allow these writers much authority; as at all events the very name of the Milesian colony was transferred before the time of the emperor Constantine Porphyrogenitus, under whom the site on which it stood was already called Kaffon (de Aed. Imp. c. 43; cf. Neumann, Die Hellomen im Skythenlande, p. 469.) Clarke imagined that he had discovered its ruins at Stara Crkva, where there are still some magnificent remains of a Greek city (Trans. ii. p. 154, seq.; cf. p. 150 and note); but the more general, and perhaps better founded opinion is, that it stood, near its namesake, the modern Caffa or Theodosia. (Cf. Baou-Bouchette, Ant. de Byz. Cimm. p. 30; Dubois, v. p. 380.) For coins and inscriptions, see Kühler, Myth. Act. Acad. Petrop. xiv. 129, and Masa, de st. Petrose, ix. p. 649, seq.; Clarke, Trans. ii. 148, seq. [T. H. D.]

THEODOSIOPOLIS (also called Arpin), a town in the SE. of Thrace, on the road from Cyprus to Byzantium, a short distance to the E. of the source of the river Melas. Ammianus (xxvi. 4. § 12) mentions it by the latter name as one of the chief towns of Europa, the designation in his time of the SE. division of Thrace. [J. R.]

THEODOSIOPOLIS (Θεοδοσιοπόλις, Procop. de Aed. iii. 5), a city in Armenia Major, founded by Theodosius II. to keep the Armenians in subjection. It was enlarged by the emperor Anastasius, and its fortifications were much strengthened by Justinian. (Procop. ii. 22. § 10.) It lay 42 stadia S. of the mountain in which the Euhydrus rises, of the present Bingöl. (Id. l. 17; cf. Ritter, Erdk. x. p. 79, seq.) Theodosiopolis enjoyed an extensive commerce. (Const. Porphyry de Aed. Imp. 48.) Some writers identify it with Arzavonos (Ritter, l. p. 30, 271, seq.; Zeume, p. 431?); but according to Theophylact (B. ii. 16. § 34) it lay 35 miles E. of that place. (Cf. Chardin, ii. p. 173, seq.; Hamilton, Asia Minor, &c. i. p. 176; Gibbon, Decline and Fall, iv. p. 168, ed. Smith.)

THEODOSIOPOLIS, in Musilia, [PERPEREAMA.]

THEONOCHEMA (Lisa, p. 179, b.)

THEOPHILUS (Θεοφιλός), a town of Cret and Asia Minor near the island of Apollonia, and on the east coast of the island, of the praetorium of Gallia in the time of Honorius, and in honour of his mother, informs us that they made a road for this town by cutting both sides of the mountains, and that they gave it walls and gates. The place is still called Thousa, and there are said to be remains there. (D'Anville, Notice, &c.) [G. L.]

THEPA. [Θηρα, (Θηρα, Θερα, Θεράς, Θηράς), an island in the Aegean sea, and the chief of the Sporades, is described by Strabo as 200 stadia in circumference, opposite the Cretan island of Dia, and 700 stadia from Crete itself. (Strab. x. p. 484.) Pliny places Thera 25 Roman miles S. of Ios (iv. 12. 23). Thera is said to have formed a part of the earth thrown from the ship Argos, to have received the name of Calliste, when it first emerged from the sea, and to have been first inhabited by the Phoenicians, who were left there by Cadmus. Eight generations afterwards it was colonised by Lacedaemonians and Minyas under the guidance of the Spartan Theras, the son of Antestus, who gave his name to the island. (Herod. iv. 147, seq.; Pind. Pyth. iv. 457; Callim. infer. Stab. v. 347, x. p. 484; Apoll. Rhod. iv. 1762; Paus. iii. 1. § 7, iii. 15. § 6, vii. 2. § 2.) Its only importance in history is owing to its being the mother-city of Cyrene in Africa, which was founded by Battus of Thera in B.C. 631. (Herod. iv. 150, seq.) At this time Thera contained seven districts 4 x 3.
Thera.

(Ägæis, Herod. iv. 153.) Ptolemy (II. 15. § 26) has preserved the names of two places, Eilean or Elean, and Oea, and a third, called Melos, occurring in an inscription. (Röckh, Fsow. no. 2448.) Like Melos, Thera sided with the Lacedaemonians at the commencement of the Peloponnesian War (Thuc. ii. 9), but of its subsequent history we have no information.

Thera and the surrounding islands are remarkable as having been the scene of active volcanic operations in ancient times. In consequence of the survey made by command of the English Admiralty, we now possess precise information respecting these islands, the result of which, with additional particulars, is given by Lieutenant Laycester in a paper published in the Journal of the Royal Geographical Society, from which the following account is chiefly taken. Thera, now called Santorini, the largest of the group, has been likened in form to a horse-shoe; but a crescent with its two points elongated towards the west would be a more exact description. The distance round the inner curve is 12 miles, and round the outer 18, making the coast-line of the whole island 30 miles: its breadth is in no part more than 3 miles. Opposite to Thera westward is Therasia, which still bears the same name. (Strab. i. p. 57, v. p. 454; Steph. B. s. v. Θηρασία; Ptol. iii. 15. § 26; Plin. ii. 87. s. 89, iv. 12. s. 70.) Its circuit is 7½ miles, its length from N. to S. about 2½ miles, and its breadth a mile. About 1½ mile S. of Thersea, lies Aspronisi, or White Island, only a mile in circuit, and so called from being capped with a deep layer of pumice: the name of this island is not mentioned by the ancient writers. These three islands, Thera, Therasia, and Aspronisi, enclose an expanse of water nearly 18 miles in circumference, which is in reality the crater of a great volcano. The islands were originally united, and were subsequently separated by a brine basin three volcanic mountains rise, known by the name of Kamnisi or the Burnt, (mania, i.e. maceratus, instead of nec caedus), and distinguished as the Palaos or Old, the Neo or New, and the Mikra or Little. It was formerly asserted that the basin was unfathomable, but its depth and shape have been accurately ascertained by the soundings of the English Survey. Supposing the basin to be drained, a gigantic bowl-shaped cavity would appear, with walls 2444 feet high in some places, and nowhere less than 1200 feet high, while the Kamnisi would be seen to form in the centre a huge mountain 5½ miles in circumference with three summits, the Palaos Kamnisi, the Neo Kamnisi, and the Mikra Kamnisi, rising severally from the bottom of the abyss to the height of 1606, 1629, and 1550 feet. The rim of the great crater thus exposed would appear in all parts unbroken, except at the northern point between Thera and Therasia, where there is a chasm or door into the crater about a mile in width, and 1170 feet in depth midway between the two. (Heron, Geog. B.) If we now suppose the waters of the Aegean let in, the edges of the crater, forming the inner curve of Thera and Therasia, rise above the sea from the height of 500 to 1200 feet, and present frightful precipices, of the colour of iron dross, except where their summits are capped with a deep layer of pumice. (Strab. i. p. 57. § 23; Ptol. iii. 15. § 26; Plin. ii. 87. s. 89; Paus. x. 39. § 3.) The water of the sea is 67 feet above the water; the Neo Kamnisi 351 feet; and the Mikra Kamnisi 222 feet.

Thera, Therasia, and Aspronisi are all composed of volcanic matter, except the southern part of Thera, which contains Mosor Eileon, and of bronzite formation, the peak of which rises 1887 feet above the level of the sea, and is the highest land on the island. This mountain must have been originally a submarine eminence in the bed of the Mediterranean before the volcanic cone was formed (Lyell, Principles of Geology, p. 443, 9th ed.). The first appearance of the three Kamnises bore an aspect of volcanic action at different times, and has been narrated by several writers. The Neo Kamnisi, which is the largest of the group, did not emerge till the year 1707; but the other two were thrown up at an earlier time. The exact time of their appearance, however, is differently related, and it is difficult, and sometimes impossible, to reconcile the conflicting statements of ancient writers upon the subject. It appears certain that the oldest of these islands is the most southerly one, still called the Palaos or Old Kamnisi. It burst out of the sea in n. c. 197, and received the name of Hiera, a name frequently given in antiquity to volcanic mountains. This fact is stated by Eusebius, Justin, Strabo, and Plinius. The ascent of the Palaos extends three days by sea for four days, and that an island was formed 1½ stadia or 1¼ English miles in circumference. (Eub. Chron. p. 144. Olymp. 145. 4; Justin. xxx. 4; Strab. i. p. 57; Plut. de Pyth. Or. 11. p. 599.) The unanimous statement of these four writers, however, has at various times been denied. (Strab. ii. p. 454; Steph. B. s. v. Θηρασία;) that in the 4th year of the 135th Olympic [s. c. 237] there arose an island between these islands, 130 years later [n. c. 107], Hiera, also called Automate; and 2 stadia from the latter, 110 years A. D. 3 afterwards, in the consulship of M. Junius Silanus and L. Balbus, on the 8th of July, Thira. In another passage he says (iv. 12. s. 23): "Thera, when it first emerged from the sea, was called Kantharos; later it afterwards throws away, between the two there presently arose Automate, also called Hieria; and in our age Thira near Hieria." Seteaces refers apparently to the events mentioned by Pliny, when he states (Quaest. n. c. 26), upon the authority of Pausanias, that an island arose in the Aegean sea "in the memory of Moses, as is said by many geographers," and that the same thing has been "in our memory" (ossa memoria) in the consulsip of V. Marcellus Asiacicus [A. D. 46]. (Comp. Quaest. n. c. vi. 21.)

According to the preceding statements there would have been five different eruptions of islands in the space of little more than 200 years. First Thera and Therasia themselves appeared in n. c. 237, according to Pliny; secondly Hieria, according to Eusebius, Justin, Strabo, and Plinius, in n. c. 197; thirdly Hieria or Automate, according to Pliny, 130 years later than the first occurrence, consequently in n. c. 107; fourthly, according to Pliny, 110 years afterwards, Thira, that is in A. D. 3; fifthly, according to Seneca and other writers, who mention a town in the reign of the emperor Claudius, A. D. 46. Now it is evident that there is some gross error in the text of Pliny, or that he has made use of his authorities with a carelessness which is not unusual with him. The most surprising thing is, that he has omitted the eruptions of the islands in n. c. 157, 180, 213, which are guaranteed by several authorities. His statement that Thera and Therasia first appeared in the 4th year of the 135th Olympic,
in the eruption of 1650, or it was simply an addition to the ancient Hiera, of which there are some instances at a later period. It is apparently to this eruption that the statement of Pausanias, quoted by Seneca, refers. The last statement of Pliny that a new island, named Thisa, was thrown up 2 stadia from Thisa in the consulsip of M. Junius Silanus and L. Balbus, on the 8th of July, is so exact that it seems hardly possible to reject it; but here again is an error in the date. If we take the numbers as they stand, this event would have happened in A.D. 3, or, according to the corrected numbers, in A.D. 43, whereas we know that M. Junius Silanus and L. Balbus were consules in A.D. 19. No other writer, however, speaks of an eruption of an island in this year, which, if it actually happened, must again have disappeared. Moreover, it is strange that Pliny should have passed over the eruption of the real Thisa, or *Afíra Kamméni*, which occurred in his lifetime, in the consulsip of Valerius Asiaticus, and in

444
the reign of Claudius, a.d. 46. This event, with
the difference of only a single year, is mentioned by
several writers. (Sant. Qu. Nat. ii. 26, vi. 21;
Dess Cass. lx. 29; Aurel. Vict. Cass. 4, Epit. 4;
Ov. vii. 6; Arm. Marc. xvil. 7; Georg. Creden.
i. p. 177, ed. Per.) Moreover Fliny himself, in
another passage (v. 12. a. 29), says that this ap-
pearance is “very unusual,” which can hardly apply to the conflagration of Sibamus and Balbus,
since he was not born till A.D. 23.
In A.D. 736, during the reign of Leo the Isaurian,
Elena, or the Paione Kamessini, received an augmenta-
tion on the NE. side. (Theoph. Chronogr. p. 336;
p. 440, ed. Paris.) Thiriot has been described as
in modern times, of which a full account is given by
Lionel Lycett and Ross. Of these one of the most
important was in 1573, when the Mikra Kamessini
is said to have been formed. But as we have already
seen from several authorities that an island was
formed in the reign of Claudius, A.D. 46, we must
suppose either that this mentioned island sunk
in the sea at some unknown period, and made its
appearance a second time as the Mikra Kamessini
1573, or that there was only an augmentation of
the Mikra Kamessini in this year. The latter sup-
position is the more probable, especially since Fisch,
Richard, who records it, was not an eye-witness, but
drew his information from old people in the island.
There was another terrible eruption in 1630, which
Fischer Richard himself saw. It broke out at an
extremely different spot from all preceding eruptions,
aeolus the NE. coast of Thera, about
3½ miles from C. Kebalo, in the direction of Ion
and Ardra. This submarine outbreak lasted about
three months, overtopping the sea with pumice, and
putting out 3½ miles. Thiriot has been searched for
by the English Survey to have 10 fathoms water over it.
(See map. A.) At the same time the island of
Thera was violently shaken by earthquakes, in which
many houses were overthrown, and a great number
of persons and animals were killed by the pestilential
vapours emitted from the volcano. The sea inundated
the east coast of the island to the extent of
two or three miles, which is mostly occupied by
the ruins of two ancient towns at Perissa and Kamari were deserted, the
existence of which was previously unknown, and
which must have been overwhelmed by some previous
eruption of volcanic matter. The road also, which
then extended round Cape Meno—Fyene, was sunk
beneath the waves.
For the next few years, or a little longer, the vol-
cano was quiet, but in 1707 they burst forth with
red-voined fury, and produced the largest of the three
burnt islands, the New Kamessini. It originally con-
iscrved of two islands. The first which rose was called
the White Island, composed of a mass of pumice ex-
tremely porous. A few days afterwards there ap-
pear a large chain of dark rocks, composed of
burned earth, which we called the Black Island
was given. These two islands were gradually
raised, and at the close of the eruption, the black
rocks become the centre of the actual island, the
New Kamessini. The White Island was first seen at
the Skye of May, 1767, and for a year the dis-
nances of the volcano were incessant. After this
the eruption was not so violent, but they con-
tinned to erode at intervals in 1710 and 1711; and
it was not till 1718 that the face of the volcano
became exact. The island is now about 1½ miles
across, and has a perfect cone at its SE. side,
which is 351 feet high. From 1718 to the pres-
tent day there has been no further eruption.
There are several thermal and mineral springs in
Thera and the surrounding islands, of which
Leyston gives an account, and which are
fully described by Landerer in the transatl.
Hor. Wiel by de Oud (Zyjilijj) during the
winter of 1850, and on one occasion even
sprung into a bay on the SE. side of Noi Island.
There are springs on the NE. side of Idas
Kamessini, likewise near Cape Kamessini in the
sea; and at other places. Fresh water is very rare at Thera, and are only found at
Klima, springing from the limestone. The island
depends on summer winds and currents of the sea
they catch in the tanks during the winter.
The principal modern town of the island is called
Thera, or Fyrhe, and is situated in the sea of the
curves of the gulf. When Tarsus was
Thera, the capital stood upon the promontory of
a little to the N. of the present capital, and
situated under the town of Merovoun. Now the
Sheve projects about one third of
into the sea; and upon it are the remains of a
built by the dukes of Nezara. The chief town
island, after the capital, is Epanossaria, or 37
promontory, and directly opposite to Thera, in
space is of the utmost value in this
all the principal towns are built upon the
sea, connected with Mount Etna by the road of the
precipices, and, in many cases, over the
are built in the face of them. The population of
in 1848 was about 14,000, and included
Therasia, about 14,380. In the time of Tarsus
there were 10,000 inhabitants, so that the incre-
has been nearly a third in about 150
years. The island is carefully cultivated, and the
practitioners, who are nearly at the principal
ports in the Black Sea.
The antiquity of the island has been evolved
at length by Ross and Leyston. There remains of an ancient city situated at the SE. point
of the island, upon the summit of Mount Fyene Mount Fyene above 1100 feet below the low of
sea, connects with Mount Etna by the road of
Sellado. The island of Mount Fyene slopes slightly
off to the precipices on the NE. side, and rise perpendicularly 600 feet above the
form the cape of the same name. The volcanic
masonry of all ages, from the most ancient
to the regular masonry of later times. The sea
may be seen the circuit of
a mile; but the house
have been built terraces-fashion upon the side of
the hill. Several inscriptions, fragments of arc,
and other antiquities, have been discovered.
The name of this city has been a subject of
scrapes. In an inscription found below Ross
in Kamessini, in the church of St. Nicholas, the
name of the two towns mentioned by Pausanias. It is
an inscription upon some steps cut out rock of Meno—Fyene we find the
name of the however, does not consider this to be a proof.
THERAMBOS.

There was the name of the city, supposing that διήνεξα here signifies not only the political community of the Theramenes. On the other hand, it was so usual for the islands of the Aegean to possess a capital of the same name, that, taken in connection with the inscription last mentioned, it is probable, either that Ptolemy has accidentally omitted the name of the capital, or that in his time the Theramenes had removed from the lofty site at Cape Vouno to one upon the coast at Kastri, where submarine ruins still exist. Upon the other or S. side of the Cape Messa-Vouno, at Perissos, there are also so many ancient remains as to lead us to suppose that this was the site of an ancient city, but no inscription has been discovered to give an clue to its name. Upon either side of the mountain of Messa-Vouno there are numerous tombs.

South of Perissos is C. Ezonithos, and a little to the N. of this cape there are the remains of an ancient city, which is probably the Elegis of Ptolemy. Here are the ruins of a mole under water, and upon the side of the mountain many curious tombs. There are likewise some ruins and tombs at C. Kolambos, in the NE. of the island, which Ross conjectures may be the site of Theramenes. The island of Theramnes possessed a town of the same name (Ptol. iii. 15. § 88), the ruins of which were discovered by Ross opposite Epom memoris in Thera.

(Besides the earlier writers, such as Tournefort and others, the reader is particularly referred to Ross, Reisen auf den Griechischen Inseln, vol. i. pp. 53, seq., 86, seq.: 180, seq.; and Lieut. Lecky, Some Account of the Christian Group of Santorini, or Thera, in the Journal of the Royal Geographical Society, vol. xx. p. 1, seq.)

THERAMBOS or THRAMBUS (Θεραμβός, Herod. vii. 123; Ἐραμβός, Steph. B. z. v.; Θραμβής, Scylax, p. 26; Θραμβούσα Βεράδις, Lycker, 1404), a town of the peninsula Pallene, in Chaldidice in Ross conjectures may be the site of Theramenes. The island of Theramnes is C. Ezonithos, and is hence supposed by Leake (Northern Greece, vol. iii. p. 156) to have occupied a position very near the promontory Canastreum, the most southerly point of Pallene; but from the order of the names in Scylax we would rather place it at the promontory upon the western side of the peninsula, called Pheidias' Thucydid (i. 125). THERAMBOS was the capital of Mosia, now Ternoinia (Geogr. Rav. iv. 15; Tab. Peut.).

THERAPNE (Θεραπνή, Εθ. Θεραπνής), a place in the territory of Thbes, between this city and the Asopus. (Eurip. Bacch. 1029; Strab. i. p. 409; Leake, Northern Greece, vol. ii. p. 369.)

THERAPNE. (Σπάντα, p. 1089, b.)

THERIADIS SINUS [Θεριάδις κόλπος, Ptol. vii. 3. § 2], a gulf on the coast of the Sinis, between the promontories Notium (Νότιον), and Satyrion (Σατύριον). Perhaps the gulf of Tomkins, or that between the Cape St. James and the river of Campodis.

THERMIAE [Θερμίαν, Eθ. Θερμιστών] was the name of two cities in Sicily, both of which derived their name from their position near hot springs.

1. The northern Thermia, sometimes called for distinction's sake Thermia Himerienses (now Termini), was situated on the N. coast of the island, in the immediate neighbourhood of the more ancient city of Himera, to the place of which it may be considered as succeeding. Hence its history is given in the article HIMEIRA.

THERMOPYLAE.

2. The southern Thermia, or Thermas Selli-Muntas (Σέλλης), was situated on the SW. coast of the island, and, as its name imports, within the territory of Selinus, though at a distance of 20 miles from that city in the direction of Agrigentum. There can be no doubt that it occupied the same site as the modern town of Scicosa, about midway between the site of Selinus and the mouth of the river Halyce (Platone), where there still exist sulphurous springs. (Smyth's Sicily, p. 217; Cluver, Sicil. p. 223.) We have no account of the existence of a town on the site during the period of the independence of Selinus, though there is little doubt that the thermal waters would always have attracted some population to the spot. Nor even under the Romans did the place attain to anything like the same importance with the northern Thermia; and there is little doubt that Pliny is mistaken in assigning the rank of a colonia to the site instead of the northern town of the name. (HIMERA.) Strabo mentions the waters (τά Πηγάδες τὰ Σελλήνησις, Strab. vi. p. 275); and they are again noticed in the Itinerae under the name of Aquae Labores or Labraces (Itin. As. 150; Tab. Peut.).

THERMIAE SELL-SELI-MUNTAE (Σέλλης), a town on the SW. coast of Sicily, situated about midway between Selinus and the river Halyce, where there still exist sulphurous springs. (Smyth's Sicily, p. 217; Cluver, Sicil. p. 223.) We have no account of the existence of a town on the site during the period of the independence of Selinus, though there is little doubt that the thermal waters would always have attracted some population to the spot. Nor even under the Romans did the place attain to anything like the same importance with the northern Thermia; and there is little doubt that Pliny is mistaken in assigning the rank of a colonia to the site instead of the northern town of the name. (HIMERA.) Strabo mentions the waters (τά Πηγάδες τὰ Σελλήνησις, Strab. vi. p. 275); and they are again noticed in the Itinerae under the name of Aquae Labores or Labraces (Itin. As. 150; Tab. Peut.).

THERMIAE SINUS. [ΘΕΡΗΝΙΟΝ.]

THERMODYN (Θερμόν), a river of Pontus, celebrated in the story about the Amazons, is described by Pliny (vi. 3) as having its sources in the Amazonian mountains, which are not mentioned by any other ancient writer, but are believed still to remain and to possess the same name. Mason Dogh. (Hamilton, Researches, i. p. 283.) Strabo (xii. p. 547) places its many sources near Phanareos, and says that many streams combine to form the Thermodyne. Its course is not very long, but its breadth was nevertheless three plethra, and it was a navigable river (Xen. Anab. v. 6 § 9, vi. 2 § 1; Arrian, Perip. v. 16.). It is probably the same river, which, by the mouth of the town of Mason Dogh. (Hamilton, Researches, i. p. 283.) Strabo (xii. p. 547) places its many sources near Phanareos, and says that many streams combine to form the Thermodyne. Its course is not very long, but its breadth was nevertheless three plethra, and it was a navigable river (Xen. Anab. v. 6 § 9, vi. 2 § 1; Arrian, Perip. v. 16.)

THERMOPYLAE (Θερμοπόλεως), or simply PYLAE (Πύλαι), that is, the Hot Gates or the Gates, a celebrated narrow pass, leading from Thyessal into Locris, and the only road by which an enemy can penetrate from northern into southern Greece. It lay between Mount Oeta and an inaccessible morass, forming the edge of the Malian gulf. In consequence of the change in the course of the rivers, and in the configuration of the coast, this pass is now very different from its condition in ancient times; and it is therefore necessary first to give the statement of Herodotus and other ancient writers respecting the locality, and then to compare it with its present position. In the latter part of the 4th century the river Spercheus flowed into the sea in an easterly direction at the town of Anticyra, considerably W. of the pass. Twenty stadia E. of the Spercheus was another river, called Dysus, and again, 20 stadia further, a third river, named Melas, 6 stadia from which was the city Trachis. Between the mountain where Trachis stood and the sea the plain is widest. Still further E. was the Asopus, issuing from a rocky gorge (Ῥαγαδά).
and E. again is a small stream, named Phoenix, flowing into the Asopus. From the Phoenix to Thermopylae the distance, Herodotus says, is 15 stadia. (Herod. vi. 198—200.) Near the united streams of the Phoenix and the Asopus, Mt. Oeta approached so close to the morass of the gulf as to leave space for only a single carriage. In the immediate vicinity of the pass is the town of Anthela, celebrated for the temples of Amphiotyon and of the Amphiotyonic Demeter, containing seats for the members of the Amphiotyonic council, who held here their statamel meetings. At Anthela Leake found its water little fresh from the sea, leaving a plain a little more than half a mile in breadth, but again contracts near Alpeni, the first town of the Locrians, where the space is again only sufficient for a single carriage. At this pass were some hot springs, which were consecrated to Hercules (Strab. ix. p. 428), and were called by the natives Chlyri or the Pane, on account of the cells here prepared for the bathers. Across this pass the Phocians had in ancient times built a wall to defend their country against the attacks of the Thessalians, and had let loose the hot water, so as to render the pass impracticable. (Herod. vi. 300, 176.) It appears from this description that the proper Thermopylae was the narrow pass near the Locrian town of Alpeni; but the name has since been also applied to the whole pass from the mouth of the Asopus to Alpeni. Taking the term in this acceptation, Thermopylae consisted of the two narrow openings, with a plain between them rather more than a mile in length and about half a mile in breadth. This portion of Mt. Oeta, which rises immediately above Thermopylae, is called Callidromos by Livy instead of Strabo, but both writers are mistaken in describing it as the highest part of the range. Livy says that the pass is 60 stadia in breadth. (Liv. xxxvi. 15; Strab. ix. p. 428.) In consequence of the accumulation of soil brought down by the Spercheus and the other rivers, three or four miles of new land have been formed, and the mouth of Thermopylae has been no longer close to the sea. Moreover, the Spercheus, instead of flowing into the sea in an easterly direction, considerably W. of Thermopylae, now continues its course parallel to the pass and at the distance of a mile from it, falling into the sea lower down, to the E. of the pass. The rivers Dyrras, Melas, and Asopus, which formerly reached the sea by different mouths, now discharge their waters into the Spercheus. In addition to this there has been a copious deposit from the warm springs, and a consequent formation of new soil in the pass itself. The present condition of the pass has been described by Colonel Leake with his usual clearness and accuracy. Upon entering the western opening, Leake entered a plain of rich hemispheric water, running with great rapidity towards the Spercheus, and leaving a great quantity of red deposit. This is undoubtedly the Phoenix, which probably derived its name from the colour of the sediment. After crossing a second salt-spring, which is the source of the Phoenix, and a stream of cold salt water, Leake entered a plain of rich hemispheric water, the plain of Anthela, which is a long triangular slope, formed of a hard gravelly soil, and covered with shrubs. There is an easy descent into this plain over the mountains, so that the western opening was of no importance in a military point of view. Upon reaching the eastern pass, situated at the end of the plain of Anthela, the traveller reaches a wide elevated soil formed by the deposit of the salt-springs of the proper Thermopylae. There are two principal sources of these springs, the upper or western being immeasurably distantly at the foot of the nearest part of the cliffs, and the lower or eastern being 200 yards distant. From the lower source the water is conducted in an artificial canal for a distance of 400 yards to a mill. This water emits a strong sulphureous vapour, and, as it issues from the mill, it pours out a great volume of smoke. Beyond the hill are cassebouls, and on their northern slope, the usual processions of sheep and goats, containing cold water; but as this water is of the same composition as the hot springs, it is probably also hot at its issue. Leake observes that the water of these pools, like that of the principal hot source, is of a dark blue colour, thus illustrating the remark of Pausanias, that the bluest water he ever saw was in one of the baths at Thermopylae. (Paus. iv. 35. § 8.) The springs at this pass are much hotter, and have left a far greater deposit than those at the other end of the plain, at the opening which may be called the false Thermopylae. Issuing from the passes are foundations of a Helicistic temple, doubtless the remains of works by which the pass was at one time fortified; and to the left is a tumulus, perhaps founded on the foundations of an ancient monument. Upwards of a mile further is a deep ravine, in which the torrents descending from Mt. Callidromus are collected into one bed, and which affords the easiest and most direct passage to the summit of the mountain. This is probably the mountain path by which the Persians, under Hydarnes, descended in the rear of Leonidas and his companions. The pass by which the Greeks descended to the sea, is called Asopass (Ἀσόπασσα) by Herodotus, who does not use the name of Callidromus. He describes the path as beginning at the gorge of the Asopus, passing over the crest of the mountain, and terminating near Alpeni and the rock called Melamypagus, and the seats of the Cercopes, where the road is narrowest. (Herod. vi. 216.) The history of the breach of the pass of Thermopylae is not well known to require to be related here. The wall of the Phocians, which Leonidas repaired, was probably built a little eastward of the western salt-spring. When the Spartan king learnt that Hydarnes was descending in his rear, he advanced beyond the wall into the widest part of the pass, resolved to sell his life as dearly as possible. Upon the arrival of Hydarnes, the Greeks retired behind the wall, and took up their position upon a hill is the pass (καταβάσεις τε καὶ εἴσοδον), where a horse was afterwards erected in honour of Leonidas. This hill Leake identifies with the western of the two small heights already described, as nearest to the position of the Phocian wall, and the narrowest part of the passage of the pass. The other height is probably the rock Melamypagus. Thermopylae is immortalised by the heroic defence of Leonidas; but it was also the scene of some important struggles in later times. In a. c. 379 an allied army of the Greeks assembled in the pass to oppose the Gauls under Brennus, who were marching into southern Greece with the view of pillaging the temple of Delphi. The Greeks held their ground for several days against the attacks of the Gauls, till at length the Heracleotae and Aetianae conducted the invaders across Mount Callidromus by the same path which Hydarnes had followed two centuries before. The Greeks, finding their position
no longer tenable, embarked on board their ships and retired without further loss. (Paus. x. 19—22.)

In B.C. 207, when the Romans were carrying on war in Greece against Philip, king of Macedonia, the Astolians, who were then in alliance with the Romans, fortified Thermopylae with a ditch and a rampart, but Philip shortly afterwards forced his way through the pass. (Liv. xxxvi. 15—19.)

There are still remains of three Hellenic fortresses upon the heights above Thermopylae, which probably represent the three places mentioned by Livy. Appian (Syr. 17) speaks only of Callidromus and Teichius, but Strabo (ix. p. 428) mentions Rhodantia also. Procopius relates that the fortifications of Thermopylae were restored by Justinian (de Aed. iv. 2).

(On the topography of Thermopylae, see the excellent account of Leake, Northern Greece, vol. ii. pp. 5, seq., 40, seq.; there is also a treatise by Gordon, Account of Two Visits to the Aegean or the Highlands above Thermopylae, Athens, 1838, which the writer of this article has not seen.)

THERMUM, THERMUS or THERMA (τὰ Θέρματα, Pol. v. 8; τὰ Θέρμα, Strab. x. p. 463; Pol. v. 7; Θερμαί, Steph. B. s. v.; Tch. Θέρμας: Vokko), the chief city of Astolia during the flourishing period of the Astolian League, and the place where the meetings of the league had been held and an annual festival celebrated. It possessed a celebrated temple of Apollo, in connection with which the festival was probably celebrated. It was situated in the very heart of Astolia. N. of the lake Trichonias, and on a height of Mt. Panatolium (Vieae). It was considered inaccessible to an army, and from the strength of its position was regarded as a place of refuge, and, as it were, the Acropolis of all Astolia. The road to it ran from Metap, on the lake Trichonias, through the village of Pamphia. The city was distant 60 stadia from Metap, and 30 from Pamphia; and from the latter place the road was very steep and dangerous, running along a narrow crest with precipices on each side. It was, however, surprised by Philip V., king of Macedon, in his invasion of Astolia in B.C. 216. The Astolians, who had never imagined that Philip would have penetrated so far into their country, had deposited here all their treasures, the whole of which now fell into the hands of the king, together with a vast quantity of arms and armour. He carried off the most valuable part of the spoil, and burnt all the rest, among which were more than 15,000 suits of armour. Not content with this, he set fire to the sacred buildings, to retaliate for the destruction of Dium and Dodona. He also defaced all the works of art, and threw down all the statues, which were not less than 2000 in number, only sparing those of the Gods. (Pol. v. 6—9. 13.) A few years afterwards, when the Astolians had sided with the Romans, Philip again surprised Thermus (about a. c. 206), when he destroyed everything which had escaped ravages in his first attack. (Pol. xi. 4.)

We have no further details of the history of Thermus. Polybius alludes, in one or two other passages (xviii. 31, xxviii. 4), to the meetings of the league held there. In the former of these passages Livy (xxxiii. 35) has misunderstood the words τῆς...
Thespiae. The site was originally a town, possibly founded by the Thespians, but later it became a sacred place dedicated to the god Thespian Zeus. The town was located on the southern slope of Mount Helicon, overlooking the plain of Amyclae. The city was renowned for its sanctuary, which housed the statue of the god Thespian Zeus. The town was a center of worship and a place of pilgrimage, attracting visitors from all over the region. The location of Thespiae was significant because it was situated on a strategic point along the route from Athens to Corinth, making it an important political and economic hub. The city's prosperity was based on trade and commerce, supported by the surrounding fertile lands and rich natural resources. However, the city was subject to constant conflicts and struggles for power, leading to its eventual decline. Despite its historical significance and cultural heritage, Thespiae faded into obscurity, and its ruins are a testament to the passage of time and the ever-changing landscape of human history.
THESPROTI, THESPROTIA. [Epeirus.]

THESSALIA (Θεσσαλία or Θεσσαλία: Thessaly, Thessaly, Thessalia; Adj. Θεσσαλικός, Thesaliakos). The largest political division of Greece, was in its widest extent the whole country lying N. of Thermopylae as far as the Cambuvian mountains, and bounded upon the W. by the range of Pindus. But the name of Thessaly was more specifically applied to the great plain, by far the widest and largest in all Greece, enclosed by the four great mountain barriers of Pindus, Othrys, Ossa and Pallon, and the Cambuvian mountains. From Mount Pindus, —the Apennines or back-bone of Greece,—which separates Thessaly from Epeirus, two large arms branch off towards the eastern sea, running parallel to one another at the distance of 60 miles. The northern, called the Cambuvian mountains, forms the boundary between Thessaly and Macedon, and terminates in the summit of Olympus, which is the highest mountain in all Greece [Olympus]. The southern arm, named Othrys, separates the plain of Thessaly from Maia, and reaches the sea between the Malian and Pagassuan gulfs [Othryia]. The fourth barrier is the range of mountains, first called Ossa and afterwards Pelion, which run along the coast of Thessaly upon the E., nearly parallel to the range of Pindus (Ossa; Pelion). The plain of Thessaly, which is thus enclosed by natural ramparts, is broken only at the NE. corner by the celebrated vale of Tempe, which separates Ossa from Olympus, and is the only way of entering Greece from the N., except by a pass across the Cambuvian mountains. Thessaly, which is drained by the river Peneius and its affluents, is said to have been originally a vast lake, the waters of which were afterwards carried off through the vale of Tempe by some sudden convulsion, which rent the rocks of the valley asunder. (Hered. vii. 129.) [Tempe.] The lakes of Nessos and Boebeis, which are connected by a channel, were supposed by Strabo (ix. p. 400) to have been the remains of this vast lake. In addition to this plain there are two other districts included under the general name of Thessaly, of which one is the long and narrow slip of rocky coast, called Magnesia, extending from the vale of Tempe to the Gulf of Pagassae, and lying between Mounts Ossa and Pelion and the sea; while the other, known under the name of Maia, is quite distinct in its physical features from the rest of Thessaly, being a long narrow valley between Mounts Othrys and Pelion through which the river Spercheius flows into the Malias gulf.

The plain of Thessaly properly consists of two plains, which received in antiquity the name of Upper and Lower Thessaly; the Upper, as in similar cases, meaning the country near Mount Pindus most distant from the sea, and the Lower the country near the Thermis gulf. (Strab. ix. pp. 430, 437.) These two plains are separated by a range of hills between the lakes Nessos and Boebeis on the one hand, and the river Enipeus on the other. Lower Thessaly, which constituted the ancient division Pelasgicis, extends from Mount Titarus and Ossa on the N. to Mount Othrys and the shores of the Pagassuan gulf on the S. Its chief town was Pharsalus, stretches from Aegiuminum in the N. to Thaumaci in the S., a distance of at least 50 miles in a straight line. The road from Thermopylae into Upper Thessaly entered the plain at Thaumaci, which was situated at the eastern end of the Ecdus, where the traveller came in sight of a plain resembling a vast sea. (Liv. xxxii. 4.) [Thaumaci.]

The river Peneius, now called the Salamoria or Salambria (Σαλαμόρια, Σαλαμπρία), rises at the NW. extremity of Thessaly, and is composed of streams collected in the valleys of Mount Pindus and the offshoots of the Cambuvian plain, and emerges at Thessaly, where it receives within a very short space many of its tributaries. Next it passes through a valley formed by a range of hills, of which those upon the right divide the plains of Upper and Lower Thessaly. It then enters into the plain a few miles westward of Larissa; after passing which city it makes a sudden bend to the N., and flows through the vale of Tempe to the sea. Although the Peneius drains the greater part of Thessaly, and receives many tributaries, it is in the greater part of its course a shallow and sluggish river, except after the melting of the snows, when it sometimes forms a surging grand and surrounding plain. Hence on either side of the river there is frequently a wide gravelly uncultivable space, described by Strabo as ποταμόκλωστος (ix. p. 430; Leake, Northern Greece, vol. i. p. 420). When the river is swollen in the spring, a channel near Larissa conducts the superfluous waters into the Karpotov or Μπακοτς, the ancient Nessos; and when this channel is filled, another channel conveys the waters into the lake of Kardia, the ancient Boebeis. (Leake, iv. p. 403.) In the lower part of its course, after leaving Larissa, the Peneius flows with more rapidity, and is full of small vortices, which may have suggested to Homer the epithet
THESSALIA.

The principal rivers of Thessaly, according to Herodetus (viii. 129), are the Peneus, Apidasus, Ondarus, and Vardaxus. The four latter rivers all flow from the S. Of these the most important is the Epiusena, now called the Eridanai, which flows through the plain of Pharsalos, and falls into the Peneus near Phileas in the lowest part of the plain. The Apidasus, now called Vrysses, into which the Ochusos (Sporadikos) falls, is a tributary of the Epiusena. [Exarwa.]

The Pamisos, now called the Blisuri or Pithiri, also joins the Peneus a little to the W. of the Epiusena. The Eonocousus, which is probably the same as the Ondurus, flows into the lake Boeotis and not into the Peneus. [For details, see Vol. II. p. 483, a.]

The chief tributary of the Peneus on the N. is the Titirasis, now called Elamossodikos or Kordhdis, which rises on Mt. Thessalos, a part of the Caccheton in Thessaly, and joins the main stream between Larissa and the vale of Tempe. Homer relates (II. 753, seq.) that the waters of the Titirasis did not mingle with those of the Peneus, but floated upon the surface of the latter like oil upon water, whence it was regarded as a branch of the infernal river Styx. (Comp. Lucan, vi. 273.) Leake, however, calls attention to the fact that Strabo (ix. p. 441), probably misled by the epithet (αγρόβλοτος) applied to the post to the Peneus, has reversed the true interpretation of the post's comparison of the Peneus and the Titirasis, supposing that the Peneus was the pellicid river, whereas the apparent reluctance of the Titirasis to mingle with the Peneus arises from the former being clear and the latter muddy. (Nordenskiöld, Greece, iii. p. 396, iv. p. 296.) The Titirasis was also called Eutosa (Strab. vii. p. 329) and Horcus or Orcus (Plin. iv. 8. s. 15).

The plain of Thessaly is the most fertile in all Greece. It produced in antiquity a large quantity of corn and cattle, which supported a numerous population and especially a rich and proud aristocracy, who were at frequent feuds with one another and much given to luxury and the pleasures of the table (ἐπὶ τοῦ τάρπας καὶ 

εὐλαβείας καὶ ἀκρασίας, Plat. Conv. 15; Athen. xii. p. 564; Thesprot. ap. Athen., vi. p. 280; Dem. Orat. 15). The Thessalian horses were the finest in Greece, and their cavalry was at all times efficient; but we rarely read of their infantry. The nobles, such as the Aeleades of Larissa and the Scopodes of Crannon, supplied the poorer citizens with horses; but there was no class of free equal citizens, from which the hoplites were drawn in other Greek states. (See Grote, Hist. of Greece, vol. ii. p. 367.) Hence the political power was in the hands of these nobles or of a single man who established himself as despot. The numerous flocks and herds of the Scopodes at Crannon are alluded to by Theocritus (Id. xvi. 36), and the wealth of the Thessalian nobles is frequently mentioned by the ancient writers.

Thessaly is said to have been originally known by the names of Pherai, Phthiotis, and the Aeolians. (Ehiam. ap. Schol. Rhod. iii. 1069; Steph. B. s. v. Aeolus; Herod. vii. 176.) The two former appellations belong to mythology, but the latter refers to the time when the country was inhabited by the Aeolian Pelaugi, who were afterwards expelled from the country by the Thessalians. This people are said to have been immigrants, who came from Thebros in Epirus, and conquered the plain of the Peneus. (Herod. vii. 176, comp. i. 57; Strab. i. p. 444.) The Boetians are said to have originally dwelt at Arce, in the country afterwards called Thebros, and were driven from it by the Pelaugi, who conquered it about 200 years after the Trojan War. (Thuc. i. 12.) The expulsion of the Boetians by the Thessalians seems to have been conceived as an immediate consequence of the immigration of the Thessalian invaders; but, however this may be, the name of Themis is unknown in Homer, who only speaks of the several principalities of which the country was composed.

In the Homeric catalogue Phisippus and Antipus, who led the Greeks from Carpathia, Cos, and the neighbouring islands, are called the sons of Thessa-

Ius, the son of Heracles (Hom. Il. i. 676); and, in order to connect this name with the Thessalians of Thebros, it was reported that these two chiefs had, upon their return from Troy, been driven by a storm from the coast of Epirus, and that the grandson of Phisippus led the Thessalians across Mount Pindos and imposed his name upon the country. (Vell. Pat. i. 2, 3; Steph. B. s. a. Phisippus; Polyarn. viii. 44.) There are many circumstances in the historical period which make it probable that the Thessalians were a body of immigrating conquerors who came from Thes euros, they must have gradually dropped their original language, and learnt that of the conquered people, as the Thessalian was a variety of the Aeolic dialect. There was in Thessaly a triple division of the population analogous to that in Laconia. First, there were the Thessalians proper, the rich landed proprietors of the plains. Second, there were the descendants of the original inhabitants of the country, who were not expelled by the Thessalian conquerors, and who were more or less dependent upon them, corresponding to the Lacedaemonian Perioeci, but, unlike the latter, retaining their original names and their seats in the Amphictyonic council. These were the Pheraiakos, who occupied the mountainous districts of Pherai, Phthiotis, and the Aeolians, of whom the course of the Peneus; the Magnesians, who dwelt along the eastern coast between Mount Pecios and Ossa and the sea; the Achaeans, who inhabited the district called Phithiotis, which extended S. of the Upper Thessalian plain, from Mount Pindos on the W. to the Gulf of Pagasae on the S.; the Dolopes, who occupied the mountainous regions of Pindus, S. of Phthiotis; and the Malians, who dwelt between Phthiotis and Thermopylae. The third class of the Thessalian population were the Penaeans, seers or dependent cultivators, corresponding to the Helots of Laconia, although their condition seems upon the whole to have been superior. They tillled the estates of the great nobles, paying them a share of the produce in great and the masters to war upon horseback. They could not, however, be sold out of the country, and they possessed the means of acquiring property, as many of them were said to have been richer than their masters. (Archench. ap. Athen. vi. p. 264.; Plat. Leg. vii. p. 777; Aristot. Pol. III. 8, § 9; Dem. or. ii. 94.) They were probably the descendants of the original inhabitants of the country, reduced to slavery by the conquering Thessalians; but when Thesprotius states that they were the descendants of the conquered Pheraiakans and Mag-
THESSALIA.

netes (ap. Ath. vi. p. 265), this can only be true of a part of these tribes; as we know that the Penetae were entirely distinct from the subject Perrhasiotes, Magnetes, and Achaeans. (Aristot. Politi. l. 6. § 3.)

The Penetae, like the Laconian Helots, frequently rose in revolt against their masters. In the Homeric poems the names of Perrhasbi, Magnetes, Acheans, and Dolopes occur; and Achaeas Phthiotis was the residence of the great hero Achilles. This district was the seat of Heracle, the founder of the Hellenic race, and contained the original Hellas, from which the Hellenes gradually spread over the west of Greece. (Hom. II. ii. 61; Thucyd. i. 3; Strab. i. p. 631; Herod. ii. p. 21; ed. Hod. ii. 3; Steph. B. a. v. *E*Ad.)

The Achaeans of Phthiotis may fairly be regarded as the same race as the Achaeans of Peloponnesus.

Thessaly Proper was divided at an early period into four districts or tetrarchies, named Thessaliotis, Pelaos, Haemius, and Phthiotis. When this division was introduced is unknown. It was older than Becatas (Steph. B. a. v. *E*Kdewv), and was ascribed to Aeolus, the founder of the family of the Aeolians. (Hellen. Fragm. 28, ed. Diodor.; Harpocr. *E* Topvwyk; Strab. i. p. 480.) This quadruple division continued to the latest times, and seems to have been instituted for political purposes; but respecting the internal government of each, we have no information. The four districts were nominally united under a chief magistrate, called Tagus; but he seems to have been only appointed in war, and his commands were frequently disobeyed by the Thessalian cities. When Thessaly is under a Tagus, said Jason, despot of Pherae, she can send into the field an army of 6000 cavalry and 30000 infantry. (Plut. Ph. 1. 38. § 8.) But Thessaly was rarely united. The different cities, upon which the smaller towns were dependent, not only administered their own affairs independent of one another, but the three most important, Larissa, Pharsalus and Phere, were frequently at feud with one another, and at the same time torn with intestine faction. Hence they were able to resist the invasions of the barbarians who occupied that position in Greek history to which their population and wealth would seem to have entitled them. (Respecting the Thessaliots in general, see Mr. Grote's excellent remarks, Hist. of Greece, vol. ii. p. 363, seq.)

The history of Thessaly may be briefly dismissed, as the most important events are related under the separate cities. Before the Persian invasion, the Thessaliots had extended their power as far as Thermopylae, and threatened to overrun Phocis and the country of the Locrians. The Phocians built a wall across the pass of Thermopylae to keep off the Thessaliots; and though active hostilities seem to have ceased before the Persian invasion, as the wall was at that time in ruins, the two nations continued to cherish bitter animosity towards one another. (Herod. vii. 176.) When Xerxes invaded Greece, the Thessaliots were at first opposed to the Persians. It is true that the powerful family of the Aeolades, whom Herodotus calls (vii. 6) kings of Thessaly, had urged Xerxes to invade Greece, and that they were not among those who bore to the court of their countrymen; but it is evident that their party was in the minority, and it is probable that they were themselves in exile, like the Athenian Peisistratidae.

The majority of the Thessaliots sent envoys to the confederate Greeks at the Isthmus, urging them to send a force to the pass of Tempe, and promising them active co-operation in the defence. Their request was complied with, and a body of 10,000 heavy-armed infantry was despatched to Thessaly; but the Greek commanders, upon arriving at Tempe, found that there was another pass across Mount Olympus, and believing it impossible to make any effectual resistance north of Thermopylae, retreated to their ships and abandoned Thessaly. (Herod. vii. 172, seq.) The Thessaliots, thus deserted, hastened to make their submission to Xerxes; and under the influence of the Alcmaeonidae, who now regained the ascendency in Thessaly, they rendered zealous and effectual assistance to the Persians. After the death of Leonidas and his heroic companions at Thermopylae, the Thessaliots gratified their enmity against the Phocians by directing the march of the Persians against the Phocian towns and laying their country waste with fire and sword.

From the Persian to the Peloponnesian war the Thessaliots were rarely mentioned. After the battle of Osmopynta (n. c. 456) had given the Athenians the ascendency in Boeotia, Locria, and Phocis, they endeavoured to extend their power over Thessaly. With this view they marched into Thessaly under the command of Myronides in n. c. 454, for the purpose of restoring Orestes, one of the exiled nobles or princes of Pharsalus, whom Tanydidas calls son of the king, the inhabitants of the district of Myronides was checked by the powerful Thessalian cavalry; and though he advanced as far as Pharsalus, he was unable to accomplish anything against the city, and was compelled to retreat. (Thuc. i. 111; Diodor. xi. 85.) In the Peloponnesian war the Thessaliots took no part; but the mass of the Thessalian forces was friendly to the Athenians, though the oligarchical governments favoured the Spartans. With the assistance of the latter, combined with his own rapidity and address, Brasidas contrived to march through Thessaly in n. c. 424, on his way to attack the Athenian dependencies in Macedonia (Thuc. iv. 78); but when the Lacedaemonians wished to send reinforcements to Brasidas, the Thessaliots positively refused them a passage through their country. (Thuc. iv. 132.) In n. c. 395 the Thessaliots joined the Boeotians and their allies in the league against Sparta; and when Agesilaus marched through their country in the following year, having been recalled by the Spartan government from Asia, they endeavoured to intercept him on his return; but their cavalry was defeated by the skilful manoeuvres of Agesilaus. (Xen. Hell. vi. 3. § 3, seq.)

About this time or a little earlier an important change took place in the political condition and relative importance of the Thessalian cities. Almost down to the end of the Peloponnesian war the powerful families of the Aeolades at Pharsalus, and Scopades at Crammon, and of the Cremnidae at Pharsalus, possessed the chief power in Thessaly. But shortly before the close of this war Phereis rose into importance under the administration of Lyophon, and aspiring to the supremacy of Thessaly. Lyophon overthrew the government of the nobles at Pharsae, and returned the seat of the city. In prosecution of his ambitious schemes he attacked Larissa; and in n. c. 404 he gained a great victory over the Larissaeans and the other Thessaliots who were opposed to him. (Xen. Hell. ii. 3. § 4.) In n. c. 395 Lyophon was still engaged in a con-
In the following year he assumed the command of marching to Delphi at the head of a force of Thessalian troops and provisions for a festival. Great alarm was felt throughout Greece, but before the time came, he was surrounded by seven youths as he sat in public to judge cases at all courts. His death was a sad event and the honors paid in many of the great cities to his assassins prove the general fear of his character, even when put to death. (Xen. Hell. vi. §§ 29—32.)

Jason had so firmly established his power that he was succeeded in the post of Tagus of Thessaly by his two brothers Polyphemus and Pylepos; he did not possess his abilities or energy, and these again sank into political insignificance. Pylepos was assassinated by his brother Pylepos, ex-necator Tagus. Polyphemus carried on with great cruelty; he put to death Pharsalus, and killed or drove into exile other distinguished persons of the city and of Macedonia. (Xen. Hell. vi. 4. §§ 33, 34.) At the same time he was also assassinated by Alexander, who avenged the death of his brother (Diod. xvi. 61) as he served with his brother (Diod. xvi. 61) as he served with his brother. Alexander spared Polyphemus in cruelty, and was guilty of cruelties. The Macedonians and the other cities were chiefly exposed to his vengeance, and to their distress to Alexander, the youth of Macedonia, who had recently succeeded to the throne, and had been already twice vanquished by Alexander. (Diod. xvi. 61.) It would seem, however, that the desire of his own kingdom compelled him to carry his designs further, to withdraw his troops from Thessaly; and as the Thessalian cities opposed the treaty concluded by Pylepos and other cities under his pretense, apparently with the sanction of Alexander of Macedon, with whom he formed an alliance (Xen. Hell. vi. 67.) In the following year (Xen. Hell. vi. 67.) the Thebans again marched into Thessaly at the head of a force, to protect Larissa and the other cities of the Peloponnesus, and to avenge the projects of Alexander of Phassae, who had been also in league with Pylepos and other cities, to whom he had given his protection for peace; and Pylepos, after arranging the defection of Thessaly, marched into Macedonia, where the young king had been lately assassinated. Pylepos, the regent of the kingdom, was also compelled to make peace with Pylepos, and to give up his hostages, among whom was the young king. (Diod. xvi. 73.) Pylepos, c. 26.) By these means the Thebans were extended over the greater part of Thessaly. Two years afterwards (A.D. 364) the Thebans obtained from the Persian court a report concerning the Thesmophoria in the same year, Pylepos, accompanied by the other cities, visited Thessaly with the view of attacking the Pharsalians from Alexander of Pherae and the other Thessalian cities. (Xen. Hell. vi. 1.) He was inured to the Thebans to join them in attacking the Macedonian camp. But Jason's policy was to prevent any other power from obtaining the preponderance in Greece, and accordingly upon his arrival at Leuctra he advised the Thebans not to drive the Macedonian troops to despair, and obtained a truce for the latter, which enabled them to secure their safety by a retreat. (Xen. Hell. vi. 4. §§ 20, 21.)
by the soldiers to take the command. So greatly was Alexander strengthened in his power by this failure that all the Thessalian cities submitted to him, and the influence of Thebes in Thessaly was for a time destroyed. Subsequently a second expedition was sent against Thebes. Thebes was conquered by Epiamnondas, who compelled the tyrant to release Pelopidas and Ismenias, but without restoring Thebes to the commanding position which she had formerly held in Thessaly. (Diod. xv. 71—75; Plut. Pelop. 27—29; Cornel. Nep. Pelop. 5; Paus. i. 15. 1.) The continued oppressions of Alexander of Pherae became intolerable. Thebes determined to move, to be more applied to Thebes for assistance. Accordingly in B.C. 364 Pelopidas was again sent into Thessaly at the head of a Theban army. In the first engagement Pelopidas was slain, but Alexander was defeated. (Diod. xv. 80, 81; Plut. Pelop. 31, 32; Cornel. Nep. Pelop. 5; respecting the different expeditions of Pelopidas into Thessaly, as to which there are discrepancies in the accounts of Greece, vol. z. p. 361, note, p. 391, note.) The death of Pelopidas, however, proved almost fatal to Alexander. Burning to revenge his loss, the Thes- ban sent a powerful army into Thessaly, which compelled him to renown his supremacy in Thessaly, to confine himself to Pherae, and to submit to all the demands of Pherae. Pherae had now a separate existence, and supremacy. (Diod. xvi. 14; Plut. Pelop. 35.) Meanwhile Philip, who had ascended the throne of Macedon in B.C. 369, had been steadily extending his dominions and his influence; and the Aeolads of Larissa had recourse to him in preference to Thebes. Accordingly Philip marched into Thessaly in B.C. 353. Lyco- phron, unable to resist him, invoked the aid of Onomarchus and the Phocians; and Philip, after a severe struggle was driven out of Thessaly. (Diodor. xvi. 35.) In the following year Philip returned to Thessaly, and gained a signal victory over Onomarchus and Lycothron. Onomarchus was slain in the battle; and when Philip followed up his victory by laying siege to Pherae, Lycothron surrendered the city to him, upon being allowed to retire to Phocis with his mercenaries. (Diodor. xvi. 37.) Thus ended the powerful dynasty of the tyrants of Pherae. Philip established a popular government at Pherae (Diod. xvi. 38), and gave nominal independence to the Thessalian cities. But at the same time he garrisoned Magnesia and the port of Pagasea with his troops, and kept steadily in view the subjugation of the whole country. An attempt made in B.C. 344 to restore the dynasty of the tyrants at Thessaly was made by an opportunity of carrying his designs into effect. Not only did he garrison Pherae with his own troops, but he revived the ancient division of the country into four tetrarchies or tetrarchiae, and placed at the head of each some of the chiefs of the Aeolads, who were entirely de- voted to his interests. The result of this arrange- ment was the entire subjection of Thessaly to Philip, who drew from the country a considerable addition to his revenues and to his military resources. (Har- pocrat. s. v. Terpac; Dem. Olynth. i. 33; Strab. i. p. 440; Thirillon, Hist. of Greece, vol. vi. pp. 12—14.) Upon the death of Philip the Thessalians were the first of the Greek people who promised to support Alexander in obtaining the supremacy of Greece. (Diod. xvii. 4.) After the death of Alexander the Thessalians took an active part with the other Gre- cian states in attempting to throw off the Macedonian yoke, but by the victory of Antipater they were again united to the Macedonian monarchy, to which they remained subject till the defeat of Philip by the Romans at the battle of Cynoscephalae, B.C. 197. The Roman senate then declared Thessaly free (Liv. xxxiii. 32); but from this time it was virtually under the sovereignty of Rome. The government was vested in the hands of the more wealthy persons, who formed a kind of senate, which was accustomed to meet at Larissa. (Liv. xxxiv. 52, xxxvi. 9, allii. 38.) When Macedonia was reduced to the form of a Roman province, Thessaly was incorporated with it. (Strab. xvii. p. 840.) Under Alexander Severus it formed a separate province governed by a procurator (Gruter, Juvenc. p. 474. 4); and in the later consti- tution of the Empire after the time of Constantine, it also appears to have been a separate province of the administration of a praeses. (Not. Dig. i. p. 7; Böcking, l. p. 151; Marquardt, in Becker's Résum. Alterthum. vol. iii. pt. i. p. 117.)

In giving an enumeration of the Thessalian tribes and cities, we will first describe the four tetrarchies already mentioned, and then take the other divisions of the country.

1. Hestiasotis or Hestiatotis (Ἑστιασωτις, Ἱστιασωτις), inhabited by the Hestiasots (Ἑστιασωταῖ), was the northern part of Thessaly, of which the Peneus may be described in general as its southern boundary. It occupied the passes of Olympus, and extended westward as far as Fundus. (Pline. iv. 1; Strab. i. p. 440, 437, 438.) It was the seat of the Perrhaebi, a solitary Pheriside tribe, which possessed in historical times several towns strongly situated upon the mountains. They are mentioned by Homer (Il. i. 749) as taking part in the Trojan War, and were regarded as genuine Hellenes, being one of the Amphictyonic states (Aschin. de Fals. Leg. p. 122). The part of Hes- tiasotis inhabited by them was called the Perrhaebi, but it never formed a separate Thessalian province. The Perrhaebi are said at one time to have extended south of the Peneus as far as the lake Boebeis, but to have been driven out of this dis- trict by the mythical race of the Lapithae. (Strab. i. p. 438, 440.) It is probable that at an early period the Perrhaebi occupied the whole of Hestiasotis, but were subsequently driven out of the plain and confined to the mountains by the Thessalian con- querors from Thessprotia. Strabo states that Hes- tiasotis, was formerly, according to some authorities, called Doris (ix. p. 457), and Herodotus relates that the Dorians once dwelt in this district at the foot of Mt. Ossa and Olympus (i. 125). It is not known how the name of Hestiasotis from the district of this name in Euboea, the inhabitants of which were transplanted to Thessaly by the Perrhaebi (Strab. i. p. 437); but this is an unconfirmed statement, proba- bly founded alone upon similarity of name. Homer mentions another ancient tribe in this part of Thessaly called the Aubhectes, who are placed by Strabo upon
the Thessalian side of Pindus near the sources of the Peneus. They are described as a barbarous tribe, living by plunder and robbery. (Hom. II. ii. 744; Strab. vii. p. 327, i. p. 434; Steph. B. s. v. Alburna.) The towns of Hestiaeotis were: OXTHINIA, PIAIA, ARGONIUM, MELIBOIA, PHALORIA, ERMICINIUM, PERSEPHAION, TRICHA, OURANIA, SALA, COMPEI, THE cult of Poseidon, KERAMEON, PITHEUM, LOMON, MARLA, MANNON, CYRIL, DITE, ERMIT, OLOS, ASION, DOLION, PYTHIUM, ELONE subsequently Leimono, EUSDIERI, LAPAFIDUS, GONIUS or GONIA, CHARAX, CONDILOY, PHALAMNA, OXTHIES, ATRAX.

2. PELASGIOTIS (Πελασγοίτης), inhabited by the Pelasgiotai (Πελασγοίται) of the Pelasgiota (Πελασγοίται), extended S. of the Peneus, and along the western side of Pelion and Ossa, including the district called the Pheacian plain. (Strab. i. p. 443.) The name shows that this district was originally inhabited by Pelasgiots; and its chief town was Larissa, a well-known name of Pelasgian cities. The towns of Pelasgiotai were: ELATEA, MOFIS, METroachy, BUPHAINOPOLIS, CYRULA, LEBRA, SYCION, CHAMA, AMYRIUS, ARMENIUM, PHERAE, CYTISCOPHAEAE, SCOTISSA, PALAPHARUS.

3. THESSALIOITIS (Θεσσαλοιτίτης), the central plain of the Thessaly and the upper course of the river Peneus, so called from its having been first occupied by the Thessalian conquerors from Epeirus. Its principal cities were: THESMOPOLIS, KERAMEON, PERSEPHAION, CERECUM, EUCHYDIDUM, PHARALUS, the most important in the district, THETIDUM.

4. PHYTHIOITIS (Φυθιωτίτης), inhabited by the Achaeans Phthiotai (Ἀχαιοὶ Φυθιόι), under which name they are usually mentioned as members of the Amphictyonic league. This district, according to Strabo, included the southern part of Thessaly, extending from the Malacian gulf on the E. to Dolopia and Mount Pindus on the W., and stretching as far N. as Pharsalus and the Thessalian plains. (Strab. i. p. 430.) Phthiotis derived its name from the Homeric Phthias (Φθίας, II. i. 155, ii. 683), which appears to have included in the heroic times not only Hellas and Dolopia, which is expressly called the territory of Phthias (II. i. 484), but also the southern portion of the Thessalian plain, since it is probable that Phthis was also the ancient name of Pharsalus. (Leake, Northern Greece, vol. iv. p. 484, seq.) The cities of Phthiotis were: Amphaeum (Scylax, p. 35), or Ampheas (Ἀμφέας, Steph. B. s. v.), on the promontory Pyrrha and on the Pagasaean gulf; THERAE, ERMITIA, PHTLACH, ITON, HALUS, PTELEUM, ANTRON, LARIBA, CHERMAST, PHROKRA, PHAS, NARTHACUS, THAUMACI, MELITARA, CORBOCA, XITHIA, LAMIA, PHALARA, ECHIDUS.

5. MAGNESIA (Μαγνησία), inhabited by the Magnetes (Μαγνητείς), was the long and narrow slip of country between Ossa and Pelion on the W. and the sea on the E., and extending from the mouth of the Peneus on the N. to the Pagasian gulf on the S. The Magnetes were members of the Amphictyonic league, and were settled in this district in the Homeric times. (III. ii. 756.) The Thessalian Magnetes are said to have joined the Asiatic cities of Magnesia on Mt. Sibas and of Magnesia on the river Massander. (Aristot. op. Athen. p. 173; Conon, 29; Strab. xiv. p. 647.) The towns of Magnesia were: CERECINIUM, BORES, GLYPHRAE, ARBONES, PA-
THESALONICA.

between Copes Vardër and Karadhera. On the edge of this basin is the city, partly on the level shore and partly on the slope of a hill, in 40° 38′ 47″ N. lat., and 23° 57′ 25″ E. long. The present appearance of the edifice is disturbed by Leake, Holland, and other travellers as very imposing. It rises in the form of a crescent up the declivity, and is surrounded by lofty whitened walls with towers at intervals. On the E. and W. sides of the city ravines ascend from the shore and converge towards the highest point, on which is the citadel of the city. The road of Conon of Tyre (A.D. 260?) to Thessalonica from the sea is given by Cosmas Indicopleustes. The port is still convenient for large ships, and the anchorage in front of the town is good. These circumstances in the situation of Thessalonica were evidently favourable for commanding the trade of the Macedonian sea. Its relations to the inland districts were equally advantaged. With one of the two great levels of Macedonia, viz., the plain of the "wide-flowing Axios" (Hom. Hym. ii. 849), to the N. of the range of Olympus, it was immediately connected. With the other, viz., the plain of the Strymon and Lake Cerusitius, it communicated by a pass across the neck of the Chalcidice peninsula. Thus Thessalonica became the chief station on the Roman Via Egnatia, as well as the last resting-place of the traders of Illyricum. Its distance from Pella, as given by the Itineraries, is 27 miles, and from Amphipolis (with intermediate stations; see Act. Apost. xvii. 1) 67 miles. It is still the chief centre of the trade of the district. It contains a population of 60,000, or 76,000, and (though Adrianople may possibly be lessened) still the chief city of the "Great Roman Colony" of European Turkey, next after Constantinople.

2. NAME.—Two legendary names, which Thessalonica is said to have borne in early times, are Emathia (Zenon Hist. xii. 26) and Hallea (Steph. B. a. v.), the latter probably having reference to the maritime position of the town. During the first period of its authentic history, it was known under the name of Therma (Therma Aisch.; Θερμαευς, Hist. Thucyd.; Θερμας, Mal. Chronog. p. 190, ed. Bonn.), derived, in common with the designation of the gulf (Thermacius Sinus), from the hot salt-springs, which are found on various parts of this coast, and one of which especially is described by Pococke as being at a distance of 4 English miles from the modern city. (See Strabo, vi. 520, ed. Gell.) Three crises are told of the origin of the name Thessalonica. The first (and by far the most probable) is given by Strabo (vii. Epit. 10), who says that Thermia was rebuilt by Cassander, and called after his wife Thessalonica, the daughter of Philip; the second is found in Steph. B. (a. v.), who says that its new name was a memorial of a victory obtained by Philip over the Thessalians. (Hecatas. De Thess. ii. p. 51, ed Bonn.); the third is in the Etym. Maga. (a. v.), where it is stated that Philip himself gave the name in honour of his daughter. Whichever of these stories is true, the new name of Thessalonica, and the new eminence connected with the same, are distinctly associated with the Macedonian period, and not with the period of the Greek colony, which was erected under Alexander, when the three cities of Mitylene, Thermus, and Potidaea were given to the Macedonians as a reward of their services during the war with the Persians. (Dion Cass. xii. 20.) The city was on the south coast of Macedonia, and was the capital of the second of the four divisions of Macedonia (ib. xiv. 29). Afterward, when the whole of Macedonia was reduced, it was held by the Romans as a military station, and was the capital of the Roman province of Flory. (Flor. ii. 14.) Thessalonica was its most important city, and virtually its metropolis, though not so called till a later period. (Macedonia.) Cicerone, during his exile, found a refuge here in the quaestor's house (pro Planc. 41); and on his journeys to and from his province of Cilicia he passed this way, and wrote several of his extant letters. During the first Civil War, Cicerone gave the head-quarters of the Pompeian party and the senate. (Dion Cass. xii. 20.) During the second it took the side of Octavius and Antonius (Plut. Brut. 46; Appian, B. C. iv. 118), and reaped the advantage of this course by being made a free city. (See Plin. L. c.) It is possible that the word Thesprotia, with the head of Octavius, tribune on some of the coins of Thessalonica, has reference to this circumstance (see Eckhel, ii. p. 79); and some writers see in the Vardar gate, mentioned below, a monument of the victory over Brutus and Cassius.

Even before the close of the Republic Thessalonica was a city of great importance, in consequence of its position on the line of communication...
between Rome and the East. Clever speaks of it as posita in greciae imperii aequo. It increased in size and rose in importance with the consolidation of the Empire. Strabo in the first century, and Lucian in the second, speak in strong language of the amount of its population. The supreme magistrates (apparently six in number) who ruled in Thessalonica as a free city of the Empire were entitled officiarius as we learn from this victory, to the co-incidence of St. Luke's language (Act. Ap. xviii. 6) with an inscription on the Vardar gate. (Böckh, 1857.) Belley mentions another inscription containing the same term.) In Act. Ap. xvii. 5, the ἕβασκε is mentioned which formed part of the constitution of the city. Tafel thinks that it had a Äthnisch also.

During the first three centuries of the Christian era, Thessalonica was the capital of the whole country between the Adriatic and the Black Sea; and even after the founding of Constantinople, it remained practically the metropolis of Greece, Macedonia, and Illyricum. In the middle of the third century, as we learn from coins, it was made a Roman colony. This, with the growth of the city and widening this position against the barbarian invasions, which now became threatening. Thessalonica was the strongest safeguard of the Empire during the first shock of the Gothic invasions. Constantine passed some time here after his victory over the Samatians; and perhaps the second arch, which is mentioned below, was a commemoration of this victory, which Constantine is said to have constructed the port, by which we are, no doubt, to understand that he repaired and improved it after a time of comparative neglect. Passing by the dreadful massacre by Theodosius ( Gibbon's Rome, ch. xxvii.), we come to the Scyphian wars, of which the Gothic wars were only the prelude, and the brunt of which was successfully borne by Thessalonica from the middle of the sixth century to the latter part of the eighth. The history of these six Scyphian wars, and their relation to Thessalonica, has been elaborated with great care by Tafel.

In the course of the Middle Ages Thessalonica was the scene of sieges, and its history during this period is thus continually divided into three stages. On Sunday, July 29th, 904, the Saracen fleet appeared before the city, which was stormed after a few days' fighting. The slaughter of the citizens was dreadful, and vast numbers were sold in the various slave-markets of the Levant. The story of these events is told by Jo. Cemenista, who was courier-bearer to the archbishop of Thessalonica. From his narrative it has been inferred that the population of the city at this time must have been 290,000. (De Excidio Thessalonicensi, in the volume entitled Theophanes Continuatus of the Bonn ed. of the Byz. writers, 1838.) The next great catastrophe of Thessalonica was caused by a different enemy, the Normans. In 1081, the Greek fleet, under the command of Tancred sailed round the Morea to the Thracian gulf, while an army marched by the Via Egnatia from Dyrhachium. Thessalonica was taken on Aug. 15th, 1185, and the Greeks were barbarously treated by the Latins. Their cruelties are described by Nicetas Choniatis (de Andros, Commento, p. 885, ed. Bonn, 1835). The celebrated Eustathius was archbishop of Thessalonica, and made the city at this time; and he wrote an account of this capture of the city, which was first published by Tafel (Tübingen, 1832), and is now printed in the Bonn ed.

of the Byz. writers. (De Thessalonica a Latini captis, in the same vol. with Leo Grammaticus, 1842.) Soon after this period follows the curious history of western feudalism in Thessalonica under Boufica, marquis of Montferrat, and his successors, during the first half of the 13th century. The city was again under Latin dominion (having been sold by the Greek emperor to the Venetians) when the Latin empire was taken by the emperor Manuel II., in 1453. This event also is described by a writer in the Bonn Byzantine series (Joannes Ammognotas, de Thessaloniciensis Excidio Narratio, in the same volume with Phrantzes and Cananne, 1838).

For the medieval history of Thessalonica see Mr. Finkley's works, Medieval Greece (1851), pp. 70, 71, 135-147; Byzantium and Greek Empire, vol. i. (1853), pp. 315-333, vol. ii. (1854), pp. 182, 294—266, 607. For its modern condition we must refer to the travelers, especially Beauchamp, Cansinny, Holland, and Leake.

4. ECCLESIASTICAL HISTORY. — The annals of Thessalonica are so closely connected with religion, that it is desirable to review them in this aspect. The first mention of the episcopate is in 452, when all the large cities of the provinces which had formed his empire. Hence there is no doubt that in the first century of the Christian era they were settled in considerable numbers at Thessalonica; indeed this circumstance contributed to the establishment of Christianity there by St. Paul (Act. Ap. xvi.), who says that a large community of Jews has been found in this city ever since. They are mentioned in the seventh century during the Scyphian wars; and again in the twelfth by Eustathius and Benjamin of Tudela. The events of the fifteenth century had the effect of bringing a large number of Spanish Jews to Thessalonica. Paul Lucas says that in his day there were 30,000 of this nation here, with 22 synagogues. More recent authorities vary between 10,000 and 20,000. The present Jewish quarter is in the south-east part of the town.

Christianity, once established in Thessalonica, spread from it in various directions, in consequence of the mercantile relations of the city. (1 Thess. iii., 1.) In the fourth century, the city was the bulwark, not simply of the Byzantine Empire, but of Oriental Christendom, and was largely instrumental in the conversion of the Slavonians and Bulgarians. Thus it received the designation of "The Orthodox City." It is true that the legends of Demetrius, its patron saint (a martyr of the early part of the fourth century), disfigure the Christian history of Thessalonica; in every siege success or failure seems to have been attributed to the granting or withholding of his favour: but still this see has a distinguished place in the annals of the Church. Theodosius was baptized by its bishop; even his massacre, in consequence of the stern severity of Ambrose, is chiefly connected in our minds with Thessalonica. In 1184, when Thessalonica became almost a.patriarchate after this time; and the withdrawal of the provinces subject to its jurisdiction from connection with the see of Rome, in the reign of Leo Isauricus, became one of the principal causes of the separation of East and West. Camenista, the native historian of the cada- men of the city, who he became archbishop of Thessalonica, and who, according to Eustathius, who was archbishop in 1185, was, beyond dispute, the most learned man of his age, and the author of an invaluable commentary on the Iliad.
and Odyssey, and of theological works, which have been recently published by Tafel. A list of the Latin archbishops of Thessalonica from 1205 to 1418, when a Roman hierarchy was established along with Western feudalism, is given by Le Quien (Oras Christianus, iii. 1089). Even to the last we find this city connected with questions of religious interest. Synxon of Thessalonica, who is a chief authority in the modern Greek Church on ritual subjects, died a few months before the fatal siege of 1430. His work was published along with that of his father, and, as a Latin ecclesiastic, became the translator of Aristotle, Theophrastus, and Hippocrates, was a native of the city of Deme- trius and Eustathius.

5. REMAINS OF ANTIOCHITY. — The two monuments of greatest interest at Thessalonica are two arches connected with the line of the Via Egnatia. The course of this Roman road is undoubtedly preserved in the long street which intersects the city from east to west. At its western extremity is the Vardar gate, which is nearly in the line of the modern wall, and which has received its present name from the circumstance of its leading to the river Vardar or Axios. This is the Roman arch believed by Besançon and Hauzard to have been decorated by the people of Thessalonica in honour of Octavius and Antonius, and in memory of the battle of Philippi. The arch is constructed of large blocks of marble, and is about 13 feet wide and 18 feet high; but a considerable portion of it is buried deep below the surface of the ground. On the outside face are two bas-reliefs of a Roman character, the one representing and the other a horse in a chariot. On this arch is the above-mentioned inscription containing the names of the polisarch of the city. Leake thinks from the style of the sculpture, and Tafel from the occurrence of the name Flavius in the inscription, that a later date ought to be assigned to the arch. (A drawing of it is given by Cousiné.) The other arch is near the east end of the city, and is also described by Cousiné as representing and by mistake, to be near the western extremity of the main street. (A drawing of this arch also is given by Cousiné and an imaginary restoration by Fococks.) It is built of brick and faced with marble, and formerly consisted of three archways. The sculptured camels give an Oriental aspect to the monument, and it is generally supposed to commemorate the victory of Constantine over Licinius or over the Saratians.

Near the line of the main street, between the two above-mentioned arches are four Corinthian columns supporting an architrave, above which are Caryatides. This monument is now part of the house of a Jew; and, from a notion that the figures were petrified by magic, it is called by the Spanish Jews Los Incantados. The Turks call it Suveh-Malak. (A view will be found in Cousinéy, and a more correct one, with Architectural details, in Stuart and Revett's Athen. Antiq., vol. iii. ch. 9. p. 53.) This colonnade is supposed to have been part of the Propylaen of the Hippodrome, the position of which is believed by Beaujour and Clauzel to have been in the south-eastern part of the town, between the sea and a building called the Rotunda, now a mosque, previously the church Ekati-Metropolis, but formerly a temple, and in construction similar to the Pantheon at Rome. (Fococks has a ground-plan of this building.) Another mosque in Thessalonica, called Ekati-Djema, is said by Beaujour to have been a temple consecrated to Venus Thermes.

The city walls are of brick, and of Greek construction, resting on a much older foundation, which consists of hewn stones of immense thickness. Everywhere are broken columns and fragments of sculpture. Many remains were taken in 1430 to Constantinople. One of the towers in the city wall is called the Tower of the Statute, because it contains a colossal figure of Thessalonica, with the representation of a ship at its feet. The castle is partly Greek and partly Venetian. Some columns of verd antique, supposed to be relics of a temple of Heraclius, are to be noticed there, and also a solid circular triumphal arch, erected (as an inscription proves) in the reign of Marcus Aurelius, in honour of Antoninus Pius and his daughter Faustina.

In harmony with what has been noticed of its history, Thessalonica has many remains of ecclesiastical antiquity. Leake says that in this respect it is perhaps the most interesting city in Greece. The church of greatest interest (now a mosque) is that of St. Sophia, built, according to tradition, like the church of the same name at Constantinople, in the reign of Justinian, and after the designs of the architect Anthemius. This church is often mentioned in the records of the Middle Ages, as in the letters of Pope Innocent III. It is the thirteenth church built with the space occupied by the magnificent structures then being erected. Tafel has collected with much diligence the notices of a great number of churches which have existed in Thessalonica. Dapper says, that in his day the Greeks had the use of thirty churches. Walpole (in Clarke's Travels, iv. p. 349) gives the number as sixteen. All travelers have noticed two ancient pulpits, consisting of "single blocks of marble, in small steps out in them," which are among the most interesting ecclesiastical remains of Thessalonica.

6. AUTHORITIES. — The travelers who have described Thessalonica are numerous. The most important are Paul Lucas, Second Voyage, 1703; Fococks, Description of the East, 1743—1745; Cousiné, Reise in die Ionischen Inseln, 1781; Clarke, Travels in Greece, 1817; and Zaraehil, Reise in den Orients, 1840; Gresbach, Reise durch Rumelia, 1841; Bowen, Mount Athos, 1855.

In the Mémoires de l'Académie des Inscriptions, tom. xxxviii. Sect. hist. pp. 121—146, is an essay on the subject of Thessalonica by the Abbé Belley; but the most elaborate work on the subject is that by Tafel, the first part of which was published at Tübingen in 1835. This was
afterwards reprinted as "Prolegomena" to the *Dis-
seratio de Thessalonicia etipsae Agro Geographica*,
Berlin, 1839. With this should be compared his
work on the *Vita Eustathii*. To these authorities we
could have added the introduction to some of the com-
mentaries on St. Paul's Epistles to the Thessalonians,
—especially that of Kiriakos (Berlin 1849) and Littmann (Göttingen, 1850).

[ J. S. H.]

THESTIA. [THESTIENSIS.]

THESTIENSIS (STIERNER, Pol. v. 7), are usually
called the inhabitants of a town Thesitia in Aetolia.
But no town of this name is mentioned by the ancient
writers, and it is not improbable that the
town itself was called Thessia. The name occurs
only in Polybius, Gennadius, and twice in the place
of the place is unknown. We only learn, from the narrative of
Polybius, that it was situated in the Northern part
of the upper plain of Aetolia. The name is per-
haps connected with Thessinia, one of the old Aeto-
lian heroes.

THESSALIA (STERLING, Strab. ix. p. 451; Poly.
v. ill. 3, 4; STERLING, Enip. Androm. 20;
STERLING, Steph. B. a. e.; E. GRÖN, a place in
Thessaly, close to Pharsalus, where Flamininus
encamped at the end of the second march from
Pharsae towards Scothinus, before the battle of
Cyno-

THESOLOVIA, one of the chief towns of the
Athenians in Epirus, is identified by Leake with the
modern Thadhevias, a village situated near
Mount Tammérlos in a pass which leads from the
Acheloos to the Arachthos.

(Liv. xxxvill. 1; Leake, ii. 16; T. C., ii. 2; Schenkl, where, according to the accounts of
the Chinese themselves, the first kingdom of Sin, or
China, was founded. (Cf. Ritter, Erdkunde, ii. p. 199.)

THIABUS, a place of Thessaly, near the frontiers
of Dolia. (Liv. xxxiil. 13.)

THIAPRUSOFON. [PHOENICIA, p. 806, a.]

THEVESTE (SCOTTI, Pol. iv. 3, § 30), an impor-
tant town of Numidia, but which is only mentioned
in the later writers. It was a Roman colony (Gruter,
p. viii. 380, 27, and the place where
many roads running in a SE. direction into the Roman
province of Africa, had their commencement. (Cf.
Itin. Ant. pp. 33, 46, 47, 53, 54.) It is the town of
Tebeia, recently discovered by General Negrier, a
considerable ruins of which still exist, especially the
central walls, the circumference of which indicates
a town capable of containing 40,000 inhabitants.
(See Lebron, in Rev. Archéol. iv. p. 360, sqq.;
Sur l’Airo de Triomphe de Teveste, gî, Paris, 1847;
Jahn’s Jahrbiicher, lii. p. 409.)

[THI.]

THIAC. [THIAK.]

THIANNICE (SIEVRE, Arrian, Per. P. Exx
p. 7), or THIANITICUS (SIEVRE, Anon. Per. P.
Exx. p. 14), a district of Asia in the Pontus Euxinus,
which contains the river Ohites. Its name probably should be Sannice, as the Sani,
or Tani, were a well-known people in this region.
(Cf. Mannert, iv. p. 378, vi. p. 2. p. 421; Gail, ad
Arrian. p. 95.)

[THI.]

THIB, a town of the Ctenenses in Hispania
Tarracoensis, between Carthago Nova, and Illic (Itin.
Adan. p. 14), and identified with Sam Oenis, and
Orithocerca, near which latter place are many ruins.

[THI.]

THIBA (SIEVRE: Richter, Did. Herodian, a town in Pontus,
called from an Amazon slain there by Hercules.
The inhabitants were said to be sorcerers, whose
breath was poisonous, and who would not perish if
thrown into the water, but who would float on
the surface. (Eustath. ad Dionys. Per. 528; Steph. B.
a. e. Quid. Fine. Supp. v. 7. § 1; Philarch. s. p.
Phil. vii. 2. a. 2.)

THILSAPRA (Amm. Marc. xxiv. 8), a fortifi-
cation in the district of Meroe, probably the present
Teil el Hamva, between Moeos and the Sisra,
in the neighbourhood of the Tgrisa.

[TV.

THILUTHRA, an impregnable fortress on an
island in the Euphrates, near Anatho, which de-
ferred the arms of Julian (Amm. Mare. xxiv. 32).
Zain-

Thisus (iii. 15) speaks of this island, and of the
impregnable fortress (φρονομακρινη χωρογραφή) sit-
uated upon it, but Tychon, or Teix, in its name. It
is described by Isidorus Charax (Mans. Perk.
§ 1, ed. C. Müller) as an island in the Euphrates,
containing a treasury of the Parthians, and distant
two schoeni from Anatho. The old editions read
'Ολασσος, but the MSS. have 'Ολασσος, which
Müller has changed into Thalasseus, and there can be
no little doubt of the propriety of this correction.
It corresponds to the island called Tēwos by
Chesney (vol. i. p. 57), and in his map Tellas or
Antilus, containing ruins of very ancient build-

(See Müller, ad Isid. Char. I. c.)

THINAE (Σινα, or Σινα, Pol. v. 3, § 30, vii.
27. § 12), or THINA (SEVRE, Arrian, Per. M. Eurik.
295, 10, 6), a town of Helicon, bordering upon the
country of the Thespians and Corinthians. (Cf. ix.
411.) Thisbe is mentioned by Homer, who says that it abounds in wild
pigons (ιλαρφετρατος τε Θιηου, II ii. 503), and
both Stephano and Stephanus B. remark that this
ephet was given to the city from the abundance of
wild game. The country, therefore, was called
Xenicus, on account of its being remarkable for its
wild fowls. The modern name of Clemomuras marched therefore through the
boundary of Thespius, and there it was that
placed which would be inundated by the water flowing into
it, where it was not for a mole or causeway constructed
through the middle, by means of which the water is
diverted every year into the part of the plain lying

THISBE.
on one side of the causeway, while that on the other is cultivated. The ruins of Thiese are found at 
Kabésia. "The position is between two great 
summits of the mountain, now called Karouniá and 
Pálovos, which rise majestically above the vale, 
clothed with trees in the upper part, and covered 
with snow at the top. The modern village lies in 
a little hollow surrounded on all sides by low cliffs 
connected with the last falls of the mountain. The 
walls of Thiese were about a mile in circuit, follow-
ing the crest of the cliffs which surround the village; 
they are chiefly preserved on the side towards 
Longárs. The masonry is for the most part of the fourth 
order, or faced with 
equal layers of large, oblong, quadrangular stones on 
the outside, the interior as usual being filled with 
loose rubble. On the principal height which lies 
towards the mountain, and which is an entire mass 
of rock, appear some reparations of a later date than 
the rest of the walls, and there are many Helenic 
foundations on the face of this rock towards the 
village. In the cliffs outside the walls, to the north-
west and south, there are many sepulchral execava-
tions." (Leake, Northern Greece, vol. ii. p. 506.)
Leake observed the mole or causeway which Pausa-
nides describes, and which serves for a road across 
the marsh to the port. The same writer remarks that, 
as the ascent of this mole is not easy, and the heights, 
there is no issue for the river which rises in 
the Ascaran and here terminates. "The river crosses 
the causeway into the marsh by two openings, the 
closing of which in the winter or spring would at 
any time cause the upper part of the plain to be in-
undated, and leave the lower fit for cultivation in 
the summer; but as the river is now allowed to flow 
constantly through them, the western side is always 
in a state of marsh, and the ground has become much 
higher on the eastern side."

The port of Thiese is now called Pityg. The 
shore is very rocky, and abounds in wild pigeons, as 
Strabo and Stephanus have observed; but there is also 
a considerable number as Kabésia itself. The 
Khoston of the Persians, mentioned by Herodotus, 
Hérsis "Phæus, Herod. ii. 168; Aristides, 
Aegypt. vol. iii. p. 610; Ptol. iv. 5 § 51), the 
modern Thoise, was a town in Lower Egypt, 
situated upon an canal of the Nile, between its Tanite 
and Mendesian branches. It was the capital of the 
Thoise Nome, in which the Calaonian division of 
the Aegyptian army possessed lands. At the time of 
the Persian War the Helotes, who had been 
incorporated with the Mendesian. Their 
corporation was doubtless owing, partly to the 
supreme size of the latter, and partly to their having 
a common object of worship in the goat Mendes 
(Pun), of whom Thoise was the old Aegyptian 
language (Hieromyn. in Isid. xiv. 1) the appella-
tion. In the reigns of Vælentian and Theodosius 
the Great (A.D. 375, 392) Thoise was a town of 
some consequence, governed by its own magistrates, 
and exempt from the jurisdiction of the Alexandrian 
prefect (Amn. Marc. xxiii. 16 § 5). It was also 
an episcopal see, and one of its bishops, Serapion, 
is mentioned by Hieracenses. (ap. Phot. p. 65, ed.

Bekker.) Remains of the ancient city are suppos-
et to exist at Tel-boysai or Tnuq, SW. of Maspourah. 
A monolithic shrine and many sarcophagi of granite 
have been found there, and a fabulous mound at 
the village of Ternou, raised above the level of the 
 inundation, is probably an Aegyptian work. (Bekker, 
That dykes were essential to the preservation of 
the city appears from the description of it by Aristides 
(l. c. who represents Thoise as standing upon and 
围绕 by flat and marshy grounds. [W. B. D.]

THOAE. [ECHMADNA.]

THOANA.

THO'RÁIS or THO'ÁRÍUS (Θόρας or Θόραριος), 
a coast city in Pontus Seleuceicus (Arrian, 
Peripl. P. E. p. 16; Anon. Peripl. P. E. p. 11), is 
now called Gheourch, Irmach, or perhaps more cor-
rectly Tshur Gheurm. (Hamilton, Researches, i. p. 
279.)

[1. S.]

THOCNIA (Θωκνία, Θωκνία: Ekh. Gomenev), 
a town of Arcadia in the district Parthenias, situated 
upon a height on the river Aminias, which flows into 
the Helisson, a tributary of the Alpheus. The town 
was said to have been founded by Thocnus, the son 
of Lycon, and was deserted in the time of Pan-
samis, as its inhabitants had been removed to 
Megalopolis. It is placed by Leake in the position of 
Verionis in the Cynocephalas (Ptol. vi. 27. § 6; 4, 29; § 5; 

THOMNA. [TAMMA.]

THONITIS LACUS. [T%EFFITIS.]

THORAE. [ATTICA, p. 381, e.]

THORCUS (Θορκός: Ekh. Θορκός: Tharcho), a town of Attica on the SE. coast, and about 7 or 8 
 miles N. of the promontory of Sunium, was origi-
nally one of the twelve cities into which Attica is 
said to have been divided before the time of Theseus, 
and was afterwards a demus belonging to the tribe 
Acarnanias. (Strab. ix. p. 397.) It continued to 
be a place of importance during the flourishing 
period of Athenian history, as its existing remains 
prove, and was hence fortified by the Athenians in 
the 24th year of the Peloponnesian War (Thuc. 
iv. 2 § 1). It was distant 60 stadia from Anaplytus 
on the western coast. (Xen. de Vact. 4 § 43.)
Thoricus is celebrated in mythology as the residence 
of Cephalus, whom Eos or Aurora carried off to 
dwell with the gods. (Apollod. ii. 4 § 7; Eurip. 
Hippol. 455.) It has been conjectured by Words-
worth, with much probability, that the idea of 
Thoricus was associated in the Athenian mind with such 
a translation to the gods, and that the "Thorician 
stone" (Θορικός τάφος) mentioned by Sophocles 
(Oed. Col. 1595), respecting which there has been so 
much doubt, probably has reference to such a migration, 
as the poet is describing a similar translation of 
Oedipus.
The fortifications of Thoricus surrounded a small 
plain, which terminates in the harbour of the city, 
now called Porto Mandri. The ruins of the walls 
may be traced following the crest of the hills on the 
northern and southern sides of the plain, and cross-
ing it on the west. The acropolis seems to have 
stood upon a height rising above the sheltered creek of 
Franco (Limosinos, which is separated only by a 
cape from Porto Mandri. Below this height, on the 
northern side, are the ruins of a theatre, of a 
singular form, being an irregular curve, with one of 
the sides longer than the other. In the plain, to the 
westward, are the remains of a quadrangular colon-
ade, with Doric columns. (Leake, Demi of Attica, 4. ν. 4)
THORNAX.  p. 68, seq. 2nd ed.; Wordsworth, Athens and Attica, p. 308, seq.)

THORNAX (Θορναξ). 1. A mountain near the city of Helasia in Argolis, between which and Mt. Parn Ass the road ran from Hermione to Halicus. It was subsequently called Coccygium, because Zeus was said to have been here transformed into a cuckoo; and on its summit was a temple of Zeus Coccygios. (Paus. iii. 38. §§ 1, 2; Leka, Πελοποννησιας, p. 288; Curtius, Πελοποννησιας, vol. ii. p. 463.)

2. A son of Erymanthus, the road from Sparta to Selinus, upon which stood a colossal statue of Apollo Pythaeus. (Herod. i. 69; Paus. iii. 10. § 8; Stephan. B. s. w.; Leka, Πελοποννησιας, vol. ii. p. 534; Πελοποννησιας, pp. 348, 353; Boblaye, Rec. p. 75; Ross, Πολεοδομους, p. 190; Curtius, Πελοποννησιας, vol. ii. pp. 237, 259.)

THOSCIPIDA (Θοσκιπίδα, Ptol. v. 13. § 19, viii. 19. § 12), the capital of the district Thoscipidia. [T. H. D.]

THOSITIS (Θοσιτίς, Ptol. v. 13. § 18), a district of Armenia Major. It lay at the northern side of the lacus Thoscipides (ξ Θοσκιπίδα Νιόρ, Ptol. 30. § 7), through which the Tigris flowed (Plln. vi. 27. a. 31). It is perhaps the same lake called Thontias or Thosgias by Strabo (Θοσογάς ή Θοντιάς, vi. 27. a. 31); and, once again, to be divided into two parts, separated by the Haemonas; the portion to the south of that mountain, or the upper part of the Haemonas, was, in the time of Philip II. and his son Alexander the Great, the Haemonas (Strab. vii. pp. 322, 326; Pol. iii. 11), and the countries occupied by the Illyrians, on the W., where, however, the boundary was not very settled or accurately known. (Plln. and Mel. ii. 26.)

These were the limits of Thrace until the Romans subdued the country, when, in the reign of Augustus, it was divided into two parts, separated by the Haemonas; the portion to the south of that mountain, or the upper part of the Haemonas, was, in the time of Philip II. and his son Alexander the Great, the Haemonas (Strab. vii. pp. 322, 326; Pol. iii. 11), and the countries occupied by the Illyrians, on the W., where, however, the boundary was not very settled or accurately known. (Plln. and Mel. ii. 26.)

THIRA.  (Θήρια, Hom.; Θηρία, Herod. i. 165, or Θηρία, iv. 92; Attic, Θηρία, Euk. Θηρία, i. 10. § 8; Ael. i. 10. § 16, Θηρία, Θηρία, Θηρία, Θηρία; Thuk. Thrax, the last form being chiefly, if not exclusively, employed by gladiators, a country at the southern extremity of Europe, and separated from Asia by the Propontis and its two narrow channels, the Bosporus and the Hellespont.

I. NAME. — Besides its ordinary name, the country had, according to Steph. B. s. c., two older apppellations, Δέσφια and Ασιακί; and Gallias (vix. 6) mentions Sthenon as another. Respecting the origin of these names, various conjectures have been made both in ancient and in modern times; but as none of them, with the exception to be presently mentioned, are of much value, it is not worth while to devote any space to their consideration. * The exception is made by Strabo (Hist. Long. et Lit. of Anc. Greece, 1. p. 153, note), which is far more probable and satisfactory than any other that the present writer has seen, and which derives the name Thrasoe from the adjective τραχεῖος, "rugged," by the common transfer of the separate. Thus the name would indicate the geographical character of the various districts to which it is given; for, as we shall see, it was by no means confined to the country which is the special subject of the present notice.

II. EXTENT. — In the earliest times, the region called Thrace had no definite boundaries, but was often regarded as comprising all that part of Europe which lies to the north of Greece, Macedonia, in the west, is spoken by Hecataeus as belonging to it (cf. Mel. ii. 2, sub σιν, where the Chalcidice peninsula is described under the title of Thrace); and

* Those who are curious about such matters may consult Steph. B. s. w.; Eustath. ad Dion. Per. 322, 323; Sichler, Handb. p. 480; Benckel ad Steph. B. p. 400; Teuteke, ad Mel. ii. 2. p. 63; Krouck, Philol. Mus. i. p. 618.

THRAIA.  (Στρατιά, in the north, is included in it by Steph. B. (c. v. Χρειας: cf. Amm. xxvii. 4. § 3). This explains the failure reported by Androm (Teuta, ad Epelp. 594), as well as the Roman one that Oecumenus had been a Traia, Asia, Libya, Europe, and Thracia; thus elevating the last-named country to the rank of one of the four quarters of the known—or rather unknown—world. But as the Greeks extended their geographical knowledge, the designation Thracia became more restricted in its application, and at length was generally given to that region which is included within the following boundaries: the Ister on the N. (Strab. i. p. 139; Plin. iv. 18; Mel. ii. 3); the Euusine and the Bosporus on the E.; the Propontis, the Hellespont, the Aigeas, and the northern part of Macedonia, on the S.; the Strymon, or subsequently, i.e. in the time of Philip II. and his son Alexander the Great, the Nestus (Strab. vii. pp. 322, 326; Pol. iii. 11), and the countries occupied by the Illyrians, on the W., where, however, the boundary was not very settled or accurately known. (Plin. and Mel. ii. 26.)

These were the limits of Thrace until the Romans subdued the country, when, in the reign of Augustus, it was divided into two parts, separated by the Haemonas; the portion to the south of that mountain, or the upper part of the Haemonas, was, in the time of Philip II. and his son Alexander the Great, the Haemonas (Strab. vii. pp. 322, 326; Pol. iii. 11), and the countries occupied by the Illyrians, on the W., where, however, the boundary was not very settled or accurately known. (Plin. and Mel. ii. 26.)

* Even one of the latest travellers there, M. Viquesnel, commissioned by the French government, and contemnounced by the Turkish authorities, found it impossible to induce his guides to conduct him to a certain district which he wished to visit, although he offered to take as numerous an escort as they pleased. (See Archives des Missions scient. et lit. vol. i. p. 210.)
THRAcia.

it has been almost invariably engaged in
military enterprises, and too much occupied with
their immediate objects to have either opportunity or
inclination, even had they possessed the necessary
qualities. To describe the natural
features of the country. What adds to the
difficulty of the writer on the classical geography of Thrace
is the unfortunate loss of the whole of that portion
of the seventh book of Strabo which was
devoted to the subject. Strabo, in several parts of
his work, treats incidentally of Thrace; but this is a
partial and fragmentary view of a region of
which it has perished, and of which little more than a
table of contents has been preserved in the meagre
epitome which alone remains of it.

In modern times, several travellers have en-
deavoured, with various degrees of success, to explore
the country; and some of them have published the
results of their investigations; but it is evident from
their very frequent disagreement as to the sites of
the places which they attempt to identify with those
mentioned in ancient writers, that as yet the neces-
sary data have not been obtained; and the itiner-
aries, instead of assisting, seldom add to the
difficulty of the task, and render its accomplishment
almost hopeless. Moreover, the extent of country
embraced by the region of Rhodope is large. "The
mountainous region of Rhodope, bounded on the west
by the Strymon, on the north and east by the Hebrus,
and on the south by the Aegean, is a terra incognita,
extcept the few Grecian colonies on the coast. Few
few travellers have passed along or described the southern
or king's road; while the region in the interior, apart
from the heights, is unexplored until the visit of M. Viquesnel in 1847. (Grote, I. c.)
The results of this traveller's researches have not,
we believe, appeared in a complete and connected
form. His reports to the French minister by whom
he was commissioned are published in the work
already referred to; but most of them are mere out-
lines, written on the spot from brief notes. They
contain much that is valuable and interesting; but
no one except their author could make full use of
them; and it is to be hoped that he may be able to
employ the materials so ably collected in the com-
position of a work that would dispel much of the
obscenity that at present rests upon the country.
M. Viquesnel was engaged little more than a year in
the region of Thrace, with evident deficiency for complete
exploration; accordingly he seems to have devoted
his principal attention to its geology, especially of the
mountain systems, above all in the district of
Rhodope.

According to Ami Bone's chart of the geological
structure of the globe, copied in Johnston's Physicai
Atlas, the three principal geological formations in
Thrace are: (1) the crystalline schistos, comprising
all the granitic rocks; this occupies the
W. portion of the country, and a small district on the
Exunie, immediately S. of the Haemus; (2) the
tertiary, extending over the basin of the Hebrus;
(3) the primary stratifications, or the transition
series, including the carboniferous formations; this
occupies the W. part of the Haemus, and a region S.
S. of the Haemus, and W. of the tertiary formation above
mentioned. Near the sources of the Bourghes,
Viquesnel found volcanic rocks (p. 213).

The surface of Thrace is, on the whole, decidedly
mountainous, the vast plains spoken of by Virgil
Aeneid. III. 18) belonging to Moesia. From the great
range of Haemus, three chains of mountains branch
off towards the SE., and with their various rami-
fications occupy nearly the entire country. The
most westerly of these begins at the NW. extremity
of the boundary line, and soon separates into two
almost parallel ranges, and ends in the Apusenos,
which are separated from each other by the river
Nestus; the former filling up the whole space be-
tween that river and the Strymon, the latter the
district E. of the Nestus and SW. of the Hebrus.
Both Pangaenus and Rhodope extend down to the
coast of the Aegean, and the latter is continued
parallel to it as far as the Pseira islands. To the
offshoot of the Haemus branches off between the
sources of the Hebrus and the Tonora, and extends
to their junction near Hadrianopolis. The most
easterly chain diverges from the Haemus about 100
miles W. of the Excine, to the W. shore of which it
is nearly parallel, though it gradually approaches
nearer to it from N. to S.; it extends as far as the
Bosporus, and with its lateral offshoots occupies
nearly the whole country between the E. tributaries
of the Hebrus and the Exunie. The central and E.
ranges appear to have had no general distinctive
names; at least we are not aware that any occur in
ancient writers: the modern name of the most easter-
ly is the Strumfja-Dagh. A continuation of this
range extends along the E. side of the Propontis,
and is now called the Tekir-Dagh.
The loftiest peaks, among these mountains, belong
to Rhodope, and attain an elevation of about 8500
feet (Viquesnel, p. 325); the summits of the
Strumfja-Dagh, are 2600 feet high (Id. p. 314);
those of the Tekir-Dagh, 2300 (Id. p. 315); the
other mountains are from 1500 to 1500 feet high.
Id. pp. 314, 315). The Haemus is not
more than 4000 feet high, in that portion of it which
belongs to Thrace. It is obvious from these measure-
ments that the statements of some of the ancients
that the summits of the Thracian mountains were
covered with eternal snow (Sophocles, pseasia upbr纳斯,
Hom. IL xiv. 327), and that from the highest peak
of the Haemus the Adriatic and the Exunie could
be seen, are mere fancies. Strabo (vii. pp. 313, 317)
points out the inaccuracy of this notion. An in-
teresting account is given by Livy (x. 21, 22) of
the ascent of Haemus by Philip V., who shared in
the popular belief in question. Livy states plainly
enough his conviction that Philip's labour, which was
far from slight, was thrown away; but his and his
attendants were prudently silent upon the subject,
not wishing, says Livy, to be laughed at for their
pains. Yet Florus, who alludes to the same circu-
stances (ii. 12), but makes Perseus the mountain-
climber, assumes that the king's object was accom-
plished, and that the bird's-eye view of his domi-
nions, obtained from the mountain top, assisted him
in forming a plan for the defence of his kingdom,
with reference to his meditated war with Rome.
Mela too repeats the erroneous statement (ii. 2).
The main direction of the rivers of Thrace is from
N. to S., as might be inferred from the foregoing de-
scription of its mountain system. The Strymon forms
its W. boundary. In the lower part of its course,
it expands to a considerable width, and in this
Lake Cercurinatis, into which flowed a smaller river, the
Angites (Herod. vii. 113); next, towards the E.,
comes the Nestus; then, in succession, the Travus,
which falls into Lake Bistonias, the Schoenius, the
Hebrus, the principal river of Thrace, and lastly
the Melas. All these rivers fall into the Aegean.
Several small streams flow into the Hellespont and

Digitized by Google
The Propontis, of which we may mention Aegospota- 
tami, renowned, notwithstanding its insignificant size, 
the Asces, and the Erginos. The rivers which fall 
into the Euxine are all small, and few of them are 
distinguished by name in the geographers, though 
doubtless not so unhonoured by the dwellers upon 
their banks as was the Pliny (iv. 118) mentions 
the Pira and the Crossines. The Hebrus drains at 
least one-half, probably nearer two-thirds, of the en-
tire surface of Thrace; and on its banks, or on those 
of its tributaries, most of the level portions of the 
country are situated, as well as nearly all the inland 
towns. Its principal affluents are the Arda (in some 
maps called the Harpaea), and the Scamus on the W. 
and the Agrius on the E. coast. 

The Thracian coast of the Aegean is extremely ir-
regular in its outline, being broken up by bays 
which enter far into the land, yet appear to be of 
comparatively little depth. Most of them, indeed, 
are at the mouths of rivers, and have probably 
been filled up by alluvial deposits. It was perhaps 
for his reason that several of them were called 
Lakes, as if they had been regarded as belonging to 
the land rather than to the sea; e. g. Lake Cercinita, 
already mentioned, which seems, indeed, to have been 
left more than a marsh, and in Kleisph's map its 
size is so represented; Lake Bizontia, east of Abdera; 
and Skertheos Lake, at the mouth of the Hebrus. 
The gulf of Kekyra, formed by the northern shore of 
Theblos, forms the opposite coast of what may be 
called the mainland, is an exception to this de-
scription of the Thracian bays. The coast on the 
Propontis and the Euxine are comparatively un-
broken, the only gulf of any extent being Portus 
Hellodes, near Assohia, which is known in mod-
er times, by the name of the bay of Bosphorus, 
so called. The point on the Thra-
cian shore of which was regarded by the ancients as 
excessively dangerous. [SALMYDESSUS] 

The principal promontories were, Issaraum, Ser-
beum, Sarpedonium, and Mastatium, on the southern 
coast; Thynna and Hasami Extremas, on the eastern. 

For an account of one of the most remarkable parts 
of Thrace, see CHONOSPHASIS, Vol. I. p. 608. 

Off the coast on the western side are the islands of 
Thasos, Samothrace, and Imbros; the first is sepa-
rated from the mainland by a channel about 5 miles 
wide; the other two are considerably more distant from the 
shore.

The climate of Thrace is always spoken of by the 
ancients as being extremely cold and rigorous; thus 
Athenaeus (viii. p. 351) describes the year at Asess 
as consisting of eight months of cold and four months 
of winter; but such statements are not to be taken 
literally, since many of them are mere poetical 
exaggerations, and are applied to Thrace as the 
representative of the north in general. The Hasami 
was regarded as the abode of the north wind, and the 
climate of Thrace was believed to enjoy a beautiful 
and mild climate. (See Niebuhr, Echog. and 
Rhes. 440; Theophr. de Caus. v. 17; Virg. Georg. iii. 
350 seq.; Orv. Pont. iv. 10. 41, tb. 7. 8; Trist. iii. 
10; &c.). Even after making full allowance for the 
undoubted effect of vast forests, unshaded marshes, 
and very partial cultivation, in lowering the average 
temperature of a country, it is difficult to believe 
that a land, the northern boundary of which (i. e. of 
Thrace Proper) is in the same parallel of latitude as 
Tuscany and the Pyrenees, and the highest moun-
tains of which are less than 9000 feet above the 

level of the sea, can have had a very severe 
climate. That the winter was often extremely severe 
we have no doubt. The Hebrus was known as: 
over: not to dwell upon the "Hebrus vena vincentis" of 
Horus (Ep. i. 3, 3; cf. Varr. xiii. 381), and the epigrams, 
attributed to s. Cae- 

nus (see beginning), "Tubridus (Aelian, viii. 4) relates 
a campaign of Minucius in southern Thessaly in which 
his army were forced to 
cross that river on the ice. Xeniophus says 
that the winter which he passed in Thessaly in a 
mountainous district of the Tayus, was so severe 
even wine was frozen in the vessels, and the 
soldiers had to order the snow also lay deep upon the ground. As 
not this was not an exceptional season we may infer 
from Xeniophus's remarks on the area of th-

ecli the region which seemed to him to have been 
studded with special reference to the climate, and was 
from which such misfortunes as those which held the 
Greeks at the siege of 

Fortune in the early and severe winter of M. Aemilius 

the cause which prevented Poppaeus 

26) from following up his first success on 

bellies Thrace. * Pliny (xvi. 3) says 

bays and about Aenus were often injured by 

the Hebrus was brought nearer to the city; in 

which it is plain that the formation is due to ice and 

the floating ice and the cold water break up 

which would have some effect in lowering the 

perimeter of the immediate locality. [G.] describes Thrace generally as agreeable in 

climate nor in soil, being, except in a few places, 

near the sea, barren, cold, and very near the 

studies for wine and can only 

the wine, while the fruit even of the same 

be protected from the cold by a covering of snow 

in order to ripen. This last remark 

doubt upon the accuracy of the writer: to the 

ripening of the grapes from the direct rays of 

the sun in a place obviously more likely to prevent 

their arrival at maturity, and hence the 

production of wine. The noble 

to remove the leaves with a view to the day. 

However this may be, it is certain that 

it did produce wine, some kinds of which 

from very early times. Homer, who 

Thrace the epithet ῥωμαῖος (II. xx. 45) rep-

resents Nestor reminding Agamemnon that the 

ships bring to him cargoes of wine from the 

country every day (Ib. ix. 76); and the poet 

the excellence of the produce of the 

M. ares yards. (Od. ix. 107, seq.) Pliny (ix. 25) 

that this wine still maintained its repu-

tion as it describes it as black, perfumed, and 

with age; a description which agrees well with 

the name of "M. ares" or "M. ares" 

wine excellent. (Vesp. deum la Tyr. 

p. 25; see also, Athen. i. p. 31.) Tus

THRAcia.

To protect it, as he supposes, from the severity of the climate; by which also he accounts for the cultivation, in some parts of the country, of the *triticum trimestre* and *bimisce,* so called because those varieties were reaped in the third and second month respectively after they were sown. Corn was exported from Thrace, and especially from the Chersonesus to Athens (Theop. de Plantis, viii. 4; Lyce. de Dopp. p. 928), and to Rome (Plin. L.c.). Millet was also cultivated in Thrace (Asan. vii. 5. 12) states that on the march to Samothrace, Seuthes and his allies traversed the country of the "millet-eating Thracians" (cf. Strab. vii. p. 315). The less important vegetable productions of Thrace may be briefly mentioned: a species of water-chestnut (*brubus*) grew in the Strymon, the leaves of which were used by the people who lived on its banks to fatten their horses, while of its nuts they made a very sweet kind of bread. (Plin. xxii. 58, xxiii. 12.) Roses (*Rosa canina*) grew wild on the Pangaean, and were successfully transplanted by the natives (Id. xxii. 10). The mountains, in general, abounded in wild-thyme and a species of mint (id. xix. 55). A sort of mouse or rat was often seen wild, to have been trained in the game, to second the proceedings of their human associates (Th. ix. 36). Eels were caught at certain seasons in the Strymon (Ib. vii. 2, ad fin.). The sunny fishery was a source of great wealth to Byzantium. (Strab. vii. p. 320.)

The principal mineral productions of Thrace were gold and silver, most of which came from the mountainous districts of the country. There, at the southern extremity of the Pangaean, was situated Crenides, founded by the Thasians, and afterwards called Philippi, in a hill near which, named the hill of Dionysus (Appian, B. C. iv. 106), were the most productive gold mines of Thrace, to get possession of which was Philip's principal object in annexing the district in question to his dominions. He is said to have derived from the mines an annual income of 1000 talents. (Diod. xvi. 8; cf. Strab. vii. p. 323.) Strabo (iv. p. 680) says that the wealth of Cadmus came from the mines of the Pangaean; and Pliny refers to the same tradition when he states (vii. 57) that according to some authorities, the Pangaean was the place where Cadmus first discovered gold mines. He adds that the waters of Pelias were melted by the produce (*confutatas*) of the gold. Herodotus (vii. 112) mentions silver, as well as gold, mines in the Pangaean, which in his time were in the possession of the native tribes called Piers, Odomants, and Sarac. He states also (vi. 46) that the Thasians had gold mines at Scatie Byly, near Abdans, from which they derived an (annual) revenue of about 80 talents; and that a part of the revenues of Oeistaratrus came from the Strymon, by which the mines on its banks are probably meant (l. 64). (See also, ix. 75; Eurip. Rhes. 921; Strabo (or rather his epitomiser), vii. p. 331.) According to Pliny (xxxiii. 21) gold was found in the sands of the Hebrus; and this is confirmed by Paul Laurus (L. c.), and by Vignamani, who states (p. 204) that in rainy years the sand of that river are frequented by gold-finders, who wash the sands which contain gold in granes (*paillettes*). Thucydides was interested in gold mines and works near Amphipolis, as he himself informs us (iv. 105). Of the other minerals of Thrace we may mention the

The first point to be determined here is, whether the Thracians mentioned in the ancient writers as extending over many parts of Greece, as far south as Attica, were ethnologically identical with those who in historical times occupied the country which is the subject of the present investigation. And before discussing the topic, it will be convenient to lay before the reader some of the principal passages in the ancient historians and poets which bear on the subject.

It is Strabo (ii. 551. 2) who makes the most distinct statements on the point. He says (p. 551. 2): "But the Thracians, the Milesian states that, before the Hellespont, barbarians inhabited Peloponnesus. But in fact nearly all Greece was originally the abode of barbarians, as may be inferred from the tradition. The Thracians brought a people, with him into the country to which he gave his name, and Danans came to the same region with followers from Egypt, a time when the Dryopes, Cicones, Pelasgi, Leges, and other similar races had settlements within the limits; and indeed without it too, for the Thracians who accompanied Eumolpus had Attica and Thrace possessed Daulis in Thessalia; the Paeans inhabited the south of Cadmus occupied Thessaly, the Acanthians, Temnites, and Hyantes Boeotia." Strabo subsequently (ix. 401. 4) repeats this statement respecting Boeotia, and adds that the descendents of Cadmus and his followers, being driven out of Thessaly by the Thracians and Pelasgians, retired into Thrace. They afterwards returned, and, having received Attica from the Eumolpids, settled in their turn the Pelasgians and Thracians. The former went to Athens, where they settled at the foot of Hymettus, and gave the name of Pelasgiac to a part of the country (i.e. Hesiod. i. 53): the Thracians, on the other hand, were driven to Parosus. Again (ix. 410) he says, speaking of Helicon: "The shrine of the Muse, and Hippocrene, and the cave of the Leipturian nymphs are there; from which one would conjecture that those who consecrated Helicon to the Muse were Thracians; for they dedicated Pires, and Leibethrum, and Pimpla to the same goddesses. These Thracians were called Pierians (Tlipeis); but their power having declined, the Macedonians now called them "Thracians." Heraclid, (L.c.) remarks, with evident surprise, that the King's road had not, up to his time, been destroyed by the Thracians, a circumstance which he seems to attribute to the almost religious respect with which they regarded the "great king." It may be safely inferred that people who were considered to have done something wonderful in abstaining from breaking up a road, were not great makers or maintainers of highways; and it is clear from Livy's account of the march of Manlius (xviii. 44. 41) along this very road (afterwards called by the Romans, Via Egnatia, g. e.), that, although it was the principal line of communication between Europe and Asia, it was at that time (a. c. 188) in a very bad condition. From this it appears, that there must have been of the deplorable state in which the roads of the interior and mountainous districts must have been, and in which, indeed, they still remain. (Viguenel. p. 312.) The Thracians no doubt were well aware that their independence would soon be lost, if there were an easy access for disciplined armies to every part of their empire. Such paths as they possessed were sufficient for their own purposes of depredation, of ambush, and, when overpowered, of flight.

IV. ETHNOLOGY, MANNERS, RELIGION, ETC.—
manifest that at this early period, when there was scarcely any intercourse between different nations, or knowledge of foreign tongues, poets who sang in an unintelligible language could not have had more influence on the mental development of the people than the writings of birds."

Müller therefore concludes that the Thracians of the ante-historical era, and those of subsequent times, belonged to distinct races. "When we come to trace more precisely the country of these Thracian bands, we find that the traditions refer to Pieria, the district to the east of the Olympus range, to the north of Corinthia, and the south of Euboea or Macedonia; in Pityus likewise was Leibothra, where the Muses are said to have sung the lament over the tomb of Orpheus; the ancient poets, moreover, always make Pieria, not Thrace, the native place of the Muses, which last Homer clearly distinguishes from Pieria. (Il. xiv. 296.) It was not until the Pierians were pressed in their own territory by the early Macedonian princes that some of them crossed the Strymon into Thrace Proper, where Herodotus (vii. 112) mentions the castles of the Pierians at the time of the expedition of Xerxes. It is, however, quite conceivable that in early times, either on account of their close vicinity, or because all the north was =prentended under one name, the Pierians made common cause with the Thracians. These Pierians, from the intellectual relations which they maintained with the Greeks, appear to be a Greek race; which supposition is also confirmed by the Greek names of their places, rivers, fountains, &c., although it is probable that, situated on the limits of the Greek nation, they may have borrowed largely from the neighbouring tribes. (Müller, "Dissertations," vol. i. p. 472, 488, 501.)" After referring to the accounts of the Thracians in Southern Greece, Müller adds: "From what has been said, it appears sufficiently clear that these Pierians or Thracians, dwelling about Helicon and Parnassus in the vicinity of Attica, are chiefly signified when a Thracian origin is ascribed to the mythical heroes of Ancient Attica. Colonel Mure, after referring to the foregoing view, which he designates as "plausible," goes on as follows: "But the case admits of another, and perhaps more satisfactory explanation. It is certain that, in the mythical geography, a tract of country on the frontiers of Boeotia and Phocis, comprehending Mount Parthenus and Helicon, bore the name of Thracian. (See the etymology, c.) In this region the popular mythology also lays the scene of several of the most celebrated adventures, the heroes of which are called Thracians." The author then applies this explanation to the stories of Tereus and Proce, and of Lycurgus, "king of Thrace;" and proceeds thus: "Parthenus becomes the 'hard Thracian,' or truly a Phocian. He assigns him for mother a nymph of Parnassus called Argope. His father, Philaamon, is described as a native of the same region, son of Apollo, by the nymph Chione, and brother of Autolyctus, its celebrated robber chieftain. The divine grandair is obviously here but a figure of his own sacred region; the grandairy is usually, as it seems, the snow. Others call the latter heroine Leucodis. The names of these heroines are all so many varied modes of typifying the same 'snow-white' Parnassus. This view of the 'Thracian' character of these sages becomes the more plausible, if it be remembered that the region of Central Greece, in which the Hellenic Thrace was situated, is that from which first or chiefly, the seeds of elementary culture were propagated throughout the nation. Here tradition places the first introduction of the alphabet. Here were also the principal seats of Apollo and the Muses. In the heart of the same region was situated the Minyan Orichomnecus, the temple of the Graces, rivalling Thebes herself in the splendour of her princes and zeal for the promotion of art. Among the early masters of poetry or music, not vulgarly styled Thracians, the most illustrious, Amphil and Linus, are Boeotians. Nor was this region of Central Greece less favoured in respect of its religious institutions. It was not only the favourite seat of Nephele, the Muse, and the Graces, but the native country of the Dicyons, rivals, zeal for the propagation of which is a characteristic of the Thracian sages." (Hist. of Lang. and Lit. of Ant. Greece, i. pp. 150-155; cf. Niebuhr, Loc. on Ethnog. and Geog. i. p. 287.)

In this entirely disconnecting these early Thracians, from those of later times, the name of the authority of Thucydides (i. 29), who, speaking of Teres, the father of Sitoleus, remarks: "This Teres had no connection whatever with Tereus, who married Proce, daughter of Pandion of Athens; they did not even belong to the same Thrace. Teres dwelt at Daulis, a city of the country now called Phocis, and which in its turn was occupied by the Thracians. And he proceeds to show that it was not likely that Pandion would form an alliance with any one who lived so far from Athens as the country of the Odrysae.

The consideration of the ethnological relations of the early Thracians hardly falls within the scope of this article; but since identity of name has often caused them to be confused with the historical inhabitants of Thrace, it may be desirable briefly to discuss the subject in this place.

The view which seems to the present writer to be best supported by the evidence, and to explain most satisfactorily the ancient authors, is that which regards the mythical Thracians as members of the widely extended race with the name of Thracus is usually given. It is clear from Homer that a close connection existed between the people of Southern Thrace and the Trojans, who were probably Pelasgians, and who at the same time represented by him as agreeing, in language, religion, and other important respects, with the Greeks. Again, Homer mentions among the auxiliaries of the Greeks at Troy, besides the Trojans, those that are named along with the Pelasgians (II. x. 429), and the Clionce (II. ii. 846). These names bear so close a resemblance to each other as to suggest the probability of the cognate origin of the tribes so designated. Now the Cliones were undoubtedly Thracians (Odys. ix. 39, seqq.); while as to the Cliones, Strabo (cii. p. 321) informs us that they occupied part of the coast of Byzantium, and were regarded by some as Scythians, by others as Macedonians, by others again as Pelasgians. It will be remembered that the Cliones are mentioned by him (vii. p. 331) among the earliest inhabitants of Pelmoneesia. Another noticeable fact is, that in the passage of Strabo already quoted (ix. p. 401), he represents the Thracians and Pelasgians as acting in..."
TRACHIA.

occupies the Thracians with the Myrians as near (xi. 1). In the west and southwest it remains
to define the Thracian boundary: we have an Mela describes the whole of the Chalcid area
as Thracian, as do the northern Thracians, s. 79
no doubt that they extended as far as a river, though mixed up with Macedonians, we were
preponderating race in that quarter. Hence the intrusive and undoubtedly distinct races
were mingled with the Thracians and the Thracians were sometimes confounded with them. The
then called the Scutulii, the most respectable Thracians.

Of the language of the Thracians no trace exists. They were too barbarous for literary
or artistic memorials, as the three guides of the ethnologists are wanting. Xen. (p. 319)
states that bres, which seems to be a compilation of several names of Thracian cities prefixed
"city" or "town." This and a few other
names constitute all that remains of the
The following is the account which Xenophon gives of the customs of the Thracians. They
send their children into foreign slavery. Those who
remain unmarried enjoy perfect freedom in the course with men; but after marriage, generally
for three years, for their wives to the parents of the boy. In
married the skin is considered an indispensable mark of
birth. (Cf. Strab. vii. p. 315.) Besides being
honorable; the cultivator of the soil is a man of
the meanest of men; to live by war and piracy
is most noble. The only gods they venerate are
ripped by the spear, the victims of every kind; the body is
sometimes been treacherously burned. A man
raised above the grave, upon which others are
celebrated (v. 6-8; cf. Xen. Hell. iv. 4). Besides
these customs, which were prevalent among the
Thracians, Herodotus mentions some more peculiar to certain tribes; as, for instance, the
prevailed among the people of the Scythian
towns. Among them, each man had a wife.
the Scyths.

When any man dies, a great ceremony is kept by his
widows on the question of who shall be the
most beloved by their husband; and in their relations take a very active part in
whom the point is decided, receives the
gratulations of both men and women, as a
skill upon her husband's grave by her near
relatives. The other widows regard themselves as extremely unfortunate, for they are considered
as disgraceful: (P. 5.)

Herodotus heard a
speak of polygamy as confined to a certain Thracian; but Strabo (vii. p. 327) reports
a custom as general among them. In a note
Cassander quotes from Herod. vii. 73, to the effect that Thracians often had more than
thirty wives, whom they employed as a marriage
practice still common in many eastern lands.

Xenophon furnishes us with an illustration of
a Thracian custom of purchasing wives. It is
that at his first interview with Seuthes, the young
prince proposed to give his daughter in
Xenophon; and if the Greek king was

conjecture. The same author (xiii. p. 590) points out
the similarity of many Thracian names of places to
thronging those existing in the Trojan territory. Finally, the
names of the places mentioned by Strabo (vii. p. 291)
are so numerous, and nearly all the northern Thracians, s. 79:
evidently Greek (see Muller's Dionysia, i. p. 501);
and, as we have seen, the name Thrace itself is in
all probability a significant Greek word.

These considerations appear to us to lead to
conclusion already stated, namely, that the mythical
Thracians, as well as those spoken of by Homer, were
presumably Greek, and hence that the race once occupied
the northern as well as the other shores of the Aegean,
until, at a comparatively late period, its continuity
was broken by the irruption of the historical Thracians
from the north into the country between the Strymon and the Euxine. The circumstance that
the Greeks designated these barbarians by the name
which had been borne by those whom they sup-
planted of necessity adds to the probability,
and, in the existing state of our knowledge, in
instances of a similar kind. But it may
be doubted whether the Thracians had any
general designation in their own language: they probably
called themselves Edones, Denseleatae, Thyri, Satres, and so on; but we have no evidence that
they really were all branches of a common stock.
Under the circumstances, it was the more visible that
the Greeks should bestow upon them the name of the
earlier possessors of the country; and those
Thracians who were brought in contact with the
more civilized race would probably adopt it. (On
the preceding question, see Niebuhr, Lect. on Anc.
Hist. i. pp. 145, 213; Lect. on Ethnog. and Geog.
i. p. 144, notes. See also Strab. and Ptolemy.)
Respecting the historical Thracians we have toler-
ably full information, but not of that kind which will enable us to arrive at any very definite conclusions as
to their ethnological relations. That they belonged
to an extensively diffused race, whose early abodes
were in the far northern regions, may be regarded
as sufficiently proved by the concurrent testimony of
the ancients; but, as we have already seen, in a well-known
passage (v. 3), says that the Thracian nation is the
greatest in the world, after the Indians, and that its
subdivisions, of which the Getae are one, have many
names, according to the countries which they severally
occupy. Strabo too (vii. p. 295) states that the
Getae and the Myri were Thracians (as to the Myri,
see n. i. p. 305) who extended north of the Danube (vii. p. 296). In confirmation of his assertion that
the Getae were ethnologically akin to the Thracians, he
adduces the identity of their language (v. p. 303).
He adds (vii. p. 305) that the Dacios also
spoke this language. From his remark (vii. p. 315)
about the Iapodes, it would seem that he regarded
the Thracians also as nearly akin to, if not actually
branch of the, Thracians. In another passage (v.
471) he says that the Phrygians were colonists of the
Thracians; to which race also the Saraparse, a
nation still farther towards the east, north of Armenia,
were reported to belong (xi. p. 531).
"The Bithyni,
previously called Mysii, were so named, as is admitted
by the most authorities from the Thracian Bithyni,
themselves emigrated to that country (i. e. Asia
Minor; cf. Herod. vii. 75). And I conjecture that
the Bebyracs, who settled in Mysia before the Bithyni
and Mysii, were also Thracians. The Myrians themselves
are said to be colonists of those Thracians who are
now called Mysii. As the Marizanians are in all
respects like the Bithyni, they too are probably
Thracians." (Strab. xii. pp. 541, 542.) Justin
daughter, offered to buy her as a wife. (Asarv. vii. 2. § 38; cf. Mela, ii. 2.)

The want of union among the Thracians is mentioned by Herodotus (v. 3) as the only cause of their weakness. Their tribes, like the Highland clans, seem to have been constantly engaged in petty war with one another; and have been incapable of co-operating even against foreign foes, except for very brief periods, and rarely with any higher object than plunder. Until a late period (Flor. iv. 12. § 17) they appear to have been destitute of discipline, and this, of course, rendered their bravery of comparatively little avail. Thus we learn from Thucydides (ii. 96, 98) that, although Sitalces was the most powerful Thracian king that had ever reigned—he seems indeed to have been subsequently regarded as a kind of national hero; Xen. Asarv. vi. 1. § 6)—yet a large part of the army with which he invaded Macedonia consisted of mere volunteers, formidable chiefly for their numbers, and attracted to his standard by his offers of pay, or by their hope of plunder. But in point of fact, who held out these inducements, could easily raise an army in Thrace. Thus Clearchus no sooner received supplies of money from Cyrus the Younger, than he collected a force in the Chersonesus, which, although in great part undoubtedly Thracian, was employed by him in making war upon other Thracians, until he was required to join the army in Asia Minor (Ib. i. 1. § 9, 2. § 5, 8c.). So when Suthes undertook the expedition against his so-called revolted subjects, his army was soon tripled by volunteers, who hastened from other parts of Thrace to serve him, as soon as they heard of his enterprise (Ib. vii. 4. § 31). Such soldiers could not, of course, be depended upon for one moment after a reverse. A considerable number of Thracian mercenaries in the army of Cyrus took the earliest opportunity to desert to Artaxerxes after the battle of Cunaxa (Ib. ii. 2. § 7).

Tactitus (Asarv. iv. 46) informs us that the principal cause of the insurrection (A. D. 28) of the Thracians who dwelt in the elevated mountain districts (probably of Rhodope), was their dislike of the union of the whole Thracian people, which the Romans had introduced into Thrace. This was a yoke to which they could not submit; they were not accustomed to obey even their own rulers, except when it pleased them; and when they sent troops to the assistance of their princes, they used to appoint their own commanders, and to war against the neighbouring tribes only. (Cf. Liv. xili. 51; Xen. Asarv. vii. 4. § 24, 7. § 29, seq.)

Thracian troops were chiefly light-armed infantry and irregular horse. (Xen. Asarv. i. 2. § 9, vii. 6. § 27, Memor. iii. 9. § 2; Curt. iii. 9.) The bravest of the foot-soldiers in the army of Sitalces were the free mountaineers of Rhodope, who were armed with short swords (μαχαίρονες; Thucyd. ii. 98). The equipment of the Thracians is described by Herodotus (v. 75), and as this description agrees with what Xenophon states respecting Suthes' forces (Asarv. vii. 4. § 4), it is in doubt substantially the same as that of the Thracians generally. They wore caps covering their ears, made of fox-skins, cloaks, and party-coloured mantles (Συντέλεις: παλάδια); their shoes reached up the leg, were made of deer-skin; their arms were shields, avelines, and daggers (cf. Thucyd. vii. 27). The Thracians in the army of Philip V. were armed with very long ῥοπαχασσα, a word which some translate javelins, others swords. (Liv. xxxi. 39; Plut. Paus. Asarv. 17.) Thracian soldiers fought with impetuousness and with no lack of bravery; but they, like all barbarian and undisciplined troops were incapable of sustained efforts. Livy (xiii. 59) describes them as rushing to the attack like wild beasts long confined in cages: they hamstring the horses of their adversaries, or stabbed them in the belly. When the victory was gained on this occasion (the first encounter in the war between the Romans and Persians), they returned to their camp, singing loud songs of triumph, and carrying the heads of the slain on the tops of their weapons (Ib. 60). When defeated, they fled with rapidity, throwing their shields upon their backs, to protect them from the missiles of the pursuers. (Xen. Asarv. vii. 4. § 17.)

About the time of the Peloponnesian War, Thrace began to be the countries around the Aegean what Switzerland has long to its disgrace, been to the despotic powers of modern Europe, a land where men might be procured to fight for any one who could hold out sufficient inducements in the way of pay or plunder. (Thucyd. vii. 27, et alibi; Xen. Asarv. i. pass.; Just. xi. 1 & 9.) The chief causes of this, apart from the character of its people, appear to have been the want of any central government, and the difficult nature of the country, which rendered its savage independence tolerably secure; so that there was nothing to restrain them from wishing to seek their fortune in foreign warfare. During the period of Macedonian supremacy, and after its close, under the Roman power, Thracians are often mentioned as auxiliaries in Macedonian and Roman armies; but few of these, it is probable, were volunteers. (Liv. xxxii. 59, xlii. 29, 31, et al.; Cass. B. C. iii. 4; Vell. Pat. ii. 112; Tac. Hist. i. 60, 82.) Cicero (de Prov. Cons. 4) seems to imply that Thracians were sometimes hired to assassinate like the modern Italian bravo; these were perhaps gladiators, of whom great numbers were Thracians. Caligula gave the command of his German bodyguard to Thracians. (Suet. Calig. 55.)

Another point in which the Thracians remind us of the natives of India was noted by Thucydides (Ib. 97 in these words: "The tribute of the barbarians and of the Greek cities received by Suthes, the successor of Sitalces, might be reckoned at 400 talents of silver, reckoning gold and silver together. The presents in gold and silver amounted to as much more. And these presents were made not only to the king, but also to the most influential and distinguished of the Odyrians. For these people, like those of Thrace generally, differ in this respect from the Persians, that they would rather receive than give; and among them it is more shameful not to give when you are asked, than to be refused when you ask. It is true that abuses arise from this custom; for nothing can be done without presents." (Cf. Liv. xili. 19, 18; Tac. ann. 15.) Xenophon (Asarv. vii. 3) gives some amusing illustrations of this practice among the Thracians.

Mention is often made of the singing and dancing of the Thracians, especially of a martial kind. Xenophon (Asarv. vi. 1 § 5, seq.) gives an account of a dance and combat performed by some Thracians, to celebrate the conclusion between the Thracians and the inhabitants of the 10,000 Greeks and the Paphlagonians; they danced fully armed to the music of the flute, jumping up nimbly to a considerable height, and fencing with their swords: at last, one man struck another, to all appearance mortally and he fell as if
It has sometimes been asserted that the Thracians were accustomed to sacrifice human victims to their gods; but this appears to have been only a generalisation, or a confusing of two races; for we find no reference to such acts as any of the ancient accounts of their wars. Herodotus, it is true, states (ix. 119) that Persian Oecobars fell into the hands of the Thracians, after the taking of Sestos by Darius, but from the next words (pyrrho tyrant clari), that he regarded the practice as a custom of the Apainthi, and not as one current in Thracians; nor is it conceivable that we have omitted to mention as striking a custom in his general description of Thracia which has been already quoted (xviii. 24); moreover, the practice of offering the same sacrifice to the deceased husband cannot have any practical call a sacrifice.

Whether indulgence in wine was a part of the homage due to Dionysus or a means of sexual gratification, or whether it was prevalent in Thrace and frequent among the Thracians in their massacre of the inhabitants of Mycææs, is uncertain.

A truly barbarian trait in the character of the Thracians was their faithlessness, even to one another. This is especially shown in their disregard of their obligations towards the hostages whom they gave as securities for their observance of their engagements with others. Herodotus (iii. 44) states that the Thracians treated the hostages, especially the boys, with cruelty and barbarity; the Thynu, a number of old men as hostages; yes the Thynu, seeing a favourable opportunity, as they supposed, for renewing hostilities, at once seized it, apparently without a thought of the but too probable consequences of such conduct to their helpless countrymen. (Xen. Anab. vii. 4. 31; cf. Liv. xii. 22). Some of the tribes inhabiting the Thrace systematise their custom of sacking and plundering. (Salmydessus). Robbery, as we have seen, was considered honourable by them; and plunder was their chief inducement to engage in war. (Strab. vii. p. 318; Cic. Piso. 34; Liv. xxvi. 25, xxxviii. 40, seq.) Strabo (iii. pp. 164, 165), Mela (ii. 3), and Tacitus (Ann. iv. 51) bear witness to the same fact.

The chief deity worshipped by the Thracians was Dionysus, whom they, as well as the Phrygians, called Sabazius. (Schol. Aristoph. Vesp. 9). The mythical stories respecting Orpheus and Lycurgus are closely connected with the worship of this god, who had an oracle on Rhodope, in the country of the Statre, but under the direction of the Besii (Sartææ). Herodotus (i. 111) states that the mode of delivering the answers of this oracle resembled that which prevailed at Delphi. He compares also the worship of Artemis (whose Thracian name was Bendis or Cybele), as he had seen it celebrated by Thracian and Paeonian women, with some of the ceremonies at Dælos (iv. 33).

The Thracians against whom the forces lived in villages (i. 43) the horse fenced round with large stakes, with adorned by which their sheep were § 14; cf. Ann. vi. 69; and the articles Bendis, Cottus, and Rhæa, in the Dict. Biog. and Myth.)
belonging to him was emptied, the stones were separately counted, and his life pronounced to have been happy or the reverse, as the white or the black were more numerous.

V. IRROXY.—Thrace is one of those countries whose people, not being sufficiently civilised to establish a national government or to possess a national literature, cannot have histories of their own. We become acquainted with the Thracians at second hand, as it were, through the narrations of foreigners, who necessarily make them subordinate to their own countrymen; and therefore it is only in the later centuries that the history of Thrace has been recorded. Hence it is fragmentary, and, consequently, often obscure; nor would its importance, indeed, repay the labour that might be employed in elucidating it, even if we possessed the requisite materials. Destitute of union, the Thracians, notwithstanding their numbers, their wide diffusion, their powers of endurance, and their contempt of death, exerted no perceptible influence upon the general course of history; but were reduced, in spite of their wild love of independence, to assist, as humble allies or subjects, in the aggrandisement of the more civilised or political races with which they came in contact. These were the Greeks, the Persians, the Macedonians, and the Romans, who were the rulers of the Eastern Empire. We shall now briefly state the leading points of their history, as connected with that of the nations just mentioned; referring the reader for details, especially as to the little that is known of their purely internal affairs, to the articles in this work which relate to the Euxine, Dardania, and the commencement of their political union about a. c. 513 (or 508, as some authorities hold).

We pass over the alleged conquest of Thrace by Sesostris (Herod. ii. 103; Diod. i. 63), and that said to have been effected by the Taurians and Mysians before the Trojan War (Herod. vii. 20; cf. Euerip. Rhad. 406, seq.), and come at once to the strictly historical periods.

The first invasion of the Greeks with Thrace was made by the colonies planted upon its various coasts, the original object of which seems generally to have been of a commercial kind. Only an approximation to the date of most of these can be made, since the majority were established long before the commencement of authentic history. Byzantium and Selymbria, colonies of Megara, belong to the seventh century B.C., the year 675 B.C. being assigned for the foundation of the former. In 651 B.C. an unsuccessful attempt is said to have been made by settlers from Clesomene to establish themselves at Abdera (Sol. x. 10); but that city was not actually founded till 550 B.C., and then by emigrants from Teos (Herod. i. 165.). Mesembria, on the Euxine, was a colony of the Byzantines, and held a position of importance on the approach of the Phoenicians, as will be seen (Herod. ii. 193. [id. vi. 33].) When Dicares, Maronos, and Lemus, all on the south coast, were established, is not known; which is the case also with Cardia and Basias in the Chersonesus. These settlements were generally exposed to the hostility of their neighbours, there can be no doubt, though they rarely have their infant struggles so forcibly recorded as in the instance of Amphipolis. The Athenians sent no less than 10,000 men (a. c. 65) to found a colony there; and they succeeded in driving off the Edonians who occupied the country; but having advanced into the interior, they were defeated at Drabescus by the natives, and compelled to abandon the country. About thirty years afterwards, however, the Athenians returned, and this time overcame all resistance. Sometimes the relation between the Greeks and the Thracians was of a more friendly description. Thus, in the time of Peisistratus, the Dolonci, who dwelt in the Chersonesus, invited Miltiades (the elder) to rule over them, as they were unable to cope with their neighbours the Apсинthi; and this led to the Athenians obtaining a firm footing in that most important and valuable district. (Herod. vi. 34, seq.) By these various means the Greeks had obtained possession of nearly the whole coast of Thrace, a considerable period before the commencement of the great contest between themselves and the Persian empire. Of the interior they appear to have known scarcely anything whatever; and although in some cases the surrounding barbarians may have been brought into subjection (Byzantium is said to have reduced the Bithynian Thracians to the condition of tributary perioeci), yet this was rarely the case. On the contrary, it is clear from Thucydides (i. 97), that the Greeks sometimes paid tribute to the native kings. The Greeks, even when dwelling among hostile strangers, showed their tendency to separation rather than to union; and hence their settlements on the Thracian coast never gained the same importance as the union would have conferred upon them. Each city had a government and to a great extent a history of its own; and we must therefore refer the reader for information respecting those states to the separate articles in this work devoted to them.

The first Persian expedition to Thrace was that of Darius, who crossed the Hellespont with his army about a. c. 513 (or 508, as some authorities hold). As the principal object of Darius was to chastise the Scyths for their invasion of Asia in the reign of Cyrus, he took the shortest route through Thrace, where he met with no opposition. The Greeks whom he found there were required to follow in his train to the Danube; among them was the younger Miltiades, the destined hero of Marathon, who ruled over the Chersonesus, as his uncle had formerly done, and who had married the daughter of a Thracian king. (Herod. vi. 39.) On returning from the north, Darius directed his march to the Hellespont, and after crossing from Scutus into Asia, erected a fort at Dorias, near the mouth of the Euphrates. (Herod. iv. 89—91; 143; 144; vii. 59.) Megabazus was left with 80,000 men to subdue the whole of Thrace, a task which he began by besieging Perinthus, which, though previously weakened by the attacks of the Paeonians, made a brave but fruitless resistance. After this, Megabazus reduced the country into subjection, though perhaps only the districts near the sea. (Herod. i. 1, 2, 10.) That his conquest extended farther is clear from the Strymon appears from Darius's grant of a district upon that river to Histiaeus, who founded there the town of Myrceus. (Herod. v. 11.) Megabazus soon returned to Asia; and it seems probable that he took with him the greater part of his army; for if the Persians had maintained

...
THRACIA.

A powerful force in Thrace, the Paeonians could hardly have succeeded in making their escape from Phrygia back to the Strymon (I. d. v. 98), nor could the revolting Ionians (s. c. 498) have taken Byzantium and all the other cities in that country. (I. d. v. 103.) It is to this period that we must refer the invasion of the Scythians, who are said to have advanced as far as the Chersonese, thus occasioning the temporary flight of Miltiades, who, they were aware, had assisted Deriis in his attack upon their country. (I. d. vi. 40.)

After the suppression of the Ionian revolt (s. c. 493), the Phocian fleet sailed to the Hellepasson, and again brought the country under the Persian dominion. Carie being the only city which they were unable to take. (I. d. vi. 33.) Miltiades made his escape from the Chersonese to Athens, on hearing of the approach of the hostile fleet. (I. b. 41.)

Next year Mardonius led an army across the Hellepasson, and advanced as far as Macedonia; but his fleet having been wrecked off Mount Athos, and his land forces having suffered considerably in a war with the Thracians, who then occupied the country W. of the Strymon, he retraced his steps, and transported his shattered army into Asia (I. d. vi. 43, seqq.).

It was not till s. c. 480 that the vast army under the command of Xerxes crossed the Hellepasson by the famous bridges which spanned the strait from Abysus to Sestus. Of his march through Thrace, Herodotus gives this interesting account (Hill. 108—115); but, as he met with no opposition, we need not dwell upon these circumstances.

After the disastrous battle of Salamis, Xerxes, with an escort of 60,000 men, hastened back by the same road which he had so recently trod in all the overweening confidence of despot power: in Thrace, his miserable troops suffered greatly from hunger and consequent disease, but do not appear to have been openly attacked. (Herod. viii. 115, seqq.)

Next year (s. c. 479) was fought the battle of Platea in which Thracians formed part of the motley host arrayed against Greek freedom (I. d. ix. 32). Artabazus led the 40,000 men, who alone remained of the Persian army, by forced marches through Macedonia, and Thrace. He struck through the interior of the latter country, probably for fear of the Greek cities on the coast; but he encountered enemies as much to be dreaded, and lost a great part of his army by hunger, fatigue, and the attacks of the Thracians, before he reached Byzantium.

It was now the turn of the victorious Greeks to assail their foes in their own territories. Thrace, with the exception of Doricene, was soon cleared of the Persians. After the battle of Mycale, their fleet sailed to the Hellepasson, where the Athenians laid siege to Sestus, which was taken early in the following year (s. c. 478) (Sestius). Elon, at the mouth of the Strymon, made a desperate resistance; but at length (s. c. 476) fell into the hands of Cimon and the Athenians. After its capture, the governor had put to death all his family, and finally himself. (Herod. vii. 107; cf. Thuryd. i. 98.) Byzantium had been taken by Pausanias the year before. Thus the Persians were driven out of Europe, and the Greek settlements in Thrace resumed their internal freedom of action, though most of them, it is probable, were unable to defend their supremacy of Athens, as the chosen head of the great Greek confederacy.

During the administration of Pericles, 1000 Athenian citizens were settled in the Thracian Chersonese, which was always the chief stronghold of Athens in that quarter. Under the auspices of the same statesman, in s. c. 437, the Athenians succeeded in founding Amphipolis, the contests for the possession of which occupied a very prominent place in the subsequent history of Greece. (Amphipolis, Vol. I. p. 125.)

About this time flourished the most powerful Thracian kingdom that ever existed, that of the Odryseae, for the history of which see Odryseae. Vol. II. pp. 463—465. At the commencement of the Peloponnesian War (s. c. 431), the Athenians entered into an alliance with Sitalces, the king of the Odryseae (Thuryd. li. 29), who, they hoped, would enable them to subdue all opposition to their supremacy in the Chalcidic peninsula. In consequence of this alliance, Sitalces led (s. c. 429) a vast host into Macedonia, the ruler of which supported the enemies of Athens: he encountered no opposition, yet was compelled by want of supplies to return to Thrace, about a month after he had left it (I. b. 95—101). But although Sitalces was an ally of Athens, this did not prevent Thracians from having great numbers of light-armed Thracians in his service, while commanding the Spartan forces in the neighbourhood of Amphipolis (s. c. 422).

It would occupy too much space to relate minutely the various turns of fortune which occurred in Thrace during the Peloponnesian War. The principal struggle in this quarter was for the command of the Hellepasson, especially to the Athenians, on account of the corn trade with the Euxine, from which Athens drew a large part of her supplies. Hence many of the most important naval battles were fought in the Hellepasson: and the possession of Byzantium and Sestus was the prize of many a victory. The battle of Aegospotami, which terminated the long contest for supremacy, took place to the S. of Sestus, n. c. 405. By the peace concluded next year, Athens gave up all her foreign possessions; and those in the east of Thrace fell into the hands of the Spartans and Persians. [See Byzantium, Sestus, &C.]

When the remnant of the 10,000 Greeks returned (s. c. 400) to Europe, they were engaged by Sestius, in the retainers of which were many of those Thracians which had belonged to his father, in the south-eastern part of Thrace. (Xen. Aesch. vii. pass.) Having thus been reinstated in his principality, he showed his gratitude to the Greeks, by sending auxiliaries to Dercyllides, who commanded the Spartan forces against the Persians, with whom they were at war (s. c. 399) at war (Xen. Hell. iii. 2.) Next year Dercyllides crossed over into the Chersonese and erected a wall across its northern extremity, as a protection to the Greek inhabitants, who were exposed to constant attacks from their barbarous neighbours (I. b. 2. §§ 8—10). The same general successfully defended Sestus from the combined force of Conon and Pharnabazus (s. c. 394: I. b. iv. 8. § 5), and by his prudent and sagacious conduct in after times, the Athenian influence in Thrace, by forming an alliance with two native princes, and by establishing despotism in Byzantium (I. b. § 25, seqq.); and his success was confirmed by the victory of Iphicrates over Anaxibius the next year (I. b. § 34). The peace of Antalcidas, however, released all the Greek states from their connection with Athens, and virtually gave the supremacy to Sparta (s. c. 387).

Nothing of any importance happened in Thrace after this event till the accession of Philip II. to the throne of Macedonia (s. c. 359). This able but
THRACIA.

scrupulous monarch at once began his career of aggrandisement towards the east. He contrived to get possession of Amphipolis (n. c. 353), and thus obtained a secure footing from which he might extirpate his dominions in Thrace as opportunity offered.

At this time there were three native Thracian princes, probably brothers, who seem to have ruled over most of the country. According to Justin (viii. 3), Be- riades and Amadocus, two of them, chose Philip as just himself, of which he was so meekly disposed as to des- creetely allow himself to seize upon their domi- cains. Though this statement is not supported, we believe, by any other ancient author, yet it is prob- ably true; for such conduct is highly characteristic of the Macedonian monarch; and the almost entire disappearance from history of these Thracian princes soon after Philip's ascension, would then be ac- counted for. Cerscelpestes, the third brother, who seems to have had the E. portion of Thrace, maintained a long struggle against his ambitious neighbour. In n. c. 357 he ceded the Chen- temus to the Athenians, who sent a colony to occupy it four years afterwards. [See Cerno- bukis, Dict. Biog. Vol. I. p. 674 ; Serruus.] Philip, in ascendency, and having repeated invasions of Cerscelpestes, whom he att length (n. c. 343) completely subdued and rendered tribu- tary. Next year he established colonies in the eastern part of Thrace, and acts of hostility occurred between him and Diopeithes, the Athenian commander in that quarter. Philip was occupied the next three years in Thrace, besieging to and from Byzantium, which were in alliance with Athens, whose forces, commanded by Phocion, compelled Philip to abandon the sieges; and he soon afterwards left Thrace, to advance towards the south against the confederate Greeks. On his departure Phocion re- covered several of the cities in which Macedonian garrisons had been placed.

Notwithstanding these checks, Philip had brought under his command a great part of Thrace, especially on the south coast; he had, above all, completely incor- porated with his kingdom the district between the Strymon and the Nestus, and from the mines of the Pangeus, which he seized in n. c. 356, he ob- tained abundant supplies of the precious metals. Philip, in order to strengthen his kingdom, and to check the ascendency, Alexander the Great, marched across the Haemus to attack the Triballi; but his chief attention was bestowed upon the preparations for the Asian expedition, which he entered upon next year, crossing the Hellespont from Sestos.

On the death of Alexander (n. c. 333), Thrace was allotted to Lyaimachus, who was soon assassinated in hostilities with Seuthes, a king of the Odrysae. The reader is referred to the account of Lyaimachus [Dict. Biog. Vol. II. pp. 867–870] for details respecting his government of Thrace; the result of his various wars was that his sway was firmly established over all the countries south of the Danube, as far as the confines of Macedonia; the Greek cities on the Haunian coast, and his son Seleucus, to meet the numerous of the native tribes, in the more inaccessible districts, no doubt retained their freedom, yet he had completely defeated all their attacks upon his power. In n. c. 309 he founded Lyaimachia, near the northern extremity of the Chersonesus, and made it his capital. Having engaged in a war with Seleucus, the king of Syria, his troops to meet the antagonists in Asia, and was defeated and slain at Corippusin (n. c. 281), upon which Seleucus passed over into Europe and took possession of Thrace.

The next year, however, he was assassinated by Ptolemy Ceraunus, who was then acknowledged king; but shortly afterwards a vast horde of Celts invaded the country, and Ptolemy was slain in a battle with them. Anarchy now prevailed for some years in the country; the Celts again advanced to the south in n. c. 279, and under Brennus penetrated as far as Delphi, on their repulse from which they retreated northwards, and some of them settled on the coast of Thrace.

For nearly fifty years after this time little mention is made of Thrace in history; it appears to have been annexed to Macedonia; but the rulers of that kingdom were too insecure, even in their central do- minions, to be able to exercise much control over such a country as Thrace, inhabited now by races differing so much from the Macedonians, and the Celts, and offering so many temptations to the assertion of independence. [See Antigonous Gon- tatas, Demetrius II., and Pyrrhus, in Dict. Biog.]}

About n. c. 247, the fleet of Ptolemy Euergetes captured Lyaimachia and other important cities on the coast; and they remained for nearly half a centu- ry under the dominion of Ptolemy (Polybius, 34, 58).

In n. c. 229, Philip V. of Macedon ascended the throne of Macedonia. Under him the Macedonian power re- gained something of its old prestige; and had it not been brought in collision with Rome, it might have become as extensive as in former times. But Philip unfortunately directed his ambitious views in the first instance towards the West, and thus soon en- countered the jealous Republic. It was not till n. c. 211 that Philip commenced his enterprises against Thrace; he then led an army into the country of the Maedi, who were in the habit of making incursions into Macedonia. Their lands were laid waste, and their capital, Samphorina, compelled to surrender. Having made peace with the Romans (n. c. 205), he again attacked that country, both by sea and land; and it is evident that he did not anticipate much resistance, since he took with him only 2000 infantry and 200 cavalry. Yet with this insigni- ficant force, aided by the fleet, he made himself master of the whole of the south coast, and of the Chersonesus. In 190, he then signed a truce with Rome, and after a desperate resistance took it (Liv. xxxi. 16). This seems to have hastened the declaration of war on the part of the Romans; a war which lasted till n. c. 196, when Philip was reduced to procure peace by surrendering all his conquests, and withdrawing his garrisons from the Greek cities (Liv. xxxiii. 30).

L. Stilpinus was sent to Thrace, to see that the terms were complied with (59. 35). But scarcely had the cities been evacuated by the Macedonian garrisons, when Antiochus the Great crossed the Hellespont, and took possession of the Chersonesus, which he claimed as a conquest of Seleucus (59. 38). He refused to comply with the demand of the Romans, that he should withdraw his army from Europe; but left it in Thrace, and advanced with his son Seleucus to meet the Celts of Lyaimachia, and to extend his influence, which seems to have been done by placing garrisons in Maroneia and Aenus.

In the war which ensued between the Romans and Antiochus (n. c. 190), Philip rendered the former good service, by providing everything necessary for their march through Thrace, and intercepting the movements of molestation by the native tribes (Liv. xxxvii. 7). Antiochus was defeated by Scipio at Magnesia, and
The Romans sent ambassadors to Rome to secure friends among them for the peace of Macedonia, which, though not yet annexed to Rome as a province, was completely under their control. They concluded (n. c. 162) three commissioners to conduct Bitis and the other Thracian house at the same time, no doubt impressed upon the senate the serious compliance with this national custom. (Liv. iv. 3.)

The advantage of this alliance was that Cotys, king of the Odrysae, was an ally to the Romans. As indicated in Livy (iv. 40, seq.) of the march of the consul Manlius' army through the country on its return from Asia Minor, is highly interesting. The army was loaded with booty, conveyed in a long train of baggage wagons, which presented an irresistible temptation to the predatory tribes through whose territories its route lay. They accordingly attacked the army in a defile, and were not beaten off until they had succeeded in their object of sharing in the plunder of Asia.

The possession of the Chersonese by Eumenes soon led to disagreements with Philip, who was charged by Eumenes (n. c. 185) with having seized upon Meroeis and Ayunos, places which he coveted for himself. (Livy. xxxix. 24, 27.) The Romans insisted upon the withdrawal of the Macedonian garrisons (n. c. 184), and Philip, sorely against his will, was obliged to obey. He wreaked his anger upon the defenceless citizens of Meroeis, by conning at, if not actually commanding, the massacre of 30,000 men of them. (Livy. xxxiii. 33, 34.) In fact the course of the disputes about these cities, it was stated that at the end of the war with Philip, the Roman commissioner, Q. Fabius Labeo, had fixed upon the king's road, which is described as nowhere approaching the sea, as the boundary of Philip's possessions in Thrace; but that Philip had afterwards forced a new road to a considerable extent, and had thus included the cities and lands of the Maroneae in his territories (Livy. xxvii. 27.).

In the same year, Philip undertook an expedition into the interior of Thrace, where he was fettered by no engagements with the Romans. He defeated the Thracians in a battle, and took their leader Amadocus prisoner. Before returning to Macedonia he sent several places on the Danube to invite them to make an incursion into Italy (Livy. xxxvi. 33). Again in n. c. 183, Philip marched against the Odrysae, Dendraea, and Bessi, took Philippoppos, which its inhabitants had abandoned at his approach, and placed a garrison in it, which the Odrysae, however, soon afterwards drove out. (Livy. xxxiv. 2.) Philip removed nearly all the inhabitants of the coast of Macedonia into the interior, and supplied their places by Thracians and other barbarians, on whom he thought he could more safely depend in the war with the Romans, which he now saw was inevitable (Livy. xiii. 3). He had done a smoothing of the kind a few years before (Livy. xxxvi. 26). The accession of the Hasmone, already referred to, took place in n. c. 181: on the summit he erected altars to Jupiter and the Sun. On his way back his army plundered the Dendraea; and in Macedonia he took a town called Petra. (Livy. xli. 21, seq.)

Philip died in n. c. 179, and his successor Perseus continued the preparations which his father had made for the war with Rome; which did not begin, however, till n. c. 171. The Romans had formed an alliance the year before with a number of independent Thracian tribes, who had sent ambassadors to Rome for the purpose, and who were likely to be serviceable foes to Persia. The Romans took care to send valuable presents to the principal Thracians, their ambassadors having no
THRACIA.

of its people into Macedonia: they then sometimes made retaliatory expeditions into Thrace; but seem generally to have made their way back as soon as possible, to benefit to the relations existing between the Romans and the Thracians, for more than a century after the conquest of Macedonia, thus bears a close resemblance to that which has long existed between our own countries and the Caffres.

During the years a. C. 110, 109, the Consul M. Memmius Rufus was engaged in hostilities with the Scordisci and Tibboni; and, according to Florus (L.c.), laid waste the whole valley of the Hebrus (cf. Exur. iv. 27). In a. C. 104, Calpurnius Piso penetrated into the district of Rhotope (Flor. l. c.). In a. C. 92, the Maedi defeated the praetor, C. Sentius, and then ravaged Macedonia (C. i. Fl. 34; Liv. Epit. 70). After the breaking out of the Thracian War (a. C. 88), mention is made in several successive years of the incursions of the Thracians into the Roman provinces, and it is probable that they were acting in concert with Mithridates, whose general Taxiles, in a. C. 86, led a vast army through Thrace, and Macedonia to the assistance of Archelaus. (Liv. Epit. 74, 76, 81, 92). On the final death of Archelaus, Sulla, with the aid of the Romans on the eastern side, Victory a. C. 84, and, either to punish the people for their connection with Mithridates, or because they opposed his passage, made war upon them with complete success (I1d. 83). C. Scribonius Curio defeated the Dardani, and penetrated to the Danube, being the first Roman who had ventured into that part of Europe (a. C. 83). Curio was succeeded as governor of Macedonia by M. Lucullus (a. C. 73), who defeated the Bessi in a pitched battle on Mount Haemon, took their capital, and ravaged the whole country between the Haemon and the Danube (Liv. Epit. 97; Exur. vi. 10).

The Bessi were again conquered in a. C. 60 by Octavius, the father of Augustus (Exur. vi. 30; Fl. 94; Frinhi. Suppl. cxxxv. 4). In the years a. C. 58, 57, Piso, so well known to us from Cicero's celebrated speech against him, was governor of Macedonia; and, if we may believe Cicero, acted in the most cruel and faithless manner towards the Bessi and other peaceable Thracian tribes. (Pl. 34, de Prov. Cons. 2, seq.). From the latter passage it appears clearly that the Bessi were not a regular or definite nation, but a collection of different tribes, who, in the neighborhood of Rome, yet the Romans claimed the right of way through it to the Hellespont; for Cicero calls the Egnatian Way "via ino nostrae militaria."

In the civil war between Caesar and Pompey, several Thracian princes furnished the latter with auxiliary forces. Why they interfered in the contest, and why they preferred Pompey to Caesar, are matters of composite. Pompey had been chiefly engaged all his life in the East, Caesar in the West; and that is probably sufficient to account for the greater influence of Pompey in Thrace. (Cass. B. C. iii. 4; Flor. iv. 2; Dion Cass. xii. 51, 63, xliv. 25).

At the time of Caesar's death two brothers, Rhascoporus and Ruscus [Dict. Biog. Vol. Ill. p. 647] ruled over the greater part of Thrace; and when the war broke out between the triumvirs and the republicans, Rhascoporus sided with the latter, while Ruscus sided the former. By this plan they hoped to be safe, whichever party might be victorious; and it is said that their expectations were realised.

When the power of Rome was at length vanquished by Augustus without a rival, the relation of Thrace to the Roman state seems to have become in many respects like that which the native princes of India long bore to the British. The Thracian kings were generally allowed to preserve, with slight restraint, their authority over their own subjects, and when needful it was supported by the arms of Rome. But all disputes among the native rulers were referred to the decision of the emperors, who disposed of the country as its acknowledged lords. These subject princes were expected to defend Thrace from external and internal foes; to be in the field; to allow them to enlist troops, and in other ways to exercise the rights of sovereignty. For illustrations of these statements we must refer the reader to Tacitus, especially to the following passages: Ann. ii. 64—67, iii. 58, 39, iv. 5, 46—51. The few Thracian coins which are extant afford a proof of the dependent character of the Thracian kings; they bear on the obverse the effigy of the reigning emperor, and on the reverse that of the native prince. [See Dict. Biog. Vol. Ill. p. 653.]

The interference of the Romans in the government of Thrace was not submitted to by the nation at large without several severe struggles. The most formidable of these occurred about a. C. 14, the fullest account of which is given by Dio (Lib. liv.). The leader in this insurrection was Vo- logesesus, a Bessian priest of Bacchus, who availed himself of his sacratical character to inflame the religious feelings of his countrymen. Having thus assembled a large army, he attacked, defeated, and slew Rhascoporus, a king under Roman protection; his uncle, Rhescuporis, was exiled and compelled to flee: the insurgents pursued him as far as the Chersonesus, where they devastated the country and captured the fortified places. On receiving information of these proceedings, Augustus ordered L. Piso, the governor of Pamphylia, to transport his army into Thrace, where, after three years' war and several reverses, he at length succeeded in subduing the Bessi, who soon adopted Roman arms and discipline. They soon afterwards made a second attempt to regain their independence; but were now easily crushed. (Vell. Pat. ii. 98; Tac. Ann. vi. 10; Sen. Ep. 83; Flor. iv. 12; Liv. Epit. 137.)

After this war, the Romans gradually absorbed all the powers of government in the country. Germanicus visited it in A. D. 15 and 15 B.C., but in all the forms in its administration (Tac. Ann. ii. 54). A system of conscription seems to have been imposed upon the Thracians about A. D. 26 (Ib. iv. 46).

The last native prince of whom we find any mention is Rhoemetacilus II., who, in A. D. 38, was made by Caligula ruler over the whole country; and at length, in the reign of Vespasian (A. D. 69—79), Thrace was reduced into the form of a province. (Suet. Vesp. 8; Exur. vii. 19; cf. Tac. Hist. i. 11). The date of this event has been disputed on the authority of the Eusebian Chronicle, which states that it took place in A. D. 47, in the reign of Claudius; but the statement of Suetonius is express on the point. It is possible that Rhoemetacilus II. may have died about the year last mentioned; but Caligula's mode of appointing a successor to him, would be regarded as equivalent to incorporating the country in the Roman empire, although its formal constitution as a province was delayed; as we know was commonly the case. It is remarkable that Moesia was made a province upwards of 50 years before Thrace Proper, its first procurator being mentioned in A. D. 15. (Tac. Ann. i. 79; cf. Ib. ii. 56; Plin. iii. 56. a. 89.)
THRACIA.

Thrace now shared in the general fortunes of the Roman world, on the division of which into the Eastern and Western Empires, it was attached to the former, being governed by the Victorius Thracius, who was subordinate to the Proconsul Procopius Orontes. Its situation rendered it extremely liable to the pestilence of barbarians, and its history, so far as it is known, is little else than a record of war and devastation. The Goths made their first appearance there in A.D. 255; the emperor Probus, about A.D. 280, established in it 100,000 Bastarnae. In A.D. 314, and again in 323, the emperor Licinius was defeated at Hadrianopoli by Constantine, who, in A.D. 334, settled a multitude of Saracens in Thrace which, in 376, received another accession to its heterogeneous population, Valens having given permission to the Goths to reside in it. This gave rise to innumerable wars, the details of which are recorded by Ammianus (lib. xxxii.). In 395 the devoted country was overrun by Alaric, and in 447 by the more dreadful Attila. Through all these misfortunes, however, Thrace remained in connection with the Eastern Empire, the capital of which was within its boundaries, until the year 1533, when the Turks, who had crossed over into Europe in 1431, obtained possession of the Thracian fortresses. Their leader Amurath conquered the whole country, except Constantinople, and made Hadrianopoli his capital. About 1465, Constantinople itself was taken, and the Turks have ever since been the undisputed lords of Thrace.

VI. TOPOGRAPHY.—Under this head we shall merely collect such names as will serve to direct the reader to articles in this work, where fuller information is given.

Pliny (iv. 18: cf. Mela, ii. 2: Amm. xxvi. 4) enumerates the following as the principal Thracian tribes: Demeletae, Maedi, Bismalae, Digeri, Bessi, Elisti, Diobesi, Caribiles, Brysae, Saepae, Odomantii, Odryseae, Cabylei, Pyrogeri, Drugeri, Cassici, Hypsalii, Beni, Corpullii, Bottisiae, Edoei, Sylletea, Prianitae, Dolonci, Thyni, Cosae. To these we may add, the Apinthii, Bastones, Cicones, Satraces, Deothii, etc.

Of the towns mentioned by Pliny (L.c.), these belonged to Thrace Proper: 1. On the coast (i.) of the Aegean: Oesyma, Nesonias, Datum, Abdera, Tirida, Dicae, Maroneae, Zone, and Aenae; to these must be added Amphipolis, Piatrus, Coscinthos, and Mesembria: (ii.) of the Chersonesus: Cardia, Lyaminachia, Pachyta, Callipolis, Senteus, Euseus, Coslea, Trestias, and Panormus; besides these there were Aphocomesus and Agoros; (iii.) of the Propontis: Bisantei, Pertinachs, and Seimbrana: (iv.) of the Bosporus: Byzantium; (v.) of the Euxine: Mesembria, Anchaerus, Apollonia, Thynius, Salmydesianos, and Phinopolis. 2. In the interior: Philippopolis, Philippus, Soesia, Topia, Dorocus, Cysoapia, Apros, and Develmis. Pertinax is a very large town, but many of the principal inland towns were founded after Pliny's time: their names also were often changed. The following are some of the chief towns in the interior: Hadrianopoli, Plotinopoli, Trajanopoli, Tempyra, Nicopolis, Beres, Iamippus, and Petra. Besides the rivers mentioned in the course of this article, the following occur: the Bathylias, Fydras, or Ayras, Barges, Coscmines, Comastus, and Xeropusas.

As to the political divisions of Thrace, Pliny (L.c.) states that it was divided into fifty strategiae; but he describes Moeia as part of Thrace. According to

THRACIA, in Asia. A district in Asia Minor on the coast of the Eufris, is sometimes called Thracia, and its inhabitants Thracians. (Herod. i. 28; Xen. Anc. vi. § 14, et al.) This country is more commonly called Bithynia. [See BITHYNIA, Vol. i. p. 404.]

THRACIA, also called BOSPORUS. [BOSPORUS, THRASYMENUS LACUS, THRASYMUS, THRATUS, THRAETHYMON LACUS, TRZEKIE, THRASUS, XERIES, XERIESTUS, XERIESSTUS, a town in the mountainous district of Arcadia in Elis, of unknown site. (Xen. Hell. vii. 14, § 14; Diod. xiv. 17.)

THERISSA. [ARTICA, p. 338, b.]

THROSA, a place in Carmania, mentioned by Ptolemy (vi. § 14). Perhaps the modern Giroi.

THRONI (Θρόνη), a town and promontory on the SE. coast of Cyprus, distant 700 stadia from the promontory Curia. On the promontory of Thraci
THRONIUM.

Ptolemy observed an ancient tower. (Strab. xiv. p. 689; Ptol. v. 14. §§ 2, 3; Engel, *Egypso*, vol. i. p. 99.)

**THRONIUM (Θρόνιον; Δθ. Θρόνιον, Θρόνιον; Θρόνιον).**

1. The chief town of the Locri Epizephiri, situated 20 stadia to the coast and 30 stadia from Scaphium, upon the river Boeotrites, which is described by Strabo as sometimes dry, and sometimes flowing with a stream two plethra in breadth. (Strab. ix. p. 436.) It is mentioned by Homer, who speaks of it as near the river Boeotrites. (H. ii. 353.) It was at one time partly destroyed by an earthquake. (Strab. i. p. 60.) At the beginning of the Peloponnesian War (N. c. 431) Thronium was taken by the Athenians. (Thuc. ii. 26; Diod. xii. 44.) In the Sacred War it was taken by Onomarchus, the Phocien general, who sold its inhabitants into slavery, and hence it is called by Seylax a Phocien city. (Diod. xvi. 33; Aesch. de Fals. Leg. p. 45, 33; Seylax, p. 23.) Thronium is also mentioned by Polyb. ix. 41, xvi. 9; Empir. Epk. Apt. 364; Luc. xiii. 5, 6, xiii. 9, xxi. 37, xxi. 37, 20; Plut. xxxi. 22; Steph. B. s. v. 148; Isthm. pi. iii. 15. § 7; Plin. iv. 7. s. 15; Steph. B. s. v.)

The site of Thronium was ascertained by Meleitus who found above the village Romani, at a place named Paleokastro, where some remains of the city still exist, a dedicatory inscription of the council and deity of the Thronienses. (Leake, *Northern Greece*, vol. ii. pp. 177, 178.)

2. A town in Greek Illyria in the neighbourhood of Amantia [Amantia], said to have been founded after the Trojan War by the Abantes of Euboea and the inhabitants of the Locrian Thronium. It was taken at an early period by the inhabitants of the neighbouring town of Apollonia, and annexed to their territory, as appears from an epigram inscribed on a dedicatory offering of the Apolloniates at Olympia. (Paus. v. 23. §§ 3, 8.)

**THRYON, THRYOESSA. [Epitallium.]**

**THULE (Θούλη, Ptol. ii. 6. § 32), a celebrated island in the Northern Ocean, discovered by the navigator Pytheas. Pytheas arrived at it after a voyage of six days from the Orsades, in which it must have been 70 days out of the sea. (Plin. ii. 963.) According to the account of Pytheas, he reached the polar circle, so that on this island the longest day was twenty-four hours, and there was constant day during the six summer mouths and constant night during the six winter ones. It was deficient in animals, and even the most necessary fruits, but produced a little corn. From the time of its discovery it was regarded as the most northerly point of the known world although no further knowledge was obtained respecting it; and this view seems to be confirmed by its name, since in Gothic *Tielr* or *Thule* (*θυλος*, goal) denoted the remotest land. (Strab. i. p. 63, ii. pp. 104, 114, iv. p. 201; Agath. i. 8; Prisc. Pers. 387, sqq.; Macrob. Sat. xii. 30; Tac. Ann. 10; Virg. G. i. 30; Solin. c. 22, Sc.; cf. Praetorius, de Orbe Goth. iii. 4. 3. p. 33; D'Anville, *Sur la Navis.* de Pytheas, p. 439; Rudbeck, *Atlant.* i. p. 514.)

Potelery is the only writer who places Thule a great deal further S., though he undoubtedly had in view the island discovered by Pytheas; and according to him it would seem to have been the largest of the Shetland islands, or the modern Mainland (see ii. 3. § 32, i. 24. §§ 4, 6, 17, 20, vi. 16. § 21, vii. 5. § 12, viii. 3. § 8). Most modern geographers incline to the opinion that Pytheas meant Iceland; though according to others his

THURIA. 1191

Thule is to be variously sought in Norway; in that part called Thule or Thilenark; in Jutland, the extreme point of which is called Thy or Thyland; or in the whole Scandinavian peninsula (Malte-Brun, *Geogr. Univ.* i. p. 120; Orellius, *Theatr. Orb.* p. 103.)

**THUMATA (Θυμάτα, Ptol. vi. 21. § 32; Pliny. vi. 28. § 32; Thmamh, Not. Imp. Rom. § 22, p. 37), a town of Arabia Felix, according to Ptolemy, and described by Pliny as distant 10 days' sail from Petra, and subject to the king of the Characeni.**

**THUMNA. [Tamna.]**

**THUNUDROMON (Θυνυδρομόν, Ptol. iv. 3. § 29), a Roman colony in Mysidia. It seems to be the same place as the Tynidrumne oppidum of Pliny (v. 4. s. 4).**

**THURIA (Θυρία; Δθ. Θυριάρις), a town of Messenia, situated in the eastern part of the southern Messenian plain, upon the river Aris (Póthikima), and at the distance of 60 stadia from Tharace, which was about a mile from the coast. (Paus. vii. 31. § 4.) It was generally identified with the Homeric Antheia, though others supposed it to be Aepelia. (Paus. l. c.; Strab. viii. p. 360.) It must have been a place of considerable importance, since the distant Messenian gulf was even named after it (Θυριάρις κόλπος, Strab. l. c.) It was also one of the chief towns of the Lacedaemonian Federation after the subjection of Messenia; and it was here that the Third Messenian War took its rise, n. c. 464 (Thuc. i. 101). On the restoration of the Messenians by Epaminondas, Thuria, like the other towns in the country, was dependent upon the newly-founded capital Messene; but after the capture of this city by the Achaeans in n. c. 182, Thuria, Thase, and Abia joined the Achaean League as independent members. (Polyb. xxxv. 1.) Thuria was annexed to Laconia by Augustus (Paus. l. c.); but it was restored to Messenia by Tiberius. (Messenia, p. 345.) Pausanias found two cities of this name. The Thuritae had descended from the summit of the lofty hill of the upper city to dwell upon the plain; but without abandoning altogether the upper city, were dependent upon the town of the tablets which still stood within the town walls (Paus. iv. 31. § 9).

There are considerable remains of both places. Those of Upper Thuria are on the hill of the village called Paleokastro, divided from the range of mountains named Makrypéli by a deep ravine and torrent, and which commands a fine view of the plain and gulf. The remains of the walls extend half a mile along the summit of the hill. Nearly in the centre of the ruins is a quadrangular cistern, 10 or 12 feet deep, cut out of the rock at one end, and on the other side constructed of masonry. The cistern was divided into three parts by two cross walls. Its whole length is 29 paces; the breadth half as much. On the highest part of the ridge there are numerous ruins, among which are those of a small Doric temple, of the stand brown calcareous stone, in which are cockle and mussel shells, extremely perfect. In the plain at Paleo Lustra are the ruins of a large Roman building, standing in the middle of fig and mulberry grounds. Leake observes that "it is an uncommon state of preservation, part even of the roof still remaining. The walls are 17 feet high, formed of equal courses of large square mortar. The roof is of rubble mixed with cement. The plan does not seem to be that of a bath only, as the name would imply, though there are many appearances of the building having contained baths: it seems rather to have been the palace of some Roman..."
THURIL

as governor. As there are no sources of water here, it is to be supposed that the building was supplied by an aqueduct from the neighbouring river of Piscinae.

(Leuka, Mora, Lib. i. pp. 354, seq. 360; Boehm. Researches, etc. p. 105; Rem. Reisen im Peloponnes, p. 2; Curtius, Peloponnes, vol. ii. p. 161.)

THURII (Geogr. Eth. Geogr., Thurius), called also by some Latin writers and by Polyenian Travellers (Geogr. Ptol.,) a city of Magna Graecia, situated on a rocky hill, within a short distance of the site of Sybaris, of which it may be considered as having taken the place. It was one of the last of all the Greek colonies in this part of Italy, not having been founded till nearly 70 years after the fall of Sybaris. The site of that city had remained desert for a period of 56 years after its destruction by the Crotomians (Sybaris); when at length, in a number of the Sybarites exiled and their descendants made an attempt to establish themselves again on the spot, under the guidance of some leaders of Thessalian origin; and the new colony rose so rapidly to prosperity that it excited the jealousy of the Crotomians, who, in consequence, expelled the new settlers a little more than 5 years after the establishment of the colony from Thurius (xii. 106). The fugitive Sybarites first appealed for support to Sparta, but without success; their application to the Athenians was more successful, and that people determined to send out a fresh colony, at the same time that they reinstated the settlers who had been lately expelled from hence. A body of Athenian colonists was accordingly sent out by Pericles, under the command of Leocrates and Xenoncrates; but the number of Athenian colonists was small, the greater part of those who took part in the colony being collected from various parts of Greece. Among them were two celebrated names—Herodotus the historian, and the orator Lycurgus, both of whom appear to have formed part of the original colony. (Diog. xii. 10; Strab. vi. p. 263; Dionys. Lerr. p. 485; Polyb. x. i. 635; Plist. Hyeron, 11. iv. 5.) The new colonists at first established themselves on the site of the deserted Sybaris, but shortly afterwards removed (apparently in obedience to an oracle) to a spot at a short distance from thence, where there was a fountain named Thuris, from whence the new city derived its name of Thurium (L. c. 218). The site of Thurium is assigned by Diodorus to the year 446 B.C.; but other authorities place it three years earlier, i.e. 443 B.C., and this seems to be the best established date. (Cicero, F. H. Lib. ii. p. 54.) The protection of the Athenian name probably secured the new colony from the assaults of the Crotomians, at least we hear nothing of any obstacles to its progress from that quarter; but it was early disturbed by dissensions between the descendants of the original Sybarites and the new colonists, the former laying claim not only to honorary distinctions, but to the exclusive possession of important political privileges. These dissensions at length ended in a rebellion, and the Sybarites were finally expelled from the city. The new colonization continued for a short time after the loss of the town, but did not maintain their ground here, hence disbanded and finally dispersed by the incursions of the Locrians. (Diog. xii. 11, 22; App. Paus. ii. 8.) The Thurians meanwhile concluded a treaty of peace with the Crotomians, and the new colony was restored to prosperity.

Fresh colonists were sent out from Athens, especially the Athenians of Elis, and the Thurians continued to be generally regarded as an Athenian colony, the Athenians in fact forming but a small element of the population. The citizens were divided, as we learn from later times, into three families, each to indicate their origin. They were, in fact, Achaeans, Elean, Boeotian, Arcadians. The Ionians, Athenians, Elisians and Locrians were the islanders. (Diog. xii. 11.) The government was democratic, and the city was situated at the junction of the Peloponnesus and Europe, and was well situated to the legislation of Carthage that lawyer himself as a citizen of Thurium, with varying success. (Dict. of Buys. ut Carth.) The city itself was laid out with precision, being divided by four broad streets or axes, each of which was crossed by nine smaller streets.

This defeat must have inflicted a severe blow to the prosperity of Thurium, while the destruction of the harbour was a great misfortune to the immediate neighbourhood.
continued also to be on hostile, or at least unfriendly, terms with Dionysius of Syracuse, and was in consequence chosen as a place of retirement or exile by his brother Leptines and his friend Philistus (Diod. xvi. 7). The rise of the Brutian people about a. c. 356 probably became the cause of the complete decline of Thurii, but the statement of Diodorus that the city was conquered by that people (xvi. 15) must be received with considerable doubt. It is certain at least that it reappears in history at a later period as an independent Greek city, though reduced to its former greatness. No mention of it is found during the wars of Alexander of Epirus in this part of Italy; but at a later period it was so hard pressed by the Lucanians that it had recourse to the alliance of Rome; and a Roman army was sent to its relief under C. Fabricius. That general defeated the Lucanians, who had actually laid siege to the city, in a pitched battle, and by several other successes to a great extent broke their power, and thus relieved the Thurians from all immediate danger from that quarter. (Liv. Epit. xi.; Plin. xxxiv. 6. s. 15; Val. Max. i. 8. § 6.) But shortly after they were attacked on the other side by the Tartessines, who are said to have taken and plundered their city (Strab. vi. 1. § 5; Diod. xxi. 2. § 3). This was one of the immediate causes of the war declared by the Romans against Tarentum in a. c. 282.

Thurii now sunk completely into the condition of a dependent ally of Rome, and was protected by a Roman garrison. No mention is found of its name during the wars with Pyrrhus or the First Punic War, but it plays a considerable part in the latter. It is one of the cities which revolted to the Carthaginians immediately after the battle of Cannae, though, in another passage, Livy seems to place its defection somewhat later. (Liv. xxii. 61, xxv. 1.) But in a. c. 213, the Thurians returned to their alliance with Rome, and received a Roman garrison into their city. (Id. xxv. 1.) The very next year, however, at the end of the war with Tar-

-entum, they changed sides again, and betrayed the Roman troops into the hands of the Carthaginian general Hanno. (Id. xxv. 15; Appian, H. Ann. 34.) A few years later (a. c. 210), Hannibal, finding himself unable to protect his allies in Campania, removed the inhabitants of Atella who had survived the fall of their city to Thurii (Appian, H. Ann. 34); but it was not long before he was compelled to abandon the latter city also to its fate; and when he himself in a. c. 204 withdrew his forces into Brutium, he removed to Crotona 3500 of the principal citizens of Thurii, while he gave up the city itself to the plunder of his troops. (Appian, l.c. 57.) It is evident that Thurii was now sunk to the lowest state of decay; but the great fertility of its territory rendered it desirable to preserve it from utter desolation; hence in a. c. 194, it was one of the places selected for the establishment of a Roman colony with Latin rights. (Liv. xxxviii. 53; Strab. vi. p. 263.) The number of colonists was small in proportion to the extent of land to be divided among them, but they amounted to 30000 feet and 300 knights. (Liv. xxxviii. 9.) Livy says merely that the colony was sent "in Thurinum agrum," and does not mention anything of a change of name; but Strabo tells us that they gave to the new colony the name of Copias, and this statement is confirmed both by Stephanus of Byzantium, and by the evidence of coins, on which, however, the name is written Copia. (Strab. i. c.; Steph. Byz. x. e. Copias; Eckhel, vol. i. p. 164.) But this new name did not continue long in use, and Thurii still continued to be known by its ancient appellation. It is mentioned, as a municipal town, on several occasions during the latter ages of the Republic. In a. c. 72 it was taken by Spartacus, and subjected to heavy contributions, but not otherwise injured. (Appian, B. C. i. 117.) At the outbreak of the Civil Wars it was deemed by Caesar of sufficient importance to be secured with a garrison of Gaulish and Spanish horse; and it was there that M. Coelius was put to death, after a vain attempt to excite an insurrection in this part of Italy. (Cass. B. C. iii. 21, 22.) In a. c. 40 also it was attacked by Sextus Pompeius, who laid waste its territory, but was repulsed from the walls of the city. (Appian, B. C. v. 56, 58.)

It is certain therefore that Thurii was at this time still a place of some importance, and it is mentioned as a still existing town by Pliny and Ptolomy, as well as by Strabo. (Strab. vi. p. 263; Plin. iii. 11. a. 15; Ptol. iii. l. § 12.) It was probably, indeed, the only place of any consideration remaining on the coast of the Tarentine gulf, between Crotona and Tarentum; both Metapontum and Hercules having already undergone their total decay. Its name is still found in the Itineraries (Itin. Ant. p. 114, where it is written "Turio;" Tab. Peut.); and it is noticed byProcopius as still existing in the 6th century. (Procop. B. G. i. 15.) The period of its final decay is uncertain; but it seems to have been abandoned during the middle ages, when the inhabitants took refuge at a place called Terranovia, about 12 miles inland, on a hill on the left bank of the Crathis.

The exact site of Thurii has not yet been identified, but the neighbourhood has never been examined with proper care. It is clear, from the statements both of Diodorus and Strabo, that it occupied a site near to, but distinct from, that of Sybaris (Diod. xii. 10; Strab. i. c.); hence the position suggested by some local topographers at the foot of the hill of Terranovia, is probably too far inland. It is more likely that the true site is to be sought to the N. of the Coscile (the ancient Sybaris), a few miles from the sea, where, according to Zannoni's map, ruins still exist, attributed by that geographer to Sybaris, but which are probably in reality those of Thurii. Swinburne, however, mentions Roman ruins as existing in the peninsula formed by the rivers Crathis and Sybaris near their junction, which may perhaps be those of Thurii. (Swinburne, Travels, vol. i. pp. 291, 292; Romanielli, vol. i. p. 236.) The whole subject is very obscure, and a careful examination of the localities is still much needed.

The coins of Thurii are of great beauty; their number and variety indeed gives us a higher idea of the opulence and prosperity of the city than COIN OF THURII.
we should gather from the statements of ancient writers. [E. H. B.]

THURUM. [Borotla, p. 412, b.]

THYAMIA. [Phyllis, p. 605, b.]

THYAMIS (Θαμής), a river of Epirus, flowing into the sea near a promontory of the same name. (Ptol. iii. 14. §§ 4, 5.) It formed the northern boundary of Thessaly, which it separated from Cestrine, a district of Chonisia (Thuc. i. 46; Strab. vii. p. 324; Paus. i. 11. § 2; Cic. ad Att. vii. 2, de Leg. ii. 5; Plin. iv. 1.) It is now called Kalam, apparently derived from the large reeds and aquatic plants which grow upon one of its principal tributaries. Its ancient name seems to have been derived from the Sws or juniper, which, Leake informs us, though not abundant near the sources of the river, is common in the woody hills which border the middle of its course. The historian Phylarchus relates (cf. Athens, iii. p. 73) that the Egyptian bean, which grew only in marshy places and nowhere but in Egypt, once grew for a short time upon the banks of the Thyamis. (Leake, Northern Greece, vol. i. p. 103, vol. iv. p. 97.)

THYAMUS (Θαμύς), a mountain lying to the S. of Argo, Amphilochium, identified by Leake with Spinaeum. (Thuc. iii. 106; Leake, Northern Greece, vol. iv. p. 251.)

THYATEIRA (θατεία) [Ech. Thouarepsia], a considerable city in the north of Lydia, on the river Lycus, and on the road leading from Sardes in the south to Germa in the north. It was anciently called Poleoza, Exilippa, and Semirimnia. (Plin. v. 31; Steph. B. a. e. Godrepe.) Strabo (xii. p. 625) called it, apparently correctly, an island, which, we probably mean only that during the Macedonian period it was increased and embellished, for Stephanus B., admitting that it previously existed under other names, relates that Seleucus Nicator gave it the name of Thyatesia or Thateira on being informed that a daughter (Θατειρά) was born to him. But whatever we may think of the name of this cities, she was probably means only that during the Macedonian period it was increased and embellished, for Stephanus B., admitting that it previously existed under other names, relates that Seleucus Nicator gave it the name of Thyateira or Thateira on being informed that a daughter (Θατειρά) was born to him. But whatever we may think of the name of this city, she was probably mean

THYMARBA (Θυμάρβα), a place near Samos, not far from the small river Patoles, at which the inhabitants of Asia Minor used to assemble. (Ist. ii. 11.) Some are inclined to identify this place with Thymarba, mentioned by Diodorus Siculus (ix. 68: in this latter place could hardly be said to exist, or even near the Patoles. [L.]

THYMES, a tributary of the Scamander. Phrygia (Liv. xxxviii. 18), is no doubt the site of the Phrygian town of Phrygia (vi. 1) and the river in the Argonautica bearing the name of Paces (713), where the river is described as abounding in fish. [L.]

THYMBRIS (Θυμβρίς), a small town a few only 4 stadia east of Myus on the bank of the Maeander in its neighbourhood. There called Charisum, or cave from which water issued. (Strab. viii. 365.)

THYMENIUM (Θυμενιον), a small river east in the neighbourhood of Ilissus; it was a tributary of the Scamander, and on its banks stood the town of Thymbris (Strab. xiii. p. 586; Eustach. of Siris II. x. 430.) There still exists in this city a small river called Timbrus, which, however, are not those into the Scamander, but into a bay of sea, if this be the ancient Thymbris, the sea of Thymbris must have been at a considerable distance from Ilissus. For this reason, C. Leake inclined to identify the Thymbris rather with the Kamarus Sin, which is still a tributary of the Scamander or Meander Sin (Asia minor, p. 258.) [L.]

THYMNTA (Θυμόντα), a place on the coast of Paphlagonia, at a distance of 90 stadia from the

TOWN OF THYATIERTA.
THYMATERION.

giaus. (Arrian, Perip. P. E. p. 15; Anonym. Perip. P. E. p. 6.) Ptolemy (v. 4, § 2) mentions it under the name of Thymania, and states that it was also called Tenthria. [L.S.]

THYMATERION (Θύματεριον; Hanno, Perip. P. E. p. 6.) by Strabo (v. 23) Θυμάτεριον, the first Carthaginian colony planted by Hanno on the west coast of Mauretania, 26 miles south-west of Livon, on the Sinus Emporicus. There is no further mention of it. It has been variously identified with Marmora, Laroche, and Tantier, but perhaps most correctly with the first.

[TR. H.D.]

THYMOS (Θυμός) on the south side of Caria, on the south-west of the bay of Schoenna, and between Capes Aphrodium and Posidium. (Pomponius Mela i. 16: Pliny v. 29.)

THYMOETADES. [Attica, p. 325, b.]

THYN (Plin. iv. 11. s. 18, v. 32. s. 43; Solon, Herod. i. 28), a people in the SE. part of Thrace, between the Agrianes and the mountains which separate their head-waters from the Exotheus. At a very early period, a portion of the tribe, along with the related race of the Bithyni, emigrated to Asia Minor, where they occupied the district afterwards called Bithynia; but part of which seems originally to have been named more directly from the Thyni, since we find the names Θυναῖος Σφαῖρα (Mammon c. 7. 201), and Θυναῖον Σφαῖρα (Steph. B. p. 315), and Thynia (Amm. mass. xxi. 8, § 14). Respecting the Asiatic Thyni, see also Strabo, vii. p. 295, xii. p. 541; and the article ΘΥΝΙΑΤΙΑ.

Of the Thyni who remained in Europe scarcely any notices is taken by the ancient historians. When Xenophon and the remnant of the 10,000 Greeks escaped from the Persians in 401 B.C., in which they were employed had for its object the subjugation of the Thyni, who were said to have defeated Teres, an ancestor of Seuthes (Aesop. vii. 2, § 22). Xenophon gives them the somewhat equivocal character of being the most warlike of all people, especially by night: and he had personal experience of their fearlessness for nocturnal fighting; for he says, "I was driven up the side of the mountains, to which the Thyni had retired on the approach of Seuthes and his forces, he was attacked by them on the next night, and narrowly escaped being burnt to death in the house in which he had taken up his quarters (Ib. 4, § 14, sec.)."

But this attack having failed, the Thyni again fled to the mountains, and soon afterwards submitted to Seuthes. Xenophon visited the country of the Thyni in the winter (Ib. 6, § 31), which he describes as being extremely severe, there being deep snow on the ground, and so low a temperature, that not only water, but even wine in the vessels was frozen; and many of the Greeks lost noses and ears through frostbite. (Ib. 4, § 33.)

THYNNAS (Θυναίας), a small island in the Euxine at a distance of one mile from the coast of Thynia or Bithynia; its distance from the port of Rhodos 20 stadia, and from Cape 40. (Plin. vii. 13; Arrian, Perip. P. E. p. 13.) The island had only a single town in its circumference, and had at first been called Alpaonia from a temple of Apollo which existed in it. (Plin. Arrian, L. c.; Apollon. Rhod. 177, 675; Anon. Perip. P. E. p. 3.) According to Ptolemy (v. 1, § 15) it was also called Xanhipus, and obtained its name of Thynias from the Thyni, who inhabited the opposite coast. The island ad a port and a naval station belonging to Heraclia (Scolops, p. 34; Arrian, L. c.); and Mela (ii. 7) is probably mistaken in believing that the island contained a town of the same name. (Comp. Strabo, xii. p. 543, where it is called Thynia; Marcian, p. 69; Stephan. B. s. v.; Orph. Argon. 717, where it bears the name Thynia.) The modern name of the island is κύρας.

THYNIAS (Θυνιάς) in ii. 2, § 5; Plin. iv. 11. s. 18; Θυαίας, Strabo vii. p. 319, xii. p. 541; S wym. 727; Arrian, Per. P. Eux. p. 24; Anon. Per. P. Eux. p. 15; Pol. iii. 11. § 4; Stephan. B. s. v., a promontory on the Thracian coast of the Euxine, of the Salmydesses, which was probably at one time in the territories of the city (Hdt. viii. p. 319) speaks of the district as belonging to the people of Apollonia. Pliny (L.c.) mentions a town of the same name, which in some places is mapped a little to the south of the promontory, on the site of the modern Ἰουδαὰ or Ἰουσιά; but which, according to Dapper (de Archip. p. 515), is still called Thymus.

THYNOS or TYNOS, a town mentioned only by Pliny (v. 22) as situated between Mopus and Zephyrium in Cilicia. [L.S.]

THYRAEUM (Θυραίουμ; Θυραίος), a town of Arcadia in the district Cynuria, said to have been founded by Thyrarna, a son of Lycaon. It is placed by Leake at Palamidi. (Paus. viii. § 3, § 5; Steph. B. s. v.)

THYRAEUM (Μεγαλοπολίς, p. 310, a.)

THYREA, THYREATIS. [Cynuria.]

THYREATES SINUS. [Cynuria, p. 727, a.]

THYREUM. [Thyrium.]

THYRGONIDAE. [Attica, p. 330, a.]

THYRIDES (Θυρίδης), a promontory of Lacoia, on the western coast of the Lagynian peninsula, not called Cape Cronus. It is of a semicircular form, nearly 7 miles in circumference, and rises from the sea to the height of 700 feet. There are many apertures and clefts in the rocks, the abodes of innumerable pigeons, and from the window-like form of these holes the whole promontory has received the name of Thyridae. Strabo describes it as a θυρίδας αγρόν, "a precipice near the sea, distant 150 stadia from Tasmurus (reckoning from the northern point of Thyrides); Pausanias, as a promontory (κόρας), situated 70 stadia from Tasmur (reckoning from the southern point of the promontory). Pausanias likewise calls it a promontory of Tasmurus, using the latter word in its widest sense, to signify the whole peninsula of Θυρίδης. According to Strabo, the Mesenian gulf terminated at this promontory. Pliny (iv. 12. s. 56) mentions three islands of the name of Thyridae in the Asinian gulf. (Paus. iii. 25. § 9; Strab. viii. pp. 360, 362; Leake, Morea, vol. i. p. 302, seq.; Boëlaye, Recercues, f. c. p. 91; Curtius, Pelonsemus, vol. ii. P. 281.)

THYRIUM, or THYREUM (Θυρίουμ, Pol. iv. 25; Θυρίος, Pol. iv. 6; Θυρίου, Pol. xviii. 5; Θυρίος, Anth. Græc. ix. 553: Θυρίους, Thyriaeis), a city in Acanania, the exact site of which is unknown. It is placed by Pouqueville in the interior near the sources of the Anapus; and his authority is followed by K. O. Müller and others. This, however, is evidently a mistake. Cicero tells us (Pliny xv. 5) that in sailing from Alyzia to Leucas, he touched at Thyrium, where he remained two hours; and from this statement, as well as from the history of the events in which Thyrium is mentioned, we may infer that it was situated on or near the Ionian sea, and that it was the first town on the coast S. of the canal.
THYSYS or TYRSUS (Θύρσος veros, Pol.; Θύρος, Pana.; Τύρος), the most considerable river of Sardinia, which still retains its ancient name almost unaltered. It has its sources in the mountains in the N.E. corner of the island, and flows into the Gulf of Oristano on the W. coast, after a course of about 75 miles. About 20 miles from its mouth it flows into the beds of the Tracian, the ruins of which are still visible at Forcastramonius; and about 36 miles higher up are the Bagani di Benetutti, supposed to be the Aequi Lusitanae of Ptolemy. The Itineraries give a station "ad Caput Tyrae" (Itin. Ant. p. 81), which was 40 M.P. from Olbia by a rugged mountain road: it must have been near the village of Budcoi. (De la Marmora, Voy. en Sardegnia, vol. ii. p. 44.) The Greeks and Romans called it Thrasius; and in early times the Thrasius was the boundary between the part of the island occupied by the Greeks and Trojans and that which still remained in the hands of the native barbarians. (Pana. x. 17. § 6.) [E. H. B.]

THYSDRUS (Θύσδρος, Pol. iv. § 39), the oppidum Tuscritanum or Thydriratium of Pliny (v. 4, 34), a town of the Tusci, in the Roman province of Africa, lying midway between Thrasus and Thapsus, and west of the promontory Brachides. It was here that the emperor Gordianus first set up the standard of rebellion against Maximin (Herodian. vii. 4, seq.; Capitol. Cord. c. 7, seq.); and it was from him, probably, that it derived its title of a Roman colony. We find the name variously written, at Tusdrus, by the Romans; and at Tnusdrus, in the Itin. Ant. (p. 59). Now El Jaame or Legum, with extensive ruins, especially of a fine amphitheatre in a tolerably perfect state. (Shaw, Travels, vol. i. p. 220, seq.) [T. H. D.]

THYSAS (Θύσας, Itin. Ant. 140). THYSUS (Θύσος), a town of Messenia, situated on the W. coast of the peninsula of Acrophylos or Mt. Atreaton. In ancient times it was occupied by the principal part of the W. coast of the peninsula, and that one of them was called Zygorna or Dibokhaeina, and the other Iacan. (Herod. vii. 22; Thuc. iv. 103, v. 30; Strab. viii. p. 331; Plin. iv. 10. s. l.; Itin. Ant. v. 44, 125.)

TIBERIUS (Tiberius) was a town in Dacia, in the neighborhood of Focinae. (Itin. Ant.)

TIBARIANI (Tibrarini), a tribe occupying the country between the Syrtus and the Mysenaei, on the east coast of the island. They were considered as early as the time of Herodotus (vii. 94), and were believed to be of Scythian origin. (Schol. ad Apoll. Epist. 1010; Xen. Anab. v. 2. § 2; Steph. B. s. v. Tiberia.) Strabo (ii. p. 574) states that the inhabitants of the town of Tiberinai, near the Muses, inhabited the country between the Muses and the rivers Oenobus and Cessicus and Tyrrynusa as their principal towns. (Casp. i. 1. § 1.)

TIBERIACUM, in North Gaull, is said to be near the Antonine Itin. between Julianum and Baelonia Agrrippina (Cologne), near from Avaria to Colonia. D'Anville and others place it at Berghem, at the passage of the river, on which flows between Julianum and Colonia. (Avaria) to the place Tiberiacum at Torren, south of Berghem, and near the bridge is. D'Anville adds that in the direction of the town Julianum is called Stain-on-Strass, that is, close (Stone Street), just as in our province Cheston Perré. (Avaria, Notiz. Gallien, p. 544.)

TIBERIUM (Tiberius, Joseph. Antiq. B. J. ii. 8, iii. 16; Steph. B. s. v. Paris) was a town of the sea of Tiberias and Genesareth, situated in the most beautiful and fruitful of that state (Joseph. Antiq. xvi. 2. § 1.), and for a long period it was adorned with a royal palace (Joseph. Antiq. xii. 13, 64.) It was
TIBERIAS MARE.

strach Heroes Antipas, in honour of the Roman emperor Tiberius, from whom it derived its name. 

Joseph. I. c.) It is stated to have been 30 stadia from Hippo, 60 from Gades, and 120 from Scythopolis (Joseph. Vit. 65); distances which are not unusual in that of Joliffe, who states that it was 20 miles English from Nazareth and 90 from Jerusalem. (Travel, p. 40.)

From the time of Heroes Antipas to that of the reign of Agrippa II., Tiberias was probably the capital of the province (Joseph. Vit. 9), and it was one of the four cities which Nero added to the cincture of his Domitian. (Joseph. Vit. 8.)

In the last Jewish War, Tiberias, from its great strength, played an important part (Joseph. B. J. ii. 10); as, after Sepphoris, it was held to be the largest place in Galilee (Joseph. Vit. 65), and was very strongly fortified. (B. J. iii. 10. § 1.)

The inhabitants derived their sustenance in great measure from their fisheries in the adjoining sea. (Joseph. Vit. 12.) On the destruction of Jeru-

The immediate neighbourhood of Tiberias was the celebrated hot springs of Emmaus (Joseph. B. J. ii. 31, Ant. xxii. 2) [EMMAUS]. It is not certain to which of the two Tiberi-

ereth, though Hieronymus thinks so (Onom. s. v. 'Chinnereth'); it seems more likely that this place belonged to the tribe of Naphtali. (Josh. xix. 15; Reuben, Palaeast. p. 161.) Nor is there any better reason for identifying it, as some have done, with Dammamat (Joseph. xix. 35) or Bakkath, which was the name of a town of the Gibeonites; Lightfoot, Chorograph. Cent. cap. 72—74.) The modern name of Tiberias is Tabardesh; it is not, however, built actually on the site of the old town, though close to its ruins. When Joliffe was there, it had a population of 11,000 (Travel, pp. 48—53.) It was nearly destroyed by an earthquake on New Year's Day, 1867, since which time it has never been connected with the Madam (Joseph. B. J. ii. 35) and all of fish (Joseph. E. J. iv. 26; Math. ix. 8; Luke, v. 1, &c.), and its size is variously tated, by Josephus (l. c.), to have been 140 stadia long by 40 broad, and by Pliny, to have been 16 M. P. long and 6 M. F. broad (v. 15.) It was traversed in a direction NW. and SW. by the river Jordan. (Joseph. B. J. iii. 35.) This river is known by many different names in the Bible and profane history. Its earliest title would seem to have been 'Chinnereth (Num. xxxiv. 11; Josh. xiii. 27; LXX. Cent. From this form has probably arisen the second appellation of Gennesaret (ς Αμμων Περ-

ηροπορής, Math. xiv. 34, &c.; Steph. Pont., 1 Macrob. ii. 67; &c. Αμμων Περιοριστ., Joseph. B. J. i. 34 Αμμων Περιοριστ., Joseph. Ant. xvii. 3; Strab. iv. p. 755; Genasa, Plin. v. 15.) A third appellation it had from the province with which it was most nearly connected, viz. the sea of Galilee (Σαλαμαν τῆς Παλαμάς, Math. iv. 18; Mark, vii. 31, &c.; and with a double title, Σαλαμαν 

Τῆς Γαλαλας, τῆς Τεβελας, John vi. 1.) Pliny, in describing the same localities, speaks of a town called Tarichaeas, from whence he also says the adjoining lake was sometimes named (l. c.; cf. also Strab. xvi. p. 764). The present name is Bakr-al-Tabarish. (Travel, p. 83; Travel, p. 387; Haselquist, i. p. 181; Robinson, iii. pp. 499—509, &c.) [V.]

TIBERIOPOLIS (Τιβεριοπολις), a town in Phrygia Major, in the neighbourhood of Ennia. (Pol. v. 2 § 25; Socrat. Hist. Eccles. vii. 46.) Its site is yet uncertain, but Kiepert (in Frans. Pimpf Inschriften, p. 274) regards it as a town near Syedum, in the region of Tiberiopolis. Hamilton (Researches, i. p. 137, foll.) probably more correctly, regards them as the ruins of Blanuda. (Comp. Arundel, Discoveries, i. p. 81, foll.)}

TIBERIS (ἡ Τιβέριος; Tevera, Tiber; the forms Tībria, Tybris, and Tībria are chiefly poetical, as is Θυβρία also in Greek; the Latin poet Sen also Tiberius as an adjective form, as Tiberinum pater, Tiberinum flumen, &c., and whence sometimes Tīberinum by itself as the name of the river), one of the most important rivers of Central Italy. It has its sources in the Apennines above Tifernum, but in the territory of Arretium (Flint. iii. 5. s. a), on the confines of Etruria and Umbria. It first flows in a southerly direction, passing by the walls of Tiferum, which derived from it the name of Tiberium (Città di Castello), and afterwards within a few miles of Perusia on the E, and within a still shorter distance to the W. of Tuder (Todi). From thence it still preserves a general S. direction, notwithstanding considerable windings, till it receives the Anio (Teverone), a few miles from the walls of Rome, from which point it has a general SW. course to the sea at Ostia. Pliny estimates the upper part of its course at 150 miles, to which must be added about 35 more for the lower part, giving as a total 185 miles (Flint. Lc.; Strab. v. p. 218); but this estimate is below the truth, the whole course of the river being about 350 miles. During the whole of its course from Tifernum to the sea the Tiber formed in ancient times the eastern boundary of Etruria, separating that country from Umbria in the upper part of its course, afterwards from the territory of the Sabines, and, in the lower part, from the mouth of the Anio downwards, dividing it from Latium. (Strab. v. p. 219; Plin. iv. 2.) It receives numerous confluent or tributaries, of which the most important are, the Tumia, an incon- siderable stream which joins it from the E. a little below Perusia, bringing with it the waters of the more celebrated Clitumnus; the Clamen, which falls into it from the right bank, descending from the marshy tract near Clusium; the Maris, a much more considerable stream which joins it by the Vellinus a few miles above Interamna, and discharges their combined waters into the Tiber, a few miles above Orvulenum; and the Anio, which falls into the Tiber at Antemnae, 3 miles above Rome. These are the only affluents of the Tiber of any geographical importance, but among its minor tributaries, the Ailla on its left bank, a few miles above the Anio, and the Cremerna on the right, are names of historical celebrity, though very trifling streams, the identification of which is by no means certain. [See the respective articles.] Two other streams of less note, which descend from the land of the Sabines and fall into the Tiber between Oriculum and Ere-
TIBERIS.

Tiber is unquestionably, in a merely geographical point of view, the most important river of Central Italy, but its great celebrity is derived from its flowing under the walls of Rome, or rather through the heart of the city, after this had attained to its full extension. The detailed account of the river in this part of its course must be sought in the article ROMA; but we may only mention that river, flowing over the Milvian Bridge [Pons Milvius or Milvius] the river makes a considerable bend to the W. so as to approach the foot of the Vatican hills, and leaves, on the other side, between its left bank and the nearest ridge of hills, a broad tract of plain, early known as the Campus Martius, the whole of which was eventually included within the imperial city. A short distance lower down, but still within the walls of the city, its stream was divided into two by an island known as the Isola Tiberina, and reported by tradition to have been formed by alluvial accumulations within the period of Roman history. It is remarkable that this is the only island of any consideration in the whole course of the river (the exception of that called the Isola Sacra), at its mouth, formed by the two arms of the river, and which is undoubtedly of late growth, and in great part of artificial formation.

The Tiber was at all times, like most rivers which are supplied principally by mountain streams, a turbid, rapid, and irregular river, that must always have presented considerable difficulties to navigation. The lower part of its waters is repeatedly alluded to by the Roman poets ("flavum Timiberum," Hor. Car. i. 2. 13; "ano cum surgit flavo," Virg. Aen. ix. 816; &c.), and the truth of Virgil's description, "Vorticibus rapidis et multa flavus arena,"
(Aen. vii. 31), must be familiar to every one who has visited Rome. In the upper part of its course, as we learn from Pliny, the rivers, though difficulty navigable, even for small boats; nor did its first tributaries, the Tilia and Cianthus contribute much to its facilities in this respect, though their waters were artificially dammed up, and let off from time to time to augment the main stream. (Plin. iii. 5. s. 9.) But from the point of its junction with the Narnia, the Tiber became navigable for larger vessels, and one of the early period extant supplies of various kinds were brought down the river to Rome. (Liv. ii. 34. v. 54; Cic. de Rep. ii. 5; &c.) In the more flourishing period of the city the navigation of the Tiber was of course enormously increased; and vast supplies of timber, stone, and other materials for building, as well as corn and provisions, were continually introduced by means of the river and its tributaries. (Strab. v. p. 235.) Corn was brought down the Tiber even from the neighbourhood of Tifernum, when the upper part of the stream was navigable. (Plin. Ep. v. 6.) It seems also to have been used as an ordinary mode of travelling, as we are told that in A. D. 20, Plinius the Elder is said to have proceeded from Narnia to Rome by descending the Tiber and the Tiber. (Tac. Ann. iii. 9.) At the present day the river is navigated by boats of large size as far as the confluence of the Nera, and small steamers ascend as far as Borghetto, a few miles from Orticoli.

But it was from Rome itself to the sea, a distance of 27 miles by the river (Strab. v. p. 232), that the navigation of the Tiber was the most important. Pliny speaks of it as in this part of its course navigable for the largest vessels ("quantum nauta numquam navium ex Italo mari capax"), and as being the receptacle of merchandise from every part of the world. The latter statement may be really admitted; but the former is calculated to astonish any one acquainted with the river in its present condition; yet it is partly confirmed by the distinct statement of Strabo (v. p. 233), that the larger class of merchant vessels used to ride at anchor in the open sea, on the Reclamation of a part of their cargoes, which they discharged into barges, and afterwards proceeded up the river to Rome. Dionysius gives the same account, with the exception that vessels which exceeded 3000 amphorae in burden were made to enter the river at all, and forced to send their crews up by barges. (Dionys. iii. 44.) But all the small rowing vessels, not excepting the largest ships of war, were able to ascend the river (Jah) and when we find the younger Cato on his return from Cyprus proceeding at once in his galley to the Narahe and the walls of Rome. (Plut. Cæs. Min. 35.) We learn also from Livy that the ships of war which had been taken from the Persians were built at the mouth of the river, named "Marina Salina," were carried up the river as far as the Campus Martius (Liv. xiv. 42); and even the gigantic vessel constructed for the purpose of bringing the fleet which was to be set up in the Circus Maximus, was said to ascend as far as the Vicus Alexandrinus, within two miles of Rome (Ammian. xvi. 4. § 14). The difficulties that impeded the navigation of the river in the times of the event, are ascribed to the intervention of two natural disasters. "Omnia addita sunt ad istud, sed laudabilis est gravitas, sed laus gravitatis," which the mouths of the Tiber underwent, are fully given in the article Onia. To the importance of the navigation of the Tiber last referred, the formation of distinct bodies or companies in connection with it, called Nauticarum and Lentosarum, both of which are frequently mentioned in inscriptions of imperial times (Pader. p. 14.) Another disadvantage, which the Tiber has had to labour under, in common with most rivers of modern origin, arose from the frequent inundations which it was subject to. This appear to have occurred at all ages of the Roman history; but the earliest recorded is in n. c. 241, immediately after the battle of the first Punic War (Graec. iv. 13), which is said to have swept away all the houses and buildings at Rome in the lower part of the city. Similar inundations, which did more or less damage to the city are recorded by Livy in n. c. 215, 202, 154., again in 192 and 189 (Liv. xiv. 9, xlv. 38, us. 9, 21, xxiv. 28) and there is little doubt that it is only from the loss of the settled mode of transportation that the numerous natural catastrophes till near the close of the Republic, we find a great inundation of the Tiber made by taking place in n. c. 54 (Dion Cass. xxvi. 16), which is alluded to by Cicero (ad Q. Fr. ii. 1,) and several similar inundations are known to have occurred in the time of Augustus, in n. c. 22, and 23, of which the first is probably that which is to be Horace in a well-known ode. (Hor. Carm. ii. 2. 13; Orell. Exerc. ad L. C. Diom. Cass. ii. 26
TIBERIUS.

33, lr. 1.) Great attention was bestowed by Augustus upon the subject, and he first instituted magistrates with the title of Curatores Tiberis, whose special duty was to endeavour to restrain the river within due bounds, to preserve the embankments, &c. (Suet. Oct. 37.) These officers received increased power by the edict of Augustus, which directed that no work should be done, down to the close of the Empire. We frequently meet with mention in inscriptions of the "Curatores alvei Tiberis et riparum," and the office seems to have been regarded as one of the most honourable in the state. (Dion Cass. xvi. 14; Orell. Inscr. 1172, 2284, &c.; Gruter, Inscr. pp. 197, 198.) But it is evident that all their efforts (were indeed ineffectual). In the reign of Tiberius so serious was the mischief caused by an inundation in a.d. 15 that it was proposed in the senate to diminish the bulk of the waters by diverting some of the chief tributaries of the stream, such as the Nar, Velinus and Clania. (Tac. Ann. i. 76; Dion Cass. viii. 14.) This plan was, however, abandoned as impracticable; and in a.d. 69 another part of the same place, which appears to have caused still more damage than any that had preceded it (Tac. Hist. i. 86). It is strange that in face of these facts Pliny should assert that the Tiber was so confined within artificial banks as to have very little power of outburst, and that its inundations were rather subjects of extraordinary alarm than formidable in themselves. (Plin. iii. 5. s. 9.) During the later ages of the Empire indeed we hear but little of such outbreaks of the Tiber, but this is very probably owing only to the scanty nature of our records. One great inundation is, however, recorded as doing great mischief in the reign of Trajan, another in that of Macrinus, and the third in the year 257 on a very large scale. (Vit. Cass. 34, Epit. 13.) One of the most destructive of all is said to have been that of a.d. 590, which added to the various calamities at that time almost overwhelmed the city. (Hist. Miscell. xviii. p. 583; Greg. Turon. x. 1.) At the present day the lower parts of Rome are still frequently flooded by the river, for though the soil of these parts of the city is generally higher than in the extramural district of the city, there are places many feet, the bed of the Tiber has undoubtedly been also elevated, though probably in a less degree. The whole subject of the inundations and navigation of the Tiber, and the measures taken in ancient times in connection with them, is fully illustrated by Freiler in an article entitled "Röm und der Tiber in der Bericht der Städtischen Gesellschaft für 1848 and 1849."

The Tiber appears to have been in ancient times occasionally frozen, at least partially; a circumstance to which the Latin poets repeatedly allude. But we must not construe their rhetorical expressions too strictly; and it is clear from the terms in which Livy notices it that rain or frost was an extraordinary winter of a.c. 398, that such an occurrence was of extreme rarity. ("Insignis annus hiems gelida ac nivosia fuit, adeo ut visa clara, Tiberis innavigabilis fuerit," Liv. v. 13.) St. Augustine also alludes to such a winter (approximately the same noticed by Livy), "ut Tiberis quoque glacie duraret," as a ling unheard of in his times. (August. Civ. Dei, ii. 17.)

It was a tradition generally received among the Romans that the Tiber had been originally called Albula; and that it changed its name in consequence of Tiberinus, one of the fabulous kings of Alba, having been drowned in its waters. (Liv. i. 3; Dionys. i. 71; Vict. Orig. G. Rom. 18.) Virgil, however, who calls the king Thybris, assigns him to an earlier period, prior to the landing of Aeneas (Aen. viii. 330). Hence the river is not unfrequently called by the Roman poets Albula. (Sil. Ital. vii. 9, viii. 455, &c.) It had naturally its literary divinity or river-god, who, as Apollo (hibi Apollinis) was regularly invoked in their prayers by the augurs under the name of Tiberinus (Cic. de N. D. iii. 20). He is frequently introduced by the Roman poets as "pater Tiberinus" (Enn. Ann. i. p. 43; Virg. Aen. viii. 51, 72; &c.)

TIBIGENSE OPPIDUM, a town in Africa Poppaea, apparently the Tithebra (Liv. iv. 5. 29; Plin. v. 4. 4.) [T. H. D.]

TIBILIS, a town in the interior of Numidia, 54 miles from Cirta having hot mineral springs (Aqua Tibitanicae) (August. Ep. 129; Hes. Ant. p. 44), commonly identified with Hamman Meskiss in the mountains near the river Sellibia; but, according to D'Arseas and the map of the province of Constantine (Par. 1837), it is Tamnara Meski, Berda, somewhat more to the N. [T. H. D.]

TIBISCUM (Tibisuros, Potii. iii. 8. § 10), a town of Dacia, on the river Tibiscus. By the Geogr. Rav. it is called Tibis (iv. 14), and in the Tab. Peut. Tiviscum. Its ruins exist at Kavara, at the junction of the Temeza (Tibiscus) and Bistra (cf. Ukert, iii. 2. p. 617).

TIBISCUS (Tibiscos, Potii. iii. 8. § 1), a tributary river of the Danube in Dacia. We also find it called Tisibius (Inscr. Grut. p. 448. 3) and Tibisia (Geogr. Rav. iv. 14). Several authors identify it with the Tisianus or Tisia (the modern Tisza), with which, indeed, Ptolemy seems to have confounded it, as he does not mention the latter (Mannash, ii. 10; Ptolemy, iv. 12. 25) and Partiscus of Ammianus Marcellinus (xvii. 13. § 4) are the same river, though some identify them with the Tisianus. [T. H. D.]

TIBISIS (Tibisios), a large river of Scythia, which Herodotus describes as rising in Mt. Haemus, and flowing into the Maris (iv. 49). It is identified by some with the Kara Lowe.

TIBULA (Tibulae, Potii.), a town of Sardinia, near the N. extremity of the island, which appears to have been the customary landing-place for travelers coming from Corsica; for which reason the Itineraries give no less than four lines of route, taking their departure from this place of passage. (H. A. Ant. pp. 78-83.) It is very uncertain therefore that its position is a matter of great uncertainty. That assigned to it by Ptolemy would place it on the site of Castell Sardo on the N. coast of the island, and only about 18 miles from Porto Torres, but this is wholly incompatible with the statements of the Itineraries, and must certainly be erroneous. Indeed Ptolemy himself places the Tibilates, or Tibulatii (Tibulatii), who must have been closely connected with the town of that name, in the extreme N. of the island (Potii. iii. 3. § 6), and all the data derived from the Itineraries concur in the same result. The most probable posi-
tion is, therefore, that assigned by De la Marmora, who fixes it on the port or small bay called *Porto di Lungo Sardo*, almost close to the northernmost point of the island, the Erbeantium Prom. of Ptolemy. (De la Marmora, *Voy. et Sardaigne*, vol. ii. pp. 421—432, where the whole question is fully examined.) [E. H. B.]

**TIBUR.** (See TIBURIA.) Tiberius, Thrb.r, (See TIBERIUS.). Polyb. vi. 14.; 1 Tiberius, Suet. v. p. 238; r. Tiberius, Ptol. iii. i. § 58; r. Tiberius, Steph. B. p. 564. *Etub. Tiber. Lib. vii. 79.; Virg. *Aen.* vi. 717. Hor. *S. i. 6. 108; Tac. *Ann.* xiv. 22, &c.; Tiburtinus, Cic. *Phil.* v. 7; Prop. iv. 75; Plin. *Ep.* viii. 29, &c.; Tiburum, Stat. *Silv.* i. 3. 74; Prop. iii. 22, 25. Tibur was the chief city of Latium, seated on the Anio, to the NE. of Rome, from which it was distant 20 Roman miles (*Itin. Ant.* p. 309; cf. Mart. iv. 57; Prosop. B. G. ii. 4.). Tibur lies on an offshoot or spur thrown out from the northern side of what is now called Monte Aboli, at a level of between 80 and 900 feet above the sea. This ledge extends across the bed of the Anio to Monte Castello on its north bank, thus forming a natural barrier over which the river leaps into the valley below, from a height of about 80 feet, and forms the celebrated waterfall so frequently mentioned by the ancient writers (Strab. l. c.; Dionys. H. v. 37; Hor. *Od.* i. 7. 13, &c.). The town lay principally on the cliff on the left of the river, opposite the half town on the right of the Anio. It is probable that at a remote period the waterfall was lower down the river than it is at present, since there are tokens that the stream once washed the substructions of the terrace on which the round temple is built; especially a broken wheel embedded in the cliff at a height of 150 feet above the river, and useful for a catastrophe in A. D. 105 recorded by the younger Pliny (Ep. viii. 17), when the Anio burst its banks and carried away whole masses of rock—monste he calls them—with the groves and buildings upon them, must have produced a remarkable change in the character of the fall. We may gather, from some descriptions in Propertius (iii. 16. 4) and Statius (*Silv.* i. 3. 73), that previously to these events the Anio leaped indeed from a high rock, but that its fall was broken towards its lower part by projecting ledges, which caused it to form small lakes or pools. From the time of Pliny the cataract probably remained much in the same state down to the year 1826, when the river again swept away a number of houses on the left bank, and threatened so much danger to the rest that it was found necessary to divert its course by forming a tunnel for its waters through *Monte Castello* on the right bank. This alleviated the romantic points of view on the sides of the grooves of Neptune and the Sirens; but the fall is still a very fine one. Scarcely inferior to it in beauty are the numerous small cascades, called *Cascatelle*, on the western side of the town. These are formed by water diverted from the Anio for the supply of various manufactories, which, after passing through the town, seeks its former channel by precipitating itself over the rock in several small streams near what is commonly called the villa of Marcellus. Nothing can be finer than the view of these cascades from the declivities of *Monte Pescacronare*, whence the eye ranges over the whole of the Campagna, with Rome in the distant background.

The country around Tibur was not very fertile in grain, but it was celebrated for its fruit-trees and orchards (*pomai Tiburis arra*, *Col. B. R.* iii. 35, ed. Lugd. 1548; cf. Propert. iv. 7. 81: "Pomai Anio qua spinifer incanab arius"); and especially for its grapes and figs (*Plin. xiv. 4. 7. x. 19*). In stone, now called *rosetto*, was much used in Rome for building, whence it was called *rosetio* (Plin. *N. H.* xii. 29), which became *rosetio* in *Tibur* (Strab. *L. C.*). Vast remains of ancient curia may still be seen on the banks of that river (*Silv. *Vingg. Ant.* i. 112). Of this material were constructed two of the largest edifices in the world, the Colosseum and the Basilica of St. Peter. The site of Tibur was healthy and bracing, and this was one of the chief recommendations of the town, together with its beautiful scenery, which made it a favourite retirement of the wealthy Romans. Besides its salubrity, the air was said to possess the peculiar property of blanching ivory (*Silv. *It.* xii. 229; *Marti. viii. 26. 19*). Tibur also was famed for its pottery (*Sen. Ep.* 119).

The foundation of Tibur was long anterior to that of Rome (*Plin. *N. H.* xiv. 27*). According to the poem of Haliacmaeus (i. 16), it was one of the cities founded by the Siciuni when they had possessed of Italy; in proof of which statement he gives the fact that in his own time part of the town was called *Sicelona*; a name which would indicate its having been one of the chief cities of that people. Another legend affirmed that the Siciuni were expelled by the Latins under Titus and Calpurnius, sons of *Catullus I.* The last was the son of Amphius, the celebrated Theban king and prophet, who enjoined about a century before the Trojan War. Catullus migrated to Italy in consequence of a war sacrum. Tiburtus, or Tiburum, the eldest of these three sons, became the eponymous hero of the city for which he named the town. So the Siciuni dwelt only in unwalls towns, which were subsequently fortified by the Greek colonists of *H*.

According to Cato's version of the legend, Tibur was founded by Catillus, an officer of *Excrlic* (Solon. i. 2). From these accounts we see all events infer the high antiquity of Tibur. The story of its Greek origin was very generally adopted, and the town was often supposed to be the *moenia Catillii* by Horace (*Od.* i. 18. 2; *Jb.* ii. 6. 5; Virg. *Aen.* vii. 710; *Ov. Fast.* iv. 1, *Amor.* iii. 6. 45; *Stat. Silv.* i. 3. 74; *Sil. Lit.* ii. 285, viii. 364). Tibur possessed a small surrounding territory, the limits of which, however, we are unable to fix, all that we know respecting it being that the towns of Empulium and Sabina, both one or two others, at one time belonged to it. But these places lay in what is called the *Valle di Sol- bano*, to the NE. of the town, the name of which is probably connected with the *Sicelona* of *Boscario*. Empulium is identified with the present *Ampugna* a place about 4 miles distant from Tibur. Somewhat beyond Empulium is the modern *Sabbione*, in the same direction. The boundary between the Tiburine territory and that of the Sabines was very uncertain. Augustus adopted the Anio as the last yet considerable uncertainty seems to have prevailed even subsequently to the assumption of that boundary. Thus according to Tacitus (*Ann.* xiv. 22), the territory of Tibur extended beyond the Sabine to *Ampugna* and was made a part of the territory of the *Sabbione*. Originally Tibur with its territory seems to have belonged to the Sabines. Pliny enumerates Tibur among the Sabine towns (iii. 12. 17).
We know nothing of the history of Tibur except in connection with that of Rome. The first occasion on which we find it mentioned is in the time of the decemvirs, B.C. 446, when M. Claudius, the infamous tool of the decemvir Appius, went into exile there (Liv. iii. 58). It does not appear, however, as taking any active part in affairs till B.C. 357; in which year the Tiburtines shut their gates against the entry of the Romans. C. G. Licinius Calvus, who were returning from a successful expedition against the Hernici. There appear to have been previous disputes and complaints between the Tiburtines and Romans, and the latter seized the opportunity to declare war (Liv. vii. 9). But hostilities were suspended for a time by an incursion of the Gauls, who crossed the Anio and advanced to within 3 miles of Rome. This invasion of the Gauls was assisted by the Tiburtines; and therefore, after the barbarians had been repulsed by the prodigious valour of Manlius Torquatus, the consul C. Postellus was sent against them with an army in the following year. But the Gauls returned to the assistance of the Tiburtines; and at this juncture Q. Curtius was named dictator. The Gauls again advanced close to the walls of Rome, and a great battle was fought just outside the Porta Collina, in the sight of all the citizens. After a desperate conflict, the barbarians were defeated and fled to Tibur for refuge. Here they were intercepted by the consul Postellus, who chased them back to their last place, in which the Tiburtines who had come to their aid. For this achievement a triumph was awarded to Postellus, which we find recorded in the Fasti Capitolini as well as by Livy. This triumph, however, excited the ridicule of the Tiburtines, who denied that the Romans had ever met them in a fair and open field; and in order to wipe this disgrace from their name, in the following year, a nocturnal attempt upon Rome itself. But when day dawned and two armies, led by the two consuls, marched out against them from different gates, they were scarcely able to sustain the first charge of the Romans (Liv. vii. 11, 12). Yet the war continued for several years. In B.C. 350, the consul M. Papilius Lassus devastated their territory (App. B. C. i. 47). In the following year Marcius Poplicola took Empulum, one of their dependent cities (ib. 18; cf. Empulum). Sessula also yielded n 348 to the arms of M. Fabius Ambustus; and the Tiburtines would have lost all the rest of their territory had they not laid down their arms and submitted to the Roman consul. The triumph of Fabius is recorded in the Fasti and by Livy (ib. 19). Yet a few years later we find the Tiburtines joining the Latin league against the Romans; and even after the overthrow of the Latins they allied themselves with the Praenestini and Veletini to defend "cedum" (Id. viii. 19). In B.C. 235, the consul L. Scribonius Camillus, attacked and completely defeated them not only near their city, but in a field of a spurs of the inhabitants, and then took the town by scale. All Latium was now subdued, and we not again bear of the Tiburtines taking up arms against Rome (ib. 18). For this exploit Camillus is only obtained a triumph, but also an equestrian statue in the forum, a rare honour in that age. In the Senateconsultum subsequently drawn up for the settlement of Latium, Tibur and Praeneste were treated with more severity than the other cities, except Veletina. They were deprived of part of their territory, and were not admitted to the Roman franchise like the rest. The cause of this severity was not their recent insurrection, the guilt of which they shared with the rest of the Latin cities, but their having formerly joined their arms with those of the Gauls (ib. 14). Thus Tibur remained nominally free and independent, so that Roman exiles might resort to it (Polyb. vi. 14). Hence we find the Tiburtines taking refuge there when they fled from the rigours of their Roman conqueror, C. Marius, who had deprived them of the good dinners which they were accustomed to enjoy in the temple of Jupiter; an event more important than at first sight it might seem to be, since, without the Tiburtines, neither sacrificial, nor several other important ceremonies, could be performed at Rome. On this occasion the rights of the Tiburtines were respected. The senators sent ambassadors to them at an independent city, to request their assistance in procuring the return of the fugitives. The Tiburtines, like able diplomatists, took the pipes by their weak side. They invited them to dinner and made them drunk, and during the night carted them in waggon to Rome, so that when they awoke in the morning, sober, they found themselves in the Campus Martius (ib. 30). The story is also told by Ovid with his usual felicity (Fast. vi. 655, sqq.). Other instances might be adduced in which Tibur enjoyed the privilege of affording an asylum. That of M. Claudius, before alluded to, was of course previous to the conquest of Latium by the Romans; but we find Cinna, taking refuge at Tibur after the murder of Caesar (App. B. C. i. 65); and Ovid (as Posto, i. 8, 81, sqq.) notes it as the most distant land of exile among the ancient Romans.

It was at Tibur that Syphax, king of Numidia, expired, in B.C. 201, two years after being captured in Africa. He had been brought thither from Afica, and was destined to adorn the triumph of Scipio; a humiliation which he escaped by his death (Liv. xxi. 45). Some centuries later Tibur received a more interesting captive, the beautiful and accomplished Zenobia. The former queen of the East resided near the villa of Hadrian, in the unostentatious manner of a Roman matron; and at the time when Trebellius Pollio wrote his history, the estate still bore her name (Poll. xxx. 22). In the Barberini palace at Rome is preserved a bronze tablet on which is engraved the following fragment of a Senatusconsultum: Propertius, quod aed. acidamus, ea, om. merito, nostro iascere non potuisse. neque, voce. digne esse. quis, ferculis. neque, id. neque, res. poplicis, nostras. citate. esse. fas, etc. This monument, first acquired by Fulvio Orsini, and left by him to Cardinal Farnese, is published by Gruter (Inscr. cocc. cxxx. 12). The tenour seems to show that the Tiburtines had been accused of some grave offence from which they succeeded in excusing themselves; but, as there is nothing to fix the date of the inscription, various opinions have been entertained as to the occasion of it. As the style seems to belong to about the middle of the 7th century of Rome, Nibby (Dintorni, iii. p. 172) is of opinion that the document refers to the social war; that the Tiburtines had cleared themselves from the charge of taking part in that league, and were in consequence admitted to the Roman franchise at the same time, with many other Latin and Etruscan cities. This conjecture is by no means improbable. If, however, Tibur received the franchise before the civil wars of Marius and Sulla, the latter must have taken
it away when he deprived the rest of the municipal cities of it, with the exception of Anagnia (Cic. pro Dom. 30), but it was probably regained on the abdication of the dictator. The treasure deposited at Tibur in the temple of Hercules was appropriated by Octavian during his war against Licinius, leaving when too many other temples were plundered at Rome and in its neighbourhood. (App. B. C. v. 94.) From this period we have no notice of Tibur till the time of the Gothic war in the 6th century of our era. During the siege of Rome by Vitiges, Belisarius placed 500 men in it, and afterwards garrisoned it with Isaurians. (Procop. B. G. ii. 4.) But under his successor Totila a party of the Persians having introduced the Goths by night into the city, the Isaurians fled, and the Goths murdered many of the inhabitants with circumstances of great cruelty (Jub. iii. 10.). Great part of the city must have been destroyed on this occasion, since it appears further on (c. 34) that Totila having retired to Tivoli, after a vain attempt upon Rome, rebuilt the fortifications.

At present there are but few traces of the boundaries of the ancient city; yet there are certain points which, according toNibby (Dei lares iii. p. 186, seq.), enable us to determine the course of the walls with some degree of accuracy, and thus to estimate its circumference, as all events during the time of the Lombards and the Franks are known. These points are determined partly by the nature of the ground, partly by existing remains, and partly by positive testimony. The nature of the ledge upon which the town is built shows that the walls must have traversed the edge of it towards the N. and E.; and this assumption is confirmed by some remains. The two temples commonly known as those of the Sibyl and of Drusus, called Casus Victoris, and the evident pains taken to isolate this part, indicate it to have been the ancient acropolis or arx, and probably the Scenium of Diocletianus. On the W. the boundary is marked by some remains of the walls and of the gate opening on the road to Rome. On investigating this track, we find that it inclined inwardly, thus leaving out all that part now occupied by the Villa d'Este and its appurtenances. From this church it proceeded towards the modern gate of Santa Croce and the citadel built by Pope Pius II. on the site of the ancient amphitheatres. Thence to the Anio two points serve to fix the direction of the walls: first, the church of S. Clemente, which was certainly outside of them, since, according to the testimony of Marzi, some sepulchral stones were discovered there; second, the church of S. Vincenzo, which was certainly within them, as vestiges of ancient baths may still be seen at that spot. From the fortress of Pius II. the wall seems to have proceeded in an almost direct line to the Anio between the church of S. Bartolomeo and the modern gate of S. Giovannini. It did not extend to the opposite bank, as a small sepulchre of the imperial times has recently been discovered there, at the spot where the tunnel for diverting the Anio was opened; where also were found remains of an ancient bridge. Thence the plan of the city, with the abatement of some irregularities, formed two trapeziums joined together at their smallest sides. The arms also formed a trapezium completely isolated, and was connected with the town by a bridge on the same site as the present one of S. Martino. The circumference of the city, including the arms, was about 8000 Roman feet, or 1 3/4 miles. The remains of a wall which still exist are of three different epochs. The rarest and most ancient consist of trapezoidal masses. Others, near the Porta Romana or del Colle, are of opus incertum, and belong to the time of Sullus. The gate itself, though composed of quarried stones, is built of the gates of Rome of the age of Justinian. From the nature of the place and the direction of the ancient roads, Tibur must have had five gates; namely, three towards the W., one towards the S., and one towards the E., without counting that which communicated with the citadel; but with the exception of the Statistical, where the aqueduct called Anio Vetus begins, their names are unknown, and even with regard to that the reading is doubtful. (Front. Ag. p. 30.)

The ancient remains existing at Tivoli, to call them by the names under which they commonly pass, are, the temple and portico of Hercules, the temples of Vesta and Sibylla, the thermae or baths, the two bridges and the little tomb recently discovered, the Temple of Tivissi, the villas of Maecenas, of Varus, &c.

Tibur was famed for the worship of Hercules, and hence the epithet of Heracleus, so frequently applied to it by the Roman poets (Prop. ii. 32. 5; Sil. It. iv. 294; Mart. i. 13. 1, &c.; cf. Stat. Sil. iii. 1. 153.) The temple of that demigod at Tivoli was, according to Strabo (L. c.) mentioned the Heracleum and the waterfall as the distinguishing features of Tivoli just as it alludes to the temple of Fortune as the principal object at Praeneste. And Juvencal (xiv. 86, seq.) considers the extravaganza of Cetonia in building by saying that the villas at Tivoli and Praeneste outdid the fames of Hercules and Fortune at those places. The name of Heracleum used by Strabo of the former, as well as the term répures applied to it by Stephanus Byzantinus, show that it embraced a large tract of ground, and as Augustus is said to have frequently administered justice in its porticoes, it is probable that it was one of the largest in size. It possessed a library, which, however, in the time of the Antonines appears to have fallen into decay. (A. Gell. N. A. xix. 5.) We have already seen that it had a treasury. There was also an oracle, which, like that at Praeneste, gave responses by means of oracles. (Stat. Sil. i. S. 79.) Some antiquaries excepted this vast temple of Hercules, the site of the present cathedral, where there are some remains of a circular cella composed of materials of a rhomboidal shape, thus marking the transition in the mode of building which took place about the age of Augustus from the opus incertum to the opus reticulatum. But it would be difficult to regard these vestiges as forming part of a temple 1500 feet in circumference and the most magnificent principal Christian church on the foundation of a heathen temple. Nibby therefore (Dei lares, iii. p. 193), after a careful investigation, and a comparison of the remains at Palestrina with those of the so-called villa of Maecenas at Tivoli, is inclined to regard the latter, which will be described further on, as a portion of the temple of Hercules. It is probable, however, that there were several temples to that deity at Tivoli, just as there were at Rome. The principal one was doubtless that dedicated to Hercules Victor Tivernus; but there was also one of Hercules Saxonus, which will be described by
and by; and the remains at the cathedral may have belonged to a third. It is pretty certain, however, that the Forum of Tibur was near the cathedral, and occupied the site of the present Piazza dell'Orso and its environs, as appears from a Bull of Pope Benedict VII. in the year 978, referred to by Ugelli in his Italia Sacra (l. i. p. 1306), and copied by Marini (Papiri Diplomatici, p. 316). In this the Bull states that he went to determine the rights and jurisdiction of the bishop of Tivoli, many places in the town are mentioned by their ancient names; as the Forum, the Vicus Patricius, the Euripus, the Porta Major, the Porta Obscura, the walls, the postern of Vesta, the district of Castrum Vetus, &c. The round temple at the cathedral belonged therefore to the Forum, as well as the cryptoporticus, now called Porta di Ercolo in the street de Poggio. The exterior of this presents ten closed arches about 200 feet in length, which still retain traces of the red plaster with which they were covered. Each arch has three loopholes to serve as windows. The interior is divided into two apartments or halls, by a row of twenty-eight slender pillars. The platform and the bottom of the cella and the ground may still be seen. The mode of building shows it to be of the same period as the circular remains.

In that part of the city called Castro Vetere, which Nibby identifies with the arx, are two temples, one round, the other oblong, both of which have been variously identified. The round one, a charming relic of antiquity, is commonly regarded as the temple of the Sibyl. We know that the tenth and last of the Sibyls, whose name was Alburna, was worshipped at Tibur (Varro, ap. Laev. de Fauna, Rel. i. 6; cf. Σαμηρία ἢ Τιβιούρη ἢ Άληθεύρας, Suid. p. 3302 Gaisf.); and Horace evidently alludes to her when he speaks of the "domus Alburnae resonantia" at that place (Od. ii. 24. 12). It can scarcely be doubted therefore that she had a fane at Tibur. But Nibby is of opinion that the epithet of "resonantia," which alludes to the noise of the waterfall, is inapplicable to the situation of the round temple on the cliff; for though it immediately overhung the fall, before the recent diversion of the stream, the cataract, as shown above, must in the time of Horace have been lower down the river. This objection, however, may perhaps be considered as pressing a poetic epithet rather too closely; nor is there anything to show how far the fall may have been removed by the catastrophe described by the younger Pliny. Some writers have ascribed the temple to Vesta, an opinion which has two circumstances in its favour; first, we know that Vesta was worshipped at Tibur, from inscriptions recording the Tiburian virgins of the Tiburtini; secondly, the temples of Vesta were round, like the celebrated one near the Roman forum. Unfortunately, however, for this hypothesis, the Bull of Pope Benedict before referred to shows that the district of Vesta was on the opposite side of the river, and was not a part of the city (ibid. iii. p. 205) regards the building in question as the temple of Hercules Saxonus. We know that round temples were sometimes erected to that deity, as in the forum Boarium at Rome; and the epitaph of Saxonus is applicable to the one in question, from its being seated on a rock. It may be observed, however, that Saxonus is not named in the inscription, on the whole it may perhaps be as satisfactory to follow the ancient tradition which ascribes the temple to the Sibyl. It is of the style called peripteral, or having columns all round. These were originally eighteen in number, but only ten now remain of which seven are isolated and three are built into the wall of a modern structure; but in each a manner that the sides towards the cell are visible. The columns are of travertine, of the Corinthian order, and channelled; hence the temple bears considerable resemblance to that in the Forum Boarium at Rome. According to the Bull before quoted, it was, in the 10th century, the property of the monks dedicated to the Virgin Mary.

The same was the case with the adjoining temple, which was dedicated to St. George. This building is also principally of travertine. It has four columns in front, now hidden by modern houses, and six at each side, five of which are built into the walls of the cella to the extent of two-thirds of their circumference. Hence it was of the style called prostyle tetrasyles pseudo-peripteral. The columns are of the Ionic order. From an inscription found near it, some writers have inferred that the temple was dedicated to the worship of Drusilla, the sister of Calligula; but the style of building is considerably earlier, and belongs to the age of Julia. Others have called it the temple of the Sibyl. From the inscription (Dioecesi, iii. p. 210) started a novel hypothesis, and regarded it as the temple of Tiburtus, or Tiburnus. It is certain that the eponymous founder of the city enjoyed divine honours in it, as we see from Horace ("Tiburni incus," Od. i. 7. 13) and Statius ("illa resuscit Tiburni in umbra," Silv. i. 3. 74). But these expressions refer to a sacred grove or vīrīcītūs, probably with a shrine, or perhaps merely an altar, and therefore situated, in all likelihood, in the outskirts of the town, and not in a narrow crowded place like the arx. And we must here point out a little inconsistency into which the learned professor has fallen: for whilst he objects to the round temple being called that of Vesta, on the ground that it was not within hearing of the river, when that was in its ancient state, yet he regards the square one, which immediately adjoins it, as the temple of Tiburnus, because it was close to the cataract. On the whole, therefore, we must for the present content ourselves with one of the ancient names for this building, or else, which may perhaps be the safer course, leave it altogether undetermined.

The catastrophe of 386 brought to light the remains of a bridge; and another still more perfect one was discovered in 1838, in the progress of the works for diverting the course of the river. At the same time the workmen came upon a small tomb, between the Via Valeria and the banks of the river, containing several skeletons and monuments. Among these was a cistaphor to Seneca, who was consul for the fourth time A. D. 107, and several inscriptions. Under this tomb was an ancient aqueduct, intended to distribute the waters of the Anio among the adjacent villas.

There are no other remains in the town except some fine opus reticulatum at lateritiam, near the church of S. Andrew. In the year 1778, a fine monument was discovered, in the Via Annio, some large and handsome columns with Corinthian capitals, and also the pedestal of a statue to Flur. Macceius Gracces, with an inscription connecting it with some embellishment of the baths. Hence we must conclude that the thermes were situated here.

Outside the city, on the Via Constantiniana, is the building known as the temple of Tusia, for which appellation, however, no authority exists. External to it is an octagon form, but round inside.
TIBUR.

Nibby holds that it is not anterior to the 4th century of our era, its construction resembling that of the villa of Maxentius on the Via Appia. There are traces of painting of the 13th century, showing that then, if not previously, it was a Christian church. A little further on we come to an inscription which records the levelling of the Clivus Tiburtinus in the time of Constantius and Constantine. The name of the latter is purposely effaced, no doubt by the order of Magnentius. This monument was discovered in 1736, and re-erected by order of the magistrates of Tibur at the same spot where it was found.

The delightful country in the vicinity of Tibur caused many villas to be erected there during the latter period of the Republic and under the first Caesars, as we see from the writings of Catullus, Horace, Propertius, Statius, and other poets. Of these villas, however, of which we shall mention only the more interesting, there are but few remains, and scarcely any that can be identified with certainty. The most striking are those commonly called the villa of Maccenas on the SW. side of the town, near the Castelline. Ligerio was the first who called this building the villa of Maccenas; but there is no authority for the assumption. It was probably founded on a wrong conception of a passage in Horace which is also quoted by Mr. Cramer (Italige, vol. ii. p. 60) under a misapprehension that it contains an allusion to a residence possessed by Maccenas at Tibur, instead of to his town-house on the Esquiline. The plan of this building published by Marques and Uggieri is correct. It was founded on gigantic substructions, the magnitude of which may be best observed on the N. side, or that towards the valley of the Anio. It is an immense quadrilateral edifice, 637 feet long, and 450 broad, surrounded on three sides by symmetrical porticoes. The fourth side, or that which looks towards Rome, which is one of the long sides, had a theatre in the middle of it, with a hall or salon on each side. The porticoes are arched, and adorned on each side with half-columns and a Doric order. Behind is a series of chambers. An oblong taulus now marks the site of the house, or, according to Nibby, who regards it as the temple of Hercules, of the Cella. The pillars were of travertine, and of a beautiful tonic order. One of them still existed on the ruins as late as 1812. This immense building intercepted the ancient road, for which, as appears from an inscription preserved in the Vatican, a vault or tunnel was constructed, part of which is still extant. Hence it gave name to the Porta Scure, or Obscura, mentioned in the Bull of Benedict, which it continued to bear at least as late as the 15th century.

To our apprehension, the plane here laid down is rather that of a private villa, than that of a temple, nor do we observe the resemblance, insisted on by Nibby, to the temple of Fortune at Praeneste. It is not probable that the chief toys of Hercules, the patron deity of Tibur, should have been erected outside the town, nor would it have been a convenient spot for Augustus to administer justice, as we have mentioned that he did in his frequent retirements to Tibur, in the pornechores of the temple of Hercules. The precincts of the Forum would have been more adapted to such a purpose. But if that emperor so much frequented Tibur, evidently the favourite among all his country retreats (Suet. J. C.), he must have had a suitable residence for his reception. Might not this villa have been his palace? Nibby observes that the style of building is of the later or transition period; and a subject near was ornamented to occupy the highest rise of the substructions. But we offer this statement as a conjecture in favour of which we can adduce no facts, but its probability.

Catullus had a paternal estate in the neighborhood of Tibur; and the pretended site of his villa is still pointed out in the valley by Monte Celio. It is evident, however, from his address to his patrons (Catullus 43), that it was more distant from the town, and lay at a point where the banner poetica Sabines and the Tiburtine territory was nearest. He himself wished it to be considered as not only probably the most fashionable ancient situation; but his ill-weather persisted as long as that it was Sabines. Horace had also a mansion near Tibur, besides his Sabine farm; and, according to his biographer, he was situated near the villa of S. Andrea, which is visible, according to Nibby (Diderot, p. 526) a period anterior to that of Horace. Nibby identifies them as belonging to the villa of S. Andrea. The vicinity of Sabine is Sinapius (c. 7) falsely alluded to Cicero, had a mansion near Tibur. But this is more conjectural. Equally certain is the site of the villa of Vejicus, a poet of the age of Domitian, of which Statius has a more picturesque description (Silvae 1. 3). The remains of the latter have extended on both sides of the road to certain particulars in the description, viz., that he discovered by his observant walks the exact spot near the place commonly assigned to the house of Catullus and the grove of Tibur, the latter between M. Castillo and M. Fuscicentio.

Cynthia of Propontis, whose real name was Niccilla (Apoll. Apol. ii. p. 405, ed. Basilius), is said to have died at Tibur (Prop. iii. 38, fr. 46, ed. Meiser), in the same house. The name of Quiriniana in an inscription which has recently been discovered at the temple of Isis, under IV. IV., in the district adjacent to the domestic life of the Roman poets. In the collection of the villa of Quintilius Varus, a site over the same road, is rather more extensive than most of the other. Hence the estate of Varus at Tibur, which appears to have lain close to the town (Ovid. i. 18. 1). A little to the declivity of Monte Fuscicentio, opposite the entrance of the Castelline, bore the name of Quiriniana in an inscription which has recently been discovered at the temple of Isis, under IV. IV., in the district adjacent to the domestic life of the Roman poets. In the collection of the villa of Quintilius Varus, a site over the same road, is rather more extensive than most of the other. Hence the estate of Varus at Tibur, which appears to have lain close to the town (Ovid. i. 18. 1). A little to the declivity of Monte Fuscicentio, opposite the entrance of the Castelline, bore the name of Quiriniana in an inscription which has recently been discovered at the temple of Isis, under IV. IV., in the district adjacent to the domestic life of the Roman poets.

TIBURIES.

 sont are in complete preservation. Under the right is an ancient artificial cave, called Local antiquaries *Il Tempio del Monte*, but was probably either a sepulchre, or one of the many caves consecrated by the ancients to the rustic deities. This road joined the Via Constantiniana leading up to the ruins of the ancient villa of Maecenas.

side the Porta S. Croce is a district called Macer, a corruption of the name of Cassius, a great senator, who lived in the 1st century, derived from a shrine of the gens Cassia which was situated in it. In the time of Zappi, in the 16th century, a great part of this building was excavated. Home to the treasures of this residence is attested by the numerous statues found there, many of which were acquired by Pope Pius VI. and now the Vatican. In the neighbourhood of Tibur so the remains of several aqueducts, as the *Jetus*, the *Aqua Marcia*, and the *Aqua Claudia*, ruins of the sumptuous villa of Hadrian lie 2 miles from the city. The description of it is too long for this place, and will suffice that, in a circuit of about 8 miles, it embraced, the imperial palace and a barracks for the *Legio II. Aequat.*, an academy, a facade and the residence of the emperors. *Bibliography of Roman Villas and its Vicinity*, ed. *Urbis Antiquaria*, vol. i., *Sis della Carta dei Desintomi di Roma*, v. viii., *Topography of Rome and its Vicinity*, ed. *Urbis Antiquaria*, vol. i., *Sis della Carta dei Desintomi di Roma*, v. viii., *Topography of Rome and its Vicinity*, ed. *Urbis Antiquaria*, vol. i., *Sis della Carta dei Desintomi di Roma*, v. viii., *Topography of Rome and its Vicinity*, ed. *Urbis Antiquaria*, vol. i., *Sis della Carta dei Desintomi di Roma*, v. viii., *Topography of Rome and its Vicinity*, ed. *Urbis Antiquaria*, vol. i., *Sis della Carta dei Desintomi di Roma*, v. viii.

The earliest mention of Ticianum in history is on occasion of the death of Drusus, the father of Germanicus, when we are told that Augustus advanced as far as Ticianum to meet his funeral procession. *Tacit. Ann. iii. 5.* Its name is also repeatedly mentioned during the civil wars of the 1st century. On its position on the great highroad that led from the foot of the Alps to join the Asamian Way at Piacenza, rendered it an important post. It was the scene of a serious sedition among the troops of Vitellius, while that emperor halted there. *Id. Hist. ii. 17, 27, 30, 66, 68.* At a later period it was the emporium of Gaul, thus the emperor Claudius (the second of the name) was saluted with the imperial title, while he was commanding the garrison of the city. (Vinct. Casei. 33, Epit. 34.) It was there also that Constantius took leave of his nephew Julian, whom he had just raised to the rank of Caesar. *Ammianus. xvi. 6. 18.* From these frequent notices of Ticinum it seems probable that it had already risen under the Roman Empire into a flourishing municipal town, and derived importance from its position, the great highroad which formed the continuation of the Asamian Way from Piacenza to the foot of the Alps passing through Ticinum, until the increasing importance of Mediolanum, which became the second capital of Italy, made it customary to proceed through the towns that lay on the direct route. *Hist. Ant. pp. 293, 340, 347.*

But though Ticinum was undoubtedly a considerable town under the Roman Empire, it was not till after the fall of that empire that it rose to the position it subsequently occupied. In A.D. 452, indeed, it had sustained a great calamity, having been taken and devastated by Attila (Jornand. Gen. 42); but the Gothic king Theodoric, being struck with the importance of its position, not only raised it from its ruins, but erected a royal palace there, and strengthened the city with fresh fortifications, until it became one of the strongest forresses in this part of Italy. It consequently bears an important part in the Gothic wars, in which people having made it their chief stronghold in the north of Italy (Procop. B.C. ii. 15, 25, iii. 1, iv. 32, &c.), in which the royal treasuries and other valuables were deposited. At the time of the Lombard invasion, it offered a prolonged resistance to the arms of Alboin, and was not taken by that monarch till after a siege of more than three years. A.D. 576 (P. Duce. Hist. Langii. ii. 26, 57). It thenceforth became the residence of the Lombard kings, and the capital of the kingdom of Italy, and continued to hold this position till A.D. 774, when Desiderius, the last of the Lombard kings, was compelled to surrender the city to Charlemagne, after a blockade of more than 15 months.
TICINUS.

From this time Ticinum sank again into the condition of an ordinary provincial town, which it has retained ever since. Before the close of the Lombard war we find it was first designated by the name of Papia, from which its modern appellation of Pavia is derived. Paulus Diaconus calls it "Ticinus quae alio nomine Papia appellatur" (P. Diacon. i. 15); and the anonymous Geographer of Ravenna gives the same double appellation (Geogr. Ravenn. iv. 80). The most probable explanation of this is that when Ticinum had been admitted to the rights of a Roman municipality its inhabitants were enrolled in the Papian tribe, a fact which we learn from inscriptions (Gruter, Inscrip. p. 1093. 7; Murat. Inscrip. p. 1087. 1, p. 1119. 4), and that in consequence of this the city came to be known as "Civitas Papia," in contradistinction to Mediolamum, which belonged to the Umbetine tribe. (Amm. Avg. Lact. Ticin. 43,—60.)

The modern city of Pavia contains no remains of antiquity except a few sarcophagi and inscriptions. These confirm the municipal condition of the city under the Roman Empire, but are not in themselves of much interest. [E. E. B.]

TICINUS (Ticinus, Ticinum), a considerable river of northern Italy, and one of the most important of the northern tributaries of the Padus. It has its sources among the high Alps, in the Monts Adula or Mont St. Gothard, and, where it first emerges from the Alpine valleys forms an extensive lake, called the Lacus Vermianus or Lago Maggiore. Where it issues from this again it is a deep, clear, and rapid mountain river, passing through the level plains of Lombardy, with a course of above 60 miles, passing under the walls of Ticinum (Pavia), and discharging its waters into the Padus or Po, about 3 miles below that city. (Strab. iv. p. 209, v. p. 217; Plin. ii. 103. a. 106, iii. 19. a. 23.) Throughout this lower part of its course (from the Lago Maggiore to the P0) it is navigable for vessels of considerable burden, but the extreme rapidity of the current renders the navigation inconvenient if not dangerous. Its banks are low and marshy, the river being bordered on each side by a belt of thickets and marly woods. This character of its banks is noticed by Claudian (de Vt. Cons. Hon. 194), while Silius Italicus alludes to the beautiful clearness of its waters. (Sil. It. xiv. 63.)

The Ticinus appears to have been recognised at an early period as the boundary between the Insulrians and their neighbours the Libici and Laevi (Liv. v. 34, 35). From its geographical position it must always have presented a formidable barrier to any invader advancing into Italy after having crossed the Cottian. Theinian or Pennine Alps, and for this reason its banks have been the scene of many successful battles. Even in the first descent of the Gauls into the plains of Northern Italy, we are told that they defeated the Etruscans in a battle near the river Ticinus (Liv. v. 34). But much the most celebrated of the contests which were fought on its banks was that between Hannibal and P. Scipio in B.C. 218, shortly after the descent of the Carthaginian general into Italy. The precise scene of this action cannot, however, be determined; but it appears to have been fought on the W. or right bank of the Ticinus, at a short distance from the Padus, and probably not far from the site of Ticinum or Pavia. Livy marks it more distinctly as being within 5 miles of a place called Victumnum (V), but as no other mention of this obscure name occurs, this lends us no assistance. (Liv. xxi. 45.) The narrative of Polybius is far from clear and has given rise to considerable discussion. Scipio, who had hastened from Pisa into Cisalpine Gaul, on hearing that Hannibal had actually crossed the Alps and descended into the plains of Italy, advanced to meet him, crossed the Padus by a bridge constructed for the occasion, and afterwards crossed the Ticinus in like manner. After this Polybius tells us, "both generals advanced along the river, on the side facing the Alps, the Romans having made sure that when they had landed the Etruscans would give battle to the Gauls on their right." (iii. 65.) It is clear that this is not consistent with the statement that the Romans had crossed the Ticinus, as, in ascending that river they would have had the stream on their right, unless we suppose "the river" to mean not the Ticinus but the Padus, which is at least equally consistent with the general plan of operations. Hannibal was in fact advancing from the country of the Taurni, and no reason can be assigned why he should have turned so far to the N. as to be descending the Ticinus, in the manner supposed by those who would place the battle near Vigezzo or Borgo S. Siro. If we are to understand the river to be the Ticinus, the words of Polybius about the position of the battle should have been fought on the left bank of the Ticinus, which is at variance with all the other particulars of the operations, as well as with the probabilities of the case. The battle itself was a mere combat of cavalry, in which the Roman horse was supported by a portion of their light-armed troops, which passed through the river, as described elsewhere. The battle was fought at once retreated to the bridge over the Padus, leaving a small body of troops to break up that over the Ticinus. These troops, 600 in number, were cut off and made prisoners by Hannibal, who, however, gave up the attempt to pursue Scipio, and turned up the stream of the Padus, till he could find a point where he was able to construct a bridge of boats across it. (Pol. iii. 65, 66.) The account of Livy, which is based mainly upon that of Polybius, though he must have taken some points, such as the name of Victumnum, from other sources, agrees with the above explanation, though he certainly seems to have transferred what Polybius relates as occurring at the bridge over the Ticinus to that over the Padus. It appears also in agreement that there was no discrepancy among his authorities as to the point at which Hannibal eventually crossed the Padus. (Liv. xxi. 45.—47.) It may therefore on the whole be assumed as probable that the battle was fought at a short distance W. of the Ticinus, and not close to the banks of that river: the circumstance that Scipio had encamped on the banks of the Ticinus just before, and advanced from thence to meet Hannibal will explain why the battle was always called the "Pugna al Ticinum" or "apud Ticinum."

Two other battles were fought in the same neighbourhood before the close of the Roman empire:—one

* Polybius, indeed, does not distinctly say that the Romans crossed the Ticinus, but is included in his whole narrative, as he tells us that the consuls ordered a bridge to be built over the Ticinus with the purpose of crossing that river, and afterwards relates their advance without further allusion to it (iii. 64, 65). But after narrating the defeat and retreat of Scipio, he says that Hannibal followed him for a short distance on the first river, which can be no other than the Ticinus. (Th. 66.)
TIERNIA.

In A.D. 270, in which the Alemanni, who had invaded Italy, were finally defeated by the Emperor Aurelian (Vita. Epit. 85); the other in A.D. 355, between the rival emperors Maxentius and Constantine. (E. B. B.)

TIERNIA (called by Ptol. Alexa, iii. 8. § 10), a town of Dacia on the Danube, opposite to the castle of Zernis (Old Orosco) in Moesia. In inscriptions we find it called Statio Tiberinum (Murat. p. 333. 5; Grisellini, l. p. 253); in the Digest (De Gen. xiv. 35, Codex; Zeno) Zerinum; and in the work of Candid. (c. 3), Tranis Dierius. (T. H. D.)

TIFATIA (θηματια καρα, Dion Cass.: Μοντα di Madcallo), a mountain ridge on the borders of Campania and Samnium, only a short distance from the city of Capua. It is one of the last outlying masses of the Apennines, and is a long, narrow ridge of no great elevation, but above 12 miles in length from E. to W., and reaching a height of about 1,200 feet. It forms a great barrier between the Sammites and Campanians which immediately preceded the First Samnite War. On that occasion the Sammites in the first instance occupied the ridge itself with a strong force, and afterwards drew out their main army into the plain below, where they soon defeated the Campanians in a pitched battle. (Liv. xii. 29.) It is from this mountain that Tiberius C. Gracchus, the chief of the Samnites laid siege to Capua for the first time. (Tiberius Gracchus, i. 56., 34., 35., and elsewhere) "montem imponentem Capum" (xxvi. 5), which well describes its character and situation. It was this mountain which Pliny describes as having first drawn the attention of the Romans to the resources of the country. (Plin. H. N. iii. 3.)

The ridge had a double importance as a natural boundary between the two countries. For this reason the citizens of Capua chose him as a very early age to be their prince and in return for this honour he had built a temple there at his own expense. (Plin. Ep. iv. 1.) He afterwards adorned this with statues of the various Roman emperors, to which in one of his letters be begs leave to add that of Trajan (Jub. x. 34.). From the circumstances that Pliny's villa itself was in Etruria (whence he alwayscalled it his Tuscan villa), while Tiferin was certainly in Umbria, it is evident that the frontier of the two countries ran very near the latter place, very probably as that of the Tuscan and Roman States does at the present day, between Civita di Castello and Borgo S. Sepolcro. The position of Tiferin near the same spot with the city of Tuscania, seems to be well established by discoveries made there of a Samnite or a Tuscan type (Cluter. Ital. p. 624.; Gruter, Inscr. p. 494. 5.). But it was probably situated rather further from the Tiber, as Pliny describes it as being, like Perugia and Orvietum, "not far" from that river (Plin. iii. 5. 9.); while the modern Civita di Castello almost adjoins its banks.

The precise site of Pliny's Tuscan villa cannot be ascertained, as the term in which he describes its position (Ep. v. 6.) will apply to many localities on the undervalls of the Apennines in the upper valley of the Tiber. It is, however, most probable that it was situated (as suggested by Cluterius) in the neighbourhood of Borgo S. Sepolcro, about 10 miles N. of the modern Civita di Castello, in the immediate vicinity of Tiferin. (Cluter. Ital. p. 590.)

2. TIFERNUM METAURUM was evidently, as its name implies, situated on the other side of the Apennines, in the valley of the Metaurus. Its name is mentioned only by Pliny among ancient writers; but it is found in several inscriptions (in which the citizens are termed "Tiferini, Tifernates Metauraei, and the discovery of these termese at S. Angela in Vado leaves no doubt that Tiferin occupied the same site as that town, near the sources of the Metaurus, about 20 miles above Possambrae (Forum Sempronii). (Cluter. Ital. p. 631.; Orell. Inscr. 3043, 3306, 3902.)

It is uncertain which of the towns above mentioned is the Tiferinum Pluton (iii. 1. § 53?); perhaps the first has the better claim. (K. B. B.)

TIFERNUM (τηθερνου, Ptol.: Biffermo), one of the most considerable rivers of Samnium, which has its sources in the heart of that country, near Bovinum (Bojanum), in a lofty group of mountains, now known by the same name as the river (Monte Fieru). This is evidently the same river called by Livy the Tifernus Mox, which the Samnites

1527
TIGAVA CASTRA.

The text seems to be discussing historical or geographical information, possibly about a place called Tigava Castra, but it is not clear due to the text being cut off and not being fully legible. It mentions a story of a strongbold in a c. 295... but notwithstading the strength of the position, they were attacked and defeated there by the Roman consul Lucius Volumnius Flammeus (Liv. x. 30, 31).

According to Ptolemy, the river in the upper part of its course, where it flowed gently, was called Digidus; but lower down, where it moved with more rapidity, it bore the name of Tigris, which, in the Median language, signified an arrow (cf. Strab. xi. p. 292; Curt. i. 21. 2. De B. iii. c. 2). According to some, it signifies the course of the river is marked, or a town of the same name (Liv. ix. 44, x. 14); but as we have no other mention of a town of Tigris in Samian, it is perhaps probable that in all these cases the mountain of that name is meant. The group thus named is a part of that known collectively as the Monaea Natae,—one of the most conspicuous mountain masses in Samian (Saxaetum). The river Tigris has a course of above 60 miles from its sources to the Adriatic, in a general direction from SW. to NE. In the lower part of its course, after leaving the confines of Samian, it constituted in ancient times the boundary between Apulia and the Frantini (Mel. ii. 4, 6; Plin. iii. 11. s. 16, 18. s. 17; Prot. iii. 1. s. 18, which see). Two famous Tigris; but this two, probably a mistake for Tigrus. [E. H. B.]

TIGAVA CASTRA (It. Ant. p. 38; Tigava, Plin. v. 2. a. 1; Trysias, Prot. iv. 9. s. 36), a fortress in Manetamis Caeriaeensi, between Oppodium Novum and Millanes, variously identified with El-Herba, Cambes, Ab-d-el-Kader.

Tioga. (Trysias, Procop. de Aed. iv. 7), a fortress in Meces Inferior, near the Danube, and between Sannataperta and Appiaria (It. Ant. p. 223). In the Not. Imp. it is called Tegra. Variously identified with Muratia and a place near Olymposion.

TIROGONERTA (It. Trysias, Strab. xi. pp. 52, 53, sqq. v. 29; Trysias, Plin. Loc. cit. 25, sqq.), literally, the city of Tigrinae, since Tigras (hart, gerd, or hartos) meant, in the Armenian dialect, city (Hevash. iii. p. 237). The later capital of Armenia, built by Tigranes on an eminence by the river Nicrophorion, a city of considerable size and strongly fortified. It was in a great measure populated with Greeks and Macedonians by the Parthians. During the war between Demetrius and Cicilia. After Lucullus gained his victory over Tigranes before its walls, he caused a great part of the still unfinished town to be pulled down, and permitted its kidnapped inhabitants to return to their homes. Nevertheless, the town continued to exist, though we hear but little of it subsequently to this event. (Cf. Strab. ii. 2. and xii. 2. De N. vi. 29, v. 26, p. 747; App. Mithr. 67; Plin. Loc. cit. 25, sqq.; Tac. Ann. xii. 50, xiv. 24, xv. 4; Plin. vi. 9. s. 10.) It has been variously identified with the ruins of Sert in the Chabur, with Mygafarbiz, and with Amid or Amazaldak. (See Ainsworth, ii. p. 361; St. Martin, 1. p. 173; Bitter, Erth. x. p. 67, xi. p. 106.) [T. H. B.]

TIGRIS, a celebrated river of Asia, many evidences find various forms of its name, both in Greek and Latin writers. The earlier and more classical Greek form is δ Τηρις, gen. Τηριος (Herod. vi. 20; Xen. Ancab. iv. 1. § 3; Att. Ancab. vii. 7, &c.), whilst the form δ Τηρις, gen. Τηριος, and sometimes Τηριος, is more usual among the later writers. (Strab. ii. p. 79, 2. p. 728; Phil. v. 15. § 7; Plin. Loc. cit. 93, 94, &c.) Amongst the Romans the nom. is constantly Tigris, with the gen. Tigris and acc. Tigrin and Tigrim among the better writers (Vitr. Ecl. i. 63; Lucan, iii. 361; Plin. vi. 9. s. 9; Curt. iv. 5, &c.); but sometimes Tigris, Tigrined (Lucan, iii. 355; Aen. x. 739; Aen. xii. 306; Aen. xxiii. 15. &c.). According to Tigris, which, in the Median language, signified an arrow (cf. Strab. xi. p. 292; Curt. i. 21. 2. De B. iii. c. 2). Acmias (Ancab. 1. 2. sq., and Zarama (Ancab. 1. 2.) mentions that it bore the name of Diglag; and in its earliest course it is still called Dagheko, Didagheko or Didachheko.

According to the general testimony of the ancients the Tigris rises in Armenia (Xen. Ancab. iv. 1. § 3; Erosotoph. Strab. ii. p. 80; Plin. vii. 27. s. 31; Poë. iv. 4, &c.). Diodorus, in eastern terms, places its sources in the territory of the Uxur in Persia (vii. 67.2), but he has here confounded the Tigris with the Persis. Herodotus (v. 52) observes that there were three rivers bearing the name of Tigris, but that they did not spring from the same source; one of them arising in Armenia, another in the country of the Mares, whilst he does not mention the origin of the third. Of these two branches, which are not mentioned by any other ancient writer, are the more western and proper sources of the Tigris is Sophene, to the NE. of the cataracts of the Euphrates. The more eastern of these forms the little river Nympthos or Nympheos (now the Bosassum or river of Mygafarbiz). The name Tigris, originally formed the main watercourse of the Tigris, which flows for between 100 and 200 miles, first in a NE., then in a S., and lastly in an E. direction, before it joins the main eastern branch of the river, about 62 miles SE. of Tigrancerta. The authors subsequent to Herodotus do not notice his correct account of these sources, but confine the name entirely to these two branches. According to Strabo (xi. p. 591, 599) the name rose in Mount Niphates, at a distance of 5000 stadia from the sources of the Euphrates. But Pliny, who has written in most detail concerning this eastern branch, describes it as rising in a plain of Armenia Major, at a place called Elegesia (vi. 27. 31). It then flowed through the nitrous lakes of Arashtyes, without, however, touching it. The Arashtyes, which are between two lakes, and after losing itself at a place called Zorand (near the present Horse), under a chain of the Taursus (the Mourned Daph), burst again from the earth, and flowed through a second lake, the Thomites. After emerging from this, it again sank into the earth with much noise and foam (cf. Strab. xi. p. 599, 597. Prisc. Flacc. 913; Amm. Mar. xxiii. 6. § 15, &c.), and, after a subterranean passage of 25 miles, reappeared at a place called Nympheos (cf. Justin, xiii. 3). The account of Strabo, however, varies very considerably from the preceding one of Pliny. The former writer mentions only one lake (xi. p. 599), the description of which entirely resembles Pliny's Arashtyes, but which Strabo calls Arashtacus. After a description of the nitrous lakes of Pliny, the present Wess in Tox, on which is situated the town of Ardashich, with which the Tigris is in reality quite unconnected. Subsequently the river approaches the Euphrates in the neighborhood of Seleucia, forming in this part of its course the boundary between Assyria and Mesopotamia. (See Ricci.) Afterwards, according to Curtius, erroneously represent it as flowing through Media, which it does not even touch. Near Seleucia, it was connected with the Euphrates by means of a canal (Arrian, Ancab. vii. 7). After this, it again retires from the Euphrates, till at last, bending its
TIGRIIS.

TILURIUM. 1209

the SW., it completely unites with that place called by Pliny (l. c.) Digba, 1000

prove their common embouchure in the silt. Many of the ancients were aware that when joined together, it had a com-

(b. Tri. i. c.; Dion Cass. lviii. 28; Strab. l. c.; Hor. Od. iv. 14, 46; Lucan, ill. 356, &c.) In ancient times

many dams had been constructed in its course from Opis to its mouth, designed to retain its waters for the purpose of irrigating the adjoining districts (cf. Heeren, Idea, i. 5, p. 171; Tavernier, Voyages, i. p. 185; Nieuwhuis, Reisen, ii. p. 243). These, how-

ever, were all cut through by Alexander, in order to improve the navigation, which began as high up as Opis (Arrian, l. c.; Strab. 739, sq.) Between Moeul and the confines of the greater Zac, and 3 hours' journey above its latter, there still remains an ancient dam of masonry thrown across the stream (Ritter, Erdkunde, x. p. 5, sqc.)

[T. H. D.]

TIGUADRA, a small island off the coast of Spain, opposite the town of Palma, in the island of Balearics Major. (Plin. iii. 5, a. 11.) [T. H. D.]

TIGURIUS PAGUS [HELVEITI].

TILADAE (TADDAE, Ptol. viii. 2, 21), a race who lived under the Mons Massandras in Western India. They are probably the same as the Talucaae of Pliny (vi. 19, a. 22). [TALUCITAE. [V.]

TILAVEMPUTUS (TILAVEMPITUS: TAPILICUM), a river of Venetia, which has its sources in the Alps, above 80 miles from the sea, and after traversing the broad plains of its valley, enters the Adriatic sea between Aquilia and Concordia. (Plin. iii. 18, a. 22; Ptol. iii. 1, § 26.) It is the most considerable river in this part of Italy, and, like all the neighbouring rivers, is subject to be swollen by floods and winter rains, so that it leaves a broad bed of sedge, a great part of which is dry at ordinary seasons. The name is found in Pliny and Ptolemy; and it is said to be that which is described by Strabo, though without mentioning its name, as separating the territory of Aquileia from the province of Venetia, which he says was navigable for 1200 stadia from its mouth. (Strab. v. p. 214.) This last statement is indeed a great exaggeration; but the valley of the Tagliamento is one of the most openings of this part of the Alps, and was followed by the line of a Roman road, which proceeded from Aquileia by Julius Carnicum (Eugubio) over the pass of the Monte di Sta Croce into the valley of the Gris. [ALPS: p. 110.]

Pliny speaks (l. c.) of a *Tilaveomentus majus minusque,* but it is impossible to say what river he meant to designate under the latter appellation. The name is written in the Tabula "Tibiatinte," while it assumes very nearly its modern form in the Geographer of Ravenna. (Taliamentum, Geogr. Rav. iv. 36. [E. H. B.]

TILENE, in Gallia. The name is Fili in the Table, or Filena as some say. D'Anville altered it to Tilenae, and he finds the place on a road in the Table from Aucanumatinus (Longes) to Cahil-

nonum (Challos-sur-Sabres). The place is Til-le-

Chastes, the Tile Castrum of the eleventh century. All documents of that time have Tircastrum and Tricastel, and accordingly the place is vulgarly called Tré-chastes or Tré-chastel. [G. L.]

TILPHOSSA PONS (B. Otta, p. 412, a.)

TILPHOSSEMUM or TILPHOSSEUM. [BOR-

OTTA, p. 412, a.]

TILURIUM (Geogr. Rav. iv. 31), or TILURI PONS (Thm. Ant. p. 337), a place in Dalmatia, on the river Tilitus. It appears to be the same place as the Tribulum of Pliny (iii. 22, a. 26). New Traj.[T. H. D.]
TILURUS, a river of Dalmatia falling into the sea near Dalmium. (H. A. p. 337; T. F. i. 26 a. 29; T. F. ii. 7; T. F. iii. 9 a. 5) It is 12 miles E. of the former city. Notwithstanding its classical celebrity, it is one of the shortest of rivers, being formed by copious sources which burst out from the rock at the foot of a lofty cliff, and immediately constitute a broad and deep river, which has a course of little more than a mile and a half before it issues into the sea. There can be no doubt that these sources are the outlets of some subterranean stream, and that the account of Posidonius (ap. Strab. v. 215), who says that the river after a course of some length falls into a chasm, and is carried under ground about 300 stadia before it issues out again and falls into the sea, is substantially correct. Such subterranean passages are uncommon in Campania, and it is impossible to determine from what particular river or lake the waters of the Timaurus derive their origin; but the popular notion still regards them as the outflow of a stream which sinks into the earth near S. Cassianus, about 13 miles from the place of their reappearance. (C. V. a. 4.) The number of the streams that flow into Ant. V. was reckoned in number, and this agrees with the statement of Mela; while Strabo speaks of seven; and this would appear from Servius to have been the common belief (S. a. l. c.; M. a. 4 § 3), which is supported also by Martial, while Claudian follows Virgil (Mart. iv. 25; 6; Claud. x. 11). It seems possible, that C. V. thought the other hand, could find but six, and some modern travellers make them only four. Strabo adds that, according to Polybius, all but one of them were salt; a circumstance which would imply some connection with the sea, and, according to Cluverius, who described them from personal observation, this was distinctly the case in his time: for though at low water the stream issued tranquilly from its rocky sources, and flowed with a still and placid current to the sea, yet at high tides the waters were swollen, so as to rush forth with much greater force and volume, and inundate the neighbouring meadows: and at such times, he adds, the waters of all the sources but one become perceptibly brackish, double less from some subterranean communication with the sea. (C. V. a. 44.) It appears from this account that Virgil's remarkable expressions—

"Unde per ora novem, vasto cum murmur mortis

It mare proruptum, et pelago premitt arva sonanti"

—are not mere rhetorical exaggerations, but have a foundation in fact. It was doubtless from a reference to the same circumstance that, according to Polybius (ap. Strab. l. c.), the stream was called by the natives the source and mother of the sea. Virgil makes it the subject of the strain (Ex. viii. 6); and Anacreon speaks of the "sequorae amnis Timavi." (C. D. i. 34.)

Livy speaks of the "laeum Timavi," by which he evidently means nothing more than the base formed by the waters near their source (L. i. 1); it was close to this that the Romans established their camp, which the Frisii with 10 ships appear to have ascended the sea to the same point, where their combined camps were attacked and plundered by the Latins. According to Strabo there was a temple in honour of Dami, erected near the sources of the Timaurus, with a sacred grove attached to it. (Strab. v. p. 114.) The warm springs in the Timavus' bourn, which are now known as the Bagni di Gioviniana. (E. H. B.)

TIMOLAEUM (Timolao), a fort or castrum on the coast of Paphlagonia, 40 or 60 stadia to the north of Climax, and 100 or 150 stadia from Cape Carvum. (Marcell. p. 71; Anon. Pers. i. 5.) A. Manilius established his camp, which C. Fries with 10 ships appears to have ascended the sea to the same point, where their combined camps were attacked and plundered by the Latins. According to Strabo there was a temple in honour of Damai, erected near the sources of the Timaurus, with a sacred grove attached to it. (Strab. v. p. 114.) The warm springs in the Timavus' bourn, which are now known as the Bagni di Gioviniana. (E. H. B.)

TIMONITIS (Timonitis), a district in the interior of Paphlagonia, near the borders of Bithynia (Strab. xii. p. 569; Ptol. v. 1. 12). P. (43) mentions its inhabitants under the name of Timonitases, and Stephanus B. knows Timonitis (Timonitis) as a castrum in Paphlagonia, from which the district no doubt derived its name. (C. E. 5.)

TINCTORIALIS (Tinctorialis), the E. coast of Britannia Nova, forming the boundary between the E. and Britannia Barba, and called the Tynne. (T. F. iv. 5. 5; T. F. iii. 5. 5.)

TINCONIUM, in Gallia, is placed in the I. on a road between Avaricum (Bourges) and Decia (Dijon). In the Table the name is Tincum. Its distance in the Itinera is the same (es. 20; 200; 400) as in the Tabula Peutingeriana, with a remote Tincum in some middle-age documents. Itticae.d. do not agree in the distance between Tincum and Decia. (G. L.)

TINFADI, a place in Numidia, 22 miles W. of the ruins of the Oxæta. (H. A. p. 333.)

TINGENTERA. (Tingeteca.)

TINGIS (Tingi, Strab. iii. p. 140, and 177; xiv. p. 827; in Ptol. i. 1. 5; Tingis Kasafis: a very ancient city on the N. coast of Marseilles. Mela (i. 5) calls it Tinga, Pliny (v. 1. 3) Tac.; it lay 60 miles W. of the promontory of Alpes (H. A. p. 39, 8c) and 30 miles from Baelo, its opposite coast of Spain (L. C. i. c.) M. and P. record the tradition of its foundation by Astarea, whilst according to Plutarch it was founded by Sophax, a son of Hercules and the wife of Astarea (Serv. 9). In that neighbourhead was the oldest grave of Astarea, and his skeleton 60 cabin lat. (Strab. viii. 292, cf. ii. p. 422). These mythic legends serve at least to indicate the great antiquity of the place. (Cf. Strab. i. c.; Solin. c. 45.) It was raised by Augustus to the rank of a free ci.
TINIA.

[T. H. D.]

(Tryna: Tinsio), a small river of Umbria into the Tiber, a few miles below Terni, it is joined by the river Nea, and at its junction with the Toppino, a more rapid stream. Four small rivers indeed bring their united waters to the Tiber at this point: the Nea, which rises between Todi and Assisi, joins the Toppino from the north; and the Verna, which rises from the south. Though thus augmented from various sources, the Tinnia was always an unconsiderable river, and Pliny speaks of it as navigable with ease for boats, and Silius Italicus calls it inglorious humor." [S. Ilit. vid. 453; 5. 9. 9; Strab. v. p. 327.] [E. L. B.]

TERTIUS, a town which is named only in the Roman itinerary (P. 277), but still retaining its name in the form of Ternera. [J. L.]

[RTIUM, in Gallia, is placed in the Imita. S. Licoc, between Cabillonum (Challion) and (Macrce). The Antonine Itin. marks M.P. Thea xill between Cabillonum and Tunurich is Tunus on. The Table gives only the road from Ternera to Matteo. The a. do not agree in the distance between M. and Matisco. Spartium (Vita Septim. c. 11) says that Severus collected Clictus at Tertnurn, or Ternurturn, for the reading ps doubtful. (Is. Canabon, in Aelium S. Trilizio.) Dion (20. 6. 8), Herodian (iii. 7), and other authors, mention Ternus in that part of the province separated by Severus at or near Lugdunum. The name Ternurn appears to be somewhat written Tertnurn. [G. L.]

TIRA M.IA. [ARBOGISES.]

ARENSUS, an island off the coast of Her- argola, mentioned only by Pliny (iv. 12). It is frequently identified with Spatius; but remarks that Tepareus has no appearance of the name, and conjectures that it is an error carens, the same as the Triorana of Pau- rus (ii. 34. 8) and the modern Triorino. Moro, vol. ii. p. 465; Ross, Wanderungen, schilden, vol. ii. p. 21.]

ASA (Tispa, Fisc. iv. 2. 5). 1. A town in as Cincinnatus, mentioned with the jug Lati- emperor Claudius (Plin. v. a. 1) and subse- quent to a Roman colony (Ilt. Ant. 15). It lay in Ictosia and Casaesa (ib.). Procopius ii. 10) mentions two colonists near Tispa in the 1st quarter of Marcus, which had on them the fol- lowng inscription in the monarchical language: "We give our country to our cities for a son Nare." Now Tispeanum or Tisnava.

A town in Numidia, on the road from Sycos to Tunia (Ilt. Ant. p. 41). Now Tebesa or Ti-

TIRE. [THREI.] TIPSUS. [THREI.] TIPSON or TIPSEUS (It. Hier. p. 569), a place in Thrace, now Sundvall or Karavesi, according to Lapio. [J. R.]

TIRIDA. [STABULUM DiEMEDIS.]

TIRISSA (Geog. Rav. iv. 6), called by Arrian Terepia (Per. E. 4), and in the Tab. Pent. Triasa; a fortified place on the promontory of Tirisia. From its situation on this bold headland it was sometimes called simply "Apea (Steph. B. p. 53; Hierocl. p. 637), and hence at present Eternus or Kastoria. [T. H. D.]

TIRISTASIS (Pilin, iv. 11. 18: Tepiopos, Scyl. p. 28: Tepiopos, Epist. Plin. ad. Atk. ap. Dam. p. 159, E.), a town of the Thracian Chae- nesus, on the coast of the Propontis. It was in- cluded in the dominions of Philip, who in the letter above referred to complains that the Athenian general Diopeithes had taken it and sold its inhabitants for slaves (s. c. 340) [DIOPEITHEI, DICT. BIST.]. According to Chiosclos, its site is still occupied by a village bearing the same name. [T. H. D.]

TIRIZIS (Tispa, Strab. vii. p. 519), a very projecting headland of Mossea in the Pontus Euxinus. The name varies, being written Tispa in Anon. (Papir. P. Fust. p. 13), Tepiopos or Tepiopos Apea by Ptolemy (iii. 10. 8), and Tirisias by Mela (ii. 2). Now Cape Girdikia. [T. H. D.]

TIRE (Tispa: Euth. Tispeos: as the name is perhaps connected with τόπος, Lepusia, Tepiopos, Pas- sages, p. 13), one of the most ancient cities of Greece, lay a short distance SE. of Argos, on the road to the right leading to Epidaurus (Paus. ii. 25. § 8), and at the distance of 12 stadia from Nauplia. (Strab. viii. p. 573.) Its massive walls, which have been regarded with wonder for ages, are said to have been the work of the Cyclopes, and belong to the same age as those of Mycenae. (Paus. ii. 16. 5. 5, ii. 25. 5. 8, ii. 25. 5. 6, ii. 36. 5; Strab. l. c.; Paus. vii. 56. 5. 7.) Hence Homer calls the city Τιβρα τεξεωσια. (Il. ii. 559.) Pindar speaks of the Κυκλοπων προϋρα of Tyrins (Fragm. 648, ed. Böckh), and Pausanias says that the walls are not less wide than the pyramids of Egypt (ix. 36. 5.) In another passage he describes the walls as consisting of wide masses of stone (κρυολ αθος), of such a size, that a yoke of oxen could not stir the least of them, the interstices being filled in with smaller stones to make the whole more compact and solid. (Paus. ii. 25. 5.) The foundation of Tyrins ascends to the earliest mythical legends of the Argives. It was said to have derived its name from Tyrins, the son of Argus (Paus. ii. 25. 5. 8), and to have been founded by Proetus. (Strab. viii. p. 372; Paus. ii. 16. § 2.) According to the common tradition, Megapenthes, the son of Proetus, ceded Tyrins to Perseus, who transmitted it to his descendant Lycurgus. Tyre, the city of the Cyprians, married Amphitryon, who would have succeeded to the crown, had he not been expelled by Sthenelus, king of Argos. Their son Hercules afterwards regained possession of Tyrins, where he lived for many years, and hence is frequently called Tirisynthus by the poets. (Hey. S. C. 81; Pind. Fisc. A. 37, Isai. vi. 39; Virg. Aen. vii. 643.) The place of the temple, though Tyrins was thus closely connected with the Heraclidae, yet the city remained in the hands of the old Achaean population after the return of the Heraclidae and the conquest of Peloponnesus by the
TIHSIA.

Doria. The strong fortress of Tiryns was dangerous to the neighbourhood Dorian colony of Argos. After the dreadful defeat of the Argives by Cleomenes, their slaves took possession of Tiryns and held it for many years. (Herod. vi. 83.) In the Persian War the Tirynthians sent some men to the battle of Plataea. (Herod. ix. 28.) Subsequently they were driven by the Argives, probably about the same time as Mycenae, B.C. 666. The lower city was entirely destroyed; the citadel was dismantled; and the inhabitants fled to Epidaurus and Halieis, a town on the coast of Hermione. (Strab. viii. p. 373; Ephorus, ap. Steph. B. s. v. Αἰλιείς; Eustath. ad Hom. II. ii. 559, p. 266.) It was probably owing to this circumstance that Stephanus B. (s. a. Tiryns) was led into the mistake of saying that Tiryns was formerly called Halieis. The Tirynthians, who did not succeed in effecting their escape, were removed to Argos. (Paus. ii. 23. § 8.) From this time Tiryns remained uninhabited; and when Pausanias visited the city in the second century of our era, he saw nothing but the remains of the town and forecast the change towards the sea the socalled chambers of the daughters of Proestis. Ne trace of the lower city appears to have been left. The citadel was named Lyceum, after Lyceum, son of Eleckton, who was slain at Tiryns by Teptolemus, son of Hercules. (Strab. vii. p. 373; Paus. VII. 47.) Hence Statius calls the marches in the neighbourhood of Tiryns "agoras Lyceum." (Theb. ii. 47.) Theophrastus represents the Tirynthians as celebrated for their laughing propensities, which rendered them incapable of attention to serious business. (Ap. Ath. vi. p. 261, 4.)

The ruins of the citadel of Tiryns are now called Palai Amphirot. They occupy the lowest and flattest of several rocky hills, which are like islands on the plain. The impression which they produce upon the beholder is well described by Col. Marz: "This colossal fortress is certainly the greatest curiosity of the kind in existence. It occupies the table-mannum of an oblong hill, or rather knoll, of small extent or elevation, completely inclosed in masses of enormous stones, readily piled in four one another, but without the assistance of towers, curtains, walls, bastions, gates, and covered ways. There is not a fragment in the neighbourhood indicating the existence of suburbs or outer town at any period; and the whole, rising abruptly from the mass of the surrounding plain, produces at a distance an effect very similar to that of the whole of the Acropolis of Athens. The breach of the summit of the rock, according to Col. Lenows measurement, in about 250 yards, the terraces from 40 to 80, the height above the plain from 20 to 30 feet, the direction nearly E. by S. The entire surface of the walls still remains more or less preserved. They consist of huge masses of stone about 20 to 25 feet in thickness, and 20 to 25 feet in length, one on the eastern, and the other on the southern side. In its general arrangement the fortresse appears to have consisted of an upper and lower acropolis of nearly equal dimensions, with an intermediate platform, which may be described as the defence of the upper enclosure. The breach of the summit of the rocks, which now give access to the left into the lower acropolis, and the eastern wall of the fortress are the severest remains, having also a breach to the left into the middle platform, the entrance which last was nearly opposite to the same. Besides the two principal gates, there was a pass in the western side. On either side of the southern entrance, that is to say, in the same as well as in the southern wall, there were two parallel passages, of which last has six recesses or niches in the external wall. These niches were probably intended to serve in attached defence of the gallery itself, and to give for covered communications leading to places of arms at the extremity of them. These passages, which led directly from the southern gate, and between the upper enclosure and the cave into the lower division of the fortress, were 18 feet broad. About midway, there was an immense door-post, with a hole in a strick showing that the passage might be closed by cession. The lower enclosure of the fortress, an oval shape, about 100 yards long and 100 yards wide, was fortified on an angle of the north; the several oblong angles on the east and west; and the upper enclosure of the fortress very wide and long.

There is some appearance of a wall subdividing the highest part of all from the main southern entrance; thus forming four inscriptions besides the passageway. (Lag. Corpus Inscriptionum.) There is a fine drawing in the accompanying drawing from Gaetlie's Rapport (Lag. Morus, vol. ii. p. 350, seq.; Mur. jure, vol. ii. p. 473, seq., Curtius, Pausanias vol. ii. p. 388, seq.)

TISABUK (Tisabuk): a little town on the praetorium of Ambamia in Bocotia, at the entrance of the Phaestus, which received a temple of Artemis, and view on 207 Philipp V., son of Demetrius, caused victims to be lighted, in order to obtain immediate victory of the movement of the Roman fleet. (Apul. L. i. 568; Val. Flor. ii. 6; Polyb. x. 11.)

TISIBAR (Tisibara). TISIA (Tisia): Eub. Thesmophoria, a town in Elis, mentioned by Appian in his account of operations of Hannibal in that country. It was occupied by that general with a Carthaginian fleet, but was burned by the Romans, and the ships were set on fire by the Romans, who held it for a time, but it was soon recovered by Hannibal. (App. 6.; Strabo. 6.)

TISSIA (Tisso): Eub. Thesmophoria, a town in Elis, mentioned by Appian in his account of operations of Hannibal in that country. It was occupied by that general with a Carthaginian fleet. (Strabo. 6.)
TISSA.

learn that it was besieged without success by the leaders of the Italian forces during the Social War. (Diod. xxxvi. Exc. Phot. p. 240.) On both occasions it appears as a strong fortress, situated apparently in the neighbourhood of Rhegium; but no other mention is found of the city, which is not noticed by any of the geographers, and must probably have ceased to exist, like so many of the smaller towns of Bruttium. The name is, however, found in Stephanus of Byzantium, who confirms the correctness of the form Thia, found in Appian. (Steph. B. s. e.) Its site is wholly uncertain. [E. H. B.]

TISSA (Τίςσα, Ptol.; Τίσσα, Steph. B.: Elik. Tissaros, Tissianes, Cic., Tissiniasis, Plin.,) a town in the interior of Sicily, repeatedly mentioned by ancient authors, but without any clue to its position. As its name is cited from Philistus by Stephanus of Byzantium (s. e.), it must have existed as a Sicilian town from an early period, but its name is not found in history. Under the Romans it continued to subsist as a municipal town, though a very small place. Sicero calls it "perparva et tenuis civitas," and Silius Italicus also terms it "parvo et tenui tessera." (Cic. Ver. iii. 33; Sil. Ital. xiv. 567.) It is again noticed by Pliny and Ptolemy among the towns of the interior of Sicily, but all trace of it is subsequently lost. The only clue to its site is derived from Ptolemy, who places it in the neighbourhood of Leonti. It has been fixed by Cluverius and others to the site of the modern town of Randazzo, at the northern foot of Assima, but this is a mere conjecture. (Plin. iii. 8. a. 14; Ptol. iii. 4. § 12; Cluver. Sicil. 310.) [E. H. B.]

TITACIDAES. [Attica, p. 330, a.]

TITANE (Τίτανε, Paus.; Titana, Steph. B. v.; Elik. Titana), a place in the Sicylia, upon the left bank of the Asopus, distant 60 stadia from Cyrene, called by Pliny, Pisidion. It was situated upon a summit of a hill, where Titan, the brother of Ares, is said to have dwelt, and to have given his name to the spot. It was celebrated for a temple Asclepius, reported to have been built by Alexander, the son of Machaon, the son of Asclepius. In its temple still existed in the time of Pausanias, the monument of a great cypress tree, which was supposed to be a servant of the gods, and the objects of the worship were those who thither for the recovery of their health. Thin the temple stood statues of Asclepius and Glaia, and of the heroes Alexander and Euamemon. Here was also a temple of Athena at Titane, situated upon a hill, and containing an ancient wooden image of the goddess. In descending from the hill was an altar of the Winds. (Paus. ii. i. §§ 40. 3. 2.) Stephano B. v. refers the *Tēdron* τον αυτον κάρπον of Her. (II. ii. 735) to Titane, but those words in Hesiod is the name of a mountain in Thessaly. [Vol. i. p. 248, b.]

ruins of Titane were first discovered by Ross. He heard that there were some ancient foundations still existing, which seemed to have belted columns, and that he supposed to be the remains of the temple Asclepius at Titane; but although Hellenic sites exist at this site, there can be no doubt that Titane is represented by the more important *Aekastron* situated further S., and a few minutes from the village of Vissos. This *Pulekastron* is upon a projecting spur of the mountains in the plain of the Asopus, and terrace just above the river in a small hill, which surrounded by beautiful Hellenic walls, rising to a height of 30 or 30 ft. on the S. and SW. side, and flanked by three or four quadrangular towers. On this hill there stands a chapel of St. Tryphon, containing fragments of Doric columns. This was evidently the acropolis of the ancient city, and here stood the temple of Athena mentioned by Pausanias. The other parts of this projecting ridge are covered with ancient foundations; and upon this part of the mountain the temple of Asclepius must have stood. (Leake, Mores, vol. i. p. 254; Curtius, Polopennese, p. 78; Tissos, vol. i. p. 267.)

TITANUS. [ASTERIUM.]

TITARESIUS. [THESSALIA, p. 1166, a.]

TITARES. [THESSALIA, p. 1166, a.]

TITHEOREA. [Narr.]

TITTHOYNIUM (Τιτθωνιον: Elik. Tithwnos), a frontier town of Phocis, on the side of Doris. Livy, who calls it Tritonon, describes it as a town of Doris (xxvii. 7), but all other writers place it in Phocis. It was destroyed by the army of Xerxes together with the other Phocian towns. It is placed by Pausanias in the plain at the distance of 15 stadia from Amphipolis. The site of Tithoreum is probably indicated by some ruins at *Mulii* below *Versand*, where a torrent unites with the Cephissus. (Herod. viii. 33; Paus. x. 3. § 2, x. 33. § 11; Steph. B. s. a.; Leake, Northern Greece, vol. ii. p. 87.)

TITHIUM. [EPIDaurus, p. 841, a.]

TITUKLIA, a town of the Carpathi in Hispania Tarraconensis, on the road from Emerita to Castraquadriga. (Itin. Ant. pp. 438, 438, &c.) It seems to be the same town called *Tiruovia*, or *Tiruvia* (Pompey, vi. 6. § 57). Variously placed near Tegrem, at Gela, and at Pegana. [T. H. D.]

TITYRUS (Tirypus, Strab. x. p. 479), a mountain in the NW. part of Crete, not far from Cydonia. Upon it was the sanctuary or temple called Dictynaeanum. (Strab. xiv. 3.) One of its spurs forms the headland also called Tityrus (Stadi. p. 502) or Pausium. (Cape Spada.) [T. H. D.]

TIUS or TΙΙΙΙ (Tis or Τίς: Elik. Tīs), a town on the coast of Bithynia, or, according to others, belonging to Paphlegonia. It was a Greek town situated at the mouth of the river Billaus, and seems to have been a place of some importance, annexed it to Bithynia. (Mannem, 17—19; Pomp. Mela, i. 19; Marcian, p. 70; Arrian, Perip. P. E. p. 14; Anon. Perip. P. E. p. 2.) In Strabo's (xxii. pp. 542, 543, 565) time, Tius was only a small place but memorable as the birthplace of Philetas, the founder of the royal dynasty of Pergamum. (Comp. Plin. vi. 1.) There are coins of Tius as late as the reign of Gallienses, on which the stighe name appears as Tusov, Tissov, and Tivov. (Sestini, p. 71; Eckhel, ii. p. 438.) [L. S.]

TLOS (Τλός or Τλώς), an ancient and important

---

**PLAN OF TITANE.**

A. Village of Pissos.
B. Acropolis of Titane.
C. Temple of Asclepius and surrounding Buildings.
city of Lyca. It is not often mentioned by ancient writers, but we know from Artemidorus (op. Scrib. iv. p. 665) that it was one of the six cities forming the Lycaonia confederacy. Strabo only remarks further that it was situated on the road to Geryon. (Coss. Plin. v. 25; Pol. v. 3. § 5; Stephan. B. s. v.; Hieroc. p. 659.) Until recently the site of this town was unknown, though D'Anville had correctly conjectured that it ought to be looked for in the valley of the Xanthus. Sir C. Felows was the first modern traveler who explored this valley. He described its beautiful scenery, the identity of which is established beyond a doubt by inscriptions. These ruins exist in the upper valley of the Xanthus, at a little distance from its eastern bank, almost due north of the city of Xanthus, and about 5 miles from the village of Doseer. They are, says Sir Charles, very extensive, consisting of extremely massive buildings, suited only for palace; the design appears to be Roman, but not the mode of building nor the inscriptions. The original city must have been demolished in very early times, and the finely wrought fragments are now seen built into the strong walls, which have enclosed the town raised upon its ruins. The theater was large, and the most highly and expensively built; and the seats not only are of marble, but the marble is highly wrought, and has been polished, and each seat has an overhanging cornice often supported by lions' paws. There are remains of several other extensive buildings with colonnades; but the most striking feature in the place is the perfect hexastyle formed in the sides of the acropolis by extricated tufa, which are cut out of the rock and set on wooden planks, but the form or ornament, seen in some remaining columns, is pure Hellenic.

TIOGBANUS. (Rodogebinae). A river of Brittanica, on the western coast of Bruttium.
TOLERIUM.

y by Ovid and Orozius, in reference to a
le fought on its banks during the Social
neen the Roman consul Rutilius and the
which the Romans were defeated with
rter and Rutilius himself slain. (Ovid, S. 6. 5. 10. Orozius, s.
rium (ToLηérion, Steph. B.: E Ed. ToLηérion, s.
monion to), an ancient town of the name of which occurs in the early
story, but which appears to have ceased to
early period. Its name is found in the
by Dionysius of the thirty Latin cities
ring the 493 (according to the Vatican MS.; Niebuhr, vol. ii.
and it is again mentioned among the
ken by Coriolanus at the head of the
army in B.C. 486 (Dionys. vili. 17; Plut.
8). According to the narrative given by
s, and by Plutarch who copies him, it was
place attacked by Coriolanus in that cam-
mped at its B-ila, Labicum, Pedum and Corbio. It
lar that no mention of Tolerium occurs in
ative of the same operations by Livy (ii. 39),
ems probable that the name of Trebiam,
found in that author (for which the best
Trebius), is a corruption for Tolerium, a
herein little known and therefore liable to
n by copyists. (Cluver. Ital. p. 959; n.
Lat. - Latinische Chorographie, p. 203.)
other notice of Tolerium is found in Pliny,
merates the “Tolernenses” among the “po-
Latium who had formerly shared in the
on the Alban Mount, but were in his time ex-
oriens” (Cesarean reversion, E. H. B. II. 39),
period of its destruction or final decay. The
ue to its position that is derived from the
res above referred to, and it seems very dou-
far we are justified in drawing strict topoi-
ences from such relations. It may, or,
be admitted as probable that Tolerium was
in the same neighbourhood with Bola, in
Pedum. It is followed in succession by
ould place it at Valmontone, derives at least
upport from the circumstance that the latter
stands just at the source of the river Socco,
ain ancient times the Trrers or Toler-
us). The name of Valmontone, is of modern
but it in all probability occupies an ancient
some vestiges of its ancient walls are still
, as well as some remains of Roman date,
d and in ancient sepulchres. Gell, however, regards
the site of Vetillia rather than Tolerium, a
ature which also has much to recommend it.
ella. Valmontone is about 10 miles S. of Palestrina
broad from 35 feet beyond the Via Latina, and on the right-
modern Via Latina, and 26 from Rome. (Nibby, 
ori, vol. iii. pp. 370, 377; Gell, Top. of Rome,
6; Abeken, Mittel-Italien, p. 76.) (E. H. B.)
LUTUM (Tolṣηρος, Ptol. ii. 6. § 57: Elc.
ani, Plin. iii. s. 4; Orelli, Inscr. no. 980),
capital of the Capetani, in Hispania Tar-
usin, situated on the Tagus and on the right-
Emerita to Caesaraugusta, and connected also

TOLOSA.

According to an old Spanish tradition, To-
le was founded in the year 540 a. c. by Jewish
onsts, who named it Toledoc to, that is, “mother of
people,” whence we might perhaps infer a Phoe-
ianic settlement. (Cf. Miñano, i. c. Puentes,
(s. 27.) It is still called Toledo. It con-
tains several remains of Roman antiquities, and
especially the ruins of a circus. (Cf. Flores, Esp.
Sagr. v. p. 22; Puentes, i. p. 165, seq.) (T. H. D.)
TOLIAPIS (坨ιανίς, Ptol. ii. 3. § 83), a small
land on the E. coast of Albion, opposite to the
country of the Tritobantes. Sleepy seems the
only island with which it is at all possible to identify it;
yet it lies farther S. than the account of Ptolemy
appears to indicate. (T. H. D.)

TOLISTOBOGI, TOLISTOBOGI, or TOLIS-
TOBOIL (Galatia).

TOLLENTINUM. [TOLLENTINUM.

TOLOBIS, a coast town of the Illyricans, in
Hispania Tarraconensis. (Mela, ii. 6.) (T. H. D.)

TOLOPHON (ToLον, Tolede, a town of the
Locri Oesinias, possessing a large harbour
according to Dicaearchus (66; comp. Thuc. iii. 101; 
Steph. B. s. v.). According to Leake it occupied

TOLOSA or THELOSA (ToLοn, ToLοn, 
ToLosa, Dion Cass. xxxvii. c. 32: Elc. Tolosates, 
Tolosenses, Toleians), in Gallia, is Toulouse, in the
department of Haut-Garonne, on the right bank of
the Garonne.

The identity of Toulouse and Toulouse is easily
proved from the Itineraries and other evidence.
In Caesar's time Toulon was within the Roman Provincia.
(B. G. iii. 20.) When Caesar is speaking of the cen-
tration of the Helvetii to migrate into the country of the
Santones, he remarks that the Santones are not far
from the territory of the Tolosates, who are in the
Province. He considered that it would be dan-
gerous to the Province if the warlike Helvetii, the
enemies of Rome, should be so near to an open
country, which produced a great deal of grain.
The commentators have supposed that in Caesar's expression about the proximity of the Sa-
tones and the Tolosates, for the Nitusbrigenses and
Petrocorii were between the Santones and the To-
osates; but Caesar only means to say that the Hel-
vetii in the country of the Santones would be dan-
gerous neighbours to the Province. In Caesar's time Toulon and Carcas, both in the basin of the
Garonne, were fully organised as a part of the Prov-
ince; for when P. Crassus invaded Aquitanias,
his summoned soldiers from the muster-rolls of these
towns to join his army. (B. G. iii. 20.) Toulon
being situated on the neck of land where Gallia is
narrowest [GALLIA TRANSALPINA, Vol. i. p. 949]
and in a position easy of access from the west, north, and east, was one of the principal points of the
Gallic in the great rising of n. c. 52; but Caesar
with his usual vigilance protected the province on
this side by placing a force at Toulon. (B. G. 
iii. 20.)

Tulon was an old town of the Volcan Tectosages
which existed probably many centuries before it
was conquered by the Romans. A great quantity
of gold and silver was collected there, the gold the
produce of the auriferous region near the Fyrenees,
and both the precious metals the offerings of Gallic
superstition. The treasure was kept in chambers
in the temples, and also in sacred tanks. This is
the story of Posidonius (Strab. iv. p. 189), who had
travelled in Gallia; and it is more probable than the tradition that the gold of Tolosa was the produce of the plunder of Delphi by Brennus and his men, among whom it is said there were some Thracians. The city, however, lasted for it is very doubtful if any of Brennus' soldiers got back to Gallia, if we admit that they came from Gallia.

Tolosa was in some kind of alliance with Rome (Dion Cass. xxxiv. 97) about B.C. 106; but the Teutoones and Cimbri at this time had broken into Gallia, and fear or policy induced the Tolosates to side with the Cimbri. Cn. Sertorius Cimbricus (const. a. C. 106) made this a pretext for attacking Tolosa, which he took and plundered of its treasures, either in a. C. 106 or in the following year. This act of sacriilege was supposed to have been punished by the gods, for Caesio was defeated by the Cimbri a. C. 105, and his army was destroyed. (Livy. Epit. 67; Orosius, v. 15; Gell. iii. 9.) The treasure of Tolosa never reached Rome, and perhaps Caesio himself laid hold of some of it. However this may be, the "Aurum Tolosanum" became a proverb. All who had touched the consecrated treasure came to a miserable end. It seems that there was inquiry made into the matter at Rome, for Cicero (De Nat. Deorum, i. 90) speaks of a "quasestio auris Tolosae." The Tolosans or Tolosates were that division of the Tectosages which was nearest to the Aquitanians. A place called Flines, between Tolosa and Carcasso, denotes the boundary of the territory of Tolosa in that direction, as this term often indicates a territorial limit in the Roman geography of Gallia. [Flines was another name for Fines, which marks the boundary on the north between the Tolosates and the Cadurci.]

Pliny (iii. 4) mentions Tolosa among the oppida Latinae of Narbonensis, or those towns which had the Latinity, and, as Ptolemy (ii. 10. § 9) names it the Latinitas, we must suppose that it was made a Colonia Latina. Tolosa maintained its importance under the Empire. Ausonius (Ordo Nob. Urb. xii.) describes Tolosa as surrounded by a brick wall of great circuit and, as a populous city, which had sent out inhabitants enough to found four other cities. The name Palladius, which Martial (Ep. ix. 101), Sidonius Apollinaris, and Ausonius give to Tolosa appears to refer to the cultivation of the liberal arts in this Gallic city—

"Te abi Palladiana antetulit toga docta Tolosam." (Auson. Parent. iii. 6; and Commen. Profess. Burdig. xvii. 7.)

TOMARUS. [Dondona, p. 783, b.]

TOMA'TUS (Tonymar, Arrian, Ind. 24), a river, or rather torrent of Gedrisea, called Tomerous or Tomeres by Pliny (vi. 23. a. 25. § 93, ed. Silius), and Tubero by Mele (iii. 7). According to the distances in Arrian, this river is the Makuor or Hugento.

TOMES. [Meseniora, p. 341, b.]

TOMIS or TOMI (Tumbr, Strab. vii. p. 319; Orv. Trv. i. 9. 33; Geogr. Rev. iv. 6, &c.: Tumars, Ptol. iii. 10. § 8; Tomi, Plin. iv. 11. a. 18; Stat. S. i. 2, 255; Itin. Ant. p. 237, &c.; in Melo, ii. 2. Tomoe: we also find the Greek form Tomyris, Steph. B. s. a.; Arrian, Per. F. Eus. p. 24.]

capital of the district of Scythia Minor (Suet. H. Eod. vii. 25; Hieroc. p. 637.) It was situated at a distance of about 300 stadia or 36 miles from Istros or Istropia (Anon. Per. F. Eus. p. 12; Toretae, Strab. xii. 469 for it is very doubtful if any of Brennus' soldiers got back to Gallia, if we admit that they came from Gallia.

Tolosa was in some kind of alliance with Rome (Dion Cass. xxxiv. 97) about B.C. 106; but the Teutoones and Cimbri at this time had broken into Gallia, and fear or policy induced the Tolosates to side with the Cimbri. Cn. Sertorius Cimbricus (const. a. C. 106) made this a pretext for attacking Tolosa, which he took and plundered of its treasures, either in a. C. 106 or in the following year. "Te abi Palladiana antetulit toga docta Tolosam." (Auson. Parent. iii. 6; and Commen. Profess. Burdig. xvii. 7.)

TOMA'TUS (Tonymar, Arrian, Ind. 24), a river, or rather torrent of Gedrisea, called Tomerous or Tomeres by Pliny (vi. 23. a. 25. § 93, ed. Silius), and Tubero by Mele (iii. 7). According to the distances in Arrian, this river is the Makuor or Hugento.

TOMES. [Meseniora, p. 341, b.]

TOMIS or TOMI (Tumbr, Strab. vii. p. 319; Orv. Trv. i. 9. 33; Geogr. Rev. iv. 6, &c.: Tumars, Ptol. iii. 10. § 8; Tomi, Plin. iv. 11. a. 18; Stat. S. i. 2, 255; Itin. Ant. p. 237, &c.; in Melo, ii. 2. Tomoe: we also find the Greek form Tomyris, Steph. B. s. a.; Arrian, Per. F. Eus. p. 24.]

COIN OF TOMI OR TOMI.

TOMISMA (Τομίσμα: Eth. Tόμαιον, Τόμαιον, s. town of Sophene, in Armenia, was ceded by La- culus to the Cappadocians. (Polyb. xxxiv. 13; Strab. xii. p. 335, xiv. pp. 663, 664; Steph. B. s. v.)

TONERUS. [TOMERUS.]

TONICE. [NICORAS DEOMAS.]

TONOSA, a town of Cappadocia, 50 miles from Sebastia, still called Tomsa. (It. Ant. pp. 181, 182, 212.)

TONUS, or TONZUS (Tōnos, Zos. ii. 22. § 8; &c. Lampr. Elag. 7), the principal tributary of the Hebrus in Thrace. It rises in the Haemoas: its general course for about 70 miles is almost due E.: it then makes a sudden bend to the S. and, after a farther southerly course of nearly of the same length, falls into the Hebrus, a short distance from Hadrano- polis. Now Tonska or Tomsida. [J. E.]

TOPRIS (Plin. iv. 11. a. 18; Topris or Top- rīs, Ptol. iii. 11. § 13), or Topirus (It. Ant. p. 321; in p. 331, it is corrupted into Ttopoos; and in It. Hier. p. 633, into Topoos; Tub. Test.; Toretae, Hieroc. p. 634.), a town in the S.W. of Thrace, NE. from the mouth of the Nestus, and a short distance W. of Abdra. In the time of Procopius (B. G. ii. 38) it was the first of the maritime cities of Thrace, and is described as distant 12 days' journey from Byzantium. Very little is known about this place. In later times it was called Khousin (Pausan. Hieroc. 4. &c.; cf. Aporoeum. Geo. in Hades. v. p. 42; and Anna Comm. p. 212), and was the seat of a bishopric. (Conc. Chalcid.) Justinian rebuilt its walls, which had been demolished, and made them stronger than before. (Procop. de Aed. iv. 11.) According to Paul Lucas and Boudou, the modern Tophir occupies its site; but Lapie identifies it with Koristos. [J. E.]

TOREATAE. [TOMEATAE.]

TORECCADAE. [TOMEATAE.]

TORETAE (Toperai, Stephan B. s. vi.: Decr. Per. 628; Plin. vi. 5; Mele, i. 2; Avien. Or. Terr. 867) or TOREATAE (Toperai, Strab. xii. p. 465), a tribe of the Mausaei in Asiatic Sarmatia. Ptolemy (v. 9. § 9) mentions a Topernek Sepul in Asiac Sarmatia; and in another passage (iii. 5. § 23) he
TORNAUDOTUS, a small river of Asia Minor, mentioned by Pliny (vi. 27. s. 81), and a tributary of the Troad, called the Troadus by Strabo and Pharamon by Herodotus, the name of which is noticed by Xenophon under the name of Physis. (Arab. ii. 4. § 25.) It may be the modern Torna or Odornex. Mannert (vi. 2. p. 317) takes it to be the same as the Idaianas of Amniasius (xxiii. 6); but the Adisias is more likely to be that elsewhere called the Zabasus (now Edb.). TORNATEIS, a town in Asia Minor, whose temple was preserved in Pliny's time (iv. 19). There is no indication of their position, unless it be the name Tornet, a small town on the Arvo, a branch of the Adour, and in the diocese of Turdus, which, under the name of Turba, was the chief place of the Ripariones. [BISHERI] [G. L.]

TOROINAUS SINUS. (TORONE.) A gulf (Τορώνοις, Τορώνα) of Chalcidice in Macedonia, situated upon the SW. coast of the peninsula of Sithonia. It was said to have derived its name from Torone, a daughter of Proetus or Poseidon and Philocoe. (Steph. B. z. v. Tornæa.) It was a Greek colony, founded by the Chalcidians of Eupeus, and appears to have been originally more important than the other settlements of Thrace. (Strab. vii. p. 380; Stephan. B. z. v. Tornæa.) In the Greek cities in these parts, Torone farmed ships and men to the army of Xerxes in his invasion of Greece. (Herod. vi. 122.) After the Persian War Torone came under the dominance of Athens. In B.C. 424 a party in the town opened the gates to Brasidas, but it was retaken by Cleon two years afterwards. (Thuc. iv. 110, seq. v. 2.) At a later time it seems to have been accessible to the Romans by a route which was recovered by the Athenian general Timoleon. (Diodor. xvi. 53.) It was annexed by Philip, along with the other Chalcidian cities, to the Macedonian empire. (Diodor. xvi. 53.) In the war against Perseus, c. 169 B.C., it was attacked by a Roman fleet, but without success. (Liv. xiv. 12.) Theophila in this gulf to the mouth of the river is a marsh near Torone (ap. Athen. iii. p. 72, d.); and Archestratus mentions a particular kind of fish, for which Torone was celebrated (ap. Athen. vii. p. 310, a.). The harbour of Torone was called Cophes (Κόφη), or ωδή, because being separated from the sea by two narrow passages, the noise of the waves was magnified, and hence the proverb ώδης πρὸς τοῦ Τορώναιον Λιόντρον. (Strab. vii. p. 330; Mela, ii. 3; Zenob. Prov. Graec. cent. iv. p. 38.) This port is apparently the same as the one visited by Thucydides (v. 2) the harbour of the Coptoians, which he describes as only a little way from the city of the Toronaeans. Leake conjectures that he meant perhaps the head of Sounion instead of Σούνιον Παρθενίου; it is still called Κόφη, and Torone likewise retains its ancient name. (Leake, Northern Greece, vol. iii. pp. 119, 155, 455.)

TOBYNE (Τοπάγγεια, Πιντ. Ant. 62; Τοπαγή, Ptol. ii. 14. § 5), a town of the Thessaly in Epirus, off which the fleet of Augustus was moored a short time before the battle of Actium, seems from the order of the names in Ptolemy to have stood in one of the bays between the mouth of the river Thyamis and Sybota, probably at Purgy. (Leake, Northern Greece, vol. i. p. 103, vol. iii. p. 8.)

TOITAEUM, a place in Bithynia of uncertain site (CIL Ant. 4. 43 = Herodian 1. 187). In Ptolemy (vii. 13) it is called Tositium = Concil. Chalcis, p. 98; but some look for its site near Gevele, and others near Kara-kia. [L. S.]

TOXANDRIS. These inhabitants of North Gallia are first mentioned by Pliny (iv. 17) in a passage which has been interpreted several ways. Pliny's Belicae is limited to the island of Hellespont (Scheide). [Gallia Trans., Vol. L p. 96.] Pliny says: "A Scalli incolunt extera Toxandria pluribus nominibus. Deinde Menapi, Morini." D'Anville and others explain "extera" to signify beyond the limits of the Scheide, that is, north and east of this boundary; and Oliver places the Toxandri in the lands of Zeeland. D'Anville supposes that they took part in their territory from the time when this newly acquired country was the Campania north of Brabant and the bishopric of Liège. This conjecture is supposed to be confirmed by the passage of Ammianus Marcellinus (xviii. 8), in which he says that Julian marched against the Franci named Salii, who had dared to fix themselves on Roman ground, and Toxandria. Some are of opinion that the Franks and others who are best acquainted with the Netherlands fix Toxandria locus at Tessemerder, a small place in the Campana to the north of Brabant. Ubert (Gallien, p. 372) gives a different meaning to the word "extera." He remarks that Pliny, describing the north coast of Europe (iv. 14), says: "Toto extera hunc usque ad Scaldiam usque Germanorum accolunt genem," and he then explains the peoples as far as the Scaldia. Afterwards (c. 17) he adds "a Scalli incolunt, &c.; and a few lines further, a word "introrsus" is opposed to this "extera;" from which Ubert concludes that "extera" here means the country beyond, a meaning which it has in two other passages of Pliny (ii. 67, iv. 13). After describing the "extera, or coast, Pliny mentions the peoples in the interior, and in the third place the Germanic peoples on the Rhine. Accordingly Ubert concludes that we must look for the Toxandri in the neighbourhood of Ghent and Bruges.

TRACANA (Τρακαν, Ptol. iii. 5. § 27), an inland city of European Sarmatia. [G. L.]

TRACHIS (Τραχίς, Ερώτη, Θέμ., et alli; Τραχίς, Strab.; Eth. Τραχίους). 1. A city of Mælia, in the district called after it Trachis. It stood in a plain at the foot of Mt. Oeta, a little to the N. or rather W. of Thermopylae, and derived its name from the rocks which surrounded the plain. It commanded the approach to Thermopylae from Thermessus, and was, from its position, of great military importance. (Herod. vii. 176; Strab. ix. p. 426; Steph. B. z. v.) The entrance to the Trachian plain was only half a stade in breadth, but the surface of the plain was 22,000 stadia, according to Herodotus. The same writer states that the city of Trachis was 5 stadia from the river Meles, and that the river Aeaxus issued from a gorge in the mountains, to the S. of Trachia. (Herod. vii. 198.) According to Thucydides, Trachia was 40 stadia from Thermopylae and 20 from the sea (Thuc. iii. 92.) Trachis is mentioned in Homer as one of the cities subject to Achilles (Il. ii. 682), and is celebrated in the legends of Hercules as the scene of
TRACHIS.

this hero's death. (Sph. Trach. passim.) It became a place of historical importance in consequence of the colony founded here by the Lacedaemonians in the sixth year of the Peloponnesian War, B.c. 436. The Trachinians and the neighbouring Doriens, who suffered much from the previous invasions of the Oetaean tribes, obtained aid from the Spartans, who eagerly availed themselves of this opportunity to plant a strong colony in this commanding situation. They issued an invitation to the other states of Greece to join in the colony; and as many as 10,000 colonists, under three Spartan exiles, built and fortified a new town, to which the name of its founder was given, from the great hero, whose name was so closely associated with the surrounding district. (Thuc. iii. 92; Diod. xii. 59.) It was usually called the Trachinian Heraclea, to distinguish it from other places of the same name, and by later writers Heraclea in Phthiotis, as this district was subsequently included in the Thessalian Phthiotis. ('Hdt. viii. 8, 39, 41; Xen. Hell. i. 2. § 18; Diod. xii. 77, xv. 57; Ἱερσελεωτα εἰς ἐπὶ Τρακίας, Thuc. v. 51; Ἠ Ἡ Τρακία καλουμένη προτέρους, Strab. i. p. 428; Heraclea Trachin dicta, Plin. iv. 7. a. 14; Η. Θεσσαλίας, Ptol. iii. 13. § 46.) The new colonists also built a port with docks near Thermopylae. It was generally expected that this city, unlike the other cities of Sparta, would become a formidable power in Northern Greece, but it was attacked from the beginning by the Thessalians, who regarded its establishment as an invasion of their territory; and the Spartans, who rarely succeeded in the government of dependencies, displayed haughtiness and corruption in its administration. Hence the city rapidly dwindled down; and in B.C. 420 the town was taken by the neighbouring Thessalian tribes, and Xenarces, the Lacedaemonian governor, was slain in the battle. Sparta was unable at the time to send assistance to their colony; and in the following year the Boeotians, fearing lest the place should fall into the hands of the Athenians, took possession of it, and dismissed the colonists, on the ground of mis-conduct. (Thuc. v. 51, 52.) The Lacedaemonians, however, regained possession of the place; and in the winter of B.C. 409—408, they experienced here another disaster, 700 of the Heracleots being slain in battle, together with the Lacedaemonian harmost. (Xen. Hell. i. 3. § 18.) But, after the Peloponnesian War, Heraclea again rose into importance, and became the head-quarters of the Spartan power in Northern Greece. In B.C. 399 Harippidas, the Lacedaemonian, was sent thither to repress some factional movements in Heraclea; and he not only put to death all the opponents of the Lacedaemonians in the town, but expelled the neighbouring Oetaeans and Trachinians from their abodes. (Diod. xiv. 58; Pol. i. p. 398; Plut. xiv. 1. 3.) The Thessalians, under the command of Lysanias, went to the assistance of the Spartan garrison, and gave the city to the old Trachinian and Oetaean inhabitants. (Diod. xiv. 83.) The walls of Heraclea were destroyed by Jason, lest any state should seize this place and prevent him from making the Spartan governor on the ground of his misconduct. (Diod. xiv. 39; Η Ναύπαξ, Plut. Ant. vi. 4. § 27.) At a later time Heraclea came into the hands of the Athenians, and was one of the main sources of their power in Northern Greece. After the defeat of Antiochus at Thermopylae, B.C. 191, Heraclea was besieged by the Roman consul Aelius Glabrio, who divided his army into four bodies, and directed his

TRACHONITIS.

attacks upon four points at once; one being stationed on the river Asopus, where was the granum; the second near the citadel outside of the walls (extra muros), which was almost more thinly inhabited than the city itself; the third towards the Malian gulf; and the fourth towards the mouth of the river Diames. The country around was marshy, and abounded in lofty trees. After a siege of twenty-four days the Romans succeeded in taking the town, and the Astolians retired to the citadel. On the following day the consuls seized a rocky summit equal to the citadel in height, and separated trees only by a chasm so narrow that the two summits were within reach of a missile. Thermopylae the Astolians surrendered the citadel. (Liv. xxxvi. 21.) Leake remarks that it seems quite clear from the account of Livy that the city occupied the isthmus between the rivers Kavarna (Asopus) and Maeaca (Melas), extending from the sea to the other, as well as a considerable distance in the plain in south-eastern direction. There were some vestiges of the citadel upon a lofty rock shore; and upon its perpendicular sides there are many catacombs excavated. "The distance of the citadel above the town justifies the words extra muros, which Livy applies to it, and may explain also the mention of ibabo (l.c.), that Heraclea was six stadia distant from the ancient Trachis; for, with reference to the position of the town, it was taken exactly at the point of the isthmus, as the ancient name the Trachus of Herodotus, the citadel, which according to Livy, was better inhabited in the Astolian War than the city, may very possibly have been the only inhabited part of Heraclea two centuries later." (Leake, Northern Greece, vol. ii. pp. 22—29.)

Sunny SEM and PHOCICA (ἡ Φωκεία), a small city of Phocias, situated upon the confines of Boeotia, and on the road to Lebadeia. (Strab. i. p. 423; Pos. x. 3. § 2.)

TRACHONITIS (Τραχωνίτης, Lake, i. 1; Joseph. Ant. xvi. 9, B. J. iii. 3; Plin. v. 18. 16; Τραχωνίτης, Joseph. Ant. xvi. 16.) according to Josephus, a portion of Pelasgic Tribes, and S. N. directed from the neighborhood of the sea of Galilee in the direction of Damascus, having the Syrian desert and Auranitis on its eastern frontier, Iteraces on the S., and Gaulanitis on the W. It was considered as the northern province of Perses (Dios. i. e. Πέρσας τοῦ Ἰτέρας, Jastrow. i. 9; Mann. ii. 25.) According to Strabo, it lay between Damascus and the Arabian mountains (xvi. 753); and from other authorities we may gather that it adjoined the province of Bataneas (Joseph. B. J. ii. 20. § 4) and extended between the Regio Decapolitana (Fla. xvi. 15) as far S. as Bostra (Enese. Orant. x. 11 verse 4.) It derived its name from the rough nature of the country (τραχωνίτης, i.e. τραχώς καὶ νεπτός) and the mode of life of the inhabitants. (Strab. v. 755, 756.) According to Strabo, the city of Trachonitis was considered to be one of the summits of two mountain ranges on the road from Mecthen to Damascus, near the village of Al-Aune (Tracoidea, p. 115.) The inhabitants of Trachonitis are called by the compilers of the Ptolemy, Ἰτέρας ἢ Τραχωνίτης ἄνδροι (c. 12 § 26), and they seem to have maintained their mountain abode for a remarkable length of time (Joseph. Ant. iv. 4. § 27.) For which the rough nature of the country they inhabited, full as it was of clefts, and holes and secret fastnesses, was peculiarly well suited (Joseph. Ant. xvi. 10. § 1.) Trachonitis belonged originally to the territory of Philipidus, the son of Herod.
TRAJANOPOLIS

1219

marked as 10 miles from Philippi. This is apparently a corruption of "Traelio," since numerous coins (one of which is figured below) have been found near Amphipolis with the inscription TRAJAIN. Leake conjectures with much probability that the real name was Tragilus, and that in the local form of the name the τ of may have been omitted, so that the TRAJAIN of the coin may represent the Hellenic Tραγηλις. (Eckhel, vol. ii. p. 81; Leake, Northern Greece, vol. iii. p. 228.)

COIN OF TRAGILUS OR TRAEILUS.

TRAGURIUM (Τραγορίου, Strab., Ptol.; Tragourio, Polyb.), an important town of Dalmatia, situated upon an island, which was separated from the mainland by an artificial channel. According to the Antonine Itinerary, it was distant 16 miles from Prastorium and 13 from Salona. Pliny calls it "Tragurium civium Romanorum," and says that it was celebrated for its marble. Its name is preserved in the modern Trasac. (Polyb. xxxii. 18; Strab. ii. p. 124, vii. p. 315; Ptol. ii. 17, § 14; Plin. iii. 22, § 26; Mela, ii. 3; J. A. Ant. p. 272; Tab. Peut. Grec. Rev. iv. 16.)

TRAGUS. [Capharae.]

TRAIA CAPITA (Itin. Ant. p. 399), more correctly Thia Capita (Geog. Rev. v. 3), since it lay near the three mouths of the Iberus, a town of the Costanii, in Hispania Tarraconensis, between Dertosa and Tarraco. Variously identified with Tivisa and Torre del Aliga. (T.H.D.)

TRAJAN'NI MUNIMENTUM, a fort or castle built by Trajan on the southern bank of the river Moenus, not far from its junction with the Rhenus. (Amm. Marc. xvii. 1) The site is uncertain, nor is it known what the Munimentum really was. (L.E.)

TRAJANOPOLIS (Τραγανόπολις), a town in Mydia, in the district occupied by the tribe of the Thraesmothyratae, on the frontiers of Phrygia. (Ptol. v. 2, §§ 14, 15.) The Cilician city of Seclinus also for a time bore the name of Trajanopolis. [Seclinus.] (L.E.)

TRAJANOPOLIS (Τραγανόπολις), an important town in the S. of Thrace, which was probably founded by or in honour of the emperor Trajan, about the time when Ptolemaios was founded, to perpetuate the name of his wife Plotina. Its exact site appears to be somewhat doubtful. Some authorities describe it as situated on the right bank of the H serifus, near the pass in the range of Mount Rhodope, through which that river flows, and about 40 miles from its mouth. Now this is the site of the modern Oriškova, with which accordingly it is by some identified. It would be difficult, however, to reconcile this with the various distances given in the Itineraries: e. g. Trajanopolis is stated to be 9000 paces from Temprya, and 29,000 from Cypselis; whereas the distance of the former is assigned to Temprya and Cypselis, being, however, much more distant from the latter. But this is only one example out of many showing how extremely imperfect is our knowledge of the geography of Thrace, both ancient and modern. In the map of the Society
TRAIJECTUM.

for the Diffusion of Useful Knowledge Trajanopolis is placed on the Euxinian Way at a considerable distance W. of the Hebrus, and at a point which fulfills too well the condition that the city is at a distance of two places above mentioned.

Trajanopolis became the capital of the province of Rhodope, and continued to be a place of importance until the fourth century. It is remarkable, however, that it is not mentioned by Ammianus in his general description of Thrace (xxvii. 4); according to the same writer the Rhodope is Maximinopolis, Maroneia, and Aenna. (Prot. iii. 11. § 13; Hieroc. p. 631; Prop. de Aed. iv. 11; Const. Porph. de Caes. ii. 54; Cantar. i. 38, iii. 67, et alibi; It. Ant. pp. 175, 322, 332, 333; It. Hier. p. 629; Geogr. Bar. iv. 6; cf. Mannert, vii. p. 234.)

[2.

TRAIJECTUM, in North Gallia, is not mentioned in any Roman writing before the Iun. of Antoninus.

It was on the Roman road which ran along the Rhine from Lugdunum Batavorum, and the site is Utrecht in the kingdom of the Netherlands, at the bifurcation of the old Rhine and the Yach. The modern name contains the Roman name abbreviated, and it is most probably a corruption of the word Oude (Utrech); but D'Anville observes that the name is written Utrecht as early as 870.

[3.

TRAJECTUS in Gallia, placed by the Antonine, Iun. on a road which runs from Aginnum (Agens) through Exciium and Trajectus to Vesunna (Perigeeus). Trajectus is xxi. from Exciium (Tilie Nemus), and xviii. from Vesunna, and it marks the passage of the frontier. The names of these two positions at a place called Pontes on the Dorodna, opposite to which on the other bank of the river is La Lincie, mentioned in the Table under the name of Dolidinum. [Dolidinum.]

[4.

TRAILS. [Traiens.]

TRAILS or TRALLIS (Trodalia, Trodalia, Exodala, ExoAdalos), a large and flourishing city of Caria, on the southern slope of Mount Mopsogait, a little to the north of the Sramander, a small tributary of which, the Edon, flowed close by the city, while another passed right through it. Its acropolis was situated on a lofty eminence in the north of the city. Trails was said to have been founded by Arges in conjunction with a body of Thracians, whence its name is believed to have originated. (Strab. xiv. pp. 648, 649; Hesych. s. v.; Diod. Sic. xvi. 65; Pint. Ages. 16), for it is said to have previously been called Anthia, Evanthia, Ermyna, Charax, Seleucia, and Antiochia (Steph. B. s. v. Trodalia, Xonder; Elym. M. p. 389; Pint. v. 29). Others, however, state that it was a Pelasgian colony, and originally bore the name of Larisa (Agath. ii. 17; Schol. ad Hom. II. x. 429). It was situated in a most fertile district, at a point where highroads met from the south, east, and west; so that it must have been of considerable commerce. (Cic. ad Att. v. 14, ad Fam. iii. 5, ad Quint. Frat. i. 1; Strab. xiv. p. 663.) The inhabitants of Trails were celebrated for their great wealth, and were generally appointed asarchs, that is, presidents of the games celebrated in the district. But the country in which Trails was situated was much subject to earthquakes; in the reign of Augustus many of its public buildings were greatly damaged by a violent shock; and the emperor gave the inhabitants a handsome sum of money to repair the losses they had sustained. (Strab. xii. p. 558.) Out of gratitude, the Trailsians petitioned to be permitted to erect a temple in honour of Tiberius, but without effect. (Tac. Ann. iv. 53.) According to Pliny (xxxiv. 49), king Attalus had a palace at Trails. A statue of Caesar was set up in the temple of Attalos, and during the presence of Caesar in Asia a sacrifice is said to have happened in the temple, respecting which see Cae. Bell. Civ. iii. 103; Plut. Caes. 47; and Val. Max. i. 6. The city is very often mentioned by ancient writers (Xen. Alex. l. 4. § 8; Hist. Gr. ii. 3. § 21; Polyb. xii. 27; Liv. xxvii. 45, xxviii. 39; Diod. xix. 36, xx. 35; Ptol. v. 2. § 19; Hieroc. p. 659). During the middle ages the city fell into decay, but was repaired by Andronicus Palaeologus (G. Pachymer, p. 320). Extensive ruins of the place still exist above the modern Ghiasal Hisar, in a position perfectly agreeing with the description of Strabo. (See Arndell, Seven Churches, pp. 58, 65, 233; Leake, Asia Minor, pp. 243, 316; Fellows, Asia Minor, pp. 276, 175.) As to the coins of Trails, which are very numerous, see Sentini, p. 89. [L.S.]

COIN OF TRAILS.

TRAILS or TRALLIS (Trodalia), a town in Phrygia, on the west of Aigames, and 15 miles east of Hierapolis, not far from the banks of the Maeander (Hieroc. p. 667; Conc. Const. ii. p. 243; Conc. Nica. ii. p. 213; Ph. Strab. p. 16), near the village of Kuslar are probably those of Trails. [L.S.]

TRALLIA (Troallia; Eta Troalla, Troallis, Step. B. s. v.), a district of Illryia, whose inhabitants, the Trall, are mentioned several times by Livy (xxvii. 33, 34, 35, 36, 37). TRALLICON, a town of Etruria, mentioned only by Pliny (v. 29), situated on the river Harspaus; but in his time it had already ceased to exist. [L.S.]

TRAMPA. [Tymphiara.]

TRANSCELLENSI MONS, a mountain in Mauretania, between Caesareae and the river Chalaphe. (Amm. Marc. xxi. 5. § 20.) [T. H. D.]

TRANSDUCTA. (Transducta, Prot. ii. 4. § 6), and in a fuller form, Julica (tr. = trudact−) TRACTADUC, a town of the Bastulii, in Hispianeta, Baetica, to the E. of Mellaria. It is doubtless the same place which Strabo (ii. 140) calls "Ioma Idca, and gets down between Belon and Gades, whither the Romans transplanted the inhabitants of Zela, in Mauretania Tingitana. According to the text (iii. p. 544) it is also the Tingentera of Mela (ii. 6), who informs us that he was born there, though it is not easy to see how it could have had so many names. But the ground for the conjecture is that Tingentera, according to Mela, was inhabited by Phoenicians, who had been transported thither, which in some respects resembles Strabo's account of the town of "Juba's song at the modern Tarifa," or its neighbourhood. For on the Textus, loc. cit. p. 596; Eckhel, Doct. Num. i. 1. p. 30; Meeuwes, l
TRANSMARISCA.

p. 26, and Suppt. i. pp. 19, 45; Sestini, p. 90; Flores, Esp. Supr. x. p. 50; Mémoire de l'Acad. des Insers. xxx p. 103.)

TRANSMARISCA (Τρανσμαρισκα, Pol. iii. 10. § 11; Τρανσμαρισκα και Τρανσμαρισκα, Proc. op. Aed. iv. 7. p. 298.) The former is the more correct statement, for the town stood on the southern slope of Mount Cadmus, to the south-east of Antiochia, and, according to the Notitia Imperii, afterwards belonged to the province of Piacatian. It is possible that the ruins which Arundelli (Diciiscopii, ii. p. 147) found at Kealio-kealio may be those of Transmarisca.

TRAPEZOPOLIS (Τραπεζοπολις or Τραπεζο-πολις: Ed. Trapanopolites), a town situated, according to Ptolemy (ii. 2, § 18), in Caria, but according to Socrates (Hist. Eccl. vii. 36) and Hierocles (p. 65), in Phrygia. The former is the more correct statement, for the town stood on the southern slope of Mount Cadmus, to the south-east of Antiochia, and, according to the Notitia Imperii, afterwards belonged to the province of Piacatian. It is possible that the ruins which Arundelli (Diciiscopii, ii. p. 147) found at Kealio-kealio may be those of Transmarisca.

TRAPEZUS (Στρατοπολις: Ed. Τραπεζο-πολις: now Tarabosim or Tarabosim), an important city on the coast of Pontus, on the slope of a hill, 60 stadia to the east of Hermasona, in the territory of the Macrones (Anon. Peripl. P. E. p. 18), was a colony founded by the Sicani, who formed many establishments on this coast. (Xenoph. Anab. iv. § 22; Arrian, ii. p. 6, 5; Strabo, xli. p. 583.) It derived its name probably from its form, being situated on an elevated platform, as it was a table above the sea; though the town of Trapezus in Arcadia pretended to be the mother-city of Trapezus in Pontus (Paus. viii. 27. § 4). Trapezus was already a flourishing town when Xenophon arrived there on his memorable retreat; and he and his men were魔术的. (Xenoph. Anab. v. § 10.) At that time the Colchians were still in possession of the territory, but it afterwards was occupied by the Macrones. The real greatness of Trapezus, however, seems to have commenced under the dominion of the Romans. Pliny (iv. 4) calls it a free city, a distinction which it had probably obtained from Pompey during his war against Mithridates. In the reign of Hadrian, when Arrian visited it, it was the most important city on the south coast of the Euxine, and Trajan had before made it the capital of Pontus Cappadocicus, and provided it with a larger and better harbour. (Arrian, Peripl. P. E. p. 17; comp. Tac. Ann. xiii. 39, Hist. iii. 47; Pomp. Mela, i. 19; Strab. vii. pp. 905, 920, xi. p. 499, xliii. p. 548; Steph. Byz. s. v.) Concerning it was a strongly fortified commercial town; and although in the reign of Gallienus it was sacked and burnt by the Goths (Zosim. i. 53; Eustath. ad Dion. Per. 687), it continued to be in such excellent condition, that in the reign of Justinian it required but few repairs. (Proc. op. Aed. iii. 7.) From the Notitia Imperii (c. 38) we learn that Trapezus was the station of the first Pontian legion and its staff. Some centuries later a branch of the imperial house of the Commen declared themselves independent of the Greek Empire, and made Trapezus the seat of their principality. This small principality maintained its independence even for some time after the fall of Constantinople; but being too weak to resist the overwhelming power of the Turks, it was obliged, in A.D. 1460, to submit to Mohammed II., and has ever since that time been a Turkish town. (Chasecond. ii. p. 263, fol.; Duc. 45; comp. Gib. Hist. iii. 22.) The importance of Trapezus, called Daphnis, was formed by the acropolis, which was built on a rock running out into the sea. (Anon. Peripl. P. E. p. 18.) The city of Trebizond is still one of the most flourishing commercial cities of Asia Minor, but it contains no ancient remains of any interest, as most of them belong to the period of the Emperor Constantine the Great, who founded it. (Voyage sur la Levant, iii., lettre 17, p. 78; Fontanier, Voyages dans l'Orient, p. 17-23; Hamilton's Researches, i. p. 240.) The coins of Trapezus all belong to the imperial period, and extend from the reign of Trajan to that of Philip. (Eickel, i. 2. p. 368; Sestini, p. 60.)

TRAPEZUS (Πρατεζο-πολις: Ed. Τραπεζο-πολις), a town of Arcadia in the district of Panos, a little to the left of the river Alpheius, is said to have derived its name from its founder Trapezus, the son of Lycon, or from trepezus (τραπεζος), "a table," because Zeus here overturned the table on which Lycon offered him human food. (Paus. viii. 3. §§ 2, 3; Apollod. iii. 8. § 1.) It was the royal residence of Hippothus, who transferred the royal government from Teges to Trapezus. On the foundation of Megalopolis, in B.C. 371, the inhabitants of Trapazus refused to remove to the new city; and having thus ensured the anger of the other Arcadians, they quitted Peloponnesus, and took refuge in Trapezus on the Pontus Euxinus, where they were received and remained for a kindred period. The statue of one of their gods was removed to Megalopolis, where it was afterwards brought to Trapezus. Trapezus stood above the modern Maritza. (Paus. viii. 5. § 4, 27. §§ 4-6, viii. 29. § 1, 31. § 5; Herod. vi. 127; Steph. Byz. s. v.; Leake, Morea, vol. ii. p. 292; Rosso, Reisen im Peloponnes, vol. i. p. 90.)

TRAPEZUS MENS. (Τραπεζομήνικος) is a town of Myra, mentioned by Strabo in conjunction with Perpera (xiii. 607.) Trapezus (ad Lycoph. 1141, 1159) mentions a tower named Trans (Στρατοπολις: Ed. Τραπεζο-πολις) in the Traed.

TRASIMENUS LACUS (Στρατοπολις: Ed. Τραπεζο-πολις) in the Traed.

TRASIMENUS LACUS, a lake situated 10 miles in length and 8 in breadth: and differs from all the other considerable lakes of that country in not being of volcanic origin. It is merely formed in a depressed basin, surrounded on all sides by hills of moderate elevation, and having no natural outlet. The hills on the N. side of the lake, which extend from Crotone to Persia, are considerably more elevated than those that form the other sides of the basin, but even these scarcely rise to the dignity of mountains. The lake itself is of small depth, nowhere exceeding 30 feet, and its banks are almost everywhere low, flat, and covered with reeds. No con-
siderable town was situated on its shores: Perusia, from which it derives its modern name of the Lago di Perugia, stands on a lofty hill about 10 miles to the E. of it; Clusium is situated about 9 miles to the SW., and Cortona between 6 and 7 to the NW. The highroad from Arretium to Perusia followed the northern shore of the lake for a considerable distance.

The lake Trasimenus derives its chief celebrity from the great victory obtained upon its shores by Hannibal, over the Roman consuls, C. Flaminius, B. C. 217, and the greatest of the generals sustained by the Roman arms during the whole course of their history. The circumstances of this battle are more clearly related and more readily understood with reference to the actual localities than those of any of the other great battles of Hannibal. The Carthaginian general, after crossing the Appennines, and effecting his toilsome march through the marshes of Eturia, had encamped in the neighbourhood of Faseulus (Pol. iii. 80, 82). Flaminius was at this time posted with his army at Arretium, and Hannibal, whose object was to draw him into a general battle, moved along the upper valley of the Arno, and passing within a short distance of the Roman army, advanced along the road towards Rome (i. e. by Perusia), laying waste the country as he advanced. Flaminius on this hastily broke up his camp, and followed the Carthaginian army. Hannibal had already passed the city of Cortona on his left, and was advancing along the N. shore of the lake, which lay on his right hand, when, learning that Flaminius was following him, he determined to strike on his right and get the advantage of the strong position which offered itself to him. (Pol. iii. 82; Liv. xxi. 4.) The hills which extend from Cortona to the lake, called by Livy the "montes Cortonenses," and now known as the Monte Guadalmedo, descend completely to the bank of the lake, or at least to the marshes that border it, at a point near the NW. angle of the lake, now marked by a village and a round tower called Borghetto. This spur of the hills completely separates the basin of the lake from the plains below Cortona, and it is not until after surmounting it that the traveller by the modern road comes in sight of the lake, as well as of the small plain or valley, shut in between its N. and W. slopes, which Guadalmedo, which was the actual scene of the catastrophe. "Arrived at the highest point of the road, the traveller has a partial view of the fatal plain, which opens fully upon him as he descends the Guadalmedo. He soon finds himself in a vale, enclosed to the left, and in front, and behind him by the Guadalmedo hills, bending round in a segment larger than a semicircle, and running down at each end to the lake, which obliquely to the right, and forms the chord of this mountain arc. The position cannot be guessed at from the plains of Cortona, nor appears to be so completely enclosed, unless to one who is fairly within the hills. It then indeed appears a place made as it were on purpose for a snare, "locus insidiosus natas." (Livy. xxxii. 39.) While on this summit a narrow marshy pass close to the hill and to the lake, whilst there is no other outlet at the opposite turn of the mountains than through the little town of Passignano, which is pushed into the water by the foot of a high rocky acclivity. There is a woody eminence branching down from the mountains into the upper end of the plain nearer to the site of Passignano, and on this stands a village called Torre" (more properly Tuoro). (Hobhouse, Notes and Illustrations to Childe Harold, canto iv. st. 63.)

From this description of the localities by an eyewitness, which agrees almost exactly with that given by Livy (xxxii. 4), the details of the battle are rendered perfectly clear. Hannibal occupied the hill last-mentioned with the main body of his troops, his heavy-armed African and Spanish infantry, while he sent round his light-armed troops to occupy the position on the mountain on the right, so as to threaten the left flank of the advancing Roman army, while he posted his cavalry and the Gallic troops on the hills on the left between Borghetto and the present road. Flaminius advanced the next morning almost before daylight, while a thick fog rising from the lake still further concealed the position of the enemy. He therefore advanced through the pass, in ignorance of the bodies of troops that hung upon both his flanks, and, seeing only the array in front on the hill of Tuoro, began to draw up his forces for battle in the plain in front of them. But before he was able to commence the engagement, he found himself suddenly attacked on all sides at once: the surprise was complete, and the battle was gained in a few minutes. The core of the Roman army occupied a hill on which there stood an Etruscan village, but finding themselves wholly isolated, the Carthaginians forced the advance of their line. Sixteen thousand Roman troops perished in this disastrous battle: the site of the chief slaughter is still marked by a little rivulet which traverses the plain, and is known at the present day by the name of the Sanguineo. (Hobhouse, i. c.) The details of the battle are given by Polybius (iii. 85, 84) and Livy (xxii. 41), and it is clear from the latter that the localities are much more clearly and accurately described by Livy than by Polybius: the account given by the latter author is not incompatible with the existing local details, but would not be easily understood, unless we were able to correct it by the certainty that the battle took place on this particular spot, as is corroborated by the narratives of Appian and Zonaras.

Sixteen thousand Roman troops perished in this disastrous battle: the site of the chief slaughter is still marked by a little rivulet which traverses the plain, and is known at the present day by the name of the Sanguineo. (Hobhouse, i. c.) The details of the battle are given by Polybius (iii. 85, 84) and Livy (xxii. 41), and it is clear from the latter that the localities are much more clearly and accurately described by Livy than by Polybius: the account given by the latter author is not incompatible with the existing local details, but would not be easily understood, unless we were able to correct it by the certainty that the battle took place on this particular spot, as is corroborated by the narratives of Appian and Zonaras.

Numerous allusions to and notices of the memorable slaughter at the lake of Trasimene are found in the later Roman writers, but they have preserved no additional circumstances of interest. The well-known story related by Livy, as well as by Pliny and later writers, that the fury of the combats rendered them unconscious of the shock of an earthquake, which occurred during the battle, is easily understood without any prodigy, such shocks being frequently very local and irregular phenomena. (Pis. ii. 84. a. 86, xv. 18. a. 20; Cie. de N. D. i. 3.

* The name of Oasseja, a village on the road from Cortona to the lake, has been supposed to be also connected with the slaughter of the battle, but this is very improbable. Oasseja is several miles distant from the lake, and on the other side of the hills. (Hobhouse, i. c.) It is probable moreover that the modern name is only a corruption of Oasseja or Oseraia. (Niebuhr, Lectures, vol. ii. p. 102.)
TRAEUSI.  

de Die. ii. 8; Entrop. iii. 9; Flor. ii. 6 § 13; Orat. iv. 15; Val. Max. i. 6 § 6; Sil. Ital. i. 49, v. 1, Æc.; Ovid. Fast. vii. 770; Strab. v. p. 226.

The lake is now commonly known as the Lago di Pergusa, though frequently called on maps and in guide-books the Lago Trasimeno. [E. H. B.]

TRAUSI (Trapeu), Herod. vi. 3, 4; Trausii, Liv. xxxviii. 41), a Thracian people, who, appear, in later times at least, to have occupied the SE. ophoots of Mount Rhodope, to the W. of the Hebrus, and about Tempea. Herodotus tells us that the Trausit entertained peculiar notions respecting human life, which were marked in their tombs. When a child was born, his kinsfolk, sitting around him, bewailed his lot in having to encounter the miseries of mortal existence; whereas when any one died, they buried him with mirth and rejoicing, declaring him to have been freed from great evils, and to be now in perfect bliss. As the Trausans spoken of by Livy, see Tempea.

Suidas and Hesychius (s. v.) mention a Scythian tribe called the Trausi, who, according to Steph. B. (s. v.), were the same people as the Agathyrai. The last-named author speaks of a Celtic race also, bearing this appellation. On this slight foundation, the locality of the tribe has been marked by the Thracian Taurisci, a tribe mentioned by Strabo (v. 178), where Strabo expressly says that he was unable to state what was the original abode of the Prausii: had he been writing about the Thracian Trausi we may safely assume that no such ignorance would have been acknowledged. Cf. U.K. 351, p. 21, 230. [J. R.]

1. RAVUS (Trausor, Herod. vii. 109), a small river in the S. of Thrace, which falls into the Iapirou Boreas, a shallow estuary penetrating far into the land, NE. of Aderia. The Travus is the principal outlet for the drainage of that part of southern Thrace which is included between the Neustus and the Aeolic-Boeotian coast (s. v. Apennines).

TREBIA, or TREBIA. 1. (Ehth. Trebius, ait. Tresi), a municipal town of Umbria, situated at the western foot of the Apennines, between Fulginiun and the sources of the Clitumnus, about 4 miles from the latter. It is mentioned by Pliny among the municipal cities of Umbria, and its name is found in an inscription amongst the xy Populi Umbriae: in both of these authorities the name of the people is written Trebienses. The Jerusalem itinerary, which places it on the Via Flaminia, 4 miles from Sacaria (at the sources of the Clitumnus) and 5 from Fulginiun, writes the name Trevis, thus approximating closely to the modern name of Tresi. The modern town is still a considerable place standing on a hill elevation abruptly from the valley of the Clitumnus. [Plin. iii. 14, s. 19; Itala. Hier. p. 613; Orell. Inscr. 98.] 2. (Trepia), Ptol. Eth. Trebanus, Tresi, a city s Latium, in the upper valley of the Anaio, about 4 miles from the sources of that river and 10 above the sea level. It is mentioned both by Pliny and Pomponius, as placed amongst the xy Populi Umbriae; who calls it Tresi Aquinta. [Plin. iii. 5, s. 9; Ptol. iii. i. § 69; Fronto.]

* Melas has followed Herodotus very closely in the following passage (ii. 3): "Legatur apud genocad meperiscas, magus defentur: finera contra festa sunt, veluti sacras, cantu inasque celebratur."
TREBIA.

to the W., where the town of Casalidium was betrayed into his hands. Meanwhile Sempronius, who was newly arrived, after a short interval of suspense, was eager for a general engagement, and his confidence was increased by a partial success in a combat of cavalry, in the plain between the Trebia and the Padus (Liv. 69.) Hannibal, whom his side was equally desirous of a battle, took advantage of this disposition of Sempronius, and succeeded in drawing him out. Scipio would not yield to the venture to attack him, into the plain below, which was favourable to the operations of the Carthaginian cavalry and elephants. For this purpose he sent forward a body of Numidian horse, who crossed the Trebia and approached the Roman camp, but, as soon as a body of Roman cavalry and light-armed troops were sent out against them, rushed skirmishing until they had crossed the river. Sempronius followed with his whole army, and crossed the Trebia, not without difficulty, for the river was swollen with late rains, and was only just fordable for the infantry. His troops suffered severely from cold and wet, and when the two armies met in order of battle, early began to feel the energy inferior to the enemy; but this was decided by a body of 1000 foot and 1000 horse, under the command of Mago, the brother of Hannibal, which had been placed by that general in ambuscade, in the hollow bed of a stream which crossed the field of battle, and by a sudden onset on the rear of the Roman army, threw it into complete confusion. A body of about 10,000 Roman infantry succeeded in forcing their way through the centre of the enemy's line, but finding themselves isolated, and their retreat to their camp quite cut off, they directed their march at once towards Placentii, and succeeded in reaching that city in safety. The other troops were thrown back in confusion upon the Trebia, and suffered very heavy loss in passing that river; but those who succeeded in crossing it, fell back upon the body already mentioned and made good their retreat with them to Placentia. Thither also Scipio on the following day repaired with that part of the Roman forces which had not been engaged in the battle. (P. 73.)

From the view above given of the battle and the operations that preceded it, which coincides with that of Sallust (La morte di Catone. d'Ammoni en Ammian. lib. xxxvi, cap. 130.), it seems certain that the battle itself was fought on the left bank of the Trebia, in the plain, but a short distance from the foot of the hills; while the Roman camp was on the right bank of the Trebia. It is certain that this view accords much the most intelligibly with the operations of the armies, and there is a name in the narrative of Polybius (which has been oddly followed in the above account) connected with it, though it must be admitted that some difficulties remain unexplained. Livy's narrative on the contrary is confused, and though based for the most part on that of Polybius, seems to be mixed up with that of other writers. (Liv. xxxvi. 22—24.) Scipio after the defeat of the Romans crossed the Padus and set out for Placentia, where he had stationed an army. (Liv. xxxvi. 24.)

TREBULA.

The battle on the Trebia is alluded to later and described by Silius Italicus:—

"And joined Scipio from Sena and not from Ariminum. Such arbitrary assumptions as these we reserve of discussing a question, the decision of which rests mainly, if not entirely, on the ancient Polybius." (Nieuwber's Lectures on Roman History. Book xvi. p. 94.)

"Hannibal, having crossed the Padus below Placentia, and his innumerable forces joined Scipio from Sena and not from Ariminum." (ibid. pp. 94—101.)

Cramer adopts the view of Genoa Vandoncourt. (Anct. Italy, vol. i. p. 82.)

TREIA.

..." (Plin. vi. 12. a. 17). Its site is clearly
Monte Leone, sometimes called Monte
l'Ass Sabina, a village about 2 miles on the
the Via Salaria, between Ostia Nova
and S. Lorenzo. Here there are considerable
ruins, including those of a theatre, of thermæ or
part of the ancient pavement. Several
inscriptions have been discovered, some of
the name of the people, "Plebs Treba-
" Trebulanìi Tusciaci," and "Trebulanìi
o that no doubt can remain of its attribu-
Chaupy, Magasin d'Histoire, vol. iii. pp. 93—
11. Inscr. 923, 3443, 3963.) As this seems
been much the most considerable place of
, it is probably that meant by Strabo, as a
Trebusa without any distinctive adjunct
on connexion with Eretum (Strab. v. p. 228).
ber Colonarius also mentions a "Tribule,
ium" (p. 258) which is probably the same
Martialis also alludes to Trebusa as situated
and dell' Abie, Rome, p. 190.) Certain
of the two places he here refers to.
Chaupy, Mom. della Sabina, vol. i. p. 190.)
obably that the Tribula (Tricola) of Dionsy-
mentioned by him among the places assigned
to the Abingua, Dionys. i. 14) may be
with the Trebusa Sufennas of Pliny. In
we know that it could not be far

[ E. H. B.]

IIA (Eia. Treienas; Ru. near Treia,) a mu-
town of Picenum, situated on the left bank of
the river Potentia, about 9 miles below Septempeda
villages on the Apennine, as the
the archographer that mentions it; but it is probable
the Tricola of Poleni is only a corruption
me. (Plin. iii. 13. a. 18; Ptol. iii. 1. § 52.) The
are enumerated by Pliny among the
communities of Picenum, and the municipal
of the town is further attested by several in-
ons. (Dell. Inscr. 516, 3899.) It seems in-
to have been a considerable place. The Isi-
or Antoninus places it on the branch of the
Nmania which led direct to Ancona: it was
from Septempeda and 18 from Anxium. (Ant.
p. 312.) Cluverius says that he could
trace either of the place or the name; but
ins are pointed out by Holstein as still
on the left bank of the Potentia, at the
of the hill occupied by the village of Montecchio.
latter place has since adopted the ancient name
Eia, and having been augmented by the popu-
several neighbouring villages, is now be-
a considerable town. (Cluver. Ital. p. 738; 
ten. Not. ad Chae. p. 136.)

[ E. H. B.]

TRIEMIUS I158. [DOMITIUS AURELIUS] BEMITHUS (Triumviro, Steph. B. e. e.; 
Trei-
iov, Ptol. v. 14. § 6; Triumvori, Constant. de
i. 15, p. 39, ed. Born; Triumvoriis, Hieroc.
07. Ed. Tumovodoris, Tumovodantli,) a
town in the interior of Cyprus, was the seat of a
bishops' see and a place of some importance in the By-
santine times. According to the Pujinger Table it
was 18 miles from Salamis, 24 from Citium, and 24
from Tamasus. Stephania B. calls it a village
of Cyprus, and derives its name from the terebinth
trees (terebintos) which grew in its neighbourhood.
(Engel, Korros, vol. i. p. 329.)

TREMULA, a town in Mauretania Tingitana. (Itin. Ant. p. 24.) Variously identified with
Essaouen and Sos de Campo. [T. H. D.]

TREPONTIUM or TRIPUNTUM, a place on the
Appian Way near the entrance of the Pontine
Marshes, 4 miles nearer Rome than Forum Appii.
It is not mentioned as a station in the Itineraries,
but we learn from an inscription of the time of
Trajan that it was from thence the part of the road
which was restored by that emperor began.
This important work, as we are informed by another
inscription, was continued for nineteen miles,
a circumstance that explains the origin of the name
Decennovium, which occurs at a later period in
connection with the Pontine Marshes, and which
calls the Decennovium a river; but it is evident
that it was in reality an artificial cut or canal, such
as must always have accompanied the highroad
through these marshes, and as we know already
existed in the days of Herone from Forum Appii.
The importance of this work will account for the
circumstance that we find the Pontine Marshes, as
themselves called by Cassiodorus "Decennovium Pa-
ludes." (Cassiod. Var. ii. 32, 33; Procopop. B. G. i.
11.) The site of Trepontium is clearly marked at
the distance of 39 miles from Rome, by the name
of Torre di Treponti, together with the remains of
the 3 ancient bridges, from which it derives its name
(Trebusa, Magasin d'Histoire, vol. iii. pp. 887—888;
D'Anville, Analyses de l'Italie, pp. 184—187.)

The inscriptions above cited are given by Sir
R. Hoare, Class. Tour, vol. i. pp. 97, 98; and
by the Abod Chaupy (l. c.). The name of Tra-
and, found in Strabo (v. p. 237) among the
the left of the Appian Way, can hardly be other
than a corruption of Trepontum, but it is wholly
out of place in that situation, and is most likely
by Kramer to be an interpolation. [E. H. B.]

TRESES (Treses), a people repeatedly men-
tioned by Strabo, generally as a tribe of, or at
least, as closely connected with, the Cimmerii, but
in a few passages as Thracians. They are not named
by Homer or Herodotus. Strabo was evidently
decided whether to regard them as a distinct race, or
as identical with the Cimmerii, in whose company
they several times made destructive inroads into
Asia Minor. The Cimmerii, whom they name
Treses also, or some tribe of them, often overran
the southern shores of the Euxine and the adjoining
countries, sometimes throwing themselves upon
the Paphlogoniai, at other times upon the Phrygiai,
the time when they say Mida was slain, drinking
bull's blood. And Lygdamis led his army as far
as Lydia and Ionia, and took Sardes, but perished
in Cilicia. And the Cimmeri and Treses often
made such expeditions. But they say that the
Treses and Cossus [their leader] were at last
driven out [of Asia] by Madya, the king of the
Scythiani." (Strab. i. p. 61.) Cæcilienses states

* The reading in the text is "καὶ Ἀρδας τῶν Ἐρνίμων Βασιλέως;" but as just before we
end Μάδσος τοῦ Σάινδοκού, we can have no hesita-
that Sardes was taken several times; first by the
Cimmerians; then by the Treves and Lydians, as
Callinus also shows; lastly in the time of Cyrus and
Croesus.” (Id. xiii. p. 637.) “In olden times, it
belonged to the Magnesians [the people of Magnesia on the
Meander] to be utterly destroyed by the Treves,
Aeolian tribe.” (Id. xiv. p. 647; see also xi.
p. 511, xii. p. 575; Callimachus, Vol. I. p. 623, seq.;
Müller, Hist. Lat. Antiq. Greece, pp. 108, 109; and
cf. Herod. i. 6, 15, 16, 18, 103.)

Various attempts have been made to fix the dates of
these events; but the means of doing so appear to be
wanting, and hence scholars have arrived at
very different conclusions on the subject. Strabo
infers from some expressions of Callinus that the
destruction of Sardes preceded that of Magnesia,
which latter occurred, he considers, after the time
of that poet, and during the age of Archilochus,
who alludes to it.

Thucydides (ii. 98) states that the kingdom of
Sitalces was bounded on the side next to the Triballia
by the Treves and Tilatazi, who dwelt on the northern
slope of Mount Scombraeus (Scornus), and extended
towards the W. as far as the river Oceus (Oescus).
Whether this relative clause applies to the Treves
as well as to the Tilatazi is doubtful; but the colo-
nymen of the words seems to confine it to the
latter.

Strabo (i. p. 59) speaks of the Treves as dwelling
with the Thracians; and says that the Treves, who
were Thracians, possessed a part of the Thracian
after the time of Ptolemaic (xiii. p. 586).

Pilaq does not mention the Treves as a Thracian
people; but in the description of Macedon (iv. 10.
a. 10) states that they, with the Dardani and Piri,
dwelt on its borders; it is not clear, however, what
borders are meant. (Cf. Theopom. Frag. 313,
where they are called Τηθρικο; and Steph. B. p. 664,
where also a district of Thrace inhabited by them is
named Τρακτ.)

It is possible that these Thracian Treves were the
descendants of a body of the Cimmerian Treves, left
N. of the Haemus when the main body advanced to
Asia Minor; for there can be little doubt that Nie-
bul's view respecting the course of their inroads is
true. “The general opinion, which is presupposed
in Herodotus also, that the Cimmerians invaded
Asia Minor from the E., along the coasts of the
Euxine. But it would seem that, on the contrary,
they came through Thrace, for they made their first
appearance in Lonia and Lydia. The former road is
almost entirely impassable for a nomadic people, as
the Caucasus extends to the very shores of the
Euxine.” (J. R. U. Hist. i. p. 32, note.)

In confirmation of the conjecture above made, we
may refer to the parallel case mentioned by Caesar
(E. G. ii. 29), that the Austrians, a Belgian tribe,
were the descendants of the 6000 men whom the
Cimbri and Teutons, on their march towards Italy,
left behind them W. of the Rhine, to guard that part
of their property which they were unable to take with
them any farther. [J. R.]

TREBUS (Τρόμος, Strab.: Σασσο), a river of La-
tium, and one of the principal tributaries of the Liris
(Corinna), into which it discharges its waters
close to the ruins of Fabrateria. (Strab. v. p. 237.)
It is mentioned only by Strabo, but there is
no doubt of its identification: it is still called the
in adopting Kramer's emendation of Ιουκαιδιμος
for Ιουκαιδιμος.

TRETEUM. Tres Tabernae, the Three Trees, was a
market or relay for horses mentioned in the Jerusalem
Itin. between Vasates and Elusa (Euseb.). Its
site is unknown. [G. L.]

TRE TABERNAE, was the name of a station on
the Via Appia, between Arcia and Forum Appii,
which is noticed not only in the Itineraries (Ita.
Ant. p. 107; Tab. Pess.), but by Cicerio and
Suetonius as Apsus. From the former we learn that a branch road from Antium joined to
Appian Way at this point (Cic. ad Att. ii. 12):
while in the latter it is mentioned as the place
where many of the disciples met St. Paul on his
tour to Rome. (Acts, xxvii. 15.) It was
probably therefore a village or place of some impor-
tance from the traffic on the Appian Way. Its
name, as we have seen, is identical with the
Antonine Itinerary, which gives 17 miles from
Arcia to Tres Tabernae, and 10 from thence to
Forum Appii: and it is a strong confirmation of
the accuracy of these data that the distance thus
obtained from Forum Appii to Rome corresponds
exactly with the true distance of that place, as
marked by ruins and ancient milestones. It is
therefore wholly unnecessary to change the distance in
the Itinerary, as proposed by D'Anville and
Chaupy, and we may safely fix Tres Tabernae at
a spot about 3 miles from the modern Cisternas
on the road to Terracine, and very near the
commencement of the Pontine Marshes. The Apsus
Chaupy himself points out the existence of ancient
remains on this spot, which he supposed to be those of
the station Ad Sponsas mentioned only in the
Jerusalem Itinerary. It is far more probable
that they are those of Tres Tabernae; if indeed the
two stations be not identical, which is very probable.
This situation would also certainly accord better
than that proposed by Chaupy with the mention of
Tres Tabernae in the Jerusalem this joined to the
Appian Way on his road from Antium to his
Forum, not to Rome. (Cic. ad Att. ii. 13, 14; Chaupy,
Maison d'Hôpital, vol. iii. p. 333; D'Anville,
Anales de l'Italie, p. 195; Westphal, Rome,
Campania, p. 69.) [E. H. B.]

TRE TABERNAE, in Gaul. [Tabernae.]

TRED (Τρέδ, Strab. xiv. p. 683), in Cyprus,
called Τρέδος, in the Sandoukwn or Μανικ Μαντις
(= 285, ed. Hoffmann), where it is placed 50 stades
from Palaepaphos or old Paphos, was apparently a
promontory in the SW. of the island, and probably
the same as the one called Φασιον by Pliny (v.
14 § 2).

TRETEUM (Τροτεμος, Ptol. iv. 3 § 3).
It seems impossible to determine whether Caesar includes the Treveri among the Belgae or the Celtae. Some geographers include them in the Gallia of Caesar in the limited sense, that is, in the country of the Celtae, which lay between the Garamus and the Seine, and between the Ocean and the Rhine. If this determination is correct, the Mediomaticri also of course belong to Caesar's Gallia in the limited sense.

[Mediomaticri]

The Treveri are often mentioned by Caesar, for they had a strong body of cavalry and infantry, and often gave him trouble. From one passage (B. G. vi. 32) it appears that the Segni and Condurii, German settlers in Gallia, were between the Treveri and the Eburones; and the Condurii and Eburones were dependents of the Treveri (B. G. iv. 6). Caesar constructed his bridges over the Rhine in the territory of the Treveri (B. G. vi. 9); and Strabo speaks of a bridge over the Rhine in the territory of the Treveri. It appears then that the Treveri occupied a large tract of country between the Mosel (Mosae) and the Rhine, which country was intersected by the lower course of the Mosella (Mosel), for Augusta Trevirorum (Trier), on the Mosella, was the chief town of the Treveri in the Roman period and perhaps also probably a town of the Treveri in Caesar's time. It is not possible to fix the exact limits of the Treveri on the Rhine, either to the north or the south. When the Germans were settled on the west side of the Rhine by Agrippa and after his time, the Treveri lost part of their territory; and some modern writers maintain that they lost all their country on the Rhine, a conclusion derived from a passage of Pliny (iv. c. 17), but a conclusion by no means certain. Another passage of Pliny, cited by Suevus (Calig. c. 8), says that Caligula was born "in Treveria, vico Ambistatino, supra Confluentera," and this passage places the Treveri on the Rhine. Poetemey in his geography gives the Treveri no place on the Rhine: he accounts for the west bank of the river to the Germans Inferior and Germania Superior. The hospicium of Trier used to extend from the Mosel to the Rhine, and along the Rhine from the Ahr below Andernach as far south as Bingen. The limits of the old country of the Treveri and of the 'u-cese may have been the same, for we find many examples of this coincidence in the geography of Gallia. The rugged valley of the Ahr would be a natural boundary of the Treveri on the north.

Tacitus gives the Treveri the name of Sodic (Amm. i. 63); and in his time, and probably before, they had what the Romans called a Curia or senate. The name of the Treveri often appears in the history of the war with Civilia (Tact. Hist. iv.). The Treveri under the Empire were in that part of Gallia which was named Belgica, and their city Augusta Treverorum was the chief place, and under the later emperors frequently an imperial residence. [Augusta Trevirorum]

TREVIDON, a place in Gallia, mentioned by Suidas Apollinaris (Prolog., p. 127) as a place in the territory of the Treveri (Gallatia (Vol. I. p. 331), (iv. p. 194) speaks of the Nervii as being a Germanic people. He says: "The Nervii are neighbours of the Treveri, and they (the Nervii) are also a Germanic nation which remark about the Nervii being also a German nation is partly determined by the fact the post fixing Trevidon in the mountainous region of Central France, and partly by the existence of a place named Treves on the boundary of the old province of Rouergue, and on a little river named Trevesat. The mountain in which the Trevesel rises (Lesperos) is the "Vicenum nimis ben! jugum Rateria" of Sidonius. [Ruteni]
TREVIRI

TREVIRI. [TREVIRI]

TRIACONTASCHOENUS (Τριακόντασχοινος, Ptol. iv. 7. § 32), a district so named by Ptolemy after the analogy of the Dodecanasochoen of Egypt, and forming the most northern part of Aethiopia on the W. side of the Nile, between the cataracts of that river and the Aethiopian mountains. [T. H. D.]

TRADITZA (Τραδιτζα), Nitz. Chron. iii. p. 914; Arch. Gr. 1319, a town in Upper Masia, at the confines of the sources of the Oscura, and the capital of the district called in late times Dacia Interior. It was situated in a fertile plain, and its site is identified with that of some extensive ruins S. of Sothan. [J. R.]

TRIBALLI (Τριβάλλοι), a Thracian people which seems to have been formerly settled in a very wideness district and powerful race, about the Danube, but which, being pressed upon from the N. and W. by various nations, became gradually more and more emigrated, and at length entirely disappeared from history. Herodotus speaks of the Tribalic plain, which is said by the river Arora, which fell into the Brunnus, a tributary of the Ister (v. 49). This probably the plain of Kossove in the modern Servia.

Treybidas states (ii. 96) that on the side of the Thraci, who were independent at the beginning of the Pannonian war, the territories of Silesus were bounded by the river Tisza and Tilistae, whose W. limit was the river Oscura (Oscusa), which must therefore at that time, have been the E. frontier of the Thraci. (Cf. Plin. iii. 29, iv. 17; Strab. vii. p. 317. 318.) Strabo (vi. p. 305) informs us that "the Thraci were much exposed to the invasions of the barbarous tribes driven out of their own countries by the powerful neighbours, some expelled by the Sciti, Sarmatiae, and Sarmatiae, the Perugii and others from the W., and in motion by the Scythians." The earliest event recorded of them is the defeat (v. 10) they gave to Sileasus, king of the Olympos, who made an expedition against them, a. c. 424, in which he lost his life (Thuc. i. 16). In a. c. 376 B.C., the Thraci crossed the Hellespont, and with 30,000 men defeated the army of Abderia, which met them without opposition. On their way, however, massaemia, the people of Abderia lost more than a third of their cattle and horses, who were killed upon the spot. The Thraci massacred the horses and burned the town of Abderia, which they permitted without resistance. On their way, however, massaemia, the people of Abderia lost more than a third of their cattle and horses, who were killed upon the spot. The Thraci massacred the horses and burned the town of Abderia, which they permitted without resistance. The Thraci then proceeded to the town of Abdacrym, in the midst of which they were attacked by their inhabitants. A great part of the population was slain, and the remainder were made slaves to the Thraci. The Thraci then proceeded to the town of Abdacrym, in the midst of which they were attacked by their inhabitants. A great part of the population was slain, and the remainder were made slaves to the Thraci. The Thraci then proceeded to the town of Abdacrym, in the midst of which they were attacked by their inhabitants. A great part of the population was slain, and the remainder were made slaves to the Thraci. The Thraci then proceeded to the town of Abdacrym, in the midst of which they were attacked by their inhabitants. A great part of the population was slain, and the remainder were made slaves to the Thraci. The Thraci then proceeded to the town of Abdacrym, in the midst of which they were attacked by their inhabitants. A great part of the population was slain, and the remainder were made slaves to the Thraci. The Thraci then proceeded to the town of Abdacrym, in the midst of which they were attacked by their inhabitants. A great part of the population was slain, and the remainder were made slaves to the Thraci. The Thraci then proceeded to the town of Abdacrym, in the midst of which they were attacked by their inhabitants. A great part of the population was slain, and the remainder were made slaves to the Thraci. The Thraci then proceeded to the town of Abdacrym, in the midst of which they were attacked by their inhabitants. A great part of the population was slain, and the remainder were made slaves to the Thraci. The Thraci then proceeded to the town of Abdacrym, in the midst of which they were attacked by their inhabitants. A great part of the population was slain, and the remainder were made slaves to the Thraci.

TRIBOCI or TRIBOCCI, a German people.

Galba Schneider (Casar. B. G. ii. 31) says...

"Trieboci" in the accursative plural. They are mentioned by Tac., Strabo, and Strabo (i. 4. 2), under the name of Talius (Casar. B. G. iv. 16). In the MSS. have "Tribocci" (Schneider).

The Treboi were in the army of the Germanic Ariovistus in the great battle in which he defeated him; and though Caesar says...
TRIBOLA.

they were Germans, his narrative shows that he considered them to be Germans. In another passage (B. G. iv. 10) Caesar places the Triboci on the Rhine between the Mediomatrici and the Treviri, and he means to place them on the left or Gallic side of the Rhine. Strabo (iv. p. 193), after mentioning the Sequani and Mediomatrici as extending to the Rhine, states that the Allobroges, a people who have settled, the Triboci, who have passed over from their native land." Pliny also (iv. 17) and Tacitus (German. c. 28) say that the Triboci are Germans. The true conclusion from Caesar is that he supposed the Triboci to be settled in Gallia before n. c. 58.

Polieus (ii. 9 § 17) places the Triboci in Upper Germania, but he incorrectly places the Vangiones between the Nemetes and the Triboci, for the Nemetes bordered on the Triboci. However he places the Triboci next to the Raurei, and he names Brenconagius (Brenconagus) and Elacio (Heleobus) as the two towns of the Triboci. D’Anville supposes that the territory of the Triboci corresponded to the diocese of Strauburg. Saletto (Seltz or Seta), we may suppose, belonged to the Nemetes, as in modern times it belonged to the diocese of Speyer; and it is near the northern limits of the diocese of Strauburg. On the south towards the Raurei, a place named Markelsheim, on the southern limit of the diocese of Strauburg and bordering on that of Basle, indicates a boundary by a Teutonic name in Valeria, as Pons does in those parts of Gallia where the Roman tongue prevailed. The name of the Triboci does not appear in the Notitia. Provence, though the names of the Nemetes and Vangiones are there; but instead of the Triboci we have Civitas Argentoratum (Strasbourg), the chief place of the Triboci. Polieus makes Argentoratum a city of the Vangiones. [G. L.]

TRIBOLA (Torbekl, App. Hist. 62, 63), a town of Lusitania, in the mountainous regions S. of the Tagus, probably the modern Trevoeza. [T. H. D.]

TRIBULUM. [Triulium.]

TRIBUNCI, a place in Gallia, which we may assume to have been near Concordia, for Ammianus (xvi. 12), after speaking of the battles of Strauburg and Chezy, names the place of the Allobroges, which was defeated by Julian, says that the king hurried to his camp, which was near Concordia and Tribunici. But neither the site of Concordia nor of Tribunici is certain. [Concordia.]

G. L.

TRICARANUM. [Philib. p. 602, 2, 3.]

TRICASSES, a people of Gallia Lugudunensis. (Pline. iv. 18.) In Polieus (ii. 8 § 13) the name is Triscass (Triscisio), and their city is Augustobona (Augustobona). They border on the Parisii. The name appears in the form Triscassini in Ammianus (xvi. 1) and in an inscription. In the Notitia Provence the name Civitas Triscassia occurs; and the name of the people has been transferred to the town, which is marked on some of the old maps; as first in the French department of Aube. Caesar does not mention the Triscasses, and his silence has led to the conjecture that in his time they were considered within the powerful state of the Senones. [G. L.]

TRICASTINIs (Triacastel), a Gallic people between the Rhone and the Alp. Livy (v. 34) describing the march of Balbus and his Galli into Italy, says they came to the Tricastini; "The Alps next were opposed to them;" from which it is inferred that the Tricastini were near the Alps. But nothing exact can be inferred from the narrative, or from the rest of this confused chapter. In the description of Hannibal’s march (Liv. xxi. 34) it is said that Hannibal, after settling the disputes of the Allobroges, being now on his road to the Alps, did not make his march straight forward, but turned to the left into the territory of the Tricastini; and from the country of the Tricastini he went through the utmost part of the territory of the Vocontii into the country of the Trascantii and the Drusi (Drusine). It would be out of place to examine this question fully, for it would require some pages to discuss the passages in Livy. He means, however, to place the Trascantii somewhere between the Allobroges and part of the border of the Vocontian territory. The capital of the Vocontii is Des Voucortierum, or Des (Drome); and the conclusion is that the Trascantii were somewhere between the Isara (Isere) and the Druna (Drome). This agrees with the position of Augusta Tricastinorum (Augusta Tricartinorum) as determined by the Itinera.

Polieus (ii. 10 § 15) places the Triscastini east of the Segebanni, a town called Valeria, and he names the capital of the Triscastini a town Neomagus, which appears to be a different place from Augusta Tricastinorum. D’Anville places the Triscastini along the east bank of the Rhone, north of Arausio (Orange), a position which he fixes by his determination of Augusta Triacastinorum: and he adds, "that the name of the Triscastini has been preserved pure in that of Trieste, in the province of Istria, and that of Livy and Polieus are certainly not where D’Anville places them."

[G. L.]

TRICCA (Triaca; Eth. Triacii: Tribikla), an ancient city of Thessaly in the district Histiotisotis, stood upon the left bank of the Peneus, and near a small stream named Lethaeus. (Strab. i. p. 438, xiv. p. 647.) This city is said to have received its name from Trica, a daughter of Peneus. (Steph. B. s. v.) It is mentioned in Homer as subject to Poseidon and Machaon, the two sons of Asclepius or Asculepius, who led the Tricaeans to the Trojan War (Hom. II. ii. 729, iv. 202); and it possessed a temple of Asclepius, which was regarded as the most ancient and illustrious of all the temples of this god. (Strab. i. p. 437. The temple is sacred to Asklepios, is sick, whose cure was recorded there, as in the temples of Asclepius at Epidaurus and Cos. (Strab. viii. p. 374.) There were probably physicians attached to the temple; and Leake gives an inscription in four elegiac verses, to the memory of a "god-like physician named Cimber, by his wife Andromache," which he found upon a marble in the bridge over the ancient Lethaeus. (Northern Greece, vol. iv. p. 285.) In the edict published by Polyperchon and the other generals of Alexander, after the death of the latter, allowing the exiles from the different Greek cities to return to their homes, those of Trica and of the neighbouring town of Pharadon were exempted for some time. (On which no record.) (Diod. xviii. 56.) Trissos was the first town in Thessaly at which Philip V. arrived after his defeat on the Aous. (Liv. xxxii. 13.) Trissos is also mentioned by Liv. xxxvi. 13; Plin. iv. 8. a. 15; Pol. iii. 13. § 44; Them. Ort. xxvii. p. 533.

Procopius, who calls the town Tricauta (Triakatou), says that it was restored by Justinian (de Austriac. iv. 3); but it is still called Triacs (Triacs) (p. 642) in the sixth century, and the form in Justinian may be a corruption. In the twelfth century it already bears its modern name (Triakala, Anna Comm. v. p. 137, ed. Paris; Eustath. ad II. ii. p.
TRICCIANA

330.) Tríkhála is now one of the largest towns in this part of Greece. The castle occupies a hill projecting from the last falls of the mountain of Komáki; but the only traces of the ancient city which Leake could discover were some small remains of Hellenic masonry, forming part of the wall of the castle, and some squared blocks of stone of the same ages dispersed in different parts of the town. (Leake, *Northern Greece*, vol. i. p. 435, seq., vol. iv. p. 287.)

TRICCIÁNA, a place in Pannonis, in the valley called Carnia, (L. Ant. p. 267.) It is probably the same as the Gurríana noticed in the Pani. and in the statements about the distances amounts only to 2 miles. [L. S.]

TRICESIMAE, in Gallia, one of the places mentioned by Ammianus Marcellinus (xviii. 2) in the list of those places along the Rhénus frontier which Julian repaired. Ammianus mentions Tricesimas between Quadriburgium and Noverium. [Quadriburgium.] [L. S.]

TRICESIMUM, AD, in Gallia. D'Anville observes that the ancient Itina contain many positions with similar names, which names of places are derived from the distances which they indicate from the principal towns; for the distances within the dependent territory were measured from the principal towns. This Tricesimus is measured from Noveria Great summi (Noverna), as the Jerusalem Itina shows, on the road to Toulowes, through Carcastonum. Trebes on the canal of Languedoc may represent the name; and Tricesimus may be near that place. [G. L.]

TRICHIÓNIS LACUS. [Aetolia, p. 64, a.]

TRICHIÓNUM (Trikóhón: Edi. Trikóhón), a town of Aetolias, from which the lake Trichiónis derived its name. It is mentioned by Strabo (v. 64, a.) Its position is uncertain. Leake places it S. of the lake at a place called Garalos, and Kiepert, in his map E. of the lake. But since Strabo mentions it along with Stratus as situated in a fertile plain, it ought probably to be placed N. of the lake (Strab. x. p. 450; Pol. v. 7; Steph. B. s. c.). It was evidently a place of importance, and several natives of this town are named in history. (Pol. iv. 8, v. 13, xvii. 10; Pana. ii. 37. § 8; Leake, *Northern Greece*, vol. i. p. 155.)

TRICESINÓ. [Megalopolis, p. 309.]

TRICOEMIA (Trióhémía), a place in the eastern part of Phrygia, on the road from Dorylaum to Apamea Ciboua (Pol. v. 2. § 22; Tab. Pers.). It is placed by the Table at a distance of 28 miles from Midasem and 21 from Pesanias. [L. S.]

TRICOÉRI (Trióhere), a people between the Rhone and the Alps. Hannibal in his march from the Rhone to the Alps passed into the country of the Tricorei, as Livy says (Trićartonii). Strabo (iv. pp. 185, 202) says in one passage that above the Cénétovii and Trioceri and Iconii and Meduli, from which he learned that he considered the Trioceri as neighbours of the Vountii; and in another passage he says, "after the Vountii are the Iconii and Tricorei, and next to them the Meduli, who occupy the highest summits of the Alps." Some geographers conclude that the Trioceri must be on the Drac; a branch of the Drac, in the southern part of the district of Gwodraek. But if the Trioceri were in the valley of the Drac, we do not otherwise admit that Hannibal's march to the Alps was through that valley. [G. L.]

TRICORNÉNSII. [Triecorum.]

TRICORNÉNIUM (Trióhóneios, Pol. iii. 9. § 3), or TRICONEMÁ CAESTRA (Itala, Hieros, p. 564), a town in the territory of the Triconernenses, a people of Upper Moesia, on the borders of Illyria. Variously identified with Réköp and Triconemai or Kulem- bai. [T. H. D.]

TRICYRTODUS [MARATHOX.]

TRICRANA (Triókhrana), an island off the coast of Hermonius in Argolis (Pana. ii. 34. § 8), perhaps the same as the Tiperneos of Pliny. [T. P.]

TRICE'NA. [Phereusu, p. 595. a.]

TRIDENTINI (Tríteraínni), an Alpine tribe occupying the southern part of Euxusis, in the neighborhood of the river Arboeae. (Strab. x. p. 204; Plin. iii. 23.) They are said to be of another origin than other Alpine tribes, were subdued in the reign of Agrippus. [L. S.]

TRIDENTUM or TRIDENTE (Tríteraínni: Trezi or Trezi), the capital of the Tridentini in the district of Euxusis, on the eastern bank of the Atheneus, on the highroad from Verona to Velitii. (Strab. x. 23; Justin, xx. 9; L. Ant. pp. 275, 261; Pol. Diaconar. i. 2, iii. 9, iv. 42, v. 36; Flor. iii. 3; Pol. iii. 1. § 31; Tab. Pers.) The town is said to have derived it's name from the Great Neptune, which is still shown fixed in the wall of the ancient church of S. Vigilio. The place seems to have been made a Roman colony (Orelli, Inscrp. Nos. 2183, 374; Flor. iii. 368, 492; Theodor. s. a. 816). The Tridentini are measured from Marc. Great summi (Novernas), as the Jerusalem Itina shows, with a wall, of which the lower portion still exists. (Comp. Pallad. Possid. de Res. Heotarum von Verona nach Augsburg, p. 28, foll.; Benedetto Giovannielli, Discorsi sopra le Incisioni Trentine, Trento, 1824, and by the same author, Trento, Città de' Rege e Ue lasta Romana, Trento, 1825.)

TRIVIO, in Verona, on Poliv. v. 68; Strabo, 754), a small fortified place in Phoenix, on the northern declivity of Lebanon, and about 12 miles distant from Tripolis. It is in all probability the same place as the Tridus of the Itin. Hierosol. (p. 583.). Lapic identifies it with Euny, others was Belmon. [T. H. D.]

TRIVIUM (Trítrum or Triram., Edin. Triram., Pol. iii. 3. § 13), a headland of the Regio Syrtica in Africa Propria. Ritter (Erdk. i. p. 928) identifies it with the promontory of Cephalus mentioned by Strabo (xvii. 836), the present Cape Cufalo or Masseria. Ptolemy indeed mentions this as a separate and adjoining promontory; but as Cufalo still exists three points, it is possible that the ancient name may be connected, and refer only to this one cape. (See Blaquere, Letters from the Mediterranean, i. p. 18; Della Cellia, Viaggio, p. 61.) [T. H. D.]

TRIFANUM. [Verscia.]

TRIGABOLI. [Paddu.]

TRIGIKAMUN, a town of Noricum, mentioned only in the Feating. Table, as situated not far from the mouth of the river Trigamus (Triaurus) which flows into the Danubius. It still bears the name of Trianun. (See Muchar, Noricum, vol. i. p. 269.)

TRIGLYPHON (Treglyphon and Treglyon. Pol. vii. 2. § 23), the metropolis and royal residence (Badia Nova) of Carthage, a district at the N.E. corner of the Barcis. Probably it is the present Teychonon, which is situated on the stream, (Comes), a small river which flows into the Braccio, and runs nearly northwards. [V.]

TRIGUNDUM, a place in the territory of the Callaci Lucenses, in Gallassia, (Hispania Tarraconensis). (Itala, Ant. p. 434.) Variously identified with Barreo and Armadon. [T. H. D.]
TRILEUCUM.

TRILEUCUM (Trileucum Eperon, Ptol. ii. 6. § 4), a promontory in the territory of the Callaici Lucenses, on the N. coast of Hispania Tarraconensis, known also by the name of Capus Eperon, (Marcian, p. 44.) Now Cape Ortegal. [T. H. D.]

TRIUM'BIUM (Trium Tabernum or Trium Tabernum, Ptol. iii. 10. § 10), a castle on the Danube, in Lower Moesia. (Itin. Ant. p. 222; called Triumnum in the Tobi. Pest. and by the Geogr. Rav. iv. 7.) Variously identified with Murwint, Dikadikum, and the ruins near Pirgo or Burgo. [T. H. D.]

TRIMENOTYRA. [Temenothyra.]

COIN OF TRIMENOTYRA.

TRIMONTUM (Trimontium, Ptol. ii. 3. § 8), a town of the Selgovae, in Britannia Barba, probably near Longholm, in the neighbourhood of the Solway Frith. [T. H. D.]

TRYMYTHUS. [Tremithus.]

TRINAC'IA. [Tyracia.]

TRINAC'RUM [570.] [Tyras, von. 3, 22. § 3; Tyrrheus, Ptol. iii. 16. § 9, a town or rather fortress of Laconia, situated upon a promontory near the head of the Laconian gulf, and 30 stadia above Gythium. It is opposite to three small rocks, which gave their name to the place. The modern village is for the same reason still called Trinia (và Tri'nia). There are considerable walls. The place was built in a semi-circular form, and was not more than 400 or 500 yards in circumference. (Leake, Morea, vol. i. p. 232; Boblay, Recherches, fe. p. 94; Ross, Wanderungen in Griecheland, vol. ii. p. 239; Curtius, Peloponnese, vol. ii. p. 287.] [E. H. B.]

TRINAC'IA. [Attica, p. 380, b.]

TRI'NIUS (Triomio), a considerable river of Samnium, which has its sources in the rugged mountain district between Agone and Castel di Sangro, and has a course of about 60 miles from thence to the Adriatic. During the lower part of its course it traverses the territory of the Frentani, and falls into the sea about 5 miles SE. of Historion (Il Vasto). The only ancient writer who mentions it is Pliny (iii. 12. § 17), who calls it "fiumen portumum hoc;" it is, indeed, the only river along this line of coast which might afford shelter even for small vessels. [E. H. B.]

TRILOBANTES (called by Ptolemy Tripartantes, ii. 3. § 22), a people on the E. coast of Britannia Romana, situated on the Fossae and the Fossan in Essex and the southern parts of Suffolk, whose capital was Camulodunum (Colchester). They revolted against the Romans in the reign of Nero. (Caes. B. G. v. 20; Tac. Ann. xiv. 31.) (T. H. D.]

TRINUR'RAM (Triurtrum, Ptol. iii. 11. § 11), a river of Gaul mentioned by Sidonius Apollinaris (Prop. ii. 10. § 19). It is called the Oltia (Lot), and is now named Troye. [G. L.]

TRI'O'CALA (Trpola: E thr. Tricollinum; Ru. near Calatabellotta), a city of Sicily, situated in the interior of the island, about 12 miles from Thermess Selinuntiae (Sclacce). As the name is cited by Stephannus of Byzantium (who writes the name Tri'kola) from Philiistus, it is probable that it was a Sicilian town or fortress as early at least as the time of the elder Dionysius; but no notice of it is now found in history until the second Servile War in Sicily in 105 B.C. On this occasion Trikola was selected, on account of its great natural strength and other advantages, by Tryphon, the leader of the insurgents, as his chief stronghold; he fortified the rocky summit on which it was situated, and was able to hold out there, as in an impregnable fortress, after his defeat in the field by L. Lucullus. (Diod. xxxvi. 7, 8.) The circumstances of its fall are not related to us, but Sisius Italicus alludes to it as having suffered severely from the effects of the war. ("Servii vastata Trikola bello," xiv. 270.) Cicero nowhere notices the name among the municipal towns of Sicily, but in one passage mentions the "Trikollinum ager" (Varr. x. 4); and the Trikollini again appear in Pliny's list of the municipal towns of Sicily. The name is also found in Ptolemy, but in a manner that gives little information as to its position. (Plin. iii. 8. s. 14; Ptol. iii. 4. § 14.) It was an episcopal see during the early part of the middle ages, and the site is identified by Fazello, who tells us that the ruins of the city were still visible in his time a short distance from Sciacca. A town of Saracen origin, situated on a lofty hill about 12 miles inland from Sciacca; and an old church on the site still preserved the ancient appellation. (Fazello, de Reb. Sic. x. 472; Clover, Sicul. p. 374.) [E. H. B.]

TRI'O PIUM (Tripirov Eperon: C. Ciro), the promontory at the eastern extremity of the peninsula of Cnidos, forming at the same time the southeastern extremity of Asia Minor. (Thucyd. viii. 35, 60; Syllax, p. 38; Pomp. Melas, l. 16.) On the summit of this promontory a temple of Apollo, hence called the Triopian, seems to have stood, near which games were celebrated, whence Syllax calls the promontory the 

TRIPHIL'IA. [Elos.]

TRIPODISCUS (Tripodiceus, Thuc. iv. 70; Tripodiceus, Paus. i. 43. § 8; Tripodiceus, Tripodiceus, Strab. i. p. 394; Tripodiceus, Hereq. ap. Steph. B. a. v. Tripodiceus; Et. Tripodiceus, Steph. B.; Tripodiceus, an ancient town of Megara, said to have been one of the five hamlets into which the Megarid was originally divided. (Plut. Quast. Graec. c. 17.) Strabo relates that, according to some critics, Tripodi was mentioned by Homer, along with Aegirus as a dominion of Ajax of Salamis, and that the verse containing these names was omitted by the Athenians, who substituted for it another to prove that Salamin in the time of the Trojan War, belonged to Athens. (Strab. l. c.) Tripodiscus is celebrated in the history of literature as the birthplace of the first convert from Mithraism to Christianity, as is the case with Tripolis, which is also called Attica, and to have removed from this place to the Attic Icaria. (Apoll. ad Aristot. Eth. Nic. i. 42; Dict. of Biogr. Vol. iii. p. 948.) We learn from Thucydides (l. c.) that Tripodiscus was situ-
TRIPOLIS.

at the foot of Mount Geraneia, at a spot convenient for the junction of troops marching from Plataea in the one direction, and from the Isthmus in the other. Pananesia (l.c.) also describes it as lying at the foot of Geraneia on the road from Delphi to Argos. This author relates that it derived its name from a tripod, which Conon the Argive brought from Delphi, with the injunction that wherever the tripod fell to the ground he was to reside there and build a temple to Apollo. (Comp. Conon, Narrat. 19.) Leake noticed the vestiges of an ancient town at the foot of Mt. Geraneia, on the road from Plataea to the Isthmus, four or five miles to the N.W. of Megara. (Leake, North- ern Greece, vol. ii. p. 410.)

TRIPOLIS (Tripolis, Ptol. v. 15, § 4; Ekh. T’ropolii: Adj. Tripoliticos, Plin. xiv. 7, s. 9), an important maritime town of Phocienia, situated on the N. side of the promontory of Theoproposon. (Strab. xvi. p. 754.) The site of Tripolis has been already described, and it has been mentioned that its name derives from the city, from its being the metropolis of the three confederate towns of Phoci, Sterea, and Areus (Paus. Mucia, Vol. ii. p. 606). Each of those cities had here its peculiar quarter, separated from the rest by a wall. Tripolis possessed a good harbour, and, like the rest of the Phociene towns, had a large maritime commerce. (Cf. Joanna Phocas, c. 4; Wesseling, ad Hist. Ant. p. 148.) Respecting the modern Tripoli (Tripolisi or Tripoli di Soria); see Pa- cocke, vol. i. p. 146, seq.; Maundrell, p. 26; Burkhardt, p. 163, seq., &c.; cf. Seylack, p. 42; Mels, i. 13; Plin. v. 80. a. 17; Didot. xvi. 41; Steph. B. s. v.; Eckhel, vol. iii. p. 372.) [T. H. D.]

CODES OF TRIPOLIS IN PHOCENIA.

TRIPOLIS (Tripolias: Eth. Tropolantys). 1. A town of Phocien, on the northern bank of the upper course of the Messander, and on the road leading from Sardes by Philadelphia to Laodiceia. (It. Ant. p. 336; Tab. Pict.) It was situated 12 miles to the north-west of Hierapolis, and is not mentioned by any writer before the time of Pliny (v. 30), who treats it as a Lydian town, and says that it was under the government of Messander. Polemy (v. 2. § 18) and Stephanus B. describe it as a Lydian town, and the latter (s. v.) adds that in his time it was called Nepolias. Hierocles (p. 669) likewise calls it a Lydian town. Ruins of it still exist near Yeniçi or Kasak Yeniçi. (Arnold, Seven Churches, p. 245; Hamilton, Researches, i. p. 585; Fellow, Ion Minor, p. 267.)

2. A fort castrum in Pontus Polemoniacus, on a river of the same name, and with a tolerably good harbour. It was situated at a distance of 90 stadia from Cape Zeëlyrum. (Arrian, Peripl. P. E. p. 17; Anon. Peripl. P. E. p. 13; Plin. vi. 4.) The place is now named Tigni, and is situated on a rocky headland. (Hamilton, Researches, i. p. 257.)

[LS.]

TRIPOLIS (Tripolis). 1. A district in Arcadia. [Vol. i. p. 193, No. 12.]

2. A district in Laconia. [Vol. ii. p. 113, b.]

3. A district of Perieia in Thessaly, containing the towns Anthylla, Pythium, and Doliche. (Liv. xx. 53.) [Azorius.]

TRIPOLITÁNA REGIO. [SYRTICA.]

TRIOPTÓN, a town of Britannia Romana, apparently in the territory of the Coritani. (Itm. Ant. p. 477.) Variously identified with Liburna, Calchore, and Rugby. [T. H. D.]

TRÍPOLITÁNAS (Tripolitanae, Pl. v. 33, b. p. 33, s. 33). TRÍSANTON (Tripontis, Pl. v. 33, b. p. 33, s. 33), a river on the S. coast of Britannia Romana; according to Camden (p. 137) the river Test, which runs into Southampton Water; according to others the river Arun. [T. H. D.]

TRITAEA. 1. (Tripala: Eth. Tropias; Ἐρειδ. i. 145, Ἐρείδας is the name of the people; a town in Aias, and the most inland of the 12 Athenian cities, was distant 120 stadia from Phocis. It was one of the four cities, which took the lead in reviving the Achaean League in b. c. 280. In the Social War (b. c. 220, seq.) it suffered from the attacks of the Aetolians and Eleans. Its territory was annexed to Patrae by Augustus, when he made the latter city a colony after the battle of Actium. Its site is probably represented by the remains at Kastranias, on the borders of the territory of the Locri Ozolae, near the frontier of Aetolia. (Ittm. i. 145; Pl. iv. 41, iv. 6, 59, 60; Strab. v. 386; Paus. vii. 22, § 6, seq.; Steph. B. s. v.; Leake, Morea, vol. ii. p. 117.)

2. (Tritae, Plin. iv. 33, 4: Eth. Tropyles, Ἐρεις viii. 33), one of the towns of Phocias, burnt by Xerxes, of which the position is uncertain. (Leake, Northern Greece, vol. i. p. 89.)

3. (Tripolos, Steph. B. s. v.: Eth. Tropolias, Thuc. iii. 101), a town of the Locri Ozolae, described by Stephanus B. as lying between Phoïs and the Locri Ozolae. Hence it is placed by Leake as being between Delphi and Amphissa, on the edge, perhaps, of the plain of Sidon. (Leake, Northern Greece, vol. ii. p. 218.)

TRITÍUM, a town of the Antirroges in Hesperia Tarraconensis, in the jurisdiction of Clunia. (Paus. iii. 3, 4; Itm. Ant. pp. 450, 454.) Very probably identified with Carceda, Rodilla, and a place near Monasterio. [T. H. D.]

TRITÍUM METALUM (Tripolium Metalum, Ptol. ii. 6, § 55), a town of the Berones, in Hispa-
ITON (Τιτών), a river of Boeotia. [Vol. I p. 413, a.]

TRIBUTITA. [Πρωτ.]

TRIVICUM (Τριβίκιον), a town of Samnium, in the country of the Hirpini, not far from the frontiers of Apulia. Its name is known to us only from Horace, who slept there (or at least at a villa in its immediate neighbourhood) on his well-known journey to Brundisium. (Hor. Sat. i. 5. 79.) It appears therefore that it was situated on the Via Appia, or the line of road which was maintained from Rome to Brundisium. But this was not the same which was followed in later times, and is given in the Itineraries under that name, a circumstance which has given rise to much confusion in the topography of this part of Italy. [Via Appia.] There can be no doubt that Trivicum occupied nearly, if not exactly, the same site with the modern Trivio; the appearance of having passed along the valley at the foot of the hill on which it was situated. It was here that stood the villa to which Horace alludes, and some remains of Roman buildings, as well as of the pavement of the ancient road, still visible in the time of Prattioli, served to mark the site more accurately. (Prattioli, Vit. Appia, iv. 10. p. 507; Emanuelli, vol. ii. p. 350.) It probably never was a municipal town, as its name is not mentioned by any of the geographers.

TRIUMPILI'NI, an Alpine people of Northern Italy, who are mentioned by Augustus in the inscription in which he records the final subjugation of the Alpine tribes (compare ii. 20. s. 23.). It appears from Pliny that the whole people was reduced to slavery and sold together with their lands. According to Cato they were of Euganean race, as well as their neighbours the Camuni, with whom they are repeatedly mentioned in common. (Plin. i.c.) Hence there is little doubt that they were the inhabitants of the region covered by the names of Trinovantes and Trisempis, the upper valley of the Mella, and separated only by an intervening ridge of mountains from the Cenomani, the land of the Camuni.

TROAS (Τροάς, Tros, Troja, or Δρακτνα), the territory ruled over by the ancient kings of Troy or Ilium, which retained its ancient and memorable name even at a time when the kingdom to which it had originally belonged had long ceased to exist. Homer himself nowhere describes the extent of Troas or its frontiers, and even leaves us in the dark as to how far the neighbouring allies of the Trojans, such as the Dardanians, who were governed by princes of their own, of the family of Priam, were true allies or subjects of the king of Ilium. In later times, Troas was a part of Mysia, comprising the coast district on the Aegean from Cape Lectum to the neighbourhood of Dardanus and Abydos on the Hellespont; while inland it extended about 8 geographical miles, that is, as far as Mount Ida, so as to embrace the south coast of Mysia opposite the island of Lesbos, together with the towns of Assos and Andromus. (Hom. II. xxiv. 544; Herod. vii. 42.) Strabo, from his well-known inclination to magnify the empire of Troy, describes it as extending from the Aeaeus to the Caicus, and his view is adopted by the Scholiast on Apollonius Rhodius (I. 1115). In its

...
proper and more limited sense, however, Tros was an
undubious plain, traversed by the terminal branches
of Ida running out in a north-western direction, and
by the Hymettus, Sopygus, Euphrates, Aegaeus, and
Thymymbus. This plain gradually rises towards
Mount Ida, and contained, at least in later times,
several flourishing towns. In the IIiad we hear in-
deed of several towns, and Achilles boasts (II. ix.
238) of having destroyed eleven in the territory
of Tros; but they can at best only have been very
small villages, or what we would call small towns.
The plain itself must have been far superior in strength
and population evident from the whole course of
events; it was protected by strong walls, and had
its acropolis. [ILLUM.]

The inhabitants of Tros, called Tros (Τρόος),
and by Roman prose-writers Troiani or Teneri,
were in all probability a Pelasgian race, and seem
have possessed of two branches, one of which,
the Trencri, had emigrated from Thrace, and become
amalgamated with the Phrygian or native popula-
tion of the country. Hence the Trojans are some-
times called Trencri and sometimes Phrygian.
(Heord. v. 129, vii. 43; Strab. i. p. 63, xiii. p. 604; Virg.
Aen. ii. 38, 345, iii. 259, 371, &c.) The poet of the
IIiad describes Tros as lying to the north of Athens
in inferior civilisation to his own countrymen;
but it is impossible to say whether in such cases
he describes the real state of things, or whe-
ther he does so only from a natural partiality for
his own countrymen.

According to the common legend, the kingdom of
Troy was originally founded at the capture and burning
of Ilion in a.c. 1184; but it is attested on pretty
good authority that a Trojan state survived the
catastrophe of its chief city, and that the kingdom
was finally destroyed by an invasion of Phrygians
who crossed over from Europe into Asia. (Xanthes,
Strab. xiv. p. 680, xlii. p. 572.) This fact is
indirectly confirmed by the testimony of Homer,
which makes Poseidon predict that the posterity of
Achilles should long continue to reign over the
Trojans after the race of Priam should be
extinct. [L. S.]

TROCHOEIDES LACUS. [DELOC, p. 759, b.
TROCHUS. [CICER]HEM, p. 568, a.]

TROCMADA (Τροκμάδα), a place of uncertain
site, but from which it is supposed the tribe of the
tribe of the Trocmi, is mentioned only by late
Christian writers (Conc. Chalced. pp. 125, 309, 663;
355, where its name is Τροκμάδα; Hieroc. p. 698,
where it is misspelled Περευμαδία.) [L. S.]

TROCMI [Galatia.]

TRODA. [Galatia.]

TROESA. [Terra.]

TROEZEN (Τροέζη), a city in "Massilia of
Italy," as Stephanus (c. v.) says, if his text is right;
but perhaps he means to say "a city of Massilia
in Italy." Eustathius (ad II. p. 287) says that it
is in "Massalitica Italy." Charax is Stephanus'
people. [Strab. ii. 583, where it is misspelled Περευμαδία; Hieroc. p. 698,
where it is misspelled Περευμαδία.] [G. L.]

TROEZEN (Τροέζη; also Τροεζη). Proc. ill.
16. 12 § 12: Eth. Τροεζης; the territory γῆ Τρο
ζης, Evrip. Med. 683; Τροεζης γῆ, Thuc.
i. 58), a city of Peloponnesus, whose territory formed
the south-eastern corner of the district to which the
name of Argolis was given at a later time. It stood
at the distance of 15 stadia from the coast, in a for-
tile plain, which is described below. (Strab. viii.
p. 373.) Few cities of Peloponnesus boasted so
remote an antiquity; and many of its legends are
lost, and its people are not a very ancient one.
It is probable that its original population was of the Ionian race.
According to the Trozennians themselves, their
country was first called Orne from the Egyptian
Orus, and was next named Althebha from Altheba,
the son of Poseidon and Leto. This is also the
language of the Trozennians, but, through the mediation of Zeus
they became the joint guardians of the country.
Hence, says Pausanias, a trident and the head of
Athena are represented on the ancient coins of
Trozen. (Comp. Mionnet, Suppl. iv. p. 267. § 189.)
Althebha was succeeded by Sarcon, who built a seat
of the Cretan Artemis in a marshy place near the
sea, which was hence called the Phlegyasian
(Φλεγγαῖα Αλήμης); but was afterwards named Sarcon,
because Sarcon was buried in the ground below
the temple. The next kings mentioned are
Hyperes and Anthas, who founded two cities, named
Hyperesia and Anthemia. Aetius, the son of Hyperes,
inherited the kingdom of his father and uncle.
Aetius divided the land of his country among his
Trozen and Styppha, who were called the sons of
Pelops, and may be regarded as Achaeans properly
settled in the country, and divided the power with
Aetius. But the Pelopidas soon supplanted the earlier
dynasty; and on the death of Trozen, Pitthenus
united the two Ionic settlements into one city,
which was called Trozen after his brother,
who was the grandfather of Thecesus by his daughter
Aethra; and the great national hero of the Athenians
was born and educated at Trozen. The close
connection between the two states is also intimated by
the legend that two important demi-gods of Attica,
Amphystyle and Sphtettus, derived their names from
the sons of Trozen. (Paus. ii. 90. §§ 5—9.) Besi-

ides the ancient names of Trozen already quoted,
Stephanus B. (c. v. Τροεζης) mentions Aphrodias,
Saronia, Poseidiaon, Apolloisia, and Ainaia.
Strabo likewise says (iv. p. 373) that Trozen was
called Poseidonia from its being sacred to Poseidon.
At the time of the Trojan War Trozen was sub-
ject to Argos (Hom. II. ii. 561.); and upon the
state of the Dorians, who inhabited its plain, as a
Dorian colony from Argos. (Paus. ii. 30. § 1.)
The Dorians settle in Attica were received at
friendly terms by the ancient inhabitants, who con-
tinued to form the majority of the population; and
although Trozen became a Doric city, it still
retained its Ionic sympathies and traditions. At
early period Trozen was a powerful maritime state
as is shown by its founding the cities of Simbarnus
and Myndus in Caria. (Paus. ii. 30. § 8. Herod. vii. 99; Strab. viii. p. 374.) The
Trozennians also took part with the Achaeans in the
fascation of Syria, but they were eventually driven
by the Achaeans. (Aristot. Pol. v. 3.) It has been
suggested that at the same time that the Trozennians
may have been the chief founders of Poseidonia (Paros), which Solinus calls a Doric
colony, and to which they gave the ancient name of
their own city in Peloponnesus. [PAROS.] In the Persian War the Trozennians took an active
part. After the battle of Thermopylae, the
father of the Achaeans received the plain of Trozen
for the Greek fleet (Herod. vi. 43); and when
the Athenians were obliged to quit Athens upon the
TROEZEN.

of Xerxes, the majority of them took refuge
, where they were received with the greatest
y by the king. ... (Thuc. iii. 4.) The Troezenei sent 5
at Athens and Salamis, and 10,000 men to
in which they also fought at the battle of Mycale.
, 1, ix. 28, 102.) After the Persian war
connection between Athens and Troezenei
have continued; and during the greatness
ne of Xerxes and the Persians as well as of Athens,
Troezenei was an ally of Athens, and was
r garrisoned by Athenian troops; but by
the Athenians were compelled to relinquish
(Thuc. i. 115, iv. 45.) Before the Pelo-
War the two states became estranged from
; and the Troezenei, probably from
Argos, entered into close alliance with
Delos and Cos, in the Peloponnesian War
remained the firm allies of Sparta,
their country, from its maritime situation
proximity to Attica, it was especially exposed
vexations of the Athenian fleet. (Thuc. ii. 56,
In the Corinthian War, p. 394, the
first fought upon the side of the Laceda-
(0 x. 25.) The Lacedaemonians are
are numbered among the allies of Sparta
(Athens. ( Xen. Hell. vi. 2, § 5.) In the
Roman period Troezenei passed alternately into
of the contending powers. In n. 303 it
entered, along with Argos, from the Macedonian
Demetrius Poletes; but it soon became
Macedonian and repudiated till it was
by the Spartan Cleonymus in n. 278.
Strat. ii. 29. § 1; Frontin. Strat. iii. 6.
Shortly afterwards it again became a Maec-
ependence; but it was united to the Achaians
by Aratus after he had liberated Corinth.
§ 5.) In the war between the Achaians
and the Spartans, it was taken by Cleomenes,
223 (Polyb. ii. 59; Plut. Cleom. 19); but
the defeat of this monarch at Sellasia in n. c.
was doubtless restored to the Achaians.
Of recent history we have no information. It
place of importance in the time of Strabo (viii.
, and in the second century of the Christian
continued to possess a large number of public
or, and which has given a detailed
( Paus. ii. 31, 32.) According to the description of Pausanias, the
towns of Troezenei may be divided into three
in the Agora and its neighbourhood,
in the sacred incolature of Hippolytus,
and upon the Acropolis. The Agora seems to
surrounded with stones or cobblestones, in
stood marble statues of the women
and men who fled for refuge to Troezenei at the time
Persian invasion. In the centre of the Agora
the temple of Artemis Soteira, said to have been
by Theseus, which contained altars of the
gods. Behind the temple stood the monu-
mant of a temple of the goddesses sur-
red by three chairs of white marble, upon which
and two assessors are said to have administered
. Not far from thence was the temple of the
, founded by Ardelus, a son of Hepeasteus,
Pinthus himself is said to have learnt the
discourse; and before the temple was an altar
addressed to the gods. Museum and to
the deity whom the Troezenei considered
friendly to these goddesses.

TROEZEN.

Lycia, founded by Hippolytus. Before the temple
there was the very stone upon which Orestes was
parished by nine Troezenei. This so-called tent
of Orestes, in which he took refuge before his ex-
piration, stood in front of the temple of Apollo Thes-
aurus, which was the most ancient temple that
Panassians knew. The water used in the purification
of Orestes was drawn from the sacred fountain Hip-
pocrane, struck by the hoof of Pegasus. In the
neighbourhood was a cave of Hebe, and near this
a wild olive tree, and a temple of Zeus Soter,
said to have been erected by Atticus, one of the
mythical kings of Troezene.

The sacred enclosure of Hippolytus occupied a
large space, and was a most conspicuous object in
the city. The Troezenei denied the truth of the
ordinary story of his being dragged to death by his
horses, but worshipped him as a benefactor of
Argos, and dedicated to him a spacious sanctuary, the
foundation of which was ascribed to Dionysus.
He was worshipped with the greatest honours; and each
Virgin, before her marriage, dedicated a lock of her
hair to him. (Eurip. Hippol. 1424; Paus. ii. 32. § 1.)
The sacred enclosure contained, besides the temple
of Hippolytus, one of Aphrodite, another of Apollo,
and one of Ares, dedicated by Dionysus. On one side of the enclosure was
the stadium of Hippolytus, and above it the temple of
Aphrodite Calascopia, so called because Phaedra
beheld from this spot Hippolytus as he exercised in
the stadium. In the neighbourhood was shown the
tomb of Phaedra, the monument of Hippolytus, and
the house of the hero, with the fountain called the
Herculeum in front of it.

The Acropolis was crowned with the temple of
Athena Polias or Thea; and upon the slope of
the mountain was a sanctuary of Pan Lyterion, so
called because he put a stop to the plague. Lower
down was the temple of Isis, built by the Halicarn-
assians, and also one of Aphrodite Ascessa.

The ruins of Troezene lie west of the village of
Dhamalid. They consist only of pieces of wall
of Hellenic masonry or of Roman brickwork, dispersed
over the lower slopes of the height, upon which stood
the Acropolis, and over the plain at its feet. The
Acropolis occupied a rugged and lofty hill, com-
manding the plain below, and presenting one of the
most extensive and strongly protected spots. There
are in the plain several ruined churches,
which probably mark the site of ancient temples;
and several travellers have noticed the remains of
the temple of Aphrodite Calascope, overlooking the
cavity formerly occupied by the stadium. The chief
river of the plain flows by the ruins of Troezene, and
is now called Potidæa. It is the ancient Tu-
thus, afterwards called Hyllus (Paus. ii. 32. § 7), fed
by several streams, of which the most important
was the Chrysorhoë, flowing through the city,
and which still preserved its water, when all the other
streams had been dried up by a nine years' drought.
(Paus. ii. 31. § 10.)

The territory of Troezene was bounded on the W.
by that of Epidaurus, on the SW. by that of
Hermione, and was surrounded on every other side by
the sea. The most important part of the territory
was the fertile maritime plain, in which Troezene
stood, and which was bounded on the south by
a range of mountains, terminating in the promontories
Scyllaena and Iosaphos, and in the eastern points
of the Peloponnesus. (SCYLLAENA.) Above the
promontory Scyllaena, and nearly due E. of Tro-
zein, was a large bay, protected by the island of

4 X 2
Calareia, named Pogon, where the Grecian fleet was ordered to assemble before the battle of Salamis (Herod. viii. 42; Strab. viii. p. 573.) The port-town, which was named Calendoria (Paus. ii. 32. § 5), stood near the eastern extremity of the bay of Pogon, where some ancient remains are found. The high rocky peninsula of Methana, which belonged to the territory of Troesens and is united to the mainland by a narrow isthmus, is described in a separate article. [METHANA.] There were formerly two islands off the coast of Troesens, named Calareia and Sphaegia (afterwards Hiera), which are now united by a narrow sandbank. (Leake, Mores, vol. ii. p. 442, seq.; B tale, Recherches, c. p. 56; Curtius, Peloponnesos, vol. ii. p. 431, seq.)

TROGILUM (Τρογίλιον), a promontory formed by the western termination of Mount Mycale, opposite to the island of Samos. Close to this promontory there was an island bearing the same name. (Strab. xiv. p. 656; Steph. B. s. v. Τρογίλος, according to whom it was also called Trogilia; Act. Apost. xx. 15, where its name is Trogilus.) Pliny (v. 31. a. 37) speaks of three islands being called Trogilus, their separate names being Phulion, Argoona, and Metion. [L. S.]

TROGILUM, a town of Lusitania, according to Lutprand (Adv. haer. § 30, ap. Wessell. ed. Fis. p. 438), the same place which Pliny (iv. 33) calls Castra Julia. It is conjecturally the Taurilion of the Geogr. Rav. (iv. 35) and the modern Trevallo. (Cf. Florus, Exp. Segv. xiii. p. 114, and Uxert, ii. p. 30.)

TROGILITIS (Τρογιλίτις), a small lake in Lycaonia, mentioned only by Strabo (xii. p. 568), and probably the same as the now called Ikitos. [L. S.]

TROGLOTYDAE (Τρωγόλυτες), Protol. iii. 10. § 9; Diodor. iii. 14; Strab. xvii. pp. 786, 819; Agatharch., ed. Bekker; Plin. ii. 70. a. 71 vi. 29. a. 34: Τρωγόλυτες οι Τρωγόλυται, χάρας, Diodor. i. 30; Protol. iv. 7. 27.) Under the term Trogloytidae the ancients appear to have included various races of men. For we meet with them in Mauretanias (Strab. xvii. p. 828); in the interior of Libya east of the Garamantes, along the Arabic shore of the Red Sea, as well as on the opposite coast of Africa; and on both in such numbers that the districts were each of them named "Regio Trogolytica;" and even on the northern side of the Caucuses (Strab. xi. p. 506). The Caucassian Trogloytidae were in a higher state of civilization than their eastern namesakes, since they cultivated corn.

But this race, most commonly known as Trogloytidae inhabiting either shore of the Red Sea, and were probably a mixture of Arabian and Aethiopian blood. Their name, as its composition imports (πρόγλυς, βίος), was assigned to them because they either dug for themselves cabins in the lime and sandstone hills of that region, or availed themselves of what had existed. Even in the latter case, the villages of the Trogloytidae were partly formed by art, since long tunnels, for the passage or stabling of their herds, were cut between village and village, and the rocks were honey-combed by their dwellings. Bruce saw at Gezi in Nubia a series of such caverns, inhabited by herdsmen, and witnessed the periodic passage of the cattle in Summer from the lowlands to the hills. The same cause led to similar migrations in ancient times, viz., the appearance of the swarms, immediately after the cessation of the periodical rains.

The conclusions of the Regio Troglyn in extended from the Sinus Aegyptius to be assumed as applicable to the Troglytidae generally. The catacombs of Telephoros are the most accurate image of their necropolis. Abushek, who now inhabits the region, preserves their peculiar manners and customs. Their clothing was described by the Greek writers as mean, but at least of them were serpent-skin (Ibn. 183.) But their general aspect was that of herdsmen.

Agatharchides of Cnidus is the writer who mentions the Trogloytidae (ap. Paus. vii. 5. ed. Bekker.) According to him and Strabo (vii. p. 784) animal food was their staple diet, and not only the flesh but also the bones of their cattle. Their drink was wine and blood. Since, however, only the elder male beasts were slaughtered for food, it may be supposed that the better animals were reserved for the Aegyptian and Aethiopian nations, who supported their only article of ransom; for when they went masked, and the women wove bodies, and wore necklaces of shells. The habits of the Trogloytidae rendered them so unable to run down the wild beasts they hunted; and they must have been armed with the use of weapons, since they were engaged in several robberies (Ibn. H. D.) when the most passing from the interior of Libya to the Red Sea were obliged to employ peaceable traders, stationed at Philae (Akhnaton etc.) about 25 miles from Berenice. Trogloytidae also served among the light troops in the army of Xerxes, b.c. 480, and acted as guides and caravans, since the Achaeologists when they employed explorers of mines were over Trogloytidae. (Herod. iii. 19.) Among these were a community of women, who were of a chiefdom rank, who may have been of a slave race, having wives appropriated. For the seduction or seduction of a chiefman's wife was not a penalty. During their residence with the Greeks, they became united together as soon as they settled forth with their herds; pastures they were incessantly at war with another, on which occasions the women went to act as mediators. They practised the circumcision, like the Aegyptians and Aethiopians generally. According to Agatharchides, they differed much from the races of them in their sepulchral customs as in their habits. They bound the corpse naked and bore it on shoulders, and affixed to it a stake, pealed with some shouts of laughter, and when it was quite covered with stones, placed a horn upon the waves. But they did not always act so, but may have been acquainted to procure a liveliveness intolerable evils, they strangled the aged as with an ox-tail. Their civilization appears to Aristotle (Hist. Anim. viii. 13.) that he had the Trogloytidae as pigmies who, mounted horses, waged incessant wars with the crooked feathers. The adjacent tribes of the Bene Abyssinians, called Barwas, were by the ancient responds, according to modern accounts, t
TROJCIUS MONS. (Vincent, Commercis et Navigatione acf Ancianta, vol. ii. p. 89.) [W. B. D.] TROJCIUS MONS (Τρούκιος Μονής, Strab. xvii. p. 309; Steph. B. s. v.; Τρόκυα Λίβος Μονής, Ptol. iv. i. § 27), was a long range of hills east of the Nile, which threw out several abrupt spurs into the Heptanomia of Egypt. It stood in the parallel of Hermopolis, i.e. lat. 31° 51'. From this calcareous and similar to the river Nile, the stone was used in the construction of the Pyramid. [W. B. D.]

TROJA. [ILLU: TROAS.]

TROGNIS. [DAULIS, p. 755, b.]

TROPAEAE AUGUSTI. [MONOECI PORTUS.

TROPAEAE DRUSIC (Τρόπαιον Ἀρεάτον), a trophy erected on a hill on the banks of the Edos by Hermon to the memory of the Romans, which he advanced in the north of Germany. (Dios Cas. iv. 1; Flor. iv. 12; Ptol. ii. 11. § 26, who speaks of it as if it were a town.) [L. S.]

TROPAEAE POMPEII (να Πομπηείος τρόπαιος, να ανδρονίυαρα, Strab. iii. p. 160, iv. p. 178), a trophy or monument erected by Pompey on the summit of the Pyrenees, recording the subjugation of 876 Spanish tribes by him. [W. B. D.]

It stood at the spot named Sumum Pyreneum in the ιεύ. Ανδ. (p. 397), and according to some on the boundary between Gaul and Spain. [T. I. D.]

TROSMIS (Τρόσμις, Hieroc. p. 687; Τρόσμις or Τρόσμις, Ptol. iii. 10. § 11), a town of some importance in Lower Moesia, on the Danube, according to the ιεύ. Ανδ. (p. 225), the Legio I. Iovia had its head quarters, though the Not. Imp. (c. 28) more correctly mentions the Legio II. Herculea. Lapise identifies it with Malechëa. (Cf. ιεύd. ac Pov. iv. 9, v. 79.) [T. I. D.]

TROSSSULUM, a town of Ethiopia, which, according to Strabo, was the first town among the Romans, which he visited as a body of cavalry alone, unsupported by infantry; in explicit thought to be so singular, that the Roman writers were for some time called Trossuli on account of it. (Plin. xxxvii. 2. a. 9; Festus, s. v. Trosuli, p. 367. ) No other mention is found of it; and it was probably a small place which had disappeared at the time of Strabo, but Pliny (v. 3. c. 1) says that it was situated 9 miles from Velanilii, on the side towards Rome. It is said that the name was still retained by a place called Tresco or Tardo in Tresco, about 9 miles from Monta hozzono, as late as the 17th century, but all trace of it is now lost. (Holsten. Not. ac Cliam. p. 67; Demus's Ethiopia, vol. 1.) [E. H. B.]

TRUENTUM. [Castrum Treuventum.]

TRUENTUS or TRUENTINUS (Τρουεντίνος: Τροντόντος), a considerable river of Picenum, which rises in the Apenines above Matriae, flows under the walls of Asciol (Ascolum), and falls into the Adriatic about 5 miles of S. of Benedetto. It gave name to a town which was situated at its mouth, and was called Tiroieno. (Cf. Tiroius (c. c.), and commonly Castrum Treuventum. Though one of the most considerable of the rivers of Picenum, the Truentus has very much the character of a mountain torrent, and is only navigable for about 5 miles near its mouth. (Strab. v. p. 241; Plin. iii. 13. a. 18; L. T. ii. 4. § 6; Ptol. iii. 1. § 31.) [E. H. B.]

TRYBACTRA (Τρυβάκτρα, Ptol. vi. 12, § 6), a place to the NW. of Alexandria Oxiana, probably represented by the present Bobhdra. [V.]

TUAESIS (Τωάεσις, Ptol. ii. 3 § 13), a town on the E. coast of Britannia Barba, which stood on an estuary of the same name (Ptol. ii. § 5), now the Murray Frith. [T. H. D.]

TUATI VETUS, a town in Hispания Baetica, belonging to the jurisdiction of Corduba. (Plin. iii. 3. a. 3.) Ucetr (ii. pt. i. p. 370) is of opinion that it should be called Tucati Vetum. [T. H. D.]

TUBANTES or TUBANTI (Τούβαντας or Τούβαντος), a German tribe which inhabited the Chausca and, seems originally to have dwelt between the Rhine and Yssel; but in the time of Germanicus they appear in the country south of the Lippe, that is, the district previously occupied by the Sigambri (Tac. Ann. i. 51, xiii. 55, foll.). They seem to have followed the Chausca still farther to the south-east, as is shown (ii. xii. § 23) perhaps on the south of the Chastri, near the Thauringer Wald, between the rivers Fulda and Herroa (Comp. Tac. Germ. 36). In the end we find them again as a member of the confederacy of the Franks. (Nasarius, Pompey. Const. 18.) The name Subatii in Scraibo (vii. p. 292) is probably only an error of the transcriber, whence Kramer has changed it to Tubetius. (Vetter. Gen. Hist. 160. 2.)

TUBURBO MAJOR and MINUS (Tuburbo, Ptol. iv. 3. § 35), two neighbouring towns in the interior of Byzacium. The latter is still called Tubemaria; the former is variously identified with Tubulica and Zagkoumen. Fluni (v. 4. a. 4) writes the name Tuburia. (Iun. Ant. pp. 44, 45; Tab. Peut. ) [T. H. D.]

TUBUSAPTUS (Τοῦβοςαπτος, Τοῦβοςαπτως, or Τοῦβοςαπτως, Ptol. iv. 2. § 31, viii. 13. § 12), a town of Mauretania Caesariensis, 18 miles SE. of Saldes. (Iun. Ant. p. 32.) According to Ammianus Marcellinus it was situated close to Mons Ferratus (xxix. 5. § 11). From Fluni (v. 2. a. 1) we learn that it was a Roman colony since the time of Augustus. It was once a place of some importance, but afterwards declined, though even at a late period it seems to have had a Roman garrison (Not. Imp., where it is called Tubusubitus). Variously identified with Burg, Burgi, and Burg. (Cf. Tab. Peut. ) [T. H. D.]

TUCABA (Tubeca, Ptol. iv. 6. § 25), a place in the interior of Libya. [T. H. D.]

TUCCA (Toxica, Ptol. iv. 2. § 28). 1. A town of Mauretania Caesariensis. Poeteme places it in the interior; but according to Fluni (v. 2. a. 1) it was on the sea at the mouth of the river Amspera. (Cf. Tab. Peut.) [T. H. D.]

2. A town in the district of Byzacium in Africa Proper. (Ptol. iv. 3. § 32.) From inscriptions found in a village still called Dugga it may be inferred that the place should be more correctly called Tugga. According to the Iun. Ant. (pp. 47, 49, 51) it lay 50 miles N. of Sufetula, the modern Sufita or Sufiulet, and also 50 miles from Tiberium, probably from its being situated in a neighbourhood abounding with the Tiberianth. Tucca was a fortified town. (Procop. de Aed. vi. 5.) It is probably the same place called Tuccabory by St. Augustine (adv. Donat. vi. 24.) (Cf. Wessel. ad Iun. p. 46.) [T. H. D.]

3. A town of Numidia. (Ptol. iv. 3. § 29.) [T. H. D.]

TUCCI (Toxice, Ptol. ii. 4. § 11), a town of Hispания Baetica, between Ilipla and Italica (Iun. Ant. p. 432.) According to Fluni (iii. 3. a. 3) it is 4 x 3.
TULLIUS.

had the surname of Augusta Gemella. Commonly identified with Tejoda. (Cf. Flores, Esp. Sagra. xii. p. 355.) [T. H. D.]

TUCRIS (Tampons, Ptol. ii. 6 § 56), a town of the Hellenistic Tarentum, Eptenium (T. H. D.)

TUDE (Toulool and Touloos, Ptol. ii. 6 § 45), a city or castle of the Grulli or Gravili, in Hispania Tarraconensis, E. of Limia, and on the road from Bracara to Asturica. (Gall. Ast. p. 429.) It is called Tude by Pliny (iv. 20. a. 34), and according to an ancient tradition, it was the seat of an Astoban colony under Dionysus; a tale probably occasioned by the similarity of its name, to that of Tydes. (Sil. Ital. iii. 367, v. 369; Plin. L. c; Avien. Descr. Orb. 650.) It is the modern Tuy.

TUDE (Toule: Eub. Tudentinus: Tude), one of the most considerable cities of Umbria, situated on a lofty hill, rising above the left bank of the Tiber, about 26 miles S. of Perusia and 18 W. of Spezialium. There is no doubt that it was an ancient Umbrian city, but no mention of the name occurs in history previous to the Roman conquest. Silvus Italicus tells us that it was celebrated for the worship of Mars (Sil. Ital. iv. 232, viii. 463), and notices its site on a lofty hill. (Id. vi. 645.) The first notice of its history is on occasion of a plunder by the Gauls at the time of the invasion of the Cimbri and Teutones (Plut. Mar. 17; Plin. ii. 57. a. 58); and shortly after we learn that it was taken by Crassus, as the lieutenant of Sulla, during the wars of the latter with the partisans of Marius. (Plut. Crass. 6.) It received a colony under Augustus, and assumed the title of "Colonia Fida Tude," probably in consequence of some services rendered during the Perusian War, though its name is not mentioned by Appian. (Plin. iii. 14. a. 19; Lab. Colos. p. 214; Marat. Ascer. pp. 1111. 4, 1120. 3; Orell. Ascr. 3726.) It appears from inscriptions to have been a flourishing and important town under the Roman Empire, and is mentioned by all the geographers among the chief towns of Umbria. (Strabo v. 327; Plin. L. c.; Plin. iii. i. § 54.) It was not situated on the Flaminian Way, but the Tabula gives a line of road, which led from Ameria to Tuder, and thence to Perusia. (Tab. Punct. E.) Its strong fort as a garrison, arising from its elevated position, is already alluded to by Strabo (i. c.), and rendered it a place of importance during the Gothic Wars, and the fall of the Western Empire. (Procop. B. G. ii. 10, 13.) It is again mentioned as a city under the Lombards (P. Dion. iv. 8), and there can be no doubt that it continued throughout the middle ages to be a considerable city. It is now much decayed, and has only about 2500 inhabitants, but still retains the title of a city.

Considerable ancient remains still attest its former consideration. Among these the most remarkable are the walls of the city, some portions of which are apparently of great antiquity, resembling those of Perusia, Volaterrae, and other Etruscan cities, but they are in general more regular and less rude. Other parts of the walls, of which three distinct circuits are on regular masonry and built of travertine. These are certainly of Roman date. There are also the remains of an ancient building, called by local antiquarians the temple of Mars, but more probably a basilica of Roman date. Numerous coins and other small objects have been found at Tude: among the latter the most interesting is a bronze of Mars, now in the Museo Gregoriano at Rome. The coins of Tuder, which are numerous, belong to the class called for brass and of large size, namely as earliest coinage of Volaterrae, Iuniurn, &c. For all have the name written in Etruscan characters, and the title "Mars," which has learnt to be the common form of the name. (Sil.)

TUFEROBIS (Tufripens, Ptol. ii. iv. 10) on the W. coast of Britannia Ruanica, now Tey.

TUCICUM (Tubicum: Eub. Tubicinum: Tucicium), the capital town of Umbria, mentioned both by Ptolemy, as well as in inscriptions, as chief city of its municipal rank; but its site is unknown. (Plin. iii. 14. a. 19; Plin. L. c. § 53; Gell. iv. 87.)

TUGENI (Tugense). [Helyett, vii. p. 1041.]

TUGIA, a town of the Ostraci, in Hispania Tarraconensis. (Plin. iii. 3. 4; Ptol. Hist. Asia) Its site is at the sources of the Quessa, where the town is called Tugia. (Sil. Ital. vii. 392; Plin. ii. 57. 58.) It was a town of considerable size, and seems to have been of considerable importance during the Roman period, as indicated by the number of inscriptions found in the vicinity. The name Tugia is found in later times, and appears to be of Etruscan origin. (Sil. Ital. vii. 392; Plin. ii. 57. 58.)

TUGIENSIS SALTUS, a part of the Mount Oroaspa, which formed the main town of Tugia, and in which, according to Ptolemy, the chief city of its municipal rank would appear to be the same branch called Mosa Argentina. (Cf. Oroaspa.)

TUCIAE or TERCIAE, as seems more: Gallia Narbonensis, between Glaneus (Glonus) and Aquae Sextiae (Asis). It is placed in a Table between Glanum and Freia. (Dio Cassius, p. 57 and Williams, Tusciae or Terciae, as he reads the name Aquirium or Assuriae. This second name serves, seems to have some relationship to the Roman road described in the Antoninus Pius' name of Via Anuresilis as far as Ardeatia. (Liv. viii. 26.) It is said that there are many remains at a place called Tuseus, near a mile from Assuriae."

TULICUS, a small river in the E. part of Spain, near Tarracon. (Meda, ii. 6.) It is a noted modern Bega.

TULINGI. [Helyett, Vol. i. p. 107.]

TULIPHURDURM (Tulipherdurm), a city in Germany, probably in the county of Cruen, on the right bank of the Vistula. (Procop. B. G. i. 10, 13.) It is again mentioned as a city under the Lombards (P. Dion. iv. 8), and there can be no doubt that it continued throughout the middle ages to be a considerable city. It is now much decayed, and has only about 2500 inhabitants, but still retains the title of a city. (Procop. B. G. i. 10, 13.) It is a noted modern Bega. (Procop. B. G. i. 10, 13.) It is again mentioned as a city under the Lombards (P. Dion. iv. 8), and there can be no doubt that it continued throughout the middle ages to be a considerable city. It is now much decayed, and has only about 2500 inhabitants, but still retains the title of a city.
TULLUM. 1339
TULLUM (Τωύλλος), in Gallia Belgica, is one of the cities of the Leuci, who bordered on the
municipalities. (Ptol. ii. 9. § 13.) Nasium is the other city [NASIUM]. The Notitia of the Provinces of Gallia mentions Tullum thus: "Civitas Leu-
corum Tullum," which is Tullum. It preserved its name instead of taking the name of the people, like most other capital towns. Toul is in the department of the Morbihne.  [G. L.]

TUNES (Τούνες, Polyb. i. 30; Tóvnoi, ή Tóvnoi, Strab. xvii. p. 854, &c.), a strongly fortified town, once of some importance, in the Roman province of Africa. According to Polibius (xv. 20), who is followed by Livy (xx. 9), it was 120 stades or 15 miles from Carthage, from which it lay in a SW. direction; but the Tab. Peut. in which it is written Thunis, places it more correctly at a distance of only 10 miles from that city. It is said to have been situated at the mouth of a little river called Catada, in the bay of Carthage, but there are now no traces of any such coast.  [T. H. D.]

TUNGRI (Τούγριοι), are placed by Piso (ii. 9. § 9) east of the Tabullas river, and their chief place is Araucatum, which is Adjustaca or Tongra [ADJUZTACA]. Tacitus (German. 2) says they were traced through the territory of Gallia, which was expelled the Gallic, are now called Tungri, but were then named Germani. Tacitus speaks of the Tungri in two other passages (Hist. iv. 55. 79); and in one of them he appears to place the Tungri next to the Nervii. The name of the Eburones, whom Caesar attempted to annihilate [EBOURONES], disappears in the later geography, and the Tungri remain among the Germanic tribes (G. L.). (Notice, &c.) that the name of the Tungri extended over a large tract of country, and comprehended several peoples; for in the Notit. of the Provinces of Gallia, the Tungri divide with the Agrrippineses all Germania Secunda; and there is some evidence that the bishops of Tungri had once a territory with such a name.  [T. H. D.]

Ammianus (xv. 11) gives the name of the people, Tungri, to one of the chief cities of Germania Secunda; the other is Agrippina (Colome). This shows that Tungri under the later Empire was a large place. Many Roman remains have been dug up there; and it is said that the old Roman road must still be traced through the town (Strab. iii. n. 192; Ptol. iii. 16).  [T. H. D.]

TUNNOCELUM, according to the Notitia Imp. a place on the coast of Britannia Romana, at the end of the wall of Hadrian, the station of the Cohors I. Aelia Classicis. Horsey (p. 91) and others place it at Bowness, on Solway Firth; Camden, with less probability, seeks it at Tyrnessome, on the coast;  [T. H. D.]

TUNTTOBRIGA (Τούνττοβρίγα, Ptol. ii. 6. § 39), a town of the Callaisi in Hispania Tarraconensis.  [T. H. D.]

TURBANO, a place in Hispasia Bescias, not far from the coast; between Murphi and Ursi. (Him. Ant. p. 405.) Variously identified with Torpe, Torriascan, and Tabernum.  [T. H. D.]

TURBULATA is a town in the Edetani, in his Tarraconensis. (Liv. xxxiii. 44.) Perhaps the modern Tearer on the Guadalquivir.  [T. H. D.]

TURA. [BEROBERONIA.]

TURBULA (Τούρπουλα, Ptol. ii. 6. § 61), a town of the Bastaici in Hispasia Tarraconensis. D'Anville (Geogr. Anc. i. p. 383) and Mentele (Exp. Anc. p. 177) identify it with Terras; but Ukert (ii. pt. i. p. 407) more correctly declares it to be Tovraus in Murcia. The inhabitants are called Turpulianos by App. Hist. 10.  [T. H. D.]

TURCAE (Τούρκοι, Suid. s. v.), a Scythian people of Asiatic Sarmatia, to whom is assigned Chersonesus Macedonia, which appears to be identical with the 11παυον of Herodotus (iv. 22, &c.). The various hypotheses that have been started respecting the Turcae only show that nothing certain is known respecting them. (Cf. Manner, i. p. 130; Heerem, Ideam, l. 2, pp. 189, 281, 307; Schaffarik, Slav. Alterth. i. p. 318, &c.) Humboldt (Central-Ausien, i. p. 245, ed. Mahnitz) opposes the notion that these Turc or Jyrcas were the ancestors of the present Turks.  [T. H. D.]

TURCILINGI, a tribe in northern Germany which is not noticed before the fifth century of our era, and then is occasionally mentioned along with the Itulii. (Jornand. Get. 15; Paul. Dac. i. 1.) In the present state of things, see Blaquière, Lett. i. p. 161, seq.; Ritter Erdkunde, i. p. 914, seq.  [T. H. D.]

TURDETA'NI (Τουρδετα'νοι, Ptol. ii. 4. § 5, &c.), the principal people of Hispania Bescias; whence we find the name of Turdetania (Τουρδετανία or Τουρετανία) used by Strabo (iii. p. 136) and Stephanus Byz. (p. 661) as identical with Besciae. Their territory lay to the W. of the river Singilia (now Xenil), on the eastern edge of his Lusitania on the W. The Turdetani were the most civilised and polished of all the Spanish tribes. They cultivated the sciences; they had their poets and historians, and a code of written laws, drawn up in a metrical form (Strab. iii. pp. 139, 151, 167; Polyb. xxxiv. 9). Hence they were readily disposed to adopt the manners and customs of their centre querens, and became as length as merely Romans; but with these characteristics we are not surprised to find that they are at the same time represented by Livy xxxiv. 17 as the most unwarlike of all the Spanish races. They possessed the Jews Latii. Some traits in their manners are noted by Diodorus Sic. (v. 33), Silius Italicus (iii. 340, &c.), and Strabo (x. 15), and the Roman civilization was no doubt derived from their intercourse with the Phocianians whose colony of Tartessas lay in their neighbourhood.  [T. H. D.]

TURDULI (Τούρδουλοι, Ptol. ii. 4. § 10), a people in Hispasia Bescias, very nearly connected with the Turdetani, and ultimately not to be distinguished from them (Strab. iii. n. 192; Ptol. iii. 151; Mela, i. i. § 7; Plin. iii. 1. a. 2, xvi. a. 35; cf. Flores, Exp. Scriptor. i. p. 7).  [T. H. D.]

TUREDICUM or TUREDICUMM, in Gallia Narbonensis, is placed in the Table on a road between Vienna (Vienne) and Cularo (Cromoble). Turedicum is between Vienna and Margunum (Maurium). The site is unknown. (G. L.)

TURIA or TURIBUM, a river in the territory of the Edetani in Hispasia Tarraconensis, which enters the sea in the neighbourhood of Valeria (Mela, ii. 6; Plin. iii. 8. a. 4; Vib. Seq. p. 227, ed. Bip.) It was famed for the proculius Turries between Pompey and Sertorius (Pint. Pompe. 18, Sert. 19; Cis. p. Balb. 2). Now the Guadalquivir.  [T. H. D.]

TURIGA. [Corduba.]

TURISSA (called by Prolemes Troepora, i. 6. § 67), a town of the Vascons in Hispania Tarraconensis, on the road from Pompeius to Burdigala (Ibis. Astr. p. 455.). Variously identified with Tusaes and Oestatua. [T. H. D.]

TURMODIGL [Murillo.]

TURMOGUM (Trovianus, Ptol. ii. 5. § 8), a town in the interior of Lusitania. [T. H. D.]

TURMULI, a town of Lusitania on the Tago, and on the road from Emerita to Caesaraugusta. (Ibis. Astr. p. 453.) Variously identified with Acinum de la Lusitania. [T. H. D.]

TURNACUM or TORNACUM, a city of North Gallia, is first mentioned in the Roman Itina. In the Notit. Imp. mention is made of a military force under the name of Numerus Turnacumen; and of a "Procurator Gynaecei Turnacum Belgicae Secundus." This procurator is explained to be a superintendant of some number of women who were employed in making for the soldiery the Herculaneums about A. D. 407 speaks of Turnacum as one of the chief towns of Gallia; and Andoena, in his life of S. Eligius (St. Eloi) in the seventh century, says of it, "quae quondam regalis exstitit civitas." Turnacum was within the limits of the ancient territory of the Nervii. The Flemish name is in Cuvry, which the French have corrupted into Turnay. Turnay is on the Scheldes, in the province of Flandres, in the kingdom of Belgium.

There are silver corns of Turnacum, with the legend DVMACOES and DVMACYN. On one side there is the head of an armed man, and on the other a horseman armed. On some there is said to be the legend DVMACYN. Numerous Roman medals have been found at Turnay, some of the time of Augustus and others as late as Claudius Gothicus and Tetricus, and even of a later date. The tomb of Childecri I., who died A. D. 481, was discovered at Turnay in the seventeenth century, and a vast quantity of gold and silver medals, and other curiouis things; among which the golden ring of Childecri, with his name on it, CHILDRIE REGIS. Such discoveries as these, which have been made in various places in Belgium, show how little we know of the Roman history of this country. (D'Anville, Notice, &c.; Uxart, Gallias; Recueil d'Antiquites Romanes et Gauloises trouvées dans la Flamand proprement dite, par M. J. de Baart.) [G.L.[

TURERON (Toward, Ptol. ii. 6. § 40), a people in Hispania Tarraconensis, probably a subdivision of the Callaci Brescarii, in whose territory were the baths called "Tibara Asid." [T. H. D.]

TUROBONES, TUBOINI, TUBONI. Some of these people are said to have lived in the country of the Turones after the campaign of B. C. 57 (B. G. ii. 35). The Turones are mentioned again (B. G. vi. 54, 55) we learn that they bordered on the Caesarea in another place (vii. 4) they are mentioned again in the Caesarea, Aquilaci, Anarici, and other states. In 265 B.C. (Liv. vii. 43) all Gallia against Caesar, he offered to join him. The contingent which they were to furnish against Caesar, during the year 46, was 8000 men (viii. 75). But the allies never gave Caesar much trouble, though Liv. says them "inestimable." (L. 657), if the word is precise. (ibid. [§ 41]) the name seems to be a corruption of the original name Tarinvis or Tarinnvis and the capital is at Caesaraugustam or Tauris Loire. In the destruction of Scaurus in the Tiberius, the Taurins, as Tacitus calls them (iii. 41. 46), rose against the Romans, but were soon put down. They are in the Latinum. Prolemes. The chief part of the territory of Taurins was south of the Loire, and was the origin of the provincial name Tarinvis. (Gallias, p. 329) mentions a silver coin of Tarinvi. On one side there is a female bust; the legend "Turonos," and on the other "Ceres," with the figure of a galea. [T.]

TUMBOI (Trovianus), a German tribe occupying a district on the Rhine, and divided by the Chatti, perhaps as two banks of the Mosel. (Ptol. ii. 11. § 22.)

TURQUA (In the Geogr. Rav. iv. of Turqua), a town of the Callaci in Hispania Tarraconensis on the road from Bescarum to Lucus Alnius. (Ibis. Astr. p. 430.) Variously identified with Taroneus (or Taurins) and Bescarum. [T. H. D.]

TURS (or Tarins) and Ribesum. [T. H. D.]

TURS (AD). 1. A town of the Issus, in his territory in the province of Britain, in the kingdom of Belgium. [T. E.]

2. A town in the territory of the Caesarea in the same province (Ibis. Astr. p. 400.) known either with Castrellas or Olaria, [T. E.]

TURS ALBAE (Epaminon Arceia, Ptol. ii. § 6), a place of the Celtici in Lusitania. [T. E.]

TURRIGA (Troviano or Tropeja, Ptol. ii. 5. 205), a town of the Callaci in Lusitania in Tarraconensis. [T. B.]

TURRIM, AD. in Gallaecia, near Aquas Sextias (Aix), is placed in the Arco between Matavonum and Teutacis (Tauron). The name Turrivis is preserved in that of Turris, which is written Tuvrey or Tuir and is an ancient document. (D'Anville, Notice, &c.)

TURRIS. 1. Turris Carnenses, a place in the middle, whereas there was road through Sev. Cirta (Ibis. Astr. p. 34.) Usually identified with Tibit, but by Lapie by the Djed Gromis. [T. E.]

2. [Euchimont Turris.]

3. TURS HANSTRALE, a strong fortress between the sections of the Brevia in the Benzal seat when flying to King Antiquas. (Liv. xxxvi. 2 Justin calls it the Byn urbanus Hanzal.) It seems to have been situated between the Thamis and Thapsus, at the spot where the Ty Pan places Sibelec.

4. TURRIS TAMALLINNI, in Africa Prope a road from Tescula to Leptis Magna. (Ibis. Astr. p. 73, 74.) Now Tolleso. [T. E.]

[Remains of a hydrometeon, a monument to the Roman Colossus, existing in the town of Turrise.]
TURRIS LIBYSSONIS.

TURRIS LIBYSSONIS (Πόρος Λιβυσσώνας, Ptol.: Πόρος Ποσειδώνα), a town of Sardinia, and apparently one of the most considerable in the island. It is situated on the N. coast about 15 miles E. of the Gorditan promontory (the Capo del Falcone), and on the spacious bay now called Golfo dell’Ainuara. Pliny tells us it was a great city, and we may probably infer from its name that it was probably no town on the spot, but merely a fort or castellum. (Plin. iii. 12. s. 17.) It is noticed also by Ptolemy and in the Itineraries, but without any indication that it was a place of any importance. (Ptol. iii. 3. § 5; Itin. Ant. p. 83.) But the ancient remains still existing prove that it must have been a considerable town under the Roman Empire; and we learn from the inscriptions on ancient milestones that the principal road through the island ran directly from Caralis to Turris, a sufficient proof that the latter was a place much frequented. It was also an episcopal see during the early part of the middle ages. The existing port at Porto Torres, which is almost wholly artificial, is founded on Roman foundations; and there exist also the remains of a temple (which, as we learn from an inscription, was dedicated to Fortune, and restored in the reign of Philip) of thermas, of a basilica and an aqueduct, as well as a bridge over the adjoining small river, still called the Fiume Tursiliano. The ancient city continued to be inhabited till the 15th century, when the greater part of the population migrated to Sassari, about 10 miles inland, and situated on a hill. This is still the second city of the island. (De la Marmora, Voy. en Sardeigna, vol. ii. pp. 363, 465—472; Smyth’s Sardinia, pp. 263—265.) [E. H. B.]

TURRIS STRATONIS. [Carianelia, p. 470, a.]

TURRIS FLUVIUS. [Aquilennia.]

TURRIS LUZIUS. [Ethn. Tuscusana, p. 151, a river in the territory of the Edetani in Hispania Tarraconensis, between the Iberus and the Fretum Herculis. Ukert (ii. pt. i. p. 293) thinks that it is probably identical with the Satabis of Mela (ii. 6) and the Uduba of Pliny (iii. 3. s. 4), the present Miñares or Miranes. [T. H. B.]

TURRIQUIN (Ethn. Tuscusana Turri), a town of Tuscusana, mentioned only by Pliny, who enumerates the Turri in the towns of that province. (Plin. iii. 11. s. 16.) The name is written Turuni in our present text of Pliny; but it is probable that we should read Turini, and that the site is marked by the present village of Turi, near Conversano, about 6 miles W. of Polignano. (Romaniels, vol. ii. p. 180.) [E. H. B.]

TURRUTUS (Tempospero, Ptol. iii. 5. § 2), a river of European Sarmatia which fell into the Northern Ocean, and which, according to Marcellus (p. 55), had its source in the Rhipsea mountains, but Ptolemy seems to place it in Mount Alanos or Alusias. Mannert (iv. p. 258) takes it to be a branch of the Turos. [T. H. B.]

TUREPTIA (Temperに入れ, Ptol. ii. 6. § 23), a town of the Galli Blusiana in Hispania Tarraconensis. [T. H. B.]

TUSCA, a river forming the W. boundary of the Roman province of Africa, which, after a short course to the N., fell into the sea near Tabraca. (Ptol. iv. 2. s. 32.) [T. H. B.]

TUSCANA (Eth. Tuscaniensia: Tuscanos), a city of Southern Etruria, situated about 12 miles N.E. of Tarquinii. It is mentioned only by Pliny, who enumerates the Tuscanienses among the municipal communities of Tuscusana, and in the Tabulae, which places it on the Via Clodia, between Blera and Saturnia, but in a manner that would afford little clue to its true position were it not identified by the resemblance of name with the modern Tuscanella. (Plin. iii. 5. s. 8; Tab. Peut.) The name is found in an inscription, which confirms its municipal rank. (Murat, Inscriptiones, p. 338.) But it appears to have been an Etruscan town, as the name indicates, and we find no allusion to it as of ancient Etruscan origin. Yet that it was so is rendered probable by the tombs that have been discovered on the site, and some of which contain sarcophagi and other relics of considerable interest; though none of these appear to be of very early date. The tombs have been carefully examined, and the careful antiquary at the same time has preserved the inscriptions on ancient milestones that the principal road through the island ran directly from Caralis to Turris, a sufficient proof that the latter was a place much frequented. It was also an episcopal see during the early part of the middle ages. The existing port at Porto Torres, which is almost wholly artificial, is founded on Roman foundations; and there exist also the remains of a temple (which, as we learn from an inscription, was dedicated to Fortune, and restored in the reign of Philip) of thermas, of a basilica and an aqueduct, as well as a bridge over the adjoining small river, still called the Fiume Tursiliano. The ancient city continued to be inhabited till the 15th century, when the greater part of the population migrated to Sassari, about 10 miles inland, and situated on a hill. This is still the second city of the island. (De la Marmora, Voy. en Sardeigna, vol. ii. pp. 363, 465—472; Smyth’s Sardinia, pp. 263—265.) [E. H. B.]

TURRIS STRATONIS. [Carianelia, p. 470, a.]

TURRIS FLUVIUS. [Aquilennia.]

TURRIS LUZIUS. [Ethn. Tuscusana, p. 151, a river in the territory of the Edetani in Hispania Tarraconensis, between the Iberus and the Fretum Herculis. Ukert (ii. pt. i. p. 293) thinks that it is probably identical with the Satabis of Mela (ii. 6) and the Uduba of Pliny (iii. 3. s. 4), the present Miñares or Miranes. [T. H. B.]

TUSCANA (Eth. Tuscaniensia: Tuscanos), a city of Southern Etruria, situated about 12 miles N.E. of Tarquinii. It is mentioned only by Pliny, who enumerates the Tuscanienses among the municipal communities of Tuscusana, and in the Tabulae,
TUSCULUM.

Superbus, who courted the friendship of the Latin cities, Octavius Mamilius of Tusculum was the foremost man of all the race, tracing his descent from Ulysses and Circe. Him Tarquin conciliated by the gift of his daughter in marriage, and thus obtaining the possession of the royal family and all its advantages. (Liv. i. 49; Dionys. iv. 45.) The genealogical pretensions of the gens Mamilla are still to be seen on their coins, which bear on the obverse the head of Mercury, and on the reverse Ulysses in his travelling dress with his dog. The alliance of Mamillius with Tarquin, however, was the main cause of the Latin War. After his expulsion from Rome, and unsuccessful attempt to regain his crown by means of the Etruscans, Tarquin took refuge with his son-in-law at Tusculum (Liv. ii. 15), and by his assistance formed an alliance with the confederacy of the thirty Latin cities. (ib. 18.) The confederate army took up a position near Lake Regillus, a small sheet of water, which lay at the foot of the hill on which Tusculum is seated. This was the scene of the famous battle so fatal to the Latins, in B.C. 497. Mamillius, who commanded the Latin army, was killed by the hand of Titus Hermennius; Tarquinius Superbus himself, who, though now advanced in years, took part in the combat, was wounded, but immediately took refuge in the camp which he had lately held. The conflict was an irretrievable defeat (ib. 19, 20; Dionys. vi. 4, seq.).

After the peace which ensued, the Tusculans remained for a long while the faithful allies of Rome; an attachment which drew down on their territory the incursions of the Volsci and Aequi, in B.C. 461, 460. (Liv. iii. 7, 8.) In B.C. 436, when the Roman condottieri seized by the Sabine Ciminius Herdonius, the Tusculans gave a signal proof of their love and fidelity towards Rome. On the next morning after the arrival of the news, a large body of them marched to that city and assisted the Romans in recovering the captors; an act for which they received the public thanks of that people (ib. 18; Dionys. x. 16); and soon afterwards, Lucius Mamilius, in conjunction with the gift of Roman citizenship. (Liv. iv. 29.) In the following year the Romans had an opportunity of repaying the obligation. The Aequi had seized the citadel of Tusculum by a nocturnal assault. At that time, Fabius with a Roman army was encamped before Antium; but, on hearing of the misfortune of the Tusculans, he immediately took up his camp and flew to their assistance. The enterprise, however, was not of such easy execution as the expulsion of Herdonius, and several months were spent in combats in the neighbourhood of Tusculum. At length the Tusculans succeeded in recapturing their citadel by reducing the Aequi to a state of famine, whom they disarmed, and now, after compelling them to pay the ransom under the yoke. But as they were flying homewards the Roman consul overtook them on Mount Algidus, and slew them to a man. (ib. 23; Dionys. x. 20.)

In the following year, the Aequi, under the conduct of Gracchus, ravaged the Labican and Tusculan territories, and encamped on the Algidus with their booty. The Roman ambassador sent to express their reconciliation and contempt. Then Tit. Quinctius Cinquematus was chosen dictator, who defeated the Aequi, and caused them, with their commander Gracchus, to pass ignominiously under the yoke. (Liv. ib. 25-28.)

Algidus became the scene of a struggle between the Romans and Aequi on two or three subsequent occasions, as in B.C. 452 and 447. (ib. 31, 42.) It was the latter battle the Romans sustained a severe defeat, being obliged to abandon their camp and take refuge in Tusculum. After this, we do not again hear of the Tusculans till B.C. 416. At that period, having abandoned Lavinium, of having entered into a league with the Aequi, charged the Tusculans to keep a watch upon them. These suspicions were justified in the following year, when, as Labicans, in conjunction with the Aequi, ravaged the territory of Tusculum and encamped upon Algidus. The Roman army despatched against them in order to salvage the loss was lost of seeing the insolence among its chiefs. Many of these, however, together with the elite of the army, took refuge at Tusculum; and Q. Servilius Priscus, being chased dictator, changed the face of affairs in eight days, by routing the enemy and capturing Labicum. (ib. iv. 45-47.)

This steady friendship between Tusculum and Rome, marked for so many years by the strongest tokens of mutual goodwill, was at length interrupted by an occurrence which took place in B.C. 379. In that year the Tusculans, in conjunction with the Gabinians and Labicans, accused the Praenestes before the Roman senate of making inroads on their lands; but the senate gave no heed to their complaints. The Tusculans, however, to get redress, went to the Aequi, who promised to intervene. The Volsci, was surprised to find a number of Tusculans among the prisoners whom he had made, and, still more so when, on questioning them, he found that they had taken up arms by public consent. These prisoners were introduced before the Roman senate, in order to prove how the Tusculans had not given them the opportunity of having declared against Tusculum, and the conduct of it entrusted to Camillus. But the Tusculans would not accept this declaration of hostilities, and opposed the Roman arms in a manner that has scarcely been paralleled before or since. When Camillus entered their territory he found the peasants engaged in their usual avocations; provisions of all sorts were on tap, and the weaver's looms were standing open; and as the legions defiled through the streets in all the panoply of war, the citizens within, like the countrymen without, were seen intent upon their daily business, the schools reopened with the hum of pupils, and not the slightest trace of hostile preparation could be discerned. When he appeared before the senate in the Curia Hostilia, not only were the existing treaties with Tusculum confirmed, but the Roman franchise ab others was shortly afterwards bestowed upon it, a privilege at that time but rarely conferred.

It was this last circumstance, however, together with the undaunted fidelity towards Rome, that drew down upon the Tusculans the hatred of the Romans. The Aequi, who, in the year B.C. 374, having burnt Satricum, with the exception of the temple of Matuta, directed their arms against Tusculum. By an unexpected attack, they obtained possession of the city; but the inhabitants retired to the citadel with their wives and children, and defended themselves with desperate and obstinate resistance. An army was sent to their relief, and the Latins in turn became the besieged instead of the besiegers; for whilst the Romans encompassed the walls of the city, the Tusculans made sorties upon the enemy from the rear. In a short time the Romans took the town by assault and slew all the
TUSCULUM.

Latinis. (Ib. 33.) Servius Sulpicius and L. Quinctius, both military tribunes, were the Roman commanders on this occasion; and on some rare gold coins, still extant, of the former family, are seen on the obverse the heads of Castor and Pollux, deities peculiarly worshipped at Tusculum (Olb. Div. l. 48; cf. Fast. a. S. Ignatius), and on the reverse, the image of a city, with the letters TVSCVL on the gate.

From this period till the time of the great Latin war we have little record of Tusculum except the frustrated attempt of the Vetuliterni on its territory (Liv. iv. 36) and the horrible devastations committed on it by the Gauls, when in all likelihood the Tibrinenses, in n. c. 357. (Id. vii. 11.) After their long attachment to Rome we are totally at a loss to conjecture the motives of the Tusculans in joining the Latin cities against her. The war which ensued is marked by the well-known anecdote of Titus Manlius, who, being challenged by Genius Mettius, the commander of the Tuscan cavalry, and afterwards engaged against him on an equal footing, consented to the contrary; for which breach of military discipline he was put to death by his father. (Id. viii. 7.) The war ended with the complete subjugation of the Latins; and by the famous senatusconsultum regulating the settlement of Latinum, the Tusculans were treated with great indulgence. They had the right to be enrolled in the flouris of the city, and, against strict orders to the contrary, for which breach of military discipline he was put to death by his father. (Id. viii. 7.) The war ended with the complete subjugation of the Latins; and by the famous senatusconsultum regulating the settlement of Latinum, the Tusculans were treated with great indulgence. They had the right to be enrolled in the flouris of the city, and, against strict orders to the contrary, for which breach of military discipline he was put to death by his father. (Id. viii. 7.) The war ended with the complete subjugation of the Latins; and by the famous senatusconsultum regulating the settlement of Latinum, the Tusculans were treated with great indulgence. They had the right to be enrolled in the flouris of the city, and, against strict orders to the contrary, for which breach of military discipline he was put to death by his father. (Id. viii. 7.)

This settlement took place in b. c. 335. In 331, the Tusculans were accused by the tribune, M. Flavius, of having supplied the Vetuliterni and Privernates with the means of carrying on war against Rome. There does not appear to have been any foundation for this charge; but it may have been a mere calumny; nevertheless the Tusculans, with their wives and children, having put on mourning habits, went in a body to Rome, and implored the tribunes to acquit them of so odious an imputation.

This spectacle moved the compassion of the Romans, who, without further inquiry, acquitted them unanimously; with the exception of the tribe Flavina, Cornacina, and Feronia, and even this should have been surcharged and put to death, and the women and children sold, agreeably to the laws of war. This vote remained indestructibly imprinted on the memory of the Tusculans to the very latest period of the Roman Republic; and it was found that scarce one of the tribe Papiria, to which the Tusculans belonged, ever voted in favour of a candidate of the tribe Polla. (Ib. 37.)

Tusculum always remained a municipium, and some of its families were distinguished at Rome. (Id. vi. 21—26; Orell. Inscr. 775, 1368, 3048.) Among them may be mentioned the gens Manilia, the Porcia, which produced the two Cato, the Pulvis, Cornacina, Juvenia, Fontina, etc. (Cic. p. Planc. 8, 10. 14; Corn. Rep. Cost. 1; Val. Max. iii. 4. 6.)

Hannibal appears to have made an unsuccessful attempt upon, or perhaps rather a mere demonstration against, Tusculum in b. c. 212. (Liv. xxvi. 9; cf. Sil. It. xii. 534.) In the civil wars of Marius and Sulla, its territory seems to have been distributed by the latter. (Ant. de Colonias.) Its walls were also restored, as well as during the wars of Pompey. We have no notices of Tusculum under the Empire. After the war of Justinian and the inroads of the Lombards, Tusculum regained even more than its ancient splendour. For several centuries during the middle ages the counts of Tusculum were supreme in Rome, and could almost dispose of the papal chair. The ancient city remained entire till near the end of the 12th century. At that period there were constant wars between the Tusculans and Romans, the former of whom were supported by the emperor, his followers, and protected by the popes. According to Ermolaidus, archbishop of Salerno (apud Baromini, vol. xix. p. 340), the walls of Tusculum were razed in the pontificate of Alexander III. in the year 1168; but perhaps a more probable account by Richard de S. Germano (ap. Mercatoris, Script. l. vii. p. 972) describes the destruction of Tusculum by the permission of the German emperor in the year 1191.

Towards the end of the Republic and beginning of the Empire, Tusculum was one of the favourite resorts of the wealthy Romans. Strabo (v. p. 259) describes the hill on which it was built as adorned with many villas and plantations, especially on the side that looked towards Rome. But though the climate is salubrious and the air fine, it is by no means a city; it appears, like Tibur, to have been a favourite resort of the Roman poets, nor do they speak of it much in their verses. The Anio, with its falls, besides other natural beauties, lent a charm to Tibur which would have been sought in vain at Tusculum. Lucullus seems to have been one of the first who built a villa there, which seems to have been on the same scale, but with little arable land attached to it. (Plin. xviii. 7. a. 1.) His parks and gardens, however, which were adorned with aviaries and fishponds, extended to the Anio, a distance of several miles; whence he noted in the report of the censors as making more use of the brook than the plough. (Ib. and Var. de Re, at the i. 3. seq.; Columella, l. 4.) On the road towards Rome, in the Vigna Angelotti, is the ruin of a large circular landscaped, a 90 feet in diameter inside, and very much resembling the tomb of Cæcilia Metella on the Via Appia. It evidently belongs to the last period of the Republic; and Nibby (Ditorni, p. 344) is inclined to regard it as the sepulchre of Lucullus, mentioned by Plutarch (Vit. Lucull. p. 6.) and identified with a smaller mausoleum between Frascati and the Villa Rufinella. Besides the villa of Lucullus, we hear of those of Cato, of Cicero and his brother Quintus, of Marcus Brutus, of Q. Hortensius, of T. Anicius, of Balbus, of Caesar, of L. Crassus, of Q. Metellus, &c. It would now be vain to seek for the sites of most of these; though it may perhaps be conjectured that Cato's stood on the hill of the NE. of the town, which seems to have been called Mons Porcium, and still bears the name of Monte Porzio. So much interest, however, is attached to the villa of Cicero (Tusculanum), as the favourite retirement in which he probably composed his great portion of his philosophical works, especially the Disputationes which take their name from it, etc., that we shall here present the reader with the chief particulars that can be collected on the subject. Respecting the site of the villa there have been great disputes, one school of topographers seeking it at Grotta Ferrata, another at the Villa Rufinella. Both these places lie to the W. of Tusculum, but the latter nearer to it, and on an eminence, whilst Grotta Ferrata is in the plain. We have seen from Strabo that the Roman villas lay chiefly on the W. side of the town; and it will be found further on that Cicero's adjoined those of Lucullus and Gabinius, which were the most splendid and remarkable,
and must therefore have belonged to those noticed by Strabo. The scoliast on Horace (Epod. i. 30) describes Cicero's as being "ad latera superiores" of the Tusculum hill; and if this authority may be relied on, it disproves the claims of Grotta Farinata. The scoliast, however, may have been in favour of the W. side of the town, or Villa Rufelliana, where the hill has two ridges. At this spot some valuable remains were discovered in 1741, especially a beautiful mosaic, now in the Museo Pic. Clementino. The villa belonged originally to Sulla (Plut. xiii. 6. s. 6). It was, as we have said, close to that of Lucullus, from which, in neighbourly fashion, Cicero was accustomed to fetch books with his own hand. (De Fin. iii. 2.) It was likewise near that of the consul Gabinius (pro Domo. 24, post Red. 7), which also stood on the Tusculum hill (as Piso, 21), probably on the site of the Villa Palatium. In his oration pro Sextio (43), Cicero says that his own villa was a mere cottage in comparison with that of Gabinius, which was 'a palace.' (ib. iv. 2.) He complained of the mosaic that we learn from Cicero himself, his retirement must have been far from deficient in splendour. The money which he lavished on it and on his villa at Pompeii brought him deeply into debt. (Epis. ad Att. ii. 55.) He had, however, besides the mosaic, a mausoleum, about 3000 feet in length and varying in breadth from about 1000 to 800 feet. Thus it is represented in a triangular shape on the coins of the gens Sulpicia. See vestiges of the walls remain, especially on the S. and E. sides. Of these the ancient parts consist of large quadrangular pieces of local tufa, some ten feet square. The two flanks are separated by a pass with opus incertum, of the age of Sulla, and opus reticulatum. Including the arx, Tusculum was about 1 mile in circumference. Between the town and the citadel is a large quadrangular piece, 66 feet long by 67 1/2 broad, divided into two compartments, probably intended to contain the principal water-supply. The older part of the citadel is still nearly entire, as well as the steps on them for the purpose of communication. The town itself is built up, which corresponds to the town opposite the water-place. One of the theatres lies immediately near this cistern, and is more perfect than any in the vicinity of Rome. The access, indeed, is partly destroyed and covered with earth; but the undue rows of seats in the caves, of which there are still nearly entire, as well as the steps on them for the purpose of communication. The spectator faced the W., and thus enjoyed the magnificent prospect over the Alban valley and plains of Latium, with Rome and the sea in the distance. Abbeek (Mittel-Italische, p. 200) considers this theatre to belong to the early time of Augustus. W. Gell, on the other hand, presumes it to be earlier. (Topogr. of Rome, p. 429.)

But of all this magnificent scene a vestige remains, unless we may regard as such the ruins now called Scavioli di Cicerone, close to the ancient walls. These consist of a long corridor with eight chambers forming apparently the ground floor of an upper building, and if they belonged to the villa they were probably granaries, as there is not the least trace of decoration.

We will now proceed to consider the remains at Frascati. Strabo (v. p. 329) indicates where we must look for Frascati, when he describes it as situated on the high ridge connected with Mount Albanus, and serving to form with it the deep valley which stretches out towards Mount Algidaus. This ridge was known by the name of the Tusculum Colles. We have already seen that Tusculum was composed of two distinct parts, the town itself and the arx or citadel, which was isolated from it, and

seated on a higher point; so elevated, indeed, in fact their the Aequi had possession of, so when narrated, they could describe the Roman army filling out of the gates of Rome. (Dionys. B. 10.) It was indeed on the very spot, or rather in the vicinity of the very spot, that the great battle was fought, and appears to have been almost appalled only by a very steep ascent. According to Sir W. Gell (Topogr. of. p. 429) it is 2079 French feet above the level of the sea. For a few traces of the walls of the citadel remain, from which, and from the shape of the rock on which it stood, we may see that it formed an irregular quadrangle, about 2700 feet in circumference. The hill must have been a gate to the town, when the ascent is less steep; and there are also vestiges of another gate on the E. side, towards Le Mazer, and of a road which ran into the Via Latina. Over the rock are caves, which probably served as sepulchres. The city lay immediately east of the arx, on the W. side. Its form was as a square, or perhaps even a trapezium, about 3000 feet is kept and varying in breadth from about 1000 to 800 feet. Thus it is represented in a triangular shape on the coins of the gens Sulpicia. See vestiges of the walls remain, especially on the S. and E. sides. Of these the ancient parts consist of large quadrangular pieces of local tufa, some ten feet square. The two flanks are separated by a pass with opus incertum, of the age of Sulla, and opus reticulatum. Including the arx, Tusculum was about 1 mile in circumference. Between the town and the citadel is a large quadrangular piece, 66 feet long by 67 1/2 broad, divided into two compartments, probably intended to contain the principal water-supply. The spectators faced the W., and thus enjoyed the magnificent prospect over the Alban valley and plains of Latium, with Rome and the sea in the distance. Abbeek (Mittel-Italische, p. 200) considers this theatre to belong to the early time of Augustus. W. Gell, on the other hand, presumes it to be earlier. (Topogr. of Rome, p. 429.)

This edifice were discovered in 1818, by Leo Buonaparte, the beautiful bronze statue of Apollo and those of the two Trituluses. The last are on the Vatican, in the corridor of the Museo Chiaramonti. At the back of the structure is another theatre, with a column; and at its side two parallel walls, which bordered the street leading to the citadel. On the W. of the theatre is an ancient road in good preservation, leading to one of the gates of the city, where it is joined by another road. Close to the walls near the piscina is an ancien cistern, and at its side a small fountain with an inscription; a little further is a Roman milestone. Besides these objects, there are also remains of a columbarium set of an amphitheatre, but the latter is small and not of high antiquity. Many fragments of arches of an extremely ancient style are strewn about. Within the walls of the town, in what appears to have been the principal street, several inscriptions.
still remain, the chief of which is one on a kind of pedestal, recording that the object to which it belonged was sacred to Jupiter and Liberty. Other inscriptions found at Tusculum are preserved in the Villa Rufinella. One of them relates to M. Fulvius Nobilior, the conqueror of Aetolia; another to the poet Diphilus, mentioned by Cicero in his letters to Atticus.

Near the hermitage at Camaldoli was discovered in 1667 a very ancient tomb of the Furi, as recorded by Falandieri, in his Inscr. Athleticæs, p. 143, seq. It was cut in the rock, and in the middle of it was a sarcophagus, about 5 feet long, with a pediment-shaped cover. Round it were twelve urns placed in focus, or coffins. The inscriptions on these urns were in so ancient a character that it bore a great resemblance to the Etruscan and Palaestin. The form of the P resembled that in the sepulchral inscriptions of the Scipios, as well as that of the L. The diphthong OV was used for V, and P for F. The inscriptions on the urns related to the Furi, that is, on the sarcophagus to Luc. Turpilus. There was a Tusculum in this old town (according to the best Table De Jorio, sectio 2, it was a villæ sigillata, or of an elegant cornice of terra cotta, painted with various colours. (Nibby, Dintorni, iii. p. 360.)

We shall only add that the ager Tusculanus, though now but scantily supplied with water, formerly contributed to furnish Rome with that element by means of the Aqua Tepula and Aqua Virgo. (Front. Ag. 8, seq.)

TUSSCUM MARE. [TYRRHENIUM MARE.

TUTATI'IO, a place in Noricum of uncertain site (It. Ant. p. 277; Tab. Peut., where it is called Tutastio. (L. S.)

TUTHOA (Tavola), a river of western Arcadia, flowing to the Ladon, on the confines of Arcadia and Heraea. It is now called Lamadogia, and joins the Ladon opposite to the small village of Romeni. (Paus. viii. 25. § 12; Leake, Morea, vol. ii. p. 95, Peloponnesus, p. 223.)

TUTIA, a small stream in the neighbourhood of Rome, mentioned only by Livy and Silius Italicus, who were much in that district at the time of its devastation by Hannibal. When he was commencing his retreat from before the walls of Rome. (Liv. xxvi. 11; Sil. Ital. xiii. 5.) It places it 6 miles from the city, and it is probable that it was on the Salarian Way, by which Hannibal subsequently commenced his retreat; in this case it may probably be the stream now called the Patum de Comc, which crosses that road between Ponte Canario and Palatino and has been supposed by Gell and Nibby to be the Allia. [ALLIA.] Silius Italicus expressly tells us it was a very small stream, and little known to fame. The name is written Turia in many editions of that poet, but it appears that the best MSS. both of Silius and of Livy have the form Tutia. (E. H. B.)

TUTIA (Tuscia), a small town in the territory of the Edetani in Hispania Tarraconensis not far from Scro, the scene of a battle between Pompey and Sertorius (Plut. l. c.; Florus, iii. 22.) It is thought to be the modern Tusa. But perhaps the conjecture of Uberti (ii. pt. i. p. 413) is correct in that in both those passages we should read Turia. (T. H. D.)

TUTCUM. [EQUUS TUTCICUS.

TUTZIS (It. Anton. p. 162), a small fortified town in Aethiopia, situated 12 miles N. of Tachempos, upon the western side of the Nile. The ruins of Tutza are supposed to be near, and NW. of the present village of Gyra. (Belton, Travels, vol. i. p. 112.)

TYANA (v. Tousa; Eth. Tousas or Touiás), also called Thyna or Thiana, and originally Thoana, from Those, a Thracian king, who was believed to have pursued Orontes and Py Idealus thus far, and to have founded the town (Arrian, Percip. P. E. p. 6; Steph. B. z. c.). Report of Pontus, on a causeway of Semiramis; but it is certain that it was situated in Cappadocia at the foot of Mount Taurus, near the Cilician gates, and on a small tributary of the Lamos (Strab. xii. p. 537, xii. p. 587). It stood on the highroad to Cilicia and Syria at a distance of 300 stadia from Cydista, and 400 from the Lamos, and the best Table De Jorio, sectio 2, Masza (Strab. l. c.; Ptol. v. 6. § 18; comp. Plin. vi. 3; It. Ant. p. 145). Its situation on that road and close to so important a pass must have rendered Tyana a place of great consequence, both in a commercial and a military point of view. The plain around it, moreover, was extensive and fertile, and the whole district received its name from the tyrant, who gave it the name of Tyana (Touiás, Strab. l. c.). From its coins we learn that in the reign of Caracalla the city became a Roman colony; afterwards, having for a time belonged to the empire of Palmyra, it was conquered by Aurelian, in a. d. 272 (Vopisc. Aurel. 22, fol.). Valens raised it to the rank of the capital of Cappadocia Secunda (Basil. Magn. Epit. 74, 75; Hieroc. p. 700; Midit. Chrys.; Not. imp. 230). Its capture by the Turks is related by Cedrenus (p. 477). Tyana is celebrated in history as the native place of the famous impottor Apollonius, of whom we have a detailed biography by Philostratus. In the vicinity of the town there was a temple of Zeus on the borders of a lake in a marshy plain. The water of the lake itself was sacred to the god, and the temple was, sacred to Zeus, issued from it (Philost. Viz. Apoll. i. 4; Amm. Mar. xxiii. 6; Aristot. Mirt. Asac. 163.) This well was called Asmacheon, and from it Zeus himself was supposed Asmacheus. These details about the locality of Tyana have led in modern times to the discovery of the true site of the ancient city. It was formerly believed that Kara Hisar marked the site of Tyana; for in that district many ruins exist, and its inhabitants still maintain that their town once was the capital of Cappadocia. But this place is too far north to be identified with Tyana; and Hamilton (Researches, ii. p. 502, fol.) has shown most satisfactorily, what others had conjectured before him, that the true site of Tyana is at a place now called Kir Hisar, south-west of Nigdeh, and between this place and Erbekli. The ruins of Tyana are considerable, but the most conspicuous is an aqueduct of granite, extending seven or eight miles to the foot of the mountains. There are also many foundations of several large buildings, shafts, pillars, and one handsome column, all now covered by the remains of these ruins, the hot spring also still bubbles forth in a cold swamp or lake. (Leake, Asia Minor, 61; Eckel, iii. p. 195; Sestini, p. 60.) [L. S.]

TYBIACAE (Tivulcana, Pol. vi. 14. § 11), a
people of Scythia intra Ilmum, on the banks of the Euphrates. [T. H. D.]

TYDE. [Tyrus].

TYDE (Τύρος, Polyb. iv. 48), a town of Thrace, on the coast of the Euganea, where the Gauls established a seat of government (Βασιλεία), and which Reichard identifies with Kil踷. Steph. B. (p. 670) calls it Τύρας, and places it on the Esemenus. [J. B.]

TYLUS or TYRUS (Τύλος, Ptol. vii. 7 § 47; Τύρος, Strab. xvi. p. 765; Steph. B. a. e.), an island in the Persian Gulf, off the coast of Arabia. It has been already mentioned that according to some traditions, this island was the original seat of the Phoenicians, who named the city of Tyre after it. It lies in a bay enclosed on the coasts of the Mediterranean. [Phocaus, Ptol. vi. p. 433; and Torre Y. Ribera (Periplus Cretes, p. 324) adopt this suggestion of Eckhel, and place Tylus near the S. coast at the W. extremity of the island near the modern Μέλος-Kastelli. (Paslely, Travers, vol. i. p. 283.)

TYLUS or TYRUS (Τύλος, Ptol. vii. 7 § 47; Τύρος, Strab. xvi. p. 765; Steph. B. a. e.), an island in the Persian Gulf, off the coast of Arabia. It has been already mentioned that according to some traditions, this island was the original seat of the Phoenicians, who named the city of Tyre after it. It lies in a bay enclosed on the coasts of the Mediterranean. [Phocaus, Ptol. vi. p. 433; and Torre Y. Ribera (Periplus Cretes, p. 324) adopt this suggestion of Eckhel, and place Tylus near the S. coast at the W. extremity of the island near the modern Μέλος-Kastelli. (Paslely, Travers, vol. i. p. 283.)

TYLUS or TYRUS (Τύλος, Ptol. vii. 7 § 47; Τύρος, Strab. xvi. p. 765; Steph. B. a. e.), an island in the Persian Gulf, off the coast of Arabia. It has been already mentioned that according to some traditions, this island was the original seat of the Phoenicians, who named the city of Tyre after it. It lies in a bay enclosed on the coasts of the Mediterranean. [Phocaus, Ptol. vi. p. 433; and Torre Y. Ribera (Periplus Cretes, p. 324) adopt this suggestion of Eckhel, and place Tylus near the S. coast at the W. extremity of the island near the modern Μέλος-Kastelli. (Paslely, Travers, vol. i. p. 283.)

TYLUS or TYRUS (Τύλος, Ptol. vii. 7 § 47; Τύρος, Strab. xvi. p. 765; Steph. B. a. e.), an island in the Persian Gulf, off the coast of Arabia. It has been already mentioned that according to some traditions, this island was the original seat of the Phoenicians, who named the city of Tyre after it. It lies in a bay enclosed on the coasts of the Mediterranean. [Phocaus, Ptol. vi. p. 433; and Torre Y. Ribera (Periplus Cretes, p. 324) adopt this suggestion of Eckhel, and place Tylus near the S. coast at the W. extremity of the island near the modern Μέλος-Kastelli. (Paslely, Travers, vol. i. p. 283.)

TYMBAEA, TYMPHAEL. [Tymphæ].

TYMPE (Τυμφή), a mountain on the confines of Macedon, Epirus, and Thessaly, a part of the range of Pindus, which gave its name to the district TYPHAVIS (Τυμφαία), and to the people, the TYPHAVIS (Τυμφαίοι), as the name is stated in the ancient writers. As it is in the story of a man who killed the river Arachthus rose in Mt. Tymph, and that Anaximenes was a town of the Tymphaei (Strab. vii. pp. 325, 327), Mt. Tympe may be identified with the summits near Μέδουσαι, and the Tymphaei may be regarded as the inhabitants of the whole of the upper valley of the Penesus from Μέδουσαι to Καλαβρία. It is in the position of a mountainous district, that some editions of Strabo, Styme and Tymphaie, and the form Tymphæa also occurs in Arrian (i. 7); but the orthography without the s is perhaps to be preferred. The

TYMOPHÆA. [Tymphæa].

TYMOPHÆA (Τυμφαία), a town in Asia Minor, on the shore of the Aegean Sea, near the mouth of the river Aracatis. It was founded by the Arcadians and named after Tymphus, a son of Apollo, who was saved from the pirates by Heracles and Strabo, and was said to be an antecedent of the city of Athens. [Lycophr. 735; Diod. 10.; with Westling's note; Steph. B. a. e. Tauras. (Leca, Northern Greece, vol. i. p. 442, vol. ii. p. 275, 276.)

TYNDARIS.

Tyndaris expelled the Carthaginian garrison, and joined the Roman alliance. (Diod. xxiii. p. 505.) We hear but little of Tyndaris under the Roman generalship. We know that she was a flourishing and considerable city. Cicero calls it "nobilissima civitas" (Verr. iii. 43), and we learn from him that the inhabitants had displayed their zeal and fidelity towards the Romans upon many occasions. Among others they supplied naval forces to the armament of Scipio Africanus the Younger, a service for which he rewards them in this epitaph which may have been a memorial, or perhaps a famous saynoi or victory monument, which had been carried off by the Carthaginians, and which contained an object of great veneration in the city, till it was again carried off by the rapacious Veereas. (Cic. Verr. iv. 39—42, v. 47.)

Tyndaris was also one of seventeen cities which had been selected by the Roman senate, apparently as an honorary distinction, to contribute to certain offerings to the temple of Venus at Eryx. (Ib. v. 47; Zumpt, Ad loc.; Diod. iv. 83.) In other respects it had peculiar privileges, and was in the condition of an ordinary municipal town, with its own magistrates, local senate, &c., but was certainly in the time of Cicero one of the most considerable places in the island. It, however, suffered severely from the ravages of Veereus and the inhabitants, to revenge themselves on their oppressors publicly demolished his statue as soon as he had quitted the island. (Ib. ii. 66.)

Tyndaris again bore a considerable part in the war between Sextus Pompeius and Octavian (b. c. 36). It was one of the points occupied and fortified by the former, who prepared for a naval battle against the Sicilian straits, but was taken by Agrrippa after his naval victory at Mylae, and became one of his chief posts, from which he carried on offensive warfare against Pompey. (Appian, B. C. v. 105, 109, 116.) Subsequently to this we hear nothing more of Tyndaris in history; but there is no doubt of its having continued to subsist throughout the period of the Roman Empire. Pliny speaks of it as one of the places on the N. coast of Sicily which, in his time, still deserved the name of cities; and Pliny gives it the title of a Colonia. It is probable that it received a colony under Augustus, as we find it bearing in an inscription the titles of "Colonia Augusta Tyndaritana." (Strab. vi. p. 272; Plin. iii. 8. 14; Ptol. iv. 5.) It is said to have been in a most flourishing state, and mentions a great calamity which the city had sustained, when (he tells us) half of it was swallowed up by the sea, probably from an earthquake having caused the fall of part of the hill on which it stands, but we have no clue to the date of this event; (Plin. ii. 92. a. 94.) The Itineraries attest the existence of Tyndaris, apparently still as a considerable place, in the fourth century. (Itin. Ant. pp. 56, 83; Tab. Peut.)

The site of Tyndaris is now wholly deserted, but the name is retained by a church, which crowns the most elevated point of the hill on which the city formerly stood, and is still called the Madonna di Tyndaro. It is 535 feet above the sea-level, and overlooks the cliffs in the same manner as the famous "Two Gates of the city are also still distinctly to be traced. The chief monuments, of which the ruins are still extant within the circuit of the walls, are: the theatre, of which the remains are in imperfect condition, but sufficient to show that it was not of large size, and apparently of Roman construction, or at least, like that of Taurummenium, rebuilt in Roman times upon the Greek foundations; a large edifice with two handsome stone arches, commonly called a Gymnasium, but the real purpose of which is very difficult to determine; several other edifices of Roman times, particularly a temple, a basilica, a racter, a mosaic pavement, and some Roman tombs. (Serra di Falco, Antichità della Sicilia, vol. v. part vi.; Smyth's Sicily, p. 101; Hoeare's Classical Tour, vol. ii. p. 217, &c.) Numerous inscriptions, fragments of sculpture, and architectural decorations, as well as coins, vases, &c. have also been discovered on the site.

TYNDIS (Tyrreis, Ptol. vii. 1. § 16), a river of India intra Gangem, which flowed into the Bay of Bengal. There is great doubt which of two rivers, the Manades (Makhandis) or the Mesolus (Godber), represents this stream. According to Mannert it was the southern branch of the former river (v. 1. p. 179). But, on the whole, it is more likely that it is another name for that river, and that the inhabitants, to revenge themselves on their oppressors publicly demolished his statue as soon as he had quitted the island.

TYNIDRUMENSE OPP. [THYNDROMEN.]

TYNNA (Tyrna), a place in Catania or the southern part of Cappadocia, in the neighbourhood of Faustinopolis, is mentioned only by Ptolemy (v. 7. § 7).

TYPAEUS. [OPOLIA.]

TYPA'NEAE (Tynareia, Polyb. Steph. B.; Tyna'neia, Strab.; Tynandreia, Ptol.: Ekh. Tynandreia), a town of Triphylia in Elis, mentioned by Strabo along with Hypana. It was taken by Philip in the Social War. It was situated in the mountains in the interior of the country, but its exact site is uncertain. Leake supposes it to be represented by the ruins near Platiadon; but Bollay supposes these to be the remains of Aspy or Aspasia (another river), and that Typaneus stood on the hill of Malagrias. (Strab. viii. p. 543; Polyb. iv. 77—37; Steph. B. s. v.); Ptol. iii. 16. § 18; Leake, Morea, vol. ii. p. 52; Bollay, Recherches, fc. p. 133; Ross, Reisen im Peloponnes, p. 105; Curtius, Peloponnesos, vol. ii. p. 99.)

TYR'ACIA or TYRACINA (Tyrakwos, Steph. B.: Ekh. Tyraceinsia, Plin.), a city of Sicily, of which very little is known. It is noticed by Stephanus as "a small but flourishing city;" and the Tyracineses are mentioned by Pliny among the municipal communities of the interior of Sicily. (Steph. B. s. v.; Plin. iii. 8. 14.) It is doubtful whether the "Tyracina, princeps civitatis," mentioned by Cicero (Verr. iii. 56) is a citizen of Tyracia or one of Helorus who bore the proper name of Tyracines. In either case the name was probably derived from the city; but though the existence of this is clearly established, we are wholly without any clue to its position.

Several writers would identify the TRINACIA (Tyraxis) of Diodorus Siculus, and Tyndaris of Cicero, with that writer describes as having been one of the chief towns of the Siculi, until it was taken and destroyed by the Syracusans in B. C. 459, with the Tyracines of Stephanus and Tyracia of Pliny. Both names being otherwise unknown, the readings are in both cases uncertain; but Diodorus seems to represent Trinacria as having been totally destroyed, which would sufficiently account for its not being again
mentioned in history: and there is no other reason for assuming the two places to be identical. (Clever. Sicil. p. 388; Holsten. Not. ad Steph. B. s. v.; Wesseling, ad Dict. l. c.)

TYRRA (Τυρρα), a place in Cappadocia, on the south-west of Cappadocia, on the river Cydnus. (Ptol. v. 7 § 7.)

[ L. S.]

TYRAMBAE (Τυράμβαι), Ptol. v. 9 § 17, a people of Asiatic Sarmatia, whose chief city was Tyrambe (Τυράμβη, Ψηφ. έ. § 4, ακ.; Strab. xii. p. 494), in the neighbourhood of the river Rhobmites Mimas, the Tyrraen and Tzauron (P. T.).

TYRANGITAE (Τυραγγίται, Τυραγγίττοι, or Τυραγγίται, Strab. vii. p. 289, &c.; Ptol. iii. § 5 § 25), literally, the Getae of the Tyras, an immigrant tribe of European Sarmatia dwelling E. of the river Tyras, near the Harpal and Tagrigi, and, according to Ptolemy, the northern neighbours of Lower Moesia. Pliny (v. 12. s. 26) calls them, with more correct orthography, Tyrageitas, and represents them as dwelling on a large island in the Tyras. [T. H. D.]

TYRANNOBOAS (Τυραννοβόας), an emporion on the western coast of Bengal between Mandagara and Byszantium, noticed by the author of the Periplus (p. 50.). It cannot now be identified with any place. [V.]

TYRAS (Τύρας, Strab. ii. p. 107), one of the principal rivers of European Sarmatia. According to Herodotus (iv. 51) it rose in a large lake, whilst Ptolemy (iii. § 17, 8. § 1, &c.) places its sources in Mount Carpates, and Strabo (l. c.) says that they are unknown. The account of Herodotus, however, is correct, as it rises in a lake in Galicia. (Georgi, Περί Κόσορ, 1811) It flows in an easterly direction parallel with the Ister, and formed part of the boundary between Dacia and Sarmatia. It fell into the Pontus Euxinus to the NE. of the mouth of the Ister; the distance between them being, according to Strabo, 900 stadia (Strab. vii. p. 305, seq.), and, according to Plisty (iv. 12. s. 26), 130 miles (from the Pseudo亞牧). Scylaxus (Fr. 51) distinguishes it as of easy navigation, and abounding in fish. Ovid (ex Poet. iv. 10. 50) speaks of its rapid course. At a later period it obtained the name of Danastria or Danastus (Amm. Marc. xxxi. 3 § 3; Jornand. Get. 5; Const. Porphy. de Adm. Imp. 8), whence its modern name of Dniester (Naister), though the Turks still call it Twar. (Cf. Herod. iv. 11, 47, 85; Scylax, p. 29; Strabo l. p. 14; Mela, ii. 1. &c., also Schaffler, Sicim. Aist. l. c. p. 505.) The form Týras is sometimes found. (Steph. B. p. 671; Suid. s. v. Τύρας and Πηλαᾶς.)

[ T. H. D.]

TYRAS (Τύρας, Ptol. iii. 10 § 16), a town of European Sarmatia, situated at the mouth of the river just described. (Herod. iv. 81; Mela, ii. 1.) It was originally a Milesian colony (Scylax, Fr. 55; Anon. Perip. Fr. 7; Ptol. v. 9 § 19; although Ammianus Marcellinus (xxii. 8 § 41), apparently from the similarity of the name, which he writes "Tyros," ascribes its foundation to the Phoenicians from Tyre. Pliny (iv. 12. s. 26; cf. Steph. B. p. 671) identifies it with an older town named Ophiussa ("gelidus pollicitus," Strab. vi. l. c.). Ptolemy, however (l. c.), makes them two different towns; and places Ophiussa somewhat more N., and towards the interior. Scylax knows only Ophiussa, whilst the later writers, on the other hand, knew only Tyra. (Cf. Neumann, Die Hellem im Schotenlande, p. 537, seq.) It probably lay on the site of the present Alcarnon. (Clarke, Travels, ii. p. 124; Kohl, Reisen in Süd-wissenschaft, i. 167.) [T. H. D.]

TYRIS (Τύρις, Herod. ii. 44, &c.; Ed. Tyr. Tyrrius, the most celebrated and important town of this region, was probably identified by Theodor (Jos. xix. 29, &c.), which meant not by the Tyrians themselves Ser or Ser. (Ed. Euseb. xxvi.), which appellations are retained. For the initial letter τ was substituted in Greek, and from them adopted by the Romans, but the latter also used the form Sere, said to be derived from the Phoenician Ŝar, the purple fish; whence also the adjective Serē.
TYRUS.

1249

Arret. Truc. 2. 6, 58; Virg. Georg. ii. 506; Geill. ziv. 6, &c.) The former of these views is improbable. (Shaw, Travels, &c.) The question of the origin of Tyre has been nearly discussed, its commerce, manufactures, cities, and the principal events of its history narrated at some length (Phoenicia, &c.), and this article will therefore be more fully devoted to the topography, and to what may be called the natural history of the island. (xvi. p. 756) places Tyre at a distance of six from Sidon, which pretty nearly agrees with the distance of 24 miles assigned by the Itin. 1.49) and the Tab. Peutinger. It was built on an island and partly on the mainland. Venturing to fly (v. 18. a. 17) the island was an islet, or 24 miles in circumference, and was connected with the mainland by an isthmus by the mole or causeway constructed by Herodotus for the capture of the island by Diodor. Sic. xii. 60; 2) and Arrian (Anab. ii. 18) describes it as a small island; but it is now the site of 6 fathoms at its deepest part near the island. The isthmus must have been considered the fourth of ages. William of Tyre de it is the only city in a continent and was enclosed by a deep sea. (ib. xiii. 4;) the Phœ. Bogger makes it only 50 Terre Saintes, p. 41;) but at present it is a mile broad at its narrowest part, near the western side of the island. It lay on the mainland and not on an island; and this is erroneously stated by Escorial's picturesque description of Tyre by Nebuchadnessar, king of Babylon, the particular of which is not suitable to the island. Palaï-Tyrus extended along the coast from the river Leontes on the N., to the Dora. Ras-al-Asim on the S., a space of 7 miles; beyond which and 3 miles from Tyre, Strabo says (xvi. p. 758) that Palaï-Tyris 30 stadia, or 3 miles, distant from Tyre, probably considering the southern extremity of the island. Plyn (L. c.) assigns a circumference of miles to the two cities. The plain in which Tyrus was situated was one of the broadest and richest in Phœnicia. The fountain above mentioned afforded a constant supply of pure spring water, which was received into an octagon reservoir, in diameter and 18 feet deep. Into this reservoir the water gushed to 3 feet of the top, (journey, p. 67.) Hence it was distributed through the town by means of an aqueduct. Some of this has now disappeared (Robinson, i. 199.) and it is known to have been a battle of a great seaport and the more tranquil scenes of rural life in the fertile fields which lined the town, presented a striking scene. This is described with much fidelity in the Dict. of Nouns (40, 327, &c.) an island on which the new city was built is the A. rock of Mount Carmel, along this part of the coast. We have no means of determining the limits of the island city; but it must of course have arisen in the period between Nebuchadnessar and Alexander the Great. The alterations which the coast has undergone at this period render it difficult to determine the original size of the island. More and less (p. 66) estimated it at only 40 acres; but he was guided solely by his eye. The city was surrounded with a wall, the height of which, where it faced the mainland, was 150 feet. (Arrian, Anab. ii. 18.) The foundations of this wall, which must have marked the limits of the island as well as of the city, may still be discerned, but have not been accurately traced. The measurement of Plyn before cited must doubtless include the subsequent accretions, both natural and artificial. The smallness of the area was, however, compensated by the great height of the houses of Tyre, which were not bilt after the eastern fashion, but story upon story, like those of Athens, another Phœnician city (Mela, ii. 7), or like the insulae of Rome. (Strab. l. c.) Thus a much larger population might be accommodated than the area seems to promise. Beroul, calculating from the latter alone, estimates the inhabitants of insular Tyre at between 22,000 and 25,000. (Topogr. de Tyre, p. 17.) But the accounts of the capture of the island by the sea, should be collected that, from the maritime pursuits of the Tyrians, a large portion of them must have been constantly at sea. Moreover, part of the western side of the island is now submerged, to the extent of more than a mile; and that part of the island, which is now left by the sea is shown by the bases of columns which may still be discerned. These remains were much more considerable in the time of Benjamin of Tudela, in the latter part of the 12th century, who mentions that towers, markets, streets, and halls might be observed at the bottom of the sea (p. 62, ed. Asher.) Insular Tyre was much improved by king Hiram, who in this respect was the Augustus of the city. He added to it one of the islands lying to the N., by filling up the intervening space. This island, the outline of which can no longer be traced, previously contained a temple of Baal, or, according to the Greek way of speaking, of the Olympian Jupiter. (Joseph. ap. Apion, i. 17.) It was thus the port, as well as by substructions on the eastern side of the island, that Hiram was enabled to enlarge and beautify Tyre, and to form an extensive public place, which the Greeks called Eurychora. The artificial ground which Hiram formed for this purpose may still be traced by the loose rubbish of which it consists. The frequent earthquakes which Tyre has been visited (Sen. Q. N. ii. 26) have rendered it difficult to trace its ancient configuration; and alterations have been observed even since the recent one of 1837 (Kemrick, Phœnicians, p. 155, &c.)

The powerful navies of Tyre were received and sheltered in two roadsteads and two harbours, one on the N., the other on the S. side of the island. The southern, or Sidonian roadstead, so called because it looked towards Sidon (Arrian, ii. 20), was protected by the chain of small islands already mentioned. The harbour which adjoined it was formed by a natural inlet on the NE. side of the island. On the N., from which quarter alone it was exposed to the wind, it was rendered secure by two small islands, 100 feet apart, as shown in the annexed plan. Portions of these walls may still be traced. The eastern side
of the harbour was enclosed by two ledges of rock, with the assistance of walls, having a passage between them about 140 feet wide, which formed the mouth of the harbour. In case of need this entrance could be closed with a boom or chain. At present this harbour is almost choked with sand, and only a small basin, of about 40 yards in diameter, can be traced (Shaw, Travels, vol. ii. p. 30), but in the original state it was about 500 yards long, and from 230 to 240 yards wide. Part of the modern town of Sour or Sour, is built over its southern point, and only vessels of very shallow draught can enter.

The southern roadstead was called the Egyptian, from its lying towards that country, and is described by Strabo (i. c.) as unenclosed. If, however, the researches of Berton may be relied upon (Topogr. de Tyr, p. 14), a stupendous sea-wall, or breakwater, 35 feet thick, and running straight in a SW. direction, for a distance of 2 miles, may still be traced. The wall is said to be covered with 2 or 3 fathoms of water, whilst within it the depth is from 6 to 8 fathoms. Berton admits, however, that this wall has never been carefully examined; and if it had existed in ancient times, it is impossible to conceive how so stupendous a work should have escaped the notice of all the writers of antiquity. According to the same authority, the whole southern part of the island was occupied by a coast, or rock parapeted from the roadstead by a wall, the rest of which are still visible. This harbour, like the northern one, could be closed with a gate: Chariton (vii. 2. p. 126 Bis.) takes occasion to compare the security of Tyre to that of a house with bolted doors. At present, however, there is nothing to serve for a harbour, and even the roadstead is not secure in all winds. (Shaw, i. p. 30.)

We have already adverted to the siege sustained by Tyre at the hands of Shalmaneser, Nebuchadnezzar...
Tyrus.

That by Alexander was so remark-
sable a structure as the bridge of timber, then a celebrated work of skill and ingenuity, had so much influence on the topography of the country that they were collected from the narra-
tions of artists, by Diodoros (Rer. Sic.

Tyre, the height and number of its walls, and the command which it 3 of the sea, seemed to render it impregnable; and so the Tyrians, when summoned by Alexander, prepared for an obstinate resistance. For the Tyrians had rehearsed to the town that how of overcoming the difficulties presented to them, by the sity of Tyre, was to connect it with an island by means of a mole. The materials a s structure were at hand in abundance, and was surrounded by a wall of stone, the bridges of the mole, now very nearly approached the city; others were placed on board large vessels, in order to batter the walls on other sides. Various were the devices resorted to by the Tyrians to frustrate these attempts. They cut the cables of the vessels bearing the battering rams, and thus sent them adrift; but this mode of defence was met by the use of iron mooring chains. To check the blow of the battering engines, leather bags filled with sea- weed were suspended from the walls, which, as soon as they came into contact with the ships, were set on fire, burning the vessels. The ships were filled with soft materials, which being set in rapid motion, either averted or intercepted the missiles hurled by the Macedonians. A second wall was commenced within the first. On the other hand, the Macedonians, having now carried the mole as far as the island, erected towers upon it equal in height to the walls of the town, from which the missiles were projected towards the battlements, in order to take the city by escalade. Yet, after all the labour bestowed upon the mole, Tyre was not captured by means of it. The Tyrians annoyed the soldiers who manned the towers by throwing out grappling hooks attached to lines, and thus dragging them down. Nets were employed to entangle the hands of the assailants; masses of red-hot stones were hurled amongst them, and quantities of heated sand, which, getting between the interstices of the armour, caused intolerable pain. An attempted assault from the bridges of the towers was repulsed, and does not appear to have been renewed. But a breach was made in the walls by battering rams fixed on vessels, and whilst this was assaulted by the forces of the Macedonians, a great storm arose and carried the whole of the work which had been thus done.

struck terror into the Tyrians, who now confined themselves to defensive measures. They sent away the old men, women, and children to Carthage, and closed the mouths of their harbours with a line of biremes. It is unnecessary to recount all the incidents which followed, and we will therefore be brief in ourselves to the most important. Alexander had caused a number of new machines to be prepared, under the direction of the ablest engineers of Phoe-

nicians and Cyprus. Some of these were planted on the mole, which now very nearly approached the city; others were placed on board large vessels, in order to batter the walls on other sides. Various were the devices resorted to by the Tyrians to frustrate these attempts. They cut the cables of the vessels bearing the battering rams, and thus sent them adrift; but this mode of defence was met by the use of iron mooring chains. To check the blow of the battering engines, leather bags filled with sea- weed were suspended from the walls, which, as soon as they came into contact with the ships, were set on fire, burning the vessels. The ships were filled with soft materials, which being set in rapid motion, either averted or intercepted the missiles hurled by the Macedonians. A second wall was commenced within the first. On the other hand, the Macedonians, having now carried the mole as far as the island, erected towers upon it equal in height to the walls of the town, from which the missiles were projected towards the battlements, in order to take the city by escalade. Yet, after all the labour bestowed upon the mole, Tyre was not captured by means of it. The Tyrians annoyed the soldiers who manned the towers by throwing out grappling hooks attached to lines, and thus dragging them down. Nets were employed to entangle the hands of the assailants; masses of red-hot stones were hurled amongst them, and quantities of heated sand, which, getting between the interstices of the armour, caused intolerable pain. An attempted assault from the bridges of the towers was repulsed, and does not appear to have been renewed. But a breach was made in the walls by battering rams fixed on vessels, and whilst this was assaulted by the forces of the Macedonians, a great storm arose and carried the whole of the work which had been thus done.

s misfortune, which would have dashed the of an ordinary man, only incited Alexander to his efforts with greater vigour and on a plan. He ordered a new mole to be con- structed, broader than the former one; and in order to the danger of destruction by the waves, he it to incline towards the SW, and thus to the channel diagonally, instead of in a straight At the same time he collected a large fleet from S, whither he went in person, from Silius, Maitius, the clear sea; for Syracuse was already in the hands of Alexander, and made an incursion into Colesyria, and d away the Arabs who annoyed his workmen in cutting timber in Antilibanus. When he returned to Tyre with his fleet, which he had left Siden, the new mole had already made great progress. It was formed of four tree with their roots covered with a mass of stones, which were heaped. The Tyrian divers, indeed, times succeeded in loosening the structure caving out the trees; but, in spite of these the work proceeded steadily towards com-

For the coins of Tyre see Eckhel, Doct. Num. 4. 1.
TYSANUSA.

TYSANUSA, a port on the coast of Caria, on the bay of Schoenus, and a little to the east of Cape Passidium (Pomp. Mela, i. 16). Pliny (v. 29) mentions Tysanusa as a town in the same neighbourhood.

[1. S.]

TYSSIA. [TYSANUS.

TZURULUM (Τζουρουλομ, Procop. B. Goth. iii. 38); Anna Comn. vii. p. 215, x. p. 278; Theophyl. vi. 5; in Geog. Rav. iv. 6, and Tab. Pent., Suralum and Syrrallum; and in H. Lact. pp. 183, 230, Israilum, but in p. 332, Tiriallum; and in H. Tier. p. 560, Timiurallum), a strong town on a hill in the S.E. of Thrace, not far from Perinthus, on the road from that city to Hadrianopolis. It has retained its name with little change to the present day, being the modern Tokorla or Tokorla.

[3. J. R.]

U. V.

VABAR, a river of Mauretania Cæsariensis, which fell into the sea a little to the W. of the Sald. Ptolemy (iv. 2. § 9) mentions it under the name of Obasap as if it had been a town; and Maffei (Musa Ven. p. 463) thought that he had discovered such a place in the space of Africa, in an ancient inscription (cf. Ogrelli, Itiner. ii. 339). In Pliny (v. 2. a. 1) and Mela (i. 6) the name is erroneously written Nabar. It is probably the present Sbaburb. [T. H. D.]

VACALUS. [BATAVI.

VACCA. 1. (Sall. J. 29, &c.) or VAGA (Sill. It. iii. 259; Oedipus, Ptol. iv. 3. § 28; Bcsy, Procop. de Aed. vi. 3). an important town and place of considerable commerce in the interior of Numidia, lying a long day's journey SW. of Utica. Pliny (v. 4) calls it Vagnena Oppidum. It was destroyed by Metellus (Sall. J. 69); but afterwards restored and inhabited by the Roman. Justinian surrounded it with a wall, and named it Theodoria, in honour of his consort. (Procop. l. c.; cf. Strab. xvii. p. 531; Sall. J. 47, 68; Plut. Mar. 8. p. 403.) Now Bagnak (Bagia, Bagga, Bedgga) in Tunis, on the borders of Algiers. (Cf. Shaw, Trav. Scz., i. p. 183.) Vaga is mentioned by the Geogr. Nub. (Clem. iii. 1. p. 88) under the name of Bagia, and by Leo Afric. (p. 406, Lorsbach) under that of Reggia, as a place of considerable commerce.

2. A town in Byzacium in Africa Proper, lying to the S. of Bosphum (Hirt. B. Afr. 74). This is probably the "allud Vag恩a oppidum" of Pliny (l. c.).

[V. E.]

VACCARI (Orosianus, Hist. ii. 5. § 56) reports that the important people in the interior of Hispania Tarraconensis, bounded on the W. by the Astures, at the X by the Cantabri, on the E. by the Celtiberi (to whom Appian, Hist. 51, attributes them), and on the S. by the Vettones and the river Duero. Their three districts were Vagrianus (Palencia) and Intercisca. According to Hesych (v. 34) they yearly divided their land for fire among themselves, and regarded the share as a common property, so that whoever kept his part for himself was capitaly punished. (GR. Th. xxvxi. 31, xi. 47; Polib. iii. 14; Strab. iii. p. 872; Plin. iii. 3. a. 4; Plut. Scz. 21.) (T. E. B.]

VACOMAGI (Orosianus, Ptol. ii. 3. § 14) was a people in Britannia, near the T autor, ambushed by the Romans. Cassius (p. 137) refers them on the borders of Loop Lamond. (T. E. B.) is said to have been a town of four acres. (T. R. S.]

VACUA (Orosianus, Strab. iii. p. 135; Orosianus, Ptol. ii. 5. § 4), a river in Lusitania, which was the ocean between the Duero and Minho in the neighbourhood of Talavera. Xar. (p. 22. a. 35) calls it Vacua. The present Veixa (T. E. B.]

VACUATAE (Orosianus; Baselian, Ptol. vi. 6. § 10), a people in the S. of Mauretania Tarraconensis, extending as far as the Little Atlas (T. R. E.]

VADA, a place on or near the Ebro. The name of Tacitus (Hist. iii. 51) in his history of the war of Civilis speaks of Vada with respect to his marching with his troops in four divisions, Arranc, lavadurnum, Grinnae, and Vada. The story shows that Grinnae and Vada were south or on the south side of the stream which Tacitus calls the Euso [Grinnae].

[V. E.]

VADA SABATANA (Catharinae Obel, Addasen, Ptol.; Vado), a town and port on the coast of Liguria, about 30 miles W. of Genoa. It was situated on a bay which afforded one of the best roadsteads along this line of coast, and seems to have been in consequence much frequented by the Greek fleets. In B.C. 43 it was the first port of M. Antonius hailed after his defeat at Actium, and the most convenient to which he could have had a considerable force under his command (cf. Fam. xi. 10, 13.) D. Brutus, in his letter to Cicero, speaks of it as "inter Apenninum et Alpium phrae," which obviously refers to the notion contained that the town was the point of the commonage between the two chains of mountains, a notion also by Strabo (iv. p. 209). A similar notion occurs in the Maritime itinerary (p. 509). Some desire to arisere with regard to its precise position, considering the name of Vado would seem to be obviously derived from it; but that of Sabatana or Sabatiae, on the other hand, is apparently connected with that of Semana.
town with a small but secure port about 4 miles N. of Pado. Livy indeed mentions Savo (unoubtedly the same with Saccis, a celebrated town of the Ligurians, where Mago established himself during the Second Punic War (Liv. xxviii. 46); but the name does not occur again in any writer, and hence Olivarius supposed that this was the place afterwards called Sabbata. There seems, however, no doubt that Sabbata or Sabatia, Vada Sabbatia, or Vado Sabatia (as it is written by Cicero), are all only different forms of the same name, and that the Roman town of Vada was situated on, or very near, the same site as the present Vado, a long straggling fishing village, the bay of which still affords an excellent roadstead. The distinctive epithet of Sabbata or Sabatia was evidently derived from its proximity to the original Ligurian town of Savo. [E. H. B.]

VADAVERO, a mountain near Bibilis in the territory of the Celtiberi, in Hispania Tarraconensis. It appears to be mentioned only by Martial (i. 50. 6), who characterizes it by the epithet of "sacred," and adverts to its rugged character. [T. H. D.]

VADIA. [Vol. v. 13605.]

VADICASSII (Obladucctarioi), a people of Gallia Lugdunensis, whom Plutarch (ii. 8. § 16) places on the borders of Belgica, and next to the Medes. He assigns to the Vadicsi a city Noosnanum. D'Anville concludes that following Plutarch's data we may place his Vadicsi in Vadois, which is between Mecas and Sciosas. He remarks that Vadoi is Vedavos, a name which resembles Vedena, the supposed seat of the Vandens in the later acts. Other geographers have different opinions. In many of the editions of Pliny (iv. 18) we find enumerated "Andegavi, Vedacases, Vadociasses, Vedeli;" but only one MS. has "Vadiasses," and the rest have Bodociasses or Bodicasses, which we must take to be the true reading, and they seem to be the same as the Badocasses. [D'Anville. Notice, &c.; Uckt, Galliaca.]

VADIMONIS LACUS (Gr. Τοῦδιομο ψαυτή, Pol.) : Lagogetto di Bassano), a small lake of Etruria, between the Cimbric hills and the Tiber, celebrated in history as the scene of two successive defeats of the combined Etruscan forces by the Romans. In the first of these battles, which was fought in a. c. 509 B.C., the enemy was defeated with peculiar solemnity (lege sacra); but though they fought with the utmost valour and obstinacy, they sustained so severe a defeat at the hands of the Roman Consul Q. Fabius Maximus, that, as Livy remarks, this disastrous day first broke the power of Etruria (Liv. ix. 39). The second battle was fought near 30 years later (a. c. 283), in which the allied forces of the Etruscans and Gauls were totally defeated by the consuls P. Cornelius Dolabella. (Polyb. ii. 20 ; Enrop. ii. 10 ; Flor. i. 13.) But though thus celeberated in history, the Vadimonian lake is a very thriving sheet of water, in fact, an mere pool or stagnant pond, now almost overgrown with reeds and bulrushes. It was doubtless more extensive in ancient times, resembling, though it could never have been of any importance, and scarcely deserves the name of a lake. But it is remarkable that the younger Pliny in one of his epistles describes it as a circular basin abounding in floating islands, which have now all disappeared, and probably have contributed to fill up the ancient basin. Its waters are whitish and highly sulphureous, resembling, in this respect, the Aqne Albaeae near Tiber, where the phenomenon of floating islands still occasionally occurs. (Plin. Ep. viii. 20.) It enjoyed the reputation, probably on account of this peculiar character, of being a sacred lake. But the apparent singularity of the scene of decisive conflicts is sufficiently explained by its situation just in a natural pass between the Tiber and the wooded heights of the Cimbinian forest, which (as observed by Mr. Dennis) must always have constituted a natural path into the plains of Central Etruria. The lake itself, which is now called the Laguna di Bassano and its basin written by Cicero), are all only different forms of the same name, and that the Roman town of Vada was situated on, or very near, the same site as the present Vado, a long straggling fishing village, the bay of which still affords an excellent roadstead. The distinctive epithet of Sabbata or Sabatia was evidently derived from its proximity to the original Ligurian town of Savo. [E. H. B.]

VALE, a town of the Cantil in Britannia Romana (Not. Insup.) [T. H. D.]

VAGA, a town of the Cantil in Britannia Romana (Not. Insup.) [T. H. D.]

VAGEDRUSA, the name of a river in Sicily, mentioned by Silius Italicus (xv. 229), according to the old editions of that author; but there can be no doubt that the true reading is that restored by Ruperti, "vage Chrysa," and that the river Chrysa is the one meant. (Ruperti, ad loc.) [E. H. B.]

VAGIENNI (Vagieno), a town of the Ligurians, which inhabited the region N. of the Marsicano Alps, and S. of the territory of the Taurini. According to Pliny they extended as far to the W. as the Mons Vesulus or Monte Vico, in the main chain of the Alps (Plin. iii. 16. a. 20), while their chief town or capital under the Roman rule, called Augusta Vagiennorum, was situated at Bene, between the rivers Stura and Tagliamento, so that they may have occupied an extensive territory. But it seems impossible to receive as correct the statement of Velius (l. 15) that the Roman colony of Eporedia (Itore) was included within their limits. [Ephemerid.] It is singular that Pliny more than once speaks of them as being descended from the Catuviges, while at the same time he distinctly calls them a Ligurian tribe, and the Catuviges are commonly reckoned a Gaulish one. It seems probable, however, that many of the races which inhabited the mountain valleys of the Alps were of Ligurian origin; and thus the Catuviges and Segnusi may very possibly have been a Ligurian stock like their neighbours the Taurini, though subsequently coming under Roman rule. We have no account of the period at which the Vagienni were reduced under the Roman yoke, and their name is not found in history as an independent tribe. But Pliny notices them as one of the Ligurian tribes still existing in his time, and their chief town, Augusta, seems to have been a flourishing place under the Roman Empire. Their name is sometimes written Bagieni (Orell. Inscr. 76), and is found in the Tabula under the corrupt form Bagienni. (Tab. Pent.) [E. H. B.]

VAGNIACAE, a town of the Cantil in Britannia Romana, between Noviomagus and Durobrivae. Camden (p. 226) identifies it with Wadsstone, Horsey (p. 424), with more probability, as Wroxham. Others have sought it near Wrothfield, and in Wrotham. [T. H. D.]

VAGORITUM (Ovagorot) [A. V.]

VAHALIS. [Batavi; Rhenus.]

VALCUM, a place near the confines of Upper and Lower Pannonia, not far from Lake Peixo (Tit. Ant. p. 298), but its exact site is uncertain. [E. H. B.]

VALDASUS, a southern tributary of the Savus, flowing from the mountains of Illyricum, and join-
VALENTIA.

VALENTIA, in Bruttium. [Ital.]

VALEPOSTA or VALEBORGIA, a town in the Celtiberi in Hispamia Tarraconensis, as its name shows, nevertheless, a Roman town. [Ital. 477] Variously identified with Vele e Menas Valvalbergo.

VALERIA, the name of the SE. part of Lusitania, Panonia, which was constituted as a new province by the Emperor Galerius, in which he, in honour of his wife. [Aur. V. 47: 6].

VALENCIA (Odeceixe), Ptol. ii. 6. § 62, a considerable town of the Edetani in Hispamia Tarraconensis, situated on the river Turia, at a distance of 3 miles from its mouth, and on the road from Cartagena Nova to Castulo. [Ptol. iii. 3. a. 4; Vit. Sepr. p. 18; Isid. Ant. p. 428]. Ptolemy (L.c.) erroneously attributes it to the Costetani. It became at a later period a Roman colony (Ptol. l.c.), in which according the account Junius Brutus settled the soldiers of Viriathus. [Liv. Epit. iv. Pompey destroyed it. [Epit. Pompe. op. Sallust. ed. Corio, p. 965; cf. Ptol. Pompe. 18]. It must, however, have been restored soon afterwards, since Mela mentions it as being still an important place (i. 6), and coins of it of a late period are preserved. [Cf. Flores, Med. ii. 610, iii. 125; Mioenel, l. 55, Suppl. i. p. 110; Servini, p. 209; Eckel, i. 60]. The town still bears the same name, but has few antiquities to show. [It. D.]

COIN OF VALENTIA IN SPAIN.

VALENTIA (Odeceixe), in Galla Narbonensis, a colony in the territory of the Caviari, as Pliny says (iii. 4); but D'Anville proposes to alter the meaning of this passage of Pliny by placing a full stop between "Caviari" and "Valencia." However, Pliny identifies "Valencia" was not in the country of the Caviari, but in the territory of the Segallani, as Ptolemy (ii. 10. § 12) says, who calls it "colonia." Valencia is a town on the east bank of the Rhone, a few miles below the junction of the Jière. In the middle ages it was the capital of the Valentins, and in the fifteenth century it became the seat of a university. [C. L.]

VALENTUM ROMANUM. Under this name propose to give a short account of the research work constructed by the Romans across a tract from near the mouth of the Pyrenees on the E. to the Rhone, and of which remains still exist. The history of the remains of the fortifications is involved in a deal of obscurity, and very different opinions have been entertained respecting its authors; and the Latin writers nor the inscriptions in some among the ruins of the walls and its suburbs are sufficient to settle the disputed points; they suggest conjectures more or less plausible.
VALLUM ROMANUM.

Origin of the barrier may have been the stationary camps which Agricola (A.D. 79) was to erect in Britain (Tac. Agr. 20); but it was Tacitus who gives us some measure of this is that it is quite impossible to found any connection between the construction of the wall and the visit of Agricola to Britain, where he determined on the boundary of the Roman Empire as to the S. of the most N. conquests of Agricola. He chose this boundary wall as it coincides with the Tyne, which flows almost due E. and nearly parallel to the 55th N. lat., for in the Roman province of Britain, the island of the Tyne is separated from that of the other branch of the Eden, by the N. extremity of the Tyne, into the river Eden, which separation is maintained by the river Tyne being divided from the Eden by the river Tyne.

Vallum Romanum. 1255

The common opinion, therefore, that Agricola commenced the defensive line, Hadrian strengthened it, and Severus completed it, appears to be probable in itself, and is supported by the little that we find upon the subject in the clasical writers. If we may assume that the words Saurus and Vallum were used by Suetonius and Eutropius in their strict significations, it would seem that the stone wall was the work of Hadrian, the earthen rampart of Severus. That some portion of the barrier was executed under the direction of the latter, is rendered still more probable by the fact that it is called the wall external to Victor Severus, or Severus, as Camden states. It has been designated by various names in later times; as the Picts' Wall, the Third Wall, the Keep Wall; but is now generally called the Roman Wall.

The following description is taken almost entirely from Mr. Bruce's excellent work, mentioned at the end of this article.

The barrier consists of three parts: (i.) a stone wall or Saurus, strengthened by a ditch on its northern side; (ii.) an earthen wall or Vallum, south of the stone wall; (iii.) stations, castles, watchtowers, and roads: these lie for the most part between the stone wall and the earthen rampart.

The whole of the country divided from the one side of the island to the other, in a nearly straight line, and comparatively close to one another. The wall and rampart are generally within 60 or 70 yards of each other, though the distance of course varies according to the nature of the country. Sometimes they are so close as barely to admit of the passage of the military way between them; while in one or two instances they are upwards of half a mile apart. It is in the high grounds of the central region that they are most widely separated. Here the wall is carried over the highest ridges, while the rampart runs along the adjacent valley. Both works, however, are so arranged as to afford each other the greatest amount of support which the nature of the country allows.

The stone wall extends from the river Tyne to Bowness on the Solway, a distance which Horsley estimates at 88 miles 3 furlongs, a measurement which almost exactly coincides with that of General Roy, who gives the length of the wall at 88 miles. The Vallum falls short of this length by about 3 miles at each end, terminating at Newcastle on the E. side, and at Dumbarton on the W. side.

For 19 miles out of Newcastle, the present high-road to Carlisle runs upon the foundations of the wall, which pursues a straight course wherever it is at all possible, and is never curved, but always bends at an angle.

In no part is the wall perfect, so that it is difficult to ascertain what its original height may have been. Bede, whose account was in the highest degree trustworthy, says that the eastern extremity, and who is the earliest authority respecting its dimensions, states that in his time it was 8 feet thick and 12 high. Sir Christ. Ridley, writing in 1573, describes it as 3 yards broad, and in some places 7 yards high. Samuel Eriulesticke, a well-known antiquary, visited the wall in 1674, when he ascertained its height to be 15 feet, and its width 16 feet. Camden, who saw the wall in 1599, found a part of it on a hill, near Carvorum, to be 15 feet high and 9 broad. Allowing for a battlement, which would probably soon be destroyed, we may conclude that the average height was from 18 to 19 feet. The thickness varies from 6 to 9 feet.
VALLUM ROMANUM.

The wall was everywhere accompanied on its northern side by a broad and deep fossæ, which may still be traced, with trifling interruptions, from sea to sea, even where the wall has quite disappeared. It traverses indifferently alluvial soil and rocks of sandstone, limestone, and basalt. Thus, on Topper Moor, hundreds of blocks of these stones lay just as they were lifted out of the fossæ. East of Hadham on the Wall, the fossæ is 84 feet wide at the top, 14 at the bottom, and about 9 deep. In some places it is 40 feet wide at the top, and in others 20 feet deep.

Hodgson, in his History of Northumberland (iii. p. 276), states a fact curious if true: "A little W. of Peggles, distant 3 ½ miles, a track of the wall, taken out of the fossæ lies spread abroad to the N. in lines, just as the workmen wheeled it out and left it. The tracks of their barrows, with a slight mound on each side, remain unaltered in form." It is scarcely credible, however, that slight elevations of earth, and superficial traces in it, should, for more than a thousand years, have successfully resisted the constant operation of the natural agencies which are sufficient to disintegrate the hardest rocks.

The Vallum, or earth wall, is uniformly S. of the stone wall. It consists of three ramparts and a fossæ. One rampart is close to the S. edge of the ditch. Of the other two, which are considerably larger, one is situated N., the other S. of the ditch, at the distance of about 24 feet from it. These larger ramparts are even now, in some places, 6 or 7 feet high. They are composed of earth, in which masses of stone are often imbedded, for the sake of which they are sometimes quarried. The fosse of the vallum was probably smaller than that of the murus.

No outlets through the 55 lines of fortification have been discovered; so that the gateways of the stations appear to have originally been the only means of communication with the country.

At distances averaging nearly 4 miles, stationary camps were erected along the line. Some of these, though connected with the wall, were evidently built before it.

The stations are four-sided and nearly square, but somewhat rounded at the corners, and contain an area averaging from 3 to 6 acres, though some of them are considerably larger. A stone wall, about 5 feet thick, encloses them, and was probably in every instance strengthened by a fosse and one or more earthen ramparts. The stations usually stand upon ground with a southern inclination.

The great wall either fails in with the N. wall of the stations, or else usually comes up to the N. cheek of their E. and W. gateways. The vallum in like manner generally approaches close to the S. wall of the stations, or comes up to the S. side of the E. and W. portals. At least three of the stations, however, are quite detached from both lines of fortification, being connected with the others by a road constructed of flints, and may have been erected by Agricola.

Narrow streets intersecting one another at right angles traverse the interior of the stations; and abundant ruins outside the walls indicate that extensive suburbs were required for the accommodation of those connected with the soldiers stationed in the camps. The stations were evidently constructed with exclusive reference to defence; and hence no traces of tessellated pavements or other indications of luxury and refinement have been discovered in the mural region.

According to Horsley, there were 18 stations on the line of the wall, besides some in its immediate vicinity; but Hodgson reduces the number to 17, being that in one instance Horsley mistook an annexary encampment for a station.

In ascertaining the number and name of the stations, our principal literary authority is the Digest Imperialis, supposed to have been compiled under Emperor Constantine the younger. The 69th section of this document contains a list of the prefects and tribunes under the Duke of Britain; the partition relating to the wall is headed, "Iam per Regnam Walliam," and gives the names of 23 stations, evidently arranged in order from E. to W. The heading, however, necessarily implies, not, as it seems sometimes has been interpreted, that all the stations were actually a line of the wall, but that they were along some parallel to, or at no great distance from it. It is clear, therefore, that as remains of stations extend to the N. and to the S. of the wall, as we actually on its line, nothing but the remains themselves can enable us to name the stations with certainty.

Now the first 12 stations mentioned in this list have been accurately identified by means of sections found in the ruins of the stations. We may here subjoin a list, with the ancient and modern names taken chiefly from the plan referred to:—

<table>
<thead>
<tr>
<th>Station</th>
<th>Modern Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>Segedunum</td>
<td>Wallsend</td>
</tr>
<tr>
<td>Portus Adiutrix</td>
<td>Newcastle</td>
</tr>
<tr>
<td>Catterick</td>
<td>Barnard Castle</td>
</tr>
<tr>
<td>Vindolena</td>
<td>Chester-le-Street</td>
</tr>
<tr>
<td>Hadrian's Castle</td>
<td>Arbeia</td>
</tr>
<tr>
<td>Chesters</td>
<td>Chester-le-Street</td>
</tr>
<tr>
<td>Corbridge</td>
<td>Corbridge</td>
</tr>
<tr>
<td>Ambleside</td>
<td>Wallsend</td>
</tr>
</tbody>
</table>

All these are on the actual line of the wall.

Vindolana and Magna, which are a little to the W. of Ambleside, give no evidence having been discovered to identify any of the stations; but in the general antiquities which enabled us to do so have been destroyed; the pears that the country people, even quite regarded stones bearing inscriptions as "calling them "witch-stones," the evil which was to be expiated by pouring red powder. Besides this, stone is scarce in the part of the country; and hence the materials of the wall, and stations have been extensively employed in construction of dikes and other enclosures in the neighbourhood.

It appears from the plan already referred to, that the stations at the places now called Corbridge, Stanwick, Burnhope, and Egremont are, the first a little to the S., all the rest to the W. of the wall.

Of the remaining eleven stations mentioned:

Notitia, the plan identifies Alnwick with Wetherbury, a little W. of the village of Wetherbury; Petestane, he thinks, is probably the name of Cambock Fort.

It is possible that something may yet be elucidated which is still obscure in connection with the most interesting monuments of Roman Britain.

The Duke of Northumberland had, in 1858,
VALVA.

directions to competent persons to make an accurate and complete survey of the whole line of the barrier, from sea to sea. Whether any results of this investigation have yet been published, we are not aware.

Of the identified stations the most extensive and important are Vindobola, Cilurnum, Porecilia, and Vindobona. At the first, great numbers of coins and wall jars (Celtanura) and Ruins were found. The second has an area of 8 acres, and is crowded with ruins of stone buildings. A great part of the rampart of Porecilia is entire, and its northern face, which is formed of the main line of the wall, is in excellent preservation. Borevica, however, surpasses all the other stations in magnitude and in the interest which attaches to its remains. It is 15 acres in extent, besides a large suburb on the S. Within it no less than 20 streets may be traced; and it seems to have contained a Doric temple, part of a Doric capital and fragments of the slabs of column having been discovered in it, besides a great number of altars, inscriptions, and other antiquities. The remaining portions of this great fortification may be briefly described.

The Castella, or mile-castles as they are called, on account of being usually a Roman mile from one another, are buildings about 60 or 70 feet square. With two exceptions, they are placed against the S. face of the wall; the exceptions, at Portogate and near Ascaia, seem to have projected equally N. and S. of the wall. They were probably at the entrance of very substantial masonry, in the centre of the S. wall; but the most perfect specimen of them now existing has a N. as well as a S. gate.

Between each two castella there were four smaller buildings, called turfata or watch-towers, which were little more than stone sentry-boxes, about 5 feet thick, and about 10 feet high.

The line of the wall was completed by military roads, keeping up the communications with all its parts and with the southern districts of the island. As these were similar in their construction to other Roman roads, it is not necessary to say more respecting them in this place.

The following works contain detailed information respecting the stations connected with the Roman Wall:—
Horsley’s Britannia Romana; Warburton’s Vallum Romanum, 4to. Lond. 1753; W. Hutton’s History of the Roman Wall, 1801; Roy’s Military Antiquities of the Romans in Britain; the 3rd vol. of Hodgson’s History of Northumberland; and lastly, The Roman Wall; an Historical and Topographical Description of the Barrier of the Lower Thames, &c. Deduced from numerous personal Surveys. By the Rev. J. C. Bruce, M. A., 2nd ed. Lond. 1855, 4to.

This work contains full descriptions of all the antiquities hitherto discovered along the line of the wall, and great numbers of wall executed engravings of the most interesting objects, besides maps and plans of the country in various parts. [S. B.]

VALVA (Oldaeva), Ptol. iv. 2. § 16, a town of the Celtici in Mauretania Caeennaria. [T. H. D.]

VAMA (Omaa), Ptol. ii. 4. § 15, a town of the Celtici in Hispania Baetica. [T. H. D.]

VANCIANIS. [BATIANA.]

VANDABANDA (Ouvoudifada), Ptol. vi. 12. § 4, a district of Segisiana, between the Mons Caucarias (Hindii-Kish) and the Imaus (Hindale). It is probably nearly as the same as the present Badakhshân (Wilson, Arianca. p. 164). [V.]

VANDALI, VANDALI, VINDIL, or VANDULI (Ouvoudifad, Barâdit, Barâlai), a powerful branch of the German nation, which, according to Procopius (Bell. Goth. i. 3), originally occupied the country about the Palus Masotis, but afterwards inhabited an extensive tract of country on the south coast of the Baltic, between the rivers Vistula and Vadvranus, where Filius (iv. 29) mentions the Burgundiones as a tribe of the Vinduli. At a somewhat later period they crossed the Danube, and according to the chronicle of Bohemia, about the Riesengebirge, which derived from them the name of Vandalici Montes (Obavšold, ib. Dyon. Cass. iv. 1.) In the great Marcomannian war, they were allied with the Marcomanni, their southern neighbours, and in conjunction with them and the Quadi attacked Pannonia. (Jul. Capit. M. Aser. 17; Eutrop. viii. 13; Vulg. v. 3. § 16; Deipn. Ex. de Leg. p. 12.) In the reign of Constantine they again appear in a different country, having established themselves in Moravia, whence the emperor transplanted them into Pannonia (Jornand. Get. 22), and in the reign of Probus they also appear in Dacia. (Vopisc. ProB. 86.) In A.D. 406, when most of the Roman troops had been withdrawn from the Vandals in conjunction with other German tribes, crossed the Rhine and ravaged Gaul in all directions; and their devastations in that country and afterwards in Spain have made their name synonymous with that of savage destroyers of what is beautiful and venerable. Three years later they established themselves in Spain under their chief Radagaisus. Since then they have plundered and ravaged, among many other places, Nova Carthago and Hispalia, together with the Balearesian islands. At last, in A.D. 429, the whole nation, under king Genesic, crossed over into Africa, whither they had been invited by Bonifacius, who hoped to avail himself of their assistance against his conquerors. But when once in Africa, they refused to quit it. They not only defeated Bonifacius, but made themselves masters of the whole province of Africa. This involved them in war with the Empire, during which Sicily and the coasts of Italy were at times fearfully ravaged. On one occasion, A.D. 435, Genesic and his hordes took possession of Rome, which they plundered and sacked during five days. Rome was not only Rome, but other cities also, such as Capua and Nola, were visited in a similar way by these barbarians. Afterwards various attempts were made to subdue or expel them, but without success, and the kingdom of the Vandals maintained itself in Africa for a period of 105 years, that is, down to A.D. 534, when Belisarius, the general of the Eastern Empire, succeeded in destroying their power, and recovered Africa for the Empire. As to the nationality of the Vandals, most German writers claim them for their nation (Zeus, Die Deutschen, p. 57; Wilhelm, Germanii, p. 87); but Dr. Latham (on Tac. Epit. p. III. viii. fol. 4) and others prefer regarding them as a Slavonic people, who, though they are aew, are a safe guide in historical inquiries. (Papencordt, Gesch der Vandal. Herrschaft in Africa, Berlin, 1837; Hansen, Wer einmal lauete die Berufung der Vandalen nach Africa? D-epat, 1843; Friedlhuber, Die Münzen der Vandalen, Leipzig, 1849.) [T. S.]

VANDALICI MONSTRES. [VANDALI.]

VANDUIRUA, or VANDOGBARA (Ouvoudifara), Ptol. ii. 3. § 9, a town of the Damnonii in Britannia Barbara. Now Paisley. (Cf. Camden, p. 1214.) [T. H. D.]
VANESIA, a place in Gallia Aquitanica, fixed
by the Jerusalem Itin. between Elusa (Eusos) and
Aucusia, the capital of the Aucani, xii. from Elusa
and viii. from Aucusia. The place is supposed by
D'Anville to be the passage of the Baius, a branch of
the Garonne which comes from the Pyrenees. [G.L.]
VANGIONES (Ovryreছ). There were Vangions
in the time of Jovinus, when Caesar de-
serted him. (B.C. i. 51.) Caesar means to say
that they were Germans, but he does not say whether
they were settled in Gallia. Pliny and Tacitus
(Amm. xii. 27, Germ. e. 28) also describe the
Vangiones as Germans and settled on the left bank of
the Rhine, where they are placed by Prokony (l. 9.
§ 17); but Prokony makes a mistake in placing the
Nemetas westward of the Vangiones, as far as the
present Comminges and Aumes). (Herm. Pius. ii. 3.
p. 20. a. 34.)
VARDANES (Ode рагεδες), a river of Aetis, Scatania, is
falling into the Envixis to the SW. of the town.
Probably, however, it was only the name of
the latter, the present Kuba. (Strab. p. 205.) [АТРИЙА]
VARO, a tributary of the Rhine, which
takes the name of the town, into which, as
respectively Garconis of Avis and Garcon
name of the towns of these two towns. This
flows in a deep valley, and passes under the
Roman aqueduct now named Paul de Ceris, which it enters the
Rhine on the west bank, name named Ceris. The
name Varae is Sidelones Apulliania; and in a Latin poet as
Silenus Ceris, from which the modern name Ceris is
according to a common change of V into C.
VAPIRUM.
VARDULI (Oδαρυληδες), Strab. iii. p. 167; where we read
that at an earlier period they were settled be-
tween the Durance and the Larens, and making the
remark is Citizens. Their chief town was Borbetomagus,
(Worms). [BOSAYRGMA] [G.L.]
VARANIA (Оβαρανία, Ptol. iii. 1. § 39), according to
Ptolomy a town of the Bechini in Carnia or
Carniola (cf. Pline. iii. 20. a. 23. Variously iden-
tified with Venosia and Civisium. [T.H.D.]
VARINCUM, in Gallia Narbonensis, is not men-
tioned by any authority earlier than the Antonius
and Jerusalem Itin. In the Notitia of the Gallia
Provinces it is styled "Civitas Varincium." The
initial letter of the name has been changed to G, as
in many other instances in the French language,
and the modern name is Geps, which is the capital of
the department of Bassos d'Apeas, and on a small
stream which rises from the Van Durance, and
(G.L.) the Vangiones the neighbours of the Triboci, from whom in
fact the Vangiones were separated by the Nemetas.
In the war of Civilis (Tacit. Hist. iv. 70), Tutor
strengthened the force of the Treveri by levies
raised among the Vangiones, Carraces [CARR-
CAHONIA], and Triboci. The territory of the
Vangiones has been taken from the Mediones.
Their chief town was Borbetomagus (Worms). [BO-
BETOMAGUS]. [G.L.]
VARANIA (Οβαρανία, Ptol. iii. 1. § 39), according to
Ptolomy a town of the Bechini in Carnia or
Carniola (cf. Pline. iii. 20. a. 23. Variously iden-
tified with Venosia and Civisium. [T.H.D.]
VARINCUM, in Gallia Narbonensis, is not men-
tioned by any authority earlier than the Antonius

Vangiones has been taken from the Mediones.
Their chief town was Borbetomagus (Worms). [BO-
BETOMAGUS]. [G.L.]
VARADA (Оδαράδης, Ptol. ii. 6. § 57), a town of the
Carpetani in Hispania Tarraconensis. [T.H.D.]
VARACUM, on the road from Divona (Cahors) to Segodunum
(Rodas); and the distance from Divona is xx. D'An-
ville places Varacum at Varuscio, which is on the road
between Cahors and Rodas; but the distances do not
agree. Others fix the site at Puigjordes. [G.L.]
VARAE. [VARA.]
VARAGELI. [VARADLE.]
VARAR (Οβαρα, Ptol. ii. 6. § 5), an estuary on the
E. coast of Britannia Barbares, very probably the
present Fris of Cromarty. [T.H.D.]
VARCI (Οβαρανία, Ptol. ii. 6. § 57), a tribe in Upper
Pannonia, which is mentioned by both Pliny (iii. 28)
and Prokony (li. 15. § 2), but of which nothing is
known, except that it probably occupied the western
province of Geras (Geras. G. S.) play.
VASCILINES, the inhabitants of a town of the
Carpetani in Hispania Tarraconensis. (Iber. in
Morales, Ant. pp. 17, 26, 28.) The modern
Vorciai still contains some ruins of the old
town. [T.H.D.]
VARDARI (Оβαρανία, Ptol. ii. 17. § 8), an
Eocharian tribe dwelling on the west coast of
Phere (cf. Pline. iii. 20. § 26). By Strabo they
are called Aridiae (Αριδιαίες, v. p. 315). In
the Epitome of Livy (iv.) they are said to have been
subdised by the consuls Fulvius Flaccus. [T.H.D.]
VARDANES (Oδαράδης, Ptol. v. 9. § 32), a river of Aetis, Scatania, is
falling into the Envixis to the SW. of the town.
Probably, however, it was only the name of
the latter, the present Kuba. (Strab. p. 205.) [АТРИЙА]
VARO, a tributary of the Rhine, which
takes the name of the town, into which, as
respectively Garconis of Avis and Garcon
name of the towns of these two towns. This

VARIANA:
navigable (Plin. ii. 8. s. 4), and where main road through Spain crossed the river, Dalgaruga and Tritium. (Plin. Ant. p.
rear, under the name of Vereli, the same undoubtedly meant.) Usually identified with (cf. Florea, Canzibr. p. 198), though
ought is at Logroño, and occurs at Mur-

A. NA. (Baradura), a town in Lower Meso-

ite, was the garrison of a portion of the

and of a squadron of horses. (It. Ant.

Procop. de Aed. iv. 6; Notit. Imp., where

ied Varinius and Varina.) Its site is

the town of Orosag or Orosa. (L. S.)

A. NA. is a place in Pannonia, on the road,

ally the land of the Savs from Scissia

(It. Ant. pp. 260, 265.) Its exact

merely a conjecture. (L. S.)

(NAI, a German tribe mentioned by Pliny

as a branch of the Vindeli or Vandali,

acitus (Germ. 40) speaks of them as be-

the Suebi. But they must have occupied

in the north of Germany, and from

of the Baltic, and are probably the same

Pharadinii (Focoli) of Ptolemy (ii. 11.

in the country between the Chalmas and

; it is highly probable also, that the Varatius

of Procopius (B. Gotth. ii. 15, iii. 35,

&c.) are the same people as the Varini.

rius, a place in Dacia, where the

relt north of the Alba, seem to have been a

of the Varini. (Comp. Casiod. Var. ii. 8,

are called Guarni; Wersebe, Beschreib.

in zwischen Elbe, Saale, &c. p. 70.) (L. S.)

RISTI. (NARBSC.)

RUSS (Oderos), a river which the ancient

place a passage in Gaul and Italy, is

now the boundary of France and Italy.

ii. 4; Poil. ii. 10. § 1.) It is only the lower

of the Var which forms the boundary be-

and France. The river gives its name to the

department of Var, the eastern limit of which

lower course of the river Var. The larger

of the Var is in the Sardinian territory. It is

the Varus here that he fixes the limit between Italy and Gallia

ariosi remarks on the line of Lu-

i. 404)

univers et Hesperiae promoto limito Varus

— he alludes to the extension of the boundary of

westward from the summit of the Alpes Mar-

which is Italy’s natural boundary. He adds

the dependencies of the province of the Alpes

times comprehended Centemalum (Comes) and

and, which are on the Italian side of the

east of Nicasa (Niner), (Cenemalum)

but Ville may have mistaken Lucani’s meaning, who

ilus to the extension of the boundary of

the Rhodon to the Varus, as Vibius Se-

sors: "Varus nunc Galliam dividit, ante

(Ed. Obel.) However, the critics are not

and this about this passage. (D’Avnille,

Notice, &c.; irt. Gallius, p. 81.)

[G. L.]

FASADA (Oderaba), a town of Lyconia, a

to the south-west of Lacicaceae (Plol. v. 4.

10; Hierol. p. 675; Comp. etc., p. 4.
eere it is miswritten Oderaba; Comp. Con.

3. viii. p. 675, where it bears the name of ‘Adaraba.

is probably marked by the ruins near Chamwari

and, between Ilgum and Lodik. (Hamilto,

Reserches, ii. p. 190, in the Journal of the Ro.

Geogr. Soc. viii. p. 144; Kiepert, in Franz, Fünf

Inscriften, p. 36.)

[LS]

VASALAEIUS (Oderarot or Oderarot

pot, Plol. iv. 3. §§ 18, 26), a mountain at

the S. boundary of the Regio Syriaca.

[T. H. D.]

VASATAE. (Costou or Cassium.)

VASATAS. It is probable that the name Va-

sarii in Ptolemy (ii. 7. § 15) should be Vasaatii, as

D’Avnville says, and so it is printed in some Greek

texts. But Ptolemy makes them border on the Ga-

tali and places them farther north than Bordesan,

though he names their chief town Cassium. The Vo-

cates are enumerated by Caesar (B. G. iii. 28, 27)

among the Aquitanian peoples who submitted to P.

Caesar in n. c. 56. (Costou or Cassium.) [G. L.]

VASCONES (Oderavres, Strab. iii. pp. 155, 116; Oderavres, Poil. ii. 8. §§ 10, 67), a people in the NE. part of Hispania Tarraconensis, between

the Iberus and the Pyrenees, and stretching as far as the

N. coast, in the present Navarre and Guipuscoa.

Their name is preserved in the modern one of

Bask or Basque; although that people do not call themselves

by that appellation, but Euskaldunak, their country

Euskaleria, and their language Euscorra. (Ford’s

Handbook of Spain, p. 557; cf. W. v. Humboldt,

Ueberschw. &c. p. 54.) They went into battle bare

headed. (Sil. Ital. iii. 258.) They passed among

the Romans for skilful shoemakers. (Lamp. Alec.

Sew. 27.) Their swans, which carried to the rare

Pamplona. (Cf. Malo-brun, Moores et Uspes des

anciens Habitans d’Espagne, p. 509.) [T. H. D.]

VASCOUNUM SALTUS, the W. offshoot of the

Pyrenees, running along the Marc Cantabricum, and

named after the Vascones, in whose territory it was.

(Plin. iv. 20. a. 34; Auson. Ep. 15.) It may be

more precisely defined as the two

now called Sierra de Oroano, S. de Augas, and

S. Segos, forming the E. part of the Cantabric chain.

[T. H. D.]

VASIO (Oberad; Eia, Vassieniam), a town of

the Vociotti in Gallia Narbonensis, and the only town which Ptolemy (ii. 10. § 17) assigns to them.

Vasio is mentioned by Mela (i. 6) as one of the richest towns of the Narbonensian Gaul. (Pliny (ii.

4) names Vasio and Lucus Augusti as the two

chief towns of the Vociotti. The ethnic name

Vassienia appears in the Notitia of the Gallic Pro-

vinces (Civitas Vassieniana), and in inscriptions.

The place is Vassius in the department of Vassiius,

on the Ouwes, a branch of the Rhone. It is now a

small, decayed place; but there are remains which

show that it may have been what Mela describes it

to have been. The ancient remains are spread over a

considerable surface. There is a Roman bridge

of a single arch over the Ouwes, which still forms

the only communication between the town and the

faubourg. The bridge is built on two rocks at that

part of the river where the mountains which shut in

the bed of the river approach nearest. There are also

the remains of a theatre; the semicircle of the

caves is clearly traced, and the line of the praecomium

is indicated by some stones which rise above the

earth. There are also the remains of a quay on the

banks of the river which was destroyed by an

inundation in 1616. The quay was placed at consider-

able intervals by several rows of large stones, and

the water and filth of the town; these sewers are

large enough for a man to stand in upright.

There are also traces of the aqueducts which brought to

the town the waters of the great spring of Gruosus.
VATEDO.

(Bronte, Mém. de la Société Royale des Antiquaires de France, tom. xvi., quoted by Richard et Hecquet, Guide du Voyageur, p. 206.)

VATEDO, in Gallia, mentioned in the Table, is a place east of Bordeaux, supposed to be Vaires on the left bank of the Dordogne, a branch of the Garonne. [G. L.]

VATRENUM (Saterno), a river of Gallia Capadana, one of the southern tributaries of the Parus, it had its sources in the Apennines, flowed near the Portus Corymellae (Casalina), and received the southern branch of the Parsus (the Spacesium Oetium) not far from its mouth, for which reason the port at the entrance of that arm of the river was called the Portus Vatreni. (Plin. in. 15. a. 20.) The Saterno now flows into the Po di Piamonte (the modern representative of the Scommatic branch), above 16 miles from its mouth; but the channels of both are in this part of the river. In the lower part of its course it must always have been a canal of a branch of a river, whence Martial uses its name as typical of a sluggish stream. (Martial. iii. 67. 2.) [E. H. B.]

Brequ, a nation in India extra Gangeni, mentioned in Pliny (v. 19. a. 168). It appears it was a large town of the same name. It is not possible to determine its exact position; but, from the names of other nations mentioned in Pliny in connection with the Bacarni, it is probable that this people lived near the mouth of the Brahmaputra. [V.]

UBRII (Obbae), a German people who in Cassius' time lived on the east bank of the Rhine and opposite to the Treveri (Trier), which made his entry into the country of the Treveri passed over into the country of the Ubrii. Owing to their proximity to the Rhine they were somewhat more civilized than the other Germans, being much visited by merchants and accustomed to Gallic manners (B. G. v. 3. 18. v. 29. 25). The Sigambri were the immediate neighbors of the Ubrii, mentioned in connection with the Ubrii in the Gallic histories, it is probable that this people lived near the mouth of the Brahmaputra. [V.]

UDBA (Odban), a village in the province of Asiatiae Sarmatiae, which falls into the Caspian Sea. It is probable the people mentioned under the name of the Ubrii are identical with the Ubrii. (Hirt. B. H. 7.) According to Char. (p. 361) it was in the vicinity of Oxium and Antipatris. [E. H. B.]

UMBASTIA (Umbassia), a village in the province of Asiatiae Sarmatiae, which falls into the Caspian Sea. It is probable the people mentioned under the name of the Ubrii are identical with the Ubrii. (Hirt. B. H. 7.) According to Char. (p. 361) it was in the vicinity of Oxium and Antipatris. [E. H. B.]

UCUBIS, a place in Asia Minor, on the opposite side of the Dardanelles to Ephesus. (Hirt. B. H. 7.) According to Char. (p. 361) it was in the vicinity of Oxium and Antipatris. [E. H. B.]

UCURIS, a place in the province of Asiatiae Sarmatiae, which falls into the Caspian Sea. It is probable the people mentioned under the name of the Ubrii are identical with the Ubrii. (Hirt. B. H. 7.) According to Char. (p. 361) it was in the vicinity of Oxium and Antipatris. [E. H. B.]

REDIA (Odban), a village in the province of Asiatiae Sarmatiae, which falls into the Caspian Sea. It is probable the people mentioned under the name of the Ubrii are identical with the Ubrii. (Hirt. B. H. 7.) According to Char. (p. 361) it was in the vicinity of Oxium and Antipatris. [E. H. B.]

VEDINUM. A city of Venetia, mentioned only by Pliny (iii. 19. s. 23) among the municipalities of that country. It was situated in the plain of the Carni, 11 miles W. of Civitadole (Forum Julii), and 22 NNW. of Aquileia. In Pliny’s time it was apparently an inconsiderable place, but rose into importance in the middle age, and is now a flourishing town. The name of Vedita, which is also found in the whole province of the Friulian. Many MSS. of Pliny write the name Nedinates, which has been adopted both by Harduin and Siliig, but it is probable that the old reading Veditates is correct. [E. H. B.]

VEDRA (Ωδέσπα, Plin. li. 3. § 6), a river in the N. part of the E. coast of Britannia. The name would lead us to the conclusion that it is the Wester (Camden, p. 944), yet Horsey (p. 103) and others have taken it to be the Tyme. [T. H. D.]

VEGIA (Οὐεξία or Ουερία), or VEGIUM (Plin. iii. 21. a. 25), a town of Liburnia, the present Verno.

VEGIUM (Όβεγιον) or, as some read, VESTERUM (Όβερερον) a town of Galatia, in the territory of the Tissiobolus, between Mounts Didymus and Celenus (Plin. v. 4. § 7), is perhaps the same place as the Vessinum of the Feutinger Table. [L. S.]

VEIUS (Οειούς, Strab. v. p. 226; Obol, Dionys. H. ii. 54; Euseb. Valesius, Cie. Div. i. 44; Liv. iv. 15, &c.; Adj. Vetus (triply), Propert. iv. 10. 31), an ancient and purely Tuscan city of Etruria. According to Festus (v. p. 163, 34), there was a restoration in 1000 years, which restored it, perhaps to its ancient state, and signified a waggone (plautium); but there is nothing to show that this was the etymology of the name of the town.

Among the earlier Italian topographers, a great diversity of opinion prevailed respecting the site of Veii. Nardini was the first writer who placed it at the present Isola Caelimis, in the middle of the lake, and this view is now universally admitted. The distance of that spot northwards from Rome agrees with the distance assigned by Dionysius of Halicarnassus (L.c.) to Veii, namely, "about 100 stadia," which is confirmed by the Tabula Peut, where it is set down at 12 miles. In Livy, indeed (v. 4), it is mentioned as being "within the 30th milestone," but this in a speech of Postumus, must, with great probability, be taken as an exaggeration, and not solicitous about strict accuracy; whilst the two writers before cited are professively giving the exact distance. Nor can the authority of Eutropius (L.4), who places Veii at 18 miles from Rome, be admitted to invalidate the testimony of these authors, since Eutropius is notoriously incorrect in particulars of this description. There are other circumstances which tend to show that Isola Farnese is the site of ancient Veii. Thus the Tab. Peutinger further indicates that the city lay on the Via Cassia. Now following that road for a distance of about 12 miles from Rome, the locality not only exactly corresponds with the description of Dionysius, but also the remains of city walls and sepulchres, and traces of roads lie parallel with them, have been found there. Moreover at the same spot were discovered, in the year 1810, stones bearing inscriptions which related exclusively to Veii and the Veientes.

We know little of the history of Veii but what concerns the wars it waged with the Romans. It is called by Eutropius (L. 20), "civitas antiquissima Italiae, tamen dissidentiae," and there can be no doubt that it was in a flourishing state at the time of the foundation of Rome. At that period the Etruscan, or Veientine, territory was separated from the Latin by the river Albula, afterwards called Tiberis; and consequently neither the Mons Vaticann nor Janiculensis then belonged to the Romans. (Liv. i. 3.) To the SW. of Rome it extended along the right bank of the Tiber down to the sea, where it contained some Saltine, or salt-works, at the mouth of the river. (Dionys. li. 55.) The district immediately opposite to Rome seems to have been called Septum Pagii (I.B.). On the N. of Rome it has extended in time have extended as far as Mount Sor acte; since the aper Capenaensis belonged to it, Capena a colony of Veii (Cato, op. Serv. Aen. vii. 697); though in the history of the wars between Rome and Veii, Capena appears as an independent city. [CAPENA, Vol. i. p. 504.] On the NW. it may probably have stretched as far as the Mons Ciminus; but here well as more to the S., its limits are uncertain, and all we know is that in the latter direction it must have been bounded by the territory of Caere. (Cf. Muller, Etruscar, ii. 2. p. 1, &c.) The aper Veiens is stigmatized by Horace and others as producing an execrable sort of red wine (Sat. ii. 3. 143; cf. Pers. v. 147; Mart. i. 108. 9. II. 33, 4, &c.), We learn from Dionysius (L. 54) that the city was of the same size as Athens, and therefore nearly as large as Rome within the walls of Servius. [ROMA, Vol. ii. p. 756.]

The political constitution of Veii, like that of the other Etruscan cities, seems originally to have been republican, though probably aristocratically republican, with magistrates for 100 years. Thus they appear to have been ambitious and aspiring Rome, and the constant wars which they had to wage with that city, that induced the Veientes to adopt the form of an elective monarchy, in order to avoid the dissensions occasioned by the election of annual magistrates under their original constitution, and thus to be enabled, under the kings of Veii, to maintain their vigour abroad; but this step procured them the ill will of the rest of the Etruscan confederacy (Liv. v. 1, cf. iv. 17). Monarchy, however, does not appear to have been permanent among them; and we only know the names of two or three of their kings, as Tolumnius (I.B.), Propertius (Serv. Aen. vii. 697), and Morinus (Ib. viii. 285).

The first time that the Veientes appear in history is in the war which they waged with Romulus in order to avenge the capture of their colony, Fidenae. According to the narrative of Livy, this war was terminated by one decisive battle in which Romulus was victorious (L. 15); but Dionysius (lii. 54, seq.) speaks of two engagements, and represents the Romans as gaining the second by a stratagem. Both these writers, however, agree with regard to the results of the campaign. The loss of the Veientes was so terrible, both in the battle and in the subsequent flight, in which numbers of them were drowned in attempting to swim the Tiber, that they were constrained to sue for peace. The terms imposed upon them by Romulus show the decisive nature of his victory. They were compelled to surrender that part of their territory in the neighbourhood of Rome called Septem Pagii, probably from its containing seven villages; to give up the salt-works which they possessed at the mouth of the Tiber; and to provide 50 hostages as security for the due execution of the treaty. On these conditions they obtained a peace for 100 years, during which they were allowed to retain the rule of their prisoners; though such of the latter as preferred to remain at Rome were presented with the freedom of the city and lands on the left bank of the Tiber. The district of Septem Pagii thus acquired
probably comprehended the Vatican and Janiculum hills, and became the seat of the 5th Roman tribe, the Romilia or Romullia. (Varr. L.L. v. 9 § 65, Mull.; Paul. ap. Fest. e. s. v. Romulius Trib.)

This peace seems to have lasted about 60 or 70 years, when war again broke out between the Vestinates and Romans in the reign of Tullius Hostilius, and this time also on account of Fidenza, which appeared to the Romans to be the most tempting prize of all the towns captured by Romans. The cause of the war was the treacherous conduct of the Fidenates during the Roman struggle with Alba. When called to account, they refused to give any explanation of their conduct, and procured the assistance of the Vestinates. Tullius crossed the Anio (Tusulmon) with a large army, and the battle was fought near the town; and in order to secure the river and the town of Fidenza was the most obstinate and bloody which had yet been recorded in the Roman annals. Tullius, however, gained a signal victory over the Fidenates and their allies the Vestinates. The battle is remarkable for the vows made by Tullius, of twelve Salian priests, and of temples to Pater and those present there were the second set of Salians or those attached to the worship of Quirinus (cf. Roma, p. 839); and the appropriateness of the vow will be perceived when we consider that the Fidenates, in their answer to the Romans, had asserted that all their engagements towards Rome had expired on the death of that deity. (Liv. i. 27; Dionys. iii. 23, sqq.)

The war was renewed under Ancus Marcus by forays on both sides, which, however, seem to have been begun by the Vestinates. Ancus overthrew them in two pitched battles, the last of which was decisive. The Vestinates were obliged to surrender all the tracts on the right bank of the Tiber called the Silva Massia. The Roman dominion was now extended across the whole of the territory, and in order to secure these conquests, Ancus founded the colony of Ostia at the mouth of the Tiber. (Liv. i. 33; Dionys. iii. 41.)

The next time that we find the Vestinates in collision with Rome, they had to contend with a leader of their own nation. L. Tarquinius, an emigrant from Etruria, arrived in Rome, had ascended to the throne of Ancus Marcus against Veii, and was now in possession of the Roman sovereignty. The Vestinates, however, on this occasion did not stand alone, but were assisted by the other Etruscan cities, who complained of insults and injuries received from Tarquin. The Vestinates, as usual, were discomfited, and as thoroughly, that they did not dare to leave their city, but were the helpless spectators of the devastation committed on their lands by the Romans. The war was terminated by Tarquin's brilliant victory at Eretum, which enabled him to claim the sovereignty of all Etruria, leaving, however, the different cities in the enjoyment of their own rights and privileges. It was on this occasion that Tarquin is said to have introduced the institution of the twelve lictors and their fasces, emblems of the sovereignity of the twelve Etruscan cities, as well as the other Etruscan insignia of royalty. (Dionys. ii. 37; Flor. i. 5.) It should be observed that on this subject the accounts are very various; and some have even dismissed the whole story of this Etruscan expedition. This historian, however, when he speaks of the consummation of the war under Servius Tullius, includes the other Etruscans with the Vestinates, as parties to the truce which had expired ("bellam cum Vesteibus jam

union indiques extermint) (cf. Euseb. H. E. i. 42), although the Etruscans had not been concerned in the last Veientian war in his time. (Of Dionys. iv. 27.) This war under Servius Tullius was the last waged with the Etruscan allies during the regal period of Rome. When the second Tarquin was expelled by the Romans, the Etruscans endeavored to retake his. Tarquin was a colony of Rome which was converted into a city and league formed for this purpose. The fact which took place near the Silvis Anio, was not decisive, though the Romans claimed the victory. But the Etruscans having signs of assistance from Perses, Lars of Clusium, the latter were completely routed, and, at the request of Rome, were sent to contain the Etruscans in all the territory which had been wrested from them by Romulus and Ancus Marcus. The latter Perses shortly afterwards restored to the Etruscans all the territory of gratitude by which we displayed towards the remnant of the Etruscans after the defeat of his son Ancus at Aricia (456 B.C.; Dionys. iv. 307)

The Veientians could ill brook being deprived of this territory, but whilst the influence of Etruria his family prevailed in the Etruscan League remained quiet. After his death the war against the Perses continued. (c. 453.) For a year or two it was a kind of warfare characterized by mutual detestation. In 451, after a general congress of the Etruscans, a number of volunteers joined the Vestinates on matters began to assume a more serious aspect. The first encounters the Romans were unscrupulously led to the mutiny of the soldiers. The Perses were overcrowded by their ill success; the Etruscan army was inferior in number to that of the Perses, and they endeavored to decline as supreme, and to such a degree that they insisted on being battle. The contest was long and bloody. Etruscans at one time were in possession of the Roman camp; but it was recovered by Titus Sicinnus. The Romans lost a vast number of officers, amongst whom were the noble Fab. Q. Fabius, which had been won over to the Perses, and many cabinets and mercenaries. It was the drawn battle; yet the Romans claimed the victory because during the night the Etruscans sallied from their camp, which was sacked by the Romans the following day. But the surviving consul, M. Rub. Vibulunus, on his return to Rome, refused to recall and abdicated his office, the honor of victory being prevented from discharging by the sorrow of the wounded. (Dionys. ix. 5, sqq.; Liv. ii. 43.)

Shortly after this, the Vestinates, finding they were unable to cope with the Perses by open field, adopted a most amusing system of warfare. When the Roman army appeared, they likewise made up within their walls, but when the Perses were left for a little time the country up to the very gates of Rome. Fabian family, which had given so many causes of offence, and which had taken so prominent a part in the last war, now came forward and offered to believe the commonwealth from this disastrous war. The whole family appeared before the senate and by the most of the Senate, and the Fabian council for the third time at the instance of a continual rather than a large guard was revived. The Vestinates were willing to extend the duty and to maintain the majesty of the
Excited the Roman colony Fidenae to rebel; and in order completely to compromise the Fidenates, Tolumnius ordered them to slay the Roman ambassadors who had been despatched to demand an explanation. Both sides flew to arms; one or two obstinate engagements ensued; but the allies who had been joined by the Falisci also, were overthrown in a decisive battle under the walls of Fidenae, in which Tolumnius was killed by the Roman military tribune, A. Cornelius Cosmas. (Liv. iv. 17—19; cf. Propert. iv. 10. 22, sqq.)

Three years afterwards, Rome being afflicted with a severe pestilence, the Veientines and Fidenates were emboldened to march upon it, and encamped before the Porta Collina; but on the appearance of a Roman army under the dictator Annus Servilius, they retreated. Servilius having pursued and routed them near Momentum, marched to Fidenae, which he at length succeeded in taking by means of a circumvallation or mine. (Liv. iv. 22.)

Although the Veientines obtained a truce after this event, yet they soon violated it, and began to commits deprivations in the Roman terry. Hence the Porta Collina was assigned to the tribune of 427; and even defeated a Roman army whose operations had been paralysed through the dimensions of the three military tribunes who commanded it. The Fidenates now rose and massacred all the Roman colonists, and again allied themselves with the Veientines, who had also enlisted a great number of Etruscan volunteers in their interest. These events occasioned great alarm at Rome. Mamercus Aemilius was created dictator, and, marching against the enemy, encamped in the peninsula formed by the confluence of the Anio and the Tiber. Between this spot and Fidenae a desperate battle was fought: strategems were employed on both sides; but at length the allies were completely defeated, and most of the Romans entered the gates of Fidenae along with the flying enemy. The city was sacked and destroyed and the inhabitants sold as slaves; but on the other hand the Romans granted the Veientines a truce of 30 years. (Liv. iv. 31—35.)

At the expiration of this truce, the Romans resolved to subdue Veii, as they had done Fidenae, and it was beset by the other six Roman military tribunes. At this news the national assembly of the Etruscan met at the same place of Volturnus, to consider what course they should pursue. The Veientines had again resorted to the regal form of government; but unfortunately the person whom they elected for their king, though rich and powerful, had incurred the hatred of the whole Etruscan nation by his oppressions and imperious manners, but especially by his having hindered the performance of certain sacred games. The Etruscans consequently declared that, unless he was deposed, they should afford the Veientines no assistance. But the latter were afraid to adopt this resolution, and thus they lost their opportunity of removing their fate. Nevertheless, they contrived to prolong the siege for a period of ten years, during which the Romans were several times discomfited. It is worthy of remark that it was during this siege that the Roman soldiers, being obliged to pass the winter out of Rome, first received a fixed regular stipend. The Cenopates, the Falisci, and the Tarcheanes were in vain endeavoured to relieve the besieged city.

The length of the siege had begun to weary the Romans, when, according to the legend, the means of its capture was suggested by an extraordinary portent. The waters of Lake Albaneus swelled...
to such an extent that they threatened to inundate the surrounding country. The oracle of Delphi was consulted on the occasion, and the response involved not only the immediate subject of the application, but also the remote one of the capture of Veii. According to the voice from the sacred tripod, that city would be taken when the waters of the lake were made to flow off without running directly into the sea; and the prophecy was confirmed by the revelation of a Veientine haruspex made during the interval of the embassy to Delphi. All that we can infer from this narrative is that the formation of the embassy for dispatching the Alban lake was contemporaneous to the siege of Veii [cf. ALBANIA LAETICA, Vol. 1, p. 25]: the rest must be referred to the propensity of the ancients to ascribe every great event to the intervention of the gods; for we have already seen that Fidenae was captured by means of a cunningus, a fact which does not appear to be any valid reason to doubt, and therefore the embassy of the lake cannot be regarded as having first suggested to the Romans the method of taking a city by mines.

The honour of executing this project was reserved for the dictator M. Furius Camillus. Fortune seemed to have entirely deserted the Veientines; for though the condition of the Capenate was monotonous enough, and had made some impression on the national assembly of the Etruscans, their attention was diverted in another direction by a sudden revolt of the Coremorum Gauls. Meanwhile Camillus, having defeated some bodies of troops who endeavoured to relieve Veii, erected a line of forts around it, to cut off all communication with the surrounding country, and appointed some officers to work continually at the cunningus. When the mine was completed, he ordered a picked body of his most valiant soldiers to penetrate through it, whilst he himself diverted the attention of the inhabitants by feigned attacks in different quarters. So skilfully had the mine been directed that the troops who entered it emerged in the temple of Hercules at the rear of the citadel. The soldiers who guarded the walls were thus taken in the rear; the gates were thrown open, and the city was filled with Romans. A dreadful massacre ensued; the town was sacked, and those citizens who had escaped the sword were sold into slavery. The image of Juno, the tutelary deity of Veii, was carried to Rome and presently installed on Mount Aventine, where a magnificent temple was erected to her, which housed till the abolition of paganism. (Proc. v. 8, 12, 13, 15–22; Cic. Div. i. 44, ii. 33; Var. Cat. 3. sq.; Furr. i. 12.)

Veii was captured in the year 396 B.C. Its territory was divided among the citizens of Rome at the rate of seven jugurs per head. A great deal of spoil was carried away by plundering the rich plunder of the city; but Veii, although it was inhabited by Romans citizens, and was made as it were a second capital; but at the suppression of Camillus the project was abandoned. From then on, the city was deserted, its buildings were never restored, and was never inhabited. Thus, after the battle of the Alia and the taking of Rome in the war of the Gallic war, the fate of Veii remains unexplained. Camillus himself was there; and when the senate were asked whether the city, which had been saved, should be restored or not, a division occurred, and Veii was converted into a new colony. Later on, the senate of Camillus again discussed the question in the same negative, and the question was set at rest for ever. This took place in 389. Some refractory citizens, however, disliked the trouble of rebuilding their own town, and, taking refuge in the empty sites of Veii, set out in search of a samnaeasalus in order to return; but they were caught and brought back to Veii by a decree of capital punishment against those who remained at Veii beyonc the prescribed. (Liv. v. 49, sqq. vi.)

From this time Veii was completely deserted, and gradually went to decay. Cicero (ad Fam. 30) speaks of the measuring of the Vegetable centre of distribution, and it was probably divided among his soldiers in 342. Ptolemy also describes its walls as existing to the present day; but the space within consisted of forests, where the sheepfled his flock, and which were used in the operation of the decempedia (iv. 10. 29). In, however, rather difficult to reconstruct the city, unless there were two distributions. Cicero appears to have planted a colony at the north-east and thus arose the second, or Ruma. Veii seems to have been considered enough to be an assault during the wars of the trinumine. The inhabitants were again dispersed, and the city was not re-erected till the end of the Augustan, when it assumed the name of Augusti, after the restoration of Veii.

(From J. de Colonia). When Roma flourished in the reign of Hadrian, a vestige remained to mark the spot where Veii once stood, but it either with prominence, or is alluding to the ancient and immortal. The existence of the municipality is attested by several authors. It appears to have planted a colony at the north-east and thus rose the second, or Ruma. Veii also found there that it was in existence as late as the reign of Constantinian times. In monuments alluded to consist partly of writing relating to those emperors and their families, partly of inscriptions. Amongst the latter most important is the inscription to an Augustal, in the name of Julius Eulates, a freedman of Augustus. Its office in the reign of Augustus, the bust of a veii. It is dated in the consularship of Gavius and Calvinius Sabinius, A.D. 127 B.C. It is in the third year of the reign of Tiberius. It is placed by Fabreti (Inscr. p. 170), but was recovered by the original by Nibirio in his Fasciculi (vol. 4, p. 409). The scene is of works of art. Amongst the monuments with which are inscriptions relating to it have been discovered. One of these records the restoration of a temple consecrated in honour of M. Tarquinius Saturninus and M. Tarquinius Rastis. This family, which first began to write on Etruscan divination (Mark. ii. 7.), seems to have belonged to Veii and afterwards extended itself into Roman territory. There are various coins of the Tarquins (D. N. F. p. 332). After the end of Carthage...
no notices of Veii except in the Tab. Penn. and the Geographer of Ravenna. It was partly destroyed by the Lombards. At the g 11th century a castle was erected precisciously and isolated hill on the S. side which was called la Isola, and is now the name of the Isola Frasenae.

Illiam Geil was the first who gave an exact map of Veii in one of the earliest maps engraved on the ball in his Topography of Rome and its environs. He traced the vestiges of the ancient city, which were composed of irregular quadrilateral of the local terra, some of which were from 9 ft. in length. Mr. Dennis, however, failed to any traces of them (Etr. vol. i. p. 15), and the stones used in the fortifications of Veii, cementary, smaller pieces than usual in other cities. These remains, which are principal in the N. and E., as well as the outline of the cliffs, determine the site of the city in a manner that cannot be mistaken. They give a circumference of about 7 miles, with the account of Dionysius, before to 3 miles, and with the result of his excavation, about 3 miles, between the heads of Augustus and Athens. It has been debated whether the rock, called the Isola Frasenae, formed part of it.

Nibby (Dissert., vol. iii. p. 424) and others say that it was the arx or citadel. On the other hand Sir William Geil and Mr. Dennis at this could not have been the case; and it is certain that the rock was advanced in the 25th book of the Topography of Rome and its environs, and on page 42, note 5, appear decisive; namely, Isola is separated from the city by a deep channel, and that it had been the citadel, Camillus by pure inference, but had obtained immediate possession of the town, as we learn from Livy’s narrative, referred to, that he did: 2, the remains of an tomb on the Isola show that it must have been a necropolis, and consequently without the walls, so authorities last cited identify the citadel near the Isola as now called the Piazza d’Armi at the tremitia of the town, in the angle formed by the junction of the stream called Fosso del Fosse or Fosso di Formello, which is thought to be the ancient body of water. The other rivulet rises at La Torretta, 12 miles from Veii. Near Veii it forms a fine cascade, precipitating itself over a rock about 80 ft. high. From this spot it runs in a deep channel precipice, and separates the Isola from the Fosso del Fosse, which is called Fosso di Formello, or Cremers, the name of the river is now called La Valcata, and into the Tiber about 6 miles from Rome, near Ismania.

The ancient town of Veii is surrounded by a wall about 30 ft. wide on the bank of the stream, which seems to have formed the pier from which the arch sprang, and some large blocks of bawn tufa which lie in the water. The banks of the bridge called Ponte Formello are also possibly Etruscan, but the arch is of Roman brickwork. The Ponte Sodo is a tunnel in the rock through which the stream flows. Nibby (Dissert., vol. iii. p. 426) describes it as 70 ft. long, 15 ft. wide, and 15 ft. high, but Mr. Dennis, who visited it, says that it is 240 ft. long, 15 to 15 wide and nearly 20 high (Etrusc., vol. i. p. 14). It is in all probability an Etruscan excavation, or at all events has been enlarged by art. An ancient Roman road ran over it; and from above it is scarcely visible. No trace remains of the cuniculus of Camillus. The vicinity of Veii abounds with tombs excavated in the rock, and sepulchral tumuli, some of which are Roman. Among the tombs is a remarkable one, discovered in the winter of 1842, and still open to inspection. It consists of a passage in the tumulus, or mound, called Poggio Michele, leading to a door in the middle of the mound, and formed in the rock, and by many sculptured lions. This is the entrance to a low dark chamber, high up in the rock, the walls of which are covered with paintings of the most grotesque character, consisting of horses, men, sphinxes, dogs, leopards, etc. On either side a bench of rock, about 2 ft. high, projects from the wall, on each of which, when the tomb was opened, was a human body reposed; but these soon crumbled into dust. One of them, from the arms lying near, was the remains of a warrior; the other skeleton was probably that of his wife. On the floor were large jars containing...
VELATODURUM. 1266

human ashes, and also several small vases of the most archaic Etruscan pottery. Within was another smaller chamber also containing cinerary urns. A complete description of this remarkable sepulchre will be found in Mr. Dennis's Etruria (vol. i. ch. 2).

For the history and antiquities of Veii the following works may be consulted: 1. Nibby, Dei resti di Roma, vol. iii., and Viaggio Antiquario, vol. i.; Canina, L'antica Città di Veji descritta ; Abeken, Monumenti; Müller, Etruria; Sir W. Gell, Topography of Rome and its Vicinity; Dennis, Cities and Cemeteries of Etruria. [T. B. D.]

VELATODURICUM, in Gaelia, is placed by the Antonine Itinerary on the road from Vesta (Bomarzo) to Esperandium (Monsammara) xxii. from Bomsamara and xii. from Monsamara. But these two numbers exceed the distance between Monsamara and Velitansana. The termination chanas seems to show that Velitansana was on a stream; and D'Arco's conjecture that it is near Cleorodanes on the Dora, where there is a place named Ponte-fuiee, seems thereby to be dismissed. [F. A. R.]

VELAUSI, a people mentioned in the Punic War of the Aps (Pis. ii. 20), between the Narami and Sators. If the geographical position of these people corresponds to their position in Piny's list of tribes, we know in a general way where to place them. [N. M - S. A. L.]

VELIDNEA, one of the most important towns of Etruria, on the southern bank of the river Onna, and on the road leading from Tricentum to Augustus Vincius (Villars). (It. Ant. pp. 258, 259, 275, 260.)

According to coins which have been found on its site, it was a Roman colony with the surname Augustana. Its site is now occupied by the convent of Fontanella in the neighbourhood of Fucecchio, on the lower river Still. (See Beulac, Velidnea (veli antiquissimi Augusti Colonies; Ch. 17. 44, 1分明.) [L. S.]

VELEIA (Vulc. Velis, Visc. Ene, near Montepulciana.) a town of Lusitania, situated on the frontiers of Cisalpine Gaul (Abdn., about 20 miles S. of Placentia (Pescara); in the ultra-longa of Augustus Vicinius, 40. 165. 4). The Velitans are mentioned by Piny, among the Ligurian tribes; and in another passage he speaks of "oppidum Velisaeum," which was remarkable for the largeness of its inhabitants. 49, 48 a. A. He describes it as situated "inopposita ab Alba,", but its precise site was unknown until its remains were discovered in 1696. Even the mode in which these are buried, seems certain that the town was overwhelmed by a vast avalanche from the neighbouring mountains. Several excavations in the spot, which have been carried on since 1696, have brought to light several buildings of the ancient city, including the amphitheatre, temple, forum, and several temples: among the most remarkable is an Augusteum of a somewhat kind, as well as extensive, which have been discovered on the spot, two four-story temples to Velis at the Pontes of Nervi near Velis. Unfortunately the great weight of the superfluous mass has crushed the buildings, so that all the upper part of them is destroyed, and the lower parts have suffered severly from the waters. The inscription of the temple found there is a dedicatory one to the Roman Emperor. One of these in the form of a well, is said to contain a detailed account of the expenditure of a large sum of money by the emperor Trajan in the purchase of land to maintain a number of poor children of his own. This remarkable document consists of no less than 118 inscriptions, divided into a number of Perg., or real texts. The memory of these and of the same or similar works are, and the coins of the same period in question. The Tabula Aemulae Marcii Traiani, as it is commonly called, has been published, and illustrated by a series of learning, especially by De Lasa (Lino, mimeo- manation Velicato detta Trajania; e. 1679, 4°), published by Antonio (La Roma di Tito Livio, E. 1619). The coins found at Velis are very scarce; but none of them later than the time of Trajan were ever before reasonably inferred to have been issued by the emperor.

VELIA (Velis, Velis, Veles, Velianis; Tav. Tavo, Tago, Veles, Veles), one of the principal of the Greek colonies in western Italy, situated on the shores of the Lucus, about midway between Poetmus and Sinis. There is no uncertainty respecting this name. Strabo tells us that it was originally called Hype (Tavo), but was in his time called Ellen, and Dionysus (Arist.) the name was at first called Hype and afterwards Lyce (Strab. vi. p. 232; Diog. Laert. ii. 5 § 114; P. 12. 4. 1). But it is certain from the existence of coins, which uniformly bear the legend Velis, that Velia is more ancient than the temple. It is uncertain whether the temple existed among the people themselves as long as or 12. a. a. continued; while on the other hand, the name Th was already found in Sphax (p. 41. 12. 11. 11. 11. to have been certainly that in use among writers from an early period, when the Latin school of philosophy rendered the name more general. Strabo also tells us that some writers, among whom Cato (Cato), from a fountain of that name, in this form, compared with Velis and Lyce at Velia, seems to show clearly that the divers names arose from the Attic Epeus, and more probably original prefixed to the name, as it was certainly in the native usage, in that of the Greeks while it was altogether dropped by the Athenians (Cato, Veles, P. 121. 12. 12. 12. It is not improbable that the name is more ancient than that of the neighboring town of the Hales of Cicerone (Abundo), of which the name is written Epeus by Strabo and Bocconio by Byzantines. (Cic. ad Fam. viii. 3. 25: 12. 5. 354.) Others, however, derived it from the name (Gale) at the mouth of the same river.

There is no trace of the existence of any town above the site of the ancient city of the same name. It was probably a small site. It was a colony from Attica, and derived its origin from the valuc of
of the inhabitants of that city in order to
living under the Persian yoke, at the time of
view to the Ionian or by Harpagrus, b. c. 544. The
of the empire of the Tyrrhenians and Carthi-
ennemists proceeded in a body to Corsica, where
Punic. (Cic. pro Balb. 24; Val. Max. l. i. 1. § 1.)
Cicero speaks of Velia as being a "fœderata civitas," and we find it mentioned in the
Second Punic War as one of those which were bound by
of the Lex Julia, n. c. 90. (Cic. i. c.)
Under the Roman government Velia continued to be a
tolerably flourishing town, and seems to have been
from an early period noted for its mild and salu-
rious climate. Thus we are told that P. Aemilius was ordered to go there by his physicians for the
benefit of his health, and we find Horace making
inquiries about it as a substitute for Baiae. (Plut.
Aemilius 59; Hor. Ep. i. 15. 1.) Cicero's friend
Tullius had a villa there, and oration was his.
self repeatedly touched there on his voyages along the
coast of Italy. (Cic. Ver. ii. 40, v. 17, ad
Fam. vii. 19, 20, ad Att. xvi. 6, 7.)
It appears to have been at this period still a place of some trade, and Strabo tells us that the poverty of the soil com-
pelled the inhabitants to turn their attention to maritime affairs and fisheries. (Strab. vi. p. 284.)
It is probable that the same cause had in early times co-operated with the national disposition of the
Phocian settlers to direct their attention especially to
maritime commerce. We hear nothing more of
Velia under the Roman Empire. Its name is found
in Pliny and Plutarch, but not in the Itineraries,
which may, however, have been composed at a con-
cluded position. It is mentioned in the Liber Coloni-
arium (p. 209) among the Praefecturae of Lucania;
and its continued existence as a municipal town is
proved by inscriptions. (Mommsen, Inscr. K. N. 190, App. p. 2.) It became an episcopal see in the
early ages of Christianity, and still retained that
dignity as late as the time of Gregory the Great
(n. d. 599). It is probable that the original dwelling of
Velia, like that of Paestum, was owing to the ravages of the Saracens in the 8th and 9th centuries.
The bishopric was united with that of Capaccio, which
had succeeded to that of Paestum. (Müller, Pelio,
pp. 69-73.) During the middle ages there grew
up on the spot a fortress which was called Castell a
Mare della Bussola, and which still serves to mark
the site of the ancient city.

The ruins of Velia are situated on a low ridge of
hill, which rises about a mile and a half from the
mouth of the river Aelma (the ancient Halys), and
half a mile from the coast, which here forms a
shallower but spacious bay, between the headland
formed by the Monte Bolgeticco and the rocky
point of Porticello near Ascea. The mediaeval
castle and village of Castell a Mare della Bussola
occupy the point of this hill nearest the sea. The
outline of the ancient walls may be traced at inter-
vals round the hill for their whole extent. Their cir-
cuit is not above two miles, and it is most likely that
this was the old city or town and that these days of its prosperity it had considerable suburbs,
especially in the direction of its port. It is probable
that this was an artificial basin, like that of Meta-
pontum, and its site is in all probability marked by
VELINUS.

A marshy pool which still exists between the ruins of the ancient city and the mouth of the Almus. This river itself, however, was sufficient to afford a shelter and place of anchorage for shipping in ancient times (Cic. ad Att. xvi. 7), and is still resorted to for the same purpose by the light vessels of the country.

No other ruins exist on the site of the ancient city except some masses of buildings, which, being in the rectilinear style, are unquestionably of Roman date; portions of aqueducts, reservoirs for water, &c. are also visible. (The site and existing remains of Velia are described by Münter, Velia in Lesconin, Sva. Altms, 1818, pp. 15—20, and by the Duc de Ligny in the Annales dell' Instituto, 1829, pp. 381—386.)

It is certain that as a Greek colony Velia never rose to a par with the more opulent and flourishing cities of Magna Graecia. Its chief celebrity in ancient times was derived from its celebrated school of philosophy, which was universally known as the Eleatic school. Its founder Xenophanes was indeed a native of Colophon, but had established himself at Velia, and wrote a long poem, in which he celebrated the foundation of that city. (Diog. Laert. ix. 2. § 20.) His distinguished successors Parmenides and Zeno were both of them born at Velia, and the same thing is asserted by some writers of Lecceus, the founder of the atomist school, though others represent him as a native of Abdera or Melo. Hence the expression of terms Velia "a city, but capable of producing great men" (Is. 5. § 28). [E. H. B.]

VELITRAE.

Of the VEILIT LACTUS (Plin. iii. 12. a. 17; Tac. Ann. i. 79; Vib. Seq. p. 24.) The character and conformation of the lower valley of the Velinus thus described in the article BRATE. Pliny has made a complete confusion in his description of the Nar and Velinus. [NAR.] The latter river runs near Rastis two considerable streams, the Soile and the Tormov, that drain the slopes of the first, which are unknown to us, but the second is probably the Tolenus of Ovid. (Fast. vi. 565.) It flows from the mountain district once occupied by the Apennines, and which still retains the name of Cetos. [TOLERNUS.] [E. H. B.]

VELITRAE (Obliterae: Flit. Obliterae. Velitrianus: Velitremus; Velitres), a city of Latium situate on the southern slope of the Alban hills, belonging to the Pomptine Marches, and on the left of the Via Appia. There can be no doubt that it was included within the limits of Latium, as that name was usually understood, at least at later times; but there is great uncertainty as to whether it was originally a Lar or a Volsinian city. On the one hand Gellius and Varus, in their histories of the origin of the Latin League, a document probably derived from good authority (Dionys. v. 61). On the other hand Dionysius himself and Livy represent Velitrae as a Volsinian city at the earliest period when it came into collision with Rome. Thus Dionysius, in relating the war of Ancus Marcius with the Volsoci, speaks of this city as a colony of Volsinians, which was besieged by the Roman king, but submitted, and was received to an alliance on favourable terms. (Id. iii. 41.) Again in n. 494, just about the period when its name figures in Dionysius as one of the Latin cities, it is mentioned both by the author and by Livy as a Volsinian city, which was wrested from them by the consul P. Varus (Id. vi. 48; Liv. ii. 30). Accordingly the Roman colony was sent there the same year, which was again recruited with fresh colonists two years afterwards. (Livy. i. 31. 34.) Dionysius, on the contrary, makes no mention of the first colony, and represents that sent in n. 492 as designed to supply the exhausted population of Velitrae, which had been reduced by the war and conscription of Ancus Marcius (Dionys. vi. 34. 13, 14). It appears certain at all events that Veltrae received a Roman colony at this period; but it had apparently again fallen into decay, as it received a second body of colonists in n. 404. (Diod. v. 34.) Even this did not suffice to secure its allegiance to Rome: shortly after the Gallic war, the Roman colonists of Velitrae joined with the Volscii in their hostilities, and after a short time beat us into open revolt. (Liv. vi. 13. 21.) They were indeed defeated in n. 381, together with the Paestines and Volscians, who supported them, and their city was taken the next year (id. 22, 29); but their history from this time is a continued succession of outbursts and hostile enterprises against Rome,whether from the Latins or Volscii out of Graecia. It seems clear that they had really assumed the position of an independent city, like those of the neighbouring Volscians, and though the Romans are said to have more than once taken this city, they did not again restore it to the position of a Roman colony. This notwithstanding its capture in n. 380, the citizens were again in arms in 370, and not only ravaged the territories of the Latins in alliance with Rome, but even laid siege to Tusculum. They were quickly defeated in the field, and Velitrae itself in its turn was besieged by a Roman army; but the siege

COIN OF VELIA.

VELINUS (Veleio), a considerable river of Central Italy, which has its sources in the lofty mountains between the Nervia (Norcia) and the Aniene (Anio). Its actual source is in the immediate neighbourhood of the ancient Falacrinum, the birthplace of Vespasian, where an old church still bears the name of Sta Maria di Fonte Velino. The upper part of its course is from N. to S.; but near Atrisco it turns abruptly to the W., and almost parallel direction as far as Rieti, and thence flows WNW. till it discharges its waters into the Nar (Nera) about 3 miles above Terni (Termonna). Just before reaching that river it forms the celebrated cascade now known as the Falls of Terni or Cascate delle Marmore. This waterfall is in its present form wholly artificial. It was first formed by M. Curtius Dentatus, who opened an artificial channel for the waters of the Velinus, and thus carried off a considerable part of the Lacus Velinus, which previously occupied a great part of the valley below Beate. There still remained, however, as there does to this day, a considerable lake, called the Lacus Velinus, and now known as the Lago ai Fil di Lago. It was on the site of this lake that the villa of Axima, the friends of Cicero and Varro, was situated. (Cic. ad Att. iv. 15; Varro, R.R. ii. 1, 8.) Several smaller lakes still exist a little higher up the valley: hence we find Pliny speaking in the plural

"A marshy pool which still exists between the ruins of the ancient city and the mouth of the Almus. This river itself, however, was sufficient to afford a shelter and place of anchorage for shipping in ancient times (Cic. ad Att. xvi. 7), and is still resorted to for the same purpose by the light vessels of the country. No other ruins exist on the site of the ancient city except some masses of buildings, which, being in the rectilinear style, are unquestionably of Roman date; portions of aqueducts, reservoirs for water, &c. are also visible. (The site and existing remains of Velia are described by Münter, Velia in Lesconin, Sva. Altms, 1818, pp. 15—20, and by the Duc de Ligny in the Annales dell' Instituto, 1829, pp. 381—386.)

It is certain that as a Greek colony Velia never rose to a par with the more opulent and flourishing cities of Magna Graecia. Its chief celebrity in ancient times was derived from its celebrated school of philosophy, which was universally known as the Eleatic school. Its founder Xenophanes was indeed a native of Colophon, but had established himself at Velia, and wrote a long poem, in which he celebrated the foundation of that city. (Diog. Laert. ix. 2. § 20.) His distinguished successors Parmenides and Zeno were both of them born at Velia, and the same thing is asserted by some writers of Lecceus, the founder of the atomist school, though others represent him as a native of Abdera or Melo. Hence the expression of terms Velia "a city, but capable of producing great men" (Is. 5. § 28). [E. H. B.]

VELITRAE (Obliterae: Flit. Obliterae. Velitrianus: Velitremus; Velitres), a city of Latium situate on the southern slope of the Alban hills, belonging to the Pomptine Marches, and on the left of the Via Appia. There can be no doubt that it was included within the limits of Latium, as that name was usually understood, at least at later times; but there is great uncertainty as to whether it was originally a Lar or a Volsinian city. On the one hand Gellius and Varus, in their histories of the origin of the Latin League, a document probably derived from good authority (Dionys. v. 61). On the other hand Dionysius himself and Livy represent Velitrae as a Volsinian city at the earliest period when it came into collision with Rome. Thus Dionysius, in relating the war of Ancus Marcius with the Volsoci, speaks of this city as a colony of Volsinians, which was besieged by the Roman king, but submitted, and was received to an alliance on favourable terms. (Id. iii. 41.) Again in n. 494, just about the period when its name figures in Dionysius as one of the Latin cities, it is mentioned both by the author and by Livy as a Volsinian city, which was wrested from them by the consul P. Varus (Id. vi. 48; Liv. ii. 30). Accordingly the Roman colony was sent there the same year, which was again recruited with fresh colonists two years afterwards. (Livy. i. 31. 34.) Dionysius, on the contrary, makes no mention of the first colony, and represents that sent in n. 492 as designed to supply the exhausted population of Velitrae, which had been reduced by the war and conscription of Ancus Marcius (Dionys. vi. 34. 13, 14). It appears certain at all events that Veltrae received a Roman colony at this period; but it had apparently again fallen into decay, as it received a second body of colonists in n. 404. (Diod. v. 34.) Even this did not suffice to secure its allegiance to Rome: shortly after the Gallic war, the Roman colonists of Velitrae joined with the Volscii in their hostilities, and after a short time beat us into open revolt. (Liv. vi. 13. 21.) They were indeed defeated in n. 381, together with the Paestines and Volscians, who supported them, and their city was taken the next year (id. 22, 29); but their history from this time is a continued succession of outbursts and hostile enterprises against Rome, whether from the Latins or Volscii out of Graecia. It seems clear that they had really assumed the position of an independent city, like those of the neighbouring Volscians, and though the Romans are said to have more than once taken this city, they did not again restore it to the position of a Roman colony. This notwithstanding its capture in n. 380, the citizens were again in arms in 370, and not only ravaged the territories of the Latins in alliance with Rome, but even laid siege to Tusculum. They were quickly defeated in the field, and Velitrae itself in its turn was besieged by a Roman army; but the siege
VELITAE.

VELLAVA or VELAUNI, a people of Gallia.

In the passage of Caesar (B. G. vii. 75) some editions have Velaun, but it is certain that whatever is the true form of the name, these Velauni are the Vellavi (Oviedo) of the Roman authors and of Caesar himself. It is evident indeed that they were still a powerful people; their troops and ravaged the Roman territories, but we have no information of their punishment (Liv. vii. 15): and it is not certain whether the city was taken in the end. In n. c. 338 they again ravaged the Roman territories, but we have no information of their punishment (Liv. vii. 15): and it is not certain whether the city was taken in the end. (Liv. viii. 12, 13.)

After the close of the war they were for a time left unharmed, but they were again ravaged by the Gauls and their local senators abandoned the city. The Tiber was then a severe p. case of their return. Their place was how occupied by a body of fresh colonists, so that it continued to be not less populous than before (Liv. viii. 14.)

VELLAUNODUNUM, in Gallia. In n. c. 52 Caesar, leaving the legions and all the baggage at Aquincum (Sens), marches on Genavius (Orleans). On the second day he reaches Vellauonum. (B. G. vii. 11.) In two days Caesar made a vaunted round Vellaunodonum, and on the third day the place surrendered, and the people gave up their arms. There is no evidence about the site of Vellaunodonum, except that it was on the road from Sens to Orleans, and was reached in the second day's march from Sens, and that Caesar reached Orleans in two days from Vellaunodonum. Caesar was marching quick. D'Anville conjectures that Vellaunodonum may be Besancon, in the old province of Glinounia; for Besancon is about 40 Roman miles from Sens, and its Roman army would march that distance in two days. Besancon is named Belin in the Pagan natinia (Valeria; Vapincum), in the acts of a council held at Soissons in 862, and D'Anville thinks that Belin may be a corruption of Vellaunus, which is the name of Vellaunodonum, if we cut off the termination dimitor. (D'Anville, Notice, etc.)

VELLEIA [VELLEIA].

VELLIGIA (G4AAM, Ptol. ii. 6. § 51), a town of the Cantabri in Hispania Tarraconensis. Uberti (ii. pt. i. p. 144) places it in the neighbourhood of Vellida, to the N. of Aguascaliente. (T.H.D.)

VELLOCASSE (VELLOCASSE, VELLOCASSE, VELLOCASSI, VELLOCASSE) is a name, Vellacaces in Pliny (iv. 18), and in Ptol. Oviedo (iv. 18). Vellacse in the country of the Belgae, and consequently north of the Scine. The number of fighting men that they could muster in n. c. 57 was estimated at 10,000, unless Caesar means that they and the Vermundalii had taken this number. In the division of Gallia by Augustus, the Velocasses were included in Lugdunensis. Their chief town was Rotemagen (Romena) on the north side of the Somme. West of the Velocasses were the Caetii, whose territory extended along the coast north of the Scine. That part of the country of the Velocasses which is between the rivers Andelle and Oise, became in modern times Ferinc Normandes and Ferinc Francais, the little river Epie forming the boundary between the two (T.H.D.)

VELIPI MONTES (V6EIL6 M6NEN, Ptol. iv. 4. § 8), a range of mountains on the W. borders of Cyrenaica, in which were the sources of the river Lathon. (T. H. D.)

VELTAE (Oviedo, Ptol. iii. 5. § 32), a people of European Sarmatia, dwelling on both banks of the 4 x 3
VENETIA, a town of Vindelicia, on the road between Augusta Vindelicorum and Brigantium (J.Lust. pp. 281. 2, Petest.), seems to have been a place of some importance, as it was the station of the prefect of the third legion, who had to guard the frontier from this town to Campidognum. (Not. Imp.) The place now occupying the site is called Wansen. [L. S.]

VENAFRUM (Obernbaerer: Eibd. Venafrum; Vensfro), an inland city of Campania, situated in the upper valley of the Venafrus, and on the Viva Latina, 16 miles from Casinum and 18 from Teanum. (Itin. An. p. 308.) It was the last city of Campania towards the N., its territory adjoining on the W., that of Casinum (S. Germano), which was included in Latium, in the more extended sense of that name, and that of Aesernia on the NE., which formed part of Samnium. It stood on a hill rising above the valley of the Venafrus from a short distance from the right bank of that river. (Strab. v. p. 238.) No mention is found in history of Venafrum before the Roman conquest of this part of Italy, and it is uncertain to what people it originally belonged; but it is probable that it had fallen into the hands of the Samnites before that people came into collision with Rome, and that the Roman government, which had appeared as a flourishing municipal town: Cato, the most ancient authority by whom it is mentioned, notices it as having manufactures of spades, tiles, and ropes (Cato, R. R. 135): at a later period it was more noted for its oil, which was celebrated as the best in Italy, and supplied the choicest tables of the great at Rome under Tiberius. (H. Corn. ii. 6. 14; Suet. ii. 4. 69; L. v. 86; Marcell. xiii. 98; Strab. v. pp. 238, 242; Varr. R. R. i. 2. 6; Plin. xv. 2. 3.)

The only occasion on which Venafrum figures in history is during the Social War, B. c. 88, when it was betrayed into the hands of the Samnite leader Marcus Egnatius, and two Roman cohorts that formed the garrison were put to the sword. (Appian, B. C. i. 147.) While more than one city resided in the great fertility of its territory (Cic. de Leg. Agr. ii. 25, pro Pomp. 9), which was one of those that the tribune Bullius proposed by his agrarian law to divide among the Roman citizens. This project proved abortive, but a colony was planted at Venafrum under Augustus, and the city continued henceforth to bear the title of a Roman, which is found both in Pliny and in inscriptions. (Plin. iii. 5. a. 9; Lib. Col. p. 329; Zumpt, de Colon. p. 347; Mommsen, Inscr. R. N. 4643, 4703.) These last, which are very numerous, sufficiently attest the flourishing condition of Venafrum under the Roman Empire; it continued to subsist throughout the middle ages, and is still a town of about 4000 inhabitants. It retains a clear name, and some vestiges of antiquity, except the inscriptions above mentioned and some shapeless fragments of an edifice supposed to have been an amphitheatre. The inscriptions are published by Mommsen. (Inscr. R. N. pp. 243-249.)

VENANTODUNUM, apparently a town of the Cenomani in Britannia Romana, perhaps Beran-
tingorum. The name appears in the Not. Imp.; though Camden (p. 502) notes it as coined by Leland. [T. H. D.]

VENASA (Oghnare), a rather important town in the district of Morimene in Cappadocia, possessing a celebrated temple of Zeus, to which no less than 8000 slaves belonged. The high priest enjoyed an annual income of fifteen talents, arising from the produce of the lands belonging to the temple. The sacredotal dignity was held for life, and the post was next in rank to the high priest of Connubia. (Strabo, iv. p. 435; Plut. Ar. 83.)

VENANDUM (Obevare, Strab. iii. p. 207, vii. p. 314), a town of the Iapodes in Illyria, and on the borders of Panonia. It is probably the modern Vindischa-Groža; but some have identified it with Brinjelj. [T. H. D.]

VENEDAE (Obereselis, Proel. iii. 5. § 19): a town of the Geodsus, in Gallia, 46; Plin. i. 12. 27; considered by people of European Saranians as situated in the N. declivity of the mountains named after them, and along the Sinus Venedecium about the river Cer- nos, as far as the E. bank of the Vistula. They were the northern neighbours of the Galindae and Githo- thees; but Tacitus was doubtful whether he should call them Germans or Saranians, though they were termed the Sarmatians by the Romans. (Cf. Strab. Sarm. Alkab. p. 75, seqq., p. 151, sect. X. ; der Abbandon der Slaven, p. 21.)

VENEDICI MONTES (v. Oberschäfels, cp. Proel. iii. 5. § 15), certain mountains of European Sarma- tia, bounding the territory of the Venedae on the S. They were probably the low chain of hills which resembled the former so much as to be named the Pobodi. (T. S.)

VENEDICUS SINUS (Oberschäflischen, Proel. iii. 5. § 1), a bay of the Sarmatic ocean, or Bahr named after the Venedae who dwelt upon it. It lay to the E. of the Vistula, and was in all probability the Gulf of Riga; a view which is strengthened by the name of Vindes belonging to a river and town in Courland. [T. H. D.]

VENELLI. [USELLI.]

VENELIOCASIAI. [VLOCASAESIAI.]

VEYENERIS MONS. [AEPHODIOMUS MONS.]

VEYENERIS PORTUS. [PORTUS VENISERIS.]

VENETI (Oliveretr), a Celtic people, whose over- cress Caesar names Venetia (B. G. ii. 39). The Ve- neti lived on the coast of the province of (B. G. E. 4. 5) and were one of the Arminic or Maritime states: Celtic. On the south they bordered on the Nar- netes or Naunetes, on the east they had the Redes and on the north the Oasianii, who occupied the nw. eastern part of Breugnum. Strabo (iv. p. 192) was a great mistake in supposing the Veneti to be Beloi. He also places them to the latter in some of his critics supposed to be Paphlogonians; however, he gives all this only as conjecture. The chief town of the Veneti was Darioignum, afterwards Veneti, now Poznan [Darioignum]. The river Wesser may have been the southern boundary of the Veneti. Caesar (B. G. iii. 9) describes the coast of Veneti as cut up by innumerable bays into a labyrinth of the com- munication by land along the above. Most of the towns (B. 12) were situated at the extremity of tongues of land or peninsulas, so that when the tide was up the towns could not be reached on foot, nor could ships reach them during the ebb, for the water was then too shallow. This is the character
VENETI.

VENETIA. 1271

of the coast of the French department of Morbihan, which corresponds pretty nearly to Caesar's Veneta.

On this coast there are many bays and many "linguine" as Caesar calls them (Ponentes). The most remarkable peninsula is Gueheve, which runs out into the sea near 10 miles, and is inundated at high water. The Veneti commanded the sea in these parts, and as the necessities of navigation often drove vessels to their ports, they made them pay for the shelter. The Veneti had trade with Britain, with Devonshire and Cornwall, the parts of the island which were nearest to them. They were the most powerful of the British Britons. Their vessels were made nearly flat-bottomed, in order that they might the better take the ground when they were left dry by the ebb. The heads were very high, and the sterns strong built, to stand the violence of their seas. The material was oak. Instead of ropes they had chain cables, the use of which has been revived in the present century. Strabo (iv. p. 195) writes as if the ropes of the rigging were chains, which is very absurd, and is contradicted by Caesar, who says that the yards were fastened to the masts by ropes, which the Romans cut asunder in the sea-fight with the Veneti (iii. 14). Instead of sails they used skins and leather worked thin, either because they had no flax, or not by importing Q. Veturius and hitherto as the Romans supposed it to be more likely, because flaxen sails were not suited for the tempests of that coast.

The Veneti rose against the Romans in the winter of B.C. 57, and induced many other neighbouring states to join them, even the Morini and Menapii. They also sent to Britain for help. Caesar, who, while on this expedition (B.C. 57-56), sent orders to build ships on the Loire, probably in the territory of the Andes, Turonos and Carnutes, whose legions were quartered, and the ships were floated down to the Ocean. He got his rowers from the Province, in the meantime he came himself into Gallia. He protected his rear against attack by sending Labienus to the country of the Treviri, to keep the Belgae in confusion, and he made his change from crossing the Rhine. He sent P. Crassus with twelve cohorts and a large body of cavalry into Aquitania to prevent the Celtae from receiving any aid from these parts; and he kept the Unelli [Unelles], Carausii and Lexovi in check by sending Q. Titurius Sabinus into those parts with three legions. D. Brutus commanded Caesar's fleet and the Gallic ships furnished by the Pictones and Santones, and other states that had been reduced to obedience.

Caesar began the campaign by besieging the Venetian towns that were situated on the extremities of the tongues of land; but as the Veneti had abundance of ships, they removed themselves by water 'from town to town, and they could no longer resist the besieger. They did this during a great part of the summer, and Caesar could not prevent it, for he had not yet got together all his ships. After taking several of their towns he waited for the remainder of his fleet. The Veneti with about 120 of their best equipped ships came out of port to meet the Roman fleet; but they could not do the Gallic ships any damage by driving the heads of their vessels against them, for the Gallic ships were too high at the prow and too strong; nor could the Romans have attacked them by raising wooden frameworks on their decks, for the Gallic ships were too high. The only advantage that the Roman ships had was in the oars, which the Gallic ships had not. They could only trust to their oars. The Romans at last fixed sharp hooks at the end of long poles, and laying hold of the enemy's rigging with them, and then putting their own vessels in motion by turning the capes asunder, and the yards and sails falling down, the Venetian ships were useless. Everything now depended on courage, in which the Romans had the advantage; and the men were encouraged by the presence of Caesar and the army, which occupied all the hills and higher ground which commanded a view of the sea. The Veneti, though they generally the Venetian, two or three about each, for they had the advantage in number of vessels, and the men began to board the enemy. Some ships were taken and the rest tried to sail away, but a dead calm came on and they could not stir. A very few ships escaped to the land at nightfall. The battle lasted from the fourth hour in the morning to sunset. Thus was destroyed the first fleet that was formed on the coast of the Atlantic. The Veneti lost their ships, all their young men of fighting age, and most of their men of mature age and of rank. They surrendered unconditionally. Caesar put to death all the members of the Veneti state assembly, on the ground that they had violated the law of nations by imprisoning Q. Veturius and had been sent into their country in the previous winter to get supplies for the Roman troops who were quartered along the Loire (B.C. iii. 7, 8). The rest of the people were sold by auction; all, we must suppose, that Caesar could lay hold of. Thus the territory of the Veneti was nearly depopulated, and all active commercial people was swept from the earth. The Veneti never appeared as a powerful state. When Vercingetorix was rousing all Gallia to come against Caesar at Alesia (a. c. 52), the contingent of all the Armoric states, seven or eight in number, was only 6000 men (B.C. vii. 75).

Dion Cassius (xxix. 40—43) has four chapters on the history of this Venetian war, which, as usual with him, he puts in connection with the events in Egypt and Caesar and making his own silly additions. [G.L.]

VENETIA (Ocubervia; Eth. Oeubweros or Evxrois, Venetus), a province or region of Northern Italy, at the head of the Adriatic sea, extending from the foot of the Alps, where those mountains descend to the Adriatic, to the mouths of the Padus, and westward as far as the river Atthens (Adria), or the bank of the Benacus. But the boundaries of the district seem to have varied at different times, and there is some difficulty in determining them with accuracy. In early times, indeed, before the Roman conquest, we have no account of the exact line of demarcation between the Veneti and the Cenomani, who adjoined them on the W., though according to Livy, Verona was a city of the latter people. As soon as the Roman conquest, the whole of Venetia was at first included as a part of Cisalpine Gaul, and was not separated from it till the time of Augustus, who constituted his Tenth Region of Venetia and Istri at, but including within its limits not only Verona, but Brixia and Cremona also (Plut. iii. 18. a. 52, 19. a. 33), both of which were certain parts of the Cenomani, and seem to have continued to be commonly considered as belonging to Cisalpine Gaul. (Plut. iii. 1. § 31.) Some authors, however, extended the appellation of Venetia still further to the W., so as to include not only Brixia and Cremona, but Bergamum also, and regarded the Adda as the boundary.
VENETIA.

(P. Dian. Hist. Lang. ii. 14). But in the later period of the Roman Empire the Athesis seems to have been generally recognised as the W. boundary of Venetia, though not so strictly as to exclude Verona, the greater part of which was situated on the right bank of the river. Towards the N. the boundary was equally indefinite: the valleys and southern slopes of the Alps were occupied by Rhetian and Euganean tribes; and it is probable that the limit between these and the Veneti, on their S. frontier, was always vague and arbitrary, or at least determined merely by nationality, not by any geographical boundary, as is the present day. In the Roman time, the river Susa was navigable for several miles, and in the Roman time, the Rhone was still navigable for several miles; and it is probable that the limit between these and the Veneti, on their S. frontier, was always vague and arbitrary, or at least determined merely by nationality, not by any geographical boundary, as is the present day.
VENETIA.

1 of Troy, and there founded the city of
1. (Livy i. 1; Virg. Aen. i. 242; Serv.

This legend, so generally adopted by the
and later Greeks, seems to have been cur-
arily as the time of Sophocles. (Strab. xiii.

Some writers, however, as Diodorus Siculus
.itanter, and merely represented the tribe of
ri, after having lost their leader Pyrauemnes
Trojan War, as wandering through Thrace
and of the Adriatic, where they ultimately
ed themselves. (Id. xii. p. 543; Sermyn.

Whether there be any foundation for
ry or not, it is evident that it thrown no
on the national affinities of the Italian Ve-
he other two tribes of the same name would
lead our conjectures in two different direc-
From the occurrence of a tribe of Veneti
the Transalpine Gauls, just as we find among
people a tribe of Cenomani and of Senones, cor-
inging the northern side of the Alps, it would seem a very
inference that the Veneti also were a Gaul-
se, who had migrated from beyond the Alps.

a must be opposed the fact that, while a :
historical tradition of the successive migrat-
of the Gaulish tribes in the N. of Italy has
examined and transmitted to us (Livy v. 54,

h trace is recorded of a similar migration of
neti; but, on the contrary, that people is un-
distinguished from the Gauls: Livy expressly
of them as occupying the same tract which
id in his time not only after the first Gaulish
ion, but before the plains of Northern Italy
occupied by the Etruscans (B. 39); and Poly-
mphatically, there is evidence that it hail
rent people from the Gauls their neighbours,
using a different language, though resembling
much in their manners and habits (ii. 17).

also speaks of them as a distinct people the
Gauls, though he tells us that once of
their origin derived them from the Gaulish
of the same name that dwell on the shores of
cean. (Strab. iv. p. 193, v. 212.) But
is certainly no ground for rejecting the distinct
ment of Polybius, and we may safely acquiesce
conclusion that they were not of Celtic or
ish origin.

the other hand the existence of a tribe or
on the southern shores of the Balkan, the
n to the Romans (through their German neigh-
s) as Veneti or Veneti, a name evidently iden-
that of the Wenden or Wendis, by which
Slavonian race in general is still known to the
nans, would lead us to regard the Italian Veneti
as probably a Slavonian tribe; and this seems
the most plausible hypothesis. There
ing improbable in the circumstance that the
onians may at an early period have extended
r migrations as far as the head of the Adriatic,
left there a detached branch or offshoot of their
stock. The commercial intercourse of the
set with the shores of the Baltic, a traffic which
and already established at a very early period,
ry be the more readily explained if we
have been carried on by tribes of the same origin.
rodotes indeed represents the Veneti as an Illyrian
(e. i. 196, v. 9); but it seems probable that the
name of Illyrians was applied in a vague sense to all
mountains that occupied the eastern coasts of
Adriatic, and some of these may in ancient times
been of Slavonian origin, though the true

Illyrians (the ancestors of the present Albanians)
were undoubtedly a distinct people.

Of the history of the Veneti as an independent
people we know almost nothing; but what little we
do learn indicates a marked difference between them
and their neighbours to the north, the Liburnians and Illyrians on the other. They appear
to have been a commercial, rather than a warlike,
people; and from the very earliest days of history
carried on a trade in amber, which was brought over-
land from the shores of the Baltic, and exchanged
by them with Phœnicians and Greek merchants.

Hence arose the fables and myths which described the
production of that substance to the land of the Veneti, and ul-
timately led to the identification of the Eridanae
of Northern Europe with the Padas of Northern Italy.

[ERIDANA.] Herodotus mentions a peculiar custom
as existing among the Veneti in his day, that they
sold their daughters by auction to the highest
bidder, as a mode of disposing of them in marriage
(i. 196). We learn also that they habitually wore
black garments, a taste which may be said to be re-
tained by the Veneti down to the present day,
but was connected by the poets and mythographers
with the fables concerning the fall of Phaeton.

(Sermyn. Ch. 596.) Another circumstance for which
they were distinguished was the excellence of their
horses, and the care that they bestowed on breeding and
training them, a fact which was appealed to by
many as a proof of their descent from Antenor and
“the horse-training Trojans.” (Strab. v. pp. 219, 215.)

It is clear that they were a people considerably more
advanced in civilization than either the Gauls or
the Liburnians, and the account given by Livy (c. 2)
of the landing of Cleomenes, the King of Sparta, in
Patavium (n. c. 302) proves that at that period Patavium
at least was a powerful and well organized city.

Livy indeed expressly contrasts the Veneti with the
Illyrians, Liburnians, and Istrians, “gentes feras et
magnas ex parte latrocinis maritimis insanae.” (Jb.)

On this occasion we are told that the citizens of
Patavium were kept in continual alarm on account
of their Gaulish neighbours, with whom they seem
to have been generally on unfriendly terms. Thus
at a still earlier period we are informed by Polybius
that the retreat of the Senonian Gauls, who had
taken the city of Rome, was caused by an irrup-
tion of the Venetians into the Gaulish territory
(i. 18). It was doubtless this which induced them,
as soon as the Roman arms began to
make themselves felt in Northern Italy, to conclude
an alliance with Rome against the Gauls (n. c. 215),
to which they appear to have subsequently adhered
without shewn fidelity. (Polyb. ii. 23, 24.) Hence
while we afterwards find the Romans gradually carry-
ing their arms beyond the Veneti, and engaged in
frequent hostilities with the Carni and Istrians on
the extreme verge of Italy, no trace is found of any
collision with the Veneti. Nor have we any account
of the steps by which the latter passed from the
condition of independent allies to that of subjects of
the Roman Republic. But it is probable that the
process was a gradual one, and grew out of the mere
necessity of the case when the Gauls had be-
quered Istria and the land of the Carni, in which
last they had established, in n. c. 181, the powerful
colony of Aquileia. It is certain that before the
close of the Republic the Veneti had ceased to have
any independent existence, and were comprised, like
the Gaulish tribes, in the province of Gallia Cisalpina,
which was placed under the authority of Caesar, n. c.
VENETIA.

58. The period at which the Veneti acquired the Roman franchise is uncertain; we are only left to infer that they obtained it at the same time as the Tarentines and Gades, in a. c. 49. (Dion Cass. xii. 55.)

Under the Roman Empire, Venetia (as already mentioned) was included, together with Istria, in the Terra Regia of Augustus. The land of the Carni (Corone regii, Ptol. iii. 18, c. 22) was at this time considered, for administrative purposes, as a part of Venetia; though it is still described as distinct by Pliny (v. i. § 25, 26); and there is no doubt that the two nations were originally separate. But as the population of both districts became therapeutically diminished, all trace of this distinction was lost, and the names of Venetia and Istria alone remained as such. These two continued to form one province, and we meet with mention, both in inscriptions and in the Notitia, of a "Corruste Venetiae et Istriae," known as the class of Venetiae in the Notitia.

[Note. p. 441; Venet. Jurisd. 1460. 3191.] The capital of the united provinces was Aquileia, which rose under the Roman Empire to be one of the most flourishing cities of Italy. In its prosperity was derived, not from its wealth and manufactures, but from its situation, the very entrance of Italy, on the highroad which became the great avenue of communication between the west and East, which the constant war with the Ætoliæ, the same circumstances led to this part of Venetia become the scene of repeated contests for power between two emperors. Thus it was before Aquileia that the Emperor Maximin perished in a. d. 238; it was on the banks of the river Alus (Alaun) that the younger Constantine was defeated and slain, in a. d. 312; and there was the state of the city in the days of the Ætoliæ. The town was renamed in the time of Constantine II.

Aquileia fell in a. d. 499; it was on the river Sauris that the Franks were defeated by the Ætoliæ in the latter year. (Hist. M. C. xvi. p. 50.)

It appears that Venetia had become under the Roman Empire a very rich and flourishing district; hence Aquileia and Verona were again named in the Notitia, and many new cities, such as Cormorone, Akeria, Forum, were founded, whose names are now inscribed in memory, or forgotten. On the other hand, the territory of the Ætoliæ was annexed to the province of Venetia; and the inhabitants of both nations lived together in peace and security from the wars of the Ætoliæ.

The province included the cities of the Ætoliæ, which were the scene of constant wars, and hence it was called the "province of the Ætoliæ." This province was divided into two districts, the Aulica or Ætolian, and the Istrie; the latter containing the cities of Istria and Epirus.

Within these limits, amidst the wilderness of the Alps, that are thrust forward towards the plain, there are two distinct groups of h. k. a., known as the Celli Eppani and Montani Ætolorum; of them wholly isolated from the main range of the Alps, and, in a geological sense, connected with them, but being classed as a separate group in the Notitia. The name of the Eppani is given to this group of mountains, which is a name given to them by the Ætoliæ, from the name of the Ætolia; but there can be no doubt that these Ætoliæ, with those of Istria, Cremona, Aquileia, and Aquitania, were at one time of the Ætoliæ, a few miles from the Ætoliæ, evidently a relic of the period when they were possibly the greater part of the country, and undoubtedly derived from a very early time. The Ætoliæ is not noticed by any ancient writer, but the name of Eppani is given by the
VENETIA.

to the hill above the baths of Aponna, one of the group in question; and Martial gives the name of "Euganeas Oras" to the hills near the town of Atete (Esie), at the southern extremity of the same range (Lucan, vii. 160; Mart. x. 93). There can, therefore, be no doubt that this beautiful range of hills was known in ancient times as the Euganei Colles.

The rivers of Venetia are numerous, but, for the reasons already mentioned, not always easy to identify. Much the largest and most important is the Arvino (Adige), a much more important river, which rises in the Alps above Belunum (Beluno), flows past that city and Feltria (Feltre), and enters the sea a few miles E. of Altitum: then the Licturacia (Lecceas), and Fluvius Adige (Adige), which rises under the walls of Concordia. South of this comes the Tiltavemptus (Tiglitamentum), the most important of the rivers of the E. portion of Venetia, having its sources in the high ranges of the Alps above Julium Carnicum, whence it traverses the whole plain of the Carinthian, nearly in a direct line from N. to S. Beyond this come several minor streams, the Triburca, Natiso, and Fromus, which still preserve their ancient names, as the Torre, Natio, and Itano. But after this, we enter the lower part of their course, the Natiso having formerly flowed under the walls of Aquileia, about 4 miles W. of its present channel, while the Itonio, which now unites with it, originally followed an independent channel to the sea, near Monfalcono. The Itonio receives a considerable tributary from the elevated table-land of the Kastel, and was known in ancient times as the Phuvius Friolitius.

It was by this valley of the river that the great highway from the banks of the Daunus to the Alps, after crossing the dreary highlands of Caramida, descended to Aquileia and the plains of Venetia. On the extreme confines of the province the little river Timavus must be mentioned, as one of the classical accounts, though of no geographical importance; and the Formio (Risano), a few miles S. of Tergeste, which, from the time of Plovian, constituted the limit between Venetia and Istria. (Plin. iii. 18. 22.)

The cities and towns of Venetia may now be enumerated in geographical order. Farthest to the W., and farthest into the Adriatic, was the important city of Verna. Considerably to the E. of this was Vicentia, and beyond that again, Patavium. S. of Vicentia, at the southern extremity of the Euganean hills, was Atete (Esie). On the border of the lagunes, at their N. extremity, was Altitum, and 30 miles farther to the E., Concordia. Island from these by Optinemium and Tarvisium, both of them considerable towns; and on the slopes of the hills forming the lowest underfalls of the Alps, the smaller towns of Acellum (Asolo) and Ceneta (Cesano), the name of which is found in Agathias and Paulinus Diaconus (Agath. Hist. Goth. ii. 8; P. D. c. ii. 13), and was in all probability a Roman town, though not mentioned by any earlier writer. Still farther inland, in the valley of the Plavis, were Felthia and Belunum. E. of the Tiltavemptus, and therefore included in the territory of the Carni, were Aquileia, near the sea-coast; Portum Julei, N. of the preceding; and the town called to the W.; and Julium Carnicum, in the upper valley of the Tiltavemptus, and in the midst of the Alps. Tergeste, on the E. side of the bay to which it gave its name, was last city of Venetia, and was indeed by many writers considered as belonging to Istria. [Tergeste.]

Besides these, there were in the land of the Carni several smaller towns, the names of which are mentioned by Pliny (iii. 19. a. 23.), or are found for the first time in Paulinus Diaconus and the Geographer of Ravenna, but were in all probability Roman towns, which had grown up under the Empire. Of these, Fiamon (Fliom) is probably Flavenga, in the valley of the Tagilamentum; Oespum (P. D. iv. 88) is still called Ospoto, and is said to lie in the same valley; and Artenia, Artigna, a few miles S. of the preceding. Cormoes (Corome) is still called Cormo, a small town between Cividale and Gradisca; and Puccium (Pilin., Ptol.) is Duino, near the sources of the Timavus.

The other obscure names mentioned by Pliny (l.c.), and of which he himself says, "qualiter sensim haud dicere non attingit," were not apparently for the most part mountain tribes or communities, and cannot be determined with any approach to certainty.

Venetia was traversed by a great line of highroad, which proceeded from Aquileia to Verona, and thence to Mediolanum, and formed the great highway of communication from the latter city to the Danube and the great road of the Eastern Empire. It passed through Concordia, Altinum, Patavium, Vicentia, and Verona. From Patavium a branch struck off from Atete and Anicinum (probably Legnano on the Adige) to join the Aemilian Way at Mutia. A still more direct line of communication was established from Altinum to Ravenna by water, through the lagunes, and was communicated from one to another of these sheets of water. This line of route (if such it can be called) is briefly indicated by the Antonine itinerary ("indo [a Ravenna] navigantur Septem Maria Altinum usque," p. 126); while the stations are given in detail by the Tabula; but from the fluctuations that the lagune have undergone, few of them can be identified with any certainty. [E. H. B.]

VENETIA, in Gaul. [VENETI.

VENETICAE INSULARI, in Gallia, mentioned by Pliny (iv. 19.), are the numerous small islands along the coast of Venetia, or the modern department of Morbihan. The largest is Belle-ile. The others are Eouat, Hede, Groues, and some others. Perhaps the peninsula of Quiberon may be included. [VENETI; VENDILIA.] [G. L.]

VENETUS LACUS. [BRAHMIANTUS LACUS.]

VENIANTIA, a place in Galliaecis in Hispania Tarraconensis, on the road from Bracara to Asturica. (Ibn. Ant. p. 423.) Variously identified with Vindusca, Varsana, and Remuo. [T. H. D.]

VENICYONES (Obiciacens, Ptol. ii. 3. § 14),
people on the E. coast of Britannia Barbara, S. of the estuary of the Tamesis (Murrey Fowl), in Fortheshire and Aberdoneshire. [T. H. D.] 

VENNES, a tribe of the Cantabri in His panis Terracosminis. (Plin. iii. 3. a. 4.) [T. H. D.] 

VENNICIII (Ovistroei, Ptol. ii. 2. § 3), a people in the NW. part of Hibernia, between the promontories Boreum and Venificentum. [T. H. D.] 

VENNICIONIUM PROM. (Ovistroei, Horse, Ptol. ii. 2. § 3), the most northerly headland of Hibernia, usually identified with Malin Head; but Camden (p. 1411) takes it to have been Rome's Head. [T. H. D.] 

VENNONES (Ovistroei or Osirnones), a tribe of the Rhaetian (Ptol. ii. 12. § 3), or according to Strabo (iv. pp. 204, 206), of Vindelicia. They are described as the wildest among the Rhaetian tribes, and are no doubt the same as the Venonones who, according to Pliny (iii. 24), were mentioned among the nations of the Alpine Trophy. They seem to have inhabited the district about the sources of the Atheis, which bore the name of Vesonogew or Finesgew as late as the eleventh century. (Von Hornsray, Gesch. Tirols. i. 1. p. 35.) [L. S.] 

VENNONAE, a town in Britannia Romana apparently belonging to the Coritavi, at which the road from London to the NW. part of Britain separated, one branch proceeding towards Deva, the other taking a NE. direction towards Lindum and Eboracum. There was also another branch to the SW. towards Venta Silurum, so that the two main roads which traversed the whole island must have crossed here. (Hous. Hist. ii. 470, 477, 478.) Variously identified with Higbrocros, Cleebrook, and Wigeaton Pever. [T. H. D.] 

VENOSTES, probably a branch of the Venonae, a Rhaetian tribe, were mentioned in the Alpine Trophy, of which the inscription is quoted by Pliny (iii. 24). In the middle ages their district bore the name of Venustana Vallis. (Zexaus, Die Deutschen, p. 237.) [L. S.] 

VENTA, the name of several towns in Britannia Romana. 
1. Venta Belgarum (Obervara, Ptol. ii. 3. § 98), in the SW. of Britain, on the road from Londinium to Calleva and Isca Dumnoniorum. (Itin. Ant. p. 479. 2d. i. Geogr. Rav. v. 31.) 
2. Now Winchester, where there are some Roman remains. (Camden, p. 713.) 

2. Venta Silurum on the W. coast of Britannia Romana, on the road from Londinium to Isca Silurum, and near the estuary of the Sabrina. (Itin. Ant. p. 483.) 
Now New West in Monmouthshire, where there are traces of the ancient walls, and where Roman antiquities are (or were) occasionally found. (Camden, p. 713.) 

3. Venta Icenorum, a town of the Iceni, on the E. coast of Britannia Romana (Ptol. ii. 3. § 21), to which there was a road from London. (Itin. Ant. p. 479.) 
4. Most probably Caistor, on the river Wensum, a little S. of Norwich, which probably rose from the ruins of Caistor. Here are traces of Roman remains. (Camden, p. 713.) [T. H. D.] 

VENTIA (Ovistroei), in Gallia Narbonensis, a town of the Allobroges, mentioned only by Dion Cassius (xxxvii. 47) in his history of the war between the Allobroges and C. Pompeius the governor of Gallia Provincia (a. c. 62). Manlius Lentinius, a legatus of Pompeius, came upon this town, but was driven from it. The place appears to be near the Isaro (Javo) from Dion's narrative, and D'Anville following De Valois supposes it to be Visena, between Murene and S. Furia, at a distance from the bank of the Isaro. Anon is unknown otherwise, it may be a ledger (a.s.) and the place may be Visena. [L.] 

VENTISPONTE, a town in Hispa. Agricol. Hist. B. HISP 27, which appears from all inscriptions to have been set up by Publ. Domatianus. (Uberti. ii. p. 1. p. 366; 1 Bac. Soc. nee. under the name of Yestum. (Tamen. ii. p. 617; Eckhel, i. p. 31; Cassius, ii. p. 29.) [L. S.] 

VENUESIA (Ovistroei: Ebb. Venuesia moes), a city of Apulia, situated on the Apenn. about 10 miles S. of the river Anilus, which adjoined the frontiers of Lucania, so that it was near to Horace, himself a native of the place. It is doubtful whether it belonged properly to Lucania. Apulia, and the territory of the city, was annexed to the Roman colony, included a portion of its nations. (Hor. Sat. ii. 1. 34, 35.) The Muse of Horace leaves it doubtful whether it was originally belonged, though it is more probable, it was an Apulian city, and that it received its name from the accession of territory from Lucania. Indeed, distinctly assigned it to Apulia i. i. 16; Ptol. iii. 1. § 73; Liti. (Cal.) But no mention of it is found in horace on the occasion of its capture by the Roman colonists, in a. c. 269 (Dios. Ex. E. Epist.), when we are told that it was a populous and the town. A large part of the inhabitants were turned to the sword, and, shortly afterwards, a Roman colony was established there by order of the emperors. (Livy. iii. 14; Val. iii. 14; Hor. i. 14.) The town is said to have been 20,000, which were either a mere remnant of an expend, or to have been the end of the new colony, being a populous and flourishing place, and was the most important services to the Roman state. Second Punic War. It was at Vence the same time that the consul Terentius Varro took refuge with his army after the great defeat at Cannae (a. c. 216), where he was generally able to extricate his army, and the Roman colony was developed, and declared themselves ready to send troops and supplies required of them. (Livy. 20. 41; Appian, p. 56.) But the colony suffered severely from these excursions, and, in a. c. 209, after the war, it was found necessary to ruin the
VENUSIA. 1277

hausted strength with a fresh body of colonists. (Liv. xxxi. 49.) From this time Venusia seems to have always continued to be a flourishing town and one of the most considerable places in this part of Italy. It had an important part in the Social War, having early joined in the outbreak, and became one of the principal strongholds of the allies in the south of Italy. (Appian, B.C. i. 39, 42.) In the second year of the war its territory was ravaged by the Roman praetor Conosimus, but we do not learn that the city itself fell into his hands. (Ib. 52.) At all events it did not suffer severely, as it is afterwards mentioned by Appian as one of the most flourishing cities of Italy (ib. iv. 3) and Strabo also notices it as one of the few cities in this region which retained their consideration in his time (v. p. 250). It received a colony of veterans under the Triumvirates (Appian, B.C. iv. 3; Zumpt, de Colon. p. 332.) and seems to have retained the rank of a Colonia under the Empire, as we find it retaining that designation both in Pliny and in inscriptions. (Plin. iii. 11. s. 16. Orell. Inscr. 867; Mommsen, Inscr. R. N. 735, 745.) Its position on the Appian Way doubtless contributed to its prosperity, and it is mentioned more than once by Cicero as a customary halting-place in proceeding from Rome to Brundisium, and in the year 62 B.C. it is said that the great orator had himself a villa there, as one of his letters is dated "de Venusino" (ad Fam. xiv. 20). But the chief interest of Venusia is undoubtedly derived from its having been the birthplace of Horace, who was born there in the consulship of L. Manlius Torquatus and L. Aurelius Cotta, in the year 65 B.C. (ib. v. 140.) The poet lived here till he died, and the poet's tomb is said to have remained until 538 when it was brought to Rome. (Pausanias, ii. 5. 2.) The city has therefore a double interest, as arising from the poet and the poet's birthplace. (Ib. xiv. 10.) It is true that the poet's tomb was destroyed in the civil wars. (Id. Ep. ii. 2.)

"We hear nothing of Venusia under the Roman Empire, but it is certain from the Liber Coloniarum, which mentions it among the Civitates Apuliae, and from the Itineraries, that it continued to exist as a city, and apparently one of the most considerable in its part of Italy. (Ptol. iii. 1. § 73; Lib. Colon. p. 210, 261; Itin. Ant. pp. 104, 113, 121; Tab. Peut.) This is further confirmed by inscriptions, one of which is called "plaudita civitas Venusinarum." (Mommsen, L.I. R. N. 706.) It retained the same consideration throughout the middle ages, and is still an episcopal city with about 6000 inhabitants. Its antiquities have been illustrated with a refusion of erudition by Italian writers, but it has a great number of churches, and is a place of much interest; though fragments of ancient edifices, mosaic pavements, &c., have been found in the ancient city, as well as numerous inscriptions. These last have been collected and published by Mons. Lupoli, in his Marmorae Venusinae.

COIN OF VENUSIA.

VERCELLIÆ. (added as an appendix to the Liber Venosinum, 4to. Neapol., 1797), and more recently by Mommsen, in his Inscriptiones Regni Neapolitani (pp. 39-48). Concerning the antiquities of Venusia in general, see the work of L. Rea, already quoted, and that of Cimiglia (Antiquitates Venosinae, 4to. Neapol. 1757.)

[E.H.B.]

VEPITENUM or VEPITENUM, a place in the district occupied by the Venostes in Rhaetia, between Veldidena and Tridentum. (It. Ant. pp. 275, 280; Tab. Peut.) Its modern representative is, in all probability, the town of Sterzing on the road to the foot of the Brenner. (L.S.)

VERAGRI (Ouippyyow). The Veragi are placed by Caesar (B.G. iii. 1, 6) in the Valais of Switzerland between the Nantnates and the Seduni, [Nantnates; Seduni. Their town was Octodurus (Martigney), whence the Veragi are called Octodurani by Pliny (Octodurum). Dion Cassius (xxxix. 5), using Caesar as he generally used him, says that the Veragi extended from the territory of the Allobroges and the Leman lake to the Alps; which is not true. Strabo (iv. p. 204) mentions the Veragi, as he calls them, between the Caruriges and the Nantnates and Pliny (iii. 20) between the Seduni and the Salassi; the Salassi are on the Italian side of the Alps, and the Seduni on the Swiss side. (Ptol. xxxvi. 23) places the Veragi among the Alps and on the road to the pass of the Pennine Alps, or the Great St. Bernard, which is correct. He says that the pass was occupied by half German tribes. (G.L.)

VERBANUS LACUS (Ouipfyiras Aipra: Lago Maggiore), one of the principal lakes of Northern Italy, formed by the union of the Ticino and the fewest of the Ticino and the earthworks. (Ptol. iii. 19. s. 24.) It is the largest of the three great lakes of Northern Italy, whilst its modern name of Lago Maggiore; though Virgil appears to have considered the Larian as the largest, as he calls it, "Te, Lari mazime," and singularly enough does not mention the Verbanns at all. (Georg. ii. 150.) Strabo, by a strange mistake, deascribes the lake as flowing from the Lake Verbanus, and the Ticinum from the Larian (iv. p. 209): this may, perhaps, be an error of the copyists, but is more probable an accidental blunder of the author. He gives the length of the lake at 400 stadia, or 40 geo. miles, which is somewhat below the truth, the actual length being 45 geo. miles: its breadth does not exceed 4 or 5 miles, except in one part, where it expands to a width of from 8 to 10 miles. (E.H.B.)

VERBICE or VERICES (Ouipyfeyxas or Ouipyfeyaes, Ptol. iv. 1. § 10), a people of Mauretania Tingitana. (T.H.D.)

VERBIGENUS PAGUS. [HELVESTI, Vol. I. p. 1041.]

VERBINUM, in Gallia, is placed by the Itins. on a road from Bacoeminum (Bobetum) to Durconcum (Reims). Durconcum is between Bagacum and Verbium (Durnun). All the several distances between Bagacum and Durconcum do not agree in the Antonine Itins. and the Table. The sum total of these distances in the Table is 53 M. P., and in the Itins., though they make the several distances as above to 63 M. P., still gives the sum total at 53 M. P. But these must be Gallic leagues, as D'Anville shows. He supposes Verbinum to be Vervins, which in fact is the same name as Verbinum. The table writes it Vironum. Vervins is in the department of Aisne, about 20 miles NE. of Laon. (G.L.)

VERCELLIÆ (Ouippyyow), Ptol. iii. 1. § 36;
VERASUECA.

Osternaulus, Strab. v. p. 218; Verusellus, Plut. Mar. 25: Vereduli, the chief city of the Libici, in Gallia Cisalpina. It lay on the W. bank of the Sesia (Sessus); but perhaps the ancient town should be sought at Berge Vereduli, about 2 miles from the modern city. In the time of Strabo it was an unfortified village (L.c.), but subsequently became a strong and not unimportant Roman municipium. (Tat. Barb. 70; C. de Cruce, Ov. ed. 8; also Orell. Inscr. 3044, 3945.) Here the highroad from Ticinium to Augusta Praetoria was crossed by a road running westwards from Mediolanum. (Itin. Ant. pp. 282, 344, 347, 350.) At the beginning of the 5th century it was rapidly falling to decay. (Hieron. Epit. 17.) There were some gold mines at a place called Iscimani, or Vices Iscimantium, in the district of Vereduli (Strab. L.c.; Plin. xxxiii. 4. s. 31), which must have been of considerable importance, as the last cited authority mentions a law forbidding that more than 5000 men should be employed in them. The true position of these mines has, however, been the subject of some dispute. The question is fully discussed by Durandi in his treatise De origine et antiquitate Veredulli. The city was distinguished for its worship of Apollo, whence it is called Apollinense Veredullas by Martial (x. 12. 1); and there was in its vicinity a grove, and perhaps a temple sacred to that deity (Stat. Silv. i. 4. 59), which is probably to be sought at a small place called Ptolomeo, at the foot of the Alps. (Cf. Cic. Fam. xi. 19; Plin. iii. 17. s. 21; Belniat, Antiquit. de Vereduli.)

[T. H. D.]

VERASUECA, a harbour belonging to the town of Argenomuscin, in the territory of the Cantabri, in Hispania Tarraconensia. (Plin. iv. 20. s. 34.) Probably Puerto de S. Martin. (Cf. Flores, Esp. Topogr. xxiv. p. 44.)

VERELA. [VARIA.]

VEBIBOCUM (Ospesxetum, Strab. Pltol.: Esth. Verecinum: Sto Maria di Vereto), a town of Calabria, in the district or territory of the Sallentines, and within a few miles of the Iapygian promontory. Strabo tells us that it was formerly called Baris, and describes it as if it were a seaport town; but both Pliny and Ptolemy rank it among the inland towns of the Sallentines, and there seems no doubt that the site of the old church of Sto Maria di Vereto, the name of which is found on old maps, between the villages of Selice and Roggiano, about 6 miles from the Campo di Lecce, and 10 from Tuseo, the correct distance given in the Tabula from Ussetam to Veretum. (Strab. vi. p. 261; Plin. iii. 11. s. 16; Ptol. iii. 1. § 76; Tav. Fest.: Galateo, de Sit. Iap. p. 99; Holsten, and Clem. p. 263; Ronselli, vol. ii. p. 35.) The "agor Veboica" is mentioned also in the Liber Coloniarum (p. 283) among the "civitates Coloniae," and doubtless comprised the whole district as far as the Iapygian promontory.

[K. E. H. B.]

VERG. [BRETT.] VERGELLUS, a rivulet or torrent, which crossed the field of battle of Cannae. It is not indeed mentioned by either Livy or Polybius in their circumstantial accounts of the battle, but it is noticed by both Florus and Valerius Maximus in connection with a story that seems to have been current among the Romans, that its course was choked up by the dead bodies of the slain, to such an extent that the Carthaginian troops crossed over it as a bridge. (It. ii. 6. § 18; Val. Max. ix. 2. Ext. § 2.) The same incident is alluded to by other writers, but without mentioning the name of the stream. E. Ital. viii. 668; Lucian, Dial. Mrt. 12. § 2: the stream meant is probably a rivulet or stream into the Aufidus on its right bank, between Cancer and Cassium, and is called by Sicer.

[EB.]

VERGENTUM, a place in Hispania Tarraconensis, between the mountains of Julia Gemina (Flas. i. 1. xiv. 4.; Nov. Græco, Orat. 8.) Vergiliana, Plin. iii. 3. s. 4), a town of theic Lambisci, in Hispania Tarraconensis. It has been identified by some writers with Maricius. (Var. Geogr. Ana. i. p. 31; Mestanz, Epist. 186.)

[T. H.]

VERGUUM, a fortress in Hispania Tarraconensis (Liv. xxxiv. 31). Reichard has placed upon adequate grounds, identifies it with the Berge.

[EB.]

VERGOANOUM. [L. TEXTA.]

VERGUI, the name of an Alpine post mentioned in the Trophy of the Alps (Flas. i. 1. xiv. 4.) They are supposed to be represented in a picture of Vergienses, between [Saxi, Silv. and Clandesum, and about half-way between their places.

[G. L.]

VERISA (Bhipura), a town in the province of Pontus, on the road from Sebastapola to Nicaea. (It. Ant. pp. 205, 214; Basil. Marz. Epist. 8.) Its site is yet uncertain, some identifying it with Blinius, others with Blinius, Antonio Römer, Hoerstra von Versa und Alpen (p. 28.)

VERNEA, a fort in Baskia, as a name from above the banks of the river Altes, not far from Triduntum, where its site is still marked by the Turb.* (Cassiod. Ver. 48; Paul. Diacon. where it is called Ferringe; Pallianes, Ausser Römer, Hoerstra von Versa und Alpen (p. 28.)

VERNOBEBRUM, a river of Galicia Minor, mentioned by Plinei (ii. 4) after the Tera, which is the Tetis (Tecumia) of Mela. Flory did not mention the Telis or Tetis (Ter), and it is not conjectured that he gives the name of Vernebiubrum to the Tetis. But there is a river Cary near the north of the Tet and not far from it, which flows into the Mediterranean at Asseraden, and the name of the Cary is Still called Probable or Vebrinum, which is certainly the Vernebiubrum. (For a notice, etc.)

VERNOBEBRUM, in Aquitania, is placed in the Praetorium in a road from Besucorios (Besancon) to Tolosa (Toulouse). This river runs through Lusitania Consutum and Caesaraugustae in between Colerigoi (Conse) and Coloniae Antoniniana. The name is written as Vernebiubrum in the Censorial and Vernoebubrum in the Notitia. (L. Ti.)

VERNOEDESSE, as name does not exist in any document earlier than the Notitia Gallicanum, which was probably drawn up at the commencement of the fifth century. The civitates Veroebodiennam in the Notitia is the name of a people, and is named last in the list of the Belgae. The name Veroebodiennam is written as Veroneboenenum in the Notitia, as Veronobodinum in the Censorial, and Veronobodinum in the Vernoebuas in the Veroebodiennam. (L. Ti.)
VERODUNUM.

It is Virodumum, Viridunum, and Viridun-cha last abbreviated form comes nearest to which is the capital of the Verodunenses, in west of Meas, in the department of which the Maese or Meuse. There was a seat of Pisii near Rouen (Now Noyes, Strab. v. p. 128; Strabo. Ant. p. 166. 2.) The surrounding country was exceedingly fruitful, producing good wine, excellent apples, and abundance of spelt (alica, Plin. xvi. 11. a. 29, xiv. 1. 3. a. 8, xv. 14. a. 14; Cassiod. Var. xii. 4). The Rhodian wine also is praised by Virgil. (G. ii. 49; cf. Strab. iv. 206; Suet. Oct. 77.) The situation of Verona rendered it a great thoroughfare and the centre of several highways (Cassiod. Ant. pp. 198, 174, 275, 292; It. Hier. p. 558.)

Verona was celebrated in history for the battle fought by Marius in the Campi Raudii, in its neighbourhood, against the Cimbri. (Vell. Pat. ii. 19; Florus, i. 3.) From an inscription still extant on one of its gates, now called the Porta di Borsari, the walls of Verona appear to have been erected in the reign of the emperor Gallienus, A. D. 265. It was besieged by Constantine on his march from Gaul to Rome, and, though obstinately defended by Rufinus Pompeianus, obliged to surrender at discretion. (Pamog. Vet. i. 3. x. 9, sqq.) It was likewise the scene of the victory of Theodoric over Odoacer. (Jorn. Gord. 57.) Theodoric made it one of his residences, and often held his courts for business; a representation of his palace is still extant upon a seal. (Gibbon, Decl. and Fall, vol. v. p. 22, ed. Smith.) It was at Verona that the splendid wedding took place between king Autharis and Thedelinda. (Procop. B. G. iii. 5; Paul. Diaec. iii. 28.) But, more than by all these events, Verona is illustrious as having been the birthplace of the famous Amor, with his love, and Mercutio, with his suit. Between these two, between the walls of Verona, stand two monuments of the ancient art, and two great cities of the Venetian republic. (Cassiod. V. iv. 27.) The town is that of the famous Veronese, author of the "Lettere di amore e di amicizia." (T. H. D.)

VERONA. 1879

Livy, v. 85. (Cf. Justin, xx. 5.) We know little or nothing of the early history of Verona. Under the Roman dominion it became a colony with the surname of Augusta, and one of the finest and most flourishing cities in that part of Italy (Tac. B. ii. 8; It. Misc. Ant. p. 166. 2.) The surrounding country was exceedingly fruitful, producing good wine, excellent apples, and abundance of spelt (alica, Plin. xvi. 11. a. 29, xiv. 1. 3. a. 8, xv. 14. a. 14; Cassiod. Var. xii. 4). The Rhodian wine also is praised by Virgil. (G. ii. 49; cf. Strab. iv. 206; Suet. Oct. 77.) The situation of Verona rendered it a great thoroughfare and the centre of several highways (Cassiod. Ant. pp. 198, 174, 275, 292; It. Hier. p. 558.)

Verona was celebrated in history for the battle fought by Marius in the Campi Raudii, in its neighbourhood, against the Cimbri. (Vell. Pat. ii. 19; Florus, i. 3.) From an inscription still extant on one of its gates, now called the Porta di Borsari, the walls of Verona appear to have been erected in the reign of the emperor Gallienus, A. D. 265. It was besieged by Constantine on his march from Gaul to Rome, and, though obstinately defended by Rufinus Pompeianus, obliged to surrender at discretion. (Pamog. Vet. i. 3. x. 9, sqq.) It was likewise the scene of the victory of Theodoric over Odoacer. (Jorn. Gord. 57.) Theodoric made it one of his residences, and often held his courts for business; a representation of his palace is still extant upon a seal. (Gibbon, Decl. and Fall, vol. v. p. 22, ed. Smith.) It was at Verona that the splendid wedding took place between king Autharis and Thedelinda. (Procop. B. G. iii. 5; Paul. Diaec. iii. 28.) But, more than by all these events, Verona is illustrious as having been the birthplace of the famous Amor, with his love, and Mercutio, with his suit. Between these two, between the walls of Verona, stand two monuments of the ancient art, and two great cities of the Venetian republic. (Cassiod. V. iv. 27.) The town is that of the famous Veronese, author of the "Lettere di amore e di amicizia."
VERONES.

diameter being 515 feet externally and 248 internally; the smaller one, 410 feet externally and 147 feet internally. The banks or rows of seats are at present 45 in number, but, from the repairs and alterations which the building has undergone, it is not certain whether this was the original number. It is estimated that it would afford seats for about 20,000 persons.

There are also a few remains of a Roman theatre, on the left bank of the Adige, at the foot of the hill immediately under the castle of S. Pietro. It appears from two decrees of king Berengarius, dated in 895 and 913, that the theatre was then regarded as of the highest antiquity, and had in great part gone to ruin; on which account its destruction was allowed. (Add. di Verona, pt. ii. p. 108, sqq.)

We have already alluded to the ancient gate called the Porta de Boarnari. It is evidently older than the walls of Gallienus, the elevation of which in the space of 8 months is recorded upon it; since a previous inscription has been erased in order to make room for the new one. It is a double gate, of a very fine arch, the façade of which is surmounted by the heads of a group of men. The inscriptions of architecture have held widely different opinions. The walls of Gallienus, to judge of them from the vestiges which still remain, were of a construction sufficiently solid, notwithstanding the shortness of the time in which they were erected. The other remains of antiquity at Verona, as the Forum of Augustus, the Basilica, etc., do not require any particular description in this place.

The works of Verona and its antiquities are the splendid ones of Count Scip. Maffei, entitled Verona Illustrata, and Musaeum Veronense. Omnium Panvinianus also described its remains (Antiq. Veron. lib. viii. Pat. 1668). Some account of them will likewise be found in the Description of Verona e della sua Provincia, by Giovanni Battista de Pertico, 8vo, Verona, 1820. [T. H. D.]

VERONES. [BERONES.]

VERRUCINI, a Gallic people near the Alps in the Provincia. Pliny (iii. 4) says, "Regio Cama-
tulliae, dein Suectere, supraquae Verrucini." [CAMAULIACI; SCHELTER.] There is nothing to give us an idea of the position of the Verrucini, except their position with respect to these two other tribes, and the fact that there is a place named Vercins, between Drunignams and Ries. Drun-
ignins is in the department of Var, and Ries is on the site of Reih (Rei Apollinaris). [G. L.]

VERRUGO or VERBUCA (Verbouca, Dioc.: Colle Porvo), a town or fortress in the territory of the Volsci, which is repeatedly mentioned during the wars of the Romans with that people. The name first occurs in B.c. 445, when we are told that the place had been recently occupied and fortified by the Romans, evidently as a post of offence against the Volsci; a proceeding which had rendered them so much that it escaped the Roman arms. (Liv. iv. 13.) We do not know at what period it fell again into the hands of the Volsci, but in B.c. 409 it was recovered and again garrisoned by the Romans. (Ib. 55, 56; Dioc. xiv. 11.) It, however, fell once more into the hands of the Volsci in B.c. 407 (Liv. iv. 58), and apparently continued in their possession till B.c. 394, when once more it was taken by a garrison by the military tribune C. Aemilius, but lost soon after in consequence of the defeat of his colleague Sp. Postumius. (Liv. v. 28; Dioc. xiv. 98.) From this time it wholly disappears from history. It was very doubtful whether it ever was a

town, the manner in which it is said to have been

in connection with the Arx Cottanius, seems to
prove that it was a mere fort or camp, gener-
ally and fortiñed, and on account of its natural
advantages and advantageous position. Its site must have been considered with any certainty, but from the war there can be no doubt that it was situated on a

knoll or peak; hence its remains were

sought by Nibby (followed by Alken) at Verci,
nei Segnai; Colle Socci, in its present

bourhood, has an plausible a claim. (Nestor,
forms, vol. iii. p. 473; Geol. Top. of Europe;
Abeken, Mittel-Italiens, p. 75.) [I. E.]

VERTACOMICORI, a people of the Veneto in Gallia Sequanae, to whom Piiny (iv. 56) says the
tributes of the foundation of Novia is due. The
name is said to be preserved in Vercuria, a district in the old county of Vocontii, in the northern part of the territory of
Dra Vosonarii. In some maps it is represented as the place next to Vercurium, which is the next step to Forum in the Roman Via Julia. [T. E.]

VERERAE, a town of the Brigantes in Nor-
mania Romana. (Inst. Ant. pp. 467, 476) Ver-
identified with Brough in Westmorland, Ing.

[ERT.

VERTINAE (Oberprignana; Ferun), a small

of Bruttium, mentioned only by Scalco (v. i.

bchi), who is uncertain as to whether it is in

the interior of the country or on the coast, is

now retained by the village of Trisambe, about 7 miles NW. of Streborg, the capital of

[ERT.

VERUBUIUM (Oberprignuna, Pr. vii. 3.), a
promontory on the N. coast of Bruttium, must probably mean Ceos Head. [ERT.]

VERUCINAE (Der. Verucinae; Foro), a city

of the Hernici, but included in Latium is the

name of a place mentioned in the Inscriptions of the valley of the Sacco, between Anzio and the valley of the Lidia. It was a city of the Hernici. The city was called Citium by the Vercini, but its name is not mentioned separately in the final war of that people with Rome, in B.c. 427. On that occasion the cities of Verucinae, with those of Alatrium and Fermonia, were, against the Amencani, and refused to join in the hostilities against Rome. For this reason they were rewarded after the termination of the war by being left in possession of their own

and magistrates, which they preferred to the Roman "citizens." (Liv. i. 48, 43;) the city is known in history to which it can be referred. Under the Roman dominion Verucinae became a town, of somewhat obscure country town. According to the Liber Coloniarum it received a town, and was elevated as a town by the colonists in the time of the Gracchi and their followers. But it is probable that it always retained its municipal rank. It is mentioned by Pliny among the municipal towns of the Fifth Region (Pont. iii. 3. a. 9), and was not noticed in history. Its seceded position rendered it a place of small importance. [ERT.]}
VERULIAMUM.

ancient site is still occupied by the modern town of Verulamium, which retains also some portions of the ancient walls in the polygonal or Cyclopean style. (Westphal, Rom. Kämp., p. 87; Abeken, Mittelitalien, p. 147.)

VERULIAMUM. [VERULIAMUM.]

VERURUM (Ostrogord, Psol. v. ii. § 7), a town in the N. part of Lusitania, perhaps S. Vescantum de Betria (T. H. D. ii. 19), a town in Media Acratapetana, perhaps the same as the present Casar. [V.]

VESCELLIA, a town of the Oretani in Hispania Tarraconensia (Livy xxxiv. 29), perhaps Vichce. (Ukert, ii. pt. i. p. 413.) [T. H. D.]

VESCELLIUM or VESCELLUM, a town of the Hirpini, of uncertain site. Its name is mentioned by Livy (xxvii. 37) as having been recovered by the orator M. Valerius, after it had reverted to the Carthaginians. The reading in Livy is very uncertain, but Pliny also mentions the Vescellium among the municipal communities of the Hirpini. (Plin. iii. 11. s. 16.) [E. H. B.]

VESCI FAVENTIATIA (Ostros, Psol. v. § 11), a town in Hispania Baetica, between Silab and Astigi. (Plin. iii. 1. a. 3.) [T. H. D.]

VESICIA (Eh. Vesicis), a city of Latium, in the most extended sense of that name, but originally a city of the Ausones, situated in a plain to the S. of the Liris (Carviga). Livy in one passage tells us distinctly that the Ausones had three cities, Ascopes, and Vesicium, which were betrayed into the hands of the Romans by a party within their walls, and the inhabitants put to the sword in b. c. 314. (Livy. iv. 25.) The name f Vescia is mentioned also about 25 years before a. d. 315, and its residents are styled Vescenses in Decius s. a. c. 346. (Id. viii. 11.) But after the capture of the city in 314, mention of it again occurs, and it is probable that it never recovered from that calamity. Muntanana indeed is the only one of these three cities which again appears in history; but the "ager Vescensii" is repeatedly mentioned (Livy. x. 30, 21, 31), and would seem to have extended from the banks of the Liris s. a. c. 305. (Mom. ii. 38.) That both towns were towns of the Ausones, is expressly said to have been planted "in saltu escino." (Livy. x. 21.) But all trace of the city seems to have been lost. Pliny does not even notice the name among the earliest cities of Latium northward, and we are wholly without a clue to a precise situation. [E. H. B.]

VESCATANIA, a district in Spain mentioned by Pliny (iii. 3. a. 4.) [Oeca.] [T. H. D.]

VEDDIANTIL (VEDDIANTIL)

VESEBERIS, a river of Campania, the name of which is known only in connection with the great battle fought with the Latins by T. Manlius Torquatus and P. Sempronius, b. c. 30. That battle is mentioned by Livy as having been fought "hand praecox ricinni Vessvari montis, qua ad Vessarin ferretat" (viii. 8), an expression which would leave us in doubt whether Vesavius was the name of a town or a river. In another passage he refers to the same battle as having been fought "ad Vessarin" (x. 28); ad Vessarium also being used as "norma ad Vessariam" or "apud Vessarium." (Cic. de Fin. i. 7, de Gf. iii. 31.) Valerius Maximus uses the latter phrase (vi. 4. § 1). The only author whose expressions are free from ambiguity is Aurelius Victor, who distinctly speaks of that celebrated battle as being fought "apud Vessarin fluvium" (de Vir. Ill. 29), and adds that the Romans had pitched their camp on its banks ("positis apud Vessariam fluvium castris," P. 30). The authority of Victor is not indeed worth much on points of detail, but there is no reason to reject it in this instance, as it is certainly not the city of Vessavia of Livy and Cicero. The Vessavia was probably a small stream, and is not mentioned on any other occasion, or by any geographer, so that it is wholly impossible now to identify it. [E. H. B.]

VESIO'NICA, a town of Umbria mentioned only by Pliny, who names the Vesiociones among the municipal communities of that country. (Plin. iii. 14. a. 19.) It is supposed to be represented by Civitella di Borenacone, in the upper valley of the Tiber, 7 miles SE. of Perugia. (Oliver, Ital. p. 627.) [E. H. B.]

VESONTIO (Ostrosuor, Psol. ii. 9. § 21: Berokeson), in Gallia, the chief city of the Sequani. The name occurs in Dion Cassius (xxxvii. 94, lixii. 24), where Belmarus, son of Balba, King of the Sequani, is said to have been buried in the MSS. reading Osterosuor, without any reason. In Ausonius (Ooratorius Act.) the form Vssontio occurs; and he speaks of a "municipalis schola" in the place. The orthography of the word varied, as we might expect; and other forms occur in Ammianus. D'Anville says that the name is Vessant on a milestone which bears the name of Druides, and was found at Mandoura [EPMANDUOORUM, in which article the name is incorrectly printed Veson].

When Caesar (a. c. 58) was marching through the country of the Sequani towards the German king Ariovistus, he heard that the German was intending to occupy Vessonitio, but Caesar got there before him (B. G. i. 38). He describes the town as nearly surrounded by the Doubs (D'Anville), and says that the part which was not surrounded by the river was only 600 Roman feet wide. This neck of land was filled by an embience, the base of which on each side was washed by the river. There was a wall along this neck of land, which made it a strong fortress, and the wall connected the heights with the town. Caesar's description of the width of the neck of land, which D'Anville says is about 1500 Roman feet; and accordingly either Caesar was mistaken, or there is an error in his text in the numerals, which is always a possible thing. Vesonitio when Caesar took it was well supplied with everything for war, and its position made it a strong place. Caesar set out from Vesonitio to right the German king, whom he defeated in the plain between the Vesos and the Rhine. The battle-field was only 5 miles from the Rhine (B. G. i. 53, in which passage the true reading is "milia passuum... circiter quinque," not "quinquaginta."). In the winter of a. c. 56—57 Caesar quartered his men among the Sequani, and we may assume that Vesonitio was one of the places where he has his troops billeted.

Vesonitio has been several times sacked and destroyed by Alemanni, by Hunns, and others. It is a town built on the ruins of former towns. The ground has been raised above 20 feet, and where it has been dug into, Roman remains, medals, and other antiquities have been discovered. The modern town consists of two parts. The upper town, once called La Ville, is built on the peninsula, and the citadel stands on the steep

VESTINI.

rates. (Liv. Epit. xxxvi., xxxvii.; Appian, B. C. i. 53; Oros. v. 18.) There is no doubt that at this time received the Roman franchise, and henceforth became merged in the ordinary condition of Roman citizens. Hence we have now more of the truth than though it is evident that they retained their existence as a separate tribe, which is recognised by all the geographers, as well as by inscriptions. (Strab. v. p. 241; Plin. iii. 12. s. 17; Ptol. iii. 1. § 59; Orell. Inscriptiones antiquae 4636.) From the last source we learn that they were enrolled in the Quirinian tribe. Their towns are: Milli, in the province of Augustus (Plin. L c.), but in the later division of Italy it was separated into two, the maritime district being united with Picenum, while the inland portion or valley of the Aternum was included (together with the Sabines and Peligni) in the province of Valeria. (Lib. Coloniae pp. 227, 228; Sabinus' Eccles. Antiq. ix. ch. 5, sect. 3.) We learn from Juvenal that they continued to retain their primitive simplicity and rustic habits of life even under the Roman Empire. (Juv. xiv. 181.) Silius Italicus speaks of them as a race, hardy and warlike, and habituated to the chase: their rugged mountains were doubtless still the refuge of many wild animals. (Sil. Ital. viii. 513.) The more inland parts of their territory, like the other inland towns in the valleys of the Napo and the Metauro, produced a kind of cheese that was highly esteemed at Rome. (Plin. xi. 42. s. 97; Martial, xiii. 31.)

The most important feature of the territory of the Vestini is the Monte Corno or Gruppo Sasso dell'Italia, which, as already observed, is the highest summit of the Apennines. This was identified by Pliny (viii. 517) with the Mons Fessiculnus, a name much better known, among the Vestini; and though this is opposed to the statement of Pliny that that mountain contains the sources of the River, there seems much reason to believe that Pliny has here confounded the Napo, to which they belonged, with their (Nar), which really rises in a group closely connected with the Gruppo Sasso, and that it was therefore that remarkable mountain range which was known to the ancients as the Mons Fessiculnus.

The following towns are noticed by ancient writers as belonging to the Vestini. Fissa, now called Civita di Fossa, appears to be the name of one of those which were situated on the eastern slope of the mountains. Lower down, and only a few miles from the sea, was Angulus, now Civita S. Angelo. Aternum, at the mouth of the river of the same name, now Pesaro, was the seaport of the Vestini, and, being the only one along this coast for some distance, served also as that of the Marrucini. In the valley of the Tenna stands: Pedropolitanus (Anconedum), about 14 miles S. of Aquila; Avrila, the remains of which are still visible at Fossa, about 6 miles S. of Aquila; and Perusium, still called Torre di Pierno, about 2 miles E. of the same city, which must have immediately adjoined the territory of Ammertine. Fuscocinum, the ruins of which are still visible, is little to the S. of Aquila; though an important place in the early part of the middle ages, is not mentioned by any writer before Paulinus Diaconus (Hist. Langob. ii. 20), and was certainly not a municipal town in the time of the Romans. Pusenium (mentioned only in the Tab. Peut.) is of very uncertain site, but is supposed to have been near Ar.
town with water. There are also remains of a Roman citadel. On a hill which commands Vesuvius, and is separated from it by the river Isce, there are the remains of a Roman camp, which is called Camp de Cézere, though Cæsar never was there; but some of his successors may have been there. There are several other Roman camps about Périgoux. Several Roman roads have been traced leading to Périgoux, and there is a very extensive position in Aquitania during the imperial government of Rome. There is a French work on the antiquities of Vézéme by M. Wilgrin de Taillefer, 3 vol. 4to. 1811, Périgoux. [G. L.]

VESUVIUS MONS (Oevoeis, or Oevoeis; Monte Vesuvio), sometimes also called by Latin writers Daino Vesuvius, and Vesuvius or Vescovian (Békes, Dion Cass.), a celebrated volcanic mountain of Campania, situated on the shore of the gulf called the Crater or Bay of Naples, from which it rises directly in an isolated conical mass, separated on all sides from the ranges of the Apennines by a broad tract of intervening plain. It rises to the height of 4050 feet, and its base is nearly 30 miles in circumference. Though now celebrated for the frequency as well as violence of its eruptions, Vesuvius had in ancient times been so long in a quiescent state that all tradition of its having ever been an active volcano was lost, and until after the Christian era it was noted chiefly for the great fertility of the tract that extended in all the sides of its slope a little below (Virg. Geor. ii. 227; Strab. v. p. 247), a fertility which was in great measure owing to the deposits of fine volcanic sand and ashes that had been thrown out from the mountain. There were not indeed wanting appearances that proved to the accurate observer the volcanic origin and nature of Vesuvius; but the absence of volcanic rocks being so marked a sign of its having been a burning mountain in times long past" (Diod. iv. 21); but though he considers it as having on this account given name to the Phlegraean plains, he does not allude to any historical or traditional evidence of its former activity. Strabo in like manner describes it as "surrounded by fields of the greatest fertility, with the exception of the borders, which were overgrown with bushy thickets," and adds that "the mountain was almost level, and wholly barren, covered with ashes, and containing clefts and hollows, formed among rocks of a burnt aspect, as if they had been eaten away by fire; so that a person would be led to the conclusion that the spot had formerly been in a state of conflagration, and had craters from which fire had burst forth, but that these had been extinguished for want of fuel" (v. p. 247). He adds that the great fertility of the neighbourhood was very probably owing to this cause, as that of Castana was produced by Mount Aetna. In consequence of this fertility, as well as of the beauty of the adjoining bay, the line of coast at the foot of Vesuvius was occupied by several flourishing towns and villages, and by numbers of villas belonging to wealthy Roman nobles.

The name of Vesuvius is twice mentioned in history before the Christian era. In B.c. 340 it was at the foot of this mountain that was fought the great battle between the Romans and the Latins, in which P. Decius devoted himself to death for his country. (Livy viii. 3.) The precise scene of the action is indeed uncertain, though it was probably in the plain on the N. side. Livy describes it as "hand procul radicibus Vesuvii montis, qua via ad Veserim referat," but the situation of the Veseris is wholly uncertain. [Veseris.] Again at a later period (c. 73) we are told that Sestus, via the fugitive slaves and gladiators under his command, took refuge on Mount Vesuvius as a stronghold, and by a sudden assalt from it defeated the Roman general Claudius Pulcher, who had been sent against him. (Flor. lli. 20. § 4; Plut. Cam. i. 116; Val. Pat. ii. 50; Ov. m. 4. 201; Persius iii. 24; Virg. Aen. x. 598.)

But it was the fearful eruption of the 14th of August, a. d. 79, that first gave to Vesuvius celebrity that it has ever since enjoyed. That vast catastrophe is described in detail in a well-known letter of the younger Pliny to the historian Tacitus; but more briefly, but with the addition of some want of height, the account spread abroad laterly so as to form an idea that of a stone-pit, out of which huge masses which have been observed in many subsequent eruptions. The other phenomena described are very much the same as are common to all similar eruptions; but the mass of ashes, sand, and pumice thrown out was so vast as not only to bury the city of Herculanenum and Pompeii at the foot of the volcano under an accumulation many feet deep, but to overwhelm the more distant town of Stabiae, where the elder Pliny perished by suffocation, and to overspread the whole bay with a cloud of ashes such as to cause a darkness more profound than that of night even at Misenum, 15 miles distant from the foot of the mountain. (Plin. l. c.) On the other hand the outflow of lava was considerable, and the water of the sorrentine lakes, to which a great amount of ashes and cinders were conveyed, washed away the cities of Pompei and Stabiae. Tacitus speaks of the Bay of Naples as "periclimax sinus, ante quam Vesuvius meas arcesserit foci loci verteret." (Ann. iv. 67.) Martial, the descanting on the beauty of the scene when the mountain and its neighbourhood were covered with the green shades of vines, adds:—

"Cuncta jacent flammeis et tristi mosa favis" (ix. 40).

and Statius describes Vesuvius as

"Asinula Trimarica volvovs inexacta fumakes" (Silv. iv. 4. 80).

(See also Val. Flacc. iii. 208, iv. 507; Sil. lib. xviii. 594; Flor. i. 16. § 5.)

A long interval again elapsed before any similar outbreak. It is probable indeed that the mountains continued for some time at least after this first eruption to give signs of activity by sending forth mists and sulphurous vapours from its crater, as which Statius probably alludes when he speaks of its emit still threatening destruction ("neque de se radiat occasiones minari crescat") (Silv. iv. 4. 85). But the next recorded eruption, and probably the next of any magnitude, occurred in A. d. 203, and is noticed by Dion Cassius (Ixxvi. 2). This is pro...
VESUVIUS MONS.

bably the one alluded to by Galen (de Meth. v. 12), and it 
seems certain from the description given by 
Dion Cassius of the state of the mountain when he 
wen (under Alexander Severus) that it was then 
in a state of occasional, but irregular, activity, much 
resembling that which exists at the present day. 
(Dion Cass. Ixvi. 21.) The only other eruption 
that has taken place since the time of Tarragona 
ocurred in A.D. 472 under the reign of Anthemius. 
(Varro, Chron. ad ann.) A fourth, which 
took place in the reign of Theodoric king of the 
Goths (A.D. 512), is noticed by both Cassiodorus 
and Procopius, who describe in considerable detail 
the phenomena of the mountain. It appears certain 
that these later eruptions were accompanied by 
the discharge of streams of lava, which caused great mis-
chief to the surrounding country. (Cassiod. Ep. 
iv. 50; Procop. B. G. ii. 4, iv. 35.)

It would be foreign to our subject to trace the history 
of the mountain through the middle ages, but it may 
be mentioned that its eruptions seem to have been far 
more rare and separated by longer intervals than 
the earlier ones; and in some instances at least these intervals 
were periods of perfect quiescence, during which the moun-
tain was rapidly losing its peculiar aspect. Even as 
late as 1611, after an interval of little more than a 
century, the sides of the mountain were covered with 
forests, and the crater itself was overgrown with 
shrubs and rich herbage. (Danbery on Volcanoes, 
p. 225.)

At the present day Vesuvius consists of two dis-
tinct portions: the central cone, which is now the 
most elevated part of the mountain; and a ridge 
which encircles this on three sides at some distance, 
and is separated from it by a level valley or hollow 
called the Acri d'Acri. The northern ridge, of 
which the highest point, near its N. extremity, is called 
Monte Somma, was probably at one time contiguous 
on all sides of the circle, but is now broken down 
both on the S. and W. faces: hence the appearance of Veu-
vius as viewed from Naples or from the W. is that of 
a mountain having two peaks separated by a deep 
crevice. This character is wholly at variance with 
the statements of Strabo, who says that the summit 
was nearly level, but with cliffs and 
slopes on it, from which fire appeared to have 
been formed for some time (v. p. 247). Hence it is probable 
that the mountain was then a single truncated cone, and 
that the vast crater-like hollow of which the Acri 
del Casale forms part, was first created by the 
action of the active crater of A.D. 79, which blew into the air 
the whole mass of the then existing summit of the mountain, leaving the present ridge of Monte Somma standing, enclosing a vast crater, within which the 
present cone has gradually formed. (Danbery on 
Volcanoes, p. 215; Lyell's Principles of Geology, 
p. 365, 8th edit.) It has indeed been frequently 
suggested that the appearance of the mountain was 
partly already mentioned (Flor. iii. 20; Plat. Cossu. 9) 
that the mountain had even then a crater, within 
which that leader and his band were enclosed by 
the Roman general: but it is very doubtful whether the 
passages in question bear out this interpretation, which 
seems at variance with the account given by Strabo, who 
describes the mountain by every appearance of being de-
uced from personal observation.

(Concerning the history of the different eruptions of Vesuvius see Della Torre, Storia del Vesuvio, 4to, 
Napoli, 1755; and the geological work of Dr. Dan-
bery, ch. xii.)

[285]

VETULONIA.

[CASTRA VETERA.]

VEETONA (Etch. Vettonensis; Bettona), a mun-
icipal town of Umbria, situated about 5 miles E. 
of the Tiber, between Perusia and Mevania. It is 
mentioned by Pliny among the municipalities of 
Umbria, and its name is found also in an inscription 
among the "xv Populi Umbriarum;" while another 
inscription mentions it in lower Umbria. In Tarragona 
it was only about 10 miles distant, as measured 
on the map, though the Tabula calls it 14 miles from 
that city and 20 from Tuder. (Pllin. iii. 14. a. 19; 
Orell. Inscr. 95, 98; Tab. Punt.) Vettona con-
tinued in the middle ages to be a city of con-
siderable importance, but it was destroyed by the 
Peruvians in 1382. The present site, however, 
is only marked by the village of Bettona, about a 
mile from the left bank of the Tinfia. [E. H. B.]

VEETONES (Obertones, Strab. iii. p. i52; 
Obertones, Ptol. ii. 5. § 9), one of the principal 
peoples of Luatania. (Casas. B. C. i. 38; Pllin. iv. 
21. s. 38; Gurr. Inscr. p. 363. 7.) Strabo alone 
assigns them to either Iberia, or the Province 
Tarraconensis. We find them first at the mouth of 
Vettonia, by Prudentius (Hymn. de Evol. v. 186) and 
in an inscription. (Orelli, no. 3664.) It 
was watered by the Tago, and separated by the Durius 
from Asturia on the N. On the W., where their 
boundary corresponded very nearly with that of 
modern Portugal, they adjoined the proper Lusi-
tani. On the E. they lay between the coast and 
Hispuria Tarraconensis, and their boundary would 
be described by a line drawn from the modern 
Simancas in a SW. direction over Puente del Arno-
biapo to Truxillo. On the S. they were bounded 
by the province of Bastea, so that their country 
comprehended a part of Extremadura and Leon. 
Their principal towns were Salmantica (Salamanca), 
Ceclienium (Benavente), Capara (las Ventas de 
Carpata), Sentio (in the neighbourhood of Los 
Santos), Cottaobriga (Almeda), Angustobriga (Ciudad 
Rodrigof), &c. In their country grew the herba 
Vettonica (Pllin. xxv. 7. a. 46), still known under 
the name of botony; an account of which is given 
in the treatise De Herba Betonica, ascribed to 

VETULONIA or VETULONIUM (Ostetóla-
via, Ptol. iii. 1. § 49; Etch. Vetulonensis), one of 
the twelve principal cities of the Etruscan confedera-
tion (Dionys. iii. 51; Pllin. iii. 5. a. 8). Yet we 
hear nothing of its political history; and all we 
know respecting it is, that it was reputed to be the 
town in which the Etruscan insignia of magistracy, 
afterwards adopted by the Romans, such as the 
lictors, fasces, sella currida, toga praetexta, &c., 
as well as the trumpet, were first used. (Sil. It. viii. 
423, sqq.; cf. Dionys. iii. 61; Strab. v. p. 220; 
Marc. S. i. 6; Flor. L. i. 5; &c.)

The destruction of Vetulonia, and the silence of 
history respecting it, have caused great error 
its site to be a matter of doubt. Thus it has been sought at or 
ne Viterbo (Anno, Antiqu. Var. Vols.), at 
Massa Marittima, the ancient Massa Veterensis 
(Ann. Marc. xiv. 11. § 25), or in a dense wood 5 
miles to the W. of that town (Ximenes, ap. Inghiram, 
Ricerciere di Vetulonia, p. 62; cf. Targioni-Tosetti, 
Vetulonia in Tosciola, and also the small 
Vulci (Loc. Buonaparte, Aen. Ital. 1829, p. 188, 
SQQ.); and Valierani, Mus. Chius. i. p. 68) on 
the hill of Castiglione Berardi, near Monte Rotondo 
(Inghirim, Ricerciere di Vetulonia, Ambrosch), and at 
Orbietello (Ermolao Barbaro, ap. Dempster, Etrur. 
4).
Reg. ii. 56). But till very recently the opinion most commonly adopted was that of Leonardo Alberti, an antiquary of the 16th century, who placed it on Monte Calei (Descrip. d. Italia, p. 37), in a wood called Selva di Velleta; and who has been followed by Oliverina (Ital. Ant. ii. 2. p. 472), by Mühler (Etrusk. i. p. 211), &c. It is now, however, generally admitted that Vetulonia is to be identified with the remains of a city, discovered in 1842 by Sig. Pasquinelli, an Italian engineer, at Magliano, a village between the Oea and the Albegna, and 8 or 10 miles to the N. of Orbetello. To Mr. Dennis (Cities and Sepulchres of Etruria, vol. ii. ch. 48), however, is to be assigned the credit of first identifying these remains as those of the lost Etruscan city. Their site agrees with what we learn respecting that of Vetulonia. Pliny and Ptolemy (ll. cc.) agree in placing the latter among the inland colonies of Etruria; yet Pliny (ii. 103. s. 106) also describes it as being not far from the sea, and as having hot springs, the Aquae Vetuloniacae, in its neighbourhood. Now, all the necessary conditions are fulfilled by the remains discovered. The thickness of the walls, about 14 miles, shows it to have been an important city; its situation with regard to the sea agrees with the account of Pliny; and near Talamone Ciccia, at a distance of only 200 or 300 yards from the coast, and in the vicinity of the newly found city, warm springs still exist. For other reasons which led Mr. Dennis to the conclusion to which he arrived, the reader is referred to his work before cited, and to his paper in the Classical Museum, vol. ii. p. 229, seq. For coins of Vetulonia, see Eckhel, vol. i. p. 94. [T. H. D.]

VETURII. [GENNAI]

VEXALLA AEST. (Oseea|lan|e|xai|nai, Ptol. ii. 3. § 3), a bay on the W. coast of Britannia Romana, near the mouth of the river Sabrina, now Bristol. [Bristol.] [T. H. D.]

UFENS (Ufesta), a river of Latium, rising at the foot of the Volcanic mountains, and flowing through the Pontine Marishes, whence its course is slow and stagnant, and it is described by both Virgil and Silius Italicus, as a sluggish and muddy stream. (Virg. Aen. vii. 801; Sil. Ital. viii. 383.) Claudian also describes it as "a torrent Universal UFENs." (Petr. et Ol. Cons. 257.) It joins the Anhemus (still called Amoens) during its course through the marishes to the sea at Terracina, but the present channels of both rivers are artificial, and it is uncertain whether they united their streams in ancient times or not. The name is corrupted by Strabo into Anhidaë (Ahphi|nai, v. p. 238), but he correctly describes it as one of the chief agents in the formation of the Pontine Marishes. The ancient form of the name was Onfusa, whence the Roman tribe Onfientina derived its name, being composed originally of citizens settled in the territory and neighbourhood of Fravunum (Fest. s. v. Oufentiana, p. 194). [E. H. B.]

UGUGUUM (BUTTULI).

UGERNUM (Oger|num), a town of Gallia Narbonensis, on the road from Nennusa through Ugernum and Tarascum to Aquae Sextiae (Aix). Strabo (iv. p. 178) has described this road. The genitive voces occurs in an inscription found at Nennusa. Ugernum is represented by Boecinum. The Table marks the distance from Nennusa (Nen|sa) to Ugernum xx., which is near the truth. In the last century the Roman road between Nennusa and Ugernum was discovered with several milestones on it in their original position, and numbered, as it seems, from Nennusa the ancient capital of this district. These milestones gave the governor ancertaining the length of the Roman mile. The name of Boecinum is a corruption of the mediaeval name of Bellum-quadram. If any was the name Ugernum exists, it is in the name of Tarascum, the lower part of Terracina, which is a common side of Tarascum and Boecinum, where the two rivers stand face to face. But in order to admit that one must suppose that Tarascum represents a name of Romulus, which, according to a middle-age opinion, was between Boecinum and Terracina, a stream that by some change in the river the two rivers became part of the main stream on the sea side of the river; and it is said that this fact has been discovered in the first time. T. D. [D. Amelius, Nen|sa, &c. Penn (post|pudica, art. Boecinum].

UGIA (Oigia, Ptol. ii. 4. § 19) is a town in the Turdusternis in Hispam Bassitica, on the road from Cades to Corduba. (Itin. Ant. p. 416) is probably the town called Ugia by Ptol. i. a. 3, with the surname of Caruma Sicilia, in the Account of the Juleus, etc. Now Los Cobos, where there are some ruins. (Cf. Ucetti, ii. p. i. p. 356.)

VIA AEMILIA (§ Ajalpunti Bext), one of the most celebrated and important of the Roman highways, and the first that was constructed to the North of Italy. The period of its first construction is clearly marked. It is said to have been commenced by the Augustan Legions, the period of a. c. 18, having effectually subdued the Umbrians, and was highroad from Piacentia to Arausium, the last place there join the Flaminian Way ("Vani a Piacen
tum Flaminiae committer, Arausii pertinente.
xxxix. 2). Strabo indeed gives a different view of the case, and speaks of the Aemilian Way as constructed only from Arausium to Bononia, and thence sweeping round the mesa and skirting the roots of the Alps (Aegro Dia. p. 217). But there is every reason to suppose that this last branch of the road was not constructed long afterwards; and there is no deed of the presence of Terentius Varro in the country of the Etruscan. It is not a little remarkable that the line of road from Aegro to Piacentia. It was this celebrated highway which is still in use at the present day, and lay on the whole way through a level plain, preserved a straight line during a course of 180 miles, and became the means of carrying Roman civilization on the heart of Cisalpine Gaul; and so great was the influence upon the population that it turned on the whole district between the Apennines and Padna, constituting the Eighth Region of Aemilia, and commonly called by geographers Gallia Cispalana, to be known as Aemilia, and was equally constituted into a province under that name at the period at which this took place, though there was a metropolis, but its appellation was doubtless in popular use long before it became an official designation; and as early as the first century we find Martial employing its expression, "Aemiliae de reginae via, salutare tota in Aemilia" (Martial iii. 2. v. iv. 66). As indeed all the principal towns of the Aemilian province (with the single exception of Ravenna) were situated on the Via Aemilia, the use of this designation seems extremely natural.

We have no account of the period at which it was Via Aemilia was continued from Piacenta to Aemilia, though there is little doubt that a road like
place soon after the complete subjugation of the Transpadane Gaul. Nor do we know with any certainty whether the name of Via Aemilia was ever applied in common usage to this portion of the road, or to the branches that led from Mediolanum to the foot of the Alps, as those from that city by Verona to Patavium. But as Strabo distinctly applies the name to the branch that led by Patavium to Aquileia, we may here most conveniently include all the principal highroads of the N. of Italy under one view in the present article.

1. The main or trunk line of the Via Aemilia from Mediolanum to Placentia. The stations on this road are thus given in the Antonine Itinerary, where they are repeated more than once (pp. 99, 126, 287); and, from the direct line of the road, the distances are subject to no doubt:—

From Ariminum (Rimini) to:

- Caesena (Caesa) - XX. M.F.  
- Faventia (Favosa) - XXV.  
- Forum Cornelii (Inola) - x.  
- Bononia (Bologna) - XXIV.  
- Mutina (Modena) - XXV.  
- Regium (Reggio) - xii.  
- Parma (Parma) - xiiii.  
- Fidentia (Borgo S. Donnino) - XIV.  
- Placentia (Placentia) - XXIV.

The same line is given more in detail in the Jerusalem Itinerary (p. 615, &c.), with which the Tabula substantially agrees; but the distances are more correctly given in the latter.

The stations enumerated are:—

- Competa (I. H.) Ad Confluentes (Tub.) - XIII. M.F.  
- Caesena (Caesa) - VIII.  
- Forum Popillii (Forispopoli) - VII.  
- Forum Livii (Forli) - VII.  
- Faventia (Favosa) - VII.  
- Forum Cornelii (Inola) - X.  
- Claterna (Quaderna) - XIV.  
- Bononia (Bologna) - XII.  
- Forum Gallorum - XVII.  
- Mutina (Modena) - XXV.  
- Regium (Reggio) - X.  
- Tannetum (Tanedo) - XI.  
- Parma (Parma) - VII.  
- Fidentia (Borgo S. Donnino) - XV.  
- Florentia (Firenzuola) - X.  
- Placentia (Placentia) - XIX.

The agreement in the distances above given (which are those of the Tabula) with those of the Antonine Itinerary, though the division is different, sufficiently shows the accuracy of the two. The distances in the Jerusalem Itinerary are, for this line of route, generally less accurate. Some obscure Mutations mentioned in the one document, and not in the other, have been omitted in the above list.

2. Continuation of the Via Aemilia from Placentia to Mediolanum. This line is summarily given in the Antonine Itinerary thus:—

From Placentia to Laus:

- Pompeia (Lodi Vecchio) - XXIV. M.F.  
- Thence to Mediolanum (Milano) - XVI.

These same distances are thus divided in the Jerusalem Itinerary:—

- Ad Notas - X. M.P.  
- Tres Tabernae - V.  
- Laus - VII.  
- Ad Notas - VII.  
- Mediolanum - VII. (ix.?)

The intermediate stations are unknown, and are expressly called mere Mutations, or places for changing horses.

3. From Mediolanum to Augusta Praetoria, at the foot of the Alps, the distances, as given in the Antonine Itinerary, are:—

- Novaria (Novara) - XXXIII. M.P.  
- Vercellae (Vercelli) - XVI.  
- Eporedia (Verona) - XXXIII.  
- Vitricium (Verona) - XX.  
- Augusta Praetoria (Aosta) - XXV.

The same authority gives a circumstantial line of route from Mediolanum to Vercellae (where it rejoins the preceding) by:

- Ticinum (Pavia) - XXII. M.F.  
- Laumelum (Lomello) - XXII.  
- Vercellae - xxvi.

4. From Mediolanum to Aquileia. The stations given in the Itineraries are as follows:—

Med. to Argentia:

- Fons Anoreli (Ponteror) - X. M.P.  
- Bergamum (Bergamo) - xiiii.  
- Brixia (Brescia) - XXXIII. (xxvii.)  
- Sirmium (Sermione) - XXII.  
- Verona (Verona) - XXII.  
- Vicentia (Vicenza) - XXXIII.  
- Patavium (Padua) - XXVI. (xxviii.)  
- Alhosund (A Thickness) - XXVI.  
- Concordia (Concordia) - XXVI.  
- Aquileia (Aquileia) - XXVI.

(In the above line of route the minor stations (Mutationes) given in the Jerusalem Itinerary are omitted. For an examination of them, and a careful comparison of all the Roman roads through Calapine Gaul, see Walther, Geografie des Ganze, vol. iii. pp. 2—11.)

5. From Bononia to Aquileia. This is the road of which Strabo expressly speaks as a continuation of the Via Aemilia (v. p. 217), but it is probable that he did not mean to say that it branched off directly from Bononia; at least the only line given in the Itineraries turns off from the main line of the Via Aemilia at Mutina; and proceeds to:

- Vicus Serninos (? - XXII. M.P.  
- Vicus Varianus (Boriamo, on the N. bank of the Po) - XX.  
- Annianum (Legname) - XVII.  
- Ateate (Esto) - XX.  
- Patavium (Padua) - XXVI. (xxvii.)

whence it followed the same line to Aquileia as that given above. Another line of road, which though more circuitous was probably more frequented, led from Mutina by Collicaria (an uncertain station) to Hostilia (Ostiglia), where it crossed the Pado, and thence direct to Verona (XXX. M.P.). (Ibid. Ant. p. 292.)

6. From Placentia to Dertona, where it communicated with the road constructed by Aemilius Scantus across the Apennines to Vada Sabata. (Strab. v. p. 217.) The stations on this short line were:—

From Placentia to:

- Comillomagus - XXV. M.P.  
- Iria (Voghera) - XVI.  
- Dertona (Dertona) - XXV.

The distance to:

- Comillomagus, or Camillomagus, as the name is written in the Tabula, is unknown, but must have been situated a short distance to the W. of Broni.

7. Lastly, a branch of the Via Aemilia led from Placentia to Ticinum (Pavia), whence it was carried westwards to Augusta Taurinorum (Tirim) and
VIA AEMILIA SCARURI

the foot of the Cottian Alps. This was therefore one of the great highways leading to Gaul. But the stations on it, as given in the Tabula, are very uncertain and, as Strabo says, were at least partially reconstructed by Asellius Scaurus long after the more celebrated Via Aemilia above described. Strabo, the only author who distinctly mentions the two, says that Asellius Scaurus, after having drained the marshes on the S. side of the Padus, constructed the Aemilian Way through Pisea and Luna as far as Sabata, and thence through Dertona, to Arezzo (v. p. 217). Whether "the other Aemilian Way," as Strabo calls it, had been already continued from Placentia to Dertona, or this also was first effected by Scaurus, we know not; but it is clear that the two were thus brought into connection. The construction of this great work must be assigned to the censorship of M. Aurelius Scaurus, in B.C. 109, as we learn from Aurelius Victor (Vit. Ill. 28), who, however, probably confounds it with the more celebrated Via Aemilia from Placentia to Ariminum. But a comparison of the two authors leaves no doubt as to the road really meant. The name seems to have gradually fallen into disuse, probably on account of the ambiguity arising between the two Vias of the same name; and we must link it with the Via from Pisea to Vada Sabata, and that crosses the mountains from the latter place by Aquae Statelles to Dertona, included by the Itineraries as a part of the Via Aurelia, of which the former at least was in fact a mere continuation. Hence it will be convenient to discuss the stations and distances along these lines, under the general head of VIA AURELIA. [E. H. B.]

VIA AMERINA, is the name given in an inscription of the time of Hadrian (Orell. Insacr. 3306) to a line of road, which must obviously be that leading direct from Rome to America. This, as we learn from the Tabula, branched off from the Via Cassia at Baccane (Baccano), and proceeded through Nepete and Falerii to America. The stations and distances as there given agree precisely with the statement of Cicero, who, in the decree Pro Sexto Roscio Amerino (c. 7. § 18), observes that it was 56 miles from America to Beneventum.

According to the Tabula a prolongation of the same road from Tuder, and thence by a circumvalline route through Vettona and Persia to Clusium, where it rejoined the Via Cassia. The first station to America is omitted: thence to

Tuder (Todi), — — — vi. M. P.
Vettona (Bettico), — — — xx.
Persia (Persia), — — — xiv.
The distance from that city to Clusium is again omitted. [E. H. B.]

VIA APPIA (§ 4. 'Arwela $d$), the greatest and most celebrated of all the Roman highways in Italy, which led from Rome direct to Brundisium, and thus became the principal line of communication with Greece, Macedonia, and the East. Hence it became, in the flourishing times of the Roman Empire, the most frequented and important of the Roman roads, and is called by Statius "regina viarum." (Sid. I. 3. 12.) Martial also calls it "Appia... Aufanse maxima fama visae" (ix. 109). The former author terms it "ansus Appia," in reference to its great antiquity (Jub. iv. 3. 165.) It was indeed the earliest of all the Roman highways, of the construction of which we know nothing, as it was first laid out more than a century before, and therefore a part of all that was regularly made as a great public work; the Via Salaria, Tiburtina, &c., having doubtless been laid in as mere natural roads, before they were converted into solidly constructed Vias. There must be in like manner have always been some kind of road communicating from Rome with Alba Longa and Tibur, and thence through Tuder to Brundisium. Whether the Via Salaria, Tiburtina, &c., having doubtless been laid in as mere natural roads, before they were converted into solidly constructed Vias. There must be in like manner have always been some kind of road communicating from Rome with Alba Longa and Tibur, and thence through Tuder to Brundisium. Whether theVia Appia from a point very little without the gates of Rome to Aricia, that this must have been a new work, laid out and executed at once. The original construction of the Via Appia was undoubtedly due to the censor Appius Claudius Caecus, who commenced it in B.C. 312, and completed it as far as Capua before the close of the year (Liv. iv. 29; Dio, ii. 36; Frontin. de Aq. aqua. 5; Orell. Insacr. 5393). From Capua it was undoubtedly carried on to Beneventum, and again at a subsequent period to Brundisium; but the date of these continuations is unknown. It is evident that the last at least could not have taken place till after the complete subjugation of the south of Italy, and the establishment of the Roman colony at Brundisium, B.C. 244. Hence it is certainly a mistake when Aurelius Victor speaks of Appius Claudius Caecus as having carried the Appian Way to Brundisium. (Vit. Furr. Ill. 34.) The continuation and completion of this great work has been assigned to various members of the Claudian family; but this is entirely without authority.

Strabo distinctly speaks of the Appian Way as extending, in his time, from Rome to Brundisium; and his description of its course and condition is important. After stating that at least three travelling from Greece and the East used to land at Brundisium, he adds: "From thence there are two ways to Rome, the one adapted for the carriage of merchandise through the country of the Pessiniots, Dauniens, and Sammites, to Beneventum, on which are the cities of Egnatie, Caesia, Cassius, and Herodis; the other through Tarentum, deviating a little to the left, and going round about a day's journey, which is called the Appian, and is better adapted for carriages. On this are situated Uria (between Brundisium and Tarentum), and Venusia, on the confines of the Sammites and Lucanians. Both these roads,

The rest of the route over the Cottian Alps is given in the article ALPS. [E. H. B.]
VIA APPIA.

Starting from Brundisium, meet at Beneventum. Then to Rome the road is called the Appian, passing through Caulium, Calatia, Capua, and Cassinum, to Sinussa. The whole distance from Rome to Brundisium is 360 miles. There is yet a third road, from Rhegium, through the Bruttians and Lucanians, and the lands of the Samnites to Campania, where it joins the Appian; this passes through the Apennine mountains, and is three or four days' journey longer than that from Brundisium. (Strab. v. p. 488.) It is not improbable that the first of these roads was not made by Strabo, nor by those from the true Appian Way, is the Via Numicia or Minucia (the reading is uncertain), mentioned by Horace as the alternative way by which it was customary to proceed to Brundisium. (Hor. Ep. i. 16. 20.) But Strabo gives us no information as to how it proceeded from Herdonia, in the plains of Apulia, through the mountains to Beneventum. It is, however, probable that it followed nearly the same line as the high road afterwards constructed by Trajan, through Asca and Equus Tetricus. This is indeed one of the principal natural passes through this part of the Apennines, and is still followed, with little deviation, by the modern highroad from Naples to Brindisi and Taranto. But it is worth remarking, however, that Horace has not commemorated in their journey to Brundisium, of which he has left us the poetical itinerary (Sat. i. 5), appear not to have followed this course, but to have taken a somewhat more direct route through Trivium, and a small town not named ("opusculum quod verum dicere non st") to Cassium. This route, which does not appear on either map, has now disappeared; and the poet, with those given in the Itineraries, was probably dissatisfied after that constructed by Trajan, through Equus Tetricus and Asca, had become the frequented line. It was to that emperor that the Appian Way was indebted for many improvements. He restored, and he was the first to construct, the highroad through the Picentians, from Fossanova to Ercolano. (Dion Cass. liv. 15; Hoare, Class. Tour, vol. i. p. 28;) and he at the same time constructed, at his own expense, a new line of highroad from Beneventum to Brundisium (Gruter, Jusc. p. 151. 2), which is undoubtedly the Via Trajana celebrated by coins. (Eckhel, vol. iv. p. 491.) It is probable (as already pointed out) that he did not undertake the road practicable for carriages a line of route previously existing, but accessible only to mules; and that the Via Trajana coincided nearly with the road described by Strabo. But from the time that this road was laid open to general traffic, the proper Via Appia through Venusia to Tarantum, which traversed a wild and thinly-peopled country, seems to have fallen much into disuse. It is, however, still given in the Antonine Itinerary (p. 120) though not as the main line of the Appian Way. The latter embellishment seems indeed to have been somewhat vaguely used under the Empire, and the same Itinerary estows the name on the line, already indicated by Strabo (L. c.), that proceeded S. through Lucania and brattium to Rhegium, on the Sicilian Strait, a route that never went near Beneventum or Brundisium at all.

The Appian Way long survived the fall of the Western Empire. That portion of it which passed through the Pontine Marshes, which was always most liable to suffer from neglect, was restored by Theodoric (Gruter, Jusc. p. 152. 8); and Procopius, who travelled over it 40 years later, speaks with admiration of the solidity and perfection of its construction. "The Appian Way (says he) extends from Rome to Capua, a journey of five days for an active traveller. Its width is such as to admit of the passage of two wagons going contrary directions. The road itself is worthy of the highest admiration, for the stone of which it is composed, a kind of mill-stone, and by nature very hard, was brought by Appius from some distant region, since none such is found in this part of the country. He then, after having smoothed and levelled the stones, laid them in place, not having them hewn close together, without inserting either bronze or any other substance. But they are so accurately fitted and joined together, as to present the appearance of one compact mass naturally united, and not composed of many parts. And notwithstanding the long period of time that has elapsed, during which they have been worn by the continual passage of so many carriages and beasts of burden, they have neither been at all displaced from their original position, nor have any of them been worn down, or even lost their polish." (Procop. B. G. i. 14.) The above description conveys an accurate impression of the appearance which the Appian Way must have presented in its most perfect state. From the blocks which composed the pavement of the Roman roads were fitted together, when first laid down, it is well seen in the so-called Via Triumphalis, which led to the Temple of Jupiter, on Mons Albanus. (Albanus Mons.) But it is evident from many other examples, that they became much worn down with usage, and the pieces were pieced together, and doubtless been frequently restored. He is also mistaken in supposing that the hard basaltic flag (silex) with which it was paved, had to be brought from a distance: it is found in the immediate neighbourhood, and, in fact, the Appian Way itself, from the Capo di Bove to the foot of the Alban Hills, runs along a bank or ridge composed of this lava. The river that falls into the common mistake of supposing that the road was originally constructed by Appius Claudius such as he beheld it. But during the long interval it had been the object of perpetual care and restoration; and it is very doubtful how far any of the great works along its line, which excited the admiration of the Romans in later ages, were to its original author. Caius Gracchus, in particular, had bestowed great pains upon the improvement of the Roman roads; and there is much reason to believe that it was in his time that they first assumed the finished appearance which they ever afterwards bore. (Plut. C. Gracc. 7.) Caesar also, when a young man, was appointed "Curator Viae Appias," which had become a regular office, and laid out large sums of money upon its improvement. (Plut. Cese. 5.) The care bestowed on it by successive emperors, and especially by Trajan, is attested by numerous inscriptions. It is very doubtful, indeed, whether the original Via Appia, as constructed by the censor Appius, was used by the Period through the Pontine Marshes at all. No mention is found of his draining these, without which such a work would have been impossible; and it is much more probable that the road was originally carried along the hills by Cosa, Norba, and Setia, by the same line which was again in use in the last century, before the Pontine Marshes had been drained for the last time by Fius VI. This conjecture is confirmed by the circumstance that Lucullus, in
VIA APPIA.

describing his journey from Rome to Capua, complains of the extremely hilly character of the road in approaching Seta. (Lucil. Frg. i. ii. 56, ed. Gerlach.) Even in the time of Horace, as we learn from his well-known description of the journey to Brundusium, it was customary for travellers to continue their journey from the Forum Appii by water, embarking at that point on the canal through the Pontine Marshes (Hor. Sat. i. 5. 11, 12.). But the very existence of this canal renders it probable that there was at that time a road by the side of it, as we know the case in Strabo's time, notwithstanding which he tells us that the canal was much used by travellers, who made the voyage in the night, and embarking at that point on the canal through the Pontine Marshes (Strab. p. 532.). It will be convenient to divide the description of the Appian Way, as it existed under the Roman Empire, and is given in the Itineraries, into several portions. The first of these from Rome to Capua was the main trunk line, upon which all its branches and excursions depended. This required to be described in more detail, as it was the most celebrated and frequented of all the Roman highways. 1. From Rome to Capua.

The stations given in the Antonine Itinerary are—:

From Rome to Arboria (Lariciot) — — xvi. m. P.

Tres Tabernae — — xvil.

Apoll Forum — — x.

Tarracina (Civitate) — — x.

Formiae (Mola di Gaeta) xiii.

Minturnae (near Tropleto) ix.

Sinnessa (Mondragone) — — ix.

Capua (Sic Marsia) — — xvi. (xvil.)

The above stations are for the most part well known, and admit of no doubt. Those in the neighborhood of the Pontine Marshes have, indeed, given rise to much confusion, but are in fact to be easily determined. Indeed, the line of the road being almost perfectly straight from Rome to Tarracina renders the investigation of the distances a matter of little difficulty.

The Jerusalem Itinerary (p. 611) subdivides the main distance as follows:

Rome to Ad Nonum (mutatio) — — ix. M.P.

Aricia (civitas) — — viii.

Sponsae or Ad Sponsa (mutatio) xiv.

Apoll Forum (&o.) — — vii. (xil.)

Ad Medias (&o.) — — ix.

Tarracina (civitas) — — x.

Fundi (&o.) — — xii.

Formiae (civitas) — — xil.

Minturnae (&o.) — — ix.

Sinnessa (&o.) — — ix.

Pons Campans (mutatio) — — ix.

Ad Octavum (&o.) — — ix.

Capua (civitas) — — viii.

The intermediate stations were (as they are expressed in the Itineraries) hostæ, or pous thouses, where relays of horses were kept. The determination of their position is therefore of no interest, except in connection with the distances given, which vary materially from those of the other Itinerary, though the total distance from Rome to Capua (125 miles) is the same in both.

The Appian Way is the same as the Porta Capena, in the Servian walls of Rome, about half a mile outside of which it is separated from the Via Latina, so that the two roads passed through different gates in the walls of Aurelian. That by which the Via Appia finally quitited Rome was known as the Porta Appia;
ing onwards from the tomb of Cecilia Metella, the most remarkable of which is the tomb of Quintus, on the left, about 38 miles from Rome. Several remains of the ancient Via Appia are still visible, and are marked by the name of the road. The remains of the imperial villa border the road on the left for some distance before reaching the modern town. Two miles farther was Aricia, which is correctly placed by both the Itineraries. 16 miles from Rome, and probably below the town, outside of the walls, the Via Appia here deviates from the straight line which it has pursued so long, and descends into the hollow below the city by a steep slope known as the Clivus Aricinus. A little farther on it is carried over the lowest part of the valley by a causeway or substruction of massive masonry, one of the most remarkable works of the kind now extant. [Aricia.] The remainder of the road will not require to be described in such detail. From Aricia it was continued, with a slight deviation from the direct line, avoiding the hills of Genzano and those which bound the Lake of Nemi, on the left, and leaving Lanuvium at some distance on the right, till it descended again into the plain beyond the Alban Hills, and reached the station of Tres Tabernae. An intermediate station, Sub Lanuvii, indicated only in the Tabula, must have been situated where a branch road struck off to the city of Lanuvium. The position of Tres Tabernae has been much disputed, but without any good reason. That of Forum Appii, the next stage, is clearly established by both the Itineraries, and the 43rd milestone of the ancient road still exists on the spot; thus showing that the distances given in the Antonine Itinerary are perfectly correct. This being established, it is clear that Tres Tabernae is to be placed at a spot 10 miles nearer Rome, and about 3 miles beyond the modern Cisterna, where there are still ruins of ancient buildings, near a medieval tower called the Torre di Tre Posti, on which a circular monument of brick, supposed with ease to be the tomb of Gallienus, in which emperor Flavius Severus also was buried. [Epici.] Close to this spot must have been staiton Ad Nuxum mentioned in the Jerusalem (I. c.). The road is still bordered on both sides by tombs; but none of these are of any special interest. At the Porticus della Protocochie (between id 12 miles from Rome) the ancient Via is by the modern road to Albano; it here comes the ascent of the Alban Hills, which comm (though at first very gradually) for above 3 miles. A little farther on are the remains of Bo- villae; the principal ruins of which lie a short distance to the right of the road. [Bovillae.] The Tabula marks that place as a station on the Via Appia, but erroneously places it 10 miles from Rome, while the real distance is 12 miles. Thence the road (still retaining its straight line) ascended the hill to *Albano, nearly on the site of the Albaniun of Domitian, which, as we learn from Martial, was just 14 miles from Rome. (Martial, ix. 65. 4, 102. 12.) The remains of the imperial villa border the road on the left for some distance before reaching the modern town. Two miles farther was Aricia, which is correctly placed by both the Itineraries. 16 miles from Rome, and probably below the town, outside of the walls, the Via Appia here deviates from the straight line which it has pursued so long, and descends into the hollow below the city by a steep slope known as the Clivus Aricinus. A little farther on it is carried over the lowest part of the valley by a causeway or substruction of massive masonry, one of the most remarkable works of the kind now extant. [Aricia.] The remainder of the road will not require to be described in such detail. From Aricia it was continued, with a slight deviation from the direct line, avoiding the hills of Genzano and those which bound the Lake of Nemi, on the left, and leaving Lanuvium at some distance on the right, till it descended again into the plain beyond the Alban Hills, and reached the station of Tres Tabernae. An intermediate station, Sub Lanuvii, indicated only in the Tabula, must have been situated where a branch road struck off to the city of Lanuvium. The position of Tres Tabernae has been much disputed, but without any good reason. That of Forum Appii, the next stage, is clearly established by both the Itineraries, and the 43rd milestone of the ancient road still exists on the spot; thus showing that the distances given in the Antonine Itinerary are perfectly correct. This being established, it is clear that Tres Tabernae is to be placed at a spot 10 miles nearer Rome, and about 3 miles beyond the modern Cisterna, where there are still ruins of ancient buildings, near a medieval tower called the Torre di Tre Posti, on which a circular monument of brick, supposed with ease to be the tomb of Gallienus, in which emperor Flavius Severus also was buried. [Epici.] Close to this spot must have been staiton Ad Nuxum mentioned in the Jerusalem (I. c.). The road is still bordered on both sides by tombs; but none of these are of any special interest. At the Porticus della Protocochie (between id 12 miles from Rome) the ancient Via is by the modern road to Albano; it here comes the ascent of the Alban Hills, which comm (though at first very gradually) for above 3 miles. A little farther on are the remains of Bo- villae; the principal ruins of which lie a short distance to the right of the road. [Bovillae.] The Tabula marks that place as a station on the Via Appia, but erroneously places it 10 miles from Rome, while the real distance is 12 miles. Thence the road (still retaining its straight line) ascended the hill to *Albano, nearly on the site of the Albaniun of Domitian, which, as we learn from Martial, was just 14 miles from Rome. (Martial, ix. 65. 4, 102. 12.) The remains of the imperial villa border the road on the left for some distance before reaching the modern town. Two miles farther was Aricia, which is correctly placed by both the Itineraries. 16 miles from Rome, and probably below the town, outside of the walls, the Via Appia here deviates from the straight line which it has pursued so long, and descends into the hollow below the city by a steep slope known as the Clivus Aricinus. A little farther on it is carried over the lowest part of the valley by a causeway or substruction of massive masonry, one of the most remarkable works of the kind now extant. [Aricia.] The remainder of the road will not require to be described in such detail. From Aricia it was continued, with a slight deviation from the direct line, avoiding the hills of Genzano and those which bound the Lake of Nemi, on the left, and leaving Lanuvium at some distance on the right, till it descended again into the plain beyond the Alban Hills, and reached the station of Tres Tabernae. An intermediate station, Sub Lanuvii, indicated only in the Tabula, must have been situated where a branch road struck off to the city of Lanuvium. The position of Tres Tabernae has been much disputed, but without any good reason. That of Forum Appii, the next stage, is clearly established by both the Itineraries, and the 43rd milestone of the ancient road still exists on the spot; thus showing that the distances given in the Antonine Itinerary are perfectly correct. This being established, it is clear that Tres Tabernae is to be placed at a spot 10 miles nearer Rome, and about 3 miles beyond the modern Cisterna, where there are still ruins of ancient buildings, near a medieval tower called the Torre di Tre Posti, on which a circular monument of brick, supposed with ease to be the tomb of Gallienus, in which emperor Flavius Severus also was buried. [Epici.] Close to this spot must have been staiton Ad Nuxum mentioned in the Jerusalem (I. c.). The road is still bordered on both sides by tombs; but none of these are of any special interest. At the Porticus della Protocochie (between id 12 miles from Rome) the ancient Via is by the modern road to Albano; it here comes the ascent of the Alban Hills, which comm (though at first very gradually) for above 3 miles. A little farther on are the remains of Bo- villae; the principal ruins of which lie a short distance to the right of the road. [Bovillae.] The Tabula marks that place as a station on the Via Appia, but erroneously places it 10 miles from Rome, while the real distance is 12 miles. Thence the road (still retaining its straight line) ascended the hill to *Albano, nearly on the site of the Albaniun of Domitian, which, as we learn from Martial, was just 14 miles from Rome. (Martial, ix. 65. 4, 102. 12.) The remains of the imperial villa border the road on the left for some distance before reaching the modern town. Two miles farther was Aricia, which is correctly placed by both the Itineraries. 16 miles from Rome, and probably below the town, outside of the walls, the Via Appia here deviates from the straight line which it has pursued so long, and descends into the hollow below the city by a steep slope known as the Clivus Aricinus. A little farther on it is carried over the lowest part of the valley by a causeway or substruction of massive masonry, one of the most remarkable works of the kind now extant. [Aricia.] The remainder of the road will not require to be described in such detail. From Aricia it was continued, with a slight deviation from the direct line, avoiding the hills of Genzano and those which bound the Lake of Nemi, on the left, and leaving Lanuvium at some distance on the right, till it descended again into the plain beyond the Alban Hills, and reached the station of Tres Tabernae. An intermediate station, Sub Lanuvii, indicated only in the Tabula, must have been situated where a branch road struck off to the city of Lanuvium. The position of Tres Tabernae has been much disputed, but without any good reason. That of Forum Appii, the next stage, is clearly established by both the Itineraries, and the 43rd milestone of the ancient road still exists on the spot; thus showing that the distances given in the Antonine Itinerary are perfectly correct. This being established, it is clear that Tres Tabernae is to be placed at a spot 10 miles nearer Rome, and about 3 miles beyond the modern Cisterna, where there are still ruins of ancient buildings, near a medieval tower called the Torre di Tre Posti, on which a circular pavement is still visible in many places between Aricia and Tres Tabernae, and no doubt can exist as to the course of the road. This was indeed carried in a perfectly straight line from the point where it descends into the plain, through the Pontine Marshes to within a few miles of Terracina. The position of the station Ad Sponna, mentioned in the Jerusalem Itinerary, cannot be determined, as the distances there given are incorrect. We should perhaps read xii. for vii. as the distance from Forum Appii, in which case it must be placed 3 miles nearer Rome than Tres Tabernae. Between the latter station and Forum Appii was Trrancium, at which commerce with navigation, as a port called Decumanum, from its being 19 miles in length. The site of this is clearly marked by a tower still called Torre di Tre Posti, and the 19 miles measured thence along the canal would terminate at a point 3 miles from Terracina, where travellers quitied the canal for that city. An inscription records the paving of this part of the road by Trajan. The solitary posthouse of Moes * It was probably this long ascent that was known as the Clivus Virri, mentioned by Persius (vi. 55).
VIA APPIA.

is evidently the station Ad Medies of the Jerusalem Itinerary. A short distance from Terracina the Via Appia at length deviated from the direction it had so long pursued, and turning to the left ascended to the ancient city streets (Tarracina), while the modern road is carried round the foot of this hill, close to the sea. The distance of Tarracina from Rome is correctly given at 61 miles in the Antonine Itinerary.

From Terracina the line of the ancient road may still be traced distinctly all the way to Fonsi; and it is likely that, dilapidated tombs, etc. through a great part of its course. It first ascended the hill above the city as far as the convent of San Francesco, and afterwards descended into the valley beneath, joining the modern highroad from Rome to Naples about 3 miles from Terracina, just before crossing the frontier of the Papal States. The narrow pass at the foot of the mountains, which the road here follows, between the rocks and the marshy lake of Fonsi, is the celebrated defile of Lautulans, or Ad Lautulans, which more than once bears a conspicuous part in Roman history. [Lautulans.]

The distance from Tarracina to Fundi is overstated in the Antonine Itinerary: the true distance does not exceed 13 miles, as correctly given in the Itineraries of the 1st century. From Fundi to Formiense (Mola di Gaeta), a distance of 13 miles, the road passed through a rugged and mountainous country, crossing a complete mountain pass: the substructions of the ancient way are in many places still visible, as well as portions of the pavement, and numerous ruins of buildings, for the most part in ruins. The Mr. of the 1st century is in several instances the ancient one, or at least rest upon ancient substructions. The ruins of Formiense and of the numerous villas with which it was adorned line the shores at Mola di Gaeta, and bound the road for a space of more than 2 miles: other ruins, principally sepulchral, are scattered along its line almost all the way thence to Minturnae. The ruins of the latter, beside the right bank of the Liri (Garigliano), a short distance from its mouth, and about a mile and a half below the village of Tropheto. The distance of the ancient road from Mola thither is clearly traced and susceptible of no doubt: the distance is correctly given as 9 miles. Here the Via Appia crossed the Liri, and was continued along its right bank through a level and marshy district along the sea-coast to Sinuessa, the ruins of which are found near the village of Monsinagone. The distance of 9 miles between the two (given in both Itineraries) is somewhat less than the truth. It was at Sinuessa that the Appian Way finally skirted the coast of the Tyrrenian sea (Strab. v. p. 260), and struck inland towards Caepa, passing by the stations of Ponte Campanus and Ad Octavum. But this part of its course has not been very distinctly traced, and there is some difficulty as to the distances given. The three subdivisions of the Jerusalem Itinerary would give 26 miles for the total distance from Sinuessa to Capua; and the coincidence of this sum with the statement of Wesseling is a strong argument in favour of the reading xxi. M. P. instead of xvi. adopted by Pinder. The latter number is certainly too small, for the direct distance between the two points is not less than 21 miles, and the road must have deviated from the straight line on account of the occurrence of the marches of the Sarno, as well as of the river Villturnus. It is probable, therefore, that it made a course bend, and that the distance was more than this put by the question cannot be settled until we see the road has been more accurately traced, and hitherto been done. The estimates of Tabulae are too inaccurate to be of any use: it appears probable from that document that the Capuanus was a bridge over the Liri or not, as might have been suspected, over Sinuessa, which the Appian Way did not arrive at Casilinum, 3 miles from Core. [VIA APPIA.] (Strab. v. p. 257; Trav. Phil.)

The total distance from Rome to Capua is 260 miles: that from Sinuessa was 131 miles. This portion of the Via Appia to Minturnae was traced with most care by Westphal (Römische Kompasson, pp. 88-89), as well as by Clusius (Mission d'Italie, vol. ii. pp. 365-461) and Sir R. Hoare (Clusius, vol. i. pp. 81-148); but all these accounts are deficient in regard to the points between Minturnae and Capua.

Several minor branches or cross-roads were cut by the Via Appia during this first portion of its course. Of these it may suffice to mention two only:—

1. The Via Anfiteatra, which branched off from the Appian Way just beyond Bovillae, and proceeded direct to Ascea. [VIA APPIA.]

2. The Via Settima, which branched off from the Appian Way just beyond Bovillae, and proceeded direct to Ascea. [VIA APPIA.]

3. The Via Appia, which branched off from the Appian Way after passing Termini, and proceeded in a direct line to Sessa (Sessa), and thence to the port of Minturnae. [VIA APPIA.]

4. A branch road, the name of which is unknown, diverged from the Via Appia at Bovillae, and proceeded direct to Capua. [VIA APPIA.]

From Sinuessa to Beneventum (16 miles) was the Via Latina, whence it was continued to Alife and Telese to Beneventum. [VIA APPIA.]

5. The Via Domitiana, constructed in the time of Domitian, is the counterpart of that name, of which Strabo gives a pomposa description. [Scll. iv. 313.] It was a continuation of the coast-road from Sinuessa, which was carried across the river, through a level and marshy district, and thence to the coast as far as Cumae, whence it struck eastwards to Puteoli. The road communicating between the city and Neapolis was previously in existence, and many distances on this road, as given in the Antonine Itinerary (p. 123), are—

From Sinuessa to Neapolis xvi. m. p. (i.e. be a mistake for xvi.)

thence to Cumae — vi.

Puteoli — iii.

Neapolis — x.

There was also a direct road from Capua to Neapolis (VIA APPIA), passing through Ascula, which was carried across the river by a bridge which must really have been a very difficult: thence it followed close by the coast as far as Cumae, whence it struck eastwards to Puteoli. The road communicating between the city and Neapolis was previously in existence, and many distances on this road, as given in the Antonine Itinerary (p. 123), are—

2. From Capua to Beneventum.

This portion of the road may be very properly considered the plain as far as Catania, the site of which is—

at La Galazze, near Maddaloni: it then enters Apenines, and, passing through the pass of Arianno, commonly supposed to be the same
VIA APPIA.

the Caudine Forks, reached Caudium, which have been situated about 4 miles beyond the road to Beneventum. The distances in this line are:

* apsus to Gaeta, vi. m. P.
* Ad Novas - vi.
* Caudium - ix.
* Beneventum - xi.

[Page 111; Itin. Hier. p. 610; Tab. Post.] Beneventum, as above shown, that the two branches of the Appian Way separated: the eading by Venusia and Tarentum to Brundisium, and thence along the coast of the Adriatic, did to give these two branches separately.

* Beneventum to Brundisium through, and Tarentum.

The road of this is given in the Antonine Itinerary, and as well as in the Tabula Peutingeriana, but in this last it is so broken and confused a form that it is unintelligible without the aid of the other Itineraries. But that this line was the original Via Appia, proved not only by the distinct testimony of the ancient historians, and by accidental notices which show that the frequent and customary route in the territory of the Ciceri (Cic. ad Att. v. 5, 7), but still more an inscription of the time of Hadrian, in the road from Beneventum to Asculum is called the Via Appia. The greater part line from Beneventum to Venusia, and to Tarentum, was through a wild mountainous country; and it is highly probable that it was in great measure abandoned after the convenient line of the Via Trajana was opened. It appears that Hadrian restored the road from Beneventum to Asculum, but it is whether he did so farther on. Nevertheless, the general course of the road can be traced, many of the stations cannot be fixed with this.

The latter are thus given in the Itinerary:

1 Beneventum to

* Alba Fucens - vii.
* Sub Rosolae - xx.
* Ponza Anfidi - xxii.
* Venusia (Venusa) - xviii.
* Silvium (Garagnone) - xx.
* Blera (Gravina) - xxii.
* Sub Lupatia - xiv.
* Camales - xxii.
* Tarentum (Taranto) - xxi.

VIA APPIA. 1293

A line as the nature of the country will allow, to Tarentum; the first station, Silvium, may probably be placed at Garagnone, and the second, Blera, or Blera, or near Garagnone; but both determinations are very uncertain. Those of Sub Lupatia and Camales are still more vague, and the old course of the ancient road shall have been traced upon the spot by some traveller, it is idle to multiply conjectures.

From Tarentum to Brundisium the Antonine Itinerary gives 44 M. P., which is nearly correct; but the intermediate stations mentioned in the Tabula Peutingeriana, Messenorum, Ursinum, and Scannum, cannot be identified. Ursinum may perhaps be a corruption of Urtinum or Hyrinum, the modern Orzinuovi, which is nearly midway between the two cities.

Besides the main line of the Via Appia, as above described, the Itineraries mention several branches, one of which appears to have struck off from Venusia to Potentia, and thence to have joined the road to Equus Tuscus, while another descended from Venusia to Heraclea on the Gulf of Tarentum, and thence followed the E. coast of the Bruttian peninsula. These lines are briefly noticed in the articles Lucania and Bruttii, but they are very confused and uncertain.

4. From Beneventum by Canusium and Barium to Brundisium. It was this line of road, first constructed by Trajan, and which was originally distinguished as the Via Trajana, that became after the time of that emperor the frequent and ordinary route to Brundisium, and thus came to be commonly considered as the Via Appia, of which it had in fact taken the place. Its line is in consequence given in all the Itineraries, and can be traced with little difficulty. It passed through a rugged and mountainous country, as far as Aequa in Apulia, from which place it was carried through the plains of Apulia to Barium, and afterwards along the sea-coast to Brundisium: a line offering no natural difficulties, and which had the advantage of passing through a number of considerable towns. Even before the construction of the Via Trajana, it was commonly used (as we learn from the journey of Horace) for travellers to deviate from the Appian Way, and gain the plains of Apulia as speedily as possible.

The first part of this road from Beneventum to Aequa may have been traced by the assistance of ancient milestones, bridges, &c. (Momsen, Topogr. desipri, in the Bulletins, Arch. Soc. 1849, pp. 5, 7.) It proceeded by the villages of Pachioli, Buonalbergo, and Casalbora, to a place called S. Elenario, about 2 miles S. of Castelfranco, which was undoubtedly the site of Equus Tuscus, a much disputed point with Italian topographers. [Equus Tucius.] This is correctly placed by the Antonine Itinerary 21 miles from Beneventum; the Jerusalem Itinerary, which makes the distance at a station called Forum Norse, which must have been situated at or very near Buonalbergo. From Equus Tuscus, the road followed a N. direction to Aequa (the site of which is clearly known as that of the modern Troja), and thence turned in a direction nearly due E. to Heraclea (Oriolana). The object of this great bend was probably to open a communication with Luceria and the other towns of Northern Apulia, as well as perhaps to avoid the defile of the Cervaro, above Benevento, through which the modern road passes. At Aequa the Via Trajana descended into the great plain of Apulia, across which it was carried in a nearly
VIA APPIA.

straight line to Barium (Baria). The remainder of this course presents no difficulties, and the stations are, for the most part, well-known towns. The whole line is thus given in the Antonine Itinerary (pp. 112, 116):—

From Beneventum to

Egnatia (S. Eleuterio) — xxi. M. F.

Aescani (Tropaeum) — viii.*

Hardonia (Hardenia) — xvi.

Campania (Cameria) — xvi.

Rabi (Ravai) — xxiii.

Butastum (Bitistato) — xi.

Barium (Baria) — xxii.

Turrea (?). — xx.

Egnatia (Torre di Giussano) — xvi.

Spulaneae (?). — xx.

Brundusium (Brundisium) — ix.

The two stations of Turrea between Barium and Egnatia, and Spulaneae between Egnatia and Brundusium, cannot be identified; it is evident from the names themselves that they were not towns, but merely small places on the coast so called. The Jerusalem Itinerary has two stations, Turrea Aureliana, and Turrea Novo, between Egnatia and Barium, but, from the distances given, neither of these can be identified with the Turrea of the Antonine Itinerary. The other intermediate stations mentioned by the same authority are unimportant mutations, which can be identified only by a careful survey on the spot.

The Tabula gives (though in a very confused manner) an intermediate line of routes, which appears to have been the same as that indicated by Strabo (v. p. 283), which quitted the coast at Egnatia, and proceeded through Caesia to Brundusium. The stations given are:—

Canusium to Randus. — xii. M. F.

Rabi. — xiv.

Butastum. — ix.

Caesia (Caesia). — ix.

Eebetum (Asetium). — ix.

Norve (?). — ix.

Ad Varonis (?). — viii.

Egnatia. — viii.

It is certain that the Via Traiana was continued, probably by Trajan himself, from Brundusium to Hydruntum. (Hebron), and was thence carried all round the Calabrian peninsula to Tarentum. The road from Brundusium to Hydruntum passed through Lupiae (Lepcis), in the interior of the peninsula, which is correctly placed 25 miles from each of the above cities. (Itin. As. p. 118.) The stations on the other line, which is given only in the Tabula, are as follow:—

 Hydruntum to Castrum Minervas (Castro) viii.

Veretum (Sta. Maria di Vereto) — xii.

Uxetum (Uxeto) — x.

Balestum (Alcam). — x.

Nervetum (Nave). — x.

Manduria (Mascheria) — x.

Tarentum (Toranto) — xx.

The above distances appear to be correct.

Lastly, a branch struck off from the Via Trajana at Barium which proceeded direct to Tarentum. It is probable that this came to be adopted as the most convenient mode of reaching the latter city when

* This distance must be above the truth: the direct distance is not more than 8 miles.

the original Via Appia had fallen into disuse. (See p. 119.)

Besides the above, which may be considered in some degree branches of the Via Trajana, there was another line, probably constructed in the same period, which struck across from Egnatia to Venusia, so as to form a cross communication between the Via Trajana and the ad Vias An. It is set down in the Antonine itinerary (p. 119) as a line of a long distance proceeding from the S. of S.; but the intermediate stations between Tuccia and Venusia cannot be determined.

5. From Capua by Nuceria to Beneventum.

This line of road is indicated by a passage above cited (v. p. 283) as continuing it for some distance, and indeed the name of the Via Appia. It seems, however, that it subsequently came to be regarded as a lesser route, for the Antonine Itinerary puts it under the heading of the Urba Appia via recto itinere ad Campaniae. (Itin. As. p. 106.) and inasmuch as it was a designation of the original Appian Way, a name by which it was usually speaking, as may be seen from Strabo, and from the Via Trajana. Strabo does not tell us where it was passable in his day for carriages or not; nor do we find any account in any ancient author of its existence in our modern times. But we learn the period at which it was in use, from a remarkable inscription discovered in 1794, in the valley of Disano, which commemorates a construction of the road from Egnatia to the mouth of the river Casio by Plautus, an officer of the emperor. (Maxmilius, Itiner. R. N. 757, Etrus. Epigr. pp. 11, 12.) There is some foundation whatever for the name of Via Appia, which has been given by some modern writers to a road which was probably at first called Via Popilia. The name of the author, who, as was usual in similar cases, bore the same name a town which bears the name of Popilius, and occupied the site of the Populi (ancient Populii); but no mention of this name is to be found in any ancient author, and it seems to have been given to Strabo. The distances given is the same from the twoundescribed authenticity, are.

From Capua to Nuceria — xxii.

[Forum Popilii] — x.

Murraxum — x.

Campania — x.

Valentia — xx.

Ad Statum — i.

Ebeugum — i.

The point designated as "Ad Ponsus" is evidently the same as the Colona of the Itineraries, which marked the spot from which the

* The words "Appia via" may, however, only to the first part of this route, which was followed the true Appian Way as far as Capua.
VIA APPIA.

usual to cross the Sicilian straits. The total distance from Capua to Rhegium, according to the above description, is 321 miles. The Antonine Itinerary makes it 327 miles. It is difficult to judge how far this discrepancy is owing to errors in the distances as given in our MSS., or to alterations in the line of road; for though it is evident that the road given in the Itinerary followed generally the same line as that originally constructed by Popilius, it is probable that many alterations had taken place in particular parts; and in the wild and mountainous tracts through which the greater part of it was carried, such alterations must frequently have been rendered necessary. The determination of the particular distances is, for the same reason, almost impossible, without being able to trace the precise course of the ancient road, which has not yet been accomplished. The stations and distances, as given in the Antonine Itinerary, are as follows:

From Capua to Nola .............................. M. P. 65
Nuceria (Noeora) .................................. xvi*
Ad Tanarum ........................................... xvi
Ad Calorem ........................................... xvi
In Marcellianna ...................................... xvi
Nerulum (La Rotonda) ............................. xxiii
Sub Murano (near Murano) ...................... xiv
Capraeias (Tarasia) .............................. xxii
Consentia (Coseo) ................................. xxviii
Ad Sabatium fluvium ............................. xviii
Ad Turiges .............................. xii
Vibo Valentia (Monte Leone) .............. xxviii
Nicotera (Nocotera) .............................. xviii
Ad Mallia ............................. xxi
Ad Colonnium ....................................... xiv

The stations between Nuceria and Nerulum cannot be determined. Indeed the only points that can be looked upon as certain, in the whole line from Nuceria to Rhegium, are Sub Murano, at the foot of the hill on which stands the town of Murano, Consentia (Coseo), Vibo Valentia (Monte Leone), and Nicotera, which retain its ancient name. Nerulum and Capraeias may be fixed with tolerable certainty by reference to these known stations, and the distances in this part of the route appear to be correct. The others must be left in doubt, until the greatest part of the course of the road has been accurately traced.

At Nerulum the above line of road was joined by one which struck across from Venusia through Potentia to that place. It was a continuation of the cross-road already noticed from Equus Taticus to Venusia; this line, which is given in the Antonine Itinerary (p. 104), was called, as we learn from the inscriptions on milestones still extant, the Via Herculla, and was therefore in all probability the road of the Emperor Maximianus. (Mommsen, f. R. N. p. 348.) The stations mentioned in the Itinerary (c c) are:

From Venusia to Opium ............................. xv m.p.
Ad fluv. Bradanum ......................... xxii

* Both these distances are overstated, and should probably be corrected as suggested by the numbers in parentheses. The same distances are given in the Tab. Pueb. thus:

Capua to Susuella............................. ix m.p.
Nola ................................................. ix
Ad Tegluzzum ........................................ ix
Nuceria .............................................. ix

From Venusia to Potentia (Potensae) xiv.
Acidi (T?) ........................................... xiv
Grumum (Sapone) ................................. xxvii
Semnacu (T?) ....................................... xxvii
Nerulum ............................................. xvi

None of the above stations can be identified, except Potentia and Grumentum, and the distances are in some cases certainly erroneous. The same line of route is given in the Tabula, but in a very confused and corrupt manner. The stations there set down are wholly different from those in the whole, but equally uncertain. Anxius (Asu), between Potentia and Grumentum is the only one that can be identified.

The principal work on the Via Appia is that of Pratti (Della Via Appia, fol. Napoli, 1745); but, unfortunately, little dependence can be placed upon it. Parts of the route have been carefully and accurately examined by Westphal, Chauy, and other writers already cited, but many portions still remain to be explored, and accurate measurements are generally wanting. Nor does there exist any map of the kingdom of Naples on which dependence can be placed in this respect. [E. H. B.]

VIA AQUILLIA. [Via Appia, No. 5.]
VIA ARDEATINA. [Via Aurelia, No. 6.]
VIA AURELIA, one of the principal highways of Italy, which led from Rome to Pisa in Etruria, and thence along the coast of Liguria to the Maritime Alps. It was throughout almost its whole extent a maritime road, proceeding, in the first instance, from Rome to Asulum on the Tysrhenian sea, whence it followed the coastal line of Etruria, with only a few trifling deviations from the whole way to Pisa. The period of its construction is quite uncertain. Its name sufficiently indicates that it was the work of some magistrate of the name of Aurelius; but which of the many illustrious men who bore this name in the latter ages of the Republic was the author of it, we are entirely uninformed. We know with certainty that it was in use as a well-kept and frequented highway in the time of Cicero, when mentions it as one of the three roads by which he might proceed to Caisalpina Gaul ("ab inferno mari Aurelia," Philo, xii. 9). It may also be probably inferred that it was in existence as far as Pisa, when the road was carried from that city to Vada Sabata and Derton, the construction of which is ascribed to Aemilius Scarpus, in B. C. 108 (Strab. v. p. 317.).

[Via Amicilla Scarpuri.] This continuation of the Aurelian Way seems to have been commonly included under the same general name as the original road; though, according to Strabo, it was properly called the Amilian Way, like its more celebrated namesake in Caisalpina Gaul. It was apparently not till the reign of Augustus that the line of road was carried along the foot of the Maritime Alps, from Vada Sabata to Cemenellum, and thence into Gaul. It is certain, at least, that the ancient road, of which the traces are still visible, was the work of that emperor; and we know also that the Ligurian tribes who inhabited the Maritime Alps were not completely reduced to subjection till the time of Augustus. The Itineraries, however, give the name of Via Aurelia to the whole line of road from Rome to Arelate in Gaul; and though little value can be attached to their authority on this point, it is not improbable that the name was frequently used in this more extended sense; just as that of the Via Appia was applied to the whole line from Rome to Brundusium, though originally carried only as far as Capua.
VIA AURELIA.

The stations from Rome, as far as Luna in Etruria, are thus given in the Antonine Itinerary (p. 290, etc.):

<table>
<thead>

The stations thence along the coast of Liguria as far as the river Ruvr have been mentioned in the article Lucus; and the distances along this part of the line, in both the Antonine Itinerary and the Tabula, are so confused and corrupt that it is useless to attempt their correction. Even of that part of the Via Aurelia given above, along the coast of Etruria, several of the stations are very uncertain, and some of the distances are probably corrupt. From Rome to Centum Celsum, indeed, the road has been carefully examined and the distances verified (Westr. S. Rom. Topo, pp. 163-169); but this has not been done further on, and as the road traversed the Moravum, which was certainly in the latter ages of the Roman Empire, as at the present day, a thinly-peopled and unhealthy district, several of the stations were probably even then obscure and unimportant places. The Tabula, as usual, gives a greater number of such stations, several of which may be identified as the points where the road crossed rivers and streams whose names are known. But the route is given very confusedly, and the distances are often incorrect, while in some cases they are assisted altogether.

VIA CASILLA.

The distances between Populonia and Parisium are given as those between Cassa and Atrium, in many cases untrustworthy; and it is impossible to say to which of the stations they may refer.

The Via Aurelia (as the main course of the road, as used in the historian's accounts with Cassa and France) was by two different routes; the one, which ascended Strabo was constructed by Aurelius Scarrum some time that he continued the Via Aurelia in Sabatia, led from that place across the Apennine Aquae Statilianae, and thence to Tarventum the Via Cassilia had probably already passed over the Strabo. V. p. 317. The other, which was the Via Postumia, and was therefore probably constructed at a different period, led from Cassilia to the mountains direct to Germa. Both these routes are given in the Antonine Itinerary and in the Tabula, though in the former they are conflated and run up with the direct line of the coast.

1. From Gemma to Tarventum the stations are:
   Libiamus (Rm. of Argenta and Sarno Calvi) | xvi. xvi. 
   Tarventum (Tarvis) | xvi. 

The continuation of this route to Corduba will be found under Via Aurelia.

2. From Tarventum to Vada Sabata:
   D. to distance Statilianae (Aquae Statilianae) | xvi. xvi. 
   Cremonia (?) | xvi. xvi. 
   Gisulca (?) | xvi. xvi. 
   Vado Sabata (Vado) | xvi. 

(For the correction of these distances and a detailed examination of the route, see Walchmann, "Topographia des Gualtes., v. 2, p. 22.)

VIA CANDAVIA. [Via Egnatia.]

VIA CASSIA, was the main route of the principal highways of Italy which led from Rome through the heart of Etruria to Ariminum, and thence by Florentia to Luna. The period of its construction, as well as the origin of its name, is unknown.

We learn only from a passage of Cicero, as a well-known and frequented highway it is to us, as that other mention of it is as one of the roads by which he could proceed to Casinum (Phil. v. 9. 2.) In the same passage, after one of the Flaminian Way as passing along the sea, and the Aurelian along the Lower, he asks: 'Are the Cassian discriminit Cassia.' Hence it is clear that the principal road through the once famous province, and in evidence the name gives to a baseless Itinerary (p. 580), though it is thence erroneously called the Via Clodia. But into the existence of the Forum Cassia upon this itself a sufficient proof that it was the Cassian not the Clodius Way. The stations there are:

From Rome to Bacumana (Bacum) | xii. 
   Sextia (Sextia) | xii. 
   Forum Cassia (now Praetoria) | xii. 
   Volatine (Bolaza) | xii. 
   Clareum (Clara) | xii. 
   Ad Statanum | xii. 
   Antrimia (Arvum) | xii. 
   Ad Pium | xii. 
   Florentia (Ferentum) | xii. 
   Pistoria (Pisten) | xii. 
   Luca (Luna) | xii. 

Digitized by Google
VIA CININIA.

Via Cassia branched off from the Via Flaminia at the crossing of the Tiber by the Milvian Bridge. It then ascended the hill, and proceeded over a dreary and monotonous stretch of countryside, until it reached Baccano (Baccamo), situated in the crater of an extinct volcano. Two inscriptions are given in the Tabulae, which, as its name imports, was situated from Rome, and therefore 3 from the To tie.

The Via Clodia separated from the Cassia 6 miles beyond the station Ad Sextum, and off through Carese (Galera) and Sabate (Orvieto) to Forum Clodii. The Tabula again an intermediate station, between Strutium and Casellini, called Vicus Matrini, the ruins of which are still visible. Two inscriptions, one from Strutium, now called the Bagni di 12 miles beyond Forum Clodii. The stations in that document can thus be identified as far as:

- d Sextum: iv.
- eii (near Isola Farnese): vi.
- accius (near Isola Farnese): vii.
- ursus (Strutium): xii.
- icus Matrini: omitted, but should be vii.

Forum Clodii (Vetralla): iv.
Aqua Passerina (Bagni di Serpa): xi.
Volatini (Boscone): ix.
Id Paullianum Fluvium (R. Paglia): ix.
Iulium (Civita Castellana): ix.

From Rome to Ad Sextum: vi. M.P.
Carusae (Galera): ix.
Ad Novas: vi.
Sabate (Bracciano): vii.
Forum Clodii: viii.
Bieria (Beneda): vii.
Marta (Ad Martum fl.): vii.
Toscana (Toscolano): ix.
Maternum (Farnese?): xii.
Saturnia (Sienne): xviii.

The Antonine Itinerary, without giving the route in detail, says simply:

A Roma a Fere Clodiis. M. P. xxxii.

If this distance be correct, Forum Clodii must be placed either at or a little beyond Orinolo, which is 6 miles beyond Sabate (Bracciano). The distance of Orinolo from Rome by the line of the Via Clodia (as measured on Gelis's map), somewhat exceeds 31 miles. But the distance from Bieria must, in that case, be greatly overstated; on the actual distance from Orinolo to Bieria being scarcely more than 10 miles.

Westphal, Röm. Kompagnien, pp. 154—158; Denzler's Ewene, vol. i. p. 273; but the distances there cited, in the note from the Tabula, are incorrect.

[1. E. B.]

VIA DOMITIANA. (Via Appia, No. 1.)

VIA EGNATIA (S Egnatia Via, Strab. vii. p. 292, sec.), a Roman military road, which connected Illyria, Macedonia, and Thrace. We are almost totally in the dark with regard to the origin of this road. The assumption that it was constructed by a certain person named Egnatius, who was likewise the founder of the town Egnatia, or Gnatis, between Barium and Brundisium, on the coast of Apulia, is

[1. E. B.]
a mere conjecture, which cannot be supported by any authority. We may, however, make some approximation towards an estimate of the extent of its construction, or, at all events, of that portion of it. Strabo, in the passage cited at the head of this article, says that Polybius estimated the length of the city of Thessalonica, at 247 Roman miles; whereas it appears that this portion of it at least was extant in the time of Polybius. Consequently, as that historian elsewhere makes it go back to the 2nd century B.C., we may infer with tolerable certainty that the road must have been commenced shortly after the reduction of Macedonia by the Romans in a. u. 168. Whether the eastern portion of the road, namely, that between Thessalonica and Cynopsis, a town 10 miles beyond the left, or E., bank of the Ebros, was also completed at the time, or not, is a point which cannot be so satisfactorily ascertained. For although Strabo, in the same passage, after mentioning the length of the road, from its commencement to its termination at Cynopsis, proceeds to say that, if we follow Polybius, we must add 178 stadia to make up the number of Roman miles, because that writer estimated 10 and 2 plethra, or 63 stadia, to the Roman mile, instead of the usual computation of exactly 8; yet Strabo may then be speaking only of the historian's general practice, without any reference to this particular road. And, on the whole, it may perhaps be the more probable conclusion that the eastern portion of the road was not constructed till some time after the Romans had been in possession of Macedonia.

According to the same geographer, who is the chief authority with regard to this, his own whole length was 533 Roman miles, or 4380 stadia; and although the first portion of it had two branches, namely, one from Ephesoms to Tryphaisius and another from Apollonia, yet, from whichever of those towns the traveler might cross the length of the road was the same. Into the accuracy of this statement we shall inquire further on. Strabo also mentions that the first part of the road was called in Cynopsis (στεματεια), and this name frequently occurs in the Roman writers. Thus Cicero (ad Att. iii. 7) speaks of travelling "per Cynaspian," and Cornute (R.C. ii. 19) mentions it as the point from which he left Tryphaisius. It does not, however, very clearly appear to how much of the road this name was applicable. Tafel, who has written a work on the Via Egnatia, is of opinion that the appellation of Cynopsis may be considered to extend from the commencement of the via, including the two branches from Ephesoms and Apollonia, to the town of Lychnaisa. (De Via ma. Eum. Egnatia, Proxii. p. crux. Tafel, 1843.) But this limitation is entirely arbitrary, and unsupported by any authority; and it would perhaps be a just inference from the words of Strabo to assume that the name "Cynopsis" was applicable to the road as far as Tryphaisius, as Cic. L. Nicolaus speaks of "habeec" (De Att. ii. 2). The point to be determined is, what does Strabo mean by the "first part?" The road in its whole extent he says is called "Via Egnatia," and the first part is "in Cynossipia." (Ibid. ad Cic. Eum. Egnatia, pp. 311.) From what follows it is evident that he contemplated the whole of the part at Thessalonica, since he gives the separate measurements as far as that town, which is just half the whole length of the road.

The different of 3 miles probably was in some variation in the MSS. of the historian should be observed, however, that, according to Wesseling's edition (p. 318, seq.), the distance was more or less 290 miles, owing to various texts. According to the Tra. Post. the distance was 279 miles, or 10 miles that the road was of 3 miles. Furthermore, the great distance of the distances between the places.

The last-named work gives 397 miles of the distances between Apollonia and Thessalonica, or 38 miles more than the route between Tryphaisius and the latter town. Both these routes according to the Itinerary of Claudius, and translator from Apollonia to Cynopsis. Thessalonica, or 70 miles, which is not given from Tryphaisius to the nearest town, only 33. This distance is for 16 miles of its distance, and the remainder, therefore, must be in that part of the road which lay between Thessalonica. Here the distances are as those given in the route from Tryphaisius to Cynopsis, or the exception of the portion between Lychnaisa and Thessalonica. Here the distances are as those given in the route from Tryphaisius to Cynopsis, or the exception of the portion between Lychnaisa and Thessalonica. Here the distances are as those given in the route from Tryphaisius to Cynopsis, or the exception of the portion between Lychnaisa and Thessalonica. Here the distances are as those given in the route from Tryphaisius to Cynopsis, or the exception of the portion between Lychnaisa and Thessalonica.

To the Itin. Eum. (p. 56, 4th ed.), which assumes all the places to be there given, as well as the total distance between Apollonia and Thessalonica was 300 miles; which itself may equally be
of the Itinerary, though there are several variations in the route.

Now, if we apply what has been said to the remark of Strabo, that the distance from Thessalonica to the mouth of the river they called first from Epidaurus (Durrachium) or from Apollonia, it is difficult to perceive how such a road could have been seen the case if the junction of the two branches existed in his time also at Clodiana; since, as we have already seen, it was 16 miles farther to that place from Apollonia than from Durrachium according to the Itin. Ant. and to the Itin. Hierocoll. makes it 24 miles farther. Indeed the maps would seem to show that if the two branches were of equal length, their junction must have taken place to the N. of Lake Lychnitis; the branch from Durrachium passing to the N. of that lake, and that from Apollonia to the S. But, although Barmstein, in his review of Tafel's work (in Zimmerman's Zeitschrift für klass. Alterthumskunde, 7, 1850, p. 1148), adopted such an hypothesis, and placed the junction at Hieraclea, it does not appear that the assumption can be supported by any authority.

Clodiana, where the two branches of the Via Egnatia, or Candavira, united, was seated on the river Semnus (the Trysma or Semnus). From this point the two branches of the river naturally indicated the course of the road to the E. (Lasc. Northern Greece, vol. iii. p. 312.)

We will now proceed to consider the second, or eastern, portion of the Egnatian Way, viz., that between Thessalonica and Cyzicus.

The whole length of this route, according to Strabo (v. 2), and according to Tafel (pars i. p. 29), is measured for the river just below the junction between Topirrus and Maximinopolis, and Kilidium and Tempra, between Brundisium and Trajanopolis. The Itin. Hierocoll. makes the distance only 250 miles.

Many remain of the Egnatian Way are said to be still traceable, especially in the neighbourhood of Thessalonica. (Beaumour, Voy. militaire dans l'Empire bizantin, etc., p. 520.)

VIA FLAMINIA (à Φλάμινια), one of the most ancient and important of the highways of which we know with certainty the period of construction, having been made by C. Flaminius during his censorship (b.c. 220), with the express purpose of opening a free communication with the Gaulish territory, which had been subject to subjection a few years before. (Liv. Epis. xx.) It is therefore certainly a mistake, when Strabo ascribes it to C. Flaminius (the son of the preceding), who was consul together with M. Asinius Longus, the author of the Asinian Way, in b.c. 187, and himself constructed a road from Bologna to Arretium. (Liv. xxxiv. 2; Strab. v. p. 217.) It is certain that the Flaminius Way existed long before, and its military importance was already felt and known in the Second Punic War, when the consul Sempronius proceeded by it to Ariminum, to watch the movements and oppose the advance of Hannibal. (Liv. xxiv. 11.) Throughout the period of the Republic, as well as under the Empire, it was one of the best known and most frequented of the highways of Italy. Cicero, in one of his Philippics, says there were three ways which led from Rome to Cisalpine Gaul; the Flaminius by the Upper Ses (the Adriatic), the Aurelian by the Lower, and the Cassian through the midst of Etruria (Phil. xii. 9). During the contest between the generals of Vespasian and Titus (A.D. 69) the whole course of the Flaminius Way was fully brought out, and it was felt that its possession would be almost decisive of the victory. (Tac. Hist. ii. 52, &c.) Tacitus alludes to the extent to which this great highway was at this period frequented, and the consequent bustle and crowding of the towns on its course (T. ii. 54). Most of these towns have grown up into flourishing and populous places, mainly in consequence of the traffic along the line of road.

So important a highway was naturally the object of much attention, and great pains were taken not only to maintain, but to restore and improve it. Thus, in A.D. 27, when Augustus assigned the care of the other highways to different persons of consular dignity, he reserved for himself and for Trajan the Flaminius Way, and completely restored it throughout its whole length from Rome to Ariminum, a service which was acknowledged by the erection of two triumphal arches in his honour, one at Rome, the other at Ariminum, the latter of which is still standing. [ARIMINUM.] Again, at a later period, Vespasian added materially to the convenience of the road by having a tunnel through the rock at a place called Interna, now known as Il Faro, a work which still subsists in its integrity. [INTERNI.] This remarkable passage is particularly noticed by the post Claudianus, who has left us a general description of the Flaminius Way, by which the emperor Honorius proceeded, in A.D. 404, from Ravenna to Rome. (De Vita Const. H. 494—532.) Indeed, it is evident that in the latter ages of the Empire, when the emperors for the most part took up their residence at Mediolanum or Ravenna, the Flaminius Way, which constituted the direct line of communication between those cities and Rome, must have become of still greater importance than before.

One proof of the important influence exercised by this great line of highway, is afforded by the circumstance that, like the Asinian Way, it gave name to one of the provinces of Italy in the later division of that country under the Empire; though, by a strange confusion or perverseness, the name of Flaminia was given, not to the part of Umbria which was actually traversed by the Via Flaminia, but to the eastern...
portion of Gallia Cispadana, which should naturally have been included in Asamilla. [Ital. p. 93.]

There is no doubt, from the description of Claudian above cited, compared with the narrative in Tacitus of the movements of the Vitellian and Vespasian armies in A.D. 69, that the main line of the Via Flaminia coincided with the same through the Roman Empire, but we find it given in the Itineraries with some deviations. The principal of these was between Narnia and Forum Flaminius, where the original road ran direct from Narnia to Mervania, while a branch or loop made a circuit by Interamna and Spoleto, which appears to have come to be as much frequented as the main line, so that in both the Itineraries and from Rome the Itinerary this branch is given, instead of the direct line. Another route given in the Antonine Itinerary (p. 311) follows the line of the old Flaminius Way as far as Nocera, but thence turns abruptly to the right across the main ridge of the Appennines, and descends the valley of the Potentia to Ancona. The main line of the Itinerary under the name of the Via Flaminia, it may well be doubted whether this route was ever properly so called. Before enumerating the stations and distances along this celebrated line of road, as recorded in the different Itineraries, it will be well to give a brief general description of its course, especially of that part of it seems to the modern town of Orioccoli. Orioculum was 13 M. from Aqua Fia, or 44 from Rome, according to the details of distances of the Jerusalem itinerary, which are exactly correct. The Antonine itinerary gives the distance in one place 45, in another 44 M. to Rome. (See pp. 185, 311; Itin. Hier. p. 41.) In a detailed examination of this first portion of the Via Flaminia, see Westphal, Römische Itinera, pp. 133—145; Milby, Vie degli Antichi, pp. 73—74.)

The remainder of the route must be more briefly described. From Orioculum it led direct to Rome (12 miles), where it crossed the river, and thence from Rome, filling the sinuosities of the river, and, passing altogether on the left of the river, it crossed the hills near in a straight line to N. to Mervania (Bosnagia), passing by a station: Martinus (16 M.P.), and thence to Mervania (16 M.P.), thence it proceeded to Forum Flaminius, at 3 miles from Rome. The stations on this road were according to Itin. Ant.—:

</tr>
</tbody>
</table>

The position of Forum Flamini is well secured on the road, but the Jerusalem Itinerary, which gives the greater detail, makes the total distance somewhat greater. The stations as they stand are—:

</tbody>
</table>

The position of Forum Flamini is well secured at the modern road, but the road, on which its ruins are still visible. This is, however, too more than 2 miles from Fagulium, but is now placed by the Itineraries 12 miles from Nocera (Nocera) and there can be no doubt that the foundation of the town of Forum Flamini was consent.
VI A FLAMINIA.

VIA LATINA.

with the construction of the highroad itself; it was judiciously placed just at the entrance of the Apennines, where the passage of those mountains may be considered to have commenced. Thence the highway followed nearly the same line as the modern road from Polignano to Fano, skirting the main ridge of the Apennines, and the principal stations can be identified without difficulty. It passed by Helvillum (Sipilo), crossed the central ridge of the Apennines at La Scheggia (probably Ad Sessum of the Tabula), and descended into the valley of the Constanza, a tributary of the Metaurus, passing by Jules or Colles (Cufi). Inconnu (the Fano del Porto), at Forum Sempronii (Fosseombra), whence it descended the course of that river to Fanum Fortunae (Fano) on the Adriatic, and thence along the coast to Ariminum (Rimini), where it joined the Via Aemilia.

We may now recapitulate the distances as given, first, in the Antonine Itinerary (p. 125):

From Rome to

| Rostra Villa | xxiv. m.f. |
| Oriculum (Otricoli) | xvi. |
| Narnia (Narni) | xii. |
| Ad Martia (near Massa) | xvi. |
| Nervanda (Boscoova) | xvi. |
| Nuceria (Nocera) | xxi. |
| Helvillum (Sipilo) | xxiii. |
| Colles (Cufi) | xxiii. |
| Forum Sempronii (Fosseombra) | xvii. |
| Fanum Fortunae (Fano) | xvi. |
| Pisaurum (Pescara) | vii. |
| Ariminum (Rimini) | xxiv. |

These distances are all approximately correct.

The table also appears to be more general in the Julia Itinerary (p. 613), as follows:

From Rome to

| Ad Rubras (Prima Porta) | ix. m.p. |
| Ad Vicesimum | xi. |
| Aqua Viva (Osteria dell’Acqua Viva) | xii. |
| Oriculum (Otricoli) | xii. |
| Narnia (Narni) | xii. |
| Internam (Termo) | viii. |
| Tres Tabernae | iii. |
| Fanum Fugitivi (Monte Somma) | vii. |
| Spletium (Spoleto) | vii. |
| Sacraria (La Vena) | viii. |
| Trebia (Tresta) | iv. |
| Falvium (Falvium) | v. |
| Forum Flaminii (S. Gio. in Forisflumen) | iii. |
| Nuceria (Nocera) | xii. |
| Pisaia, probably Tadimium (Gualdo) | viii. |
| Herbelinium (F) | vii. |
| Ad Sessum (La Scheggia) | x. |
| Ad Sessum (La Scheggia) | xiv. |
| Interna (II Porto) | xiv. |
| Forum Sempronii (Fosseombra) | ix. |
| Ad Octavum | ix. |
| Fanum Fortunae (Fano) | vii. |
| Pisaurum (Pescara) | viii. |
| Ariminum (Rimini) | xxiv. |

The whole distance from Rome to Ariminum according to this Itinerary is therefore 223 miles; and the Antonine (following the more direct line) makes 210 miles. The Tabula adds nothing to our knowledge of this route; and the distances are much less correct than in the other two Itineraries.

The branch of the Flaminian Way which struck off from the main line at Nuceria and crossed the Apennines direct to Ancona, is thus given in the Antonine Itinerary (p. 311):

From Nuceria to

| Dubli (?) | viii. m.p. |
| Prolaquesum (Petraro) | viii. |
| Septempeda (S. Severino) | xv. |
| Treia (Br. near Pista) | xvi. |
| Auxinum (Osteno) | xviii. |
| Ancona | ii. |

Thence a road was carried along the coast by Sena Gallica to Fanum Fortuna, where it rejoined the main line of the Via Flaminia. The stations were:

Ad Assim fl. (R. Erino) | viii. m.p. |
Sena Gallica (Seneigachi) | xii. |
Ad Pirum (?) | vii. |
Fanum Fortuna (Fano) | vii. |

All the above distances appear to be at least approximately correct. (For a full and careful examination of the line of the Via Flaminia, and the distances of the stations upon it, see D’Aubrul, Analys Kréatique de l’Italie, pp. 142—162.)

VIA LABICANA (Anacapari 860) was one of the highroads that issued from the Porta Esquilina at Rome. It was evidently originally nothing more than a road that led to the ancient city of Labicum (16 miles from Rome), but was subsequently continued in the same direction, and, after sweeping round the E. foot of the Alban hills, it joined the Via Latina at the station Ad Pictas, in the plain between them and the Volscian mountains. (Strab. v. p. 237.) This route was in many respects more convenient than the proper Via Latina, as it avoids the ascent and descent of the Alban hills; and hence it appears to have become, in the later ages of the Empire, the more frequent road of the two; so that the Antonine Itinerary gives the Via Labicana as the regular highroad from Rome to Beneventum, and afterwards gives the Via Latina as falling into it. (Itin. Ant. pp. 304, 306.) But this is decidedly opposed to the testimony of Strabo (L.C.), and the usage of the Augustan age, which is generally followed by modern writers. Hence the Via Labicana will be here given only as far as the point where it joins the Latina. The stations set down in the Antonine Itinerary are merely:

From Rome to Ad Quintanas | xv. m.p. |
Ad Pictas | | |

The Tabula subdivides the latter stage into two; viz., Ad Quintanas, iii. m.p., and thence to Ad Pictas, vii.; thus confirming the distance in the Itinerary. The station Ad Quintanas was undoubtedly situated at the foot of the hill on which stands the village of La Colonna, occupying the site of the ancient LAMICUM. The line of the ancient road from Rome thither followed nearly the same course, with fewer windings, as the modern road to Palestrina and Valmontona. It is described in the article "LAMICUM." (E. H. B.)

VIA LATINA (Anacapari 860) was one of the principal of the numerous highroads that issued from the gates of Rome, and probably one of the most ancient; and is traced through the bowl of its construction, and it was doubtless long in use as a means of communication before it was paved and converted into a regular highroad. Some road or other must always have existed between Rome and Tusculum; while again beyond the Alban hills the valley of the Sacco (Tevere) is one of the
natural lines of communication that must have been in use from the earliest times. But it is not probable that the line of the Via Latina was completed as a regular road till after the complete reduction of both the Latins and Volsciains under the Roman authority. There is no doubt that Livy speaks of the Via Latina as if it already existed in the time of Coriol. (ii. 39), but he in fact uses the name only as a geographical description, both in this passage and again in the history a. c. 296, when he speaks of Interamna as a colony "qua via Latina est" (x. 36).

Neither passage affords any proof that the road was then in existence, for it is certain that there was already a way or line of communication. The course of the Via Latina is, indeed, more natural for such a line of way than that of the more celebrated Via Appia, and must have offered less difficulties before the construction of an artificial road. Nor did it present any such formidable pass in a military point of view as that of Latina on the Appian Way; the reason was it was the route chosen both by Pyrrhus when he advanced towards Rome in a. c. 280, and by Hannibal in a. c. 211. (Liv. xxvi. 8, 9.) On the latter occasion the Carthaginian general seems certainly to have followed the true Via Latina across Mount Algidus and by Tusculum (Liv. i. c.) Pyrrhus, on the contrary, turned aside to the east as he approached Pratese, which was the farthest point that he reached in his advance towards Rome.

Whichever may have been the date of the construction of the Via Latina, it is certain that long before the close of the Republic it was one of the best known and most frequented highways in Italy. Mention is made of it as one of the most important of the many roads that issued from the gates of Rome (v. p. 237), and takes it as one of the leading and most familiar lines of demarcation in describing the cities of Latium. (I. c.) It was, however, in one respect very inferior to its neighbour the Via Appia, that it was not capable of any considerable extension, and terminated at Cassilum, where it joined the Via Appia. (Strab. l. c.) There was, indeed, a branch road that was continued from Tasunum by Alliafo and Telesia to Beneventum; but though this is given in the Itineraries in connection with the Via Latina (Itin. Ant. pp. 122, 304), it certainly was not generally considered as forming a part of that road, and was merely a cross line from it to the Appian. On the other hand, the main line of the Via Latina, which descended the valley of the Sacro, received on its way the two subordinate lines of road called the Via Labicana and Via Praenestina, which issued from Rome by a different gate, but both ultimately joined the Via Latina, and became merged in it. (Strab. l. c.) Such at least is Strabo’s statement for antiquity was the ordinary course of the case in his time. But it would seem as if at a later period the Via Labicana came to be the more frequented road of the two, so that the Antoinie Itinerary represents the Via Latina as joining the Labicana, instead of the converse. (Itin. Ant. p. 306.)

The stations, as given in the Itinerary just cited, are as follow:—

Ad Decimum — x. m. p.
Roboraria — — iii. (vi.)
Ad Picas — — xvii.
Compitum Anagninum — xv.
Feroniun (Feronia) — viii.
Prasinus (Frasnuus) — vii.
Fregellinum (Capranum) — xii.
Fabraeriu (S. Giuomu in
Carico) — —
Aquinnium (Aquino) — vii.
Casinum (S. Geromu) — vii.
Tarquinia — —
Ocles (Calvi) — —
Casilinium (Capena) — vi.
Capua (Sta Maria) — —

(The four last stages are supplied by Tabula. The Antonine Itinerary gives a branch of the road that led, as above, Exam. Beneventum.)

It will be observed that, as in all the above set down, from Rome to Fregellina the Via Latina did not pass through any of the most important, the stations being merely interconnections, or places for changing horses. For the account of the importance of this line it will be necessary to describe it somewhat more distinctly.

The Via Latina issued from the Porta Corne together with the Via Appia. It was set in the half-way between that gate and the Lat. Appia (Porta di S. Sebastiano), that was raised, and the Via Latina pursued its way through the gates in the walls of Arausia and Fregellina. When, however, it reached a stone gate (now long closed) to a point 2 miles from Porta Latina, where it crosses the modern road to Rome, did its distance from the city to Albasco, the line of the ancient road was readily traced by portions of the pavement and of sepulchres, with which the Latin Way was studded. Flaminian and Appian (Juv. Sat. i. 171) describe the Via Latina as a perfectly straight line, which is marked by roads to distance by tombs and other ruins, to the Tuscanit hills. The only one of these which deserves any notice is that called the temple of Fortuna Muliebris, which is 1600 feet from one of the Via Latina, and is the ancient road's name of the Roman village, supposed to be that of Lacta, about a mile farther must be placed the Decimum, the 10 miles being under the town from the Porta Capena. Almost immediately after this point began the ascent of the Tuscanian road still preserved nearly its former direction as called Lacta Cave, and descended to the valley of the Sacco, in the plain below. The course of the ascent may be distinctly traced by remains of the pavement still visible at intervals: the second station, Roboraria (if the distance of six miles given by some MSS. be correct), must have stood in the ruins of a medieval castle called Traiani. Then at Ad Picas the distance of the road is 17 miles, which is certainly greatly above the text.

It was at this station that the Via Latina, or, and from this circumstance, with the distances given there to Fregellina we may place the site of Ad Picas somewhere at the Osteria di Mezzi Selen, about 10 miles.

Roboraria Strabo calls it 210 stades; but
VIA LAURENTINA. 1808-
to, but it is not clear whether he measured
once by the Via Latina or the Labicana (v).

The actual distance of Ferentum (con-
whence there is no doubt) from Rome is 49
and the Comitum Anagninum is correctly
1 mile nearer the city, which would exactly
with the present on the present highroad where
up to the Via Laurentina struck off direct to Laurentin-
y and the Tabula place Ad Pictas 15 miles
Comitum Anagninum, and this distance is
x it 10 miles from Boboraria, or 26 from Rome,
pressing closely with the statement of Strabo.
y, therefore, feel sure that the position above
Ad Pictas, a point of importance, as that
the two roads joined, is at least approximately

next stations admit of no doubt, and the dis-
are correct. It was at the Comitum Anag-
15 miles beyond Ad Pictas, that the Via
attained to the Lentini which was carried
down the valley of the Sacco, nearly in
the presence of the Comitum Anagninum and
both of which still retain their ancient

Fregellum (Caprona) on the Liris, it turned S. to Fabretia Nova (the
of which are still visible at S. Giovanni in
), on the right bank of the Liris. Here it
\[1\] that river by a bridge, of which the ruins
still exist, whence the course of the ancient
may be traced without difficulty through Aqui-
Casinum, Tepano and Caesaline to Vulturum, where it fell into the Via Appia.
ons of the ancient pavement, sepulchres, and
ruins mark the line of the ancient way through-
be latter part of its course. At a station in
the Tabula under the name of Ad Flexum
lies from Casinum) a branch road turned off
sufnum, whence it ascended the valley of
Vulturum to Assemini, and thence into the

of Samnium. The Antonine Itinerary repre-
the Via Latina as following this cross-road,
making a bend round by Venafra, but there
no doubt that the regular highroad proceeded
to Tepano, and from there the road be-
distinctly traced, proceeding from Tepano
ynue N. through Coacencelo and Turo to the
\[2\] of Fene, which was probably the site of the
on Ad Flexum. This would be 18 miles from
num. The Tabula gives the distance as viii,
which there is no doubt we should read xvii.
be branch of the Via Latina, already alluded to,
th was carried to Beneventum, quitted the main
at Tepano, crossed the Vulturum to Allifano,
teness was carried up the valley of the Calor
Telesia to Beneventum. The distances are thus

VIA LATENIA. (v. PRAENESTINA (η Πραιανεστίνη βίος, Strab.), was the name of one of the highroads that
issued from the Porta Equequina at Rome, and led (as
its name implies) direct to Praeneste. The period
of its construction is unknown; but it is evident that
there must have been from a very early period a high
road, or line of communication from Rome to
Praeneste, long before there was a regular paid
road, such as the Via Praenestina ultimately became.
The first part of it indeed, as far as the city of Gabii,
18 miles from Rome, was originally known as the Via
Gabina, a name which is used by Livy in the history of
the early ages of the Republic (Liv. ii. 11), but
would seem to have afterwards fallen into disuse;
and so that both Strabo and the Itineraries give the
name of Via Praenestina to the whole line. (Strab.
v. p. 238; Itin. Ant. p. 302.) In the latter period
of the Republic, indeed, Gabii had fallen very
much into decay, while Praeneste was still an
important and flourishing town, which will suf-

1 2 3 4 5 6 7 8 9 0
VIA SALARIA.

sufficiently account for the one appellation having be-
coming merged in the other. A continuation of the
same road, which was also included under the name
of the Via Praenestina, was carried from the foot
of the Campagna to Praeneste, through the subject
plain, till it fell into the Via Latina, just below
Anagnia.

The stations on it mentioned in the Antonine Iti-
uary (p. 308) are:

From Rome to Gabii       xii. M.P.
Praeneste       xi.
Sub Anagnia    x

The Tabula gives the same distances as far as
Praeneste, which are very nearly correct. Strabo
reckons it 100 stadia (156 miles) from Rome to
Gabii, and the same distance thence to Praeneste.
The continuation from Praeneste to Sub Anagnia is
given only in the Antonine Itinerary, but the
distance is overstated; it does not really exceed 18
miles.

The Via Praenestina issued from the Porta Esquili-
na at Rome, together with the Via Labicana (Strab.
v. p. 337); it passed through the Porta Praenestina
in the latter circuit of the walls, now called Porta
Maggiore; and separated from the Via Labicana im-
immediately afterwards, striking off in a nearly direct
line. About 4 miles from Rome it passed the imperial
villages of the Gordians, the magni-
数nce of which is extolled by Julianus Capitolinus
(Gordianus, 33), and is still in some degree attested
by the imposing and picturesque ruins at a spot
called Torre dei Schiavetti. (Nibby, Dizionario, vol. iii.
pp. 707-710.) Nine miles from Rome the road
passed over the valley of a small stream b of a
viaduct of the most massive construction, still known
as the Ponte di Nome; and 3 miles farther it
passes the still existing ruins of the city of Gabii.

Hence to Praeneste the line of the road was not
so direct; this part of the Compagna being in-
necteded by deep gullies and ravines, which necessi-
tated some deviations from the straight line. The
road is however clearly marked, and in many
places retains its ancient pavement of basilite lava.
It is carried nearly straight as far as a point about 5
miles beyond Gabii, where it passes through a deep
cut in the tufa rock, which has given to the spot
the name of Comacessi; shortly afterwards it turns
abruptly to the right, leaving the village of Guidicasso
(the probable site of the temple on the left), and thence follows the
line of a long narrow ridge be-
tween two ravines, till it approaches the city of
Praeneste. The highroad doubtless passed only
through the lower part of that city. Portions of the
ancient pavement may be seen shortly after quitting
the southern gate (Porta del Sole), and show that
the old road followed the same direction as the modern
one, which leads through Covi and Puliceto, and
to an inn on the highroad beyond Anagni, apparently
on the very same site as the station Sub Anagnia
(or Comprum Anagninum, as it is called in another
route) of the Itinerary.

(Westphal, Röm. Komp. pp. 97-107; Nibby,
Discovery of Rome, 523-530.) [E. H. B.]
VIA SALARIA.

and is marked in the Itineraries as 18 miles from Rome. Here the Via Nomentana again fell into the Salaria. (Strab. v. p. 228.) Hence to Raste the latter road traversed a hilly country, but of no great interest, following nearly the same line as the modern road from Rome to Raste. The intermediate station of Ad Novas or Vicusorum, as it is called in the Antonine Itinerary is still marked by ruins near the Ostara Nuevo, 32 miles from Rome, and 16 from Raste. Here an old church still bore at a late period the name of Vico Nuevo.

The stations on the original Via Salaria, from Rome to Raste, are correctly given, and can clearly be identified.

From Rome to

Eretum (Grotta Marosae) - xviii. M. P.
Vicus Novus (Ost. Nuevo) - xiv.
Raste (Raste) - xxvi.

From Raste the Via Salaria (or the continuation of it as given in the Itineraries) proceeded nearly due E. by Cutiæa, which is identified by its celebrated lake, or Cas de la Salle, to Antocrenus (Antrodoco), situated at the junction of two natural passes or lines of communication through the central Apennines. The one of these leads from Interocres to Amoretum, in the upper valley of the Arentus, and was followed by a cross-road given in the Tabulae, but of which both the stations and the distances are extant. The other the main valley of the Velinus, and near nearly due N., was ascended by the Via Salaria as far as Tableau, 16 miles from Interocres, and near the sources of the Velinus. Thence that road crossed the ridge of the Apennines and descended into the valley of the Tronto (Truentus), which river it followed to its mouth at Castrum Truentinum, passing on the way by the strongly situated city of Asculum (Ascol). The distances on this line of route are thus correctly given in the Antonine Itinerary (p. 307):

From Raste to

Cutiæa (near Paterno) - viii. M. P.
Interocres (Antrodoco) - vii.
Tableau (near Crota Rata) - xvi.
Castrum Truentinum - xx.

From this last point two roads branched off, the one turning N., and proceeding along the coast of the Adriatic to Ancona; the other proceeding S. along the same coast to Castrum Novum (near Giulia Nuevo), and thence to Adria (Adri). The latter branch is given in the Itinerary as a part of the Via Salaria; but it is clear that neither of them properly belonged to that highway, both being in fact only portions of the long line of road which followed the coast of the Adriatic continuously from Ancona to Brindisi, and which is given in the Antonine itinerary in connection with the Via Flaminia (Itin. Ant. pp. 313-316). (The course of the Via Salaria is examined, and the distances discussed in detail by D'Anville, Analyse Geographique de l'Italie pp. 165-169.)

VIA TIBURTINA. [Via Valeria.]

VIA TIBURTINA, a name found in inscriptions, and noticed by the Notitia and Curseus among the roads that issued from the gates of Rome, was probably the road that is marked by the route of the Via Flaminia at Sasa Ubu, and followed the right bank of the Tiber until it rejoined the Via Flaminia, between Acqua Viva and Borgoetto. The existence of such a road is known from remains of it still visible; and it is the only one to which the name of Via Tiberina can well be applied. (Westphal, Rom., supp. pp. 134, 138.)

VIA TIBURTINA. [Via Valeria.]

VIA TRAJANA. [Via Appia, No. 4.]

VIA VALERIA (Via Octavia 880, Strab.), one of the most celebrated and important of the Roman highways, which led from Rome, or, more strictly speaking, from Tibur, to the lake Fucinus and the land of the Marsi. It was probably the road which certainly seem to refer to cross-roads in the neighbourhood of Rome; and it is very improbable that the construction of so celebrated a highway as the Via Valeria should not have been more distinctly stated. (Livy. ix. 43.) The Via Valeria, indeed, was properly only a continuation of the Via Tiburtina, which had led from Rome to Tibur; and though the Itineraries include the whole line of route under the name of the Via Valeria, it appears that the distinction was still kept up in the time of Strabo, who distinctly speaks of the Valerian Way as beginning from Tibur, and leading to the Marsi, and to Cornitinum, the metropolis of the Peligni (Strab. v. p. 238). The expressions of the geographer would naturally lead to the conclusion that this road was in his time carried as a regular highway as far as Cornitinum; but we learn from an inscription, that this was not the case, and that the regularly constructed road stopped short at Cerfinnia, at the foot of the Mons Imera or Forca di Caruso, a steep and difficult pass, over which the highway was not carried till the reign of Claudius, who at the same time continued it to the mouth of the Aretinus. (Orell. Inscr. 711.) It appears that the portion thus added at first bore the name of the Via Clandia Valeria (Inscr. l.c.); but the distinction was soon lost sight of, and the whole line of route from Rome to the Adriatic was commonly known as the Via Valeria. (Itin. Ant. p. 308.) It will be convenient here to adopt the same usage, and consider the whole course of the road under one head.

The Via Tiburtina, as the road from Rome to Tibur was properly called, must undoubtedly have been of very ancient origin. There must indeed have existed from the earliest ages of Rome a frequent highway or communication between the two cities; but we are wholly ignorant as to the time when a regularly made road, with its solid pavement and all the other accessories of a Roman via, was constructed from the one city to the other. The road as it existed in the time of the Roman Empire may be distinctly traced by portions still remaining of the
VIA VALERIA.

Pavement, or by sepulchres and fragments of an-
cient buildings, so that no doubt can exist as to its
precise course. It quitted the original city by the
Porta Equina, passed through the Porta Tiburtina
(now Porte S. Lorenzo) in the walls of Aurelian, and
then, on the right line to the Anio, which it crossed
by a bridge about 4 miles from Rome. This bridge,
now called the Ponte Marmoreo, is in its present state
the work of Narses, having been restored at the
same time as those on the Via Salaria and Nomentana,
after their destruction by Tito, A. D. 549. From this bridge the ancient route of the Via Ar-
num, called the Via Salaria, passed along the same
channel as far as the Lago di Tivoli, a small lake
or pool of sulphureous waters, similar in charac-
ter to the more considerable pool called the Solferino
or Aquae Albance, about 2 miles farther on, and
a mile to the left of the highroad. Leaving this
on the left, the Via Tiburtina proceeded almost perfectly
straight to the Ponte Laccus, at the foot of the hill
of Tivoli, where it recrossed the Anio. There can
be no doubt that this bridge retains its ancient name
of Ponte Laccusus, though this is not mentioned by
any ancient author; but the origin of the name is
evident from the massive sepulchre of the Planzian
family (a structure not unlike the celebrated tomb
of Csesca Moscel on the Appian Way), which stands
outside the district walled by which was constructed
by M. Planzianus Laccusus, who was censor together
with Tibes-

rion in the reign of Augustus. From the inscription
as an ancient milestone it appears that this part of
the road was constructed by him at the same time; and
it is probable that the original Via Tiburtina was car-
ried from the Lago di Tivoli in a different direc-
tion to the left, as to leave the Aquae Albace on the
right; while the road constructed by Planzian, like the modern highroad,
passed between that lake and Tibur. The 14th
milestone was found near the spot where the road
crosses the artificial channel that carries off the
waters of the lake. From the Ponte Laccusus the
ancient road ascended the hill of Tibur by a very
steep and straight ascent, passing through or under a
portion of the vaulted substructions of the so-called
villas of Macenas. [TIBUR.]

The Itineraries all agree in stating the distance
of Tibur from Rome at 20 miles; but it in reality little
exceeds 18 by the direct road, which crossed the
Ponte Laccusus, as above described. The Tabula
Ferrata gives the Aquae Albace as an intermediate station,
best places is 16 M. P. from Rome, though the true
distance is only 14.

From Tibur the Via Valeria ascended the valley
of the Anio, passing by the town of Varia (Visconti),
8 miles from Tibur, to a point marked by an inn,
owned Cesaris Ferrazzi, 5 miles beyond Vice-
varia and 18 from Tivoli. More distant points, where the
Anio was an ancient bed, is evidently the site of
the station ad Lactunam of the Tabula, whence
a side road struck off to the right, ascending the
upper valley of the Anio to Sublacquem (Sedioso),
whence the road derived the name of Via Sub-
lacquem, by which it is mentioned by Frontinus (de
Augusta, c. 15). The road is given in the Tabula,
but in so confused a manner that it is impossible to
make it out. Sublacquem was in reality 48 miles
from Rome by this route, or 28 from Tibur.

The Via Valeria, on the other hand, turned to the
left at the Ostera Ferrazia, and crossed the hills to
Carseoli, the ruins of which are still visible at some
distance nearer Rome than the modern village of
Carseoli. Thus it ascended a steep ascent,
where portions of the ancient via
pavement and substructions, a site which has
ascended again into the basin of the Lago Lazio.
After passing by, rather than through. From from
the hills of Carseoli it descends to the valley of
fennia, the site of which is clearly marked
spot just below the village of Coll Armellina. [Carseoli.]

Here, as already mentioned, the Via Valeria terminated; but the circumstance:
constructed by Claudius, and given to the
aries, ascended the steep mountains of the

VICUS AQUENSIUS.

p. 438.) Variously identified with *Villa saltana* and *Villarossa*. [T. H. D.]

VICUS AQUENSIUS. [AQUABONUMERUM.] VICUS CÆCILIUS, a place in Lusitanus, located near Augusta Emerita, to Caesar Augustus. (Ist. Ant. p. 434.) Variously identified with *Narbonconnensio* and *Oe- terum*. [T. H. D.]

VICUS CUMINARIO, a place of the Cappadocian in Hispanic Tarragonensis, somewhat S of the Tagus, and E of Toledo. Probably the modern St. Vicencio, where it is said for its vicinitas. (Morales, Aspin. p. 77; Floris, Exp. Supgr. v. p. 23.) Others have identified it with Oesum and Osea. [T. H. D.]

VICUS DOLCIUSF, in Gallicus. The name occurs only on an inscription found at *Halisphens*, near Burgos, the ancient *Gensicua* (GÉNÉCIA). Vicus Dolensus may be the name of *Halisphens*, (Uxer, Gàllic.).

VICUS HELENAR, in Gallia, mentioned by Sidonius Apollinaris (Major. Carmina. 5. 216), in the country of the Aetates; but geographers disagree about the site. Some place it at *Hedes* or *Hedensis*, on the Camashe, but that river is in the country of the Morins. Others fix it at a place called *Lema*, and others at *Lemetoc* (G. L.)

VICUS ICTIMULTOR. [ICTIMULUM.]

VICUS JULII or ATURAS, in Aquitania. The name Civitas Aetensium occurs in the Notitia of the Gallic Provinces. The name Aetates also occurs in Sidonius Apollinaris (i. sp. 1). In the passage of Tibus, cited under *Arvoca* (Vol. I. p. 336) *Aetare* is said to be a corruption of Scaliger, the MSS. having *Arx*:

"Scene trossemari fortis millita victus Atur;"

but the great critic is probably right.

At the council of *Agde* (Agatha), A.D. 506, there is a subscription by a bishop "de civitate *Vico Juli*," and the same name occurs in Gregory of Tours. D'Avrille affirms that Aetare and Vican Julii are the same place, relying on a Notitia, where we read *Civitas Anstoeriana Vico Juli." The name of the river Ataur was also given to a people Aetare, who have given their name to the town of Avero, which is on the *Adour*. (D'Avrille, Noticia, s. c.)

VICUS JULIUS, in Gallia, is mentioned only in the Notitia of the Empire as a post under the order of general residing at *Magonstania* (MAGONSTIA). It is placed between *Taurus* (Tauris-Zabara) and Nenetus (Sperici). D'Avrille supposes Vican Julii to be *Germarissium*, at the place where the Quenes enters the Ebro.

VICUS MATRINUL. [VIA CASTELLA.]

VICUS NOVUS. [VIA SALARIA.]

VICUS SPACORUM. [SPACORUM VICUS.]

VICUS VARAVANUS. [VIA ARVIALE, No. 5.]

VIDEOS (Oleus), a small coast river in the west of Germany, between the Rhinen and the Assia (Vol. ii. 11. 1, Marxian. p. 51), is probably the same as the Wicht. [L. E.]

VIDEOS (Oleus), a river in Gaul, and according to Cassiodorus (p. 1411), the Rhine. Others identify it with the *Ouleer*. [T. H. D.]

VIDURIA or VIDUBIO, in Gallia, appears in the Table on a road from Andernachum (Tentos) to *Catalia*, which is *Cataliense* (Chadson-sur-Seine). The road passes through *File or Tire* (TIRE) to Vi- dubia. The distance in the Table between *Tire* and *Chobos*, 39 leagues, is correct; and it is 11 in *Tire* to *Vidubia*. D'Avrille sees *Vidua* at Bourn, on the little river Fos, a branch of the *Sarthe*. D'Avrille suggests *Vidurini* to the Romans, who renamed it *Veneti* between the Viducasses and the Lepor. But the Viducasses are between the Saône and the Loire. The boundary between the Viducasses and the Saône is indicated by a new *Exs* (Vines), which often occurs in French poetry.

There is a place named *Vex R.* SW. of the department of Calvados, some distance from the left bank of the *Orne*. This place is mentioned in the tithe rolls of the surrounding abbey of *Fontenay*, on the other side of the Orne, under the name of *Vicinnus* or *Vexius*, which *Vicis* is a manifest corruption, as *Dac-shows*, like *Tricaus*, *Trecas*, *Trias* and *Vicinus*. There is or was a small gymnasium, fragments of mosaics and statuary, and a great number of medals of the imperial period, besides other remains. In 1854, at the date A.D. 238, found on the spot where this city had temples and altars erected to *Minera* and *Mars*, and to Mercury. (Nouv. Essai sur le Vexin, by M. L. Abbe Deleuze, f. 270, lith. by Richard et Huret, (Caux et Vexin).)

The name of this old town is unknown, but remains show that it was a Roman city, prev. built on a Celtic site; and several Roman buildings are found. Some geographers suppose it to be Aramea or Aramesium, in the vicinity of the city of *Dassanech,* to *Fix.* But the site of Aramea is doubtful. [ADAMOTTIS, D'AVRILLE,]

VIENNA (VIENNE, VENIO, VICINIA, VENIA, VIESSA, VIENNA, VIESSA, or VIENNA), a city of the Allobroges (Vol. i. 10. 3), in Gallia Narbonensia, on the east bank of the *Barthes*, and only the town which Pusilus built on the Allobroges. Stephanius (s. n. Novac) gives this form of the word and an Albian site near Aosta, and he suggests also Roscoves and Roscoves for a form of the name. He has preserved a tradition that Vienna being a Cretae colony from *Razius*; and accordingly, if this were true, it is Hellician. Dion Cassius (xvi. 50) has a story about some people being expelled from Vienna, the Allobroges, but he does not say who they were. [L. E.]

The position of *Vienna* is easily found by name and by its being on the east of the *Rheine* and the east side of the *Rhine*. It is a city, however, as *D'Avrille* observes, in the *Alpine* Itinerary, which makes Vienna xvi. from *Nimmern,* and adds the remark that by this it is xvi. The number xvi seems abs-
VIENNA.

It is remarked, too, that Seneca (De Morit., c. 6) says that Claudius was born at Lugdunum (Lyons), "ad sextum decimum lapidem a turribus," The real distance from Vienna to Lyons is about 17 M. P.; but Pausanias says that the territory of Lyon may have a narrow strip on the south side of the Rhône. The road to Vienna is about 23 M. P. from Lugdunum, unless it be one on the west bank of the Rhône. Strabo (iv. pp. 184, 186) makes the distance between Lugdunum and Vienna 200 stadia M. P., which is too much.

Furtur habere meae, si vera est fama, libellus.
Inter delicias pulcrum Vienna suas.

liny says that his works were in the book sellers' houses at Lugdunum. [LUGDUNUM.] These facts set a curious contrast between the book trade in each provincial town under the Empire and at present day, when a man would not find much. Vienna was also noted for the wine (Martial, xiii., 1) that grew in the neighbourhood; and some of the best wines of the Rhône are still made about sea. The town is on the division of Narbonensis named Vienne. The modern town of Vienne is in the department of the river Gare, which flows through the Rhône. The modern town is in the valley of the Gare, and extends to the banks of the Rhône. The Roman town was placed on two sides of the Rhône. There are seven foundations of the massive Roman walls above 1000 feet in circuit which enclosed Vienna. These are, even in the weakest parts, were about 20 feet thick; and it appears that there were round towers at intervals. There are at Vienne the remaining some arches, which are supposed to have formed a entrance to the Theatre. They are commonly called triumphal arches, but the arches [VINCENNES], is now a Museum, and contains some valuable ancient remains and inscriptions. This building is the Corinthian order, with six columns in front and eight on each side; the columns are above 35 feet in diameter, and 35 feet high, including the use of the capitals.

VIGESIMUM, AD. 1309

There is a singular monument near Vienna, sometimes called Pontius Pilate's tomb, there being a tradition that Pilate was banished to Vienna. But even if Pilate was sent to Vienna, that fact will not prove that this is his monument. It is a pyramid supported on a quadrangular construction, on the side of which there are four arches with semicircular arches at the top; and there are columns at each of the angles of the construction. Each side of the square of this basement is about 21 feet long, and the height to the top of the entablature of the basement is nearly 22 feet. The pyramid with its smaller base rests on the concrete part of the construction; it is about 30 feet high, and the whole is consequently about 52 feet high. The edifice is not finished. It has on the whole a very fine appearance. There is a drawing of it in the Penney Cyclopaedia (art. Vienna), made on the spot in 1835 by W. B. Clarke, architect.

The remains of the amphitheatres have been found only by excavation. It was a building of great magnitude, the long diameter being above 500 feet and the smaller above 400 feet, which dimensions are about the same as those of the amphitheatre of Verona. It has been used as a quarry to build the modern town out of. Three aqueducts supplied Vienna with water during the Roman period. These aqueducts run one above the other on the north side of the hill which borders the left bank of the Gare, and they are nearly parallel to one another, but at different elevations. The highest was intended to supply the amphitheatre when a naumachia was exhibited. There are also remains of a fourth aqueduct large enough for four persons to walk in upright and abreast. This aqueduct was completely entirely constructed underground, with a fall of about one in a thousand, and for the most part lined inside with a red cement as high up as the spring of the arches.

The Roman road, sometimes called the Via Domitia, ran from Arelate (Arles) along the E. side of the river to Lugdunum (Lyons). Where it enters Vienne, it is now made up to the foundations of the modern town, on the edge of the ground, and this depth increases as it goes farther into the town. It is constructed of large blocks of stone. Another road went from Vienna to the Alpis Graia (Little St. Bernard) through BEROBITUM; and it is an interesting fact to find that several villages on this road retain names given to them in respect of the distance from Vienna; thus Septème is 7 miles, Opière 8 miles, and Dio- mos 10 Roman miles from Vienna. Another road led from Vienna through Gulare (Grenoble) to the Alpia Cottia (Mont St. Genève). (See Richard et Hocquart, Guide du Voyageur, for references to modern works on the antiquities of Vienna, and particularly M. Moreau's work, Svo. Vienne, 1819, which contains the whole of the above notes.) Under this is proposed by the Académie des Inscriptions et Belles Lettres; also the references in Uberti, Gallien, p. 453.)

VIGESIMUM, AD. 1. A station in Gallia Narbonensis, the distance of which from a given point determined its name, as we see in the case of other names of places derived from numbers [DECIUM, AD; VIENA.] The place is xx. M. P. from Narbo (Narbonne) on the road to Spain, and may be at or near a place called La Palme.

2. There is another Ad Vigesimum which occurs in the Itin. of Bordeaux to Jerusalem, on the road from Toulouse. These numerals show that such cities
had the privilege of reckoning their roads from the capital to the limit of their territories, where a Fines often occurs. [Fines] (D'Avnllle, Notice, &c.)

[V. L.]

VILLA PAUSTINI, a place of the Iceni in Britain, on the road from London to the northern boundary wall. (Itis. Ant. p. 474.) Camdeon. (p. 294.) In 1837, St. Edmund's Bergh; but others have placed it near Tadworth, at Welshot, and at Tavistock. Fornv. [T. H. D.]

VIMINA CIUM (Osbadna), Ptol. iii. 9. § 3, an important town of Moesia Superior, lying somewhat E. of the mouth of the Margus, and connected with Constantine by a highroad which passed through Naissus. (Itis. Ant. p. 133; Itis. Hieroc. p. 284.) It was the head, in the 1st century, of the Leg. vii. Claudia. (Fb. cf. Estrac. ix. 13.; Procop. de Aed. iv. 6. p. 287.; Theophyl. i. 5. viii. 12. 4c.) By the later Greeks the name is written Byxadnna. Variously identified with Roma or Rama, and Conocia. (Cf. Marcell. Demeok. ii. p. 10.; Mannert. vii. p. 78.)

[V. T. H. D.]

VINCIA, a town of Moesia Superior, between Drusus Auerum and Margus, and 6 miles from the Rhine. (Itis. Ant. p. 133.) In the Itis Hieroc. (p. 54.) it is mentioned as Vincus. Later, it identifies itself with Semodium. [T. H. D.]

VINAM. [Bingum.]

VINDA (Osbadia, Ptol. v. 4. § 7), a place in Galatia, between Pessinus and Ancyrna, near the modern Tatie. (Itis. Ant. pp. 201. 202.) [L. S.]

VINDALUM, or VINDALIUM (Osbadia), in Gallia Narbonensis, a place where Domitian Ammianus, in 405, gave the name, is deformed. [Gallia Transalpina, vol. i. p. 954.] Strabo (iv. p. 185) says that Vindalum is at the confluence of the Sul- ges [Scalius] and the Rhéna. Florus (iii. 2) names this river Vindelicus or Vindelicius. The Sulges is the Sorpes. D'Avnllle, relying, as he does often, on a mere resemblance of names, would place Vindalum in Lusitania, which is about a mile from the confluence of the Rhéna and the Sulges. Others would place Vindalum at Port de la Tsaille, the place where the Sorpes joins the Rhéna. [G. L.]

VINDANA PORTUS (Osbadna Lyc), a bay on the north-west coast of Gallia (Ptol. ii. 8. § 1), and placed by Polybeds between the mouth of the Herus [Hercules] and the Premontum G-Basium. D'Avnllle supposes the Vindana to be the bay of Marsb- amus, at the bottom of which was the capital of the Veneti, or Visorges. Other geographers have made other guesses: the bay of Dersurus, the mouth of the Herus, and others still.

[V. G. L.]

VINDELICA (Osbadia or Berdicia), the most western of the four Danian provinces of the Roman empire. In the time of Augustus, it formed a distinct province by itself, but towards the end of the 1st century after Christ it was united with Rhaetia. At a still later period the two countries were again separated, and Rhaetia Prope, under the name Rhaetia Prima, and Vindelicia under that of Rhaetia Secunda. We have here to speak only of the latter or Vindelica, as it appears in the time of Augustus, when it was called the north by Germania Maris, that is, Danube and the Valthin. Hadriani or Luba, west by the territory of the Helvics, the south by Rhaetia, and on the east by Syria. So it was which it was separated by the river Office. The line of demarcation between Vindelica and Rhaetia was probably anywhere, but was a probability formed by the rivers of the Alps. Vindelica accordingly embraced the eastern parts of Scythia, south-west of Badon, the southern part of Vindelicæ, Boecaria, and the northern part of Thir. (Itis. Ant. § 12. 13. § 1. viii. 7. § 1; Sext. Rel 8. An- dren. ii. 4.) The country is for the most part small, and only its northern waters and two rivers flow into the Rhine. The Laces, a small lake belonging to Vindelica, is in the south corner of the province.

[V. T. H. D.]

The inhabitants of Vindelica, the Vindics, were a kindred race of the Rhaetii, and in the time of Augustus certainly Celts, not Germans, as some have supposed. Their name contains the root Vins, which also occurs in several other Germanic names, such as Vindobona, Vindemser, Vinca, and others. [Zeuse. Das Deutschen, p. 220.; Rb. ii. 131. p. 134.] Strabo speaks of a river which flowed through the country, and which is now called the Line, one of the main streams of the Rhine. The Chief, Vindelius, is called Vindicius in the North. The Laces, a large lake, is near the city of Vindelica.

[V. T. H. D.]

The principal tribes into which, according to Scyl, Pliney, and Pliny, the Vindics were divided were the Binghi, Iunicatā, Luni, and the Genetri. Strabo (iv. p. 187) and 42. After their subjugation the Tribeni, many of them were transplanted to other countries. (Strabo. viii. 5. 207.; Dain. iv. 42.)

[V. T. H. D.]

The VINDENS, a place in Upper Moesia, on the road from Naissus to Scodra. (Tob. Ptol. vii. 2. 18.)

[V. T. H. D.]

VINDERSER (Osbadnaes carnegia, Ptol. ii. 2. § 8), a little river on the E. coast of Batavia, which falls into the Rhine by Elnam, and is not so far as the Rhine.

[V. T. H. D.]

[VINDIL. [Vindall.]

[VINDILIS INSULA, on the Atlantic coast of France. (Itis. Ant. p. 454.)]
VINDBUMAGUS (Ostobuxarensis), in Gallia Narbonensis, one of the two cities which Ptolomy (II. 10. § 10) assigns to the Volcae Arecomici. There is nothing to determine the position of Vindomagus, except the fact that there is a town Figus, where some remains have been found. Le Núée, in Nîmes, and on the southern border of the Cévennes. [G.L.]

VINDOLUM, a town belonging probably to the Belgae in Britannia Romana on the road from Venta Belgarum to Calleva. (Itin. Ant. pp. 483, 486.) Horsey (p. 459) identifies it with Dorchester; others have sought it at Aldershott, and at Whitchurch. [T.H.D.]

VINDOMORA, a town of the Brigantes in the N. part of Britannia Romana. (Itin. Ant. p. 464.) It is commonly identified with Ebchester at the NW. boundary of Durham (Horsey, p. 399), where there are remains of a fort, and where Roman antiquities have been discovered. (Cf. Camden p. 1086; Philostr. Trans. No. 278.) [T.H.D.]

VINDONISSA, in Gallia, is mentioned by Tacitus (Hist. iv. 61, 70). It was the station of the twenty-first legion, A.D. 71, which entered Raiaestia from Vindonissa. The place is Windisch, in the Swiss canton of Aargau, near the junction of the Aar, Reuss, and Limmattal. Vindonnas was once a large place, and many Roman remains of the Franks are found there. In the Basisgrobe there are traces of an amphitheatre, and on the road from Brunnberg to Königfelden the remains of an aqueduct. The name of the XXI. Legion has been discovered in inscriptions found at Windisch. Near Windisch is the former convent and monastery of Königfelden, where some of the members of the fourth century are buried. Several Roman roads help to fix the position of Vindonissa. The Table places it at the distance of xxi. from Augusta Rauracorum (Augusta) [Augusta Rauracorum]; and another road went from Vindonissa past Vitodurum [Vito- durum] to Arbor Felix in Raiaestia. Vindonissa is named Vind in a Punicic of Constantine by Euenus, and Castrum Vindonissae in Macrob. Satyr. quoniam in the Notitia of the Gallic Provinces, When Christianity was established in these parts, Vindonissa was the see of the first bishopric, which was afterwards removed to Constantia. In the third and fourth centuries Vauda and Alemanni damged the town. The Huns afterwards ravaged Vindonnas, and Childebert king of the Franks destroyed it in the sixth century. (D'Anville, Notice, etc.; Ernesti, Note on Tacit. Hist. iv. 70; Niegebaur, Neueste Gemäße der Schweiz.) [G.L.]

VINIIole, a place of the Oretani in Hispania Tarraconensis, between Acatnici and Montesa Basia. (Itin. Ant. p. 402.) Variousley identified with Hisono and as a place on the river Borona. [T.H.D.]

VINNIUS. [Vinum].

VINNOVIA (in Ptol. Osorvovia, ii. 3. § 16), a town of the Brigantes in the N. of Britannia Romana. (Itin. Ant. p. 463.) Now Winchester near Bishop Auckland, with remains of Roman walls and other antiquities. (Camden, p. 943.) In the Not. Imp. and by the Geogr. Rev. (p. 81) it is called Vinnumburos. [T.H.D.]

VINIUM (Obrovae; Vence), in Gallia Narbonensis, the chief town of the Naruii. [Narbon.] Inscriptions have been found at Vence with the words Civit. Vinct.; and in the Notitia of the Gallic Provinces it is placed in the Alpes Maritimae under the name of Civitas Vintium or
VENZELA.

Venciemium. Vence is in the department of Var, near the river Var. (D'Anville, Notice, etc.) [G. L.]

VENZELA (Ostria).a town of Galatia, in the territory of the Tectosages. (Ptol. v. 4. § 8.) A second town of the same name is mentioned by Ptolemy (v. 5. § 6) in the north-east of Phasida. [L. S.]

VIETAVSCESSIONIS PAGUS. MARSUAS. [MART.LIB.]

VIPITENUM, a town in Rhodia belonging to the Vencesates, situated between Veldidena and Tridestum. (Hist. Ant. pp. 275, 280.) Some place it in the Oen-Wipidhal; others identify it with Stenning on the Eseach, at the foot of the Bres.

[TH. D.]

VIPOCISANNA, a place in Mauretania Tingitana, on the road from T molecina to Tingina. (Hist. Ant. p. 23.) Minner (x. pt. ii. p. 487) supposes that it is the place called Prisciana by Mela (iii. 10. sub fn.), and Hervierina or Triarchs by Ptolemy (iv. 1. § 14). The same author identifies it with Merola, whilst Lapis takes it to be Soe-El-Arba, and Graber of Hemoac, Der-el-Hammara. [T. H. D.]

VIPACELLUM (Badočagov, Ptol.), a town of Emesa, mentioned only by Ptolemy (iii. 1. § 47), who places it among the inland towns in the NW. corner of that country. It is supposed by Chervier to be represented by Verrocava or Verrecioia in the mountains between the Sericio and the Meyrus (Cever. Ubl. p. 75), but the identification is very doubtful. [E. B.]

VIRES (the Wares), a small river in the territory of the Liciarii in Vindelicia, a tributary of the Liens, which joins it a little below Auguste Vindelicinit. (P. Dian. Langsd. ii. 13; Vences. Fort. Fami. S. Mart. iv 646, where it is less correctly called Virdo or Vinds.)

[L. S.]

VIRGULAE. [Bsguliæ, Vol. I. p. 293, a.]

VIRIALLUM. [Correcta, Vol. I. p. 691, a.]

VIRIUM (Oldepre), a place in northern Germany, mentioned only by Ptolemy (ii. 11. § 27), was probably in the territory of the Sidini, on the site of the modern town of Wustrum on the Oder. (Westein. Gersoniuz, p. 275.)

[L. S.]

VIROCOONIA (Oldeprewurz, Ptol. ii. 3. § 19), a town of the Cornavi in Britannia Romana, on the road from Devil to Lendinaria, with a bridge from Mercia to Ostrea (v. 4. 482, 484). It is the town called Ursoscum in another route of the Itinerary (p. 469). Now Wustrum, with ruins not marked. (Craw. p. 653.) [T. H. D.]

VIROCOONUM. [Virocenchereus.]

VIRI MAGUS. [Ermaprice.]

VIROONUM (Nat. Imp.), a fort or castle at the N. boundary of Britannia Romana, and in the territory of the Etrurians, the station of the Cohors v. Nor. 14. (Car. Inc. p. 1023) it lies near Woresk (Wernesburg), which others seek it on the S. coast of Saxon Frisia, and at Frisand. [T. H. D.]

V.V.: ESCHATA (Oseimewurz, Ptol. ii. 6. § 33), a town of the Arcirisons in Hispania Tarraconensis, on the road from Saro to Almedina (Flam. Ant. p. 354, Flam. Inc. ii. 4.), is called Bama, Androis. [P. V.]

VIRIMACHIA, in Gaia in the Table, Viroscianum, is placed on a route from Casaezus (Cased) to Tarraconum (Terracina). The Antonine itinerary fixes it xvi. from each. The distances in the Table do not agree always. In 1514 a mission of C. Janus Conser was dug up at Woresic,

and some time afterwards another shaft of the Antonines. There is a tradition that the remains of an ancient edifice have been seen and a fragment of a statue (Rest, Remains Romanesque and Galician in France, p. 134. [P. V.]

VIRIBUS (Oldepre, Ptol. ii. 3. § 5), a promontory on the N. coast of Frazera Barbarus, and the most N. point of the island, is apparently the present Dunguy-Hesil (Gaum. 1280.) [T. B.]

VIRIBUS. [Var.]

VIRIDUSNUM (Oldepre). One of the 40 important towns in the interior of Sosian, near Noria, and on the road from Aquileia to Lezian (Plin. ill. 37; Ptol. ii. 14. § 5; Segm. Erup. § 15; Bepesov; Said. s. a. Bepesov; Fl. Ant. 1. 14. Tab. Pest., where it is called Varumis.) From its withstanding its importance, which is evidenced by a widely scattered remains of the village is known, except, from inscriptions, the fact that a Roman colony, with the surname of Cari (Gruter, Inscript. p. 569; Orelli, Inscript. p. 5074; comp. Minich, Noriana, vol. i. 212.)

2. A town in the country of the Sicanos, of unknown site, and mentioned by Ptolemy (ii. 11. § 27). [L. S.]

VIRBUS (Oldepre desched, Ptol. iii. 5. § 48), is in the N. part of the W. coast of Hispanic in variously identified with the Lassos and the Allosos. [T. E.]

VIRISSIBIRU (Odubrugy, Ptol.), a tribe in the north coast of Germany, about the source of the Tura and placed by Ptolemy (ii. 11. § 21) as being in Quadri, in the district to which Tascos (see 43) assigns the Gotland. [T. E.]

VIRCOMNTIO (Odubrugy, Ptol. ii. 11. § 1) a town of the Polendoine in Hispiana Tarraconensis, perhaps Viresco or Vizersco.

[V. E.]

VIRPI (Osdewro), a tribe in the north-western Germany, is mentioned only by Ptolemy (ii. 11. § 10); nothing certain can be said as to the present district they inhabited. [V. E.]

VIRSTULA, VISTILES (General, grave, red, a rivulet or brook). One of the 10 rivers of Germany, separating according to Ptolemy (vii. 10. § 2; comp. ii. 11. § 4, iii. 5. § 51) from Sarmatia, while Pamp Mar, who calls the river Visula, describes it as being on the boundary between Scythia and Sarmatia; it cannot be expected that either Greek or Latin should have possessed much information about a distant river. Ptolemy says that it had its source in the Hercynian Silva, and discharged itself into the Sarmatian ocean (the Baltic), and Marcellus assigns to it a course of from 1830 to 2000 stades in length. This is all the information is to be found from the ancient authors. (Comp. P. L. ii. 36. Solin. 30; Geoiv. Geogr. iv. 4; Ass. Mag. i. 37. 36.)

VISTULA in two passages (Got. 5 and 11) speaks of a river Visula, which some geographers regard identical with the modern Vizsla, a river distinguished from the Vistula itself, whose modern German name should not be confounded with Viesz. [T. H. D.]

VISTUAE (Oisburma, Burwag, Oldepre, or Osulowoypce; Wisom), one of the principal rivers in north-western Germany, which is remarkably well known to the Romans, since their
VITELLI.  

Vitelli, an ancient town of Latium, which was, however, apparently situated in the territory of the Aequi, or at least on their immediate frontiers, so that it is hard to determine whether it properly belonged to a Latin or an Aequuan town. But the circumstance that its name is not found in the list of the cities of the Latin League given by Dionysius (r. 21) is strongly in favour of the latter supposition. Its name is again mentioned by Livy (ii. 39) in the account of the celebrated campaign of Coriolanus, whom he represents as taking Vitelli at the same time as Corbio, Labicium, and Pedum: but in the more detailed narratives of the same campaign by Dionysius and Plutarch, no notice is found of Vitelli. The name is again mentioned by Livy in n. c. 60, when the city fell into the hands of the Aequi, who surprised it by a night attack (Livy. v. 29). He here calls it "Coloniam Romanam," and says it had been settled by them in the territory of the Aequi; but we have no previous account of this circumstance; nor is there any statement of its recovery by the Romans. A tradition preserved to us by Suetonius recorded that the Roman colony was at one time entrusted to the sole charge of the family of the Vitellii for its defence (Suet. Vitell. 1); but there can be little doubt that this is a mere family legend. All trace of Vitelli, as well as Tolerium and other towns in the same neighbourhood, disappears after the Gaullish invasion, and the only subsequent mention of the name occurs in the list given by Pliny (iii. 5, s. 9) of the cities of Latium which were in his time utterly extinct. The site is wholly uncertain, though it seems probable that it may have been placed in the same part of Latium as Tolerium, Bola, Labicium, and other towns on the frontiers of the Aequan territory. It has been placed by Gell at Valmontona, a place which in all probability occupies an ancient site, and this would indeed have been so well for Vitelli, but that it is equally suitable for Tolerium, which must be placed somewhere in the same neighbourhood, and is accordingly fixed by Nibby at Valmontona [Tolerium]. The latter writer would transfer Vitelli to Civitella (called also Civitella d'Olevano), situated in the mountains between Olevano and Sabacca; but this seems decidedly too far distant from the other cities with which Vitelli was connected. It would be much more plausible to place Vitelli at Valmontona and Tolerium at Lugnano, about 3 miles NW. of it, but that Lugnano again again would suit very well for the site of Bola, which we are at a loss to fix elsewhere [Bola]. The fact is that the determination of the position of these cities, which disappeared in such early times, and of which no record is preserved by inscriptions or other ancient monuments, must remain in great measure conjectural. (Gell. Top. of Rome, p. 436; Nibby, Diontorn. vol. i. p. 467, vol. iii. p. 370.)

VITIA (Oubria, Strab. xii. pp. 508, 514, 531; Eth. Oubris), a small district in Media Atropa-tinae, noticed by Strabo in his account of that province. It appears to have been in the northern part near the tribes of the Drtyces and the Amandri. [V.]

VITIS [Urtu].

VITIDURUM or VITIDURUM, in Gallia, is mentioned in an inscription, in which it is said that the emperors Diocletian and Maximianus "murum Vitidurenum a solo instauraverunt." The Antonine Itin. places it between Vindonissa (Windisch) and Finges (Fryz) [Fines, No. 15]. At Winterthur in the Swiss canton of Zürich there is in the town library a collection of Roman coins and cut stones, most of which have been found in the neighbourhood of the town and in the adjacent village of Oberwinterthur, which is the site of Vitidurum. (D'Anville, Notices, &c.)

VITRICUM (Verres), a town or village in the Salassi, on the high road leading from Eporedia (Torren), to Augusta Praetoria (Aosta). It is known only from the Itineraries, which place it 25 miles from Augusta, and 21 from Eporedia (Itin. Ant. pp. 345, 347, 351), but is undoubtedly identical with Verres, a large village in the Val d'Aosta, at the entrance of the Val Callant. [E. H. B.]

VIVANTAVARIUM (Olivarumvaerque, vol. iii. 5. § 30), a place in European Sarmatia, between the rivers Axiaces and Tyras. [T. H. D.]

VIVISCI, VIBISCI. [Bruturiges Vivisci.]

VIVISCUS, in Gallia. In the Antonine Itin. the name is Bibiscus. The place is Vivicus, or near it, in the Swiss canton of Waasl. or Vaziul. See the article VIRGILIOCUS. [G. L.]

ULCAE LAUCUS (Oulcaea Aen), a succession of lakes and swamps in Pannonia, between the mouths of the Dravus and Savus. (Dion Cass. iv. 32.) They seem to be the same as the Palus Huileca mentioned by Aurelius Victor (Epit. 41) as being near Cibalae in Pannonia. (Comp. Zosim. i. 18.) These lakes now bear the name of Jurica. [L. S.]

ULCISIA CASTRA, a fort in Pannonia on the road running along the right bank of the Danubius from Aquincum to Bregietio (Itin. Ant. p. 269), is now called Szent Endre. [L. S.]

ULIA (Obala, Strab. iii. p. 141). A town in Hispania Baetica, on a hill, on the road from Gades to Corduba. (Itin. Ant. p. 412.) It was a Roman municipium, with the surname of Fidemita, and belonged to the jurisdiction of Corduba (Plin. iii. 5. s. 4; Hirt. B. H. 3, 4, B. Alex. 61; Dion Cass. xiiiil. 31.) From inscriptions it appears to be the present Monte Mayor, where there are ruins. (Cf. Morales, Ant. p. 3; Flores, Esp. Sagra. x. p. 150, xii. p. 5; coins in Flores, Med. ii. p. 620, iii. p. 130; Mionnet, i. p. 27, Suppl. i. p. 47.)

COIN OF ULIA. 4 F
ULIANUS INSULA.

ULIANUS INSULA (Ed. Olrichianum, Sidenius Apollinaris), is placed by Pliny in the Aquitanian Sinus (iv. 19). It is the In Laeetum, which belongs to the department of Charente Inférieure, and is separated from the mainland by a narrow strait.

ULIZIBERA (Odysseus, or Odysseus, Ptol. iv. 3. § 37), the Insularitium of Pliny (iv. 4. a. 4), a town of Byzantium in Africa Proper, S. of Hadrumetum.

ULISBARUS (Gades, or Gades, Ptol. vi. 6. § 2), a river on the W. coast of Hispania Tarraconensis, which enters the sea between the Minus and the promontory of Nerimum. (Mala, iii. 1.) It is still called Gades.

ULMENETES. [Selvanetces.]

ULMIS or ULMUS, a place frequently mentioned in the Itinerae as situated in the interior of Lower Pannonia on the road leading from Siscia to Gliane and Sirmium (H. Aust. pp. 131, 232, 261, 267; It. Hieros. p. 563; Tab. Pont.); but its exact site is uncertain.

ULMUS, a place in Upper Moesia, between Naisus and Berossus. (Hieros. p. 566.) According to Lupus near Podestra. (T. H. D.)

ULMIS, a town in Upper Moesia, on the southern declivity of Mt. Scenius. It was enlarged and adorned by Justinian, whence it obtained the name of Justinianea Secundae. (Proc. de Aqu. vi. 1. Goth. vi. 23.) It is commonly identified with the present Drama; but Leuci (Northern Greece, iii. p. 475) takes that town to represent the ancient Pantasia or Pantasia in Thracia.

2. A place in Dacia, apparently in the neighborhood of Kusadessa. (Ptol. iii. 8. § 7.) [T. B. D.]

ULTRAMARIS PORTUS. [Futa Portus.]

ULBARE (Ed. Claudianus), a small town of Leucis on the borders of the Marian Marisius. It is not mentioned in history previous to the establishment of the Roman dominion, but is noticed repeatedly by Latin writers of the best period, though always as a poor and decayed town, a condition which appears to have resulted from its nearness and unhealthy position. Hence Cicero jestingly terms its citizens the fœnae frugi (Tusc. iii. 10), and both Horace and Juvencus select it as an almost uncultivated and unhealthful place. (Sat. B. G. 9. 46; Sat. i. 11. 30; Sat. x. 101.) Still it appears from the expressions of the latter, that it once retained the rank of a municipal town, and had its own senatus magnificatus; and in accordance with this, we find the Consularium commented by Pliny among the municipal towns of the First Region. (Plin. vii. 4. a. 6.)

The name of the town is attested by inscriptions of the Roman dominion, but is noticed repeatedly by Latin writers of the best period, though always as a poor and decayed town, a condition which appears to have resulted from its nearness and unhealthy position. Hence Cicero jestingly terms its citizens the fœnae frugi (Tusc. iii. 10), and both Horace and Juvencus select it as an almost uncultivated and unhealthful place. (Sat. B. G. 9. 46; Sat. i. 11. 30; Sat. x. 101.) Still it appears from the expressions of the latter, that it once retained the rank of a municipal town, and had its own senatus magnificatus; and in accordance with this, we find the Consularium commented by Pliny among the municipal towns of the First Region. (Plin. vii. 4. a. 6.)

The name of the town is attested by inscriptions of the Roman dominion, but is noticed repeatedly by Latin writers of the best period, though always as a poor and decayed town, a condition which appears to have resulted from its nearness and unhealthy position. Hence Cicero jestingly terms its citizens the fœnae frugi (Tusc. iii. 10), and both Horace and Juvencus select it as an almost uncultivated and unhealthful place. (Sat. B. (Plin. vii. 4. a. 6.)

UMBRIA.

UMBRIA (Tuscia, or Umbria, Ptol. i. 3. § 46), was one of the principal divisions of Cisalpine Italy, situated to the E. of Etruria, and on the right bank of the Tiber in the plain of the same name. The name was, however, applied with very different significance. Umbria, so-called, may be considered as extending from the Tiber, which formed its W. limit, to the greater part of its course, and was called by the Romans Etruria, to the great central range of the Apennines from the sources of the Tiber in the N. to the mouth of the Tiber in the S. But on the eoste of this range, sloping down to the Adriatic sea, an extensive and fertile district extending to the frontiers of Picenum to the neighbourhood of Hasan, which had probably been at one time occupied by the Umbrians, but, before it became the scene of Roman history, was in the hands of Celtic peoples, it is known as the "Gallican area," and is always so termed in Roman in reference to the earlier period of Roman history. (Liv. xxxii. 14, xxxiv. 44; C. R. B. Sec.) On the division of Italy into reales, Umbria (41) was assigned, this district was again divided into two parts, the Latin and Umbrian, both being included in the Sext L. (Plin. i. 14. a. 19.) But even in this union, the "age Gallic," as it is called by the Roman Prophets ("Jussuitur his satis recte complices agimus Gallicus cives Amicitiae." It is evident therefore that the name of Tarsus, not at that time in common usage in reference to the shores of the Adriatic. It is known (see Place) that the town of Gallicus (Gallus, 5. 35) was called by the Romans Gallicus Tarsus, a name which was extended and applied to the whole of Gallicus Tarsus. (Ptol. iii. 1. 2.) It was still in use, therefore, till a late period the whole of Umbria came into general use in the sixth century of the Third Region of Augustana, and from the Tiber to the Adriatic.

Umbria, in this more extended sense of the word, was bounded on the W. by the Tiber, from near its source to a little below Persius, and on the most southern city included was the province Thessalonica. Hence the E.嵊斯, near the valley of the Ner, which separated Thessalonica from Gallicus Tarsus, almost to the sources of the river in the great central chain of the Apennines. Hence it followed a line nearly parallel to the main ridge of these mountains, but according to the E. corner, and the southern cities included in it, as far as the sources of the Aenian ( Teens), and then descended the river 2 months. We know that on the Tiber the region was the recognized boundary between Picenum and Umbria, as the limits of the river between Umbria and Galicia Cenaco l.
UMBRIA.

From the mouth of the latter stream the frontier must have followed an irregular line extending to the central range of the Appenines, so as to include the upper valleys of the Sapia and Bedesia; thence it rejoined the line already traced from the sources of the Tiber.

All ancient authors agree in representing the Umbrians as the most ancient people of Italy (Plin. ii. 14. s. 19; Flor. i. 17; Dionys. i. 19), and the traditions generally received described them as originally spread over a much more extensive region than that which ultimately retained their name, and occupying the whole tract from sea to sea, including the whole of the northern part of the Italian peninsula, as far as the Etruscans. That people, indeed, was represented as gaining possession of its new settlements step by step, and as having taken not less than 300 towns from the Umbrians. (Plin. i. c.) This number is doubtless fabulous, but there seems to be good reason for regarding the fact of the conquest as historical. Herodotus, in relating the Lydian tradition concerning the emigration of the Tyrrenians, represents the land as occupied, at the time of their arrival, by the Umbrians. (Herod. i. 94.) The traditions reported by Dionysius concerning the settlements of the Pelasgians in Italy, all point to the same result, and represent the Umbrians as extending at one period to the neighbourhood of Spina on the Adriatic, which is the latest authentic account of a historical fact, the existence of the Umbrians at a very early period as a great and powerful nation in the northern half of Central Italy, whose dominion extended from sea to sea, and comprised the fertile districts on both sides of the Appennines, as well as the mountains themselves. According to Zenoctus of Ascalone (Piers. Dierck. loc. cit., 410), the Lydian tradition of the Sabines itself was only a branch or offshoot of the Umbrians; and this statement is to a great extent confirmed by the result of recent philological researches. [SABINI.]

If the Umbrians are thus to be regarded as one of the most ancient of the races established in Italy, the question as to their ethnological affinities becomes of peculiar interest and importance. Unfortunately it is one which we can answer but imperfectly. The ancient authorities upon this point are of little value. Most writers, indeed, content themselves with stating that they were the most ancient people of Italy, and apparently consider them as Aborigines. This was distinctly stated by Zenoctus of Ascalone, who has given a special history of the Umbrian people (Dionys. ii. 49), and the same idea was probably conveyed by the fanciful Greek etymology that they were called Ombrians or Umbrians, because they had survived the deluge caused by floods of rain (δόμερος; Plin. iii. 14. s. 19).

Some writers, however, of whom the earliest seems to have been Pomponius Mela, represented the Umbrians as of Gaulish origin (Solini. 2. § 11; Serv. ad Aen. xii. 753; Isidor. Orig. ix. 2); and the same view has been maintained by several modern writers, as the result of philological inquiries. Researches of this latter kind have indeed of late years thrown much light upon the affinities of the Umbrian language, of which we possess an important monument in the celebrated tables of Iguvium. [IGUVIUM.] They have clearly established, on the one hand its distinctness from the language of the neighbouring Etruscans, on the other its close affinity with the Oscans, as spoken by the Samnian tribes, and with the Latin spoken by the three may fairly be considered as only dialects of one and the same family of languages. [ITALIA, p. 86.] The same researches tend to prove that the Umbrian is the most ancient of those cognate dialects, thus confirming the assertions of ancient writers concerning the great antiquity of the nation. But, while they prove beyond a doubt that the Umbrians, as well as the nearly related Oscans and Latin, were a branch of the great Indo-European family, they show also that the three formed to a great extent a distinct branch of that family or an independent group of languages, which cannot with propriety be ascribed to the Celtic group, any more than to the Teutonic or Slavonic language.

The history of the Umbrians is very imperfectly known to us. The traditions of their power and greatness all point to a very early period; and it is certain that after the occupation of Etruria as well as of the plains of the Padus by the Etruscans, the Umbrians shrank up into a comparatively obscure mountain people. Their own descendants the Sabines also occupied the fertile districts about Lake Nemi and the valley of the Velinus, which, according to the traditions reported by Dionysius, had originally been held by the Umbrians, but had been wrested from them by the Pelasgians (Dionys. ii. 48). At a much later period, but still before the name of the Umbrians appears in Roman history, they had been expelled by the Sabines from the environs of Rome to the shores of the Adriatic. The very people, indeed, represents them as having previously held also a part of the territory which was subsequently occupied by the Boians, and from which they were driven by the invasion of that people (Liv. v. 35).

It was not till the Romans had carried their arms beyond the immediate neighbourhood of the city, and penetrated beyond the barrier of the Ciminian forest, that they came into contact with the Umbrians. Their first relations were of a friendly nature. The consul Fabius having sent secret envoys through the land of the neighboring Etruscans into Umbria, received from the tribe of the Camerons promises of support and assistance if he could reach their country. (Liv. ix. 36.) But the Umbrian people seem to have been divided into different tribes, which owned no common government and took different lines of policy. Some of these tribes made common cause with the Etruscans and shared in their defeat by Fabius. (It. 37.) This disaster was followed by two other defeats, which were sustained by the Umbrians alone, and the consequence of these, in which their combined forces were overthrown by the consul Fabius near Mevania (s. c. 308), appears to have been a decisive blow. It was followed, we are told, by the submission of all the Umbrian tribes, of whom the people of Oruculum were received into the Roman alliance on peculiarly favourable terms. (Liv. ix. 39, 44.)

From this time we hear no more of hostilities with the Umbrians, with the exception of an expedition against a mere marauding tribe of mountaineers (Liv. x. 1), till s. c. 296, when the Samnite leader Gellius Egnatius succeeded in organizing a general confederacy against Rome, in which the Umbrians and Senonian Gauls took part, as well as the Etrus-
UMBRIA.

Their combined forces were, however, outworn in the great battle of Sentinum (B. 36, 27; Polyb. II. 19); and this is the last time that the Umbrians, as a people, appear in arms against the Roman power. We are indeed told in the annals of Livy that the Umbrians were again defeated, and reduced to submission at the same time as the Samnites, in B.C. 266 (Livy. Epit. xvi.); but there seems no doubt that this refers only to the outlying tribe or people of the Sarminates (as the N. of the Apennines, and adjoining the Boian Gauls), as the Fasti, in recording the events of the year, give only one battle in the two hills, and of that one "Sarminatium" (Fast. Capit. iv. 15). We have no account of the terms on which the Umbrians were received into submission, or of the manner in which they passed, like their neighbours the Etruscans, into the condition of dependent allies of Rome: it is certain only that the different tribes and cities were, according to the usual Roman policy, admitted on very different terms. Of this, as already mentioned, enjoyed special privileges; and the same was the case with the Cameretas, who, even in the days of Cicer, retained a peculiarly favoured position, and had a treaty which secured them a nominal independence and equality. (Livy. xxviii. 45; Cic. pro Balb. 30.)

The fertile district of the "Gallicus age" was in greater part enclosed by Roman colonies, of which Sena Gallica was founded as early as B.C. 269, Ariminum in B.C. 259, and Pisaum in B.C. 188. But besides these, a considerable part of that territory was divided among Roman citizens, by a law of the tribune, C. Flaminius, in B.C. 232. (Cic. Brut. 14.) The other Umbrians continued in the position of dependent allies of Rome, and appear to have remained uniformly faithful to the powerful republic. Thus, in B.C. 389, we are told that they were solicited by the envoy of the Tarentines (Dion Cass. Fr. 144), but apparently without effect: nor does it appear that their constancy was for a moment shaken by the successes of Hannibal; and before the close of the Second Punic War we find them coming forward with the offer of their hill-top cities for the army of Scipio (Livy. xxviii. 45.). In the Social War they are said to have for a time broken out into revolt, and were defeated in a battle by the legate C. Plautius; but it is probable that the defection was a very partial one, and the Romans wisely secured the fidelity of the Umbrians as well as of the Etruscans by bestowing on them the Roman franchise. (Liv. Epit. lxxxiv.; Orat. v. 18; Appian, B. C. i. 49.)

From this time the name of the Umbrians as a nation disappears from history, though it continued, as already mentioned, to be well known as one of the territorial divisions of Italy. (Tac. Hist. iii. 41, 42; Jul. Capit. Gerdinisi, 4; &c.) In the early ages of the empire it was still one of the districts which supported the most numerous retiaries to the pratoian cohorts. (Tac. Ann. iv. 5.) As long as the division of Italy into regions subsisted, the name of Umbria continued to be applied to the sixth region; but from an early period, certainly long before the time of Constantine, it was used for administrative purposes with Etruria, and its name seems to have gradually merged in that of the most important province. Thus Servius tells us that Umbria was a part of Tuscia (Serv. ad Aen. xii. 753), and the Liber Coloniarum includes the ancient Umbrian cities of Hispellum, Tuder, Amerlia, &c., among the "Civitates Tusciae." (Lib. Colom. p. 224.) On the other hand, the district E. of the Apennines, the ancient Ager Gallus, was not again separated from Umbria, and became known by the name of Picenum Aenonaerium. (Monnus. &c. Lib. Col. p. 211.)

Of the Umbrians as a nation during their period of independence we know almost nothing. We learn only that they enjoyed the reputation of being brave and hardy warriors; and the slight resistance that they opposed to the Roman arms was probably owing to their want of political organization. So far as we learn, they appear to have been divided into seven tribes or "populi," such as the Cameretas, Umbrettes, and others, each with its own territory, governed by its Sarminatibus." (Fast. Capit. iv. 15.) We have no account of the terms on which the Umbrians were received into submission, or of the manner in which they passed, like their neighbours the Etruscans, into the condition of dependent allies of Rome: it is certain only that the different tribes and cities were, according to the usual Roman policy, admitted on very different terms. Of this, as already mentioned, enjoyed special privileges; and the same was the case with the Cameretas, who, even in the days of Cicer, retained a peculiarly favoured position, and had a treaty which secured them a nominal independence and equality. (Livy. xxviii. 45; Cic. pro Balb. 30.)

The fertile district of the "Gallicus age" was in greater part enclosed by Roman colonies, of which Sena Gallica was founded as early as B.C. 269, Ariminum in B.C. 259, and Pisaum in B.C. 188. But besides these, a considerable part of that territory was divided among Roman citizens, by a law of the tribune, C. Flaminius, in B.C. 232. (Cic. Brut. 14.) The other Umbrians continued in the position of dependent allies of Rome, and appear to have remained uniformly faithful to the powerful republic. Thus, in B.C. 389, we are told that they were solicited by the envoy of the Tarentines (Dion Cass. Fr. 144), but apparently without effect: nor does it appear that their constancy was for a moment shaken by the successes of Hannibal; and before the close of the Second Punic War we find them coming forward with the offer of their hill-top cities for the army of Scipio (Livy. xxviii. 45.). In the Social War they are said to have for a time broken out into revolt, and were defeated in a battle by the legate C. Plautius; but it is probable that the defection was a very partial one, and the Romans wisely secured the fidelity of the Umbrians as well as of the Etruscans by bestowing on them the Roman franchise. (Liv. Epit. lxxxiv.; Orat. v. 18; Appian, B. C. i. 49.)

From this time the name of the Umbrians as a nation disappears from history, though it continued, as already mentioned, to be well known as one of the territorial divisions of Italy. (Tac. Hist. iii. 41, 42; Jul. Capit. Gerdinisi, 4; &c.) In the early ages of the empire it was still one of the districts which supported the most numerous retiaries to the pratoian cohorts. (Tac. Ann. iv. 5.) As long as the division of Italy into regions subsisted, the name of Umbria continued to be applied to the sixth region; but from an early period, certainly long before the time of Constantine, it was used for administrative purposes with Etruria, and its name seems to have gradually merged in that of the most important province. Thus Servius tells us that Umbria was a part of Tuscia (Serv. ad Aen. xii. 753), and the Liber Coloniarum includes the ancient Umbrian cities of Hispellum, Tuder, Amerlia, &c., among the "Civitates Tusciae." (Lib. Colom. p. 224.) On the other hand, the district E. of the
UMBRIA.

(Pesaro); the Christumum, now called Cesena; and the Ariminum (Marzocchi), which is the celebrated city of Ariminum, to have been regarded by Pliny as the boundary of Umbria, though that limit was marked at an earlier period by the far-rough trifling stream of the Frascone. The Etrusci also flowed through the Umbrian territories upper part of its course, and gave name to the city of Tribus, mentioned by Livy as one of the towns of the Umbrian nation.

The waters which descend on the W. of the Apennines discharge themselves into the Tiber; none of these are considerable streams, and the only two are the Sabine, which has been preserved to us. The much more important river, the sources of the Tiber, traversed by the roads leading to and from the Sabine territory, seems to have the boundary between Umbria and the land Sabine through a considerable part of its course. But it entered the Umbrian territory near Roma, (Tivoli), and thence flowed, traversing the Tiber.

principal passes crossed the main chain of the Sabine province between the limits of Umbria, and to maintain the communication between the various parts of the country. The one of these was the main road to the Flaminian Way, the road passed almost by the ancient city of Tivoli, which crossed the Tiber; the other a road down the valley of the Clitumnus, by which the road up the valley of the Clitumnus, and by Nuceria, Tadini, and Helvillum, to the mouth of the mountain chain, which it crossed between its sources and Cales (Cagli), and descended by the ravine of the Ferol (Intercisa) into the valley of the Metaurus, which it then followed to the Ticino (Panum Fortunae). This road continued through the period of Roman rule to be the main line of communication, not only the plains of Umbria to the Adriatic, but from itself to Ariminum and Cisalpine Gaul. Its importance is sufficiently apparent in the war between Vitellius and Verspanian. (Tac. I. 86, iii. 50, 52, &c.) Another line of road to the E. of the Tiber was that from Nuceria, and, turning abruptly to the E., ed a mountain pass to Prolaquium (Pioraco), be valley of the Potenza, and descended that valley to the source of the Sieve (S. Severino), and to Ancona. This pass has been in modern times wholly abandoned. The present road from Ancona turns to the E. from Faetino (Ful- um) and crosses the mountain ridge between that river and Camerino, descending to Tolentino in the valley of the Chienti (Flusor).

The towns of Umbria were numerous, though few were of any great importance. 1. On the W. of the Apennines, and beginning with those nearest to the sea, were: Oriculum, near the left bank of the river; Narnia, on the banks of the river; Narnia; and Cassinola, a few miles to the N. of Narnia; Tuder, on a hill on the left bank of the river; Solestilum, in the hills which separate the valley of the Marquogia from that of the river; and Merigo, Hesphillum, Fulodum, and Assisium, all situated in or bordering on the broad valley of the river Artusia, in the upper valley of the Tiber, and Umbria in the mountains at a short distance from these was probably situated at Civitella Bemaspine, also in the valley of the Tiber. On the Flaminian Way, exactly at the entrance of the mountains, stood Forum Flaminii, and higher up, on the same line of road, Nuceria, Tadini, and Helvillum.

2. On the E. of the central ridge of the Apennines, but still high up among the mountains, were situated Camerium, near the sources of the Flusor; Prolaquum (Pioraco), the Potenza; Psylun (Poly), in the same valley; Matulicate and Attium, both in the upper valley of the Metaurus; Territetum (Sestino), lower down in the same valley; Ubbetium (Urbino), between the valleys of the Metaurus and the Flusor; Cenone (Cesena), near the sources of the latter river; Pittignum (Pistone), probably at Pescina, in the same valley; Sabina, in the upper valley of the Sepia; and Metapontum, which is fixed by various inscriptions discovered there, at Galeata, in the upper valley of the Bedesa or Romano (Cluver. Ital. p. 623), and is therefore the most northerly town that was included in Umbria.

3. Along the coast of the Adriatic were the important towns of Susa Gallus, Fanum Fortunae, Pirains, and Ariminum, the names of which must be added as being of the same name, and Ostia, the ruins of which are said to exist between the rivers Cesano and Nigola. (Abeken, Mittel-Ital., p. 41.)

In addition to the above long list of towns, the position of which can be assigned with tolerable certainty, the following obscure names are enumerated by Pliny among the towns or communities of Umbria still existing in his time: Camentitini, Dolatae, named Salentini, Forjulienses named Conuicienses, Foroventani, Palenitani, Vindisatae, and Vintentini. The above towns being totally unknown, the correct form and orthography of the names is for the most part uncertain. The same is the case with several others which such a list of inscriptions indicates as having in his day ceased to exist. (Plin. iii. 14. a. 19.) Strabo also mentions a place called Larulum as being situated on the Flaminian Way, in the neighbourhood of Narnia and Oriculum (v. p. 227), which is otherwise wholly unknown, and the name is probably corrupt.

Of the natural products of Umbria, the most celebrated were its cattle, especially those of the valley of the Clitumnus; but its mountain tracts afforded also pasturage to flocks of sheep, which were driven southwards as far as Metapontum and Heraclea. (Varr. R. E. ii. 9. § 6.) The lower portions of the country abounded in fruit-trees, vines, and olives; but when Propertius terms his native Umbria " terrestre fertilis ubiverse," this can only be understood only of the tracts on the W. of the Apennines, of which he is there speaking (Propert. i. 22. 9), not of the more extensive mountain regions.

The name of Umbria is still given to one of the provinces of the Papal States, of which Spoleto is the capital; but this is merely an official designation, the name having been wholly lost and transformed, and being no longer in use as a popular appellation. [E. H. B.]

UMBRO (Ombrone), a river of Etruria, and next to the Arno the most considerable in that country. It rises in the hills between Siena and Arezzo, and...
UNELLI.

has a course of above 50 miles in a SSW. direction till it flows into the Tyrrenian sea, about 16 miles N. of the promontory of Monte Argentario. Pliny terms it a navigable river ("navigioram capacis"), and Batilisa describes it as forming at its mouth a small but secure port. (Plin. iii. 5. s. 8; Rustil. Inscr. i. 237—340.) It flows near the modern city of Grosseto, and within a few miles of the ruins of Ruasellae. The name of Umbro is considered to be connected with the Umbrians, who held this part of Italy previous to its conquest by the Etruscans: and according to Pliny, the coast district extending south to its mouth was still known as the "tractus Umbries." (Plin. l. c.) [E. H. B.]

UNELLI or VENELI (Oberdena), one of the Armaric or maritime states of Gallia. (B. G. ii. 34, iii. 11.) Caesar mentions them with the Vesonti, Osismi, Curiositae, and other maritime states. The Unelli and the rest submitted to C. Crassus in B.C. 57, but in B.C. 56 it was necessary to send a force again into the country of the Unelli, Curiositae, and Lexovii. Q. Titurius Sabinus had the command of the three legions who were to keep the Unelli and their neighbours quiet. The commander of the Unelli was Viridovis, and he was also at the head of all the forces of the states which had joined the Unelli, among whom were the Anxerii Eburovichii and the Lexovii. Ten years after the death of Viridovis was very large, and he was joined by desperate men from all parts of Gallia, robbers and those who were too idle to till the ground. The Roman general entrenched himself in his camp, and made the Galli believe that he was afraid and was intending to slip away by night. The trick deceived the Galli, and they attacked the Roman camp, only to be met with a rapid ascent of the hill and encumbered with the fascines which they carried for filling up the ditch, the Romans rallied out by two gates and punished the enemy well for their temerity. They slaughtered an immense number of the Galli and the cavalry pressed on the rear under fire for reasons. This clever feat of arms is told clearly in the Commentaries...

The Unelli sent a contingent of 6000 men to attack Cassar at the siege of Alesia. (B. G. vii. 75.)

Polemy (ii. 8. § 2) names Crociatunum the capital of the Venceli. [CROCICATUNUM.] The people occupied the peninsula of Columis or Vercenies, which is now comprehended in the department of La Manche, except a small part which is included in the department of Calvados. [G. L.]

UNSINGIS, according to a reading in Tacitus (Annales i. 70), a river in the north-west of Germany; but the correct reading in that passage is an Asis- sinis written in his note upon it. Unsinis being only a conjecture of Alting manufactured out of the modern name of a river called Usse or Havre. [L. S.]

VOBARNA (Brixia).

VOCAANUS AGER, a district in Africa Propria, between Carthage and Thapses. (Liv. xxxiii. 45.) [J. E.]

VOCAEBUM or VAUCORUM (Oueszegor), a place in Noricum, on the great road leading from Augusta Vindelicorum to Aemona. (Ptol. ii. 14. § 3; Tab. Peut.) Its exact site is matter of conjecture only. [L. S.]

VOCAIES. [VARATAS.]

VOCEITUS MONS. This name occurs in

VOLATERRAE.

Tacitus (Hist. i. 68), and nowhere else. The history shows that Tacitus is speaking of the country of the Velsetii. The Vocietii is conjectured to be the part of the Jura which is named Busseto. To read from Bide runs through the Fricktal over Biberay to Baden and Zürich. The Velsetii are from Cecina (A. D. 70) into the Vocietii, were many were caught and massacred. Aventicum the chief city (caput gentis), surrendered to Cecina [AVENTICUM.] It has been proposed to write Vogonas for Vocietii in the passage of Tacitus: there is no reason for the alteration. [G. L.]

VOCENTII FOED. [PORTRA VOVONITI.] VOĆNTII (Oberdena), a people of Gallia Narbonensis, between the Rhône and the Alps. To only city which Polemy (ii. 10. § 17) assigns to them is Vasio [Vasio]. On the north they border on the Allobrogos, as we learn from Cassian (B. G. iii. 10). Strabo places the Cenure west of the Vocietii, but he has not fixed the parts of the Cuvares well [CUVARES]. The position of the Vocietii, and the extent of their country, seem shown by looking at the position of Vasio, which is in the south part of their territory, and of Téva [DEVA], which is in the north part, and Lucus Augusta, which lies between them [LUCCUS AUGUSTA].

In the Noticia of the Gallia Provincia we find both Civitas Desaxum and Civitas Vassiae Xaricenum. The Vocietii were between the Inare and the Duranum, their southern limit being probably a little south of Vasio. D'Amville supposes that the Vocietii occupied the dioceses of Vaison and Die, and also a part of the country comprised in the dioceses of Vaison and Orange. This is supported by the diocese of Sisteron, which borders on Vaison. Pline (iii. 4) calls the Vocietii a "Civitas federata," a people who had a "foedus" with Rome: besides the chief places, Vasio and Lucus Augusta, he says they have nineteen small towns. Pline (ii. 58) mentions that he had been in the country of the Vocietii, but he saw an army road called the Chemin de Menehun, which is called "delaume," should be "delapalms." The Vocietii occupied the eastern part of the department of Drôme, a mountainous country, being filled with the lower offsets of the Alps, and containing numerous veins drained by mountain streams. Part of the country is fitted for pasture. Silius Ital. (iii. 466) says—

"Tum facile campos, jam ruas Vocietiae caprī.

plane for he makes Hannibal pass through the Vocietii to the Alps, as Livy (xvi. 31) does. [G. L.]

VODGÖRIACUM, in Gallia, is the first place in the Itina on the road from Bagacum (Banno) to Aquitania (Toquina). This remarkable Bacco road is called the Chemin du Vich, and is known as Haut Chemin. The distance of Vodgoriacum from Bagacum is xii., and the place is supposed to be Vodre or Voscube. (D'Amville, Notice, &c.) [G. L.]

VOGESUS. [VOREGUR.]

VOLANA. [SARMENIUM.]

VOLANDUM, a castle in Armenia Major; or a day's journey W. of Arazata. (Tab. Asia i. 39.) [T. H. D.]

VOLATERRAE (Oueszegor). [OUEZEGOR.] Velsetii (Voltere), one of the most important and powerful of all the Etruscan cities. It was situated on a lofty hill, rising above the valley of the Ceina, about 5 miles N. of that river and 15 from the sea. Sirabo has well described its remark-
VOLATERRAE.

able situation on the summit of a hill, which required a steep ascent of 15 stadia from whatever side it was approached, while the summit itself presented a level surface of considerable extent, bounded on all sides by precipices, and crowned by the walls of the ancient city. (Strab. v. p. 223.)

The hill on which it stands is, according to modern measurements, more than 1700 English feet in height above the sea, and completely overlooks all the surrounding heights, so that the position of the city is extremely commanding. It is indeed the most striking instance of the kind of position which the Etruscan cities selected for their extent continued to enjoy, after the fall of the Western Empire, as a place of importance during the wars of the Goths with Narses (Agath. B. G. i. 11). It continued to subeist throughout the middle ages, and still retains the title of a city and its episcopal see; though it has little more than 4000 inhabitants, and occupies only a small portion of the area of the ancient city. The latter is clearly marked out, having completely filled the whole level surface of the hill, a very irregular space, above a mile and a half in length and more than 1000 yards in its greatest breadth: the whole circuit of the ancient walls is above three miles and a quarter. Very large portions of these walls are still visible, and these massive fortifications are incontestably the finest specimens of the kind preserved among the ancient nations; they resemble in their general style of construction those of Faesulae and Cortona, but are composed of a different material, a soft, arenaceous limestone, which comprises the whole summit of the hill on which Volterra stands. This stone, however, like the macigno of Faesole and Cortona, lends itself readily to the hewn or dressed structural style, and is distinct from the hard Apennine limestone of which the polygonal walls of Cosa and other cities are composed. These walls may be traced, at intervals, all round the brow of the hill, following the broken and irregular outlines of its summit, and frequently taking advantage of projecting points to form bold salient angles and outworks. Two of the ancient gates are still preserved; of these, the best known is called by the name of Arco still serves as the principal entrance to the city. It is of very massive construction, but regularly built, and surmounted by an arch of perfectly regular form and structure, adorned with three sculptured heads, projecting in relief from the keystone and two of the principal voussoirs. The antiquity of this arch has been a subject of much dispute among antiquaries; but some maintaining it to be a specimen of genuine Etruscan architecture, others ascribing it to the Roman period. The arguments in favour of the latter view seem on the whole to preponderate; though there is no reason to doubt that the Etruscans were acquainted with the true principles of the construction of the arch. (Dennius's Etruria, vol. ii. p. 145—150; Plin. H. N. xi. 41. ; and See. l. i. ii. pp. 4, 5.)

The other gate, on the N. side of the Etruscan walls, now known as the Porta di Diana or Portone, is of similar plan and construction to the Porta all Arco; but the arch is wanting.

No other remains of ancient edifices are now extant on the site of Volterra, except some portions of Thermae, of Mici, of little interest; but the sepulchres which have been excavated on all sides of the city, but particularly on the N. slope of the hill, have yielded a rich harvest of Etruscan antiqui-

* The gate itself is figured by Micali, pl. 7, 8; and by Abekeu, Medieval-Inneiu, pl. 2, fig. 4.
Volcae. Among those the most conspicuous are the sepulchral urns, or rather cistae, for ashes, resembling small sarcophagi, and generally formed of alabaster, a material which is quarried in the immediate neighbourhood. Many of them are adorned with sculptures and bas-reliefs, some of them purely Etruscan in character, others taken from the Greek mythology, and there is no doubt that many of them belong to a period long after the fall of Etruscan independence.

The inscriptions are for the most part merely sepulchral, and of little interest; but those of one family are remarkable, as preserving to us the original Etruscan form (Cecina) of the well-known family of the Cecines, who figure frequently in Roman history [Carricena, Biogr. Dict.]. Indeed, the first of this family of whom we have any knowledge—the Aulus Cecina, defeated by Cicero in B.C. 69—was himself a native of Volaterrae (Cic. pro C. Cass. 7). His son was the author of a work on the Etruscan discipline, which is frequently referred to as a valuable source of information in regard to that department of antiquities (Cic. de Fam. vi. 6; Plin. i. Arv. LXX. ii; Senec. Nat. Quaest. ii. 39).

There is no doubt that Volaterrae in the days of its independence possessed an extensive territory. But the distinction then (p. 223) that its territory extended down to the sea-coast, where the town of Vada, or as it was called for distinction's sake, Vada Volaterrana, constituted its sea-port. It was not indeed a harbour or port in the strict sense of the word; but a mere roadstead, where the shoals, from which it derived its name, afforded a good anchorage and some shelter to shipping. Hence it was, in the Roman times, a frequented station for vessels proceeding along the coast of Etruria (Cic. pro Quinct. 6; Plin. iii. 5. s. 8; Isaeus. Mariu. p. 501); and Rutulian, in particular, has left us an exact description of the locality (Rutul. Isaeus. i. 453—462). The site is still marked by a mediavel tower on the coast, called Torre di Vada.

The coins of Volaterrae are numerous, and belong to the class called Ases Grave, from their large size and weight; but they are distinguished from all other Etruscan coins of this class by their having the name of the city in full; whence we learn that the Etruscan form of the name was Felatri, or Vlaltheri, as on the one of which a figure is annexed. [E. H. B.]

**CODA OF VOLATERRAE.**

Volcae, a people of South Gallia, divided into Volcae Arecomici and Volcae Tectosages (Ov. Fast. v. 279; Diod. i. 2. § 8; Ov. Fast. v. 9. 10; Diod. i. 27); those of the discovery of Ptolemy.

Ptolemy says that the Tectosages occupied the most western parts of the Narbonensis, and that those are their cities: Illiberia, Bescino, Tolosa Colonia, Cessero, Carcaso, Basatreras, and Narbo Colonia. Next to them and extending to the Rhône he places the Arecomici, or Ariconii, as the name is in Ptolemy's text; and he assigns to the Arecomici only Vindencagum [Vindencagum] and Nimes Colonia (Nimesium). These two towns escaped the Province from the Rhône is in water; and if Livy is not mistaken (see Livy, vi. 37) the time of Hannibal's invasion of Italy, the Volcae also possessed coast of the Rhône.

The Volcae (Cecinae) formed a seat boundary between the Volcae Arecomici and Gabali and Rotari. As to the limits between Tectosages and the Arecomici there is no certainty; but it is proper to assign to the Tectosages (p. 206) that Narbo is proper Arecomici; and it is clear that the Arecomici to have possessed the greater part of the Province, which is west of the Rhône, which is of the Tectosages. The Arecomici limited the country of the Tectosages in the basin of the Garonne. Besides, the Tectosages extend also northwards to the Garonne, and western prolongation of this case. The Tectosages in the western part were the Narbo Arecomici were Nemesium [Nemasium], chief city of the Tectosages was Tiosale, Naro belonged to the Arecomici, we rest of Tolosates, as already observed, to the basin of the Garonne. [Narbo: Tolosii.]

There is some resemblance between the Volcae Arecomici and Belgae, and this resemblance is such that the Volcae were once named Belgae. But it would be a hasty conclusion to imagine them to be related to the Belgae. It is more likely that the Volcae were among the cities in his time still maintained their characteristic and great military reputation. The Gallic Tectosages also were a part of the Gallic Empire, and in the first quarter of the 3rd century. With the Roman conquest of Tolos, end of the Volcai Tectosages in Europe.

Volcae in Gallia were numerous, and belong to the class called Ases Grave, from their large size and weight; but they are distinguished from all other Etruscan coins of this class by their having the name of the city in full: whence we learn that the Etruscan form of the name was Felatri, or Vlaltheri, as on the one of which a figure is annexed. [E. H. B.]

**VOLCEIUM OR VOLCENTUM (Plat. Marin.) Pl.v.; Volcencianae, Ins. Buc.**

Capitale of Lucania, situated in the region of Potentia, a few miles from the valley of the river. The name is variously written by the authors. Livy mentions the Volcenes as a people who in the Second Punic War revolted from Rome and received a Carthaginian garrison in their town, but, in b.c. 209, returned to the Romans (Liv. xxiv. 15.). There can be no doubt that the Volcenes are the same people as the Volcae, who are enumerated by that author as the principal communities of the interior of Lucania (ii. 10. 4. 15.), and it is certain that the Volci of Ptolemy (Ov. Fast. v. 279; Diod. i. 2. § 8; Ov. Fast. v. 9. 10) were the same, and that the correct name of their cities is known from inscriptions, was Volci or Volcenes. (Mummius, etc. 15.)

The discovery of Bucconio leaves no doubt that this town extended to the sites of the Lucanian city of Volcnes. [Rost. vol. i. p. 243; Holsten. Not. of Cas. p. 27.]

It appears to have been a considerable town under the Roman Empire, and is so the Praetexta Lucaniea mentioned in the Paestum (p. 209).
VOLCI.

VOLCI (Oblāni, Potl.: Exh. Volciensia: Bn. near Ponte della Badiéa), a city of Etruria, situated in the plain on the right bank of the river Arminia (Fiora), about 8 miles from its mouth. Very little mention is bound of it in history. The name of the city is known from Plutarch as well as from Pliny, who numerales among the municipal towns of Etruria, he “Volciensi cognomine Etrusci,” an appellation evidently used to distinguish them from the people of Volcentum in Lucania. (Plin. iii. 5. a. 8; Potl. iii. i. § 49.) The name is quoted also by Stephanus of Byzantium, who writes it “Oelnius, from Polybius. (Steph. S. s. v.) But the only indication that they had once been a powerful people, and their city a place of importance, is found in the Fasti Capitolini, which record a triumph in the year B.C. 280 over the Volceineses and Volcentes (Fast. Capit. ad ann. 173). This was one of the last struggles of the Etruscans for independence, and it was doubtless in consequence of the spirit shown on this occasion by the Volcentes that the Romans shortly afterwards in B.C. 273) established a colony at Cori in the territory. (Vell. Pat. i. 14; Plin. iii. 5. a. 8.) It is expressly stated on this occasion by Pliny, that the city was a dependency of Volci (Cosa Volcentia), a statement which has been ignored by those modern writers who have represented Cori as an independent and not an Etruscan city. But while this is very doubtful in the case of Cori, the evidence, though scanty, is conclusive that Volci was such; and there is even reason to suppose, from a monument discovered at Cerrestris, that it was at one time reckoned one of the twelve chief cities of the Etruscan League. (Annu. d. Inst. Arch. 1842, pp. 37–40.)

But notwithstanding these obscure hints of its greatness, the name of Volci was almost forgotten, and its site unknown, or at least regarded as uncertain, when the first discovery of its necropolis in 828 led to subsequent researches on the spot, which have brought to light a number of painted vases greatly exceeding that which has been discovered on any other Etruscan site. The unprepossessing number, beauty, and variety of these works of art have given rise to a certain amount of much unwise excitement, as if Volci which is probably as much in excess of its real importance in ancient times as in the somewhat parallel case of Pompeii. It is impossible here to enter into any detailed account of the result of these excavations. It is calculated that above 1000 tombs in all have been opened, and the contents have been of the most varied kind, belonging to different periods and ages, and varying from the poorest and rudest pottery to the finest painted vases. The same tombs have also yielded very numerous objects and works of art in bronze, as well as delicate works in gold and jewellery; and after making every allowance for the circumstance that the cemetery at Volci appears to have enjoyed the rare advantage of remaining undisturbed for many ages, it affords inconceivable proof that it must have belonged to a wealthy and populous city. The necropolis and its contents are fully described by Mr. Dennis (Etruria, vol. i. pp. 397–427). The results of the excavations, in regard to the painted vases discovered, are given by Gerhard in his Rapporto su i Vasi Volcenti, published in the Annali del Instituto for 1881. It is remarkable that only some of the thousands of tombs opened was adorned with paintings similar to those found at Tarquinii, and, in this instance, they are obviously of late date.

The site of the city itself has been carefully ex-

scribed since those discoveries have attracted so much interest to the spot. It stood on the right bank of the river Arminia, just below the point where that stream is spanned by a noble bridge, now called the Ponte della Badiéa, undoubtedly a work of Roman times, though the foundations may be Etruscan. The few remaining relics of antiquity still visible on the site of the city, which occupied a plateau of about 2 miles in circumference, are also of Roman date, and mostly belong to a late period. Inscriptions also have been discovered, which prove that they have continued to exist under the Roman Empire; and the series of coins found there shows that it was still in existence, at least as late as the fourth century of the Christian era. In the middle ages it seems to have totally disappeared, though the plain in which it stood continued to be known as the Fiume di Voci, whence Holstenius correctly inferred that this must have been the site of Volci. (Holsten., Not. ad use. p. 40.) The necropolis was, for the most part, on the other side of the river; and it is here that the estimates have been carried on most diligently. The site of Volci (which is now wholly uninhabited) is about 8 miles from Montalto, a small town at the mouth of the Fiora, where that river was crossed by the Via Aurelia. (Denis, Lc.)

[ E. H. B.]

VOLCIANI, a people in Hispania Tarraconensis. (Liv. xxi. 19.)

VOLENOS, a fort in Ebusus, in the territory of Tridenum, which was destroyed by the Franks (Paul. Diaq. Longob. iii. 31), and is generally identified with the modern village of Volano on the Adige, south of Cailiano. (T. S.)

VOLIBA (Oblatia, Potl. ii. 3. § 30), a town of the Durnoni, in Britannia Romana, near the W. extremity of the island. Most probably Pallewud. (Cameron, p. 16.)

VOIBREBBIA (Oblabripsia, Potl. ii. 6. § 41), a town in Gallaecia in Hispania Tarraconensis belonging to the Nemesiae. (T. H. D.)

VOLOGATIS, in Galla Narbonensis, is placed by the Jerusalem Itin. after Lucus (Luc., on the road to Vapincum (Cen. pass.) distance from Lucus is and D'Anville supposes that Vologatis may be a place named Laches, but the distance is too much. Others fix the place at Beauvoir; and others propose Lethis or Beaumont. All this is uncertain. (G. L.)

VOLOGESISIA (Oblacevetia, Potl. v. 20. § 6), a city built by and named after Volgeses, one of the Armaecian kings of Parthia, in the immediate neighbourhood of Seleucia upon the Tigris. It is called by Pliny, Volgesococeta (vi. 26. a. 30), the latter portion of the name implying the “city of.” The extensive ruins, still existing, on both sides of the Tigris, are probably those of the two great cities of Seleucia and Volgesis. (V.)

VOLSAS (Oblacevas, Potl. ii. 3. § 6), a bay on the W. coast of Britain, probably Loch Broom. (Horsley, p. 378.)

VOLSCI (Oblascos, Strab. 5.47.9, Dionys.). an ancient people of Central Italy, who bear a prominent part in early Roman history. Their territory was comprised within the limits of Latinum as that name was employed at a late period, and under the Roman Empire; but there is no doubt that the Volscans were originally distinct people from the Latins, with whom, indeed, they were almost always on terms of hostility. On the other hand they appear as constantly in alliance with the Aecons; and
there is little doubt that these two nations were kindred races, though always distinguished from each other as two separate peoples. We have no statement in any ancient writer as to the ethnic origin or affinities of the Volscians, and are left almost wholly to conjecture on the subject. But the remains of the language as they are, afford with very little difficulty the safest foundation on which to rest our theories; and these lead us to regard the Volscians as a branch of the same family with the Umbrians and Oscans, who formed the aboriginal population of the mountain tracts of Central Italy. It would appear, indeed, as if they were more closely connected with the Umbrians than either the Sabines and their Sabellian offshoots, or the Oscans, properly so called; it is probable, therefore, that the Volscians had separated at a still earlier period from the main stock of the Umbrian race. (Mommsen, Unter-Ital. Diatopie. pp. 319—326; Schwegler, Rom. Gesch. vol. i. p. 176.) The only notice of their language that occurs in Roman authors, also points to it distinctly as different from Oscan (Titiniacus, De orig. v. Oscorum, p. 189); though the difference was undoubtedly that of two cognate dialects, not of two radically distinct languages.

When the Volscians first appear in Roman history, it is as a powerful and warlike nation, who were already established in the possession of the greater part at least of the territory which they subsequently occupied, and of their exact limits there is, indeed, to be determined with accuracy; and it is probable that they underwent considerable fluctuations during their long wars with the Latins and Romans. But there seems no doubt that from a very early period they held the whole of the detached mountain group S. of the Tiberus (Sacco), termed by modern geographers Linguam, together with the Liris and the valley of the Liris, and the mountain district of Arpinum, Sora, and Atina. Besides this they were certainly masters at one time of the plains extending from the Volscian Apennines to the sea, including the Pompitian Marshes and the fertile tract that borders on them. This tract they had, according to Cato, wrested from the Aborigines, who were its earliest possessors (Cato, de Republica, v. 2). The first mention of the Volscians in Roman history is in the reign of the second Tarquin, when they appear as a numerous and warlike people. It is clear that it was the great extension of the Roman power under its last king (which must undoubtedly be admitted as a historical fact), and the supremacy which he had assumed over the Latin League, that first brought him into collision with the Volscians. According to the received history he marched into their country and took their capital city, Suessa Pometia, by assault. (Liv. i. 53; Dionys. iv. 50; Gic. de Rep. ii. 24.) The tradition that it was the spoil there obtained which enabled him to build the Capitol at Rome, sufficiently proves the belief in the great power and wealth of the Volscians at this early period; and the foundation of the two colonies of Circei and Signia, both of which are expressly ascribed to Tarquin, was doubtless intended to secure his recent conquests, and to impose a permanent check on the extension of the Volscian power. It is evident, moreover, from the first treaty with Carthage, preserved to us by Polybius (iii. 22), that the important cities of Antium and Terracina, as well as Circei, were at this time subject to Tarquin, and could not, therefore, have been in the hands of the Volscians.

But the dissolution of the power of Tarquin by the loss of the supremacy of Rome over the Latins seems to have allowed the Volscians to acquire former sapience; and though the disorders of the earliest years of the Republic is perhaps a service, we seem to discern clearly that it was from the fact of being the allies of the Aequians upon the Latins that most of these people concluded the celebrated treaty by which they were held under Sp. Cassius, a. c. 493, which became the foundation of the permanent relation between the two states. (Liv. ii. 33; Dionys. iv. 93.) Assent to the received annals, the wars with the Volscians had already recommenced prior to the period almost immediately after the recent war. From this rapid and sudden development of their power we are presented in a legendary form in the history of Cassius. Whatever may have been the extent of this legend, and however impossible it is to moro, historically true, there is no doubt that it has its historical foundation in the fact that many of the Latin cities at this period fell successively into the hands of the Volscians and their allies the Aequians, and the two lines of advance, so singularly mingled in the received narrative of the war, which represents these conquests as made in a single campaign to represent distinctly the two separate series of conquests by which the two nations pressed on towards Rome. (Niebuhr, vol. i. p. 365; Schwegler, Roii. Gesch., vol. ii. p. 174.) It is impossible here to give more than a very outline of the long series of wars with the Volscians which occupy so prominent a place in the history of Rome for a period of nearly two centuries. Little historical value can be attached to the exact dates of those wars as they were preserved by the annalists at that period. It is quite certain that the history belongs to the historian of Rome to endeavour to weld their confused and reconcile their discordant accounts. But in a general view of the wars they may be classed (as remarked by Niebuhr), into four periods. The first of these would comprise the wars from 459, a few years preceding the Decemviri, including the conquests ascribed to Cassius. The second was the period when the Volscians were at the height of their power. It extends from a. c. 459 to 431, when the excess of Postumus Tubertus is represented as planning a conspiracy against the allies of the Volscians and Aequians (Liv. iv. 26—29), which appears to have been really an important success, and paved the way for the turning point in the long struggle between the two nations. From this time till the capture of Circei by the Gauls (a. c. 390) the wars with the Volscians and Aequians assume a new character. The tide had turned, and we find the Romans and their allies recovering one after another the towns which had fallen into the hands of their enemies. At Ficium and Bologna were regained in a. c. 418; and the frontier fortresses of Terracina and Camerino, which had been taken by the Volscians, was again wrested from them in a. c. 413. (Liv. iv. 47, 48, 51.) The frontier fortresses of Verruca and Cereatone were indeed taken and restored; but the capture of Antium or Terracina in a. c. 399, which was the
continued constantly in the hands of the Romans must have been a severe blow to the power of the Volscians, and may be considered as marking an era in their decline. Throughout this period it is remarkable that Antium, one of the most powerful cities of the Volscians, was in peaceful terms with Rome; the war was carried on almost exclusively upon the NE. frontier of the Volscians, where they were supported by the Aquilans, and Ecetra was the city which appears to have taken the lead in it.

The capture of Rome by the Gauls marks the commencement of the Roman period to the Volscian Wars. It is probable that their Aquilian allies suffered severely from the same invasion of the barbarians that had so nearly proved the destruction of Rome [Aquilia], and the Volscians who adjoined their frontier, may have shared in the same disaster. But on the other hand, Antium, which was evidently at this period a powerful city, suddenly broke off its friendly relations with Rome, and for a period of nearly 13 years (c. 386—374), we find the Volscians engaged in almost perpetual hostilities with Rome, in which the Antiates uniformly took the lead. The seat of war was now transferred from the Aquilian frontier to the southern foot of the Alban hills: and the towns of Velitrae and Catricum were taken in turn by them from the Volscians, and their ultimate subjugation. Soon after the conclusion of peace with the Antiates we hear for the first time of Privernum, as engaging in hostilities with Rome, c. 358, and it is remarkable that it comes forward single-handed. Indeed, if there had ever been any political league or bond of union among the Volscanian cities, it would seem to have been by this time completely broken up. The Antiates again appear repeatedly in arms: and when at length the general defection of the Latins and Campanians broke out in 350 B.C., they were among the first to join the enemies of Rome, and laid waste the whole sea-coast of Latium, almost to the walls of Ostia. But they shared in the defeat of the Latin armies, both at Pedum and on the Arxus: Antium itself was ransacked by the Aequi: but the towns of Privernum and of Tarquinii, which shared on its NE. shore, but it was also sometimes called Lacinia Tarquinia, as its western side adjoined the territory of Tarquinii. (Liv. ii. 96.) Notwithstanding its great size, it is probable, from the nature of the surrounding hills and rocks, that it is the crater of an extinct volcano (Dennis, Etvaris, vol. i. p. 514). In this lake the island of Minerva (Lazio, sita, as the ancients described it) is encased in fish, and its sedgy shores harboured large quantities of water-fowl, with which articles it supplied the Roman market. (Strab. v. 16.) It contained two islands, of which, as well as of the lake itself, wonderful stories were related by the ancients. They were remarked to be ever changing their form. (Plin. xxvi. 29.) It is said that during the Second Punic War its waters are said to have flowed with blood. (Liv. xxvii. 23.) The shores of the lake were noted for their quarrries. (Procop. B. Goth. i. 4, p. 23, ed. Bonn.)

VOLSINI or VULSINI (Oblatinorum, v. p. 226; Ovelucinor, Hist. iii. 5: § 50: Bolena), an ancient city of Etruria, situated on the shore of a lake of the same name (Lacus Vulscianus), and on the Via Clodia, between Clusium and Forum Cesarii. (Hist. Ant. p. 226; Tab. Peut.) But in treating of Volsci we must distinguish between the Etruscan and the Roman city. We know that the ancient town lay on a steep height (Zonaras, Asa. viii. 7; cf. Aristot. Mir. Aulc. 96); while Bolena, the representative of the Roman Volsci, is situated in the plain. There is considerable difference of opinion as to where this height should be sought. Aebeken (Hist. Tustinian, p. 34, seq.) looks for it at Monte Fiascone,
VOLDUSTAN.

at the southern extremity of the lakes; whilst Müller (Erw., i. p. 451) seeks it at Orvieto, and adds the name of that place—Umbra Veuta, "the old city," as an argument in favour of his view:

but Mr. Denis (Erw., vol. i. p. 508) is of opinion that there is no evidence that it was so far from the Roman town, and that it lay on the summit of the hill, above the amphitheatre at Bolsena, at a spot called Il Picchione. He adduces in support of this hypothesis the existence of a good deal of broken pottery there, and of a few caves in the cliffs below.

It is held to have been one of the most powerful cities of Etruria, and was doubtless one of the 13 which formed the Etruscan confederation, as Volstunii is signified by Livy (x. 37) and Valerius Maximus (ix. 1. extern. 2) as one of the "capita Etruriae." It is described by Juvenal (iii. 191) as seated among well-wooded hills.

We do not hear of Volstunii in history till after the fall of Veii. It is possible that the success of the Roman arms may have excited the alarm and jealousy of the Volstunenses, as their situation might render them the next victims of Roman ambition. At all events, the Volstunenses, in conjunction with the Sabinian, taking advantage of a famine and pestilence which had devastated Rome, made incursions into the Roman territory in n. c. 391. But they were not long successful: 8000 of them were made prisoners; and they were glad to purchase a twenty years' truce on condition of restoring the booty they had taken, and furnishing the pay of the Roman army for a twelvemonth. (Livy. vi. 31. 32.)

We do not again hear of Volstunii till the year n. c. 310, when, in common with the rest of the Etruscan cities, except Arretium, they took part in the siege of Seiculum, a city in alliance with Rome. (Livy. ix. 32.) This war was terminated by the defeat of the Etruscans at lake Vadimo, the first fatal shock to their power. (Ibid. 38.) Three years afterwards we find the consul P. Decius Mus capturing several of the Volstunian fortresses. (Ibid. 41.)

In 295, L. Postumius Megellus ravaged their territory and burnt their towns. In 294, with the aid of the Sabinians, slaying 2800 of them; in consequence of which they, together with Perusia and Arretium, were glad to purchase a forty years' peace by the payment of a heavy fine. (Ibid. x. 37.) Not more than fourteen years, however, had elapsed, when, with their allies the Volstunenses, Arretium, and Perusia, they, again took up arms against Rome. But this attempt ended apparently in their final submission in n. c. 280. (Livy. Ep. xii.; Fast. Cons.)

Pilney (xxxiv. 7. 16) retails an absurd story, taken from a Greek writer called Metrodorus, that the object of the Romans in capturing Volstunii was to make themselves masters of 2000 statues which it contained. The story, however, sufiices to show that the Volstunians had attained to a great pitch of science in sculpture, and that this was a common proceeding in the Roman wars. This is confirmed by Valerius Maximus (L. c.), who also adds that this luxury was the cause of their ruin, by making them so indolent and effeminate that they at length suffered the management of their commonwealth to be usurped by slaves. From this degrading tyranny they were rescued by the Romans. (Ptol. i. 31; Zonaras, l. c.; A. Victor, Vit. Imper. 184; Oros. iv. 6.)

The Romans, when they took Volstunii, razed the town, and compelled the inhabitants, as we have already intimated, to migrate to another spot. (Zonaras, l. c.) This second, or Roman, Volstunii con-

Volstunii.

disused to exist under the Empire. It was in the place of Sejanus, the minister and favourite of Tiberius. (Tac. Ann. iv. 1, vi. 8.)

Juv. 74 alludes to this circumstance when he calls the fortunes of Sejanus as dependent on the tale of Narsus, or to believe that it was 5000 miles so far from the Roman town, and that it lay on the summit of the hill, above the amphitheatre at Bolsena, at a spot called Il Picchione. He adduces in support of this hypothesis the existence of a good deal of broken pottery there, and of a few caves in the cliffs below.

It is held to have been one of the most powerful cities of Etruria, and was doubtless one of the 13 which formed the Etruscan confederation, as Volstunii is signified by Livy (x. 37) and Valerius Maximus (ix. 1. extern. 2) as one of the "capita Etruriae." It is described by Juvenal (iii. 191) as seated among well-wooded hills.

We do not hear of Volstunii in history till after the fall of Veii. It is possible that the success of the Roman arms may have excited the alarm and jealousy of the Volstunenses, as their situation might render them the next victims of Roman ambition. At all events, the Volstunenses, in conjunction with the Sabinian, taking advantage of a famine and pestilence which had devastated Rome, made incursions into the Roman territory in n. c. 391. But they were not long successful: 8000 of them were made prisoners; and they were glad to purchase a twenty years' truce on condition of restoring the booty they had taken, and furnishing the pay of the Roman army for a twelvemonth. (Livy. vi. 31. 32.)

We do not again hear of Volstunii till the year n. c. 310, when, in common with the rest of the Etruscan cities, except Arretium, they took part in the siege of Seiculum, a city in alliance with Rome. (Livy. ix. 32.) This war was terminated by the defeat of the Etruscans at lake Vadimo, the first fatal shock to their power. (Ibid. 38.) Three years afterwards we find the consul P. Decius Mus capturing several of the Volstunian fortresses. (Ibid. 41.)

In 295, L. Postumius Megellus ravaged their territory and burnt their towns. In 294, with the aid of the Sabinians, slaying 2800 of them; in consequence of which they, together with Perusia and Arretium, were glad to purchase a forty years' peace by the payment of a heavy fine. (Ibid. x. 37.) Not more than fourteen years, however, had elapsed, when, with their allies the Volstunenses, they, again took up arms against Rome. But this attempt ended apparently in their final submission in n. c. 280. (Livy. Ep. xii.; Fast. Cons.)

Pilney (xxxiv. 7. 16) retails an absurd story, taken from a Greek writer called Metrodorus, that the object of the Romans in capturing Volstunii was to make themselves masters of 2000 statues which it contained. The story, however, sufiices to show that the Volstunians had attained to a great pitch of science in sculpture, and that this was a common proceeding in the Roman wars. This is confirmed by Valerius Maximus (L. c.), who also adds that this luxury was the cause of their ruin, by making them so indolent and effeminate that they at length suffered the management of their commonwealth to be usurped by slaves. From this degrading tyranny they were rescued by the Romans. (Ptol. i. 31; Zonaras, l. c.; A. Victor, Vit. Imper. 184; Oros. iv. 6.)

The Romans, when they took Volstunii, razed the town, and compelled the inhabitants, as we have already intimated, to migrate to another spot. (Zonaras, l. c.) This second, or Roman, Volstunii con-

Volstunie.

For the coins of Volstunii, see Müller, Prax. vol. i. pp. 354, 355: for its history, see In C. Etruriae aut Æneas, 1. iii.: Aeneid. Volstuniae.

VOLSTANIA.

VOLSTUNAE FANUM [FASITVS VOLSTUMI.]

VOLSTIBILIS.

VOLSTIBILIS (Oebalbaetis, Posid. iv. 1. ii. 46) a town of Muneraeen Tingitana, seated on the coasts of Saba, and on the road to Tessaou Atraci, it was only 4 3/4 miles distant from the sea. (Ibid. ant. 28.) It lay 35 min. S. from Banaus, and the same distance from the sea. (Plin. v. a. 1. 1; Mela, iii. 10.) It was a colony. (Ibid. ant. l. c.) and a place of seafarers. (Ibid. 34.) Ptolemy calls it the inhabitants of the surrounding district, Volstibilia (Oebaloetis, Posid. iv. 1. ii. 46). In the time of Leo Africanus (Posid. ed. Lorchach) it was a desert town betw. Megenes, bearing the name of Volstini (Volsinii), the walls of which were 6 miles in circumference. That position is now occupied by the town of Zambet-Mula-Drinn, on mount Lacinus, some distance to the NW. of the village of Kaspar Fracass (Pharscol's castle), with Etruscan inscriptions; but to what ancient city they belong are unknown. (Cf. Mannert, x. pt. ii. p. 485; Gisler, Hist. Sardin, p. 28; Wimmer, Gemaines von Afrika, p. 439.)

VOLUCE (probably the Oeballoetis of Posid. iv. 1. ii. 46), a town of the Pelasgiotes in Hispanic comasia, on the road from Astura to Geranus, and 35 miles W. of Numastia. (Ibid. ant. l. c.) Variously identified with Volde (Volsinii), Velecchs, and Colcorbias.

VOLUNTIA (Oebaloetis, Posid. ii. iii. 4, 3) a place on the E. coast of Hibernia. (Ibid. 433.)

VOLUSTANA. [CAMBRINI MOSTER.]

Digitized by Google
VOMANUS.

VOMANUS (Vomano), a river of Picenum, which rises in the lofty group of the Apeninnes now known as the Gras Sasso d'Italia, and flows into the Adriatic, after passing within a few miles to the N. of the city of Adria (Apit). Its name is mentioned by Pliny only (iii. 13, § 188). [E. E. B.]

VORDENSES, in Gallia Narbonensis, an ethnic name which occurs in an inscription found at Apt, site Apta Julia [APT]. The inscription states that the "Vordenses pagani" dedicate this monument to their patrons, who is designated "virvir" of the Colonia Apta. The place is supposed to be Ogoré, which is contiguous to the diocese of Apt, and in that of Canavium. The name of Vord into Gord is easily explained. [V. N. N.]

(D'Anville, Notice, go) [G. L.]

VOREDA, a town of the Brigantes in Britannia romana, on the road from Cataracton to Lugdunum. (Itin. Ant. p. 467.) It is variously identified with Old Pemph, Whrip Castle, and Coal Hill. By the Geogr. Rev. (v. 31) it is called Sereda. [T. H. D.]

VORGEA (Vorgyes), in Gallia Lugdunensis, the capital of the Osismi [Oisissi], a Celtic people in the north-west part of Bretonne Prot. (ii. 8. § 5). This seems to be the same place as the Vorginum of the Table; and it appears on Pliny's map, which leads from the Aven through the Vannates through the capital of the Veneti, and north on the coast at Gosebritae, or Gosebriva, as one would write it. Between the capital of the Veneti and Vorginum is Sulis, supposed to be at the junction of the Sex and the Blasvet [Sulis]. From Sulis to Vorginum is the distance marked, and this brings us to a place named Vorches (Avry), but all this is very uncertain. Others fix Vorginum at a place named Juvernem. [G. L.]

VORO'-GLOM, in Gallia, is placed in the table on a road from Augustonemetum (Clermont Ferrand) through Aquae Calidae (Vichy) to Arilicia (Avrilii). The distance is marked viii. from Aquae Calidae, and xiii. from Vorogium to Arilicia. There is a place named Vorogium in Veroconae, and xiii. from Vorogium to Arilicia. There is a place named Vorogium in the table on a road from Augustonemetum (Clermont Ferrand) through Aquae Calidae (Vichy) to Arilicia (Avrilii). It stands half-way between these places and at the distance of viii. It is called Oberg in the table, and it is almost certain, as D'Anville suggests, that the name is erroneously written in the Table, and that it should be Vorogia. [G. L.]

VOSALIA [VOSAYA].

VOSAVA or VOSAVIA, in North Gallia, is placed by the Table on the Roman road along the west bank of the Rhine, and between Bonobrice or Bandonobrice (Roodepoort) [Blandonbrica] and Birivium (Bingen). It stands half-way between these places and at the distance of viii. It is called Oberg in the table, and it is almost certain, as D'Anville suggests, that the name is erroneously written in the Table, and that it should be Vorogia. [G. L.]

VOSAJES [Vogaces, Vogues], Vogoves, Vogues.

The form Vosages has greater authority than Vosges (Schneider's Caesar, B. G. iv. 10); and the modern name is also in favour of the form Vosges. Lucan sometimes quoted as authority for the form Vosges:

VOSAJES [Vogaces, Vogues], Vogoves, Vogues.

The form Vosages has greater authority than Vosges (Schneider's Caesar, B. G. iv. 10); and the modern name is also in favour of the form Vosges. Lucan sometimes quoted as authority for the form Vosges:

"Castraque quo Vogesii curvam super ardua rupem

Pugnaque picta obibebant Lingonae armis."

(Pherec. i. 897.)

The name is Boorkeow in the Greek version of the Commentaries.

Caesar says that the Moes (Moas) rises in the Vosges, by which he means that the hills in which the Moas rises belong to the Vosges. But he says no more of this range. The battle with Ariovistus, n. c. 55, was fought between the southern extremity of the Vosges and the Rhine, but Caesar (B. G. i. 43, 48) gives no name to the range under which Ariovistus encamped in the great plain between the Vosges and the Rhine. D'Anville observes that an inscription in honour of the god Vosagus was found at Berg-Zabern on the confines of Alace and the Palatine, which proves that the name Vosagus extended as far as that place. It seems likely that the name was given to the whole range now called Vosges, which may be considered as extending from the depression in which is formed the canal of the Rhine and Rhine, between Bifort and Alberich, to the bend of the Rhine between Meins and Bingen, a distance of about 170 miles. The range of the Vosges is parallel to the Rhine. The hilly country of the Faucalles in which the Moas rises is west of the range to which the name of Vosges is now given. The Vosges are partly in France, and partly in Rhenish Bavaria and Hesse-Darmstadt.

The territory of the Sequani originally extended to the Rhine, and the southern part of the Vosges was therefore included in their limits. North of the Sequani and west of the Vosges were the Leci and Medionatrici; and east of the Vosges and between the Vosges and the Rhine was the territory of the Aureloi, Triboci, Namnetes, Vangiones, and Caracates.

In the table the Silva Vosagus is marked as a long forest on the west side of the Rhine. Pliny (xvi. 39) also speaks of the range of the Vosges as containing timber. [G. L.]

UR, a castle of the Persians mentioned by Ammi- anus Marcellinus (xxv. 8). In his account of the war between Julian and the Persians, he states that Ur has been situated in Mesopotamia, at no great distance from Hatra (Al-Hadhr). It has been generally supposed that Ur is the same place as that mentioned in Genesis (xi. 28); but the recent researches of Colonel Rawlinson have demonstrated that the Ur whence Abraham started was situated in the S. part of Babylonia, at a place now called Mecaphe. (Journ. Roy. As. Soc. 1855.) [V.]

URANOPOLIS (Oiranopolis), a town in the peninsula of Chalcidice in Macedonia, of which we know nothing, except that it was founded by Alex- archus, the brother of Cassander, king of Macedonia (Athen. iii. p. 98; Plin. iv. 10. s. 17). As Pliny does not mention Sane in his list of the towns of Acts, it has been conjectured by Leake that Uranopolis occupied the site of Sane. (Northern Greece, vol. iii. p. 149.)

URANOPOLIS (Oiranopolis), a town of Piso- sia, in the district of Cabalia, to the north-west of Termessos, and south-east of Isiodona. (Ptol. v. 5. § 6.) [L. S.]

URBA, a town of Gallia, in the territory of the Halveti. It is placed in the Antonine Hin. between Locus Lausoniuni and Arilica [Ariolica], xviii. from Locus Lausoniuni and xxiii. from Ariolica. Urba is Urbe in the Swiss Canton Waadt or Pays de Vaud, on the road from the Lake of Neuf-
URBANA COLONIA.

URBANA COLONIA, mentioned by Pliny only (xii. 6. a. 8), was a colony founded by Sulla in a part of the territory of Capua, adjoining the Falerius ager. From its name it would appear probable that it was a colony of citizens from Rome itself, who were settled in it in this tribe's district.

It is doubtful whether there ever was a town of the name, as no allusion is found to it as such, and the district itself was reunited to that of Capua before the time of Pliny. (Plin. l. c.; Zumpt, de Col. p. 252.)

UBRATE, a place in Lower Pannonia, on the road from Siscia to Sermium (l. ii. p. 363; Tab. Peut. 6), its exact site is unknown. [L. E.]

URBICUS PAGUS. [Helioceti, Vol. I. p. 1041.]

URBILUM (Ospeda), was the name of two cities or municipal towns of Umbria, situated within a short distance of each other, which were distinguished by the epithets Hortense and Metarensis. (Plin. iii. 14. a. 19.)

1. URBILUM HORTENSE (Urbino), apparently the more considerable of the two, and for that reason frequently called simply Urbinum, was situated on a hill between the valleys of the Metaurus and the Piscitrus (Foglia), rather more than 30 miles from the Adriatic. It is mentioned by Pliny among the municipal towns of Umbria, and is incidentally noticed by Tacitus as the place where Fabius Valens, the general of Vitellus, was put to death, in A. D. 69, after he had fallen into the hands of the generals of Vitellus. (Tac. Hist. iii. 62.) Its municipal rank is confirmed by numerous inscriptions, which prove it to have been a town of some importance. (Orell. Iserov. 3714; Gruter, Iserov. p. 387. s. p. 392. 1. &c.)

Procopius also notices it during the Gothic Wars, and correctly describes it as situated on a steep and rocky hill; it was at that time a strong fortification, and taken by Belisarius in A. D. 558. (Procop. B. G. ii. 19.) From this time it seems to have continued to be a place of considerable importance, and in the middle ages became the seat of government of a race of independent dukes. It is still a considerable city, and one of the capitals of the delegation of Urbino and Pesaro, but has no remains of antiquity, except the inscriptions above noticed.

2. URBILUM METARENSIS (Urbiseto), was situated, as its name imports, in the valley of the Metaurus, on the right bank of the river, about 6 miles below S. Angelo in Vado (Tiberum Metarensis), and 9 from Urbino. Its municipal rank is attested by an inscription, in which the inhabitants are termed Urvinates Metaurenses, as well as by Pliny (l. xxii. 14. a. 19), but it seems never to have been a place of much importance. In the middle ages it fell into complete decay, and was replaced by a village called Castel Durante, which, in 1635, was enlarged and raised to the dignity of a city by Urban VIII., from whom it derives its present name of Urbiseto. (Olivier. Inst. p. 563; Eut. Hist. ch. 117.) [T. H. D.]

URBS SALVIA (Ospeda Salloni, P. E. I. i. § 53: Edith. Urbis Salvinianis or Urbisalvianissis: Urbianegles), a town of Picenum, mentioned by Pliny among the municipal towns of that district. (Plin. iii. 18. a. 18.) It was situated in a flat district to the left of the Flusius (Chimis), about 2 miles to the right bank of that river, and 7 miles E. of Terme.

The testimony of Pliny to its munificence is confirmed by the Liber Cubenses, which includes the "agur Urbis Salvianis," as well as several other inscriptions. (Liber Col. p. 386; Geih. Inscrip. 1.) The town was taken and destroyed by Alaric, a massacre which it never recovered, as that it fell into the time of Procopius. (Procop. B. G. ii. 19.)

Dante also notices it in the 13th century as a ruin and nothing else, and it was never revived. (Vis. xv. 73; but the town seems to have survived, and is still attached to the municipality, which is, however, a new one, and not the same. (Procop. B. G. ii. 19.)

URBS VETUS (Orvieto), a city of a name, identified by Paulus Diaconus (Hist. Lang. iii. 34) together with Balneum Regis (Bagno) as a small hamlet. No mention of either name is made in any writer before the fall of the Roman Empire; but it is probable that the Ubriacensium (Soldiers of Procopius), which figures in the Gothic Wars, was a fort of some importance, in the same way the Urbanus of the Umbrians of Murcia (Procop. B. G. ii. 19.)

There is no doubt that the modern town of Orvieto, deriving from Urbis Vetus; but the latter is more an appellation given in late times, and to what the original name of the city referred. Noeburcus supposes it to be Salerno, as it was called by Livy in ii. c. 36 (Livy. vii. 31: Senec. p. 495) [Salvanum], while others suppose it was Bagno (Bagnore). But both suggestions are more conjectural. [E.]

URBESCA (Ospeda or Ospesca, P. E. i. 56), a town of the Calbari in Hispania Tarraconensis. According to some, the modern town of Urbiseto, whilst others identify it with Valex or Ompis in Sestini (p. 219.)

URBICUS (Ospeda), a town of the Bastiani in Hispania Tarraconensis, on the borders of Bastia, or, according to another boundary line, which makes the line run as far as Barca, in Bastia itself, as a beak after it, and on the road from Castelnuovo. (Melii, ii. 6, where the editions mistook Urghi and Virghi; P. E. i. 404.)"
URGO. [See PIRI.]

URGA. [HYRIM.]

URIA LACUS. [Astollz, p. 64, v.]

URIAS SINUS. [APULIA.]

URSIUM (It. Hier. p. 569), a town in Thrasos, on the road between Taprando[s] and Bergule: according to Beichard it corresponds to the modern Ipili or Apiloi; but according to Lapie, to Kirkilis. [J. R.]

URUM (Ofsuar, Ptol. ii. 4. § 12). 1. A town in Hispania Baetica, on the borders of Lucania; according to Beichard, now Torre del Oro.

2. A river in Hispania Baetica, between the sea and the town just named. (Plin. iii. 1. s. 3.) Now se Tinto. [T. H. D.]

URPANUS, a small river of Pannonia, a tributary of the Savus, is now called the Verdas. (Plin. iii. 8; Tab. Peut., where it is called Urba.) [L. S.]

URSI PROMONTORIUM. [SARDINIA.]

URSO (Ofsuar, Strab. iii. p. 141), a strong mountain town in Hispania Baetica, the last refuge of the Pompeians. It was a Roman colony, with the surname of Genna Urbanorum, and was under the jurisdiction of Astigi. (Plin. iii. 1. s. 3; Hirt. 3. H. 26. 41. 85; Appian, B. I. 16.) It is the modern Usinnas, where the remains of a church have been found. (Cf. Muratori, p. 1099; Flores, Exp. Sopr. x. p. 77.) For coins of Urso, see Flores, Med. ii. p. 624, iii. p. 130; Mionnet, i. p. 28, Suppl. p. 47; Sestini, p. 94. [T. H. D.]

COIN OF URBO.

URSOLOA or URSOLI, a place in Gallia Narbonesis, fixed by the Antonine Itin. on the road between Valenta (Valence) and Vienna (Vienne), xil. from Valenta, and xxvi. from Vienna. This agrees pretty well with the whole distance between Colonia Narbonensis and Vienna. There are no fragments of determining the site of Urosoli except the distances; and D'Anville fixes on S. Valier, a place on the right bank of the Galatone near the place where it enters the Rhone. [G. L.]

URUNCI, a place in Gallia between the Voges and the Rhine. It occurs twice in the Antonine Itin., and in both cases the road from UrsunCi runs o Mon Briaicus; [Mon Briaicus]. In one route it is placed between Larga (Largizum) and Mons Briaicus, xxvi. from Larga, and xxiii. from Brisciansis. This route is from south to north-east. The other route is from Ardibilnum, supposed to be Bimming near Basle, to Mons Briaicus; from south to north, and UrsunCi is xxii. M. P. or 15 leagues from Mons Briaicus. D'Anville supposes that UrsunCi may be a place named Rosacen or Riceacen, on the line of the road from Larga to Mona Briaicus or Brisciansis. [G. L.]

USA, the most easterly river of Mauretania. (Plin. v. 2. s. 1.) It seems to be the river called Zearap by Ptolemy (iv. 2. § 10), and is probably the Abydos, which falls into the gulf of Bugia. [T. H. D.]

USABGALGA (Ovifrigula, Ptol. iv. 6. § 7, &c.), a very extensive mountain range in the country of the Garamantes on the N. border of Libya, Interior, and S. of Numidia and Mauritania, stretching in a NW. direction as far as Alica. It is in this mountain that the river Sagradas has its source. [T. H. D.]

USBIBUM (Ovibarium), a town mentioned by Ptolemy (ii. 11. § 30) in the south-east of Germania, probably in the territory of the Marcomanni, seems to be identical with the modern Iseaba, or a rivulet of the same name. [L. S.]

USCANA, the chief town of the Pescos, a people of Illyricum, which contained 10,000 inhabitants at the time of the Roman war with Persia. At the commencement of this war it appears to have been in the hands of Persia, and the first attempt of the Roman commander, App. Claudius, to obtain possession of the place proved unsuccessful, a. c. 170. (Liv. xiii. 10.) It would seem, however, that it is not a place that has been afterwards taken by the Romans, since we read that Persus in the following year surprised Uscana, marching thither in three days from Stubera. (Liv. xiii. 17. 18.) Shortly afterwards L. Coelius, the Roman commander in Illyricum, made an unsuccessful attack upon Uscana. (ib. 21.) The site of this town is uncertain.

USCENUM (Obsernavor, or Obsernavor, Ptol. iii. 7. § 2), a town of the Jazyrge Metaestae. [T. H. D.]

USCUADAMA, a town belonging to the Beesi, near Mount Haemus, which M. Lucullus took by assault. (Entr. vi. 10.) [J. R.]

USELLIS (Ovelli, Ptol. Usellis), a city of Sardinia, situated in the interior of the island, about 16 miles from the coast, and the same distance S. of Forum Trajani. Its name is not found in the Itineraries, and the only author who mentions it is Ptolemy (iii. 3. § 2), who correctly places it on the S. coast of the island: but the existing ruins, together with the name of Usellis, still borne by a village on the site, leave no doubt of its true site. (De la Marmon, Voy. en Sardaigne, vol. ii. pp. 367, 463.) [E. H. B.]

USILLA (Ovili), Ptol. iv. 3. § 10), a place in Byzasicum in Africa Proper. It is the Usala of the Itin. Ant. (p. 59), lying between Thydrus and Thamas. Variously identified with Inachilla or Sidki Makelyn, and Inabila. [T. H. D.]

USPETES or USPETI (Ovispera, Ovitera), a German tribe, mostly mentioned in conjunction with the Tencteri, with whom they for a long time shared the same fate, until, in the end, having crossed the lower Rhine, they were treacherously attacked and defeated by Julius Caesar. (Cass. B. G. iv. 4, dec.; Appian, de Reb. Gall. 18; comp. Tencteri.) After this calamity, the Usipetes returned across the Rhine, and were received by the Sigambri, who assigned to them the district on the northern bank of the Luppia, which had previously been inhabited by the Chamavi and Tubantes, and in which we henceforth find the Usipetes as late as the time of Tacitus. (Anna. xiii. 55, Hist. iv. 37; Germ. 23; Dion Cass. liv. 32, foll.) Afterwards the Usipetes are met with
further south, opposing Germanicus on his return from the country of the Marsi. (Tac. Ann. i. 50, 81; comp. Dion Cass. xxxix. 47; Plut. Cass. 23.) In Strabo (vii. p. 292) they appear under the name of Nautes, and Pliny (xxi. 119) refers to a tribe of the name of Osorvoi, whom some believe to be the same as the Usipetes; but if this be correct, it would follow that the Usipetes migrated still farther south, as Ptolemy places Thasos on the upper Rhine; but as no other authority places them so far south, the question is altogether uncertain. About the a. d. 70, the Usipetes took part in the hostilities of Marcus Vipsanius Agrippa (Tac. Ann. xiii. 54), and in a. d. 83 a detachment of them is mentioned as serving in the Roman army in Britain. (Id. Agric. 27.) Afterwards they disappear from history. (Comp. Zonae, De Deis Deothes, p. 89; Wilhelm, Germani, p. 183.)

USPE, a town of the Solii in Samnium, lying E. of Beneventum. (Ilay on a height, and was fortified with a ditch and walls; but the latter were composed only of mud confined in hurdles. (Tac. Ann. xii. 16.)

USSADIUM (Ossadion, or Ossadion Aerop.), Ptol. iv. i. §§ 4 and 13., a promontory of Mauretania Tingitana, lying SW. of the promontory of Hercynus, near the lower mouth of the Tagus. (T. H. D.)

USTICA [OSTRODA].

USUERNA or USUERVA. [HOSTERBAS.]

UTICA (ἐτύρας, Polyb. l. 75; Ptol. iv. i. § 6; Odor., Dion Cass. xxxi. 41; Eul. Ciliciensis; Liv. xxxix. 35; Cass. B. C. ii. 36), a colony founded by the Tyrians on the N. coast of Zeugitana in Africa. (Vell. Pat. i. 2; Mela, i. 7; Justin. xvii. 4, &c.) The date of its foundation is said to have been a few years after that of Gades, and 287 years before that of Carthage. (Vell. Pat. l. c.; Arist. Afrik. Anc. 146; Gesenius, Museen. Script. Linguarum Phoenic. p. 291; Sil. Ital. Pum. iii. 241, sqq. &c.) Its name signified in Phoenician, “ancient,” or “noble” (אֲבָנָי, Gesenius, ii. p. 420, and Thes. Ling. Heb. p. 1065). Utica was situated near the mouth of the river Bagrada, or rather that of its western arm, in the Bay of Carthage, and not far from the promontory of Apollo, which forms the western boundary of the bay. (Strab. xvii. p. 832; Liv. l. c.; Ptol. l. c.; Appian, B. C. ii. 44, seq.; Procop. B. V. ii. 15, &c.) It lay 27 miles NW. of Carthage. (Itin. Ant. p. 22.) The distance is given as 60 stadia in Appian (Pum. 75), which is probably an error for 160; and as a day’s sail by sea. (Strab. Geogr. Mira. ii. p. 50, ed. Hude.) Both Utica and Tunis might be described from Carthage. (Strab. l. c.; Polyb. i. 73; Liv. xxx. 9.) Utica possessed a good harbour, or rather harbours, made by art, with excellent anchorage and numerous landing places. (Appian, l. c.; cf. Barth, Wanderungen durch die Kustenländer des Mittelmeeers, pp. 111, 125.) On the land side it was protected by steep hills, which, together with the sea and its artificial defences, which were carefully kept up, rendered it a very strong place. (Liv. xxxix. 35; App. Pum. 16, 30, 75; Dio. lxx. 54; Pinct. Cat. Mira. 58.) The surrounding country was exceedingly fertile and well cultivated, and produced abundance of corn, of which there was a great export trade to Rome. (Liv. xxv. 81.)

The hills behind the town, as also the district near the present Porto Farina, contained rich veins of various metals; and the coast was celebrated for producing vast quantities of salt of a very peculiar quality. Strab. iii. 639; Cass. B. C. ii. 25; Polyb. xii. 3, seq.; Dio. lxx. 8, &c.) Among the buildings of the town, we hear of a temple of Jupiter (Pinct. Cat. Mira. 5) and of one of Apollo, with a planks of Numidian cedar near twelve centuries old (Pinct. vii. 50. a. 79; of a forum of Trajan, etc. a theatre outside the city. (Tito Crespi, op. Moris. Aph. Cer. iii. p. 10; Cass. B. C. ii. 25.) The last were lost in the great earthquake of 727, which occurred in the time of Flaccus (75. 79). Shaw (Trave. vol. i. p. 160, seq.) has the merit of having fixed without doubt the true situation of this celebrated city, the most important in N. Africa after Carthage. Before the time of Shaw, it was sought sometimes at Bueris, sometimes at Porto Farina, in that supposition fixed it near the little marshy Daris, which has a holy tomb called Bos-alater; and with this view many writers have agreed (Falsé, Recherches sur l’implantation de Carthage, p. 66; Barth, Wanderungen, &c. p. 109; Sennacher, pp. 39, 46; Bitter, Afrika, p. 913, &c.) Since the Roman times the muddy stream of the Bagrada has deposited a sand-bank south of the delta of from 3 to 5 ft. in extent, so that the innermost reaches of the Bay of Carthage, on which ancient Utica was situated, as well as the eastern arm of the river itself, have been converted into a broad morass, in which traces are still visible of the quays which formerly lined the shore, and of the northern mole which enclosed the harbour. Moreover to the E., at the mouth of the river Bagrada, and some few miles beyond the mouth of the city is covered with ruins. Near its coast the sea is held up by the innermost reaches of the Bay of Carthage, in which ancient Utica was situated, and, as shown on the map of Creux, within the area of the town walls. On the declivity of the hills towards the SE. are the remains of six cisterns, or reservoirs, 136 feet long, 12 to 15 feet broad, and 20 to 30 feet deep, covered with a remarkably thin arched roof. These are connected with an aquaduct, which may have carried several millions of water from Bos-alater, in the direction of the hills; but its most remarkable remains are a treble row of arches by which it was carried over a ravine. These reservoirs may probably have served to furnish water for a manufactory in the neighbouring amphitheatres, which is hollowed out of the hills, and is capable of containing about 20,000 persons. The ancient site of the city is covered with ruins. Near its course rises the highest summit of the chain of hills on which stood the citadel and, probably, also the ancient temple of Apollo. The ruins of other temples and castles have been discovered, as well as the site of the senate house (Pinct. Cat. Mira. 67), which has been thought to be determined by the excavations of a number of statues. These are now preserved in the museum at Leggia.

In the course of time, as is usual with such connections, Utica became severed from the mother-city, and first appears in history as independent of it. In the first commercial treaty between Rome and Carthage, in the year 509 B. C. Utica was probably included in it among the allies of the Carthaginians (Polyb. iii. 23); in the second, in n. c. 348, it is expressly named (Str. 24; Dio. lxxvi. 9, who however confounds the two treaties), as well as in the alliance concluded by Hannibal with Philip of Macedon in the Second Punic War, n. c. 215 (Polyb. viii. 9). Subsequently, however, Utica appears to have thrown off her dependence upon it, or perhaps we should rather
UTICA.
call it her alliance with, Carthage, and, with other cities of N. Africa, to have joined the Sicilian Agathocles, the opponent of Carthage; to have afterwards revolted from that conqueror, but to have been again reduced to obedience (Diod. xx. 17, 54; cf. Polyb. i. 69.). In the First Punic War, Utica remained faithful to Carthage; afterwards it joined the Libyans, but was conquered and destroyed by the marching forces of Hannibal (Polyb. 50. 88; Diod. Fr. xxxv.). In the Second Punic War also we find it in firm alliance with Carthage, to whose fleets the excellent harbour of Utica was very serviceable. But this exposed it to many attacks from the Romans, whose freebooting excursions were frequently directed against it from Lilybaeum, as well as to a more regular, but fruitless siege by Scipio himself (Liv. xxi. 37, xxv. 5, xvii. 4, xxiv. 35, xxx. 3, &c.; Polyb. xiv. 2; Appian, Pun. 16, 25, 30). In the third war, however, the situation of Carthage being now hopeless, the Uticenses indulged their ancient grudge against that city, and made their submission to Rome by a separate embassy (Polyb. xxxv. 1; Appian, Pun. 119, 118). This step greatly increased the material prosperity of Utica. After the destruction of Carthage, the Romans presented Utica with the fertile district lying between that city and Hippo Diarrhytus. It became the chief town of the province, the residence of the Roman governor, the principal emporium for the Roman commerce, and the principal emigration of the Greek colonists destined to act in the interior of Africa. Owing to this intimate connection with Rome, the name of Utica appears very frequently in the later history of the republic, as in the accounts of the Jugurthine War, of the war carried on by Pompey at the head of Sulia's faction, against the Marian party under Dominus and his ally the Numidian king Juba, and also in the conflict of Utica and the Pruth (cf. Uberti, iii. pt. ii. p. 620.) [T. H. D.]

UTIDAUA (Obiriadu, Ptol. viii. 8. § 7.), a town in Dacia, E. of the Aluta. Identified with the ruins at Komna, near the confluence of the Kutschchen and the Pruth (cf. Uberti, iii. pt. ii. p. 620.). [T. H. D.]

UTII (Obrien), one of the nations belonging to the fourteenth satrapy of the Persian empire (Herod. iii. 99), which was armed in the same manner as the Pactyces (Id. vii. 69.), and, according to Bobrius' conjecture, perhaps dwelt in Pactyces. (Geog. des Herod. p. 181.)

UTUS or VITUS (Montone), a river of Gallia Cisalpina, which rises in the Apennines, flows under the walls of Forti (Forum Livii), and subsequently by the city of Ravena, and enters the Adriatic about 5 miles from that city. At the present day it joins the Ronco (the Bedolina of Pliny), before reaching the latter city, but in ancient times it probably discharged itself by a separate channel into the lagoon which at that time surrounded Ravena. The name is written Vitis by Pliny (iii. 14. a. 19), but it is probable that Utus or Utene is the more correct form, which is found in Livy. According to that author it at one time formed the boundary between the Boian and Scenonian Gauls. (Liv. v. 35.)

UTTARIS, a town of the Calladai in the NW. of Hispania Tarraconensis, on the road from Lucus Augusti to Asturica, between Pons Nerviae and Bergidum. (Itin. Ant. pp. 425, 430.) Variously identified with Curreda, Donosco, and Castro de la Venta. [T. H. D.]

UTUS, an affluent of the Danube in Moesia. The Usus had its sources in Mount Haemus, and formed the E. boundary of Dacia Ripensis (Plin. iii. 36. a. 29). Now the Vid. [T. H. D.]

UTUS (Oberos, Procop. de Aed. iv. 1.), a town of Moesia Inferior, a little to the S. of the confluence of the like-named river with the Danube, and between Oescus and Saurisca (Itin. Ant. p. 321). Various identified with Scricostica, Butalusica, or a place near Breitenau. [T. H. D.]

VULCANI FORUM. [PUTZELI]

VULCANIAE INSULAE. [AVOLIARE INSULAE.]

VULCALMO is mentioned by Cicero (pro Fonteio, 9) as a place in the west coast of Gallia Narbonensis, but nothing more is known of it. [G. L.]

VULGENTIUS. [APTE J. JULIA.]

VULSINII. [VULSINI.]

VULTUR MONS (Monte Voltoire), one of the most celebrated mountains of Southern Italy, situated on the confines of Apulia, Lucania, and the country of the Hirpini. It commences about 5 miles 4 q
to the S. of the modern city of Melita, and nearly due W. of Venusia (Venusia), and attains an elevation of 4,433 feet above the level of the sea. Its regular conical form is isolated in position, as well as the crater-like basin near its summit, at once mark it as of volcanic origin; and this is confirmed by the nature of the rocks of which it is composed. Hence it cannot be considered as properly belonging to the range of the Apennines, from which it is separated by a tract of hilly country, forming as it were the base of a shield of the ranges of Monte Velino rises. No ancient author alludes to the volcanic character of Mount Vulture; but the mountain itself is noticed, in a well known passage, by Horace, who must have been very familiar with its aspect, as it is a prominent object in the view from his native city of Venusia. (Caesar. iii. 4. 9—16.) He there terms it "Vultur Apulius," though he adds, singularly enough, that he was without the limits of Apulia ("alia sit extra limines Apuliae") when he was wandering in its woods. This can only be explained by the circumstance that the mountain stood (as above stated) on the confines of three provinces. Lucan also incidentally notices Mt. Vulture as one of the mountains that directly fronted the plains of Apulia. (Natural History, iv. 153.)

The physical and geological characters of Mount Vulture are noticed by Romanelli (vol. ii. p. 333), and more fully by Danbury (Description of Volcanoes, chap. 11). [E. H. B.]

**VULTURNUM (Οὐλτούρνον: Castel Volturino),** a town of Campania, situated on the sea-coast at the mouth of the river of the same name, and on its S. bank. There we trace the existence of at least two towns on the site previous to the Second Punic War, when the Romans constructed a fortress (castellum) at the mouth of the river with the object of securing their possession of it, and of establishing a magazine of corn for the use of the army that was besieging Capua. (Liv. xxvi. 20, 22.) It is probable that this town continued to exist under Roman citizens and was surrounded by a wall; but in a. c. 194, a colony of Roman citizens was established there, at the same time with Liternum and Puteoli. (Id. xxv. 45; Varr. L. L. v. 5.) The number of colonists was in each case but small, and Vulturnum does not appear to have ever risen into a place of much importance. But it is noticed by Livy as existing as a town in his time ("vid. Velturnum, ubi nunc urbs est," xv. 21), and is likewise mentioned by all the geographers. (Strab. v. p. 338; Pline, iii. 5. 9; id. ii. 4. § 9; Ptol. iii. 1. § 6.) We learn also that it received a fresh colony under Augustus (Lid. Colos. p. 339), and retained its colonial rank down to a late period. It became an episcopal see before the close of the Roman Empire, and appears to have continued to subsist down to the 9th century, when it was destroyed by the Saracens. In the 17th century a new fortress was built nearly on the ancient site, which is called Castel Volturino or Castello Mare di Volturino. But from the remains of the ancient city still visible it appears that this occupied a site somewhat nearer the sea than the castellum. Several inscriptions have been found on the spot, which attest the colonial rank of Vulturnum as late as the age of the Antonines. (Monumes, I. R. N. 3535—3539.) [E. H. B.]

**VULTURNUS (Οὐλτούρνον: Volturino),** the most considerable river of Campania, which has its sources in the Apennines of Samnium, about 5 miles S. of Andesina, flows within a few miles of Ascensia on its left bank, and of Venusium on its right, thence pursues a SE. course for about 29 miles, till it receives the waters of the Calore (fossa), after which it turns abruptly to the west passes under the walls of Casilinum (Cessenoli), finally discharges itself into the Tyrrhenian about 30 miles below that city. Its mouth is marked in ancient times by the town of the same name (Vulturium), the site of which is occupied by the modern fortress of Castello mare inserted between the mouths of Volturno and Calore. (Strab. v. p. 339; Pline. iii. 5. 9; id. ii. 4. § 9.) The Volturna is a deep and rapid, but turbid stream, whose character we find many allusions in the poets. (Virg. Aen. vii. 729; Ovid. Met. xxv. 714; Lucan. i. 428; Claudian. Paeon. Proem. 256; Sil. Ital. vii. 530.) A bridge was built over it close to its mouth by Domitian, who constructed the Via Domitiana that led from Rome direct to Cumae. (Stat. Silv. iv. 3. 67.) At the important position that the Volturna holds in Campania, the fertile plains of which it traverses in their whole extent from the foot of the Apennines to the sea, its name is frequently mentioned in history, especially during the wars of the Romans against Samnium and Sametia, and during the Second Punic War. (Liv. xii. 30. 18—xxii. 14, &c.; Polyb. iii. 92.) Provisions were collected at the construction of the bridge above mentioned, conserved, and stored in the Second Punic War. (Liv. xii. 30. 18—xxii. 14, &c.; Polyb. iii. 92.) This was to be the Volturno, for which the site was still visible in modern Castel Volturino, there was a bridge below Casilinum, where it was crossed by Appius. It appears to have been in ancient times the boundary between the lands of Hirpina and Beneventum, and the second Punic War. (Liv. xii. 9; Stat. Silv. iv. 3. 7.) Its only considerable tributary is the Cocogna which gives it the water of several streams, of which the most important streams to the Marus and Sabatine. These combined streams bring down to the Volturna almost the whole of the land of Hirpina, and here Calore is at the point of juncture near its magnitude to the Vulturnus itself. [E. H. B.]

**VUNGUS, VICUS,** in North Gallia, a place of the Antonine Itin. on the road from Ducuturnum (Reims) to Augusta Trevirorum (Trèves). It is situated between Burdurcororum and Epoucan (Bourges), or Epoucan (Evreux), and in the limits of the land of Vungus from the roads and the Peel from the roads and the Peel. From Reims is to the passage of the Modern Messon at Meuse, and before it reaches from Reims brings us to a place named Vos, near the town Aisne, a little above Attille. This is a pit example, and there are many in France, of the Gallic names continuing unchanged. From the history of Reims, speaks of "Municipum Vungum," and the "Pagnus Vungisia circa Aisina ripas." The Aisnsina in the Aisne. The route road may be traced in several places between rams and Vos; and there is an indication of this river the name the place named Vungus (de stratis) of the passage of the river Vungus. [G. L.]

**UXAMO,** a town belonging to the Cornubi, in Britton Hestoura, on the river Derwa to Lodoninum, and between Leucon and Pennicourn. Camden (p. 653) and other identify it with Oknangia, a village in Surmari; Horsey (p. 419) and others with Surf Hales. [T. H. B.]

**UXAMA** (Οὐκαμα Αργυλλης, Pat. ii. 6) of a town of the Arvaci in Hesypia Tarentum.
UXAMABARCA.

the road from Asturica to Cesararangusta, 50 miles W. of Numantia, and in the neighbourhood of Cuenca (Tib. Ant. p. 441), where, however, the more recent editions read Vassara. (Plin. iii. 3. a. 4; Flor. iii. 22; Sil. Itali. iii. 384.) It is called Uxuma in the Geogr. Rav. (iv. 43); and according to Ukert (ii. pt. i. p. 453), is probably the ʿAţlun of Appian (iv. 42). Present position: it seems to have been the town of [T. H. D.]

UXAMABARCA (Οικογενεσίς, Πεδ. ii. 6. § 53), a town of the Autrigones in Hispania Tarraconensis. (M. Inscr. p. 1095. 8.) Ukert (ii. pt. i. p. 446) identifies it with Omes in Bisacoga. (T. H. D.)

UXANTIS INSULA, for so the name should be read in the Maritime Itin., is Liny's Azantos (iv. 30), an isle off the Atlantic coast of Gallia. Ukert identifies it with Ouest, or Uxand, as the English often write it, a small island belonging to the department of Finistere, and nearly in the latitude of Brest. (G. L.)

UXELLA (Οικογενεσίς, Πεδ. ii. 3. § 10), called by the Geogr. Rav. (v. 30) Uxell, a city of the Dumnonii in Britannia Romana. Camden (p. 18) identifies it with Uxellum, near the town of Devonport. Conwardly tells Herdley (p. 378) and others take it to be Exeter. (T. H. D.)

UXELLODUNUM, in Gallia. In s. c. 51 Drappes a Senon and Lucetius a Cadurcan, who had given the Romans much trouble, being pursued by C. Cninius Bebinus, one of Caesar's legates, took refuge within the little town of Uxellodunum, in Cornovia (B. G. viii. 32-44): Uxellodunum was in a position naturally strong, protected by rocks so steep that an armed man could hardly climb up, even if no resistance were made. A deep valley surrounded nearly the whole elevation on which the town stood, and a river flowed at the bottom of the valley. The interval where the river did not flow round the site of the town. Close to the wall was a large spring, which supplied the town during the siege, for the inhabitants could not get down the rocks to the river for water without risk of their lives from the Roman missiles. Caelius began his blockade of Uxellodunum by making the spring, which was of purely artificial origin, gradually a valley from each camp, and surrounding the place. The river side the camps were of course separated from the town by the deep valley in which the river flowed; he may have planted two camps here and one on the land side of Uxellodunum.

The townsmen remembering what had happened at Alesia the year before, sent out Lucetius and Drappes to bring supplies into the place. Lucetius and Drappes took all the fighting men for this purpose except 2000, and they collected a large quantity of corn; but as Lucetius was attempting to carry it into the town by night, the Romans surprised him, and cut his men to pieces. The other part of the force with him had gone out was with Drappes about 12 miles off. Cænius sent his cavalry and light German troops against Drappes to surprise him, and he followed with a legion. His success was most complete. Drappes was taken prisoner and his force destroyed or captured. Cænius was now enabled to go on with his circumvalation without danger within, and C. Fabius arriving the next day with his troops undertook the blockade of part of the town.

Caesar hearing the news about Uxellodunum and resolving to check all further risings in Gallia by one signal example more, hurried to the place with all his cavalry, ordering C. Calenus and two legions to follow him by regular marches. He found the place shut in, but it was well supplied with provisions, as the deserters told him; and there remained nothing to do but to cut off the townsmen from the water. By his archers and slingers, and by his engines for discharging missiles (tormentas) placed on the sites parts of the town where the descent to the river was easiest, he attempted to prevent the enemy from coming down to the river to get water. His next operation was to cut them off from the spring, and this was the great operation of the siege on which depended the capture of the town. Caesar dealt with his enemies as a doctor with a disease—a operation, he said, was first necessary. (Frontius, Stat. iv. 7. 1.) He moved his vixine towards that part of the town where the spring lay under the wall, and this was the isthmus which connected the hill fort with the open country. He also began to construct mounds of earth, while the townsmen from the higher ground annoyed the Romans with missiles. Still the Romans pushed on their vinea, and the dragnet at the same time began to form mines (cuniculi) to reach the source of water and draw it off. A mound of earth 9 feet high was constructed, and a tower of ten stories was placed upon it, not high enough to be on a level with the top of the wall, but high enough to command the summit level of the spring. Thus the stream which reached the spring, and a great number of cattle, horses, and men died of thirst. The townsmen now tumbled down blazing barrels filled with fat, pitch, and chips of wood, and began a vigorous onset to prevent the Romans from quenching the flames; for the burning materials being stopped in their descent by the vinea and mounds, set the Roman works on fire. On this Caes.). (Frontius, Stat. iv. 7. 1.) He moved his vixine towards that part of the town where the spring lay under the wall, and this was the isthmus which connected the hill fort with the open country. He also began to construct mounds of earth, while the townsmen from the higher ground annoyed the Romans with missiles. Still the Romans pushed on their vinea, and the dragnet at the same time began to form mines (cuniculi) to reach the source of water and draw it off. On this Caes.)
UXELLODUNUM.

UXANTHUS.

COIN OF UXENTUM.

UXENTUS (πρὸ Ἑφεσοῦ, Ptol. vii. 1. §§ 24, 76), a chain of mountains in the Decens of Indus, between lat. 29° and 24° and long. 136° and 143°, probably those called Gousemona. They formed the watershed between rivers which flowed into the Bay of Bengal, as the Adamas, Dosearon and Tyndis. [V.]

UXII (Οξηστός, Arrian, Anab. iii. 17; Strab. x. p. 524, xv. pp. 799, 744), a tribe of ancient Persia, who lived on the northern borders of that province between Persis and Susiana, to the E. of the Pasi- tirges and to the W. of the Orontes. They were visited by Alexander the Great on his way from Susiana to the capital town, Uxii (Strab. x. p. 744), was the scene of a celebrated siege, the details of which are given by Arrian and Curtius. It has been a matter of considerable discussion where this city was situated. The whole question has been carefully examined by the Baron de Bode, who has personally visited the localities he describes. (Geogr. Journ. xiii. pp. 108—110.) He thinks Uxia is as present represented by the ruins near Shihabzahi-Saleimand in the Bakhtiyari Mountains, to the E. of Shuster. [V.]

UX, a district of Western Asia, to which the prophet Job belonged. (Job, 1. 1.) It cannot be certainly determined where it was; hence, learned men have placed it in very different localities. Wine, nothing but wine, is examined. Let us place it in the neighbourhood of Edom, adjoining Arabia and Chaldaea. (Biblisch. Realwörterb. s. a. Us.) The people are perhaps represented in classical geography by the Aboar or Aboara of Ptol.
which is much too great. (Comp. Steph. B. s. v.; 

Ptol. v. 3 § 5; Mela, i. 15; Polyb. xxvi. 7.) This
famous city was twice destroyed, on each of which
occasions its inhabitants defended themselves with
uncharacteristic valor. The first catastrophe befell
the city in the reign of Cyrus, when Harpagus besieged
it with a Persian army. On that occasion the Xan-
thians buried themselves, with all they possessed,
under the ruins of their city. (Herod. i. 176.) After
this event the city must have been rebuilt; for
during the Roman civil war consequent upon the
murder of Julius Caesar, it was among the first
cities the army of Brutus, as its inhabitants refused to open
their gates to him. Brutus, after a desperate strugg-
gle, took the city by assault. The Xanthians con-
tinued the fight in the streets, and perished with
their wives and children in the flames, rather than
submit to the Romans. (Dion Cass. xlvii. 34; 
Appian, E. C. C. iv. 18, foll.) After this catastrophe,
the city never recovered. The chief buildings at
Xanthus were temples of Sarpedon (Appian, l. c.),
and of the Lycian Apollo. (Diod. v. 77.) At a
distance of 60 stadia down the river and 10 stadia
from its mouth, there was a sanctuary of Leto
on the bank of the Xanthus. (Strab. l. c.) The
site of Xanthus is unquestionably still visible,
though not so well-preserved and described by Sir C. Fellowes in his
Excursion in Asia Minor, p. 225, foll. (comp.
his Lycia, p. 164, foll.) These ruins stand near
the village of Koyuk, and consist of temples, tombs,
triangular arches, walls, and a theatre. The site,
says Sir Charles, is extremely romantic, upon
beautiful hills, some crowned with rocks, others
rising level; but the river does not appear to have been very large, but its remnants show
that it was highly ornamented, particularly
the tombs. The architecture and sculpture of the
place, of which many specimens are in an excellent
state of preservation, and the inscriptions in a pecu-
lar alphabet, have opened up a page in the history
of Asia Minor, previously quite unknown. The en-
gravings in Fellowes's works furnish a clear idea of
the high perfection which the arts must have at-
tained at Xanthus. (See also Spratt and Forbes,
Travels in Lycia, i. p. 5, and ii., which contains an
excellent plan of the site and remains of Xanthus;
E. Braun, Die Marmorwerke vom Xanthos in Lycia,
A large collection of marbles, chiefly sepulchral,
discovered at Xanthus by Sir C. Fellowes, and
brought to England in 1842 and 1843, has been
arranged in the British Museum. Of these a full
account is given in the Supplement to the Penny

XANTHUS (Xanths), an important river in the
W. of Lycia, which is mentioned near in Homer
(II. ii. 877, v. 479), and which, according to Strabo
(xiv. p. 665), was anciently called Sirbas, that is in
Phoenician and Arabic "reddish yellow," so that
the Greek name Xanthus is only a translation of
the Semitic Sirbas or Zirba. The Xanthus has its
sources in Mount Taurus, on the frontiers between
Lycia and Cilicia. Two main streams, the one in a SW.
direction through an extensive plain (Xanthos
velox, Herod. i. 176), having Mount Bragus on the
W. and Masaicyote on the E., towards the sea, into
which it discharges itself about 70 stadia S. of
the city of Xanthus, and a little to the NW. of Pina.
(Herod. l. c.; Ptol. v. 3 § 2; Dion. Per. 848; Or.
Max. l. x. 645; Mela, l. 15; Plin. v. 26.) Note the
Estian or Euxine (Fellowes, Lycia, pp. 153, 278.)
Respecting Xanthus as a name of the Trojan river
Scamander, see Scamander. [L. S.]

XANTHUS. [BOTHROUTUM.]

XANTHUS (Xanthos, Arrian, Anatol. vi. 15), a tribe
of free Indians. It is said by Strabo as dwelling along
the banks of the Hydrosatos (τρυσσίτης) in the Pamfylia.
There can be little doubt that they derive their
name from the Indian caste of the Kakataryna. [V.]

XENAGORAE INSULAE (Χεναγοραί ἦφαιστος),
according to Plynve (v. 35), a group of eight small
islands off the coast of Lycia, which the Badianus
(§ 218) states was located 60 stadia W. of Patara. They are commonly identified with a group of
islands in the bay of Kalamoski. [L. S.]

XENIPPA, a small place in the NE. part of
Sogdiana, noticed by Curtius (viii. 2 § 14); perhaps
the present Uruppa. [V.]

XEROGYPSYS (Χερόγυψος, Anna Comm. vii. 11,
pp. 378, Bonn), a small river in the SE. of Thrace,
which falls into the Propontis, not far from Parin-
thus. In some maps it is called the Erginus, upon
the authority of Mela (ii. 2). [J. R.]

XERXENIE (Χερξινία, Strab. vi. p. 558), a distric
the on the Euphrates, in the NW. part of Arme-
ia, more properly, however, belonging to Cappad-
cicia. It is called Deraces by Plynve (v. 24. a. 30),
and this perhaps is more correct. (Cf. Ritter, Erd. x. p. 769.)

XIMEINE (Χιμηνία), a district in the most southern
part of Pontus, on the Halys, and near the frontiers
of Cappadocia, was celebrated for its salt-works.
(Strab. xii. p. 561.)

XION (Xion), Scylax, p. 53), a river on the W.
coast of Libya. [T. H. D.]

XIPHONIUS PORTUS (Χιφωνιος ὁμοφή, Scyl.
p. 4: Bay of Augustus), a spacious harbour on the
E. coast of Sicily, between Catana and Syra-
cusia. It is remarkable that this, though one of the
largest and most important natural harbours on the
coasts of Sicily, is rarely mentioned by ancient
authors. Scylax, indeed, in the only writer who has
preserved to us its name as that of a port. Strabo
speaks of the Xiphoniou Prosymontory (θησός Χιφω-
νιας ἐπιστρατος, vi. p. 267), by which he evidently
means the projecting headland near its entrance, now
called the Gopo di Santa Croce. Diodorus also
mentions that the Carthaginian fleet, in b. c. 263
touched at Augustos on its way to Syracuse, the
Pasiphae, xxiii. 4. p. 502). None of these
authors allude to the existence of a town of this
name, and it is probably a mistake of Stephans of
Ryzantium, who speaks of Xiphoia as a city
(καισ. et.). The harbour or bay of Augustus is a spa-
gious gulf, considerably larger than the Great Har-
bour of Syracuse, and extending from the Cape of
Santa Croce to the low peninsula or promontory of
Magnais (the ancient Thapsus). But it is possible
that the port designated by Scylax was a much
smaller one, close to the modern city of Augusta,
which occupies a low peninsula point or tongue of
land that projects from near the N. extremity of
the bay, and strongly resembles the position of the
island of Ortigia in Syracuse; it is approximately
quite separated from the mainland. It is very sin-
gular that so remarkable and advantageous a situa-
tion should not have been taken advantage of by
the Greek colonists in Sicily; but we have no trace
of any ancient town on the spot, unless it were the
site of the ancient Megara. [Megera.] The modern
town of Augustas, or Agostas, was founded in the 13th
century by Frederic II. [E. E. B.]
XOIS (Xois, Strab. xvii. p. 802; Ptol. iv. 5. § 50; Hes., Steph. B. s. v.), a town of great antiquity and considerable size, was situated nearly in the centre of the Delta, upon an island formed by the Schenumitic and Phaniteic branches of the Nile. It belonged to the Sikelmyric Nome. The 14th dynasty, according to Manetho, consisted of 76 Xoite kings. This dynasty immediately preceded that of the shepherd kings of Egypt. It seems probable, therefore, that Xois, from its strong position among the marshes forming branches of the river, held out during the occupation of the Delta by the Hyksos, or at least compromised with the invaders by paying them tribute. By some geographers it is supposed to be the Paphresia of Herodotus (i. 59, iii. 12). Champollion (Egypte sous les Pharaones, vol. ii. p. 214) believes its site to have been at Suk-dr, which is the Arabian synonym of the Coptics Xêsos and of the old Egyptian Shkoe (Niebuhr, Travels, vol. i. p. 75.), the road from Tamiathis to Memphis passed through Xois. [W.B.D.

XYLENÓPOLIS, a town said by Pline, on the authority it would seem of Onesicritus or Nearchus, to have been founded by Alexander the Great (v. 23. a. 26). It must have been in the southern part of Sicily; but its position cannot be recognized, as Pliny (iv. 6. 6) places it on the Phœnician coast. The author to whom he refers did not say on what river it was situated. [V.J.

XYLLICENSES (of Rhodesian Alburnae, Ptol. iv. 6. § 23), an Athenian people in Libya Interior, between the mountains Arangas and Araltus. [T.H.D.

XYLINE COME, a village in Psidias, between Corbara and Termessus, is mentioned only by Livy (xxxii. 19). A place called Xylino, in the country of the Cissiata in Pontus, is noticed by Pline (v. 6. § 6). [L.

XYLOPOLIS (Xédrakoi), a town of Mygdonia in Macedonia (Ptol. iii. 13. § 36), whose inhabitants, the Xypolitae, are mentioned by Pline also (iv. 10. a. 17).

XYNAEA or XYNAEAE (Xýnias, Ekh. Héraklés), a town near the southern confines of Thessaly, and the district of the Aetolians (Liv. xxxiiii. 3), which gave its name to the lake Xynias (Xýnias), which Stephanus confounds with the Boebeis (Apollon. Rhod. l. 67.; Catull. xxiiii. 287.; Steph. B. s. v. Evvia). Xynia, having been deserted by its inhabitants, was plundered by the Aetolians in b. c. 198 (Liv. xxxiiii. 19). In the following year Flamininus arrived at this place in three days' march from Heraclea (Liv. xxxiiii. 3; comp. Liv. xxxix. 26). The lake of Xynias is now called Tamkhd, and is described as 6 miles in circumference. The site of the ancient city is marked by some remains of ruined edifices upon a promontory or peninsula in the lake. (Leake, North ern Greece, vol. i. p. 460, vol. iv. p. 517.)

XYPHÈTE (Attica, p. 325, a. 17).

ZABA (Zedón), a small place on the northern coast of Taprobane or Ceylon, noticed by Ptolemy (vii. 4. § 13). It has not been identified with any modern site. [V.J.

ZABAE (Zèdavt, Ptol. i. 14. §§ 1, 4, 6, 7, viii. 2. § 6, viii. 27. § 4), a town of some importance in India, near Guagem, on the sinsus Gangueucus, perhaps the modern Ligur. [J.R.

ZABATUS (Zèdroros), a river of Assyria, first noticed by Xenophon (Amb. ii. 3. § 1, iii. 3. § 6), and the same as the Lykos of Ptolomy (v. 51),

ZACYNTHUS (Zakynthos: Ekh. Zakynthos), an island in the Sicilian sea, lying to the western coast of Peloponnesus, opposite the promontory Chelonatas in Elys, and to the S. of the island of Cephalonia, from which it was distant about 20 miles according to Pline, (iv. 12. a. 19) but according to Strabo, only 60 stadia (a. 458). It was a very nearly correct, the real distance was 36 stadia, according to Ptolomy, and 36 stadia, according to Strabo at 160 stadia; but the sea is at least 50 miles round, its greatest length 23 English miles. The island is said here, as originally called Hyriss (Ptol. l. c.) and later on colonized by Zacynthus, the son of Deucalion, Poepis in Arcadia, whence the scytia of the ancients was named. (B. G. 1. iii. § 3.) Zacynthus was named Poepis. (B. G. 1. iii. § 3.) We have the expression of Thucydides that the Zacynthians were the colony of Achaeans from Peloponnesus (b. c. 661.), Homer, who gives the island the epithet of Phthia (βατοκερατεια), Zacinthus farms part of Eyleus. (I. i. 634. 64. i. 246. 24. xvi. 133, 250; Strab. x. p. 437.) It was to have attained considerable importance in the period; for according to a very ancient account the Zaguntum in Spain was founded by the Zacynthian in conjunction with the Rutuli of Arde (I. i. 7; Plin. xvi. 40. a. 79; Strab. iii. p. 158). Beka stated that Zaguntum was founded by the Scythians 200 years before the Trojan War (c. 3. l. c.). In consequence probably of their origin, the Zacynthians were hostile to the Lacedæmonians, and hence we find that forces were sent for refuge to this island. (Herod. vii. 79. a. 1.) In the Peloponnesian War the Zacynthians made war with Athens (Thuc. ii. 7, 9); and is c. 430. in Lacedæmonians made an unsuccessful attempt to capture the city. (I. a. 66.) The Athenians were defeated against Pyrus found Zagynthus a permanent station for their fleet. (I. i. 57.) The Zacynthians are enumerated among the allies of Athens in the Sicilian expeditions. (I. a. 57.) After the Peloponnesian War, Zagynthians have passed under the supremacy of Sparta, in c. 374, Timotheus, the Athenian commander, on his return from Corycia, landed some Lacedæmonians on the island, and established a fortified post. These must have belonged to the Spartan party; for the Zacynthian government applied for help to the Spartans, who sent a fleet to Zagynthians. ( Xen. Hell. vi. 2. § 3; Diod. v. 45. seq.; as to the statements of Diodorus, see Hist. of Greece, vol. x. p. 192.) The Zacynthians
ZACYNTHUS.

ZALECUS.

assisted Dion in his expedition to Syracuse with the view of expelling the tyrant Dionysius, n.c. 357. (Diod. xvi. 6, seq.; Plut. Dion. 22, seq.). At the time of the Roman wars in Greece we find Zaczynthus in the possession of Philip of Macedon. (Polyb. v. 102.) In n.c. 211 the Roman praetor M. Valerius Laevinus, took the city of Zaczynthus, with the exception of the citadel. (Liv. xxvi. 24.) It was afterwards restored to Philip, by whom it was finally surrendered to the Romans in n.c. 191. (Id. xxxvi. 32.) In the Mithridatic War it was attacked by Archelaus, the general of Mithridates, but he was repulsed. (Appian, Mithr. 45.) Zaczynthus subsequently shared the fate of the other Cilician islands, and is now subject to Great Britain.

The chief town of the island, also named Zaczynthus (Liv. xxvi. 14; Strab. x. p. 458; Pol. iii. 14, § 13), was situated upon the eastern shore. Its site is occupied by the modern capital, Zante, but nothing remains of the ancient city, except a few columns and inscriptions. The situation of the town upon the margin of a semi-circular bay is very picturesque. The citadel probably occupied the site of the modern castle. The beautiful situation of the city and the fertility of the island have been celebrated in all ages (αἰσθ Δήλου & Ζάκυνθου, Theor. Id. iv. 32; Strab. Phil. ii. cc.). It no longer deserves the epithet of "woods," given to it by Homer (Iliad. viii. 510), for "mountains of Zaczynthus," (Aes. iii. 270); but its beautiful olive-gardens, vineyards, and gardens, justify the Italian proverb, which calls Zante the "flower of the Levant."

The most remarkable natural phenomenon in Zante is the celebrated pitch-wells, which are accurately described by Strabo (v. vi. 44, § 4; Strab. xii. p. 593), the central portion of the great chain of mountains which, extending in a direction nearly N. and S. with an inclination to the W. at the upper end, connects the mountains of Armenia and the Caucasus with those of Susiana and Persia. It separates Asyria from Media, and is now represented by the high and southern portion of the mountains of Kurdistan, the highest of which is the well known Rovandus. Near this latter mountain was the great highroad which led from Asyria and its capital Nineveh to Media, and, at its base, was in all probability the site of the pass through the mountains, called by Ptolemy (vii. p. 266), Ἐκτρυπος (xii. 7), and by Strabo, Ἐκτρυπος (xi. 595). Polybius notices the difficulty and danger of this pass (v. 44), which, from Colonel Rawlinson's narrative, would seem to have lost none of its dangers (Rawlinson, in Trans. Geogr. Soc. vol. x, Pass. and Pillar of Keli-Shah). [V.]

ZAITHA or ZAUTHA (Ẓâtha, Zosim. iii. 17), a small town or fortified place in Mesopotamia, on the Euphrates, to the SE. of Circiumas. It is said by Ammianus to have been called Zaitha (or more properly Zaita) from the olive trees (xxiii. 5, § 7), which we must suppose grew there, though the climate is very hot for that tree. It adds that it was celebrated for the monument erected by the soldiers to the emperor Gordianus. Zaitha, on the other hand, places this monument at Dara (I. c.), in which Eukryptus agrees with him (ix. 2). Ptolemy calls it Zeita (Zeita, v. 18, § 2). [Dura.] [V.]

ZALACUS (Ẓâlakos, Ἡλακος, Pol. iv. 2, §§ 14, 19), a mountain chain of Mauretania near the river Chimala, the highest and most rugged branch of the Atlas in this neighbourhood. Now the Dra-wad-nass-wres or Guenoeus. (Cf. Shaw, Travels, i. p. 74.) [T. H. D.]

ZAŁDAPA (Ẓâlāputation, Procop. de Aed. iv. 11, p. 308), a town in the interior of Lower Moea. It is called Zaladaga by Theophylact (Ẓâlāputation, i. 8), and Zeldapa by Hierocles. (Ẓâlāputation, p. 637; Zaladaga, Zeldapa. [V.]

ZALECUS (Ẓâlakos, or Ἡλακος, in Pol. iv. 4, § 3), a small river on the coast of Paphlinonia, discharging itself into the Euxine at a distance of 210 stadia west of the Halys. (Marcian. p. 73.) At its mouth there was a small town of the same name, about 90 stadia from Zagorus, or Zorourum (Anon. 4 q 4.)
ZALICHES.

Peripl. P. E. p. 9); and this place seems to be the same as the one mentioned in the Peut. Table under the corrupt name of Halego, at a distance of 25 Roman miles from Zacorla. Hamilton (Rasserecires, i. p. 229) identifies the site of Zaliches with the modern Altachamy, where some ruins and massive walls are still seen.

ZALICHES (Zalaçhis), a town in the interior of Paphlaqonia, or what, at a late period, was called Hellenopontus, probably near some mountain forest, as Hierocles (p. 701) calls it Zadora Zalachis (Nov. scil. 29; Conc. Nicaen. i. p. 255, where a bishop of Zaliches is mentioned, and p. 163, from which it would seem that at one time the place bore the name of Leontopolis.)

ZAMA (Zuam melisus, Ptol. iv. 3. § 33), a town of Numidia, situated five days' journey to the SW. of Carthage. (Polyb. xv. 5; Liv. xxx. 29.) It lay between Sicca Veneria and Sufetula, and bore the name of "Ragia," where we find it erroneously written Zamegris in the Tab. Peut. Zama is particularly renowned as the scene of Scipio's victory over Hannibal in 201 B.C. It was a very strong place, and hence adopted as a residence by Juba, who brought his harem and his treasure hither, as to a place of safety. (Birt. B. Afr. 91; Vitruv. viii. 3. § 8.) Strabo mentions it as destroyed by the Romans, and as being in a ruinous state in his time (xviii. pp. 889, 881). But it must have been subsequently restored, since Pliny (v. 4. a. 4) mentions the Zaniades oppidum as a free city. It also appears in the Tab. Peut., and a bishop of Zama is mentioned by St. Augustine. (De Civ. Deo, vii. 15.) In an inscription in Graeco (364. 1) Zalichis is mentioned with the title of a colony (Col. Aelia Hadriana); though it is not mentioned as a colony in any of the ancient writers. It is the present Juma, SE. of Kass. (Cf. Dion Cass. xlviii. 23: Sall. J. 60, 61.)

ZAMA (Zāya), a town of the district of Canna-nena, in Cappadocia, on the borders of Galatia. (Cf. Dion Cass. xlviii. 23: Sall. J. 60, 61.)

ZAMAE FONS, a spring in Africa, probably near the town of Zama, which had the property of rendering the voice clear and strong. (Plin. xxxi. 2. a. 13.)

ZAMAZII (Zamaeius, Ptol. iv. 6. § 18), a people of Libya Interior. (Tab. Peut. 2. a. 13.)

ZAMENS OPPIDUM. (ZAMA.)

ZAMES (Zama, Ptol. vi. 7. §§ 30, 21), a mountain chain in the interior of Arabia Felix, which stretched as far as the borders of Arabia Deserta. It is probably the present Jabel Asered, or Imeraya. (T. H. D.)

ZANCLE. [MESSANA.]

ZAO PROMONTORIUM, a headland on the coast of Gallia Narbonensis, and east of Massilia (Mar-seille). Pliny (iii. 4), after mentioning Massilia says, "Promontorium Zaio, Cithariata Portus. Ego Camatullicorum. Dein Suelteri." It is not easy to identify Zaio. Uberti conjectures that it may be Bec de Sormion. In the Statistique du Dép. des Bouches du Rhône, it is supposed to be Cap de la Croixlette. This is a rocky coast, which has undergone little change for many centuries. (Uberti, Gréville, p. 120.)

ZAPAORTENI. [APARARTHICHE.]

ZARA (Zapgo), a town in the northern part of Armenia Minor, or perhaps more correctly in Pontus, on the road from Caesarea to Satala, and at the same time on that from Arzambius to Nicopolis. It still bears the name of Zara or Sara (cf. B. H. ii. pp. 182, 207, 213.)

ZARDADRUS (Zapadrius, Ptol. vi. 1. § 9), an upper portion of the Hyphasis, the seat of the modern Zadar of the modern Alatichom, where some ruins and massive walls are still seen.

ZALICHES (Zalaçhis), a town in the interior of Paphlaqonia, or what, at a late period, was called Hellenopontus, probably near some mountain forest, as Hierocles (p. 701) calls it Zadora Zalachis (Nov. scil. 29; Conc. Nicaen. i. p. 255, where a bishop of Zaliches is mentioned, and p. 163, from which it would seem that at one time the place bore the name of Leontopolis.)

ZAMA (Zuam melisus, Ptol. iv. 3. § 33), a town of Numidia, situated five days' journey to the SW. of Carthage. (Polyb. xv. 5; Liv. xxx. 29.) It lay between Sicca Veneria and Sufetula, and bore the name of "Ragia," where we find it erroneously written Zamegris in the Tab. Peut. Zama is particularly renowned as the scene of Scipio's victory over Hannibal in 201 B.C. It was a very strong place, and hence adopted as a residence by Juba, who brought his harem and his treasure hither, as to a place of safety. (Birt. B. Afr. 91; Vitruv. viii. 3. § 8.) Strabo mentions it as destroyed by the Romans, and as being in a ruinous state in his time (xviii. pp. 889, 881). But it must have been subsequently restored, since Pliny (v. 4. a. 4) mentions the Zaniades oppidum as a free city. It also appears in the Tab. Peut., and a bishop of Zama is mentioned by St. Augustine. (De Civ. Deo, vii. 15.) In an inscription in Graeco (364. 1) Zalichis is mentioned with the title of a colony (Col. Aelia Hadriana); though it is not mentioned as a colony in any of the ancient writers. It is the present Juma, SE. of Kass. (Cf. Dion Cass. xlviii. 23: Sall. J. 60, 61.)

ZAMA (Zāya), a town of the district of Canna-nena, in Cappadocia, on the borders of Galatia. (Cf. Dion Cass. xlviii. 23: Sall. J. 60, 61.)

ZAMAE FONS, a spring in Africa, probably near the town of Zama, which had the property of rendering the voice clear and strong. (Plin. xxxi. 2. a. 13.)

ZAMAZII (Zamaeius, Ptol. iv. 6. § 18), a people of Libya Interior. (Tab. Peut. 2. a. 13.)

ZAMENS OPPIDUM. (ZAMA.)

ZAMES (Zama, Ptol. vi. 7. §§ 30, 21), a mountain chain in the interior of Arabia Felix, which stretched as far as the borders of Arabia Deserta. It is probably the present Jabel Asered, or Imeraya. (T. H. D.)

ZANCLE. [MESSANA.]

ZAO PROMONTORIUM, a headland on the coast of Gallia Narbonensis, and east of Massilia (Mass- seille). Pliny (iii. 4), after mentioning Massilia says, "Promontorium Zaio, Cithariata Portus. Ego Camatullicorum. Dein Suelteri." It is not easy to identify Zaio. Uberti conjectures that it may be Bec de Sormion. In the Statistique du Dép. des Bouches du Rhône, it is supposed to be Cap de la Croixlette. This is a rocky coast, which has undergone little change for many centuries. (Uberti, Gréville, p. 120.)

ZAPAORTENI. [APARARTHICHE.]
ZELENIAUUM. 1337

Place consecrated to the worship of the goddess Aneas, to whom a temple was built there by the Persians in commemoration of a victory over the Sacae. The chief priest of this temple was regarded as the sovereign of Zela and its territory (Zeolw). Notwithstanding this, however, it remained a small place until Phrygian tribes overran the district, raised it to the rank of a city by increasing its population and extending its walls. Zela is celebrated in history for a victory obtained in its vicinity by Mithridates over the Romans under Triarius, and still more for the defeat of Pharnaces, about which Caesar sent to Rome the famous report "as real as Vidi. Vitruvius." (Pand. viii. 9; Plut. Cæs. 50; Dion Cass. xiii. 47, where the place is erroneously called Zelua; Hirt. Bell. Alex. 73, where it is called Zela; Plut. vi. 6 § 10 Hieroc. p. 701; Steph. B. s. v.) Zela was situated at a distance of four days’ journey (according to the Peut. Table 80 miles) from Tavium, and south-east of Amasia. The elevated ground on which the town was situated, and which Strabo calls the mound of Semiramus, was, according to Hirtius, a natural hill, but so shaped that it might seem to be the work of human hands. According to Hamilton (Researches, i. p. 306), it is a black-coloured isolated hill rising out of the plain, and now crowned with a Turkish fortress, which still bears the name of Zelua. [L. S.]

ZELENIAUUM. [Porciunium, p. 669, No. 4.]

ZELDEPA. [Zâldâpâ.]

ZELEIA (Zelua), a town of Troas, at the foot of Mount Ida and on the banks of the river Aeseus, at a distance of 80 stadia from its mouth. It is mentioned by Homer (J. ii. 834, iii. 103), who calls it Vidi; Vitruvius. (Pand. vii. 3; Apian. Mêl. xii. pp. 585, 587, 603; Steph. B. s. v.) Arrian (Anab. 11. 13) mentions it as the head-quarters of the Persian army before the battle of the Granicus: it existed in the time of Strabo; but afterwards it disappears. Some travellers have identified it with the modern Bija, between Bosporus and Sorrânia. [L. S.]

ZENOBII INSULAEE (Zenobiou onoia, Plut. vi. 7 § 47), seven small islands lying in the Sinus Satalites, at the entrance of the Arabian Gulf. (Cf. Arrian. Per. M. Eryth. p. 19.)

ZENODOTOUM (Zenobôtron, Dion Cass. xi. 12; Steph. B. s. v.), a strong castle in the upper part of Moscopolis, which was held by the Parthians during the war between them and the Romans under Crassus. It is called by Plutarch, Zenodotia (Cress. c. 17). It cannot be identified with any modern site, but it was, probably, not far distant from Edessa. [V.]

ZENONIS CHERSONESUS (Zenoonis Kephóris, Plut. iii. 5 § 49), a point of land on the N. coast of the promontory of Sinope. It is a promontory on the coast of Samothrace, probably the narrow tongue of Arabhat, between the Sea of Asof and the Parthian Sea. [T.H.D.]

ZEFYRE (Zeifyre), a small island off the promontory Sammuonium in Crete. (Plin. iv. 12. 20.)

ZEFYRIA. [HALCARMANUS.]

ZEFYRIUM (Zeîphîos), the name of a great mountain close to the N. extremity of the peninsula of Myndus in Caria, now called Gunmiche or Angeli. (Strab. xiv. p. 638.)

2. On the coast of Cilicia, between Cilicia Trachchia and Pedias, a little to the west of the town of Anchialae. (Strab. xiv. p. 671.) It contained a fort of the same name, and was 120 stadia from Tarsus, and 13 miles east of Soli. (Stadium. § 157; Tab. Peut.; comp. Scyl. p. 40; Plut. v. 8 § 4; Liv. xlix. 20; Plin. v. 22; Hieroc. p. 704.) When Pliny (xxiv. 50) states that the best molybdæna was prepared at Zephyrium, he no doubt alludes to this place, since we know from Dionys. Per. (v. 100) that the mineral was obtained in the neighbouring hill of Corycus, and that there it was of excellent quality. Leake (Asia Minor, p. 214) looks for it near the mouth of the river Martius.

3. On the coast of Cilicia, near the mouth of the river Calycedon. (Strab. xiv. p. 670; Plut. v. 8 § 4.)

4. On the coast of Paphlagonia, 60 stadia to the west of Cape Carmania. (Arrian, Peripl. P. E. p. 15; Anon. Peripl. P. E. p. 6; Plut. iv. 2 § 4.)

5. A town and promontory on the coast of Pontus, in the country of the Moesynes, 90 stadia to the west of Trispilia. (Plut. v. 6 § 11; Arrian, Peripl. P. E. p. 17; Syllax, p. 33; Anon. Peripl. P. E. p. 13.) The cape still bears the name of Zafra or Zebrakh, and Hamilton (Researches, i. p. 261) regards the modern Kdik LImam as occupying the site of the ancient Zephyrium. [L. S.]

ZEPHYRIUM PROMONTORIUM (Zeîphîos, Capo di Brussona), a promontory on the E. coast of the Bruttian peninsula, between Locri and the SE. corner of Bruttium. It is mentioned principally in connection with the settlement of the Lucanian colonists in this part of Italy, whose city then derives the name of Locri Epizephyrii. According to Strabo, indeed, these colonists settled in the first instance on the headland itself, which had a small port contiguous to it, but after a short time removed to the site of their permanent city, about 10 miles farther N. (Strab. vi. pp. 258, 270.) The Zephyrian Promontory is mentioned by all the geographers in describing the coast of Bruttium, and is undoubtedly the same now called the Capo di Brussona, a low but marked headland, about 10 miles N. of Cape Sportesiano, which forms the SE. extremity of the Bruttian peninsula. (Strab. ii. 13; Plut. iv. 6.) The cape still bears the name of Zafra or Zefrah. (Pand. vii. 3; Plut. iv. 6 § 10; Steph. B. s. v.)

ZEÎPHYRIUM (Zeîphîos, Kapou, Plut. iii. 17 § 5). 1. A promontory on the E. part of the N. coast of Crete, near the town of Apollonia. Now Ponta di Tegoni.

2. A promontory on the W. coast of Cyprus, near Paphos, probably the cape which closes the bay of Baffio to the W. (Plut. iv. 14 § 1; Strab. xiv. p. 683.)

3. A promontory in the E. part of Crete, 150 stadia to the W. of Daria. (Strab. xvii. p. 799, who attributes it to Marmaria; Plut. iv. 4 § 5; Stadium. M. Magni, § 47, 48.) Now Cape Derme.

4. Another promontory of Cyrenaica, with a harbor. (Strab. xiv. p. 885.)

5. A promontory near Little Taporisid in Lower Ascyry, having a temple of Arianoi-Aphrodite. (Strab. xvii. p. 800.) Hence goddess derived the epithet of Zephuritis (Zeûphûris, Athen. vii. p. 318, b); Callim. Æp. 31; Steph. B. s. v.)

6. A town of the Obronessian Taurica, mentioned only by Pliny (v. 8 § 4. 10.); Callim. Æp. 31; Steph. B. s. v.)

7. ZERNES (Zenon, Procop. de Aed. iv. 6. p. 266), a fortress in Upper Moesia, apparently the present Old Orusio, at the mouth of the Tremer. [T.H.D.]

ZEÎYTHUS (Zeîphithos, Lyceolphos. 77; Steph. B. s. v.), a town of Thrace not far from the borders of the Attamians. It contained a cave of Beate, a tem-
ple of Apollo, and another of Aphrodite, which two deities hence derived the epithet of Zerynthian. (Cf. Liv. xxviii. 41; Ov. Petr. i. 10; Tacit. Germ. ii. 301) It is identified with the Phoca of the Geogr. Rav. (iv. 14) and Tab. Peck, concerning which see above, p. 656.)

ZUGITANA REGIO, the more northern part of the Roman province of Africa. Pliny seems to be the earliest writer who mentions the name of Zygitanis. (v. 4. s. 3.) A town of Zygia is mentioned by Aeschinus (Cosmop. p. 633), and a Zygitanus, apparently a mountain, by Solinus ("a pede Zygitanico," c. 27), which is perhaps the same as the Mons Zygineus of Victor (de Resp. Vandal. iii.); the present Zou-ssem; and according to Shaw (Travels, i. p. 191, seq.), if the existence of a town or montain so named is not altogether the provincial, the province probably derived its name from either one or the other. The district was bounded on the S. by Bysacium, on the W. by Numidia, from which it was divided by the river Tusca (now Zaouia), and on the N. and E. by the Mare Internum. After the time of Caesar it appears to have been called Province V. 443, or Zycia Propria, as opposed to the later acquired Numidia. (Dion. Cass. XLII. 10; Plin. L. c. Maius, i. 7.) Strabo mentions it only as a Zygianus, or the province of Cartagae. (vi. p. 267. &c.) It is mentioned by the modern Frigaids, which is a town on the river which divides the country of Zygia from that of the Byzas, and was a very fertile country. There were no towns of importance in the interior, but on the coast we find, for example, Neapolis, Carthage, Aspis, Carpes, Carthage, Carthago, Carthaengis, Utica, and Hippo Diarrhytus. For further particulars concerning this province see AFRICA.

ZUGMJA. 1. (Zyugma, Plut. v. 15, § 14), a town mentioned by Seleucus Nicator, the general of Cyrrhestica, in Syria. It derived its name from a bridge of boats which was here laid across the Euphrates, and which in the course of time became the principal passage over the river, when the older one at Thapsacus, 2000 stadia to the S., had become impracticable, or at all events very dangerous, owing to the spreading of the Arabian horses. (Plut. v. 14. a. 21; Strab. xvi. p. 746; Steph. B. c. v.) Zygma lay on the right bank of the Euphrates, opposite to Amasia, 72 miles SW. of Samosata, 175 miles NE. of the martitime Seleucia, and 36 miles N. of Hierapolis. (Plin. l. c. and v. 12. a. 13; Strab.xvi. p. 749; Tab. Peck.) It was therefore opposite to the modern Bagdad, which occupies the site of the ancient Amasia. (Cf. Ritter, Erdkunde, x. p. 944. seq.) The town of Justinianus, Zygma had fallen into decay, but was restored by that emperor. Proosp. de Aed. ii. 9, p. 327, ed. Bonn.) (Cf.

ZYPHANE. Polyb. v. 43; Dion Cass. xi. 17, xii. 19; Ilex viii. 256; Hist. anc. pp. 384, 185, &c.)

ZICCHI (Zarxoi, Attic. Perip. F. Naz. vii. 7, § 7), a savage practical tribe of Aegyptiaca, on the coast of the Pontus Euxinus, living between the Aegaen and Zygus rivers. The name is applied to Zygus and Zygus (R. Gotch. iv. 4, B. Per. ii. 5), and by Strabo, Zygae (i. p. 129, xi. p. 492, 493), and indeed, he means the same people, as he places them in the interior of the Caucasia. (T. E. D.)

ZIGAE, a people of Sarmatia, on the lower (Plin. vii. 7. & 7.)

ZIGEB, a place in Lower Mysia, in the neighbourhood of Aziopolis. (Plin. iv. 11. 18.)

ZIGUENISI MONS. [Zygitanis.]

ZIKLAG, a town in the tribe of Simeon (xxv. xix. 5), which at first belonged to the Philistine city of Gath (1 Sam. xxvii. 5), but was annexed to the kingdom of Israel by David. (1 Chron. xi. 8.) It appears to be the same as that called Ziklag, in the geographical (Ant. v. 14) and Zeyk, a ruinous town, now entirely destroyed. (Robinson, Trav. p. 424.)

ZILLA (Mel. iii. 10; Zekilah or Aqila, Plut. vi. § 2), a river on the W. coast of Mauritania Tarantana, which fell into the sea near the town of the same name, N. of the Lixus. It is still called Zylla.

ZILLA. (Mel. iii. 10; Zekilah, Zekilah, and Zilla, Plut. iv. § 13, viii. 13. § 4; Zylla and Zilla, Strab. v. 827, iii. 140.) A town of some importance on the W. coast of Mauritania Tingitana, a month of the like-named river, and on the immediate E. of the Lixus; it was founded by the Carthaginians, and made a colony by the Romans, with the surnames of Julia Constantia, and Julia Felix. (Plin. l. c.) According to Strabo (iii. p. 140), the Roman implanted the inhabitants, as well as some of the populace of Tingis, to Julia Justinia in Spain. The place is still called Zylla, Zylla, Ar-Zilla.

ZIMARA (Zyroma), a town of Mysia, on the road from Sestai to Mel indeed, between Isibis and Tousura. (11. Hist. p. 208; Tab. v. § 7.) Tab. Peck.) The exact site is still matter of uncertainty, some finding traces of it near Patara, others near Diodorus, and others near Kenea. (Erez. Erdkunde, x. p. 500.)

ZINGS PROMONTORIUM (Zygi promont.) (v. 9, iv. 7. & 7), probably the Modern Mem. a promontory on the eastern coast of Africa about 10° N. It was conspicuous from its fortifications and its elevation above a level shore of many many miles in extent. (W. B. D.)

ZIOBERIS, a small river of Parthia mentioned by Curtius (vi. 4. § 4). It is probably the same as the Ziboros (Zabors) of Diodorus (xvii. 23), which flowed under the earth in some places, and at last fell into the Rhedas (Curt. v. 4. § 6).

ZION. [Sion.] ZIPEL. [Zippel.]

ZIPHA (Zipha, Zippa, or Ziphah, Plut. iv. § 16), a mountain in the interior of Libya. (T. E. D.)

ZIPHENE (Zephren, Joseph. Antiq. vi. 13), a district of Palæstina, in the neighbourhood of the

COIN OF ZEUGMA.
ZIRIDAVA.

which probably took its name from Ziph. [v. 14. stepped Byza notices it, quoting sphynx. [Stroph.]

[A.]

AVLA (Zapleha, Ptol. iii. 8. § 8), a town, a, most probably Seraeka on the Broooch enich. Iatri Accolae, i. p. 296. [T. H. D.]

N.E (Tab. Pest. Zol. 1. 307. with various readings, in A. Ant. p. 332), a

Thrace, on the Hebrus, between Trajanon and Ptolemais. Richard places it on the
